Fellowship No. 3480

December 2021

Dear Dr Kumar,

I am delighted to advise you that at the last meeting of the RES Council you were elected to the Fellowship of the Society.

A Certificate, identifying you as a Fellow, duly signed and sealed is enclosed herewith, or, will follow shortly. You are now entitled to use the suffix F.R.E.S., as a Fellow of the Royal Entomological Society. This privilege would lapse on resignation.

Should you be able, at some stage, to attend one of the Society's Meetings, you will be given an opportunity to sign the Obligations Book, this dates from the foundation of the Society and obliges Fellows to do all in their power to promote the Society and Entomological Science. Your name would then join that of Alfred R Wallace and Charles Darwin to name, but two, distinguished past Fellows.

For your information, I enclose a copy of 'Antenna' our house magazine, which is published quarterly and which you will receive as part of your Fellowship. I also enclose some current leaflets and a brief outline of the Society.

Details of meetings can be found in 'Antenna' or on the RES website www.royensoc.co.uk together with other information about the Society and its activities. The Society has UK regions and the Regional Honorary Secretary for each Region can be found on the website under the Contacts listing. Each Region has at least one large meeting per year which is open to Fellows at a privileged rate. Each year the Society organises a National Science Meeting, also, biennially, in conjunction with an International Symposium, of 2/3 days duration, these are to be found under the "Ento" sequence of meetings. Usually these are held at a leading University and again a special Fellowship rate applies.

To Whom It May Concern!

It gives me immense pleasure to write about my research collaborator Dr. Sudisha Jogaiah, Visiting Professor to my Laboratory of Molecular Farming in Viticulture, College of Horticulture, Nanjing Agricultural University, CHINA for a period of two months. During our research collaboration I have come across Dr. Sudisha Jogaiah as an erudite scientific scholar with high integrity and ability to get along very well with colleagues and helping them in times of need.

He has been associated with number of challenging on-going projects on the application of grape physiology and molecular biology in viticulture in my laboratory. During his stay, our graduate students and some fruit scientist in China were also benefited. His skills of impeccable planning, meticulous organization and eye for the smallest scientific detail are highly appreciated.

Thank you!
