	Total Marks/credits for I Semester (Excluding OEC)	125	375	500	20	20

### III Semester

S. No.	Details (Course Type/Name)	Max. marks	Max. marks	Total marks	Hours per week	Credits
<b>(A)</b>	<b>Compulsory Courses</b>	Int. Assmt. marks	End Sem. marks			
1	Course I. (AIH.3A.1) North Indian Art and Architecture	25	75	100	4	4
2	Course II. (AIH.3A.2) Indian Archaeology	25	75	100	4	4
3	Course III (AIH.3A.3) Indian Palaeography and Epigraphy	25	75	100	4	4
4	Course IV (AIH.3A.4) Harappan Civilization	25	75	100	4	4
<b>(B)</b>	<b>Specialization Course (Any one only)*</b>					
1	Course V. (AIH.3B.1) Inscriptions of the Mauryas	25	75	100	4	4
2	Course V. (AIH.3B.2) Ancient Indian Social Institutions	25	75	100	4	4
3	Course V. (AIH.3B.3) Indian Cultural Expansion in Southeast Asia	25	75	100	4	4
4	Course V. (AIH.3B.4) Indian Painting	25	75	100	4	4
5	Course V. (AIH.3B.5) Dissertation based on study of Museum exhibits, collections and display, prepared under the guidance of a teacher in the Dept.	-	100	100	4	4
<b>(C)</b>	<b>Open Elective Course</b>					

1	Course I. (AIH.3C.1) History of Indian Religious Thought	25	75	100	4	4
	Total Marks/credits for I Semester (Excluding OEC)	125	375	500	20	20

#### IV Semester

S. No.	Details (Course Type/Name)	Max. marks	Max. marks	Total marks	Hours per week	Credits
<b>(A)</b>	<b>Compulsory Courses</b>	Int. Assmt. marks	End Sem. marks			
1	Course I. (AIH.4A.1) South Indian Art and Architecture	25	75	100	4	4
2	Course II. (AIH.4A.2) Selected inscriptions of India	25	75	100	4	4
3	Course III. (AIH.4A.3) Indian Numismatics	25	75	100	4	4
4	Course IV (AIH.4A.4) Ancient World Civilizations	25	75	100	4	4
<b>(B)</b>	<b>Specialization Course (Any one only)*</b>					
1	Course V. (AIH.4B.1) Inscriptions of the Early Kadambas	25	75	100	4	4
2	Course V. (AIH.4B.2) Archaeology of Karnataka	25	75	100	4	4
3	Course V. (AIH.4B.3) Art of the Chalukyas of Badami	25	75	100	4	4
4	Course V. (AIH.4B.4) Dissertation based on field work (Field Survey of Inscriptions/Archaeological remains/ Monuments etc.) prepared under the guidance of a teacher in the Dept.	-	100	100	4	4
<b>I</b>	<b>Open Elective Course</b>					
1	Course I. (AIH.4C.1) Cultural History of Karnataka (Up to 14 <sup>th</sup> Century)	25	75	100	4	4
	Total Marks/credits for I Semester (Excluding OEC)	125	375	500	20	20
	Grand total of all 4 Semesters (Excluding OEC)			2000		80

**Note: The Dept Council shall decide the particular specialization course or courses to be offered during a particular academic year for I to IV Semester**

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPT OF ANCIENT INDIAN HISTORY & EPIGRAPHY**  
**Programme and Course Programme Specific Subjects and Course**  
**ANCIENT INDIAN HISTORY & EPIGRAPHY**

**All Subjects and Units :**

<b>All Subjects and Units</b>	
<b>PC1</b>	<b>History of North India</b> -Sources for the study of History of North India, Polity and Culture of Early and Later Vedic periods, North India between 6 <sup>th</sup> Century BC and 3 <sup>rd</sup> Century BC: Mahajanapadas-Rise of Magadha-Alexander's invasion, The Mauryas, Chandragupta Maurya-Ashoka and his Dharma-Décline of Mauryas, North India from 200 BC to 300 AD: Sungas and Kanvas – Indo-Greeks-Sakas-Kushanas, The Guptas-Political history-Cultural history, Harshavardhana and his times, Gurjara Pratiharas, Palas and other Rajput dynasties, North India on the eve of Delhi Sultanate.
<b>PC2</b>	<b>Historical Method</b> - History: definition, nature, scope and use, Relation of History with other sciences, A survey of development of historical thought to the end of twentieth century, Historical methodology: concepts, heuristics, criticism, synthesis and exposition, Problems connected with interpretation of the sources of Ancient Indian History: archaeological, epigraphic, art-historical and literary, Computer in historical research
<b>PC3</b>	<b>Introduction to Archaeology</b> -Definition, Nature, scope and use of Archaeology, Archaeology and other sciences, A Survey of History of Archaeology in the West, History of Archaeology in India, New Archaeology and post-processual Archaeology, Underwater Archaeology, Archaeological terms and artifacts associated with pre- and proto-history, Evolution of Man, Dating Methods in Archaeology-Absolute and Relative, Preservation-Antiquities – Organic materials-Principles of conservation of archaeological monuments, Computer in Archaeology.
<b>PC4</b>	<b>Indian Political Institutions</b> - Sources of Study, State-Theories of Origin-Saptangas, Origin of kingship-Position and functions of the king, Council of Ministers, Law and Justice,Taxation, Inter-state relationship ,Spy system,Vedic Polity, Republics, Administration under Mauryas, Guptas, Chalukyas, Cholas, Vijayanagara

### **AIH&E-PG31T102-Historical Method:**

**Total Hours : 48**

### **Course Outcome**

**Upon Completion of the course, the students will be able to**

- Explain the definition and usage of the term in different types.
- Apply the knowledge and skills acquired during the course.
- Understand where the concept fits within the analysis.
- Introduce the concept of the all Thinkers

**Unit-1.** History: definition, nature, scope and use

**Unit-2.** Relation of History with other sciences

**Unit-3.** A survey of development of historical thought to the end of twentieth century

**Unit-4.** Historical methodology: concepts, heuristics, criticism, synthesis and exposition

**Unit-5.** Problems connected with interpretation of the sources of Ancient Indian History: archaeological, epigraphic, art-historical and literary.

**Unit-6.** Computer in historical research

**AIH&E-PG31T103-Introduction to Archaeology:  
 Total Hours : 48**

**Course Outcome**

**Upon Completion of the course, the students will be able to**

- Use of the dating method
- Archaeology and other Divisions (disciplines)
- Archaeology is a Relationship with different disciplines
- Study of Archaeology help to build History

**Unit-1.** Definition, Nature, scope and use of Archaeology

**Unit-2.** Archaeology and other sciences

**Unit-3.** A Survey of History of Archaeology in the West

**Unit-4.** History of Archaeology in India

**Unit-5.** New Archaeology and post-processual Archaeology

**Unit-6.** Underwater Archaeology

**Unit-7.** Archaeological terms and artifacts associated with pre- and proto-history

Evolution of Man

**Unit-8.** Dating Methods in Archaeology – Absolute and Relative

**Unit-9.** Preservation – Antiquities – Organic materials - Principles of conservation of archaeological

monuments

## **Unit-10. Computer in Archaeology**

# **KARNATAK UNIVERSITY, DHARWAD**

NAAC Accredited 2014

## **DEPARTMENT OF ANTHROPOLOGY**

### **CHOICE BASED CREDIT SYSTEM**

**(I to IV Semesters)**

**With effect from 2020-21**

**KARNATAK UNIVERSITY, DHARWAD**

**DEPARTMENT OF ANTHROPOLOGY**

**CHOICE BASED CREDIT SYSTEM**

**M.A. /M.Sc. ANTHROPOLOGY**

Anthropology as a systematic body of knowledge provides an understanding of the tremendous human diversity in biological, social-cultural and historical dimensions and their interrelationships. There are four major divisions of Anthropology, namely Social-Cultural, Biological, Archaeological and Linguistic Anthropology. The curriculum in Anthropology at the postgraduate level envisages imparting the holistic knowledge encompassing all its branches through theoretical, practical and field-based ethnographic work.

At Present, the Department of Anthropology provides opportunity for advanced study in Social-Cultural and Biological Anthropology in the form of lectures, tutorial, guidance, Practicals, intensive fieldwork and seminars. Facilities for research leading to the award of Ph.D degree are also available in these two branches.

The postgraduate syllabus of anthropology has been divided into two phases--namely, Core course and Elective course. While the Core course, taught during the I and II Semesters, is common for all, the students can choose either Social-Cultural anthropology or Biological anthropology as Elective course for the III and IV Semesters. The specializations are designed to impart advanced knowledge in the respective areas.

**GENERAL REGULATIONS:**

**Semester System course under the Choice Based Credit System (CBCS) from the year 2008 – 2009 onwards.**

**1) Courses offered and duration of the course**

Master of Anthropology : MA / M-Sc.

Areas of Specialization: 1. Social-Cultural Anthropology  
2. Biological Anthropology

- 2) M.A/M.Sc. (Anthropology) shall be spread over a period of Two Academic Years consisting of four semesters. The duration of each semester shall not be less than 16 weeks or more than 18 weeks.
- 3) Maximum period prescribed for completion of all the requirements for the award of the degree is two academic years from the date of admission failing which the candidate shall register afresh in the MA/M.Sc. Programme.

#### **4) Eligibility Criteria for Admission**

The students who have successfully completed the three-year / four-year Degree course or any other Degree course of this University or of any other University recognized as equivalent thereto by this university shall be eligible for admission to the Post Graduate Programs under the KU-CBCS Program provided they also satisfy the eligibility conditions like percentage of marks etc. as may be prescribed by the University and as per Ordinance of the course.

#### **5) Attendance**

Each semester shall be taken as a unit for the purpose of calculating attendance and a student shall be considered to have put in the required attendance for the semester if he has attended not less than 75% of the number of working periods (Lectures and seminars taken together) during each semester.

**6) Choice Based Credit System** is introduced from the Academic year 2008-2009 for MA/MSc. Course in Anthropology. There are three categories of courses.

- a) Compulsory Course means fundamental papers which the student admitted to a particular Post-graduate Programme should successfully complete to receive the Post Graduate Degree in the concerned subject and which cannot be substituted by any other course;
- b) Specialization Papers mean advanced papers and departmental choices that student can opt as a special paper under a particular department only especially for students wanting to receive Degrees in those specialization areas;
- c) 'Open Elective Course' means a course offered by Department for students of other Departments in the same school or in other schools. Students have freedom to choose from a number of optional courses offered by other Department to add to their credits required for the completion of their respective programs;
- d) Credit means the unit by means of which a course work is measured.
- e) The departments in Social Science shall have 72 credits for the course subjects without practical and field-work and the departments with practicals/fieldwork shall have 96 credits.

**7) The medium of instruction shall be in English, except in languages.**

#### **8) Course Structure (For each semester)**

- (a) Compulsory Courses – 4 credits per week
- (b) Specialization courses (In III and IV Semesters only) – 4 credits per week

- (c) Open Elective Course (OEC)– 4 credits per week
- (d) The student shall register for minimum of 22 credits and maximum of 26 credits per semester. The student has to clear the minimum credits per semester.

### **9) Scheme and Hours of Instruction**

In each Semester, there shall be six papers. Each paper shall carry a minimum 4 hours of teaching per week.

### **10) Scheme of Examination**

- a) The University shall conduct an examination after the conclusion of every Semester Programme.
- b) The composition of theory and internal assessment marks for each paper shall be 75 and 25 respectively. Duration of examination for theory paper of 75 marks shall be of 3 hours.
- c) The Internal Assessment marks are 25 for each paper.

### **11) Dissertation:**

All those enrolled in the MA/M.Sc. Programme shall write a Dissertation under the guidance of a course teacher during their Fourth Semester based on the fieldwork data. Dissertation shall carry 100 marks allocated as follows:

Dissertation-Writing..... 80 marks  
Viva-voce.....20 marks

The viva-voce shall be conducted by a Board of Examiners comprising of the concerned guide of the candidate and one external examiner.

- 12) The intake capacity for the MA/MSc. Semester CBCS course in Anthropology is 36 students every year. Enhanced payment seats will be available as per the university rules.
- 13) Attendance rules for granting semester terms as per the rules of the University.
- 14) Fees, Applications form for admission, scholarship, library and cultural activities as per rules of the University.

**COURSE STRUCTURE AND SCHEME OF EXAMINATION FOR I, II, III, AND IV SEMESTERS**

## **Programme Specific Outcomes (PSOs)**

After completion of this programme, the students will be able to:

1. Discuss human diversity which leads to a better understanding of different cultures of the world and therefore respect culture differences.
2. Describe how evolutionary and historical processes have shaped primates and human ancestors and lead to the biological, behavioral, and cultural diversity seen in the present.
3. Use Anthropological skills in different professions especially in the field of research and development, teaching, government and non government services.
4. Learn the methods and significance of ethnography as a research approach and methods.
5. Integrate and apply Anthropological concepts and methods to investigate human issues from the bio-cultural perspective.
6. Demonstrate the skills necessary to collect, analyze, and interpret within the context of anthropological theory and methods.
7. Demonstrate a thorough understanding of the various building blocks of culture.
8. Demonstrate the ability to follow ethical and professional standards for cultural sensitivity in interpersonal and cross-cultural interactions.
9. Demonstrate a thorough understanding of the ways evolutionary biology and culture interact to influence human health and behavior over time and in cross-cultural perspective.
10. Demonstrate the field and laboratory skills necessary to collect, analyze, and interpret the intersections of human biomarkers and ethnographic data within the contexts of current biocultural methods and theories.
11. Successfully employ the field and laboratory skills necessary to collect, analyze, and curate the material remains of past cultures and their environments, and interpret those remains within the context of current archaeological theory.
12. Demonstrate a thorough understanding of the diversity of past cultures and lifeways dating to the prehistoric and early historic eras.
13. Demonstrate a general understanding of human cultural and biological differences and similarities across the world and through time in terms of anthropological data and theories.
14. Provide a holistic approach to understanding human differences and similarities and our place in nature as a member of Primate.
15. Formulate significant abilities in critical thinking and reasoning pertaining to different social cultural and biological aspects of human problems and issues.
16. Students will develop an understanding of local and global processes and social complexity through space and time.
17. Will be able to interpret and analyze both qualitative and quantitative data, design and conduct a research projects, enhance communication and presentation skills, solving problems and identifying solutions.

<b>Paper Code and Name</b>	<b>PG32T101 : INTRODUCTION TO ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Demonstrate mastery of basic socio-cultural anthropology vocabulary words and the analytical ideas that underlie their usage.
CO 2	Apply anthropological terms and concepts in cross-cultural contexts to reflect and write substantively on ways in which human beings find fulfillment in community.
CO 3	Critically evaluate popular representations of cultures and peoples around the world.
CO 4	Master typological and processual approaches to the study of marriage, family and kinship
CO 5	Understand distinguish British and American versions of Social-Cultural Anthropology

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Meaning and scope of Anthropology</b>	
– Main branches of Anthropology: Social Cultural Anthropology, Biological/Physical Anthropology, Archaeological Anthropology and Linguistic Anthropology.	12 Hours
<b>Unit II : Social-Cultural Anthropology and its Relationship with other disciplines</b>	
– History, Political Science, Economics, Psychology and Medical Science and Humanities. – Distinctiveness of Social Cultural Anthropology from Sociology. – British and American versions of Social-Cultural Anthropology	12 Hours
<b>Unit III : Basic Concepts</b>	
– Society, Culture, Community, Group, Association, Institution, Status and Role, Social Structure and Social Organization	14 Hours
<b>Unit IV : Kinship</b>	

<ul style="list-style-type: none"> <li>– The idea of Kinship System and its relationship to the Social Structure.</li> <li>– Principles of Descent, Inheritance, Succession and Residence (Unilineal, Bilateral and Cognatic Principles).</li> <li>– Descent and Filiation.</li> <li>– Jural and Political Aspects of Kinship.</li> <li>– Kinship usages</li> <li>– Relationship between Proximate and Alternate Generations.</li> <li>– Kin Terms and Kin Terminological Systems.</li> <li>– Morgan’s Classification of Descriptive and Classificatory System.</li> </ul>	14 Hours
<b>Unit V : Marriage and Family</b>	
<ul style="list-style-type: none"> <li>– Nature and Forms of Marriage</li> <li>– Debate on the Universal Definition of Marriage.</li> <li>– Marriage Regulations: Prescriptive and Preferential marriage systems, Marriage Alliance, Marriage Payments, Marriage Stability, Incest Prohibition.</li> <li>– Marriage in India.</li> <li>– Types and functions of Family; Family, Household and Domestic groups.</li> <li>– Universality of Family</li> <li>– Functions of Family.</li> <li>– Typological and Processual Approaches to the study of Family.</li> <li>– Indian Joint Family System.</li> <li>– Stability and Change in Family</li> <li>– Impact of Urbanization, Industrialization</li> <li>– Education and Feminist Movement on Family.</li> </ul>	14 Hours

<b>Paper Code and Name</b>	<b>PG32T102 : BIOLOGICAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Identify the relationship with other branches of Anthropology and other interdisciplinary disciplines.
CO 2	Distinguish between man and apes anatomically
CO 3	Examine the fossil evidences of different stages of human evolution.
CO 4	Demonstrate the basics of human genetics.
CO 5	Identify different races of the world and India.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Introduction</b>	
<ul style="list-style-type: none"> <li>– Meaning and scope of Biological Anthropology</li> <li>– Its relation to other biological sciences.</li> <li>– Theories of Organic Evolution: <ul style="list-style-type: none"> <li>– Lamarckism</li> <li>– Darwinism</li> <li>– Neo-Darwinism.</li> </ul> </li> </ul>	10 Hours
<b>Unit II : Primates</b>	
<ul style="list-style-type: none"> <li>– Man's place in the animal kingdom</li> <li>– The order primate.</li> <li>– Comparative account of the primates with special reference to man and apes.</li> </ul>	14 Hours
<b>Unit III : Palaeontological evidence for Human Evolution</b>	
<ul style="list-style-type: none"> <li>– Austolopithecines</li> <li>– Pithecanthropines</li> <li>– Neanderthals</li> <li>– Homo sapiens.</li> </ul>	12 Hours
<b>Unit IV : Principles of Human Heredity</b>	

<ul style="list-style-type: none"> <li>– Anthropology and Genetics.</li> <li>– Cell structure and function.</li> <li>– Cell divisions and their genetic significance.</li> <li>– Blood Groups: ABO System, Rhesus Blood Groups.</li> <li>– MN System.</li> </ul>	14 Hours
<b>Unit V : Human Variation</b>	
<ul style="list-style-type: none"> <li>– The concept of race and Racism.</li> <li>– Criteria of racial classification.</li> <li>– Major races of the world.</li> <li>– Racial classification of Indian Population.</li> </ul>	14 Hours

<b>Paper Code and Name</b>	<b>PG32T103 : LINGUISTIC ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Apply theory to practice by conducting your own mini field-work projects.
CO 2	Integrate your classroom learning into your primary research and, eventually, into your daily lives.
CO 3	Apply morphology and syntax in day-to-day communication
CO 4	Analyze ethnography of speaking and communication in different communities
CO 5	Gain expertise in Linguistic etiquettes like greetings, songs and dirges.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Linguistic Anthropology</b>	
<ul style="list-style-type: none"> <li>– Meaning and Scope of Linguistic Anthropology</li> <li>– Language and Communication</li> <li>– Universal Features of Language; Sign, Sign systems and Semiotics</li> <li>– Linguistics: Phonology and Grammar</li> </ul>	12 Hours
<b>Unit II : Phonology</b>	
<ul style="list-style-type: none"> <li>– Phonetics and Phonemics.</li> <li>– Branches of Phonetics: Articulatory, acoustic and auditory</li> <li>– Phonemics: Premises and Procedures – Four Basic Premises</li> <li>– Procedures: Preliminary and Analytic - Separating and Uniting.</li> <li>– Contrast and Complementation</li> </ul>	14 Hours
<b>Unit III : Grammar</b>	
<ul style="list-style-type: none"> <li>– Morphology and Syntax.</li> <li>– Morphology: Identification of Morphemes, Types of Morphemes</li> <li>– Syntax: Transformational – Generative Grammar.</li> <li>– Deep Structure and Surface Structure.</li> <li>– Structuralism in Linguistics and in Anthropology.</li> <li>– Semantics.</li> <li>– Classification of Languages: typological, genetic and aerial</li> </ul>	14 Hours

<b>Unit IV : Ethnolinguistics</b>		
<ul style="list-style-type: none"> <li>– Relationship between Language and Culture</li> <li>– Ethno linguistics and Linguistic anthropology</li> <li>– Ethno science and ethnography of speaking and communication.</li> <li>– Language and Society</li> <li>– Diglossia</li> <li>– Variation in speech: Idiolect, Variety, Dialect and Language</li> <li>– L Dialect Atlas.</li> </ul>		12 Hours
<b>Unit V : Sociolinguistics</b>		
<ul style="list-style-type: none"> <li>– Semantics</li> <li>– Cognitive Anthropology</li> <li>– Componential Analysis</li> <li>– Sapir-Whorf Hypothesis</li> <li>– Linguistic Acculturation</li> <li>– Bilingualism</li> <li>– Standard Language.</li> <li>– Linguistic etiquettes – greetings, songs, dirges.</li> </ul>		12 Hours

<b>Paper Code and Name</b>	<b>PG32T104 : COMPARATIVE ETHNOGRAPHY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Compare ethnography to other forms of cultural representation such as journalism, film and creative non-fiction
CO 2	Discuss the intent of the researcher, impact on audience, and consequences for Communities.
CO 3	Comparative understanding different cultures around the world
CO 4	Understand the basis of Indian Unity and diversity
CO 5	Demonstrate diversity of peoples culture by studying monographs outside India

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Ethnology</b>	
<ul style="list-style-type: none"> <li>– Ethnographic studies and their importance in Social-Cultural Anthropology</li> <li>– The distinction between ethnography and ethnology</li> </ul>	10 Hours
<b>Unit II : Ethnographic regions</b>	
<ul style="list-style-type: none"> <li>– The major Ethnological-Ethnographic Regions of the World and their main characteristics.</li> <li>– India as a cultural region.</li> </ul>	10 Hours
<b>Unit III : Cultural zones</b>	
<ul style="list-style-type: none"> <li>– Cultural zones of India.</li> <li>– Salient features</li> <li>– Contributions of N.K. Bose and Irawati Karve</li> <li>– The Basis of Indian Unity.</li> </ul>	12 Hours
<b>Unit IV : Indian monographs</b>	
<ul style="list-style-type: none"> <li>– Study of a monograph on India: One of the following monographs to be selected by the faculty member each year.</li> </ul>	16 Hours

<ul style="list-style-type: none"> <li>– Srinivas M.N: Remembered village 1976</li> <li>– Ishwaran: Shivapur</li> <li>– Epstein: Economic development and social change in South India.</li> <li>– Vidyarthi L.P: Sacred Complex in Hindu Gaya.</li> <li>– Berremen G.D.: Hindus of the Himalayas</li> <li>– Halbar B.G.: Lambani Economy and society.</li> </ul>	
<b>Unit V : Monograph outside India</b>	
<ul style="list-style-type: none"> <li>– Study of a monograph outside India : One of the following monographs to be selected by the faculty member each year. <ul style="list-style-type: none"> <li>– Evans-Pritchard E.E.: The Nuer</li> <li>– Margaret Mead: Coming of Age in Samoa.</li> <li>– Turner V.W: Schism and Continuity in an African Society.</li> <li>– Nagbune: Mind and Body in Zulu Medicine.</li> <li>– Clifford Geertz: Peddlers and Princess.</li> <li>– Colin Turnbull: The Forest People.</li> </ul> </li> </ul>	16 Hours

<b>Paper Code and Name</b>	<b>PG32P105 : PRACTICALS IN BIOLOGICAL AND ARCHAEOLOGICAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Name and identify all the bones in the human skeleton.
CO 2	Identify all the landmarks on human skull and bones and calculate the indices.
CO 3	Identify all the landmarks on human body take measurements.
CO 4	Identify various somatoscopic observations on human body.
CO 5	Determine blood groups with the help of slide method.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Human Anatomy</b>	
<ul style="list-style-type: none"> <li>– Study and identification of bones and bone fragments of human skeleton.</li> <li>– Age and sex determination from skull.</li> </ul>	14 Hours
<b>Anthropometry</b>	
<ul style="list-style-type: none"> <li>– The drawing of various views of cranium and the study of landmarks.</li> <li>– Craniometry: Recording by repetition of the prescribed measurements and the calculations of indices involved on 5 skulls.</li> <li>– Somatometry: Recording by repetition of the prescribed measurements and the calculations of indices required on 5 living individuals.</li> </ul>	25 Hours
<b>Serology</b>	
<ul style="list-style-type: none"> <li>– Somatoscopy: Observations of the prescribed characters on the human body on 5 living subjects.</li> <li>– Serology: The testing and analyses of blood samples of 10 individuals for A, B, O, AB Groups.</li> </ul>	25 Hours

<b>Paper Code and Name</b>	<b>PG32P105 : PRACTICALS IN SOCIAL CULTURAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Understand the new areas of research in Social Anthropology
CO 2	Learn how to prepare questionnaires, research design, review and conduct research in Anthropology
CO 3	Move on for a Ph.D. programme.
CO 4	Able to work as Researchers, consultants and designers
CO 5	Expertise in recording, analyze and report writing

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
– Framing three questionnaire and schedules on the problems given.	12 Hours
– Formulating three research designs.	12 Hours
– Three case studies with analysis.	14 Hours
– Construction of genealogical charts of three families.	12 Hours
– Observation and recording of data on three events.	14 Hours

<b>Paper Code and Name</b>	<b>PG32T201 : COMPARATIVE INSTITUTIONS</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Understand the role of institutions in bringing social change
CO 2	Understand the distribution and consumptions patterns in different societies.
CO 3	Use Anthropological approaches to the study of Religion
CO 4	Distinguish between state and stateless societies
CO 5	Apply Anthropological approaches to the study of Law and Acts

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Politics and Government</b>	
<ul style="list-style-type: none"> <li>– Political Anthropology: Meaning and Scope.</li> <li>– Concepts of Power, Authority and Legitimacy.</li> <li>– Types of Political Organization: Band, Tribe, Chiefdom, and State.</li> <li>– Difference between State and Stateless Societies.</li> </ul>	12 Hours
<b>Unit II : Social Control and Law</b>	
<ul style="list-style-type: none"> <li>– Definition of Law and Legal Anthropology</li> <li>– Cultural Background of Law</li> <li>– Anthropological approach to the study of Law.</li> <li>– Justice in Tribal and Peasant Societies.</li> <li>– Legal Ethnocentrism.</li> </ul>	12 Hours
<b>Unit III : Economic Anthropology</b>	
<ul style="list-style-type: none"> <li>– Meaning and Scope.</li> <li>– Principles governing Production, Distribution and Consumption in hunting, gathering, pastoral, horticultural, and agricultural societies.</li> <li>– Modes of Exchange: Barter, Ceremonial Exchange, Reciprocity, Redistribution, Marketing and Trade.</li> <li>– The Formalist versus Substantivist debate.</li> <li>– New Economic Anthropology.</li> </ul>	14 Hours
<b>Unit IV : Anthropology of Religion</b>	

<ul style="list-style-type: none"> <li>– Definition and Functions</li> <li>– Religion and its relation to other social Institutions</li> <li>– Magic, Witchcraft and Sorcery, Totemism and Taboo, Myth and Ritual,</li> <li>– Religious Functionaries – Priest, Shaman and Medicine Man.</li> <li>– Anthropological Approaches to the study of Religion.</li> <li>– Symbolism in Religion and Rituals.</li> </ul>	14 Hours
<b>Unit V : Social Stratification</b>	
<ul style="list-style-type: none"> <li>– Principles and Bases</li> <li>– Caste, Class and Estate</li> <li>– The major features of Indian Caste System</li> <li>– Caste in India today</li> <li>– The impact of caste on other Religious Groups in India.</li> </ul>	12 Hours

24. Srinivas M N, Caste in Modern India	
<b>Paper Code and Name</b>	<b>PG32T202 : TECHNIQUES AND METHODS IN ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Explain the key research concepts and issues
CO 2	Read, comprehend, and explain research articles in their academic discipline.
CO 3	Handle data processing and data classification and Report making.
CO 4	Expertise in use of native language in ethnographic studies
CO 5	Apply Participatory learning and Assessment (PLA) and Participatory Rapid Assessment (PRA)

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Getting ready for Anthropological Research</b>	
<ul style="list-style-type: none"> <li>– The definition and delimitation of the Research problem</li> <li>– Hypothesis</li> <li>– The concept of Research designs.</li> </ul>	12 Hours
<b>Unit II : Field-work and Field-work Tradition in Anthropology</b>	
<ul style="list-style-type: none"> <li>– Importance of Field-work in Anthropology</li> <li>– Approaches in Anthropological Field-work</li> <li>– Getting acquainted with the field.</li> <li>– Establishing ‘rapport’ and learning the use of native language.</li> <li>– The use of informants, particularly the ‘key informants’.</li> <li>– The importance of diary, field notes logbook.</li> </ul>	14 Hours
<b>Unit III : The basic techniques of data collection</b>	
<ul style="list-style-type: none"> <li>– Observation: participant observation and other type of observation</li> <li>– Interview: Types of Interview</li> <li>– Schedule, Questionnaire: Case study Extended Case-study</li> <li>– Genealogical method</li> <li>– The use of history, personal official and historical documents</li> <li>– Participatory learning and Assessment (PLA) and Participatory Rapid</li> </ul>	12 Hours

Assessment (PRA)	
<b>Unit IV : The processing of data and Report writing</b>	
<ul style="list-style-type: none"> <li>– Classification and Tabulation</li> <li>– Measures of central tendencies – Mean, Median, Mode.</li> <li>– Dispersion and Measure of Dispersion</li> <li>– Standard Deviation</li> <li>– Sampling – types of sampling</li> <li>– Correlation</li> <li>– Chi-square Test</li> </ul>	12 Hours
<b>Unit V : Introduction to computers</b>	
<ul style="list-style-type: none"> <li>– Use of computers in the analysis of data</li> <li>– operating system, office suite and statistical software packages</li> <li>– SPSS</li> <li>– Data handling using SPSS and data analysis</li> <li>– Toolpak in Excel of MS Office</li> <li>– Creating document using word, editing and formatting text and inserting data bases.</li> <li>– Excel work sheet, creating data files in excel, formatting cells.</li> </ul>	14 Hours

<b>Paper Code and Name</b>	<b>PG32T203 : ARCHAEOLOGICAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Explain the significance of anthropology in archaeology and its relationship with other branches.
CO 2	Understand the prehistoric period with reference to geological changes.
CO 3	Identify the age of the artifacts through different archaeological methods
CO 4	Name and identify various prehistoric stone tools.
CO 5	Become familiar with different world civilizations.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Introduction</b>	
<ul style="list-style-type: none"> <li>– Archaeology and its place in the discipline of Anthropology</li> <li>– Relationship with other branches : earth sciences, physical sciences, life sciences, social sciences, archaeological sciences and ethno-archaeology.</li> <li>– The branches of archaeology and their interpretation.</li> </ul>	12 Hours
<b>Unit II : Prehistoric time-scale</b>	
<ul style="list-style-type: none"> <li>– Origin of Earth and Life</li> <li>– Geological Time-Scale.</li> <li>– The Pleistocene Ice Age</li> <li>– Glacial and Interglacial Periods</li> <li>– River terraces and moraines.</li> </ul>	12 Hours
<b>Unit III : Archaeological Methods</b>	

<ul style="list-style-type: none"> <li>– The methods of dating and their relevance of Archaeology.</li> <li>– The stone tool technology and typology during Paleolithic and post Paleolithic times.</li> </ul>	12 Hours
<b>Unit IV : Prehistoric Cultures</b>	
<ul style="list-style-type: none"> <li>– The Paleolithic and Mesolithic Periods in Europe and India, origin, distribution and cultural development.</li> <li>– A Study of the salient features of the Neolithic Cultures in general.</li> <li>– The Indian Neolithic Cultures.</li> </ul>	14 Hours
<b>Unit V : World Civilizations</b>	
<ul style="list-style-type: none"> <li>– The meaning of civilization in general.</li> <li>– The main centers of civilization.</li> <li>– A study of their extent, their distribution and general features.</li> </ul>	14 Hours

<b>Paper Code and Name</b>	<b>PG32T204 : ANTHROPOLOGY OF DR. B.R.AMBEDKAR</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Explain the approaches to the study of Indian society.
CO 2	Learn about Indian society on the basis of some key concepts developed by various anthropologists.
CO 3	Learn about the contributions of some anthropologists to understanding Indian society and culture.
CO 4	Analyze and understand the theory of Broken Men
CO 5	Able to distinguish between touchable, untouchable and shudras

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Emergence and Growth of Anthropology in India</b>	
<ul style="list-style-type: none"> <li>– Racial, Linguistic and social characteristics of Indian Population both tribal and non-tribal.</li> <li>– Indian Population.</li> </ul>	12 Hours
<b>Unit II : Traditional Indian Social structure</b>	
<ul style="list-style-type: none"> <li>– Varna- Brahmana, Kshatriya, Vaishya, Shudra</li> <li>– Ashrama-Brahmacharya, Gruhastha, Vanaprashtha, Sanyasa</li> <li>– Purusharthas-Artha, Kama, Moksha, Karma, Rina and Rebirth</li> <li>– Castes in India</li> <li>– Caste system</li> <li>– Untouchables</li> <li>– Purity and Pollution</li> <li>– Infection of Imitation</li> <li>– Structural basis of inequality of Indian society.</li> </ul>	16 Hours

<b>Paper Code and Name</b>	<b>PG32P205 : PRACTICALS IN BIOLOGICAL AND ARCHAEOLOGICAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Take the printed impressions of the palm and identify various pattern types.
CO 2	Draw the main line formula and understand the pattern
CO 3	Draw and name different prehistoric stone tools.
CO 4	Identify and describe various prehistoric stone tools.
CO 5	Identify ancient pottery wares, bone and iron tools.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Dermatoglyphics</b>	
– Ability to take inked impressions and to identify the pattern types and main line formula on finger palm prints of at least 10 individuals.	32 Hours
<b>Archaeological Anthropology</b>	
– Prehistory: Identification, drawing and description of the prescribed representative tool types: Paleolithic, Mesolithic and Neolithic Periods. – Sketches of various forms of Pottery wares, Bone tools and Iron tools available in the Department.	32 Hours

<b>Paper Code and Name</b>	<b>PG32T206 : FOUNDATIONS OF ANTHROPOLOGY (OPEN ELECTIVE)</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Demonstrate mastery of basic socio-cultural anthropology vocabulary words and the analytical ideas that underlie their usage.
CO 2	Understand biological and genetic aspects of human variation.
CO 3	Apply anthropological terms and concepts in cross-cultural contexts to reflect and write substantively on ways in which human beings find fulfillment in community.
CO 4	Understand prehistoric cultures through various stone tool typologies.
CO 5	Critically evaluate popular representations of cultures and peoples around the world.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : History, Meaning and Scope of Anthropology</b>	
<ul style="list-style-type: none"> <li>– Other branches of Anthropology: <ul style="list-style-type: none"> <li>– Social-Cultural Anthropology</li> <li>– Physical/Biological Anthropology</li> <li>– Archaeological Anthropology</li> <li>– Linguistic Anthropology.</li> </ul> </li> <li>– Relationship with Life Sciences, Social Sciences, Humanities and environmental Sciences.</li> </ul>	12 Hours
<b>Unit II : Biological Anthropology</b>	
<ul style="list-style-type: none"> <li>– Human evolutionary studies</li> <li>– Human variation</li> <li>– Human Genetics</li> <li>– Human Growth and development.</li> </ul>	14 Hours
<b>Unit III : Social Cultural Anthropology</b>	
<ul style="list-style-type: none"> <li>– Culture, society, community.</li> <li>– Human Institutions: <ul style="list-style-type: none"> <li>– Family</li> </ul> </li> </ul>	12 Hours

<ul style="list-style-type: none"> <li>– Marriage</li> <li>– Kinship</li> <li>– Religion</li> <li>– Development and Change</li> <li>– Research Methods: Tools and Technique.</li> </ul>	
<b>Unit IV : Archaeological Anthropology</b>	
<ul style="list-style-type: none"> <li>– Meaning and scope,</li> <li>– Branches of Archaeology.</li> <li>– Tool techniques and types.</li> <li>– Dating methods: relative and absolute</li> <li>– Cultural evolution</li> <li>– Broad outlines of pre-historic cultures and chronology.</li> </ul>	14 Hours
<b>Unit V : Linguistic Anthropology</b>	
<ul style="list-style-type: none"> <li>– Anthropology and Linguistics</li> <li>– Speech, language and dialect.</li> <li>– Semantics and Lexicon</li> <li>– Phonetics and phonemix</li> <li>– Morphemix and syntax socio-linguistics.</li> </ul>	12 Hours

<b>SPECIALIZATION : SOCIAL CULTURAL ANTHROPOLOGY (Group A)</b>	
<b>Paper Code and Name</b>	<b>PG32T301A : ANTHROPOLOGICAL THEORIES</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Distinguish the classical theories of culture like evolutionism, diffusions and culture area.
CO 2	Understand historical particularism and neo-evolutionism.
CO 3	Learn about functionalism, structuralism and other more recent theories.
CO 4	Formulate research questions and hypotheses, testing of hypotheses, etc.
CO 5	Perform Restudy and Reinterpretation in Anthropology

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Evolutionism</b>	
<ul style="list-style-type: none"> <li>– Nineteenth Century Evolutionism - Tylor and Morgan</li> <li>– Criticism of Nineteenth Century Evolutionism</li> <li>– Evolutionism in Biology and Anthropology compared - Julian Huxley.</li> <li>– Contemporary trends in Evolutionary Studies: <ul style="list-style-type: none"> <li>– Universal Evolution</li> <li>– Multilinear Evolution</li> <li>– Specific and General Evolution</li> </ul> </li> <li>– Diffusionism: Criticism of British and German–Austrian Schools of Thought and American Distributionists.</li> <li>– Historical Particularism: Franz Boas and his contributions</li> <li>– Criticism of ‘The Comparative Method’</li> <li>– Comparison in Anthropology: Nature, Purpose and Methods: Radcliffe-Brown, Fred Eggan, Oscar Lewis and Gopala Sarana.</li> </ul>	14 Hours
<b>Unit II : Culture and Personality</b>	
<ul style="list-style-type: none"> <li>– Relevance of psychological categories and approaches for culture and personality studies in Anthropology.</li> <li>– Patterns Of Culture</li> <li>– Basic Personality Structure</li> <li>– Modal Personality</li> <li>– National character studies</li> </ul>	12 Hours

<ul style="list-style-type: none"> <li>– Studies of culture at a distance</li> <li>– Recent trends in Psychological Anthropology</li> </ul>	
<b>Unit III : Functionalism</b>	
<ul style="list-style-type: none"> <li>– Malinowski's contribution</li> <li>– Radcliffe-Brown's arguments</li> <li>– Relevance of the concepts of Manifest and Latent functions Eufunction/Dysfunction</li> <li>– Function and Cause</li> <li>– Structural functionalism: Radcliffe-Brown, Firth, Fortes and Nadel</li> <li>– Social structure</li> <li>– Societal structure.</li> <li>– Relationship between Linguistics and Anthropology</li> <li>– Structuralism of Levi Strauss</li> <li>– Leach's view of Social Structure as a model.</li> <li>– The Structuralist method in the study of myth and alliance.</li> <li>– Ethno science</li> <li>– New ethnography</li> <li>– Formal semantic analysis.</li> </ul>	14 Hours
<b>Unit IV : Social Anthropology and History</b>	
<ul style="list-style-type: none"> <li>– A Critical Examination of the plea for the unity of method in natural and social sciences.</li> <li>– Scientific and Humanistic approaches to be distinguished.</li> <li>– The nature of Anthropological method and the notion of its autonomy.</li> <li>– Explanation in science and in history: <ul style="list-style-type: none"> <li>– Hempelian covering law model of explanation.</li> <li>– Possibility and nature of explanation in Social-Cultural Anthropology.</li> </ul> </li> <li>– Restudy and Reinterpretation in Anthropology.</li> </ul>	12 Hours
<b>Unit V : Symbolism and Anthropology</b>	
<ul style="list-style-type: none"> <li>– Contribution of Schneider, Needham and Turner.</li> <li>– Interpretive Anthropology: Contribution of Greetz.</li> <li>– Post modernism and Anthropology.</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>PG32T303A : ANTHROPOLOGY OF DEVELOPMENT AND PLANNING</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Learn about development anthropology, development debates, and the relationship between culture and development.
CO 2	Learn about various tribal development plans and projects implementation
CO 3	Learn about how to review development projects and prepare reports on the same.
CO 4	Learn about development anthropology, development debates, and the relationship between culture and development.
CO 5	Apply Gandhian Approach to Development

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Introduction</b>	
– Emergence of Development Anthropology	12 Hours
<b>Unit II : Theories of Development</b>	
– Meaning and Perspectives of Development – Theories – Adam Smith, Richards, Karl Marx and Schumpeter.	14 Hours
<b>Unit III : Approaches for development</b>	
– Gandhian Approach to Development. – New approaches to development particularly need based development. – Participatory approach in development – Mobilization of local resource – Rural development of India. – Agencies of Development : Governmental and Non-Governmental.	14 Hours
<b>Unit IV : Planning and Development</b>	
– Concept of planning for development – Formulation of policy and plan strategy. – Micro and macro level planning.	12 Hours

<b>Unit V : Displacement and Disaster management</b>	
<ul style="list-style-type: none"> <li>– Displacement and Disaster Management</li> <li>– Displacement situations: Voluntary, involuntary, Natural and Man Made.</li> <li>– Rehabilitation and resettlement : Policies and Management.</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>PG32T304A : MEDICAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Learn about the relationship between anthropology and health.
CO 2	They will learn about epidemiology of communicable diseases.
CO 3	They will also learn about variation in healthcare systems in India.
CO 4	From the practical component they will learn about how to map the diseases, identify the symptoms and take preventive or curative measures.
CO 5	Understand Concepts of culture and life style in relation to health and disease

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Meaning and scope of Medical Anthropology</b>	
<ul style="list-style-type: none"> <li>– Branches of Medical Anthropology.</li> <li>– Concepts of Health, disease and illness</li> <li>– Concepts of culture and life style in relation to health and disease</li> <li>– Socio-cultural dimension of illness</li> <li>– Classification of Disease</li> <li>– Disease causation</li> <li>– Evolution of Diseases</li> </ul>	12 Hours
<b>Unit II : Ethnomedicine</b>	
<ul style="list-style-type: none"> <li>– Indigenous Medical Systems, Magico-religious, Herbal and other indigenous aspects</li> <li>– Preventive, Diagnostic and curative measures and Pharmacopoeia (Magic, Witchcraft, Sorcery)</li> <li>– Folk-lore and Medicine</li> </ul>	12 Hours
<b>Unit III : Diverse Medical System</b>	
<ul style="list-style-type: none"> <li>– Ayurveda</li> <li>– Bio-medical</li> <li>– Siddha</li> <li>– Unani</li> <li>– Homeopathy</li> </ul>	16 Hours

<ul style="list-style-type: none"> <li>– Chinese</li> <li>– Tibetan and others</li> <li>– Basic principle Renaissance of traditional medical systems in the west and in India.</li> <li>– Existence of multiple medical practices</li> </ul>	
<b>Unit IV : Doctor and patient interactions</b>	
<ul style="list-style-type: none"> <li>– Socio cultural backgrounds of doctor and healers and patients</li> <li>– Age, Gender, ethnicity, class, race, family relationship and selected case studies</li> <li>– Psychological Disorder: Biological and Sociocultural Approach</li> </ul>	12 Hours
<b>Unit V : Medical statistics</b>	
<ul style="list-style-type: none"> <li>– Measurement of Morbidity</li> <li>– Mortality rates</li> <li>– Incidences and prevalence rates</li> <li>– Adjustment of rates and other vital statistics.</li> <li>– Voluntary efforts in Community Health and Development – some case studies of community participation</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>PG32T305A : SOCIAL - CULTURAL CHANGE</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Learn about the scope and relevance of Social-Cultural change and its relationship with other branches of anthropology.
CO 2	Learn about concepts of society, culture, social stratification, etc.
CO 3	Learn about important institutions like family, marriage and kinship.
CO 4	Learn how to follow up some of the commonly used techniques of data collection in Social-Cultural change.
CO 5	Understand the Perspectives on Modernization and Nation Building process

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Introduction to social change</b>	
<ul style="list-style-type: none"> <li>– Dynamics of Society and Culture.</li> <li>– Concepts of Stability and change.</li> <li>– Distinction between social change and cultural change.</li> <li>– Importance of studying social-cultural change.</li> </ul>	12 Hours
<b>Unit II : Theories of social cultural change</b>	
<ul style="list-style-type: none"> <li>– Theories of social cultural change: <ul style="list-style-type: none"> <li>– Telic</li> <li>– Deterministic</li> <li>– Cyclic and</li> <li>– Linear.</li> </ul> </li> </ul>	14 Hours
<b>Unit III : Anthropology and social cultural change</b>	
<ul style="list-style-type: none"> <li>– Anthropological Perspective on the study of change.</li> <li>– Functionalism and Study of change.</li> <li>– Culture contact, acculturation, diffusion and evolution.</li> </ul>	12 Hours
<b>Unit IV : Factors of social cultural change</b>	

<ul style="list-style-type: none"> <li>– Factors Responsible for social change (Internal and External) factors responsible for change.</li> <li>– Innovation.</li> <li>– Contra acculturative and Nativistic movements</li> <li>– Cultural context of technical change.</li> </ul>	14 Hours
<b>Unit V : Modernity and State</b>	
<ul style="list-style-type: none"> <li>– Perspectives on Modernization and Nation Building process.</li> </ul>	12 Hours
<b>REFERENCES</b>	
<ol style="list-style-type: none"> <li>1. Barnet H. G. – Innovation.</li> <li>2. Mead M. – Cultural Patterns and Technical change.</li> <li>3. <b>Paper Code and Name</b>	<b>PG32T306A : POPULATION ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Learn about demographic anthropology and its importance in anthropology.
CO 2	Learn about major theories of population.
CO 3	Learn about the various sources of data in population studies.
CO 4	Learn about how to collect demographic data from various sources and prepare a project report on the same.
CO 5	Impact of family planning programs on population control in developed and developing countries

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Nature and scope of Population Anthropology</b>	
<ul style="list-style-type: none"> <li>– Relationship with other disciplines such as Population Studies, Economics, Sociology, Psychology, Geography, Public Health and Statistics.</li> <li>– Demographic Studies in Anthropology</li> <li>– Demographic methods: <ul style="list-style-type: none"> <li>– Census</li> <li>– Registration System</li> <li>– Sample methods</li> <li>– Dual reporting system</li> <li>– Genealogical method.</li> </ul> </li> </ul>	14 Hours
<b>Unit II : Demographic Theories</b>	
<ul style="list-style-type: none"> <li>– Malthusian, Optimum, Socio cultural Biological and Demographic Transition.</li> <li>– Population structure</li> <li>– Population size and composition</li> <li>– Fertility, Mortality, Migration and their inter-relationship.</li> </ul>	14 Hours
<b>Unit III : Factors affecting population growth</b>	
<ul style="list-style-type: none"> <li>– Biological and Socio Ecological</li> </ul>	14 Hours

<ul style="list-style-type: none"> <li>– Fecundity</li> <li>– Fertility</li> <li>– Natality</li> <li>– Mortality</li> <li>– Morbidity</li> <li>– Age at Menarche</li> <li>– Age at Menopause</li> <li>– Age at Marriage and marital distance</li> <li>– Measures of Fertility and Mortality</li> <li>– Population Education and Extension</li> <li>– Population education concept, importance and objectives</li> <li>– Components of population education; training programmes</li> <li>– population education general procedure for developing training programmes and alternative models of training in population education.</li> </ul>	
<b>Unit IV : Family planning programmes</b>	
<ul style="list-style-type: none"> <li>– Meaning and historical development of the family planning programmes in India</li> <li>– Different methods of family planning</li> <li>– Impact of family planning programs on population control in developed and developing countries</li> <li>– Causes of slow progress of these programmes.</li> </ul>	10 Hours
<b>Unit V : HIV/AIDS and control</b>	
<ul style="list-style-type: none"> <li>– HIV/AIDS epidemic in India and Africa, U.S.A and Thailand</li> <li>– HIV/AIDS programmes of Karnataka</li> <li>– NGO's programmes</li> <li>– Commercial sex workers and HIV / AIDS prevalence and control mechanisms</li> <li>– Other forms of sexual behaviour like homosexuality, extra - marital sex, adolescent sexuality, lunuchs, Blood transfusion etc and AIDS</li> <li>– The determining of sexual and reproductive health</li> <li>– Health education strategies for reproductive health and HIV/AIDS</li> <li>– World Health Organization Programmes and their contributions to reproductive health.</li> </ul>	12 Hours

<b>SPECIALIZATION : BIOLOGICAL ANTHROPOLOGY (Group B)</b>	
<b>Paper Code and Name</b>	<b>PG32T301B : ANTHROPOLOGICAL THEORIES</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Distinguish the classical theories of culture like evolutionism, diffusions and culture area.
CO 2	Understand historical particularism and neo-evolutionism.
CO 3	Learn about functionalism, structuralism and other more recent theories.
CO 4	Formulate research questions and hypotheses, testing of hypotheses, etc.
CO 5	Understand Functions and Dysfunction in society

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Evolutionism</b>	
<ul style="list-style-type: none"> <li>– Nineteenth Century Evolutionism - Tylor and Morgan</li> <li>– Criticism of Nineteenth Century Evolutionism</li> <li>– Evolutionism in Biology and Anthropology compared - Julian Huxley.</li> <li>– Contemporary trends in Evolutionary Studies: <ul style="list-style-type: none"> <li>– Universal Evolution</li> <li>– Multilinear Evolution</li> <li>– Specific and General Evolution</li> </ul> </li> <li>– Diffusionism: Criticism of British and German–Austrian Schools of Thought and American Distributionists.</li> <li>– Historical Particularism: Franz Boas and his contributions</li> <li>– Criticism of ‘The Comparative Method’</li> <li>– Comparison in Anthropology: Nature, Purpose and Methods: Radcliffe-Brown, Fred Eggan, Oscar Lewis and Gopala Sarana.</li> </ul>	14 Hours
<b>Unit II : Culture and Personality</b>	
<ul style="list-style-type: none"> <li>– Relevance of psychological categories and approaches for culture and personality studies in Anthropology.</li> <li>– Patterns Of Culture</li> <li>– Basic Personality Structure</li> <li>– Modal Personality</li> <li>– National character studies</li> </ul>	12 Hours

<ul style="list-style-type: none"> <li>– Studies of culture at a distance</li> <li>– Recent trends in Psychological Anthropology</li> </ul>	
<b>Unit III : Functionalism</b>	
<ul style="list-style-type: none"> <li>– Malinowski's contribution</li> <li>– Radcliffe-Brown's arguments</li> <li>– Relevance of the concepts of Manifest and Latent functions Eufunction/Dysfunction</li> <li>– Function and Cause</li> <li>– Structural functionalism: Radcliffe-Brown, Firth, Fortes and Nadel</li> <li>– Social structure</li> <li>– Societal structure.</li> <li>– Relationship between Linguistics and Anthropology</li> <li>– Structuralism of Levi Strauss</li> <li>– Leach's view of Social Structure as a model.</li> <li>– The Structuralist method in the study of myth and alliance.</li> <li>– Ethno science</li> <li>– New ethnography</li> <li>– Formal semantic analysis.</li> </ul>	14 Hours
<b>Unit IV : Social Anthropology and History</b>	
<ul style="list-style-type: none"> <li>– A Critical Examination of the plea for the unity of method in natural and social sciences.</li> <li>– Scientific and Humanistic approaches to be distinguished.</li> <li>– The nature of Anthropological method and the notion of its autonomy.</li> <li>– Explanation in science and in history: <ul style="list-style-type: none"> <li>– Hempelian covering law model of explanation.</li> <li>– Possibility and nature of explanation in Social-Cultural Anthropology.</li> </ul> </li> <li>– Restudy and Reinterpretation in Anthropology.</li> </ul>	12 Hours
<b>Unit V : Symbolism and Anthropology</b>	
<ul style="list-style-type: none"> <li>– Contribution of Schneider, Needham and Turner.</li> <li>– Interpretive Anthropology: Contribution of Greetz.</li> <li>– Post modernism and Anthropology.</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>PG32T302B : PALEOANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Understand different modern evolutionary theories and principles.
CO 2	Demonstrate the morphological changes of primates in the course of evolution.
CO 3	Become familiar with the hominid evolution and their molecular basis.
CO 4	Demonstrate the origin of different races.
CO 5	Become familiar with the human and non-human social behavior.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Palaeontological Principles</b>	
<ul style="list-style-type: none"> <li>– Speciation</li> <li>– Irreversibility</li> <li>– Orthogenesis</li> <li>– Parallelism and Convergence</li> <li>– Adaptive radiation and extinction.</li> <li>– Principles of modern synthetic theory of evolution.</li> </ul>	12 Hours
<b>Unit II : Primate Evolution</b>	
<ul style="list-style-type: none"> <li>– Evolution of primates with reference to dentition, skull, limbs, brain and special sense organs.</li> </ul>	10 Hours
<b>Unit III : Hominid Progression</b>	
<ul style="list-style-type: none"> <li>– Ramapithecus</li> <li>– Australopithecus.</li> <li>– Homo erectus</li> <li>– Neanderthal &amp; Neanderthal problem.</li> <li>– Homo sapiens</li> <li>– Tools and evolution of man.</li> <li>– Recent advances in human evolution.</li> <li>– Molecular basis of human origin.</li> </ul>	20 Hours
<b>Unit IV : Origin of Races</b>	

<ul style="list-style-type: none"> <li>– Fossil men and origin of races</li> <li>– A critical examination of Coon's thesis.</li> </ul>	12 Hours
<b>Unit V : Ethology and Human Evolution</b>	
<ul style="list-style-type: none"> <li>– Social behaviour of non-human primates.</li> <li>– Evolution of human behaviour.</li> </ul>	10 Hours
<b>REFERENCES</b>

<b>Paper Code and Name</b>	<b>PG32T303B : ADVANCED BIOLOGICAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Demonstrate different concepts of mating systems and their biological consequences.
CO 2	Become familiar with different concepts of human growth and development
CO 3	Understand aging and senescence and factors affecting the same.
CO 4	Demonstrate applied aspects of biological anthropology.
CO 5	Apply bio-statistical methods in understanding population variation.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Genetic structure of Human Populations</b>	
<ul style="list-style-type: none"> <li>– Concept of genetic polymorphism.</li> <li>– Mendelian Populations</li> <li>– Random mating.</li> <li>– Hardy Weinberg Law</li> <li>– Inbreeding, out breeding.</li> <li>– Biological effects of mating systems.</li> </ul>	12 Hours
<b>Unit II : The concept of Human Growth and Development</b>	
<ul style="list-style-type: none"> <li>– Genetics of Growth.</li> <li>– Methods of studying Growth.</li> <li>– Stages of growth – Prenatal, natal, infant, child hood, adolescence, maturity, senescence.</li> <li>– Factors controlling growth and development</li> <li>– Human Ecology : Nutritional ecology, climatic adaptation and disease.</li> </ul>	14 Hours
<b>Unit III : Aging and Senescence</b>	
<ul style="list-style-type: none"> <li>– Theories and Observations</li> <li>– Biological and Chronological</li> <li>– Longevity</li> <li>– Socio-cultural, Biological and Genetic factors in ageing.</li> </ul>	10 Hours

<b>Unit IV : Applied Biological Anthropology</b>	
<ul style="list-style-type: none"> <li>– Anthropology of sports</li> <li>– Kineanthropology and Ergonomics</li> <li>– Nutritional Anthropology</li> <li>– Anthropology in the designing of defense and other equipments.</li> <li>– Forensic Anthropology: methods and principles of personal identification and reconstruction.</li> </ul>	12 Hours
<b>Unit V : Age, sex and population variation in the physiological characteristics of man</b>	
<ul style="list-style-type: none"> <li>– Hb level, body, fat, pulse rate, respiratory functions and sensory perceptions in different cultural, and socio-economic groups.</li> <li>– Impact of smoking, air, water and sound pollution, alcoholism, drugs and occupational hazards on human health.</li> <li>– Bio statistics and its application in Biological Anthropology: <ul style="list-style-type: none"> <li>– Chi square analysis</li> <li>– Correlation co-efficient</li> <li>– Linkage analysis</li> <li>– Regression co-efficient</li> <li>– T–test</li> <li>– F– test,</li> <li>– Penrose test</li> <li>– Mahalanobis D<sup>2</sup> test</li> <li>– Sangvi’s test.</li> </ul> </li> </ul>	16 Hours

<b>Paper Code and Name</b>	<b>PG32T304B : ANTHROPOLOGICAL DEMOGRAPHY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Understand different aspects of human fertility
CO 2	Demonstrate different methods of studying demography.
CO 3	Understand different demographic rates and ratios.
CO 4	Demonstrate different factors affecting demographic events.
CO 5	Become familiar with different population policies.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Demography</b>	
<ul style="list-style-type: none"> <li>– Concept, meaning, scope of demography.</li> <li>– Reproductive physiology of male and female.</li> <li>– Biological aspects of human fertility.</li> <li>– Relevance of menarche, menopause and other bio-events to fertility.</li> <li>– Fertility patterns and differences.</li> </ul>	16 Hours
<b>Unit II : Demographic methods</b>	
<ul style="list-style-type: none"> <li>– Biological, Social and Cultural Demographic Methods: <ul style="list-style-type: none"> <li>– Census,</li> <li>– Registration system.</li> <li>– Sample methods and</li> <li>– Dual reporting system.</li> </ul> </li> </ul>	10 Hours
<b>Unit III : Population structure</b>	
<ul style="list-style-type: none"> <li>– Population structure and Population dynamics.</li> <li>– Demographic rates and ratios.</li> <li>– Life table-structure and utility</li> </ul>	16 Hours
<b>Unit IV : Factors influencing demographic change</b>	
<ul style="list-style-type: none"> <li>– Biological and socio-ecological factors influencing <ul style="list-style-type: none"> <li>– Fecundity</li> </ul> </li> </ul>	10 Hours

<ul style="list-style-type: none"> <li>– Fertility</li> <li>– Natality</li> <li>– Morbidity</li> <li>– Mortality.</li> </ul>	
<b>Unit V : Population policies</b>	
<ul style="list-style-type: none"> <li>– Biological consequences of population control.</li> <li>– National Population Policy.</li> <li>– Family planning in India</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>PG32P305B : PRACTICALS IN ADVANCED BIOLOGICAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Demonstrate different muscular attachments and their functions.
CO 2	Demonstrate different angles and measurements on human bones.
CO 3	Determine ABO, Rh and MNS blood groups with the help of test tube method.
CO 4	Demonstrate the recording of human blood pressure levels.
CO 5	Determine sickling of erythrocytes and abnormal haemoglobins.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Human Osteology</b>	
– A detailed study of Human skeleton with special reference to muscular attachments and their respective functions.	12 Hours
<b>Osteometry</b>	
– A few measurements and angles should be taken on <ul style="list-style-type: none"> <li>– Skull,</li> <li>– Scapula</li> <li>– Sacrum</li> <li>– Limb bones.</li> </ul>	16 Hours
<b>Human Serology</b>	
– Determination of ABO, Rh and MNS Blood groups of at least 10 individuals with the help of test tube method. – Determination and recording of blood pressure of at least 10 individuals.	16 Hours
<b>Abnormal haemoglobins</b>	
– Determination of sickling of erythrocytes with the help of Scliver and Waugh Method and Bisulphate method of 5 individuals. – Determination of abnormal haemoglobins like HbS, HbC, HbD, HbE and HbF with the help of Electrophoretic methods of 5 samples.	20 Hours

<b>Paper Code and Name</b>	<b>PG32T306B : FORENSIC ANTHROPOLOGY (OPEN ELECTIVE)</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Demonstrate the anthropological view on forensic science and crime investigation.
CO 2	Identify the individuals on the basis of skeletal remains and other recent trends.
CO 3	Demonstrate the significance of dermatoglyphics in crime investigation.
CO 4	Become familiar with the identification of individuals through anthropometry and body fluids.
CO 5	Understand paternity dispute through different approaches.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Crime investigation</b>	
<ul style="list-style-type: none"> <li>– Definition, aim and scope of Forensic Anthropology</li> <li>– Definition of crime, its theories</li> <li>– Crime scene investigation <ul style="list-style-type: none"> <li>– Location</li> <li>– Evaluation</li> <li>– Protection of evidences</li> <li>– Photography and sketching</li> </ul> </li> <li>– Establishment of complete or partial identity from decomposed or mutilated bodies.</li> <li>– Anthropological perspective of forensic science.</li> </ul>	14 Hours
<b>Unit II : Personal identification through skeleton</b>	
<ul style="list-style-type: none"> <li>– Study of Human Skeleton.</li> <li>– Human Skull-determination of age, sex and ethnic group.</li> <li>– Electronic superimposition identification device</li> <li>– Attribution of sex and reconstruction of stature from skeletal remains</li> </ul>	10 Hours
<b>Unit III : Dermatoglyphics</b>	
<ul style="list-style-type: none"> <li>– Dermatoglyphics in Forensic Anthropology.</li> <li>– Finger prints tracing and developing techniques</li> </ul>	12 Hours

<ul style="list-style-type: none"> <li>– Classification of finger prints.</li> <li>– Use of palm, and sole prints including sole marks</li> <li>– Analysis of ridge and crease characters.</li> </ul>	
<b>Unit IV : Anthropometry</b>	
<ul style="list-style-type: none"> <li>– Personal Identification, somatometric measurements and somatoscopic observations.</li> <li>– Identification through mannerisms, scars, occupational marks, hand writing etc.</li> <li>– Analysis of hair structure and types.</li> <li>– Body fluids viz., blood, semen, saliva, urine and sweat.</li> </ul>	14 Hours
<b>Unit V : Disputed paternity</b>	
<ul style="list-style-type: none"> <li>– Disputed paternity and different approaches to solve it <ul style="list-style-type: none"> <li>– Morphological</li> <li>– Serological</li> <li>– Cytogenetic etc.</li> </ul> </li> <li>– Recent trend in personal identification <ul style="list-style-type: none"> <li>– Reconstruction of facial physiognomy</li> <li>– DNA finger printing,</li> <li>– Computer applications.</li> </ul> </li> </ul>	14 Hours

<b>SPECIALIZATION : SOCIAL CULTURAL ANTHROPOLOGY (Group A)</b>	
<b>Paper Code and Name</b>	<b>PG32T401A : ANTHROPOLOGICAL METHODOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Describe the major developments in the history of anthropology.
CO 2	Recognize and assess ethical considerations in contemporary anthropological inquiry.
CO 3	Apply competing theoretical approaches to generate alternative interpretations of the same anthropological data.
CO 4	Understand Emic and Etic Approaches in Research
CO 5	Critically examine 19 <sup>th</sup> century anthropologists

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Introduction to methods</b>	
<ul style="list-style-type: none"> <li>– Technique, Method and Methodology distinguished.</li> <li>– A critical examination of the plea for the unity of method in natural and social sciences,</li> <li>– Scientific and humanistic approaches to be distinguished</li> <li>– Anthropology as a natural Science, Social Science and a humanity discipline</li> <li>– The nature of anthropological Method and notion of its autonomy &amp; Interpretive Anthropology.</li> </ul>	12 Hours
<b>Unit II : Comparison in Anthropology</b>	
<ul style="list-style-type: none"> <li>– ‘The comparative method’</li> <li>– Criticism of ‘The comparative method’</li> <li>– Comparisons in Anthropology</li> <li>– Nature, purpose and Methods Radcliffe Brown, Fried, Eggan, Oscar Lewis and Gopala Sarana.</li> </ul>	14 Hours
<b>Unit III : Nature of explanation</b>	
<ul style="list-style-type: none"> <li>– Explanation in Science and in History</li> <li>– Hempelian covering Law model of explanation</li> </ul>	12 Hours

– Possibility and Nature of explanation in Social cultural anthropology	
<b>Unit IV : Ethnoscience and interpretation</b>	
<ul style="list-style-type: none"> <li>– Ethnoscience</li> <li>– New Ethnography and formal Semantic Analysis</li> <li>– Emic and Etic Approaches.</li> <li>– Interpretive Anthropology</li> <li>– Contribution of Clifford Geertz and Thick description.</li> <li>– Post-Modern trends in Anthropology</li> <li>– Critique of the principle of value neutrality in classical Anthropological Research</li> </ul>	14 Hours
<b>Unit V : Reinterpretation in Anthropology</b>	
<ul style="list-style-type: none"> <li>– Restudy and reinterpretation</li> <li>– The methodological implications of the difference between the work of 19<sup>th</sup> century anthropologists and re-interpretation of the contemporary ethnographies: Leach, Needham, Loynsbury</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>PG32T402A : APPLIED ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Examine the history and theoretical underpinnings of applied anthropology.
CO 2	Identify the ethical issues involved in applied anthropology and demonstrate familiarity with the ethics guidelines of the Society for Applied Anthropology (SfAA)
CO 3	Identify the roles of applied anthropologists as practitioners of social science.
CO 4	Select the appropriate qualitative and quantitative methodologies and employ them in an applied policy setting.
CO 5	Use the knowledge of anthropology in solving labour related problems

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Meaning and scope</b>	
<ul style="list-style-type: none"> <li>– Applied Anthropology.</li> <li>– Action Anthropology</li> </ul>	12 Hours
<b>Unit II : Applied Anthropology in Education and Medicine</b>	
<ul style="list-style-type: none"> <li>– Debate between formal and Informal Education.</li> <li>– Education and Society.</li> <li>– People’s Perspective on Education.</li> <li>– Medicine: Anthropological Perspective</li> <li>– Health and Disease Control programmes.</li> <li>– Community Health.</li> </ul>	14 Hours
<b>Unit III : Applied Anthropology in Industry and Administration</b>	
<ul style="list-style-type: none"> <li>– Labour and Management Relations.</li> <li>– Knowledge of anthropology in solving labour related problems.</li> <li>– Anthropology and Administration</li> <li>– Knowledge of Anthropology in Administration.</li> </ul>	14 Hours
<b>Unit IV : Tribal Welfare and Tribal Issues</b>	

<ul style="list-style-type: none"> <li>– Poverty</li> <li>– Indebtedness,</li> <li>– Land alienation,</li> <li>– Tribal Policy Detribalization</li> <li>– Tribal Unrest</li> <li>– Emergence of ethnicity</li> <li>– Tribal movements</li> <li>– Quest for identity pseudo tribalization etc.</li> </ul>	12 Hours
<b>Unit V : Tribal programs and policies</b>	
<ul style="list-style-type: none"> <li>– Measures taken by Government of India to solve tribal problems.</li> <li>– Plans and Programmes of Tribal Development.</li> <li>– Special Component Plans.</li> <li>– Role of Non Governmental Organisations.</li> <li>– Anthropology and Tribal Development.</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>PG32T403A : ECOLOGICAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Describe different models for human adaptations to the environment through time.
CO 2	Evaluate the impact of humans upon the environment caused by different subsistence strategies.
CO 3	Demonstrate effective knowledge of ecology as it relates to human and environmental interaction.
CO 4	Know Recent trends in ecological anthropology
CO 5	Address Developmental issues and regional planning.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Definitions and scope of Ecological Anthropology</b>	
<ul style="list-style-type: none"> <li>– Methods of Ecological anthropology</li> <li>– Deterministic and possibilistic theories,</li> <li>– Relationship of Ecological anthropology Environment Cultural Ecology and Ethno ecology.</li> <li>– Julian Steward's concept and application of the Cultural ecological method.</li> <li>– Importance of Ecological anthropology and its relevance in contemporary societies.</li> <li>– Differences between Cultural Ecology, human ecology, Social Ecology and ethno ecology.</li> <li>– Recent trends in ecological anthropology</li> </ul>	12 Hours
<b>Unit II : Cultural Ecology</b>	
<ul style="list-style-type: none"> <li>– Cultural adaptations due to environment and environmental impact on culture</li> <li>– Environmental problems</li> <li>– Developmental issues and regional planning.</li> </ul>	12 Hours
<b>Unit III : Ecology and Adaptations</b>	

<ul style="list-style-type: none"> <li>– Adaptations in nature social and cultural adaptation</li> <li>– Biological adaptation Climatic environmental, nutritional and Genetic Adaptation as a major process of Cultural change.</li> <li>– Analysis of Socio-cultural environmental adaptations in similar environmental conditions-</li> <li>– Functional interdependence among the parts of culture due to Social and Cultural adaptation.</li> <li>– Factors determining ecological adaptations division of labour, size and stability of local groups and their distribution in space and residence rules</li> <li>– Adaptation of hunting, gathering and fishing people's – pastoralists, Horticulturalists and agriculturalists</li> </ul>	14 Hours
<b>Unit IV : Human Adaptability</b>	
<ul style="list-style-type: none"> <li>– Ecological perspectives on household management</li> <li>– Natural environment study vs. human environment study</li> <li>– Impact of ecology on production Distribution, consumption and material recycling principles governing production distribution and consumption in hydrological societies</li> </ul>	12 Hours
<b>Unit V : Applications of Ecological Anthropology</b>	
<ul style="list-style-type: none"> <li>– Application in the field of administration</li> <li>– Developmental plans, programmes and schemes</li> <li>– Application in civil engineering housing, providing government land for shelter, construction of lakes, ponds, roads and bridges, planning for civil beneficiaries, application in localization of Industries</li> <li>– Application in bringing environmental and diversified cultural zones intact.</li> </ul>	14 Hours

<b>Paper Code and Name</b>	<b>PG32T404A : BUSINESS ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Learn about the corporate and business world and what anthropology can do to understand this world better.
CO 2	Learn about consumer behaviour, globalisation, and methods of conducting research in business world.
CO 3	Learn how an industry or business organisation functions, how it decides its priorities, how it links itself with the market and also prepare a detailed report on the same.
CO 4	Doing corporate ethnography as an insider and outsider
CO 5	Use business management skills and behaviour Network.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Introduction to Business Anthropology</b>	
<ul style="list-style-type: none"> <li>– History and Growth of Business and Corporate Anthropology</li> <li>– Industrial Anthropology and Human Relations School(1930-1960)</li> <li>– The Ethics questions(1960-1980)</li> <li>– The rebirth of Business Anthropology 1980 and Beyond.</li> <li>– Basic concepts: Group, Role and Status, organisation, Corporate, organisational culture, Business and Business Management and behaviour Network.</li> </ul>	12 Hours
<b>Unit II : Consumer Behaviour</b>	
<ul style="list-style-type: none"> <li>– Anthropology and consumer behaviour:</li> <li>– Basic concepts- customer, consumer, market</li> <li>– Anthropological theory and practice in marketing and consumer behaviour.</li> </ul>	12 Hours
<b>Unit III : Applied Business Anthrpology</b>	
<ul style="list-style-type: none"> <li>– Doing Anthropology in Organisational contexts</li> <li>– Applied anthropology in industry</li> <li>– Complex Health care organizations</li> </ul>	14 Hours

<ul style="list-style-type: none"> <li>– Health Economy, Libraries, Hospital management, NGO's etc.</li> <li>– Advancing ethnography in corporate environments: Challenges and opportunities.</li> </ul>	
<b>Unit IV : Anthropology of Globalization</b>	
<ul style="list-style-type: none"> <li>– Globalization, international trade and anthropology</li> <li>– Understanding the process of globalisation, information technology , communication networks and international trade.</li> </ul>	12 Hours
<b>Unit V : Ethnography of Business</b>	
<ul style="list-style-type: none"> <li>– Techniques for Conducting Fieldwork for Business Organizations</li> <li>– Conventional ethnographic methods</li> <li>– Rapid ethnography</li> <li>– Ethnography for systems development and product design</li> <li>– Doing corporate ethnography as an insider and outsider</li> <li>– Analysis of Relationships, Semiotic analysis, Video based introduction Analysis, Virtual ethnography and making use of electronic data.</li> <li>– Multiple techniques and rapid assessment.</li> </ul>	14 Hours

<b>Paper Code and Name</b>	<b>PG32T405A : FIELD WORK AND DISSERTATION</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Record a journal of their experience during the service learning experience.
CO 2	Apply the knowledge gained by coursework to the real world, through service learning.
CO 3	Relate their service learning experience to their coursework in anthropology and other disciplines.
CO 4	Able to generate primary and secondary data
CO 5	Expertise in data editing, data correction and data analysis

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
– Field Work in a tribal, rural or urban community or a special group under supervision of teachers continuously for not less than one month.	
– A field report based on the fieldwork shall be presented for examination. – A viva-voce examination will be conducted on relevant topics.	
– 100 Marks for this paper shall be distributed as follows: – Field Report based on field work      80 marks – Viva-voce Examination                      20 marks

<b>Paper Code and Name</b>	<b>PG32T404A : VISUAL ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Identify and define key concepts in visual anthropology
CO 2	Distinguish the key approaches and aims of ethnographic filmmaking
CO 3	Apply anthropological analysis to visual social phenomena
CO 4	Speak and write clearly about concepts, methods, and theories as these apply in visual anthropology
CO 5	Understand documentary and ethnographic films in India

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Visual Anthropology</b>	
<ul style="list-style-type: none"> <li>– Concepts, scope, uses and problems.</li> <li>– Visual communication through folk arts and modern mass media.</li> <li>– Visual anthropology as a discipline for study and a mode of recording and documenting human societies and culture.</li> </ul>	12 Hours
<b>Unit II : History and development of visual anthropology</b>	
<ul style="list-style-type: none"> <li>– Approaches to anthropological films</li> <li>– Visual anthropology and analysis of cultural style.</li> <li>– Visual anthropology and films: commercial realistic, new wave and documentary films.</li> </ul>	14 Hours
<b>Unit III : Visual Anthropology and Culture</b>	
<ul style="list-style-type: none"> <li>– Visual anthropology as a mode of preserving culture and as an input to cultural enrichment.</li> <li>– Visual anthropology as an aid to visual literacy and cultural development.</li> </ul>	12 Hours
<b>Unit IV : Television and visual anthropology</b>	
<ul style="list-style-type: none"> <li>– Video tape</li> <li>– New techniques of observation and analysis in Anthropology.</li> <li>– Film review, appreciation and criticism.</li> </ul>	14 Hours

<ul style="list-style-type: none"> <li>– Film as an art.</li> <li>– The film language.</li> <li>– Necessary conditions for film making.</li> </ul>	
<b>Unit V : Scope of visual anthropology</b>	
<ul style="list-style-type: none"> <li>– Scope of visual anthropology in India.</li> <li>– Its uses, urgent problems and future possibilities.</li> <li>– Development of Visual Anthropology and ethnographic films in India.</li> </ul>	12 Hours

<b>SPECIALIZATION : BIOLOGICAL ANTHROPOOLOGY (Group B)</b>	
<b>Paper Code and Name</b>	<b>PG32T401B : ANTHROPOLOGICAL METHODOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Describe the major developments in the history of anthropology.
CO 2	Recognize and assess ethical considerations in contemporary anthropological inquiry.
CO 3	Apply competing theoretical approaches to generate alternative interpretations of the same anthropological data.
CO 4	Understand Emic and Etic Approaches in Research
CO 5	Critically examine 19 <sup>th</sup> century anthropologists

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Introduction to methods</b>	
<ul style="list-style-type: none"> <li>– Technique, Method and Methodology distinguished.</li> <li>– A critical examination of the plea for the unity of method in natural and social sciences,</li> <li>– Scientific and humanistic approaches to be distinguished</li> <li>– Anthropology as a natural Science, Social Science and a humanity discipline</li> <li>– The nature of anthropological Method and notion of its autonomy &amp; Interpretive Anthropology.</li> </ul>	12 Hours
<b>Unit II : Comparisons in Anthropology</b>	
<ul style="list-style-type: none"> <li>– ‘The comparative method’</li> <li>– Criticism of ‘the comparative method’</li> <li>– Comparisons in Anthropology</li> <li>– Nature, purpose and Methods Radcliffe Brown, Fried, Eggan, Oscar Lewis and Gopala Sarana.</li> </ul>	14 Hours
<b>Unit III : Nature of explanation</b>	
<ul style="list-style-type: none"> <li>– Explanation in Science and in History</li> <li>– Hempelian covering Law model of explanation</li> </ul>	12 Hours

– Possibility and Nature of explanation in Social cultural anthropology	
<b>Unit IV : Ethnoscience and interpretation</b>	
<ul style="list-style-type: none"> <li>– Ethnoscience</li> <li>– New Ethnography and formal Semantic Analysis</li> <li>– Emic and Etic Approaches.</li> <li>– Interpretive Anthropology</li> <li>– Contribution of Clifford Geertz and Thick description.</li> <li>– Post-Modern trends in Anthropology</li> <li>– Critique of the principle of value neutrality in classical Anthropological Research</li> </ul>	14 Hours
<b>Unit V : Reinterpretation in Anthropology</b>	
<ul style="list-style-type: none"> <li>– Restudy and reinterpretation</li> <li>– The methodological implications of the difference between the work of 19<sup>th</sup> century anthropologists and re-interpretation of the contemporary ethnographies: Leach, Needham, Loynsbury</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>PG32T402B : HUMAN GENETICS</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Understand different concepts of human genetics and its relationship with other sciences and medicine.
CO 2	Demonstrate different methods used in studying human genetics
CO 3	Identify different chromosomal aberrations
CO 4	Understand different concepts in human bio-chemical genetics.
CO 5	Demonstrate different aspects of applied human genetics.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Mendelian Genetics</b>	
<ul style="list-style-type: none"> <li>– Meaning and Scope of Human Genetics.</li> <li>– Historical Development of the science of Human Genetics.</li> <li>– Major branches of Human Genetics, its relationship with other sciences and medicine.</li> <li>– Mendel's Laws of Heredity in the light of Chromosome theory</li> <li>– Gene theory and Molecular concept of DNA.</li> <li>– Gene Action</li> </ul>	14 Hours
<b>Unit II : Methods in Human Genetics</b>	
<ul style="list-style-type: none"> <li>– Pedigree analysis</li> <li>– Twin study</li> <li>– Foster child and co-twin method</li> <li>– Cytogenetic methods</li> <li>– Biochemical methods</li> <li>– Immunological methods</li> <li>– Recombinant DNA technology</li> <li>– Restriction Fragment Length Polymorphism (RFLP)</li> <li>– Southern blotting</li> <li>– Polymerase Chain Reaction (PCR).</li> </ul>	12 Hours
<b>Unit III : Human Cytogenetics</b>	

<ul style="list-style-type: none"> <li>– Normal chromosomal component</li> <li>– Numerical and structural Aberrations</li> <li>– Autosomal aberrations: <ul style="list-style-type: none"> <li>– Down's Syndrome</li> <li>– Patan's Syndrome</li> <li>– Edward's syndrome</li> <li>– Criduchat syndrome</li> </ul> </li> <li>– Sex chromosomal aberrations: <ul style="list-style-type: none"> <li>– Turner's syndrome</li> <li>– Klinefelter Syndrome</li> <li>– Super females</li> <li>– Mosaics and chimeras</li> </ul> </li> </ul>	10 Hours
<b>Unit IV : Human Biochemical Genetics</b>	
<ul style="list-style-type: none"> <li>– Inborn errors of metabolism; <ul style="list-style-type: none"> <li>– Phenyl Ketone Urea</li> <li>– Galactoscinia</li> <li>– Alkaptonurea</li> <li>– Albinism.</li> </ul> </li> <li>– Proteins and Enzymes in the blood</li> <li>– Hemoglobin and Hemoglobin variants <ul style="list-style-type: none"> <li>– Haptoglobin</li> <li>– Transferrin</li> <li>– Group Specific Component</li> <li>– Glucose-6-phosphate Dehydrogenase deficiency</li> <li>– Phosphoglucomutase Acid Phosphatase,</li> <li>– Adenylate Kinase,</li> <li>– Serum choline-esterase.</li> </ul> </li> </ul>	14 Hours
<b>Unit V : Applied Human Genetics</b>	
<ul style="list-style-type: none"> <li>– DNA finger printing</li> <li>– Paternity Diagnosis</li> <li>– Eugenics</li> <li>– Genetic Screening for inherited diseases</li> <li>– Genetic Engineering</li> <li>– Gene cloning</li> <li>– Genomic Study</li> <li>– Human Genome Project</li> <li>– Genetic Counseling</li> <li>– Gene Therapy</li> <li>– DNA technology.</li> </ul>	14 Hours

<ul style="list-style-type: none"> <li>– Prevention and Cure of Hereditary diseases.</li> <li>– Anthropogenetics in medicine</li> <li>– Serogenetics and Cytogenetics in Reproductive Biology.</li> </ul>

<b>Paper Code and Name</b>	<b>PG32T403B : FORENSIC ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Demonstrate the anthropological view on forensic science and crime investigation.
CO 2	Identify the individuals on the basis of skeletal remains and other recent trends.
CO 3	Demonstrate the significance of dermatoglyphics in crime investigation.
CO 4	Become familiar with the identification of individuals through anthropometry and body fluids.
CO 5	Understand paternity dispute through different approaches.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Crime investigation</b>	
<ul style="list-style-type: none"> <li>– Definition, aim and scope of Forensic Anthropology</li> <li>– Definition of crime, its theories</li> <li>– crime scene investigation</li> <li>– Location</li> <li>– Evaluation</li> <li>– Protection of evidences</li> <li>– Photography and sketching</li> <li>– Establishment of complete or partial identity from decomposed or mutilated bodies.</li> <li>– Anthropological perspective of forensic science.</li> </ul>	14 Hours
<b>Unit II : Personal identification through skeleton</b>	
<ul style="list-style-type: none"> <li>– Study of Human Skeleton.</li> <li>– Human Skull-determination of age, sex and ethnic group.</li> <li>– Electronic superimposition identification device</li> <li>– Attribution of sex and reconstruction of stature from skeletal remains</li> </ul>	10 Hours
<b>Unit III : Dermatoglyphics</b>	
<ul style="list-style-type: none"> <li>– Dermatoglyphics in Forensic Anthropology.</li> <li>– Finger prints tracing and developing techniques</li> </ul>	12 Hours

<ul style="list-style-type: none"> <li>– Classification of finger prints.</li> <li>– Use of palm, and sole prints including sole marks</li> <li>– Analysis of ridge and crease characters.</li> </ul>	
<b>Unit IV : Anthropometry</b>	
<ul style="list-style-type: none"> <li>– Personal Identification, somatometric measurements and somatoscopic observations.</li> <li>– Identification through mannerisms, scars, occupational marks, hand writing etc.</li> <li>– Analysis of hair structure and types.</li> <li>– Body fluids viz., blood, semen, saliva, urine and sweat.</li> </ul>	14 Hours
<b>Unit V : Disputed paternity</b>	
<ul style="list-style-type: none"> <li>– Disputed paternity and different approaches to solve it <ul style="list-style-type: none"> <li>– Morphological</li> <li>– Serological</li> <li>– Cytogenetic etc.</li> </ul> </li> <li>– Recent trend in personal identification <ul style="list-style-type: none"> <li>– Reconstruction of facial physiognomy</li> <li>– DNA finger printing,</li> <li>– Computer applications.</li> </ul> </li> </ul>	14 Hours

<b>Paper Code and Name</b>	<b>PG32P404B : PRACTICALS IN HUMAN GENETICS</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Determine various serum protein polymorphisms.
CO 2	Determine different red blood cell enzyme polymorphisms.
CO 3	Determine colour deficiency and phenyl thio carbamide.
CO 4	Record blood and urine sugar levels.
CO 5	Estimate blood cholesterol and lipids.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Serum Protein Polymorphisms</b>	
– Determination of Haptoglobin and Transferin variants with the help of Electrophoresis of 5 samples.	12 Hours
<b>Red cell Enzyme Polymorphisms</b>	
– Determination with the help of elctrophoresis of 5 samples <ul style="list-style-type: none"> <li>– Glucose–6– Phosphate Dehydrogenase (G-6 PD)</li> <li>– Phosphoglucomutas (PGM)</li> <li>– Acid Phosphatase Adenylate Kinase</li> <li>– Adenosine Diaminase</li> <li>– Lactate Dehydrogenase Polymorphisms</li> </ul>	20 Hours
<b>Other Genetic Traits</b>	
– Testing of at least 20 individuals for colour deficiency with Ishahara chart. – Testing at least 20 individuals for tasting Phenyl Thio Carbamide (PTC).	12 Hours
<b>Blood, Urine and Lipid profiles</b>	
– Estimation of random blood cholesterol values and lipid profiles. – Blood and urine sugar values of at least 5 individuals.	20 Hours

<ul style="list-style-type: none"> <li>– Estimation of hemoglobin content in the blood with the help of Sahli-Hellige Haemoglobinometer of 5 individuals.</li> </ul>	
--	--

<b>Paper Code and Name</b>	<b>PG32T405B : FIELD WORK AND DISSERTATION</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Record a journal of their experience during the service learning experience.
CO 2	Apply the knowledge gained by coursework to the real world, through service learning.
CO 3	Relate their service learning experience to their coursework in anthropology and other disciplines.
CO 4	Able to generate primary and secondary data
CO 5	Expertise in data editing, data correction and data analysis

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
– Field Work in a tribal, rural or urban community or a special group under supervision of teachers continuously for not less than one month.	
– A field report based on the fieldwork shall be presented for examination. – A viva-voce examination will be conducted on relevant topics.	
– 100 Marks for this paper shall be distributed as follows: – Field Report based on field work      80 marks – Viva-voce Examination                      20 marks	

<b>Paper Code and Name</b>	<b>PG32T406B : SPORTS ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Understand the use of anthropological knowledge in understanding sports.
CO 2	Understand body proportionality and sports performance.
CO 3	Understand body composition and sports performance.
CO 4	Demonstrate different methods of studying human physique
CO 5	Become familiar with different sports played by different races, gender and physically challenged groups.

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Introduction</b>	
<ul style="list-style-type: none"> <li>– Sports and its relation to anthropology.</li> <li>– History and development of sports anthropology, its relevance to Indian context.</li> <li>– Traditional sports and games in India.</li> <li>– Energy and Sports activity, introduction, concept, interaction of energy systems.</li> <li>– Fuel for sports, different food stuffs and their involvement during exercise, effect of intensity and duration of exercise on fuel consumption.</li> </ul>	16 Hours
<b>Unit II : Sports performance</b>	
<ul style="list-style-type: none"> <li>– Kinanthropometry</li> <li>– Body proportionality and the age changes.</li> <li>– Body proportionality in relation to sports.</li> <li>– Cardio-vascular fitness, physical work capacity and sports performance.</li> </ul>	12 Hours
<b>Unit III : Human physique and body composition</b>	
<ul style="list-style-type: none"> <li>– Human physique and body composition and its role in sports participation and excellence.</li> <li>– Different methods of studying human physique and assessment of body composition for both sexes.</li> </ul>	12 Hours

<b>Unit IV : Sports talent selection</b>	
<ul style="list-style-type: none"> <li>– Sports talent selection in young children on the basis of structural, functional and endurance characteristics.</li> <li>– Genetic constitution, physical fitness and sports performance.</li> </ul>	12 Hours
<b>Unit V : Drugs and Sports</b>	
<ul style="list-style-type: none"> <li>– Drug uses in sports</li> <li>– Sports and games for handicapped children and adults.</li> <li>– Gender specific sports and games.</li> <li>– Race and sports performance.</li> </ul>	12 Hours

**KARNATAK UNIVERSITY DHARWAD**  
**DEPARTMENT OF STUDIES IN ANTHROPOLOGY**

**PhD Programme**

**1.0 Eligibility to apply for Admission to PhD Programme**

1.1 Any candidate who has obtained a Post-Graduate Degree from a recognized University including foreign candidates (sponsored by their Embassies) and sponsored candidates securing not less than 55% marks (50% for SC/ST/Cat-I/Physically challenged candidates) at the Post-Graduate Degree shall be eligible to apply for the Ph.D., Degree Programme.

1.2 In the case of those candidates who are appointed on regular basis prior to March 31, 1992 as teachers, librarians and physical education personnel in colleges and University Departments, the minimum marks shall be 50% (45% for SC/ST/Cat-I/Physically challenged candidates) provided they (i.e., employees) are continuing in service at the time of submission of application for registration.

If the results of Master's Degree are declared in the form of grades/credits/cumulative points in their marks cards/transcripts, such grades/points shall be converted into percentages to assess the minimum eligibility criteria as specified above in Regulations 1.1 and 1.2

**2.0 Entrance Test**

2.1 All the applicants who possess the minimum percentage of marks at their P.G Degree as specifies above in Regulations 1.1 and 1.2 shall appear for the Entrance Test.

2.2 However, (a) Government sponsored foreign candidates, (b) candidates who have cleared the UGC/UGC-CSIR JRF Test/NET/SLET(Karnataka)/GATE/GRE/M.Phil (Admitted through and Entrance Test) shall be eligible for exemption from the Entrance Test:

2.3.1 All the Departments shall consider the following for conducting Entrance Test:

2.4 **Maximum marks** for Entrance Test: 100

2.5 **Nature of questions:** Multiple Choice Questions

2.6 **Syllabus for Entrance Test:** Research Methodology and Cognate/Core subjects for the P.G. Department conducting the Entrance Test.

2.7 **Number of Questions:** 100 questions, each carrying 1 mark, 50% of the questions shall be from Research Methodology and the remaining 50% from the cognate/core subjects. The Department Council shall prepare the course inputs for the Entrance Test.

2.8 The 50 questions on Research Methodology shall consist of data interpretation, language comprehension and test of reasoning. The other 50 Questions shall be based on current syllabus of cognate/core subjects.

2.9 The Departmental council shall prepare two sets of question paper and submit the same to Registrar (Evaluation).

2.10 The Registrar (Evaluation) shall choose randomly one of the two sets.

2.11 **Duration of Entrance Test** : 120 minutes

2.12 After evaluation of the scripts (OMR Sheets), the Registrar (Evaluation) shall send marks list to the Chairperson of the concerned P.G. Department who shall prepare and note the merit list of qualified candidates indicating the date and time of the interview.

2.13 No research supervisor shall act as an examiner for the entrance test if his/her relative ( as specified by the university from time to time) has appeared for the Ph.D. Entrance Examination.

### **Programme Outcomes (POs)**

1. After completing this program, the students will be able to
  - a. Develop expertise in anthropological tools, techniques, methods and research methodology
  - b. Develop expertise in advance level of Anthropology by applying anthropological knowledge in different fields like forensic, sports, biological and cultural anthropology and bring social change.

<b>Paper Code and Name</b>	<b>PAPER-I : RESEARCH METHODOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Understand how anthropological fieldwork is unique and different from other disciplines.
CO 2	Use and apply anthropological Research methods in different branches of Anthropology
CO 3	Able to use native language, and research methods like Genealogical methods, case study, Interview and Questionnaires
CO 4	Can distinguish logic and logic in use and Comparative method and The Comparative Method.
CO 5	Etic and Emic perspectives can be used in Research, Restudy and Reinterpretation in Anthropology

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Field Work Tradition</b>	
<ul style="list-style-type: none"> <li>– Field-work tradition and importance of field-work in Anthropological Research.</li> <li>– Holism and field-work in Anthropology.</li> <li>– Review of literature.</li> <li>– Preparing for field-work.</li> <li>– Getting acquainted with the field and field-work.</li> <li>– Ethical issues and field-work.</li> </ul>	
<b>Unit II : Research Design</b>	
<ul style="list-style-type: none"> <li>– Research design and types of research design.</li> <li>– Uniqueness of Anthropological Research design.</li> <li>– Research Methods in Biological Anthropology.</li> <li>– Bio-Statistics and its application</li> <li>– Computer application for the analysis of data.</li> </ul>	
<b>Unit III : Research Techniques</b>	
<ul style="list-style-type: none"> <li>– Anthropological research techniques: <ul style="list-style-type: none"> <li>– Interview</li> <li>– Questionnaire</li> <li>– Schedule</li> <li>– Establishment of rapport.</li> </ul> </li> <li>– Learning the use of native language.</li> <li>– Census, field notes and log book.</li> <li>– Use of Genealogical Method.</li> <li>– Case study and Extended case study.</li> </ul>	
<b>Unit IV : Methods and Methodology</b>	
<ul style="list-style-type: none"> <li>– Meaning and Technique</li> <li>– Method and Methodology</li> <li>– Reconstructed logic and logic in use: Abraham Kalpan, Gopala sarana</li> <li>– Scientific Method and Anthropology</li> <li>– Uniqueness of Anthropological Method: Evans Pritchard, Alfred Kroeber, Robert Redfield and Gopala Sarana.</li> <li>– Comparative Methods in Anthropology: Franz Boas, Redcliff-Brown, Fred Eggan. Oscar Lewis, Gopala Sarana.</li> </ul>	

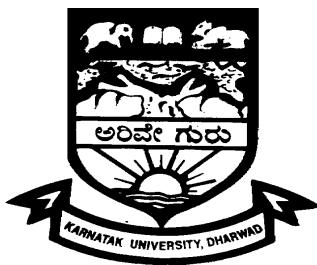

<ul style="list-style-type: none"> <li>– Explanation in Science and History</li> <li>– Uniqueness of Explanation in Anthropology: Carl Hemphel, S. T. Gob and Gopala Sarana.</li> </ul>	
<b>Unit V : Methodological Explanation</b>	
<ul style="list-style-type: none"> <li>– Ethno-science and New Ethnography</li> <li>– Etic and Emic perspectives: Willium Sturtevant, Marvin Haris, Stephen Taylor</li> <li>– Restudy and Reinterpretation in Anthropology: Edmond Leach, Floyd Lounsbury, Rodney Needham.</li> <li>– Symbolism in Anthropology: David Schneider, Mary Douglas, Victor Turner.</li> <li>– Interactive Anthropology and Thick Description: Clifford Geertz.</li> </ul>	

<b>Paper Code and Name</b>	<b>PAPER-II : ADVANCED ANTHROPOLOGY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Distinguish process of change like diffusion, westernisation, Urbanization and Modernization.
CO 2	Understand Racial, Ethnic, Religious and Linguistic profile of Indian Population.
CO 3	Relevance of Applied anthropology in day to day life
CO 4	Able to apply anthropology in sports, Forensic and Biological Anthropology
CO 5	Make the Cultural Identity in Tourism

<b>PARTICULARS</b>	<b>Teaching Hours (Max.64)</b>
<b>Unit I : Social Cultural Change</b>	
<ul style="list-style-type: none"> <li>– Meaning and Definition</li> <li>– Anthropological Perspectives of Change</li> <li>– Factors of Social Change</li> <li>– Processes of Change: Diffusion, Sanskritisation, Modernization, Parachilization, Westernization, Urbanization.</li> </ul>	

<b>Unit II : Indian Culture and Civilization</b>	
<ul style="list-style-type: none"> <li>– Approaches to the study of Indian Society</li> <li>– Evolution of Indian Culture and Civilization : Prehistoric and Protohistoric</li> <li>– Racial, Ethnic, Religious and Linguistic profile of Indian Population.</li> </ul>	
<b>Unit III : Tribes and Tribal Development</b>	
<ul style="list-style-type: none"> <li>– Definition and Geographical Distribution</li> <li>– Tribal Problems : Indebtedness, Poverty, Illiteracy, Exploitation, Health and Displacement</li> <li>– Constitutional Safeguards</li> <li>– Tribal Development Programmes</li> <li>– National Tribal Policy</li> </ul>	
<b>Unit IV : Applied Anthropology</b>	
<ul style="list-style-type: none"> <li>– Meaning of Applied and Action Anthropology</li> <li>– Applied Social Cultural Anthropology</li> <li>– Applied Biological Anthropology</li> <li>– Sports and Forensic Anthropology</li> </ul>	
<b>Unit V : Anthropology and Tourism</b>	
<ul style="list-style-type: none"> <li>– Concept, Meaning and Scope</li> <li>– Tourism, Culture and Heritage</li> <li>– Local Customs and Tourism</li> <li>– Folklore and Cultural Identity in Tourism</li> <li>– Globalization and Tourism</li> </ul>

# KARNATAK UNIVERSITY, DHARWAD

Regulations concerning Master Degree Programme

**Faculty of Science, from 2008-2009**

**Master Degree Programme in Applied Genetics (CBCS)**

Regulations Governing the Post-Graduate Master Degree Programmes under Choice Based Credit System (KU-CBCS), framed under Section 44(1)(C) of K.S.U. Act, 2000.

## **MASTER OF APPLIED GENETICS CHOICE BASED CREDIT SYSTEM (CBCS)**

### **Title:**

These Regulations shall be called “Regulations Governing Post-Graduate programmes in the Faculty of Science & Technology under the Choice Based Credit System” in Karnatak University, Dharwad

### **Commencement:**

These Regulations shall come into force from the academic year 2008-2009.

### **Definitions:**

#### **3.0 Definitions**

a. In these Regulations, unless otherwise provided:

“**Academic Council**” means Academic Council of the University constituted according to the *Karnatak State Universities Act, 2000*.

b. “**Board of Studies**” means P.G. Board of Studies of the University, Adhoc/Combined and Steering Committees of International Diploma Programmes in the discipline/subjects concerned.

c. “**Compulsory Course**” means fundamental paper, which the student admitted to a particular Post-Graduate Programme, should successfully complete to receive the Post Graduate Degree in the concerned subject.

d. “**Course Weightage**” means number of credits assigned to a particular course.

- e. **“Credit”** means the unit by which the course work is measured. One Credit means one hour of teaching work or two hours of practical work per week. As regards the marks for the courses, 1 credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks.
- f. **“Cumulative Grade point Average (CGPA)”** refers to the Cumulative Grade Point Averages weighted across all the semesters and is carried forward from first semester to subsequent semesters.
- g. **“Degree”** means Post-Graduate Degree.
- h **“Grade”** is an index to indicate the performance of a student in the selected course. These grades are arrived at by converting marks scored in each course by the candidate in both Internal Assessment and Semester-end Examinations.
- i. **“Grade Point Average (GPA)”** refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester.
- j. **“Open Elective Course”** means a paper offered by a Department to the students of other Departments.
- k. **“Post-Graduate Programme”** means semesterised Master’s Degree Programmes excluding P.G.Diploma.
- l. **“Specialization course”** means advanced paper offered by a Department that a student of that Department can opt as a special course.
- m. **“Student”** means the student admitted to programmes under (k).
- n. **“University”** means Karnatak University, Dharwad.

### **Minimum Eligibility for Admission:**

A candidate, who have successfully completed Bachelor’s Degree programme in Science or any other Degree programme of this University of any other University recognized as equivalent thereto by this University, shall be eligible for admission to the Post Graduate Programme in science provided the candidate also satisfied the conditions like the minimum percentage marks and other eligibility conditions as prescribed by the University from time to time.

Admissions shall be as per Government of Karnatak reservation policy and the directions issued in this regard from time to time.

### **5.0 Durations of the Programme**

The Durations of the study for the Post-Graduate programme shall extended over a period of two (three in case of MCA) consecutive academic years, each academic year comprising two semesters, and each semester comprising sixteen weeks with a minimum of ninety working days.

However, the students, who discontinue the programme after one or more semesters due to extraordinary circumstances, are allowed and complete the programme with due approval from the Registrar. Candidate shall not register for any other regular course other than Diploma and Certificate courses being offered on the campus during the durations of P.G. Programme.

## **6.0 Medium of Instruction and Evaluation**

The medium of instruction shall be English. However, the students may write the examinations in Kannada if so provided by the concerned Board of Studies.

## **7.0 Programme Structure**

**7.1** The students of Post-Graduate programme shall study the courses as may be approved by the concerned Board of Studies. Faculty and the Academic Council of the University from time to time subject to minimum and maximum credits as outlined in these regulations.

**7.2** There shall be three categories of courses namely, Compulsory Courses, Specialization courses and Open Elective Courses.

**7.3** Each programme shall have a set of Compulsory Courses, as stipulated in the regulations governing the concerned programme that a student must complete to get the concerned degree.

**7.4** In those programmes that offer specialization courses, the students shall choose the prescribed number of Specialization Courses offered within the Department.

**7.5** Each Department shall offer Open Elective courses for students of other Departments. The students of a Department shall choose Open Elective courses from among those prescribed by the University and selected by the Department from time to time. P.G. Centres and affiliated colleges can offer those Open Electives Courses which are approved of prescribed by their Parent Department of the University. Such Open Elective courses shall be taught by qualified teachers approved by the University.

**7.6** The credits for each of the Compulsory Courses may vary from 2 to 4: for Specialization Course, from 2 to 4 and for Open Elective Course, from 2 to 4, wherever project work/field work/practical are involved in the course, the credits may extend to 6 or as otherwise provided by concerned programme.

**7.7** The minimum credits for P.G. Programme shall be 96. In the case of MCA, the minimum number of credits shall be 158 and in case of M.Sc. Computer Science the minimum credits are 116.

**7.8** The students shall undertake project/field work during the programme as compulsory course or in lieu of Specialization Course or Open Elective Course if so specified by concerned Board of Studies.

**7.9** The ratio between Compulsory, Specialization and Open Elective may differ from department to department

**7.10** The detailed programme structure for Faculty of Science & Technology shall be as prescribed and shown in Annexure-I, Annexure-Ia & Annexure-Ib

**7.11** The Open Elective Courses generally will have practical component, unless otherwise specified by the respective Board of Studies. The number of students admitted to the course shall commensurate with the availability of infrastructure.

## **8.0 Attendance**

**8.1** Each course shall be taken as a unit for the purpose of calculating the attendance.

**8.2** Each student shall sign the attendance register maintained by the Department for each course for every hour/unit of teaching /practical. The course teachers shall submit the monthly attendance report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the second week of the subsequent month.

**8.3** Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.

**8.4** A student shall be considered to have satisfied the required attendance for each course if he/she has attended not less than 75% of the total number of instructional hours during the semester.

**8.5** There is no provision for condoning shortage of attendance.

**8.6** The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission a fresh to the given semester.

**8.7** Such of the candidates who have participated in State/National level Sports, NSS, NCC, Cultural activities and other related activities as stipulated under the existing regulations shall be considered for giving attendance for actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authorities within two weeks after the event.

## **9.0 Examination**

**9.1** There shall be an examination at the end of the each semester. The odd semester examinations shall be conducted by the respective Departments/P.G. Centres/Colleges. The even semester examinations shall be conducted by the University.

**9.1.1** Unless otherwise provided, there shall be semester-end examination of 3 hours duration for 75/100 marks; 1.5 hours for 50 marks and 2/4 hours for 35/75 marks for practical examination.

**9.1.2** Every student shall register for each semester-end examinations as per the University Notification by submitting duly completed application form through the proper channel and shall also pay the fees prescribed.

**9.1.3** The Office of the Registrar (Evaluation) shall allot the Register Number to the candidate at 1st semester-end examination. That will be the Register Number of the candidate for all subsequent appearances at semester-end examinations.

**9.1.4** The Answer scripts shall be in the safe custody of the University for a maximum period of six months from the date of announcement of results. These shall be disposed off after six months.

**9.1.5** The programme under CBCS is a fully carry-over system. A candidate reappearing for either the odd or even semester examinations shall be permitted to take examinations as and when they are conducted (even semester examination in even semester and odd semester examination in odd semester).

**9.1.6** Candidates who have failed, remained absent or opted for improvement in any course/ courses shall appear for such course/courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.

**9.1.7** Candidates who desire to challenge the marks awarded to them, in the even semester-end examinations, may do so by submitting an application along with the prescribed fee to the Registrar (Evaluation) within 15 days from the announcement of results.

## **9.2 Odd Semester Examination**

**9.2.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.

**9.2.2** The BOE shall scrutinize the question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation)

**9.2.3** The office of the Registrar Evaluation shall dispatch the question papers to the Departments/P.G. Centres/Colleges who shall conduct the Examinations according to the Schedule announced by the University.

**9.2.4** The Chairperson of the Department/Administrator of the P.G. Centre/Principal of the College shall appoint one of their full time course teachers as Post Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts.

**9.2.5** Answer scripts shall be valued by the examiners appointed by the University. However, in those centres where an examiner for a particular course is not available, then the answer scripts of that course shall be dispatched to the office of the Registrar (Evaluation) who shall arrange for valuation of the same.

**9.2.6** There shall be single valuation. The examiners (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on the answer script.

**9.2.7** The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be dispatched by PGP Coordinator to the Registrar (Evaluation)'s Office at the conclusion of the valuation at the respective centres.

**9.2.8** The Office of the Registrar Evaluation shall process and announce the results.

### **9.3 Even Semester Examination**

**9.3.1** There shall be a Board of Examiners to set, scrutinize and approve question papers.

**9.3.2** As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other Universities/Research Institutes.

**9.3.3** Each answer script of the semester-end examination (theory and project report) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averages with nearer award of the two evaluations.

Provided that in case of the number of answer scripts to be referred to the third examiner in a course exceeds 5 or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.

**9.3.4** Wherever dissertation/project work is prescribed in the even semesters of a programme, the same shall be evaluated by both internal and external examiners. The evaluation shall be as prescribed by the concerned Board of Studies.

**9.3.5** In Case of programmes with practical examination details of maximum marks, credits or duration may vary from Department to Department as specified by the concerned Board of Studies.

### **9.4 Evaluation**

**9.4.1** Each Course shall have two evaluation components- Internal Assessment (IA) and the Semester End Exams.

**9.4.2** The IA Component in a course shall carry 25% / 30% /50% and the Semester End Examination shall carry 75% /70% /50% respectively, as the case may be. Courses having 25% & 30% / 50% marks as internal assessment shall have 3 / 5 marks allotted to attendance. However, in case of project work, the distribution of marks for Internal Assessment and Examination shall be left to the discretion of the concerned BOS.

**9.4.3** Marks for attendance shall be awarded to the students according to the following table.

For courses carrying 25% of marks for IA, the attendance marks shall be

<b>Attendance (in percentage)</b>	<b>Marks</b>
Above 90	3
Above 80 and up to 90	2
Above 75 and up to 80	1

**9.4.4** Internal Assessment (IA) shall be based on written tests, practical and seminars. However, the number of IA components per course per semester shall not be less than two.

**9.4.5** The IA marks list shall be notified on the Department Notice Board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination, or as directed by the University.

**9.4.6** The tests shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.

**9.4.7** There is no provision for seeking improvement of Internal Assessment marks.

**9.4.8** The IA records, pertaining to Semester Examination, shall be preserved by the Department/Centres/Colleges for a period of one year from the date of semester examination. These records may be called by the University or body constituted by the University as and when deemed necessary.

**9.4.9** The dissertation /project work viva-voce shall be conducted by an internal and external examiner.

## **10.0 Maximum duration for completion of the Programme**

**10.1** A candidate admitted to a post graduate programme shall complete it within a period which is double the duration of the programme from the date of admission.

**10.2** Whenever the syllabus is revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabus.

## **11.0 Declaration of Results**

**11.1** The minimum for a pass in each course shall be 40% of the total marks including both IA and the semester-end examinations. Further, the candidate shall obtain at least 40% of the marks in the semester-end examination. There is no minimum for the IA marks.

**11.2** Candidates shall secure a minimum of 50% in aggregate in all courses of a programme in each semester to successfully complete the programme.

**11.3** Candidates shall earn the prescribed number of credits for the programme to qualify for the PG Degree.

**11.4** For the purpose of announcing the results, the aggregate of the marks secured by a candidate in all the semester examinations shall be taken into account. However, Ranks shall not be awarded in case of the candidate has not successfully completed each of the semesters in first attempt or has not completed the programme in stipulated time (vide Regulation 5) or had applied for improvement of results.

## **12.0 Marks, Credit Points, Grade points, Grades and Grade Point Average**

**12.1** The grade points and the grade letters to candidates in each course shall be awarded as follows:

<b>Percentage of marks</b>	<b>Grade points</b>	<b>Grade Letter</b>
75 and above, up to 100.00 %	7.50 to 10.00	A
60 and above but less than 75%	6.00 and above but less than 07.5	B
50 and above but less than 60%	5.00 and above but less than 6.0	C
40 and above but less than 50%	4.00 and above but less than 5.00	D
Less than 40%	Less than 4.00	F

**12.2** Credit Point (CP): The Credit Point for each course shall be calculated by multiplying the grade obtained by the credit of the course.

**12.3** The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned by the student in all the courses by the total number of credits of those courses of the semester.

**12.4** The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points in all the semesters by the total number of credits in all the semesters. The CGPA to date shall calculated by dividing the total number of credit points in all the semesters to date by the total number of credits in all the semesters to date.

CGPA for the I Semester= Sum of the CP of the I Semester+Sum of the credits of the I Semester

CGPA for the II Semester= Sum of the CP of the Sem +Sum of the CP of II Sem +Sum of the Credits of the I Semester+II Semester

CGPA for the III and IV Semester shall be computed accordingly.

**12.5** The Grade Card at each semester examination shall indicate the courses opted by the student, the credit for the course chosen by the student, the credit points obtained in each course, the grade letter and the grade point average. No. class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade point Average.

**12.6** Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below.

<b>Cumulative Grade Point Average (CGPA)</b>	<b>Class to be awarded</b>
7.5 to 10.0	First Class with Distinction
6.0 and above but below 7.5	First Class
5.0 and above but below 6.0	Second Class

### **13. Miscellaneous:**

- a)** Notwithstanding anything contained in these regulations, the semester system at Post-Graduate level is hereby repeated.
- b)** The provisions of any order, Rules or Regulations in force shall be inapplicable to the extent of its inconsistency with these Regulations.
- c)** The University shall issue such order, instructions, procedures and prescribe such format as it may deem fit to implement the provisions of this Regulations.
- d)** The procedural details may be given by the University from time to time.
  - e)** Any unforeseen problems/difficulties may be resolved by the Vice Chancellor, whose decision in the matter shall be final.

## **Course Outline for the M.Lib.I.Sc.**

### **SEMESTER – I**

<b>Paper Code</b>	<b>Title of the paper</b>	<b>Max. Marks</b>	<b>IA marks</b>	<b>Total Marks</b>	<b>Credits</b>	<b>Teaching hrs</b>
CT 1.1	Biological Chemistry (Theory)	75	25	100	04	50 hrs
CT 1.2	Genetics & Cytogenetics(Theory)	75	25	100	04	50 hrs
CT 1.3	General Microbiology(Theory)	75	25	100	04	50 hrs

CP 4.6	Molecular Diagnosis & Molecular Medicine(Practical)	40	10	50	02	48 hrs

### Annexure-I

The Programme structure of the Master of Science Degree shall be as follows:

Semester	No. of compulsory & Specialization courses (credits/course)	Total credits for compulsory & Specialization courses	No. of open elective course (credits/course)	Total credits of open elective course	Total credits for the semester
Sem. I	Th:04(04)=16 Pra/Th*:02(04)=08	24	----	--	24
Sem. II	Th:03(04)=12 Pra/Th*:03(02)=06	18	Th:01(04)=04	04	22
Sem. III	Th:03(04)=12 Pra/Th*:03(02)=06	18	Th:01(04)=04	04	22
Sem. IV	Th:03/04** (04)=12/16 Pra/Th*:3/4** (02)=06/08 D# 01(06)=06	24	--		24
Total	Th 13(04)= 52 Pra /Th 12/13(02)=24/26 D1(06) =06	84	Th: (04)=08	08	92

Note: Except for I & IV Semester, the concerned Department shall offer one each of open elective theory and practical course or two \*open elective Theory courses for students of other science departments.

\*Only for Mathematics; \*\* for Mathematics and Statistics; # except Mathematics & Statistics

Abbreviations: Th=Theory; Pra=Practical; D=Dissertation;

# except for Mathematics and Statistics; \* For Statistics and mathematics; + Only for statistics;

Ψ Only for Mathematics

**GPA for IV Semester- CP (IV Sem)/Credits (IV Sem)=200/24.00=8.33**

**GPA for I semester =CP(I sem)/Credits (I sem)**

**CGPA for I semester = GPA for I semester**

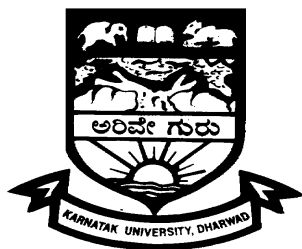

$$\text{CGPA for II Sem} = \frac{\text{CP (I sem)} + \text{CP (II sem)}}{\text{Credits (I sem)} + \text{Credits (II sem)}}$$

$$\text{CGPA for III Sem} = \frac{\text{CP (I sem)} + \text{CP (II sem)} + \text{CP (III sem)}}{\text{Credits (I sem)} + \text{Credits (II sem)} + \text{Credits (III sem)}}$$

$$\text{CGPA for the programme} = \frac{\text{CP (I sem)} + \text{CP (II sem)} + \text{CP (III sem)} + \text{CP (IV)}}{\text{Credits (I sem)} + \text{Credits (II sem)} + \text{Credits (IIIsem)} + \text{Credits (IV sem)}}$$

(\*CP: Credit point)

**KARNATAK UNIVERSITY, DHARWAD**

**SYLLABUS**

**For**

**MASTER OF SCIENCE IN APPLIED  
GENETICS**

**CHOICE BASED CREDIT SYSTEM  
(CBCS)**

**KARNATAK UNIVERSITY, DHARWAD**  
**Department of Applied Genetics**  
**Proposed Courses under CBCS from 2008-2009**  
**FIRST SEMESTER**

**PG71T101 -CT 1.1 BIOLOGICAL CHEMISTRY**

**50Hours**

Teaching hours per week : 4

No. of credits: 4

**UNIT-I**

**Chemical Bonds:** Covalent, Coordinate, Electrostatic Hydrogen, Ionic bonds, Van der Waals forces, hydrophilic and hydrophobic Interaction, functional groups.

**Properties of Water:** Structure, properties of water, water as a solvent and its importance in biological system, importance of pH, pK and buffer, Henderson-Hasselbalch equation and its application.

**10 Hours**

**UNIT-II**

**Carbohydrates:** Classification, outline of methods of structure elucidation. Structure and stereochemistry of carbohydrates. Derivatives of monosaccharides- amino sugars deoxysugars, and glycosides Structure of disaccharides-sucrose, lactose and maltose. Structure of polysaccharides starch, cellulose, glycogen, dextrin, hemicellulose, pectins, lignins, agar-agar, chitin, hyaluronic acid, heparin, chondroitin sulphate, peptidoglycan, and carbohydrates on cell surface.

**Proteins:** Amino acids: General structure, chemical structure, chemical reaction of amino acids, and physiological properties. Peptides peptide bond, structure determination, C-terminal and N-terminal residue determination, peptide synthesis. Proteins Isolation, purification, and chemical reactions of proteins. Primary, secondary and tertiary structures, denaturation.

**14Hours**

**UNIT-III**

**Lipids:** Classification of lipids, chemistry of fatty acids, chemistry of triacylglycerides - drying of oils, saponification and iodine values of oils and fats. Occurrence and structure of phospholipids (Lecithin and cephalin) and sphingolipids (sphingomyelin, cerebroside and ganglioside).

**Terpenes:** Introduction, sterols, general introduction and structure of cholesterol classification of terpenes, chemistry of farnesol, phytol, squalene and carotenes.

**12 Hours**

**UNIT-IV**

**Nucleotides:** Chemistry of nucleic acids, structure of purines and pyrimidines, modified bases nucleosides, nucleotides and polynucleotide, structural polymorphism of DNA and RNA types.

**Vitamins:** Chemistry, fat and water-soluble vitamins and their biological functions.

**Antibiotics:** Structure and Chemistry of penicillin, streptomycin, chloramphenicol and tetracyclines.

**Alkaloids:** General introduction, chemistry of medicinally and industrially important alkaloids.

**Pigments:** Chemistry of chlorophylls, heme, phenolics and tannins.

**Metal ions in Biomolecules :** Examples and their role.

**14 Hours**

## PG71T102- CT 1.2 GENETICS AND CYTOGENETICS

**50Hours**

Teaching hours per week :4

No. of credits: 4

### UNIT - I

**History of genetic** :Genetics in Biology. Role of genetics in agriculture, industry and medicine, impact on society/ Overview of Mendelian genetics.Application of laws of probability (product rule, sum rule, binomial property).Chi square test and its application in analysis of genetic data.

**Extension of Mendelism:** Basis of dominant and recessive mutation. Visible, sterile and lethal mutations. Genotype to phenotype, effect of environment on phenotype development-penetrance and expressivity, phenocopies overview of gene interaction and modifying genes. Pleiotropy. Multiple alleles- Eye color in fruit fly, coat color in locus in Maize. Testing gene mutation for allelism complementation.

**12 Hours**

### UNIT-II

**Linkage, recombination and gene mapping in eukaryotes:** Recombination frequency and map function. Linkage studies in fruit fly and maize, Detection of linkage by test cross. Two point cross, three point cross and four point cross and gene mapping coincidence and interference. Recombination frequency and genetic map distance, chiasma frequency and genetic map distance, genetic distance and physical distance. Evolutionary significance of recombination, Genetic control of recombination.Cytogenetic and physical maps using molecular markers.

**Sex determination:** Autosomes and sex chromosomes- fruit fly, birds, melandrium and humans. Sex linked, sex limited and sex influenced characters, environmental determination of sex, Dosage compensation of X-linked genes. Molecular mechanism of sex determination.

**Inheritance of quantitative traits:** Continuous and discontinuous variations. Polygenic inheritance, genetic variance, heritability- narrow sense and broad sense, genetic advance under selection.

**13 Hours**

### UNIT-III

**Extra chromosomal inheritance:** Non Mendelian inheritance, variegation in leaves of higher plants, Correns studies in *Mirabilis Jalapa*: Extn nuclear genes *chlamydomonas* mutants showing unipatental inheritance chloroplast and mitochondrial genome.

**Eukaryotic Chromosome:** Chromatin, its chemical nature, Macromolecular organization. Nucleosome structure, chromosome model, centromeric DNA, Telomere organization.Law of DNA constancy and C-value paradox.

**Mechanism of Cell division:** Mitotic apparatus, cytokinesis, chromosome movement present concept. Regulation of eukaryotic cell cycle- Overview of cell cycle, molecular mechanism of regulating mitotic events, cell cycle control in mammalian cells.Mutation causing loss of cell cycle control. Meiotic process- stages, chromosome pairing and chiasma formation. Molecular mechanism of recombination, synaptonemal complex and recombination nodule. Spermatogenesis and oogenesis , biochemical studies with oocytes,eggand early embryos.

**13 Hours**

### Unit-IV

**Haploidy** : Occurrence , production, detection, meiosis, breeding behavior, use in genetic analysis and plant breeding.

**Polyploidy** : Autopolyploidy – Origin, induction, cytological , genetic and breeding behavior. Allopolyploidy- cytogenetics, genome analysis, synthesis of new genera.Ployploidy in animal kingdom

**Aneuploidy:**Hyperploids- Trisomics and Tetrasomics- Origin, meiotic behavior and its uses. Hyperploidy in animals and humans.Hypoploidy- monosomies and nullisomies source, cytological behavior, genetics and their uses in gene mapping.

**Chromosome engineering:** Transfer of whole genome, genome reconstruction, chromosome sorting, transfer of individual chromosome, substitution of alien chromosome arm. Cytogenetic basis of apomixis: Classification, detection, embryological, cytological and genetic basis. Apomixis in plant breeding. **12 Hours**

## PG71T103-CT 1.3.GENERAL MICROBIOLOGY

**50 Hours**

Teaching hours per week :4

No. of credits : 4

### UNIT- I

**Introduction:** Scope and development of microbiology, comparative study of prokaryotic and Eukaryotic microorganisms. Study of structure of bacteria genetic elements ribosomes, membranes, cell envelope capsule, flagella, Pilli, and endospores.

**Classification of Microorganisms:** Nomenclature and study of different types of microorganisms, Characterization of Microorganisms, bacteria, fungi, actinomycetes, algae, protozoa, mycoplasmas, chlamidae, rickettsia. Methods of sterilization: Principles, physical and chemical sterilizing agents, pasteurization and disinfection, batch and continuous sterilization of media and air.

**Nutrition and culture media:** Nutritional requirement and nutrition classes of microorganisms. Types of culture media selective, differential, indicator and transport media.

**12 Hours**

### UNIT-II

**Isolation of pure cultures:** Different methods of isolation and pure cultures spread plate pour plate and streak plate methods, enumeration of cell number, enrichment culture techniques.

**Cultivation of bacteria:** Methods of inoculation and culturing streak, stab, lawn or carpet culture, liquid culture. Growth and reproduction in microorganisms, growth curve of bacteria and factors affecting the growth curve, synchronous and diauxic growth, methods of growth measurement plating turbidometry, metabolic product, Nitrogen content Preservation of microbial cultures-storing glycerol.

**Identification of bacteria:** Morphological identification, staining methods simple staining, capsule cell wall, flagella and endospore staining, Biochemical identification IMVIC test, oxidase, catalase urease, Sugar fermentation and H<sub>2</sub>S production.

**12 Hours**

### UNIT-III

**Habitats of Microorganisms:** Microbes of air, water, soil, food, and normal human body flora.

**Viruses:** Physiochemical properties and classification of viruses. Isolation, cultivation and assay of viruses. Bacteriophages odd and even T phages, ΦX174. Structure, mode of infection, replication and assembly of T even phage. Lytic and lysogenic cycle. Virioids and prions-Yeast.

**Clinical microbiology :** Infection and intoxication endo and exotoxins, air, water and food borne diseases of man and domestic animals causative agent, epidemiology and diagnosis. A. Microbial antibiotics curative and prophylactic measures. B. Monoclonal antibodies: Production and application C. Insulin production by genetically engineered microbes (GEM) D Vaccines killed attenuated and recombinant vaccines. E Integrated pest control management.

**12 Hours**

### UNIT-IV

**Food microbiology :** A .Microbes in the spoilage of food and milk and their prevention. B. Microbes in the production of food-cheese, vitamins, amino acids, organic acids and in alcoholic beverages. C. Microbes as food: Single Cell protein from algae, bacteria, yeast and fungi as mushroom.

**Environmental and Fuel Microbiology:** Environmental pollution: Agricultural domestic and industrial wastes A. Microbes in liquid and solid waste management B. Sacchrirification, Silage production and composting microbes in degradation of pesticides and Xenobiotics ; Microbial fertilizers; biological control of pest by *B. thurengiensis*. C. Metal leaching and extraction, microbes as non conventional energy source, Biogas production, Methane and butanol and hydrogen gases; Alcohol production **14 Hours**

13. Ram R. C. (2007) Microbial Diversity- Modem Trendo, Mittal Publications, New Delhi.

Teaching hours per week : 4

No. of Credits :4

**UNIT-I**

**Introduction :** Scope of biophysics, physical loss, interaction of living and non living matter, chemical foundation of biophysics.

**Characterization of biological molecules:** Hydrodynamics properties of biomolecules- viscosity, diffusion, osmosis, partial specific volume and Donnan effect.

**Microscopy:** Principles of microscopy, light, phase, contrast, fluorescence, X-ray, UV, transmission and scanning electron microscope, confocal microscope and atomic force microscope.

**Preparation of specimen for microscopy:** Microtome technique, fixation, embedding, sectioning and staining for light and electron microscopy. **12 Hours**

**UNIT-II**

**Separation methods:**

**Chromatography:** Paper, thin layer, gas liquid, column, gel filtration, ion exchange, affinity, HPLC, RPLC.

**Centrifugation:** Preparative and analytical centrifuges, rotors, sedimentation analysis, rate-zonal and equilibrium gradient centrifugation, ultra centrifugation, subcellular isolation.

**Electrophoresis:** Types of electrophoresis- Paper and gel (starch, acrylamide and agarose) electrophoresis, capillary, disc, slab vertical gel electrophoresis, submarine horizontal agarose gel electrophoresis, gradient gel electrophoresis, isoelectric focusing, immune electrophoresis, pulsed field gel electrophoresis, blotting of nucleic acids and proteins from gel to solid supports.

**13 Hours****UNIT-III**

**Concentration of macromolecules:** Salting out with ammonium sulphate, flash evaporation, lyophilization, pressure dialysis, reverse dialysis, hollow fiber membrane and reverse osmosis.

**Analytical methods:** Spectroscopy, photobiophysics, electromagnetic spectrum of light, simple theory of absorption of light by molecules, Beer-Lambert's law, types of detectors. UV-Visible spectrophotometry, infrared spectroscopy, Raman spectroscopy, fluorescence spectroscopy, flame photometry, atomic absorption, plasma emission, mass, ESR and NMR spectroscopy, MALDI-TOF MS, LC-MS, ORD and CD, X-ray diffraction and X-ray crystallography.

Biological importance of LASERS, Microwaves and radiations.

**13 Hours****UNIT-IV**

**Radioisotope tracer techniques:** Nature and types of radioactivity, decay units, preparation of labeled biological compounds, detection and measurement of radioactivity (GM counter, Scintillation counter, Cerenkov radiation, autoradiography, photographic emulsion, Gamma ray counter), Quench correction, safety measures in handling radioisotope, biological uses of radioisotopes.

Automatic analysers for amino acids, protein sequencer, nucleotide sequencing system, peptide and polynucleotide synthesizer.

**Methods of detection and quantization of macromolecules on gels:** Staining procedures for proteins, nucleic acids, carbohydrates, pigments. Zymograms, densitometric methods and transilluminators. **12 Hours**

**Courses in Practical's CP 1.4., CP 1.5., CP 1.6.:**

Contact hours per week : 4

No. of credits : 2

**PG71P101- CP. 1.4 PRACTICAL-I**

1. Preparation of buffers-citrate buffer, Tris-HCl buffer and phosphate buffer.
2. Determination of  $pK$  of proteins and amino acids.
3. Estimation of inorganic phosphorus by Fiske-Subbarowe method.
4. Sorenson-Formal titration for estimation % purity of glycine.
5. Isolation and estimation of protein using various colorimetric (Lowry, Biuret methods) and spectrophotometric methods.
6. Determination of molecular weight of a protein by gel filtration chromatography or SDS-PAGE.
7. Estimation of total-sugars/reducing sugars.
8. Isolation and estimation of DNA/RNA
9. Extraction and estimation of plants pigments.
10. Extraction of lipids and fatty acid composition (TLC or GLC)
11. Saponification value and iodine number of fats.

**(New Experiments may be introduced each year)**

**References:**

4. Dr.Palanivelu, (2001). Analytical Biochemistry and Separation Techniques- A Laboratory Manual for B.Sc. and M.Sc. Students.

**PG71P102- CP 1.5 PRACTICAL-II**

1. Preparation of fruit fly media and handling of fruit flies.
2. Morphology of adult fruit fly, recognizing the sex of adult fly. Life cycle of fruit fly. Collection of virgin flies.
3. Examination of mutant flies.
4. Study of law of segregation and law independent assortment in fruit fly.
5. Linkage studies in fruit fly.
6. Preparation of media and culture methods for *Neurospora* / *Sordaria* and *Ascobolus*.
7. Ordered and unordered tetrad analysis in *Neurospora*/*Sordaria* and *Ascobolus*.
8. Preparation of reagents, stains and dehydration grades for cytological studies.
9. Cytological methods: Chromosomes counting, Chromosome banding techniques and Karyotype analysis
10. Analysis of polytene chromosome, sex chromosomes.
11. Structural and numerical changes in Chromosomes.
12. Induction of polyploidy and characterization of autopolyploids.

**(New Experiments may be introduced each year)**

### **PG71P103 - CP. 1.6 PRACTICAL-III**

1. Preparation of nutrient broth and nutrient agar slants, and sterilization. Culture of microorganisms using various methods.
2. Isolation of microorganisms from soil sample and determination of the number of colony forming units. Isolation of pure culture techniques.
3. Simple and differential staining procedures, endospore staining, flagellar staining, cell wall staining, capsular staining and negative staining.
4. Identification of bacteria by biochemical tests.
5. Life cycle of bacteria, fungi, actinomycetes, blue green algae and Clostridium.
6. Study of growth curve of E. coli cells-effect of pH, temperature, salt concentration, nutrient and agitation on growth phase.
7. Antibiotic sensitivity test, LD-50, potency of drug/antibiotic.
8. Microbiological assays of vitamins.
9. Isolation of bacteriophages.

**(New Experiments may be introduced each year)**

**Course ET 1.7 (For the Student of other Departments)**

**Course ET.1.8 (For the Student of other Departments)**

DRAFT PRACTICALS BASED  
ON  
**PG71P104-CP. BIOPHYSICAL AND BIOCHEMICAL TECHNIQUES**

1. Purification of peptides/proteins-salt precipitation, dialysis, column purification.
2. Molecular weight determination of peptides/proteins by gel filtration chromatography/SDS-PAGE.
3. Effect of salt, pH and temperature on proteins.
4. Blotting of nucleic acids/ proteins.
5. Extraction of lipids and fatty acid composition.
6. Estimation of hormones by HPLC.
7. Analysis of elements- AAS/Flame photometer/Kjeldahl method.

**(New Experiments may be introduced each year)**

## SECOND SEMESTER

50 Hours

### PG71T201- CT 2.1.DEVELOPMENTAL AND EVOLUTIONARY GENETICS.

Teaching hours per week : 4

No. of credits : 4

#### UNIT-I

**History and basic concepts:** Model organisms for genetic analysis of development: Insect-drosophila amphibians-*Xenopus* *jarvis*, birds-chick, mammals-mouse, identifying developmental genes.

**Patterning of the vertebrate body plan:** Axes and germ layers-settling of the body axes mesoderm and early nervous system-somite formation and patterning, neural induction and the role of the organizer.

**Development of fruit fly body plan:** maternal gene activity, polarization of body axes during oogenesis, zygotic gene activity in early embryo, segmentation-activation of pair rule genes, selector and homeotic genes, segment polarity genes and compartments. **12 Hours**

#### UNIT-II

**Genetics of embryonic development in plant:** Early events in embryogenesis, gene expression in embryo, genetics of embryogenesis-embryo-lethal mutants, apical-basal axis mutants, segment deletion mutant, radial axis mutants. Cell fate maps in embryo development.

**Genetics of seedling development:** Photomorphogenesis, shoot development, leaf development and root development.

**Genetics of flowering, seed and fruit development:** Transition from vegetative to floral development, ABC model and homeotic genes, mad box genes. Genetics of anther development and pollen formation. Seed development- Endosperm, endosperm balance number, maturation stage, LEA protein and control of seeds dormancy and germination. Fruit development and control of ripening. Genetics of aging and Senescence in animals and plants.

**12 Hours**

#### UNIT-III

**Theories of organic evolution:** Lamarkism and neo-lamarckism, Darwinism and neoDarwinism. Gene frequencies and Equilibrium Gene pool and Gene frequency. Hardy-Weinberg law, attainment of equilibrium at 2 or more loci and sex linkage. Estimation of equilibrium frequencies in natural population-Codominance and dominance in natural population, Sex linkage in natural populations.

**Changes in gene frequencies:** Mutation rate, selection, fitness, gametic and zygotic selection, heterozygous advantage. Unstable equilibrium, equilibrium between mutation and selection. Mutation rate and equilibrium frequencies estimation, migration, Random genetic drift.

**Inbreeding and heterosis:** Inbreeding and assortative mating, inbreeding coefficient from genotypes and pedigrees. Effect of inbreeding on genotype frequencies, phenotypic mean and variance, Cross breeding and heterosis. **13 Hours**

#### UNIT-IV

**Genetic Structure of Population:** Optimum phenotype and selection pressure, types of selection, Fischer's theorem on natural selection, genetic variability in natural populations,

Canalization, genetic homeostasis, genetic load and genetic drift. Genetics of evolutionary process: Race formation, Isolating mechanisms, modes of speciation. Genetic Polymorphism: Types of Polymorphism, Maintaining polymorphisms, sampling the genome, Multilocus selection models, neutral alleles, Molecular evolutionary clock.

**Molecular phylogenies and evolution:** Amino acid sequences, DNA and repetitive DNA sequences, DNA-DNA hybridization, Restriction enzyme sites. Molecular Polymorphism and its evolutionary implications Nucleotide sequence homologies, rate of molecular changes, regulating genes and evolutionary consequences. **13 Hours**

## **PG71T202- CT 2.2. MOLECULAR BIOLOGY**

**50**

### **Hours**

**Teaching hours per week: 4**

**No. of credits: 4**

### **UNIT-I**

**Genetic Material:** Discovery, Overview- DNA-Chemical composition and molecular structure, polymorphism in DNA structure. RNA-Chemical composition and macromolecular structure and types of RNA.

**DNA replication:** Overview, enzymes of replication. Replication apparatus- Primosomes and Replisomes.Mechanism of Replication.Continuous and discontinuous DNA synthesis, supercoiling and termination of replication.Eukaryotic DNA Replication, telomere length and aging. **8 Hours**

### **UNIT II**

**Transcription:** Central dogma, role of DNA in protein synthesis, General features of RNA synthesis. Prokaryotic transcription RNA polymerase, mechanism of transcription.Eukaryotic transcription- RNA polymerases, transcription factor, Post transcription modification of

mRNA- Capping and Polyadenylation. Split genes- intron, exons and gene splicing .Reverse transcription.

**Translation:** Genetic code- Properties of genetic code, Deciphering of genetic code, initiation and termination codons, degeneracy of genetic code, quasiuniversal nature of genetic code, wobble hypothesis and evolution of genetic code. Protein synthesis- ribosomes, amino acid activation, initiation, elongation and termination in prokaryotes and eukaryotes, post translational modification of proteins. Inhibitors of translation. **12 Hours**

### UNIT-III

**Mutagenesis:** Spontaneous mutations. Mutation frequency, Physical mutagens Ionizing radiations and non-ionizing radiations, Radiosensitivity. Chemical mutagens- mutagenic compounds, mode of action, molecular basis of mutation. In vitro site directed mutagenesis.

**DNA repair mechanism:** DNA damage, dark repair, light repair, post replication repair, SOS repair systems. Mobile genetic elements in eukaryotes, transposon tagging of genes, Genetics and evolutionary significance.

**Regulation of gene expression in prokaryotes:** Operon models- Lac operon inducible system, cap protein and catabolite repression, His operon repressible system, Trp operon attenuation control. Posttranscriptional control- feed back inhibition and protein degradation.

**Regulation of gene expression in eukaryotes:** Short term regulation, heat shock proteins, activators, enhancers and silencers. Hormonal regulations, DNA methylation, Z-DNA. Molecular control of transcription, gene expression and chromosome organization, euchromatin and heterochromatin, and gene amplification. Role of RNA in gene expression: siRNA, antisense RNA, hairpin RNA and RNAi. **20 Hours**

### UNIT-IV

**Genome organization:** Genome size, cot analysis, DNA constancy and enigma. DNA complexity, coding and non-coding sequences, LINES and SINES and multigene families.

**Genomics:** Introduction, structural genomics- cytogenetic maps, FISH, SNP, STR, AFLP, RFLP, RAPD, mapping quantitative traits using QTL, construction of chromosome specific library, positional cloning- chromosome walk and jumps. Functional genomics- gene expression sequences, DNA micro array and genome evolution. **10 Hours**

8. Twyman, R.M. (1998): Advanced Molecular Biology. Viva Book Pvt. New Delhi.

### UNIT-I

**Bioenergetics:** Free energy change in biological transformations, thermodynamic principles in biology, redox potential, high energy compounds, brief account of enzymes and coenzymes involved in biological oxidations, organization of respiratory electron transport system, mechanism of oxidative phosphorylation, biological energy transducers, chemiosmotic generation of ATP.

**Metabolism of Carbohydrates:** Glycolysis, Citric acid cycle, glyoxylate cycle, gluconeogenesis, pentose phosphate pathway, glycogenolysis and glycogen synthesis, Biosynthesis of Lactose and starch. Energetics and regulations of the pathways . **12 Hours**

### UNIT-II

**Metabolism of Amino acids:** Hydrolysis of proteins, Proteases, biosynthesis of amino acids and their catabolism(deamination, decarboxylation, transamination) Co-ordinated control of amino acid metabolism, formation of ammonia and Urea, Nitrogen cycle, Biological nitrogen fixation (symbiotic and non symbiotic).

**Metabolism of Lipids:** Lipid Hydrolysis, lipases, outlines of schemes of oxidation of fatty acids (saturated and unsaturated), Biosynthesis of fatty acids, Biosynthesis of Cholesterol, Phospholipids and Glycolipids, Leukotrienes and eicosanoids, prostaglandins and thromboxanes. Lipid peroxidation, metabolism of ketone bodies.Regulation of lipid metabolism. **12 Hours**

### Unit-III

**Metabolism of Heme:** Biosynthesis and degradation of hemeporphyrin, regulation, porphyries.

**Metabolism of Nucleotides:** Biosynthesis of purine and pyrimidine nucleotides by *denovo* and salvage pathways. Regulation Inhibitors of nucleotide biosynthesis.Degradation of nucleotides.

**Signal Transduction:** Inter and Intra cellular signalling: Signal molecules-Protein and non-proteins signals. Organisms involved in the synthesis and release, transport, target cells/tissues. Signal receptors, distribution interaction between the signal receptors, signal transducing elements and the mechanism of transduction. Role of second messengers, such as calcium, cAMP, cGMP, Phosphatidylinositol phosphatases. A general view of plant signals, phytohormones, calcium, phosphatidylinositol and their mechanisms. **12 Hours**

### Unit-IV

**Photosynthesis:** Introduction, Photosynthesis pigments, photosystems, cyclic and noncyclic electron flow and photophosphorylation, CO<sub>2</sub> fixation by Calvin Cycle, C<sub>3</sub>, C<sub>4</sub> and CAM pathways, photorespiration.

**Biochemistry of Hormones:** Classification, structure and functions of hormones Biosynthesis of steroid hormones, thyroid hormones, hormone receptors, second messengers, signal transduction, signal component receptors, mechanism of signal transduction. **14Hours**

**Courses in Practicals CP 2.4, CP 2.5, CP 2.6****PG71P201-CP. 2.4 Practical-I**

1. Fixation of plant and animal tissues, preparation of paraffin blocks and microtomy. Staining and microscopic observations.
2. Types of eggs and cleavage.
3. Development of *Arabidopsis*/fruitfly/fish/frog/mammals.
4. Mounting of imaginal discs in fruit fly.
5. Demonstration of cell death.
6. Gametogenesis, embryogenesis and seed development.
7. Root and shoot differentiation.
8. Estimation of allelic frequency in natural population-PTC loci.
9. Genetic variation in natural population- beak shape, colour pattern in lady beetle, flower colour variation, Mimicry- butterfly and orchid flowers, Metroglyph analysis.
10. Estimation of genetic diversity in natural population.
11. Mechanism of speciation-Polyploidy.
12. Genetic analysis of inbreeding.

**(New Experiments may be introduced each year)**

7. Miglani G.S. (2006) Developmental Genetics, I.K. International Publishing House, Pvt. Ltd. Bangalore.

**PG71P202- CP.2.5 PRACTICAL-II**

1. Isolation of genomic DNA from plants, microbes and mammals
2. Quantification of DNA by UV-spectrophotometer
3. Agarose gel electrophoresis and quality check of isolated DNA
4. Isolation and quantification of RNA by UV-spectrophotometer
5. Electrophoresis of RNA using denaturing gels
6. Induction and characterization of mutations using Chemical/Physical mutagens in plants and animals
7. Induction and demonstration of heat shock proteins
8. Mutation and DNA repair system in microorganisms
9. Substrate induced enzyme synthesis in *E. coli*

**(New Experiments may be introduced each year)**

4. DNA Science: A first course in Recombinant Technology, D.A. Mickloss and G.A. Freyer, Cold Spring Harbor Laboratory Press, New York, 1990.

**PG71P203-CP.2.6 PRACTICAL-III**

1. Qualitative analysis of Carbohydrates.
2. Qualitative analysis of Proteins.
3. Qualitative analysis of Amino acids.
4. Qualitative analysis of Lipids
5. Estimation of mineral elements (Na/P/K/Ca/Fe)
6. Determination of Salivary amylase activity
7. Extraction and estimation of vitamins: Thiamine or Niacin/Ascorbic acid or Vitamin-A
8. Estimation of lycopene
9. Estimation of plant hormone- IAA/Ethylene

**(New Experiments may be introduced each year)**

**Course ET 2.7 (For the Student of other Departments)**  
**Course ET 2.8 (For the Student of other Departments)**

**Second Semester**

**PG71T204A- ET 2.7. MOLECULAR BIOLOGY TECHNIQUES (ELECTIVE)**

**UNIT-I**

**Microscopy:** Sample preparation light microscopy, phase contrast microscopy, Electron microscopy.

**Spectrophotometry, Fluorescence, Fluorescent microscopy, Confocal laser scanning microscopy, Flow cytometry, FACS. Radiochemistry-Scintillation Spectrophotometer,  $\alpha$  -rays counter.**

**PH and Buffer:** pH measurement, centrifugation-Analytical preparative differential, Differential gradient.

**UNIT-II**

**Introduction to proteins:** Levels of protein structure, protein denaturation; chromatography-introduction types membrane and detergents, electrophoresis/SDS PAGE- IEF and protein detection. Protein purification and sequencing.

**Immunogens:** Features, preparation, Antibodies- Immunoblotting, ELISA, Immunoprecipitation monoclonal antibodies.

**13 Hours**

**UNIT-III**

**Nucleic acids:** Structure and isolation of DNA and RNA; modifying DNA-Nucleases, restriction enzymes.

**Electrophoresis:** Agarose and PFGE. Blotting and hybridization: Northern blots and Southern : blots.

**Probes:** Radioactive and non-radioactive labelling;

**PCR:** Quantitative PCR and types of PCR;

**Recombinant DNA:** Vectors, ligation, identifying recombinants, expression of recombinant proteins, DNA sequencing.

**13 Hours**

#### **UNIT-IV**

**Computational Biology or Bioinformatics: Sequence alignments pair-wise sequence alignment. Database searching, BLAST search**

**Genomes and proteomes: Initial identification and characterization proteom identification, mixed peptide sequencing**

**12 Hours**

#### **References:**

- 2. Molecular Biotechnology: Principles and Application of Recombinant DNA. ASM Press, Washington DC**

#### **Course EP 2.8 : Elective Practical -II**

- 1. Isolation of DNA from Plant.**
- 2. Isolation of DNA from Animals/Human.**
- 3. Isolation of DNA from Microbe.**
- 4. Isolation of plasmid DNA.**
- 5. Quantification of DNA - Spectrophotometry, Agarose Gel Electrophoresis.**
- 6. PCR (Polymerase Chain Reaction).**
- 7. Restriction analysis of DNA.**
- 8. Preparation of competent cells and Transformation.**
- 9. Isolation of protein.**
- 10. SDS PAGE.**
- 11. Analysis of Protein and DNA sequence.**

**(New Experiments may be introduced each year)**

#### **References:**

**(New Experiments may be introduced each year)**

### THIRD SEMESTER

#### **PG71T301- CT 3.1. GENETIC ENGINEERING**

**50 Hours**

Teaching hours per week:4

No. Of credits:4

##### **UNIT-I**

**General introduction to the concept of Genetic Engineering:** Milestones in genetic engineering; Isolation of enzymes, DNA sequencing: synthesis and mutation, detection and separation, cloning, gene expression. Patenting of life forms, genetic engineering guidelines

**Restriction Endonucleases:** Modification Methylases and other enzymes needed in genetic engineering

**Cloning vectors:** Plasmids and plasmid vectors, phages and phage vectors, phagemids, cosmids, artificial chromosome vectors (YAC, BAC, HAC), Animal virus derived vectors – SV40 and retroviral vectors.

**12 Hours**

##### **UNIT-II**

**Molecular cloning:** Recombinant DNA techniques, construction of genomic DNA and cDNA libraries, screening of recombinants. Expression strategies for heterologous genes.

**DNA analysis:** labeling of DNA and RNA probes. Southern blotting and fluorescence in situ hybridization, DNA fingerprinting, chromosome walking.

**13 Hours**

##### **UNIT -III**

**Analysis of gene expression:** Northern and Western blotting, gel retardation technique, DNA footprinting, Primer extension, S1 mapping, Reporter assays, RT-PCR and micro array.

**DNA Sequencing:** chemical synthesis of oligonucleotides; techniques of *invitro* mutagenesis, Site-directed mutagenesis, gene replacement and gene targeting. Polymerase chain reaction and its applications.

**13 Hours**

##### **UNIT-IV**

**Use of transposons in genetic analysis:** Transposon tagging and its use in identification and isolation of genes

**Applications of genetic engineering:** Transgenic animals, production of pharmaceuticals, gene therapy, disease diagnosis

**Biosafety regulation:** Physical and Biological containment

**12 Hours**

9. Route Maps in Gene Technology, M.R. Walker and R. Rapley, Blackwell Science Ltd. Oxford. 1997.
10. Genetic Engineering: An introduction to gene analysis and Exploitation in Eukaryotes, S.M. Kingsman and A.J. Kingsman, Blackwell Scientific Publications, Oxford, 1998.
11. Molecular Biotechnology-Glick

### **PG71T302- CT 3.2. MICROBIAL GENETICS AND TECHNOLOGY (50 Hours)**

Teaching hours per week : 4

No. Of credits: 4

#### **UNIT-I**

**Metabolic regulation in bacteria:** Microbial metabolism, catabolism, EMP, PP, ED, PK pathway in brief; TCA cycle, respiration and fermentation. Anabolism-biosynthesis of nucleic acids, proteins, peptidoglycan and lipids in brief. Metabolic regulation: Modification of enzyme activity, control of enzyme synthesis, mechanism of general regulation. Secondary metabolism and its control, non-ribosomal peptide synthesis, auto regulation, end-product regulation, inducible effects, nitrogen and phosphate regulation. Use of metabolic Inhibitors and tracer techniques in the investigation of metabolic pathways.

**Mutagenesis in bacteria:** Isogenic strains, types of mutants- auxotrophic and antibiotic mutants; mutagenic agents and mechanism of action of mutagens; isolation and characterization of mutants, replica plating; reversion and suppression. **13 Hours**

#### **UNIT-II**

**Plasmid biology:** Types of plasmids, plasmids, isolation and purification of plasmid DNA, transfer of plasmid DNA, in vitro plasmid transfer, plasmid replication. Properties of F plasmid, R plasmid, Col plasmids, Ti plasmid, broad host range plasmids and other plasmids.

**Transposable genetic elements:** IS elements, detection of transposition, Transposition mechanism, and excision of transposons, phage mu, transposition and evolution.

**Recombination in bacteria:** Transformation biology of transformation, molecular mechanism, transformation mapping and other applications. Conjugation-F factor, Hfr transfer and mapping. Recombination in recipient cells, Rec mutants-properties, rec protein and function. Transduction- generalized and specialized transduction, transduction and mapping and its role as cloning vehicle. **12 Hours**

#### **UNIT-III**

**Phage genetics:** Phage genetic material, phage mutants. T4 phage and its life cycle. Genetic recombination and mapping in T4 phage Lambda phage-gene organization, lytic cycle, transcription, replication and recombination in lambda phage and non essential genes.

Lysogeny-immunity and excision and other modes of lysogeny. Lambda phage and carcinogen screening.

**Fine structure analysis of gene:** One gene one enzyme hypothesis. Arginine biosynthesis in *Neurospora*, colinearity between gene and protein Tryptophan synthase gene in *E. Coli*. Genetic analysis of rII region of T4 phage and cistron concept. **12 Hours**

#### **Unit-IV**

**Genetic improvement of industrial microorganisms:** Screening selection and genetic improvement of industrial culture. Mutation and screening-random and rational screening. Use of recombinant DNA technology in SIP. Problem associated with SIOP. Improvement of character other than product. Importance of media in SIP.

**Industrial fermentation:** Industrial fermentation and production of organic acids, amino acids, antibiotics, alcohol, enzymes, polymers, biomass, solvents, steroids and vitamins. Recent advances in industrial products using microbes: Biosensors, biochips, biofertilizers, bioplastic and bioremediation, immobilized cells and enzymes. **13 Hours**

6. Stanbury, P.F. and Whitaker, A. (1984): Principles of fermentation Technology, Pergamon Press Ltd. London.

#### **PG71T303- CT 3.3. HUMAN GENETICS AND GENETIC COUNSELLING (50 Hours)**

Teaching hours per week : 4

No. Of credits : 4

##### **UNIT -I**

**Meaning and scope of Human Genetics:** Historical development of human Genetics. Its relationship with other Biological sciences and medicine.

**Patterns of monogenic inheritance:** Pedigree construction Autosomal inheritance, sex linked inheritance. Other modes of inheritance- mitochondrial genes, genomic imprinting, uniparental disomy.

**Patterns of polygenic and multifactorial inheritance:** Continuous and discontinuous traits, Multifactorial threshold traits Pyloric stenosis, Neural tube defect. Congenital heart defects. Complex disorders of adult life. **12 Hours**

## UNIT-II

**Human cytogenetics:** Normal human karyotype, sex chromosomes, chromosome preparation methods- Leucocyte culture, bone marrow, solid tissue, testicular and ovarian biopsies. Chromosome banding methods and nomenclature of chromosome bands. Autosomal abnormalities- abnormalities of chromosome number and structure. Sex chromosomal abnormalities.

**Gene mapping and linkage analysis:** Physical mapping of human genes- somatic cell genetics, mapping by gene dosage, FISH and high resolution mapping approaches. Detection and measurement of linkage in humans. Linkage maps and its applications. Human genome project- organizations and goals. Genome organization Nuclear and mitochondrial genome, gene families. Mapping strategies, current status. Human genome diversity and comparative genomics.

**13 Hours**

## UNIT-III

**Biochemical genetics:** Biochemical and molecular basis of human diseases. Inborn errors of metabolism- amino acid, carbohydrate and nucleic acid metabolisms. Haemoglobinopathies- globin gene mutation and genetic disorders. Lysosomal and other genetic disorders.

**Genetics of Cancer:** Forms of cancer, genetic basis and properties of cancer cells, clonal nature, oncogenes, tumor suppressor genes. Familial cancer, cancer cytogenetics, chemical and radiation carcinogenesis.

**13 Hours**

## UNIT-IV

**Applied Human Genetics:** Prevention and cure of hereditary diseases: prenatal diagnosis and preimplantation diagnosis, amniocentesis, chorion villi sampling, ultrasonography, cytogenetic and biochemical analysis Genetic screening of hereditary diseases, gene therapy. DNA fingerprinting and paternity diagnosis. Eugenics.

**Genetic Counseling:** Meaning, Objectives and goals. Process of genetic counselling, diagnosis, family history calculating the risk, discussing the options, genetic testing of children, carrier detection, ethical and legal aspects.

**12 Hours**

### **Courses in Practicals CP 3.4, CP 3.5, CP 3.6:**

**Contact hours per week:4**  
**No. of credits:2**

#### **PG71P301- CP. 3.4 PRACTICAL-I**

1. Bacterial culture and antibiotic selection media. Preparation of competent cells
2. Isolation of plasmid DNA
3. Quantification of plasmid DNA
4. Agarose gel electrophoresis and restriction mapping of DNA
5. Construction of restriction map of plasmid DNA
6. Cloning in plasmid vectors
7. Preparation of single stranded DNA template
8. DNA sequencing
9. Gene expression in *E.coli* and analysis of gene product
10. PCR
11. Reporter gene assay (GUS/CAT/a-GAL)
12. Gene silencing (Demonstration using teaching kit)

**(New Experiments may be introduced each year)**

#### **References:**

#### **PG71P302-CP.3.5 PRACTICAL-II**

1. Induction and characterization of mutants in bacteria
2. UV-dose survival curve in bacteria
3. Conjugation in bacteria
4. Isolation of plasmid
5. Transformation in bacteria
6. Microbial fermentation.
7. Microbiological assay of Vitamins.
8. Estimation of Vitamin C by 2,4-dinitro-phenyl hydrazine method.
9. Estimation of Vitamin A by calorimetric method.

10. Estimation of Calcium, Phosphorus and Iron. Estimation of Nitrogen by Microjeldahl's method.
11. Estimation of Lipids
12. Estimation of Carbon content
13. Analysis of water

**(New Experiments may be introduced each year)**

**References:**

3. Streptis and Yasbin (2001) Modern Microbial Genetics, Niley Ltd.

**PG71P303 - CP. 3.6 PRACTICAL-III**

1. Detection of inborn errors of metabolism.
2. Identification of ABO and Rh blood group alleles.
3. Estimation of Hemoglobin
4. Estimation of Lipid Profile (HDL, LDL, VLDL).
5. Culture of human leucocytes and chromosomal preparations
6. Human Karyotyping
7. Chromosomal abnormalities in some human syndromes
8. Cytogenetic characterization of cancerous cells
9. In vitro fertilization and embryo transfer (demonstration)
10. Genetic counseling methods based on case history.
11. Assessment of inheritance of quantitative characters.
12. Study of sex chromatin in humans.

**(New Experiments may be introduced each year)**

**Course ET 3.7 (For the Student of other Departments)**

**Course ET 3.8 (For the Student of other Departments)**

## FOURTH SEMESTER

### PG71T401- CT 4.1 BIOINFORMATICS

50 Hours

Teaching hours per week:4

No. of credits:4

#### UNIT-I

**Information Theory and Biology:** Concepts of probability, joint probability, conditional probability. Shannon Entropy and Information, Mutual information, Information theory, Bayes theorem, Markov chains, Hidden Markov Models, applications to DNA and protein sequences.

**Biological Databases:** Introduction. Construction, file formats, contents, search and retrieval tools of various biological databases: GenBank, SwissProt, Protein Data Bank, PubMed, Online Mendelian Inheritance in Man, Species 2000, KEGG pathway database, Gene Expression Omnibus, prosite, BLOCKS, Structural Classification of Proteins (SCOP) Database.

13 Hours

#### UNIT-II

Pair wise Sequence Alignment and database sequence similarity search: Meaning of Sequence alignment, pairwise sequence alignment, Global alignment, Local Alignment, Dynamic Programming Method, Needleman Wunsch algorithm, Smith - Waterman algorithm, Substitution matrices - Unitary matrix, PAM and BLOSUM matrices, Gap penalties, Evolutionary basis and significance of sequence alignment. Sequence similarity search methods for DNA and protein sequences, their significance.

- a. FASTA- Algorithm, Parameters, Output and interpretation of results, Versions of FASTA.
- b. BLAST - Parameters, Output and interpretation of results, Versions of Algorithm, BLAST.
- c. PSI-BLAST and PHI-BLAST.

12 Hours

#### UNIT-III

**Multiple Sequence Alignment:** Meaning of Multiple Sequence Alignment, Global Multiple Sequence Alignment: Progressive Alignment method CLUSTALW. Local Multiple sequence Alignment: Profile Analysis, Block Analysis. Significance of Multiple Sequence Alignment. Multiple Sequence Alignment editors: JalView, GeneDoc, CLUSTALX, Boxshade.

**Molecular Phylogenetics:** Meaning of phylogenetic analysis. Relationship between Multiple Sequence Alignment and Phylogenetic Analysis. Meaning and significance of evolutionary trees. Methods of phylogenetic prediction: Distance based methods: Fitch Margoliash method, Neighbor joining method, Unweighted pair group method with arithmetic mean. Maximum Parsimony method, Maximum Likelihood method. Reliability of phylogenetic predictions, uses of phylogenetic analysis.

Commonly used phylogenetic analysis programs: PHYLIP and PAUP.

12 Hours

#### UNIT-IV

**Genome Databases and Genome Analysis:** Genomic sequence databases; GOLD, human genome sequence database, Mouse Genome database, Arabidopsis genome resource, E.coli genome database. Genome sequence analysis. Principle, salient features and drawbacks of methods of gene prediction/gene modeling: GRAIL, GENEMARK, GLIMMER. Promoter prediction methods. salient features and drawbacks of methods of genome comparison: MUMMER, significance of comparative genomics. Microarrays: Principle, construction and applications.

**Protein Structure Prediction:** Principle, salient features and drawbacks of methods of prediction of protein secondary structure: Chou-Fasman, GOR, PSI-PRED, PROF, PHD. Principle, salient features and drawbacks of methods of prediction of tertiary structure of proteins: Comparative protein modeling, threading and ab initio structure prediction.

## **PG71T402- CT 4.2. IMMUNOGENETICS AND IMMUNOTECHNOLOGY (50Hours)**

Teaching hours per week: 4

No. of credits: 4

### **UNIT I**

**Introduction:** Phylogeny of Immune system, innate and acquired immunity, clonal nature of immune response.

**Cells and Organs of Immune system:** Hematopoiesis, Immune system cells: Lymphoid cells, Mononuclear cells, Granulocytic cells; organs of the immune system, primary and secondary lymphoid organs, B-Cell receptor

**Antigens:** Factors that influence immunogenicity, epitope Properties of B-Cell epitope and T-cell epitope (Eptope)

14 Hours

### **UNIT-II**

**Immunoglobulin Genes:** Genetic model compatible with Ig structure, mutagenic organization of Ig genes, Gene arrangements, Generation of antibody diversity, expression of Ig genes, regulation of Ig gene transcription

**Immune response to infectious diseases:** Viral, Bacterial and Protozoan diseases: Autoimmunity. Immunodeficiency diseases, Phagocytic, Humoral, Cell-mediated and combined immunodeficiency.

12 Hours

### **UNIT-III**

**Immune systems and AIDS:** The immune system in AIDS, HIV, diagnosis of HIV infection and AIDS, immunological abnormalities in AIDS, development of an AIDS vaccine.

**Transplantation immunology:** Immunological basis of graft rejection, MHC and HLA polymorphism tissue typing, general and specific immunosuppressive therapy; Cancer and Immune system: tumors of the immune system, tumor antigens, Immune response to tumor, cancer immunotherapy.

12 Hours

### **UNIT-IV**

**Immunotechnology:** Introduction, production of polyclonal and monoclonal antibodies, engineered antibodies: purification and fragmentation of immunoglobins; immunoprecipitation, labeling antibodies; immunoblotting and immunoassay; immunohistochemistry

12 Hours

## PG71T403- CT 4.3. MOLECULAR DIAGNOSIS AND MOLECULAR MEDICINE

Teaching hours per week:4

No. of credits: 4

### UNIT-I

**Introduction to Molecular Basis of Diagnosis:** Discovering human disease genes, cloning human disease genes. Functional and, positional cloning of candidate gene

**DNA Diagnostic Systems:** Polymerase Chain Reaction (PCR) Techniques, DNA, RNA and Protein blotting, Reverse line blotting, Hybridization probes, non radioactive hybridization procedures, molecular beacons, DNA fingerprinting, Single Nucleotide Polymorphisms (SNP), Restriction Fragment Length Polymorphisms (RFLP), Randomly Amplified Polymorphic DNA (RAPD), Pedlock probes, genotyping with fluorescence labelled PCR primers. DNA micro-array.

14 Hours

### UNIT-II

**Molecular Diagnosis of Genetic disease:** Direct detection of mutations in Human disease genes-Single strand conformation, polymorphism analysis, Sensitive conformation gel electrophoresis., Denaturing Gradient Gel Electrophoresis, Heteroduplex analysis, Chemical mismatch cleavage., Direct DNA sequencing, Protein truncation test, Linkage analysis. Examples-Sickle Cell anaemia, Hemophilia etc.

12 Hours

### UNIT-III

**Molecular Cytogenetics:** Basic Principles of FISH, Steps in typical FISH procedure, signal amplification procedure, other systems of FISH: Comparative Genomic Hybridization (CGH) Molecular FISH, Primed in situ hybridization (PRINS) and In situ PCR.

**Applications of FISH:** Probes hybridizing to unique sequences Prader Willi syndrome, Angelman syndrome, translocations.(Probes hybridizing to entire chromosomes) Chromosome painting, chromosome in situ suppression (CISS), reverse painting.

12 Hours

### UNIT-IV

Concepts and perspectives of molecular Medicine: Basic Biochemistry, Molecular Biology and Genetics relevant to Molecular Medicine. Human Genome: Implications and applications Gene Therapy as a potential tool to cure human diseases. Recombinant molecules in medicine.

Transgenic and knockout animal models. Stem cell research and its application in human health. Intellectual property Right (IRP) Issues and Ethical Legal, and Social (ELSI).

12 Hours

### **Courses in Practicals CP 4.4, CP 4.5, CP 4.6:**

Contact hours per week: 4

No. Of credits:2

#### **PG71P401- CP. 4.4 PRACTICAL I**

1. Literature database search: Pub Med. (I Session)
2. Database search and retrieval using keywords: GenBank, WISS-FrOL, PDB, OMIM, KEGG, GEO, ProSite, GOLD (4 Sessions)
3. Pairwise sequence alignment: using GAP and SIM algorithms, (I Session)
4. Sequence search and retrieval using BLAST, (( Session)
5. Sequence search and retrieval using FASTA, (I Session)
6. Multiple sequence alignment: Using CLUSTAL W. (I Session)
7. Phylogenetic analysis using Phylip or PAUP (1 Session)
8. Gene prediction using algorithms like GRAIL, GLIMER, GENEMARK, (1I Session)
9. Genome comparison using MUMMER (I Session)
10. Protein Structure prediction using algorithms like GOR, PSI-Pred, PROF, PHD.(I Session)

#### **PG71P402- CP. 4.5 PRACTICAL-II**

1. Blood film Preparation and identification of cells
2. Lymphoid organs and their structured organization
3. Immunization, collection of serum
4. Double diffusion and immuno- electrophoresis
5. Radial immuno diffusion
6. Purification of IgG from serum
7. Separation of mononuclear cells by Ficoll- Hypaque method

8. Con-A induced proliferation of thymocytes (by MIT method)
9. Western-blotting
10. ELISA
11. Hapten conjugation and quantization
12. Immunodiagnostics (demonstration using commercial kits)

**References:**

1. Gordon J.R., (1998). A Practical Guide to Cellular and Molecular Methods in Immunology. Gordon Publishers.

**PG71P403- CP. 4.6 PRACTICAL-III**

1. Polymerase Chain Reaction (PCR)
2. Detection of HIV in serum (ELISA Method)
3. Detection of HIV using PCR primers.
4. Detection of HPV using InnoLipa Kit method
5. Detection of Hemophilia and Sickle cell anemia mutations by SSCP/SCGE
6. Human DNA fingerprinting.
7. FISH demonstration.

**KARNATAK UNIVERSITY, DHARWAD**

Regulations and Syllabus (Revised) For M.Sc. Course

In

BIOCHEMISTRY (I to IV Semesters)

Under Choice Based Credit System (CBCS)

**From  
2019-20 onwards**

Regulations Governing Post-Graduate Programmes in the Faculty of Science and Technology Under Choice-Based Credit Scheme (CBCS)  
(framed under Section 14(1)(c) of K.S.U. Act, 2000)

### 1.0 Title

These Regulations shall be called “Regulations “governing the Post-Graduate Programmes in the Faculty of Science & Technology under the Choice Based Credit System” in Karnatak University, Dharwad.

### 2.0 Commencement

These Regulations shall come into force with effect from the academic year 2018-19

### 3.0 Definitions

- a In these Regulations, unless otherwise provided: “Academic Council” means Academic Council of the University constituted according to the *Karnatak State Universities Act, 2000*.
- b “ Board of Studies” means P.G. Board of Studies of the University, Adhoc/Combined and Steering Committees of International Diploma Programmes in the discipline/subjects concerned.
- c. “Compulsory Course” means fundamental paper, which the student admitted to a particular Post-Graduate Programme, should successfully complete to receive the Post Graduate Degree in the concerned subject.
- d Course Weightage” means number of credits assigned to a particular course.
- e. “Credit means the unit by which the course work is measured. One Credit means one hour of teaching work or two hours of practical work per week. As regards the marks for the courses, 1 credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks.
- f “Cumulative Grade point Average (CCPA)” refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward from first semester to subsequent semesters.
- g. “Degree” means Post-Graduated Degree.
- h “ Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each course by the candidate in both Internal Assessment and Semester-end Examinations.
- i “ Grade Point Average (GPA)” refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester.
- j. “Open Elective Course” means a paper offered by a Department to the students of other Departments.
- k. “Post-Graduate Programme” means semesterised Master’s Degree Programmes excluding P.G. Diploma.
- l. “ Specialization course means advanced paper offered by a Department that a student of that Department can opt as a special course.
- m. “Student” means the student admitted to programmes under (k).
- n. “ University” means Karnatak University, Dharwad.

#### **4.0 Minimum Eligibility for Admission**

A candidate, who has successfully completed Bachelor's Degree programme in Science or any other Degree programme of this University or of any other University recognized as equivalent thereto by this University, shall be eligible for admission to the Post Graduate Programmes in science provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the University from time to time.

Admissions shall be as per Government of Karnataka reservation policy and the directions issued in this regard from time to time.

#### **5.0 Durations of the Programme**

The Durations of the study for the Post-Graduate programme shall extended over a period of two (three in case of MCA) consecutive academic years, each academic year comprising two semesters, and each semester comprising sixteen weeks with a minimum of ninety working days.

However, the students, who discontinue the programme after one or more semesters due to extraordinary circumstances, are allowed and complete the programme with due approval from the Registrar. Candidate shall not register for any other regular course other than Diploma and Certificate courses being offered on the campus during the durations of P.G. Programme.

#### **6.0 Medium of Instruction and Evaluation**

The medium of instruction shall be English. However, the students may write the examinations in Kannada if so provided by the concerned Board of Studies.

#### **7.0 Programme Structure**

**7.1** The students of Post-Graduate programme shall study the courses as may be approved by the concerned Board of Studies. Faculty and the Academic Council of the University from time to time subject to minimum and maximum credits as outlined in these regulations.

**7.2** There shall be three categories of courses namely, Compulsory Courses. Specialization courses and Open Elective Courses.

**7.3** Each programme shall have a set of Compulsory Courses, as stipulated in the regulations governing the concerned programme, that a student must complete to get the concerned degree.

**7.4** In those programmes that offer specialization courses, the students shall choose the prescribed number of Specialization Courses offered within the Department.

**7.5** Each Department shall offer Open Elective courses for students of other Departments. The students of a Department shall choose Open Elective courses from among those prescribed by the University and selected by the Department from time to time. P.G. Centres and affiliated colleges, can offer those Open Electives Courses which are approved of prescribed by their Parent Department of the University. Such Open Elective courses shall be taught by qualified teachers approved by the University.

**7.6** The credits for each of the Compulsory Courses may vary from 2 to 4: for Specialization Course, from 2 to 4 and for Open Elective Course, from 2 to 4, wherever project work/field work/practical are involved in the course, the credits may extend to 6 or as otherwise provided by concerned programme.

**7.7** The minimum credits for P.G. Programme shall be 96. In the case of MCA, the minimum number of credits shall be 158 and in case of M.Sc. Computer Science the minimum credits are 116.

**7.8** The students shall undertake project/field work during the programme as compulsory course or in lieu of Specialization Course or Open Elective Course if so specified by concerned Board of Studies.

**7.9** The ratio between Compulsory, Specialization and Open Elective may differ from department to department

**7.10** The detailed programme structure for Faculty of Science & Technology shall be as prescribed and shown in Annexure-I, Annexure-Ia& Annexure-Ib

**7.11** The Open Elective Courses generally will have practical component, unless otherwise specified by the respective Board of Studies. The number of students admitted to the course shall commensurate with the availability of infrastructure.

## **8.0 Attendance**

**8.1** Each course shall be taken as a unit for the purpose of calculating the attendance.

**8.2** Each student shall sign the attendance register maintained by the Department for each course for every hour/unit of teaching /practical. The course teachers shall submit the monthly attendance report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the second week of the subsequent month.

**8.3** Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.

**8.4** A student shall be considered to have satisfied the required attendance for each course if he/she has attended not less than 75% of the total number of instructional hours during the semester.

**8.5** There is no provision for condoning shortage of attendance.

**8.6** The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission a fresh to the given semester.

**8.7** Such of the candidates who have participated in State/National level Sports, NSS, NCC, Cultural activities and other related activities as stipulated under the existing regulations shall be considered for giving attendance for actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authorities within two weeks after the event.

## **9.0. Examination**

**9.1** There shall be an examination at the end of each semester. The odd semester examinations shall be conducted by the respective Departments/P.G. Centres/Colleges. The even semester examinations shall be conducted by the University.

**9.1.1** Unless otherwise provided, there shall be semester-end examination of 3 hours duration for 75/100 marks; 1.5 hours for 50 marks and 2/4 hours for 35/75 marks practical examination.

**9.1.2** Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application form through the proper channel and shall also pay the fees prescribed.

**9.1.3** The Office of the Registrar (Evaluation) shall allot the Register Number to the candidate at 1<sup>st</sup> semester-end examination. That will be the Register Number of the candidate for all subsequent appearances at semester-end examinations.

**9.1.4.** The Answer scripts shall be in the safe custody of the University for a maximum period of six months from the date of announcement of results. These shall be disposed off after six months.

**9.1.5** The programme under CBCS is a fully carry-over system. A candidate reappearing for either the odd or even semester examinations shall be permitted to take examinations as and when they are conducted (even semester examination in even semester and odd semester examination in odd semester).

**9.1.6** Candidates who have failed, remained absent or opted for improvement in any course/courses shall appear for such course/courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.

**9.1.7** Candidates who desire to challenge the marks awarded to them, in the even semester-end examinations, may do so by submitting an application along with the prescribed fee to the Registrar (Evaluation) within 15 days from the announcement of results.

## **9.2 Odd Semester Examination**

**9.2.1** There shall be a Board of Examiners to set, scrutinize and approve question papers.

**9.2.2** The BOE shall scrutinize the question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation)

**9.2.3** The office of the Registrar Evaluation shall dispatch the question papers to the Departments/P.G. Centres/Colleges who shall conduct the Examinations according to the Schedule announced by the University.

**9.2.4** The Chairperson of the Department/Administrator of the P.G. Centre/Principal of the College shall appoint one of their fulltime course teachers as Post Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts.

**9.2.5** Answer scripts shall be valued by the examiners appointed by the University. However, in those centers where an examiner for a particular course is not available, then the answer scripts of that course shall be dispatched to the office of the Registrar (Evaluation) who shall arrange for valuation of the same.

**9.2.6** There shall be single valuation. The examiners (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on the answer script.

**9.2.7** The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be dispatched by PGP Coordinator to the Registrar (Evaluation)'s Office at the conclusion of the valuation at the respective centres.

**9.2.8** The Office of the Registrar Evaluation shall process and announce the results.

## **9.3 Even Semester**

**9.3.1** There shall be a Board of Examiners to set, scrutinize and approve question papers.

**9.3.2** As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other Universities/Research Institutes.

**9.3.3.** Each answer script of the semester-end examination (theory and project report) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averages with nearer award of the two evaluations.

Provided that in case of the number of answer scripts referred to the third examiner in a course exceeds of 5 or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be

valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.

**9.3.4.** Wherever dissertation/project work is prescribed in the even semesters of a programme, the same shall be evaluated by both internal and external examiners. The evaluation shall be as prescribed by the concerned Board of Studies.

**9.3.5** In Case of programmes with practical examination details of maximum marks, credits or duration may vary from Department to Department as specified by the concerned Board of Studies.

#### **9.4. Evaluation**

**9.4.1.** Each Course shall have two evaluation components- Internal Assessment (IA) and the Semester End Exams.

**9.4.2.** The IA Component in a course shall carry 25% / 30% /50% and the Semester End Examination shall carry 75% /70% /50% respectively, as the case may be. Courses having 25% & 30% / 50% marks as internal assessment shall have 3 / 5 marks allotted to attendance. However, in case of project work, the distribution of marks for Internal Assessment and Examination shall be left to the discretion of the concerned BOS.

**9.4.3.** Marks for attendance shall be awarded to the students according to the following table.

For courses carrying 25% of marks for IA, the attendance marks shall be

Attendance (in percentage)	Marks
Above 90	3
Above 80 and up to 90	2
Above 75 and up to 80	1

**9.4.4.** Internal Assessment (IA) shall be based on written tests, practical and seminars. However, the number of IA components per course per semester shall not be less than two.

**9.4.5.** The IA marks list shall be notified on the Department Notice Board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination, or as directed by the University.

**9.4.6.** The tests shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.

**9.4.7.** There is no provision for seeking improvement of Internal Assessment marks.

**9.4.8.** The IA records, pertaining to Semester Examination, shall be preserved by the department/Centres/Colleges for a period of one year from the date of semester examination. These records may be called by the University or body constituted by the University as and when deemed necessary.

**9.4.9.** The dissertation/project work viva-voce shall be conducted by an internal and external examiner.

#### **10.0 Maximum duration for completion of the Programme**

**10.1** A candidate admitted to a post graduate programme shall complete it within a period which is double the duration of the programme from the date of admission.

**10.2** Whenever the syllabus is revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabus.

## 11.0 Declaration of Results

**11.1** The minimum for a pass in each course shall be 40% of the total marks including both IA and the semester-end examinations. Further, the candidate shall obtain at least 40% of the marks in the semester-end examination. There is no minimum for the IA marks.

**11.2** Candidates shall secure a minimum of 50% in aggregate in all courses of a programme in each semester to successfully complete the programme.

**11.3** Candidates shall earn the prescribed number of credits for the programme to qualify for the PG Degree.

**11.4** For the purpose of announcing the results, the aggregate of the marks secured by a candidate in all the semester examinations shall be taken into account. However, Ranks shall not be awarded in case of the candidate has not successfully completed each of the semesters in first attempt or has not completed the programme in stipulated time (vide Regulation 5) or had applied for improvement of results.

## 12.0 Marks, Credit Points, Grade points, Grades and Grade Point Average

**12.1** The grade points and the grade letters to candidates in each course shall be awarded as follows:

Percentage of marks	Grade points	Grade Letter
75 and above, up to 100.00 %	7.50 to 10.00	A
60 and above but less than 75%	6.00 and above but less than 07.5	B
50 and above but less than 60%	5.00 and above but less than 6.0	C
40 and above but less than 50%	4.00 and above but less than 5.00	D
Less than 40%	Less than 4.00	F

**12.2** Credit Point (CP): The Credit Point for each course shall be calculated by multiplying the grade obtained by the credit of the course.

**12.3** The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned by the student in all the courses by the total number of credits of those courses of the semester.

**12.4** The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points in all the semesters by the total number of credits in all the semesters.

The CGPA to date shall be calculated by dividing the total number of credit points in all the semesters to date by the total number of credits in all the semesters to date.

CGPA for the I Semester=

Sum of the CP of the I Semester ÷ Sum of the credits of the I Semester

CGPA for the II Semester=

Sum of the CP of the Sem ÷ Sum of the CP of II Sem ÷ Sum of the Credits of the I Semester ÷ II Semester

CGPA for the III and IV Semester shall be computed accordingly.

**12.5** The Grade Card at each semester examination shall indicate the courses opted by the student, the credit for the course chosen by the student, the credit points obtained in

each course, the grade letter and the grade point average. No. class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade point Average.

**12.6.** Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below.

Cumulative Grade Point Average (CGPA)	Class to be awarded
7.5 to 10.0	First Class with Distinction
6.0 and above but below 7.5	First Class
5.0 and above but below 6.0	Second Class

- a) Notwithstanding anything contained in these regulations, the semester system at Post- Graduate level is hereby repeated.
- b) The provisions of any order, Rules or Regulations in force shall be inapplicable to the extent of its inconsistency with these Regulations.
- c) The University shall issue such order, instructions, procedures and prescribe such format as it may deem fit to implement the provisions of this Regulations.
- d) The procedural details may be given by the University from time to time.
- e) Any unforeseen problems/difficulties may be resolved by the Vice Chancellor, whose decision in the matter shall be final.

The Programme structure of the Master of Science Degree shall be as follows:

Semester	No. of compulsory & Specialization courses (credit s/course)	Total credits for compulsory & Specialization courses	No. of open elective course (credits/course	Total credits of open elective course	Total credits for the semester
Sem. I	Th:04(04)=16 Pra/Th*:04(02)=08	24	----	--	24
Sem.II	Th:03(04)=12 Pra/Th*:03(02)	18	Th:01(04)=04	04	22
Sem.III	Th:03(04)=12 Pra/Th*:03(02)	18	Th:01(04)=04	04	22
Sem.IV	Th:03/04** (04)=12/16 Pra/Th:03/04**(02) =06/08 Pj# 01(06)=06	24		--	24
Total	Th 13/ 04= 52 Pra 13/ 02=26 24/26 Pj 1(06)=06	82	02(04)=08	08	92

(\*CP: Credit Points)

## KARNATAK UNIVERSITY, DHARWAD

### P.G. DEPARTMENT OF STUDIES IN BIOCHEMSITRY

The Post-graduate studies in Biochemistry was started in the Karnatak University as a division in the Department of chemistry during the year 1970, and it was separated as an independent Department of Biochemistry in 1997. Since then, teaching and research in Biochemistry to train M.Sc. and Ph.D degree students have been the major thrust of department. The teaching programme is designed to give our students current awareness in the wide ranging allied subjects with in-depth study of core biochemistry. Consequently, many of our students successfully completed National Level Examination like NET of

UGC/CSIR and GATE. The excellent training given to the students has helped them to be placed in National/International Research Laboratories and Pharmaceutical companies, Medical, Dental, Agricultural colleges and Universities in the Country and Abroad. The department has several national and international collaborative research projects. The major thrust areas of research in the department include Lectins and Glycobiology, Environmental Biotechnology, Enzymology, Antiviral Protein Biochemistry and Clinical Biochemistry and Toxicology.

## M.Sc. Degree in Biochemistry

The department offers two years M.Sc. course in Biochemistry of four semester with Choice Based Credit System (CBCS). The following are the Regulations governing the M.Sc. course in Biochemistry offered by Karnatak University under Choice Based Credit System (KU-CBCS) from the academic year 2008-09.

### a. Course structure and scheme of Examination for M.Sc. Biochemistry semester I, II, III & IV

#### I SEMESTER

Sl. No.	Paper Code No. and Title Compulsory Courses and Open Elective Course	Credits	No. of Hrs/week Theory /Practical	Duration of exam in Hrs Theory/ Practical	Internal Assessment Marks Theory /Practical	Marks at the Exams	Total marks
Theory							
1	CT 1.1 Basic Biochemistry	4	4	3	25	75	100
2	CT1.2 Analytical Biochemistry	4	4	3	25	75	100
3	CT 1.3 Physiology & Nutrition	4	4	3	25	75	100
4	CT 1.4 Cell Biology	4	4	3	25	75	100
Practicals							
1	CP 1.5: Basic Biochemistry Practicals	2	4	4	10	40	50
2	CP1.6: Analytical Biochemistry Practicals	2	4	4	10	40	50
3	CP 1.7: Physiology and Nutrition Practicals	2	4	4	10	40	50
4	CP 1.8: Cell Biology Practicals	2	4	4	10	40	50

#### II SEMESTER

Sl. No.	Paper Code No. and Title	Credits	No. of Hrs/week Theory /Practical	Duration of exam in Hrs Theory/ Practical	Internal Assessment Marks Theory	Marks at the Exams	Total marks
---------	-----------------------------	---------	--	--	---	--------------------------	----------------

					/Practical		
Theory							
1	CT 2.1 Biomolecules	4	4	3	25	75	100
2	CT 2.2 Enzymology	4	4	3	25	75	100
3	CT 2.3 Microbial Biochemistry	4	4	3	25	75	100
4	ET 2.1 Biochemical techniques	4	4	3	25	75	100
Practicals							
1	CP 2.4: Biomolecules Practicals	2	4	4	10	40	50
2	CP 2.5: Enzymology Practicals	2	4	4	10	40	50
3	CP 2.6: Microbial Biochemistry Practicals	2	4	4	10	40	50

### III SEMESTER

Sl. No.	Paper Code No. and Title	Credits	No. of Hrs/week Theory /Practical	Duration of exam in Hrs Theory/ Practical	Internal Assessment Marks Theory/ Practical	Marks at the Exams	Total marks
Theory							
1	CT 3.1 Metabolism-I	4	4	3	25	75	100
2	CT 3.2 Metabolism-II	4	4	3	25	75	100
3	CT 3.3 Medical Biochemistry &Endocrinology	4	4	3	25	75	100
4	ET 3.1 Clinical Biochemistry	4	4	3	25	75	100
Practicals							
1	CP 3.4 : Metabolism-I Practicals	2	4	4	10	40	50
2	CP 3.5: Metabolism-II Practicals	2	4	4	10	40	50
3	CP 3.6: Medical Biochemistry Practicals	2	4	4	10	40	50

#### IV SEMESTER

Sl. No.	Paper Code No. and Title	Credits	No. of Hrs/week Theory/ Practical	Duration of exam in Hrs Theory/ Practical	Internal Assessment Marks Theory/ Practical	Marks at the Exams	Total marks
Theory							
1	CT 4.1 Molecular Genetics & Immunology	4	4	3	25	75	100
2	CT 4.2 Molecular Biology	4	4	3	25	75	100
3	CT 4.3 Biotechnology	4	4	3	25	75	100
Practicals							
1	CP 4.4 Molecular Genetics & Immunology Practicals	2	4	4	10	40	50
2	CP 4.5 Molecular Biology Practicals	2	4	4	10	40	50
3	CP 4.6 Biotechnology Practicals	2	4	4	10	40	50
4	CPJ 4.7 Project /Dissertation	6	4		25	125	150

CT: Core Theory, CP: Core Practical, ET: Elective Theory, CPJ: Core Project

XI. Selection of Electives: In all the 'Science departments' number of seats available for the Electives depends on the facilities within the departments. The selection shall be done on merit-cum choice basis, based on the aggregate marks at the degree level. Candidate is required to give their Electives choice in preferential order at the time of admission.

XII. At, present, CBCS in Science Faculty is applicable on the Main campus, K.U. Dharwad only

Departments		Electives		Intake
1	Botany	I	Biodiversity	44
		II	Medicinal Plants	
		III	Plant Biotechnology	
2	Biochemistry	I	Introduction to Biochemistry	15
		II	Biochemical Techniques	
		III	Clinical Biochemistry	
3	Biotechnology	I	Introduction to Biotechnology	15
		II	Genetic Engineering	
		III	Fermentation Technology	
4	Chemistry	I	Applied Inorganic Chemistry	50
		II	Applied- Organic Chemistry	
		III	Applied- Physical Chemistry	
5	Computer Science	I	Computer Concepts and Applications	60
		II	Programming in C-Language and Mat lab	
		III	Internet information and Web Designing	

6	Electronics	I	Basic Electronics	25
		II	Linear Integrated Circuits	
		III	Communication	
7	Geography	I	Economic and Commercial Geography	30
		II	Regional Geography of India	
		III	Biogeography	
8	Applied Genetics	I	Human Genetics	20
		II	Molecular Biology Techniques	
		III	Genetic Disorders and Counseling	
9	Geology	I	Paleontology	20
		II	History of Earth	
		III	Remote sensing	
10	Mathematics	I	Calculus	70
		II	Mathematical Methods	
		III	Discrete Mathematical Structure and Mathematical Modeling	
11	Microbiology	I	Basic Microbiology	20
		II	Microbial Biotechnology	
		III	Clinical Microbiology	
12	Physics	I	Instrumental Methods	60
		II	Elementary Quantum Mechanics	
		III	Introductory Photonics	
13	Sericulture	I	Mulberry Production Technology	17
		II	Silkworm Rearing Technology	
		III	Seri biotechnology	

14	Statistics	I	Statistical Methods	30
		II	Bio-Statistics	
		III	Applied Statistics	
15	Zoology	I	Environmental Biology	30
		II	Animal Behavior	
		III	Economic Zoology	

### XIII: Scheme of Examinations:

- The examination will be conducted at the end of the each semester
- Each theory course will have a question paper of 3 hours of duration and maximum marks of 75. Each practical course will have examination of 4 hours duration and maximum marks of 40

### QUESTION PAPER PATTERN:

#### A) THEORY

There shall be a total of 7 questions of equal marks, each of 15 marks. The candidates should answer 5 questions. Question number 1 is compulsory and of the remaining 6 questions, candidates should answer any 4.

Question no. 1 shall have 7 sub questions of 3 marks each. The candidates should answer any 5 of them.

Question No. 2 to 7 should contain 2 to 3 sub questions.

The same scheme is applicable to both core and elective theory papers

#### B) PRACTICALS

The marks allotted for practical is 50, out of which 10 is for internal and 40 is for semester final.

The 40 marks is to be divided as follows

	Marks
Principle and Procedure writing	5
Experiments	20
Viva	10
Records	5
<hr/> Total	40 marks

The same scheme is applicable to both core and elective practical papers

#### C) PROJECT EVALUATION:

1. Internal assessment	: 25 marks
2. Evaluation of dissertation	: 75 marks
3. Viva-voce	: 50 marks
Total	:150 marks

#### Award of Gold medals:

The following gold medals will be awarded to the students for standing highest at the M.Sc. Biochemistry Examination

- The VamanraoKore Gold Medal
- The Dr. (Miss) Krishanabai R. Patil Gold Medal
- The Late Dr. S.M. Kurdikeri Gold Medal
- Sri R. Gundurao Gold Medal
- Principal C.S. Bennur'sSridevi Gold Medal
- Dr. Mumtaz Ahmed Khan Gold Medal

- Late (Smt) Padmabai Balajirao Koimattur Gold Medal
- Prof. M. Madaiah Memorial Gold medal

**Co-curricular Activities:**

Seminars, tutorials and group discussions will be conducted periodically. Study tours may also be arranged. However, these activities do not carry any marks.

**Biochemical Society;**

The Department has an active “Biochemical Society” under the auspicious of which several invited lectures by distinguished scientists and professor are organized every year. All the faculty members, research students and M.Sc. students are the members of the Biochemical Society special lectures sponsored by University are also arranged in the department. The Biochemical society also organizes educational tours, sports and cultural activities for the staff and students of the department.

The Department has also the local branch of society of Biological chemists (India) which arranges lectures by eminent scientists.

## **PROGRAMME SPECIFIC OUTCOMES (PSOS)**

By completing their Post-Graduation Studies in Biochemistry, students are expected to have achieved the following knowledges, skills and capabilities.

- This programme is a platform to enhance active involvement in independent teaching and research through knowledge intensive, innovative thinking, creative problem solving and solution oriented base.
- Students with intellectually motivating education to acquire systematic understanding of integrated specialties of biological and biochemistry aspects through biochemical reactions.
- The programme provides understanding the biochemical concepts in the field of health and disease, food and natural resources, biotechnology, microbiology, pharmaceuticals, fertilizers, bio-fertilizers environmental sustainability, etc.
- It gives knowledge required to design, execute, and analyze the results of biochemistry experimentation in microorganisms, animal and plant model systems by evaluating and drawing conclusions that are based on qualitative and quantitative data.
- It also brings a comprehensive, detailed understanding of the molecular basis of heredity and heritable traits in families and populations with insight into cellular and molecular mechanisms.
- Preparing students to qualify national / state level examinations such as (UGC-CSIR/ ICAR), SET, GATE, GRE, other competitive, administration, research and teaching career at reputed national and international institutions upbring the carrier of an individual.

<b>Paper Code and Name</b>	<b>PG72T101: Basic Biochemistry</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Students will understand the basic concept of biomolecules such as carbohydrates, proteins, lipids and nucleic acids and their functions in brief.
CO 2	Students will understand molecular mechanisms behind various organic reactions and water properties.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 50)</b>
<b>Introduction:</b> Origin, aim and scope of Biochemistry, Chemical unity of diverse living organisms, significant contributions of scientists in the development of Biochemistry, organization of cells and their chemical composition.	<b>3 Hr</b>
<b>2. Properties of water:</b> Structure and properties of water, importance of water in biological systems,. Ionic product of water. Buffers: acids-bases, pH, pKa, Henderson-Hasselbalch equation, buffers, buffer action and Physiological buffer systems (Bicarbonate, Phosphate buffers).	<b>6 Hr</b>
<b>3. Chemical bonding and Reactions:</b> Properties of covalent bond, non-covalent bonds and their importance in biological systems. Types of biochemical reactions: oxidation-reduction, condensation, rearrangement, cleavage, group- transfer, Resonance bond, electrophilic and nucleophilic substitution reactions.	<b>6 Hours</b>
<b>4. Amino acids and Proteins:</b> Structure and physico-chemical properties of amino acids, Role of non-protein amino acids, peptides, peptides of physiological significance, peptide bond, peptide synthesis. Structural features of proteins and their biological functions.	<b>7 Hours</b>
<b>5. Nucleotides and Nucleic acids:</b> Structure and properties of nucleotides, nucleosides, purine (Adenine, Guanine) and pyrimidine (Cytosine, Thiamine, Uracil) bases. Structural features of nucleic acids (DNA & RNA) and their biological functions.	<b>6 Hours</b>
<b>6. Carbohydrates:</b> Structure and stereochemistry of monosaccharides, structure and functions of sialic acid, oligosaccharides and polysaccharides, Starch, glycogen, cellulose and chitin. Structural studies of carbohydrates: periodate oxidation, methylation and use of glycosidases O glycanase and PNGase F. Structure and functions glycoproteins, mucins, N and O linked glycans, carbohydrate binding proteins. And their biological significance). Blood group antigens and heteropolysaccharides, glycosaminoglycans, proteoglycans, lipopolysaccharides and peptidoglycan.	<b>10 Hours</b>
<b>7. Lipids:</b> Lipids and their classification, Structure, nomenclature and functions of fatty acids (PUFA), triacylglycerols (TAG), Waxes, phospholipids(Phosphatidylserine, Lecithin, Cardiolipin, Plasmalogen and PAF), Sphingolipids (Cerebrosides, Globosides and Gangliosides) lipoproteins, glycolipids, steroids, prostaglandins and bile acids.	<b>8 Hours</b>
<b>8. Porphyrins and metal ions:</b> Role of metal ions in biological systems; Fe, Cu, Zn, structure and functions porphyrins, metalloporphyrins and iron-sulfur clusters with suitable examples.	<b>4Hr</b>

<b>Paper Code and Name</b>	<b>PG72T102: Analytical Biochemistry</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Students will be able to perform various analytical techniques such as chromatographic, electrophoretic, spectrophotometric and other techniques.
CO 2	Students will learn principle and procedures and their trouble shooting of various techniques in the separation of components.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 50)</b>
<p><b>1. Chromatography: Chromatography-</b> History, Principle, Partition coefficient - Nature of partition forces, Partition, Counter current distribution- Craig apparatus, Types of chromatography Planar chromatography -Paper chromatography, Thin Layer chromatography.</p> <p><b>Paper chromatography</b> - Choice of solvent system, Detection – Rf Values, Applications. <b>Thin Layer chromatography</b> - Preparation, Sample application, Plate development and detection, Advantages and applications.</p> <p><b>Column chromatography</b> - Columns, packing, Sample application, methods of elution, flow rate, analysis. Concept of plates - Theoretical plates,</p> <p><b>Partition Chromatography</b> - Gas- liquid chromatography (GLC), Principle, Carrier gas, columns, Solid support, Liquid Phase, coating the support, Sample preparation, detectors - Flame ionization, electron capture, thermo ionic, Retention time and quality analysis, applications, GC-MS. <b>Gel permeation chromatography</b> - Principle, and partition coefficient. Types of gels –Sephadax, Poly acrylamide, agarose, TLG, Styragel, Bioglass, Procedure. Advantages and applications.</p> <p><b>Ion exchange chromatography</b> - Principle, Types of ion exchange resins with examples. Preparation and choice of buffers, procedure and applications.</p> <p><b>Affinity chromatography</b> - Principle, Procedure and applications. Selection criteria: Matrix, ligands, , ligand coupling and</p> <p><b>HPLC-</b> Difference between conventional and HPLC, schematic diagram, column, detectors, Applications.</p>	14 Hours
<b>2. Spectrophotometry:.</b> UV and Visible spectroscopy - Principle, Instrumentation and applications, Principle and applications of Fluorescence spectroscopy, NMR and Infrared spectroscopy. ESI MS and MALDI-TOF. Flow cytometry	8 Hours
<b>3. Centrifugation:</b> Principle of centrifugation, Concepts of Relative Centrifugal Force (RCF) and Swedberg constant. Types of centrifuges and rotors. Differential and density gradient (Zonal and Isopycnic) centrifugation. Preparative and Analytical ultra-centrifugation, Subcellular fractionation.	5 Hours
<b>4. Electrophoresis:</b> Principle, Factors affecting paper, Cellulose acetate electrophoresis electrophoresis. Procedure and applications of polyacrylamide, Horizontal (agarose) and vertical electrophoresis (SDS PAGE- Isotacophoresis) and their applications. Iso electro focusing, Pulse field gel electrophoresis and capillary electrophoresis - applications. Blotting techniques – Southern, Northern and Western and their detection methods.	8 Hours
<b>5. Dialysis:</b> Principles, and applications of equilibrium dialysis and ultrafiltration. Artificial membranes, semi-permeable membranes, Donnan membrane equilibrium, and biological significance of osmosis and micelles.	3 Hours
<b>6. Techniques in biochemical investigations:</b> Whole organism studies, Manometry, Tissue slice techniques, Cell and Tissue culture, Tissue homogenation. Use of metabolic inhibitors in elucidation of metabolic pathways.	3 Hours
<b>7. Radioisotope Techniques:</b> Radioactivity, stable , unstable and radioactive isotopes,	5 Hours

Units of radioactivity, half life of radioisotopes.- Measurement of radioactivities, GM and, liquid scintillation counters and autoradiography. Isotope dilution technique. Molecular imaging of radioactive material, Radiation monitoring and its hazards. Applications of radioactive tracers in biology.	
<b>8. Microscopy:</b> Principle and application of Light microscopy- bright field, dark field, fluorescence, Phase-contrast microscopy. Principle and applications of Electron microscopy- transmission scanning, and Confocal microscopy.	4 Hours

Paper Code and Name	PG72T103: Physiology & Nutrition
COURSE OUTCOMES (COs)	
After completing this paper, the students will be able to:	
CO 1	The student will learn and understand the basics of biomembrane structure functions and transport of various ions and molecules in the systems.
CO 2	The course will aid to understand the basics of physiological process of digestion, cardiovascular & respiratory system and nervous systems.
CO 3	The student will learn and understand the fundamentals of nutrition of carbohydrates and proteins, vitamins macro, micro elements etc.,
CO 4	The student will understand the special nutritional aspects during the pregnancy and lactation.

PARTICULARS	Teaching Hours (Max. 50)
<b>1. Biomembranes:</b> Structure and composition of biomembranes, Supra molecular organization. Models of membranes: fluid-mosaic model of membrane, techniques to study membrane organization (EM, NMR, Fluorescence), Membrane domains-caveolae, rafts, Membrane potential.	<b>5Hr</b>
<b>2. Membrane transport:</b> Active and passive transport, mechanism of $\text{Na}^+\text{-K}^+$ ATPase and $\text{Ca}^{2+}$ - ATPase, transport of sugars and amino acids, lactose permease and PTS, ionophores, porins, gap junctions and tight junctions, desmosomes.	<b>5Hr</b>
<b>3. Digestive system:</b> Digestion and absorption of carbohydrates, lipids and proteins in the gastrointestinal tract, role of digestive enzymes and hormones, role of gastric HCl and bile salts in digestion.	4 Hours
<b>4. Cardiovascular and Respiratory systems:</b> Circulatory system, cardiac cycle, blood pressure and its regulation, Mechanism of transport of $\text{O}_2$ and $\text{CO}_2$ in blood. Excretory system- nephron, and mechanism of urine formation.	5 Hours
<b>5. Nervous system:</b> Organization, Comparison of somatic and autonomic nervous system, Classifications structure and function, Different types of cells in the nervous system and their functions, Structure of Neuron - Dendrites, Axons, Myelin sheath, Nodes of Ranvier.	<b>2Hr</b>
<b>6. Endocrine system:</b> A brief outline of various endocrine glands, Pituitary, Pancreas, Adrenals, thyroid, parathyroid, Adrenal cortex and their physiological roles.	<b>1Hr</b>
<b>II: Nutrition:</b>	<b>4Hr</b>
<b>1. Basic concepts of nutrition and dietetics:</b> Nutrients and essential nutrients, food Groups, proximate analysis of foods. energy values of foods and their determination, physiological fuel value and significance. BMR and factors affecting BMR, SDA.	
<b>2. Carbohydrates-</b> Sources and functions carbohydrates. Role of dietary fiber. Fats- Sources and functions, essential fatty acids, saturated and polysaturated fatty acids (PUFA).	<b>4Hr</b>
<b>3. Proteins:</b> Essential and non-essential amino acids, nutritional classification of Dietary proteins, nitrogen balance, methods for evaluation of nutritive values of dietary proteins. Protein- calorie malnutrition (PCM)-Kwashiorkor and Marasmus-, symptoms and prevention.	<b>5 Hr</b>
<b>4. Vitamins:</b> Sources, structure functions and deficiency symptoms of fat (A, D, E, K) and water-soluble (B-complex and C) vitamins.	<b>8Hours</b>
<b>5. Mineral elements:</b> Sources, functions and deficiency symptoms Ca, P, Na, K, Fe, I, Cu, Zn and other trace elements.	<b>5Hr</b>
<b>6. Special aspects of nutrition</b> during infancy, childhood, pregnancy and lactation.	<b>2Hr</b>

<b>Paper Code and Name</b>	<b>PG72T104: Cell Biology</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Students will understand the basic concept cell and its components with their functions in details..
CO 2	Students will have comprehensive idea on molecular mechanisms involved in cancer, apoptosis and other physiological processes such as blood coagulation, biochemistry of vision and neurobiology etc.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 50)</b>
<b>1. Cell Structure:</b> Structural organizations of eukaryotic cells, structure and functions of sub-cellular organelles.Molecular components of cells, Stem cells-different types	<b>5 Hr</b>
<b>2. Cytoskeleton:</b> Structure and function of microfilaments, microtubules, (Actin), intermediate filaments (Lamin and Keratin) and microtubules (Centrioles and Cilia). Structure and constituent proteins of erythrocyte cytoskeleton., Cell motility-cilia and flagella.	<b>5 Hr</b>
<b>3. Cell cycle:</b> Mitosis and meiosis, cell cycle and its regulation (outline), cyclin and cyclin dependent kinases (CDKs), Apoptosis; intrinsic and extrinsic pathway.	6 Hours
<b>4. Carcinogenesis:</b> Mechanism of carcinogenesis. Characteristics of cancer cells, Types of Cancer, Benign and Malignant Tumors. Cancer metastasis, Carcinogens (Chemical, Physical and Biological), Ames test for carcinogenicity.	6 Hours
<b>5. Muscle contraction:</b> Structural organization of muscles, muscle proteins, mechanism of muscle contraction and its regulation. Sliding filament theory.	<b>6 Hr</b>
<b>6. Blood Coagulation:</b> Blood coagulation factors, mechanism of blood coagulation-intrinsic and extrinsic pathway, role of thrombin, platelet aggregation, , coagulation and clot dissolution. Formation of platelet plug, proteins involved in blood coagulation. Role of vitamin-K.Gla-containing proteins, regulation and synthesis of Gla-proteins.	<b>6Hr</b>
<b>7. Vision:</b> Photoreceptor cells- rods and cones, photoreceptor pigments, Cascade of biochemical reactions involved in the visual cycle, color vision.	<b>6 Hr</b>
<b>8. Neurotransmission:</b> Molecular basis of the resting and action potential. Membrane Potential – Action Potential, Depolarisation, Hyperpolarisation, Propagation of action potential - Voltage gated and Ligand gated Ion channels. Role of G-proteins in neurotransmission Uses of Ionophores and toxins <b>Neurotransmission:</b> Synapse, Mechanism of neurotransmission, Neurotransmitters - Excitatory and Inhibitory neurotransmitters - Their structure and functions. Receptors – Nicotinic, Muscarinic, Adrenergic receptors.	<b>10 Hr</b>

<b>Paper Code and Name</b>	<b>PG72P103: Physiology &amp; Nutrition Practicals</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	The student will learn and understand the basics of biomembrane structure functions and transport of various ions and molecules in the systems.
CO 2	The course will aid to understand the basics of physiological process of digestion, cardiovascular & respiratory system and nervous systems.
CO 3	The student will learn and understand the fundamentals of nutrition of carbohydrates and proteins, vitamins macro, micro elements etc.,
CO 4	The student will understand the special nutritional aspects during the pregnancy and lactation.

<b>Particulars</b>	<b>4 Hrs/week</b>
1. Determination of activity of digestive enzymes (alpha-amylase & lipase) 2. Measurement of blood pressure 3. Estimation of dietary proteins and fats. 4. Estimation of vitamin C by 2,6-Dichlorophenol indophenol method 5. Estimation of calcium content in foods. 6. Determination of phosphorus by Fiske-Subbarao method 7. Estimation of iron in foods. 8. Estimation of vitamin A by spectrophotometric method

A Manual paper chromatography and paper Electrophoresis by (1955) R.J. Block, E.L. Durrum and G. Zweig, Academic press.	

Paper Code and Name	PG72P104: Cell Biology Practical's	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Students will understand the basic concept cell and its components with their functions in details..	
CO 2	Students will have comprehensive idea on molecular mechanisms involved in cancer, apoptosis and other physiological processes such as blood coagulation, biochemistry of vision and neurobiology etc.	
Particulars		4 Hrs/week
9. Isolation and Fractionation of Subcellular Organelles 10. Isolation of human Peripheral Blood Mononuclear Cells (PBMCs) 11. Determination of cell number using Hemocytometer. 12. Estimation of DNA by DPA method. 13. Estimation of RNA by Orcinol Method. 14. Estimation of Protein by Bradford Method. 15. Preparation of Liposomes. 16. Identification of mitotic stages in onion root tips. 17. Determination of Erythrocyte sedimentation rate (ESR).  18. Test for mutagenesis.

## II Sem

<b>Paper Code and Name</b>	<b>PG72T201: <u>BIOMOLECULES</u></b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Students will understand detailed structure and functions of proteins
CO 2	Students will understand detailed structure and functions of Nucleic acid
CO 3	Students will get trained in protein and nucleic acid isolation and characterization.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 50)</b>
<b>Introduction:</b> classification based on source, composition, solubility and functions. Physicochemical properties of proteins.	2
<b>Methods of isolation and purification</b> of proteins, criteria of protein purity.	3
<b>Structural organizations of proteins:</b> Primary, secondary, tertiary and quaternary structures. Determination of primary structure of proteins. Determination of amino acid composition. N and C-terminal groups. Fragmentation of polypeptide chains by enzymatic, acid and chemical methods. Separation of cleaved fragments. Sequential degradation of Edman and modern methods of micro sequencing including solid phase sequencing methods. Assignment of disulfide bonds. Interpretation and overlapping of sequence.	5
<b>Secondary structure of proteins:</b> $\alpha$ -helix, $\beta$ -pleated sheets and other secondary motifs, super secondary structure of proteins: B-bend helix turn-helix. Zinc finger, and leucine Zippers. Prediction of secondary structure, Ramachandran plot. Fibrous proteins, keratin, silk fibroin, triple helix structure of collagen.	5
<b>Tertiary structure of proteins:</b> Protein folding and stability, Forces involved in folding protein, denaturation and renaturation. Role of chaperones in protein folding. Methods for the determination of protein structure: X-ray NMR CD and ORD. Protein structure prediction by CD and ORD	6
<b>Structure and function relation of proteins:</b> 3-D conformation of myoglobin, cytochrome c, insulin, evolutionary significance of proteins.	3
<b>Oligomeric structure of proteins:</b> Quaternary structure of Hemoglobin. Hemoglobin as an allosteric protein, oxygen binding mechanism, of Bohr's effect. DPG binding. Differences between myoglobin and hemoglobin. Normal and abnormal hemoglobins with respect to primary structure	6
<b>NUCLEIC ACID</b>	
<b>Introduction:</b> Components of nucleic acids, major classes of nucleic acids and their biological role.	2
<b>Chemical and physical properties of nucleic acids:</b> UV absorbance of nucleic acids, hypochromism and Hyperchromism.	2
<b>Isolation and purification of nucleic acids</b> – DNA and RNA, estimation of nucleic acids.	2
<b>Primary and secondary structure of DNA:</b> Base composition of DNA, Chargaff's rule, X-ray diffraction analysis of DNA, Watson-Crick model of DNA double helix, SBS model and other models, Different structural forms of DNA – A, B & Z	5
<b>DNA sequencing:</b> Chemical method of Maxam-Gilbert, Sanger's Dideoxy method and other recent methods, automated DNA sequencing.	2
<b>Tertiary or Higher-order structure of DNA:</b> DNA supercoiling, superhelix topology linking number, biological importance of DNA supercoiling, role of topoisomerases.	2
<b>Ribonucleic acids (RNA):</b> Structure of m-RNA, r-RNA and t-RNA, Clover leaf model and L-shaped model of t-RNA.	2
<b>Denaturation and Renaturation of nucleic acids:</b> Melting curves and T <sub>m</sub> value of DNA and their significance. Renaturation kinetics – Cot curves and their significance. Nucleic acid hybridization.	3

Paper Code and Name	PG72T202: ENZYMOLOGY
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Students will understand the functional aspects of different enzymes and inhibition/mechanism.
CO 2	Students will be able to understand the molecular mechanisms of enzyme actions, allosteric regulations and its clinical and industrial applications
CO 3	Students will get trained in enzyme kinetics, isolation and characterization.

PARTICULARS	Teaching Hours (Max. 50)
<b>1. Introduction:</b> Role of enzymes in living systems, nature and characteristic features of enzymes. Nomenclature and classification of enzymes. Intracellular localization of enzymes. Enzyme unit - activity, specific activity, molecular activity (turn over number).	<b>3</b>
<b>2. Quantitative assay</b> of enzymatic activity by different methods. Steady state methods, ion selective technique, immunoassay techniques, flow (continuous, stopped flow and quenched-flow) techniques, relaxation methods and their usefulness in the study of enzyme catalyzed reactions, energy of activation.	3
<b>3. Enzyme kinetics:</b> Importance, initial velocity plots, steady state approximation, evidence for ES complex formation. Kinetics of single-substrate -Michaelis- Menten equation, algebraic derivation of kinetic equation for the determination of $K_m$ and $V_{max}$ parameters, and their significance. Effect of pH, temperature, substrate concentration in enzyme activity and kinetics, Methods of kinetic analysis-Lineweaver Burk, EadieHofstee, Hanes and Dixon plots.	6
<b>4. Enzyme inhibition:</b> Reversible and irreversible inhibition, Types of reversible inhibitors – competitive, noncompetitive, uncompetitive and mixed inhibitors. substrate inhibition.	<b>3</b>

<b>5. Kinetics of bisubstrate enzyme catalyzed reactions:</b> Sequential, ordered, random, pingpong, theoroll-chance mechanisms and their Cleland's representations with examples. Graphical analysis, King-Altman procedure for deriving kinetic equation for single substrate and two substrate reactions with and without inhibitors. Rate expressions and secondary plots. Investigations of reaction mechanisms using isotopic – exchange at equilibrium.	5
<b>6. Molecular basis of enzymes catalysis:</b> General theories and hypotheses proposed to explain enzyme specificity, lock and key, induced fit theory, contribution of structural flexibility to the specificity of enzymes.	3
<b>7. Factors contributing to catalytic efficiency of enzymes:</b> Proximity and orientation effect, acid base covalent catalysis (nucleophilic and electrophilic), metal ion catalysis, preferential binding of the transition state complex.	3
<b>8. Active site characterization:</b> Method of active site group assignment. The identification of banding sites and catalytic sites, chemical modification of active site, amino acid side chains, active site directed reagents (irreversible inhibitors), the use of substrate analogs, pseudosubstrate, photoaffinity labelling, suicide inhibitors trapping of ES complexes, enzyme modification with proteolytic enzymes.	5
<b>9. 3D structure of enzymes:</b> General aspects of 3D structural features of enzymes as revealed by X-ray and chemical studies. Mechanism of action of following enzymes: Based on physicochemical and 3-D structural data-Lysozymes, RNase and chymotrypsin, Including zymogen activation. eg. Chymotrypsinogen.	4
<b>10. Different forms of enzymes:</b> Isozymes, multienzyme complexes, multifunctional enzymes, ribozymes, coenzymes and metalloenzymes, abzymes.	4
<b>11. Allosteric enzymes:</b> Identification and their characterization co-operativity, the Hill equation, the Scatchard plot and equilibrium dialysis techniques. Sigmoidal kinetics: The MWC & KNF models with examples, significance of sigmoidal behaviour. Regulatory features of ATCase.	5
<b>12. Regulatory mechanisms:</b> Regulation of enzymatic activity, fine control availability of substrates and cofactors, steady state fluxes, flux of metabolites through metabolic pathway. Types of feed-back regulations.	
<b>13. Applications of enzymes:</b> Immobilized enzymes- Clinical and Biotechnological applications of enzymes, temperature resistant enzymes.	3

<b>Paper Code and Name</b>	<b>PG72T203: MICROBIAL BIOCHEMISTRY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to..	
CO 1	Students will understand the properties and special aspects of microorganisms
CO 2	Students will be able to understand the applications of microbes in the field of medicine, microbial disease and industrial importance.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 50)</b>
<b>1. Introduction:</b> Historical development and scope of microbiology and microbial Biotechnology.	1
<b>2. Classification of microorganisms:</b> Nomenclature, study of different types of microorganisms, characteristics of the main groups of microorganisms.	2
<b>3. Cultivation of bacteria:</b> Nutritional requirements for the bacteria, Growth curve of bacteria and the factors affecting growth curve, chemostat, synchronous and diauxic growth. Measurement of growth, cell number– methods of enumeration. Study of bacterial cell structures–genetic elements, ribosomes, membranes, cell envelopes, capsule, flagella, pili and endospores.	4
<b>4. Identification of bacteria:</b> Staining methods- Gram staining and Acid fast staining, structure and differences between Gram-negative and Gram-positive bacteria.	2
<b>5. Bacteriology of milk</b> and Flora of the normal human body.	1
<b>6. Bacterial toxins</b> – Classification: exotoxins and endotoxins, chemical nature and associated diseases.	2
<b>7. Viruses:</b> Classification and properties of viruses. Isolation, culturing and assay of viruses. Animal viruses HPV, SV40 and viral diseases. Replication of DNA and RNA viruses – negative strand (vsv), positive strand (Polio), retroviruses (infection cycle). Bacteriophages – Structure, mode of infections – Lytic cycle and transduction – specialized, generalized and abortive. Interferons, clinical importance of viruses – HIV, Hepatitis A and B virus, RNA & DNA tumor viruses, transformation and cancer. Vaccines in prevention of viral infection.	9
<b>8. Food Microbiology:</b> Production of cheese, single cell protein, pasteurization of milk, contamination of milk and its prevention, food spoilage, food preservation.	4
<b>9. Environmental microbiology and energy:</b> Biomass production, biogas, environmental pollution, Biodegradation, Use of microbes in pollution control, metal leaching and extraction, nonconventional energy sources.	5
<b>10. Biotechnology</b> and international market, brief aspects about patent laws, culture collection, data bank, ethical values, pros and con of biotechnology.	3
<b>11. Fermentation technology</b> : Unit process, Design and operation of fermenters, surface, submerged and continuous culture methods, conditions of fermentations. Down stream process, selection of organism, raw materials and fermentation media. Recovery of products, production of ethanol from molasses. Production of wine, beer. Production acetone, butanol, glutamic acid, lactic acid, citric acid. Chemistry and mode of action of antibiotics. Production of penicillin streptomycin, chloramphenicol, ampicillin and tetracyclines.	14
<b>12. Public health:</b> Production of vaccines, interferons growth hormones human plasminogen activators.	3
<b>References:</b> 15. Enzymes by Paul Boyer, Vol.I& II Academic press( ) 16. Lehninger's principles of biochemistry (2000) by Nelson, David L and Cox, M.M. Macmillan/Worth, NY. 17. Enzyme kinetics by Roberts D.V. (1997) Cambridge Univ. Press.

26. Biochemistry (II Ed 1996) J. David Rawn, Etal., Prentice Hall International, Inc,
27. Enzyme Engineering: protein engineering, Structure prediction and Fermentation by M.J.C. Crabbe (1990) Ellis Horwood.
28. Immobilized enzymes by M.D. Trevan (1980), John Wiley and Sons.

<b>Paper Code and Name</b>	<b>PG72T204A: BIOCHEMICAL TECHNIQUES.</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper,	
CO 1	Students will understand detailed structure and functions of proteins
CO 2	Students will understand detailed structure and functions of Nucleic acid
CO 3	Students will get trained in protein and nucleic acid isolation and characterization.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 50)</b>
1. Introduction: Analyzing and reporting of experimental data-significant figures, scientific notation, units, error analysis and precisions in estimations, tables, controls and blanks. Solutions and buffers.	6
2. Chromatographic techniques: Principles and applications of PC, TLC, GLC adsorption, Ion exchange, gel permeation, affinity chromatography and HPLC.	8
3. Spectroscopic techniques: Principles and application colorimetry, spectrophotometry and spectrofluorimetry.	8
4. Centrifugation techniques: Cell disruption devices-homogenization and sonication application of differential and density gradient centrifugation. Dialysis and ultra filtration.	8
5. Electrophoretic techniques: Principle and application of polyacrylamide, SDS-PAGE and agarose electrophoresis. Blotting techniques-western and southern	9
6. Radio Isotope techniques: Units of radioactivity. Stable and radioactive isotopes, Liquid scintillation counter, applications in biology, Autoradiography.	8
7. Immunological techniques: RIA, ELISA.	3

<b>Paper Code and Name</b>	<b>PG72P203: MICROBIAL BIOCHEMISTRY PRACTICALS</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to...	
CO 1	Students will be able to perform culturing and isolation of microorganisms.
CO 2	Students will be able to do the staining of microbes and identification.

Particulars	4 hour/week
1. Preparation of culture media 2. Sterilization by dry heat and moist heat – autoclaving. 3. Isolating pure cultures – bacteria and fungi 4. Gram staining and other staining procedures 5. Identification of bacteria by morphological and biochemical tests. 6. Antibiotic sensitivity test for microbial cultures 7. Bacterial growth curve – effect of pH, temperature, salt concentration and nutrients on growth of bacteria. 8. Production of Wine by fermentation. 9. Identification of microorganisms in milk. 10. Identification of microorganisms involved in food spoilage.

<b>Paper Code and Name</b>	<b>PG72T301: Metabolism-I</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Students will learn and understand the various metabolic pathway that occur in the human body and also energy production.
CO 2	The student will be able to Explain the metabolism of Carbohydrates, Lipids, Photosynthesis process.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 50)</b>
<b>1. Introduction:</b> Basic concepts in metabolism; Catabolism, anabolism, catabolic, anabolic and amphibolic pathways.	<b>2 Hr</b>
<b>Metabolism of carbohydrates:</b> Glycolysis, its energetics, Glycerol-3-phosphate and Malate Aspartate shuttle. Regulation of glycolysis, role of PFK, Pasteur effect, alcoholic and lactic acid fermentation. Aerobic metabolism of carbohydrates, oxidation of pyruvate, citric acid cycle, its energetics and regulation. Anapleumatic and Amphibolic nature of citric acid cycle. Glyoxylate cycle and its significance.	<b>9 Hr</b>
Entry of sugars other than glucose, Galactose, Fructose, mannose, lactose and glycogen into glycolysis, Fructosuria, Galactosemia. Bio-synthesis and degradation of glycogen, glycogenolysis difference between liver and muscle glycogenolysis and their regulation, including hormonal control by epinephrine, insulin and glucagon. Regulation of blood glucose level, Role of glycogen phosphorylase a, glycogen storage diseases and their molecular basis. Gluconeogenesis its energetics and regulation. Futile cycle, Cori cycle and their significance. Alternate pathways of carbohydrate metabolism pentose phosphate pathway, its multifunctional significance. Glucuronate pathway. Pterosuria and genetic diseases of impaired pentose phosphate pathway. Biosynthesis of disaccharides: Maltose, Sucrose and Lactose. Regulation of lactose biosynthesis, biosynthesis of starch, cellulose and peptidoglycan. Effect of antibiotics on peptidoglycan biosynthesis.	<b>15 Hr</b>
<b>3. Lipid metabolism:</b> Intracellular hydrolysis of lipids and role of adipose tissue in storing fat as a energy fuel. Pathways for the transport of endogenous and exogenous lipids. $\beta$ -oxidation of fatty acids and its energetics, oxidation of unsaturated and poly unsaturated fatty acids (PUFA). Peroxisomal oxidation of fatty acids (Phytanic acid), Refsum's disease, ketone body formation and their clinical significance, diabetic keto acidosis. Biosynthesis of fatty acids, chain elongation and desaturation, regulation of fatty acids, Biosynthesis of triacyl glycerol, phospholipids and sphingolipids, Tay Sachs's and Fabry's diseases, plasma lipoproteins : classification, synthesis and their biochemical role, role of apoproteins, familial hypercholesterolemia and its molecular basis. Biosynthesis of cholesterol and its regulation, receptor mediated LDL-uptake pathway and its effect on cholesterol B.S. Catabolism of cholesterol, bile acids, and bile salts central role of acetate as a biosynthetic precursor of lipids steroids, prostaglandins and other natural products, integration of carbohydrate and lipid metabolism.	<b>16 Hr</b>
<b>Photosynthesis:</b> Introduction, photosynthetic organisms, pigments and accessory components, light and dark phases, photosynthetic apparatus, Hill reaction, role of	<b>8 Hr</b>

<p>photosystem-I-and photosystem - II photosynthetic. Electron transport -non-cyclic electron flow and cyclic electron flow. Photophosphorylation, chloroplast ATP synthase. Quantum efficiency of photosynthesis, bacterial photosynthesis, bioluminescence and its mechanism, the Calvin cycle, its regulation and Rubisco CO<sub>2</sub> fixation in C<sub>4</sub> plant Rubisco and its regulations, Hatch Slack pathway, photorespiration.</p>

<b>Paper Code and Name</b>	<b>PG72T302: Metabolism-II</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Students will understand the bioenergetics explaining the production of energy currencies.
CO 2	Students will learn the metabolic pathways relevant to catabolism and anabolism of nitrogen compounds and its associated disease in related enzymes or amino acids or nucleic acids.

Particular	Teaching Hours (Max. 50)
<b>Unit 1: . Introduction:</b> Basic concepts of bioenergetics, review of first and second law of thermodynamics, entropy, free energy, standard free energy change and equilibrium constant of reactions, ATP as universal currency of biological energy, ATP-ADP cycle of the cell, high energy phosphate compounds. Generation of ATP in living systems, substrate level phosphorylation redox potential, biological redox couples, Free energy changes in electron transfer reactions.	7 Hours
<b>Unit 2: Electron transport in Mitochondria:</b> Electron carriers in mitochondria, sequence of electron carriers and their mechanism of electron transfer reactions, specific inhibitors of ETC	4 HRS
<b>Unit 3: Oxidative phosphorylation:</b> Coupling of electron transport and ATP synthesis, mechanism of oxidative phosphorylation – Mitchell’s chemiosmotic hypothesis, P/O ratios, effect of uncouplers, specific inhibitors and ionophores. Structure of mitochondrail ATP syntheis-Boyer’s binding changer mechanism. Protein motive force in Halobacteria. Microsomal electron transport and cytochrome p 450.	7Hours
<b>Unit 4 Oxygen utilizing enzymes:</b> Monooxygenases and dioxygenases, oxygen toxicity– active oxygen species, role of superoxide dismutase, catalase and peroxidases	2 Hrs
<b>II: Metabolism of Nitrogen Compounds:</b> Importance of nitrogen in biological systems and metabolism of nitrogen compounds.	1 Hrs
<b>2. Metabolism of amino acids</b> General reactions of amino acid metabolism – transmination, deamination, decarboxylation and racemization. Role of pyridoxal phosphate in amino acid metabolism.	3 Hours
<b>3. Catabolism of amino acids:</b> Metabolic fate of amino nitrogen, transdeamination, Kreb’s urea cycle, ketogenic and glycogenic amino acids, degradation of individual amino acids, transmethylatongenetic disorders – phenylketonuria, alcaptonuria, albinism, maple syrup urine disease.	6 Hours
<b>Unit 4 Biosynthesis of amino acids:</b> Essential and non-essential amino acids, regulation of glutamine synthetase and aspertate family of amino acids	5 Hrs
<b>Unit 5. Biosynthesis of</b> Epinephrine, Norepinephrine, dopamine, histamine, serotonin, GABA creatine and polyamines.	1 Hours
<b>6. Non-ribosomal peptide synthesis:</b> Glutathione and Gramicidin	1 Hours
<b>7. Metabolism of Nucleotides:</b> Biosynthesis of purine and pyrimidine nucleotides by De novo and Salvagepathways, Regulation of nucleotide biosynthesis, Interconversion of nucleotide mono-, di- and triphosphates. Biosynthesis of deoxyribonucleotides and deoxythymidyrate, Inhibitors of	5 Hrs

nucleotide biosynthesis – mechanism of action of azaserine, acivicin, 5-fluorouracil and methotrexate as anticancer drugs.	
<b>Unit 8. Degradation of purine and pyrimidine nucleotides</b> , Genetic disorders – Gout, Lesch-Nyhan syndrome, immunodeficiency disease.	2 Hrs
<b>Unit 9. Biosynthesis of nucleotide coenzymes</b> –NAD <sup>+</sup> , NADP <sup>+</sup> , FAD and coenzyme A.	1Hrs
<b>Unit 10. Metabolism of Heme</b> :Biosynthesis and degradation of hemeporphyrin, regulation and porphyrias,formation of bile pigments	2Hrs
<b>Unit 11. Biological nitrogen fixation</b> :Nitroen cycle, utilization of nitrate, nitrogen-fixing organisms, mechanism of nitrogen fixation-nitrogenase and its regulation symbiotic nitrogen.	3Hrs

<b>Paper Code and Name</b>	<b>PG72303: Medical Biochemistry &amp; Endocrinology</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	The basic concepts and principles of medical biochemistry, including the process of collection, storage and tests.
CO 2	The blood groups, blood components and their disorder and diagnostic studies.
CO 3	The clinical importance of organelles enzymes and their role in diagnosis. To understanding, various physiological role of kidney, liver, cardiac, gastric tract, etc.,
	The molecular basis of diabetes and serology followed by the detailed study of endocrinology: hormones and hormones its action.

<b>Particular</b>	<b>Teaching Hours (Max. 50)</b>
<b>1.Haematoglogy and Haematological disorders:</b> Development and maturation of erythrocytes and leukocytes. Different types of anemias viz., microcytic, megaloblastic, nutritional, aplastic and sickle cell. 'CBC' complete blood count. Total and differential and platelet counts and their clinical significance. Blood group substances, Rh factor, 'Rh' typing. 'ABO' and 'Rh' incompatibility (single and combined) and the dangers involved in foetal development and subsequent measures to reduce Haemoglobinopathies, porphyries. 'ESR'(Erythrocyte sedimentation rate) determination and its importance in the diagnosis of certain diseases. Blood disorders-broad classification, blood coagulopathy, 'α' and 'β' Thalassemias. Plasma protein electrophoretic profile in health and disease, CSF analysis.	6 Hrs
<b>2.Enzymes of clinical and diagnostic importance:</b> Enzymes as markers in the diagnosis of diseases. Clinical significance of cholinesterase, alkaline and acid phosphatase, Lactate dehydrogenase (LDH), Creatine phosphokinase (CPK), Aspartate amino transferase (AST/SGOT), Alanine aminotransferase (ALT/SGPT).	3Hrs
<b>3. Water, electrolyte and acid base balance:</b> Respiratory and metabolic acidosis and alkalosis, its regulation by lungs and kidneys, with special reference to diabetic keto acidosis and starvation. Water and electrolyte balance in health and disease with special emphasis on diarrhoeas, dysenteries and vomiting, fluid and electrolyte replacement therapy	3Hrs
<b>4. Biochemical investigations in Kidney diseases:</b> Kidney profile Urine analysis for normal and abnormal constituents, urine microscopy culture, and antibiotic sensitivity test. Clearance test and their importance in the assessment of kidney function. Kidney diseases like urinary tract infection (UTI) nephritis, Urolithiasis. Dialysis and kidney transplants	3 Hrs
<b>5: Biochemical investigations in Liver diseases:</b> Liver profile in health and disease. Hepatocellular functions, with special emphasis on its participation in the various detoxification mechanisms. Liver function tests (LFT), and their clinical significance in the diagnosis of liver diseases like cirrhosis and jaundice. Gallbladder stone analysis and its clinical significance, Hepatitis A, B, & C infections.	2 Hrs

<b>6. General screening procedures for inborn errors of metabolism:</b> of proteins, carbohydrates, lipids, purines and pyrimidines and subsequent therapeutic measures with special emphasis on clinical enzymology, and special dietary restrictions. Brief idea of deficiencies caused by trace elements in metabolism.	2 Hrs`
<b>8. Cancer:</b> Clinical and classical signs, different types and stages, diagnostic tests, chemotherapy(Natural and synthetic drugs), kidney and liver toxicity, radiation therapy, Molecular basis of cancer, cell differentiation	5 Hrs
<b>9. Gastric profile in health and disease:</b> Gastric function tests, (gastric analysis) (mention of aspiration of gastric HCl by Levin and Rhexuss tube. Hypo (achlorhydria) and hyper acidity, with emphasis on classification and therapeutics of duodenal, peptic and gastric ulcers, tests to confirm pancreatic involvement in disease. Stetorrhea, and malabsorption syndrome, with special emphasis on stool (faeces) examination.	2 Hrs
<b>10. Cardiac profile in health and disease:</b> Brief mention of heart diseases	1 Hrs
<b>11. Diabetes mellitus:</b> regulation of blood sugar, classification, stages and diagnosis (urine analysis, GTC/GTT, Glycosylated hemoglobins and fructosamine determinations. Role of antidiabetic oral drugs and insulin therapy	2 Hrs
<b>12. Serology:</b> WIDAL, VDRL, malaria and filarial parasitic antigens	1 Hrs
<b>ENDOCRINOLOGY: 1 Salient features of hormones</b> and their general classification	1 Hrs
<b>2. Brief account on structure, storage and secretion of hormones</b> and feed back regulation of hormone secretion of thyroid, T3 and T4, hypothalamus, stimulatory and inhibitory factors, pituitary; tropic hormones, pancreas; insulin and glucagon, adrenal, ACTH, sex hormones, Estrogens and androgens,	5 Hrs
<b>3. Structure biosynthesis function and mechanism of action of steroid hormones.</b>	3 Hrs
<b>4. Molecular Endocrinology:</b> Structure of hormone receptors, mechanism of ligand receptor interaction - Intracellular and membrane receptor mediated responses. Signaling pathways - G proteins mediated, and effect of toxins on signal transduction. Receptor tyrosine kinases, insulin receptor, MAPK pathway, nonreceptor tyrosine kinases, growth hormone receptor, Janus kinases, Role of second messenger cAMP, cGMP, Ca <sup>2+</sup> , inositol triphosphate (IP <sub>3</sub> ), diacylglycerol DAG and nitric oxide (NO) and their synthesis and biological role.	11 Hrs

<b>Paper Code and Name</b>	<b>PG72T304A: Clinical Biochemistry</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to	
CO 1	Students will be able to understand the blood groups, blood components and their disorder and diagnostic studies.
CO 2	The clinical application of enzymes and their role in diagnosis.
CO 3	To understanding, the various physiological role of kidney, liver, cardiac, gastric tract etc.,

<b>PARTICULARS</b> <b><u>Paper ET-3.1: CLINICAL BIOCHEMISTRY</u></b>	<b>Teaching Hours (Max. 50)</b>
<b>Unit.1: CLINICAL BIOCHEMISTRY</b>	1Hr
<b>Unit 2 Blood:</b> Composition of blood, Blood cells, Types of Anemias. 'CBC' complete blood count. Total and differential and platelet counts and their clinical significance. Blood group substances, Rh factor, nature of blood group antigens and rare blood groups. Hospital- laboratory methodology in blood and 'Rh' typing. 'ABO' and 'Rh' incompatibility (single and combined) and the dangers involved in foetal development and subsequent measures to reduce. Haemoglobinopathies, porphyrias. 'ESR' (Erythrocyte sedimentation rate) determination and its importance in the diagnosis of certain diseases. Blood disorders-broad classification, blood coagulopathies-broad classification, 'α' and 'β' Thalassemias. Plasma protein electrophoretic profile in health and disease, CSF analysis, <b>Mechanism of blood coagulation</b> and its regulation	10Hrs
<b>Clinical enzymology:-</b> Enzymes as markers in the diagnosis of diseases (like LDH, CPK, SGOT, SGPT).	4Hrs
<b>Water balance and factors affecting it, electrolyte balance:</b> in health and diseases.	5Hrs
<b>Kidney Profile in health and disease:</b> normal and abnormal constituents; clearance test and their importance is assessing kidney function supported by appropriate case study.	5 Hrs
<b>Liver profile in health and disease,</b> detoxification mechanisms, LFT and their clinical significance in diagnosis of liver diseases	5 Hrs
<b>Gastric profile in health and disease;</b> Gastric function test, hypo and hyper acidity, ulcers.	5 Hrs
<b>Cardiac profile tests in health and disease.</b>	3 Hrs
Diagnostic importance of serological test like the pregnancy, WIDAL, VDRL tests- Importance of lab accreditation and quality control in a clinical biochemistry lab	5 Hrs
Importance of laboratory accreditation and quality control in a clinical biochemistry Laboratory.	4 Hrs
<b>Endocrinology:</b> Classification of hormones, general mechanism of hormone action, role of second messengers in signal transduction.	5 Hrs

<b>Paper Code and Name</b>	<b>PG72T401: Molecular Genetics &amp; Immunology</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Students will learn how human body fights with invading microorganism and pathogens.
CO 2	Students will understand the human genetics and related components.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 50)</b>
<b>I: Molecular Genetics:</b>	
1. Bacterial genetics: Bacterial chromosome, plasmids, fertility, resistance, colicins, virulent, metabolic and other factors. Transposable genetic elements, transformation and conjugation in bacteria, linkage map of bacterial chromosomes, recombination in bacteria.	<b>6 Hr</b>
2. Biochemical genetics: Human material, structure of chromosomes, chromosome banding, lampbrush and polytene chromosomes, chromosomal abnormalities, chromosomal proteins, introns, exons, pseudogenes, gene clusters, spacers, mapping of human genes, nature of inheritances, sex linked inheritance, Histones and nonhistones, nucleosomes.	<b>5 Hr</b>
3. Mutations: Types, mutagens, nature of mutation, mechanism of action of mutagens, suppressor mutation, genes and their importance, Temperature sensitive mutants, isolation of auxotrophic and nutritional mutant microbes replica plating.	<b>3 Hr</b>
4. DNA repair: Photoreactivation, Excision, Post-replication and Recombinational DNA repair mechanisms.	<b>2 Hr</b>
<b>II: Immunology :Organs and cells of the Immune system.</b> Primary (Structure of Bone-marrow and Thymus) and secondary lymphoid organs. (Spleen, lymph node, MALT etc.). Hematopoiesis (Cells of Myeloid and lymphoid lineages), Production and maturation (Ontogeny) of T (TH, TC and TREG) and B (B1 and B2) lymphocytes. Positive and Negative selection, Central and peripheral tolerance	<b>4 Hr</b>
<b>Innate Immune Response:</b> Mechanical barriers to infection, Physiological factors contributing to innate immunity, Inflammatory response and Phagocytic system (Role of Mononuclear phagocytes, Macrophages, Neutrophils in innate immunity). Types of infections and nature of infective agents, Alternate and classical pathway of complement system	<b>4Hr</b>
<b>Immunogenetics:</b> Genetic model compatible with Ig structure, Multigene organization of Ig genes, Variable-region gene rearrangements and its mechanism, Theories of antibody formation (Clonal selection and Network). Molecular basis of antibody diversity–gene recombination, somatic hypermutation, N- and P-nucleotide insertion, Class switching, Regulation of Ig-Gene Transcription.	<b>4 Hr</b>

<b>Antigens and Antibodies:</b> Chemical complexity and molecular property of Antigens, Haptens, Epitopes, Paratope. Epitope analysis, Basis of antigen specificity. Immunoglobulin fine structure and classes, Antigenic determinants on immunoglobulins, Immunoglobulin superfamily, monoclonal and polyclonal antibodies and their production by hybridoma technology.	<b>4Hr</b>
<b>Antigen-Antibody Interactions:</b> Principles, affinity and avidity and cross reactivity. Techniques: Precipitation, Agglutination, Radioimmunoassay, Enzyme-Linked Immunosorbent Assay, Western Blotting, Immunofluorescence, Immunoelectron Microscopy	<b>4Hr</b>
<b>Adaptive immune response:</b> Primary and secondary immune response. Nature of T and B cell surface receptors, Major Histocompatibility Complex- Molecular organization of MHC molecules (H-2, HLA), Structure of MHC molecules. Class I MHC-peptide and Class II MHC-Peptide interactions. Antigen presenting cells (APCs), Antigen processing and presentation by endo and exogenous pathways.	<b>5Hr</b>
<b>Immune effector mechanisms</b> – Immunological tolerance, Hypersensitivity: Immediate (type I, type II, type III) and delayed hypersensitivity reactions.	<b>3Hr</b>
<b>Autoimmunity</b> -Organ specific (Hashimoto's thyroiditis and Myasthenia Gravis) and systemic (Rheumatoid arthritis and Systemic lupus erythematosus) diseases. Tissue transplantation - auto, allo, iso and xenograft, transplantation rejection, mechanism and control, immunosuppressive agents. Cancer-immunology – Tumor associated antigens, Immunological surveillance of cancer.	<b>4 Hr</b>
<b>Cytokines:</b> Properties and functions of lymphokines, monokines, interleukins and chemokines; Transplantation Immunology: Mechanism of graft rejection and Immunosuppressive therapy	<b>2Hr</b>

<b>Paper Code and Name</b>	<b>PG72T402: Molecular Biology</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Student will explain genes and their activities in molecular terms.
CO 2	Student will study in detail the structure & activity of genes and the experimental evidence underlying those concepts.
	The student will learn the structure & functions of DNA and entrains basic converge of DNA replication and gene expression.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 50)</b>
<b>1. DNA replication:</b> Semiconservative mode of replication. Experimental evidences, DNA unwinding, Topological problems, linking numbers and role of topoisomerases, direction of replication DNA polymerases I, II and III their role in DNA synthesis, Termination of replication. Nearest neighboring frequency analysis. Mechanism of E. coli replication. Single standard DNA, synthesis of phage DNA, rolling cycle model. Replication of eukaryotic and mitochondrial DNA, restriction and modification of DNA. Inhibitors of DNA replication.	<b>15Hr</b>
<b>2. Transcription:</b> Biosynthesis of RNA, role of RNA polymers, structure, properties and mechanism of transcription, Transcription factors, inhibitors of transcription, mechanism of splicing, processing of RNA's into mRNA, RNA and tRNA in eukaryotes and prokaryotes, RNA replicase and its role, polynucleotide phosphorylase reaction and its significance, reverse transcription and its mechanism, RNA dependent DNA polymerase, post transcriptional processing of RNAs.	<b>10Hr</b>
<b>3. Genetic code:</b> Biological significance of degeneracy, methods employed to decipher genetic code, size of the codon, triplet code studies by Khorana and Nirenberg. Feature of genetic code, wobble hypothesis coding property of tRNA, mitochondrial-genetic code.	<b>3Hr.</b>
<b>4. Translation and protein targeting:</b> Structural organization of ribosomes in prokaryotes and eukaryotes. Role of mRNA and tRNA in protein biosynthesis,. Stages in protein biosynthesis. Site and direction of protein biosynthesis. Amino acid activation. Formation of amino acyl tRNA, chain initiation, elongation and termination. Mechanism of synthesis of proteins. The role of various factors. Post translational modification of proteins. Inhibition of protein biosynthesis in eukaryotic	<b>12Hr.</b>

and prokaryotic system, protein targeting, synthesis of secretory and membrane proteins., signal sequence hypothesis. Mechanism of translational control.	
<b>5. Regulation of gene expression:</b> Gene regulation principles, Differences between prokaryotic and eukaryotic gene regulation, transcriptional control. Enzyme induction and repression. Jacob Monad operon model. Operon hypothesis The study of lac operon and its mechanisms of expression, as an example of + ve and – ve regulation, characteristic properties of lac repressor. Catabolite repression, role of cAMP and catabolite gene activator protein (CAP) in catabolite repression. Translational control, Si RNAs. A brief study of other operons, arabinose & tryptophan, attenuation. A brief account of regulation of gene expression in eukaryotes.	<b>12 Hr</b>
<b>References:</b>

Molecular Cell Biology, 4 <sup>th</sup> edition, by Lodish Harvey, Arnold Berk, S. Lawrence Ziursky, Paul Matsufaira, Daid Baltimore, James Durnel (W.H. Freeman and Company) 4. Genes VII Benjamin Lewin (Ed 2000) University Oxford Press 5. Molecular Biology of the cell by Albertsetal, (1989) Garland publications.	

<b>Paper Code and Name</b>	<b>PG72T403: Biotechnology</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Explain the various tools used in rDNA, viz., plasmid, restriction enzymes
CO 2	Identify the various expression systems
CO 3	Yeast as an expression system,
CO 4	Understand the application of plant biotechnology. And cell biotechnology. Apply the bioinformatics tools and understand the various biostatics for analytical applications

PARTICULARS	Teaching Hours (Max.50)
<b>1. Introduction:</b> Scope of Biotechnology	<b>1 Hr</b>
<b>2. Recombinant DNA technology:</b> Basic principles of gene cloning cDNA cloning, construction of gene libraries strategies tissue specific mRNAs. Preparation of cDNA, alternative strategy of Okyama and Berg for cDNA synthesis insertion of target fragments into vectors by different methods. E.coli and other species in cloning plasmid cloning, vectors, plasmid size range, phenotypic traits, amplification, common plasmids like PBR-322, PUC, phage vectors, lambda phage M-13 SV-40, cosmids. phagemids, shuttle vectors, identification of recombinants- direct selection immunochemical detection and protein activity method.	<b>13 Hr</b>
<b>3. Restriction enzymes:</b> classification, isolation of gene fragments using restriction endonucleases and mechanical shear, fractionation by centrifugation, electrophoresis, nucleic acid hybridization technique. Construction and design of primers, PCR chemical synthesis, blotting technique.	<b>7 Hr.</b>
<b>4. Expression of foreign DNA</b> comparison of transcription initiation signals in prokaryotic and eucaryotics. Lac promoter, trp promoter, tac promoter. Synthesis of eukaryotic proteins on commercial scale production of insulin, construction of gene libraries, diagnostic probes of genetic diseases, site specific mutagenesis.	<b>6 Hr</b>
<b>5. Cloning in yeast</b> -development of yeast vectors, YIP. YEP, YAC selection and expression of clones.	<b>2 Hr.</b>
<b>6.. Plant biotechnology</b> – plant tissue culture, isolation of plant protoplasm's - Ti-plasmid or agrobacterium tumefaciens and other bacteria, caulimovirus. Introduction of desirable gene in plants phage, mediated transfer. Introduction of desirable gene in plants. Phage mediated transfer, Application of transgenic plants, Salinity & drought resistant plants, insect resistant plants, Golden rice, delayed senescence,	<b>7 Hr</b>
<b>7. Cell biotechnology:</b> Animal cell culture, cloning in mammalian cells transgenic animals, methods of introducing genes into eukaryotic cells and chromosomes, reproductive and therapeutic cloning, gene therapy.	<b>5 Hr</b>
<b>8. Biosensors:</b> Principle of biosensors and biochips and their applications.	<b>1Hr</b>
<b>9. Bioinformatics and Biostatistics:</b> Bioinformatics- Archives of biological databases, Computer Operating system, Application software, Protein Modelling, Concepts of Drug designing. <b>Biostatistics</b> - Uses, Analytical Considerations of Experimental error, selecting an analytical methods, Nature of experimental errors, Precession, Coefficient of variation, Variance. Population statistics- Probability- rules of probability, binomial distribution, Normal distribution, Confidence intervals, Confidence Limits and Student's t Factor, Criteria for the rejection of outlier experimental Data. Validation of analytical method, Analysis of Standard solution: one sample t-Test. ANOVA. P Value.	<b>8 Hr</b>

<b>Paper Code and Name</b>	<b>PG72T404B: Project</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	After rigorous training during their project tenure, students will be able to gain comprehensive hands on training in the field of various research fields such as Biodegradation, Neurochemistry, Glycobiology and Protein Biology.
CO 2	Literature survey on the topic .
CO 3	Basics of research methodology and design of experiments.
CO 4	Preparation of manuscript for publication.
CO 5	Execution of research work by various techniques
CO 6	Presentation of research data in the conferences/seminars

<b>Paper Code and Name</b>	<b>PG72P401: Molecular Genetics &amp; Immunology Practical's</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Students will learn how human body fights with invading microorganism and pathogens.
CO 2	Students will understand the human genetics and related components.

<p align="center"><b><u>Paper CP-4.5: MOLECULAR BIOLOGY &amp; IMMUNOLOGY PRACTICALS</u></b>  <b><u>(4Hr/Week)</u></b></p>	
1.	Isolation of RNA from microbial source
2.	Estimation of RNA by Orcinol method
3.	Characterization of RNA by spectroophotmetry

KARNATAK UNIVERSITY  
DHARWAD

DEPARTMENT  
OF  
BIOCHEMISTRY

Ph.D. COURSE WORK

SYLLABUS

2012-13

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPARTMENT OF BIOCHEMISTRY**

**Regulations and Syllabus for Ph.D. Course work**

As per the Amended regulations governing Ph.D. Programme (regulation 9.0) of the Karnatak University, Dharwad w.e.f. Academic year 2012-13, the candidates registered for Ph.D. degree shall undertake course work of one semester (16 weeks) on regular basis.

**9.0 Course work**

9.1 Registered Full-time and Part-time Ph.D. candidates shall undertake course work of one semester (16 weeks), normally in the parent department within one year from the date of provisional registration, failing which his/her registration shall be cancelled. However, if it is found necessary, course work may be carried out by doctoral candidates in sister departments/Institutes/ Research Centres recognized by the University for which due credit shall be given to such candidates.

9.2 The course work for Ph.D. programme shall comprise of three papers of 100 marks each, viz.,

- i) **Course-I: Research Methodology** which include Quantitative /Qualitative methods and computer applications
- ii) **Course-II: Cognate/Core Subjects**
- iii) **Course-III: Area of Research.** This shall be followed by comprehensive Viva-Voce for 50 marks

However, it shall be noted here that Course-I and II are common for all the candidates in the particular Department/subject/ Discipline.

9.3 Each Course shall have 48 contact hours. Classes for Courses-I and II shall be arranged by the Chairperson of the P.G. Departments/Head of the recognized research centres, and that of Course-III by the concerned Research supervisor. Both the Full-time and Part-time candidates shall attend atleast 75% of the classes in each paper to be eligible to appear for the examination.

9.4 The syllabus of Paper-I & II shall be framed by the Concerned Department consisting of the chairperson of the respective Department as Chairperson, two Research Supervisors, based on the seniority (including One Research Supervisor belonging to SC/ST Category wherever available). The syllabus of Paper-III shall be framed by the concerned Supervisors. The syllabi shall be placed before the concerned BOS for consideration and approval.

9.5 The candidates who fail to attend minimum of 75% of the classes in each of the courses shall not be eligible to appear for the examination and his/her provisional registration stands cancelled.

9.6 The following shall be the structure of Course work for Ph.D. Programme.

Sl. No.	Name of the Course	Contact Hours per Week	Maximum Marks			Examination Hours
			Continuous Assessment (IA)	Course-End Examination	Total	
01	Course-I: Research Methodology	03	50	50	100	02
02	Course-II: Cognate/Core Subject	03	50	50	100	02
03	Course-III: Area of Research	03	50	50	100	02
Total			150	150	300	
Viva Voce					50	
Grand Total					350	

9.7 Continuous Internal Assessment (IA) Marks of the course work shall be awarded based on

a) Assignments-10 marks b) Seminars-10 marks c) Tests-30 marks.

Paper	Internal Assessment Components (Marks)				
	Test-I (15)	Test – II (15)	Seminar (10)	Assignment (10)	Total
1. Course-I: Research Methodology	5 <sup>th</sup> week	9 <sup>th</sup> week	12 <sup>th</sup> Week	14 <sup>th</sup> Week	50
2. Course-II: Cognate/Core Subject	5 <sup>th</sup> week	9 <sup>th</sup> week	12 <sup>th</sup> Week	14 <sup>th</sup> Week	50
3. Course-III: Area of Research	5 <sup>th</sup> week	9 <sup>th</sup> week	12 <sup>th</sup> Week	14 <sup>th</sup> Week	50

9.8 The question paper (in two sets) of Paper-I & II of the Semester end examinations shall be set by BOE (vide Regulation 9.4). the concerned Supervisors shall set the question paper/s (in two sets) in respect of Paper-III. The manuscripts of the question papers shall be submitted to the Registrar (Evaluation). Out of the two sets of question papers or each Paper, one shall be chosen randomly by the Registrar (Evaluation).

9.9 The Semester-end examination shall be conducted in the 17<sup>th</sup> week and evaluation completed and results announced by the 18<sup>th</sup> week.

## **10.0 Examination and Evaluation of Answer Scripts**

- 10.1 There shall be a Course-end Examination of two hours duration (for 50 marks per Course).
- 10.2 The Chairperson of the P.G. Department shall conduct the examination for all the candidates (i.e., including those who are working for Ph.D in other institutions) in the Department.
- 10.3 Each answer script of the Course-end examination shall be coded and assessed by two examiners ( one internal Course teacher and another external- appointed by the Registrar (Evaluation) from the panel of examiners submitted by the Chairperson of the BOE). The marks awarded to the answer script shall be the average of these two evaluations.
- 10.4 If the difference in the marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner appointed by the Registrar (Evaluation) from the panel of examiners submitted by the Chairperson of the BOE. The marks awarded to that script shall be the average of two nearer marks out of three evaluations.

## **11.0 Minimum Pass Marks and Improvement Examination:**

- 11.1 The BOE shall prepare the Result sheet and submit it to the Registrar (Evaluation) who shall then declare the results and issue marks cards.
- 11.2 Minimum for pass in each written paper shall be 40% in the course-end examination and 50% in aggregate including the continuous internal assessment marks. However, there shall be no minimum for Viva-Voce as well as IA Marks. Every candidate shall compulsorily attend the Viva-Voce examination conducted by Respective Research supervisor and concerned Chairperson of the Department.
- 11.3 Failed candidates shall be allowed to reappear for the Ph.D. Course work examination only once within three months of the first examination. In case of failure of the candidate even after the re-examination, his/her provisional Registration shall be cancelled. There is no provision for improvement of IA marks.

## **Syllabus for Ph.D. Course work in Biochemistry**

### **Course-I : RESEARCH METHODOLOGY**

1. Research in biochemistry- An over view, Literature review, objectives of Research work, Approaches and methodology 6 hrs
  2. Documentation and presentation of data, Analysis and interpretation of data, manuscript preparation 5 hrs
  3. Biostatistics used for analysis of data 6 hrs
  4. Computer applications/Bioinformatics, biochemical databases, web tools and software packages 8 hrs
  5. Purification and characterization of biomolecules, Centrifugation, Chromatography, Electrophoresis, Spectrophotometry, GC-MS, NMR 8 hrs
  6. Microscopic and Immunological techniques, Radio isotopes in biochemical research 6 hrs
  7. Techniques in molecular biology; PCR, DNA Microarray, DNA sequencing and cloning techniques 9 hrs
- 48 hrs**

# Syllabus for Ph.D. Course work in Biochemistry

## Course-II: Cognate/Core Subject- Biochemistry

1. **Introduction:** Basic concepts of Biochemistry, Cellular organization and composition, Analytical tools in structural biology  
3 hrs
2. **Biomacromolecules:** Structural organization of Proteins and Nucleic acids, structure –function relationships, Supramolecular assemblies, Polysaccharides, Glycoproteins, lipoproteins, membrane assembly molecules, proteoglycans, blood group antigens.  
8 hrs
3. **Enzymes:** Substrate specificity, coenzymes, Isoenzymes enzyme Kinetics, catalytic mechanisms, Regulation of enzyme activity, diagnostic enzymes, application of enzymes.  
6 hrs
4. **Metabolism:** Metabolic pathways-carbohydrates, lipids, aminoacids and nucleotides, metabolic interrelationships, Genetic disorders, metabolic regulations Hormonal control.  
6 hrs
5. **Molecular physiology:** Mechanism of action of Hormones, Signal transduction, Hormone Receptors, Neurotransmission, Vision, Muscle contraction, stem cells & their applications.  
5 hrs
6. **Molecular Biology:** DNA replication, transcription, translation, Regulations of Gene Expression.  
6 hrs
7. **Immunology:** Antigens, Immunoglobulins, Immune systems, Autoimmunity, Molecular immunology.  
6 hrs
8. **Biotechnology:** Recombinant DNA technology, Gene cloning, restriction enzymes, expression of foreign genes, transgenic organisms, plant biotechnology, Human gene therapy Molecular Diagnostics.  
8 hrs

Total 48 hrs

# Syllabus for Ph.D. Course work in Biochemistry

## Course-III: Area of Research

### BIODEGRADATION AND BIOREMEDIATION

1. **Environmental Pollution:** A perspective review, Sources and toxicity of environmental pollutants, Xenobiotics 6 hrs
  2. **Biodegradation:** Role of microbes in the degradation of environmental pollutants, Biodegradative pathways in microorganisms-bacteria, fungi and yeast. Aerobic and anaerobic biodegradation by pure and mixed cultures, cometabolism, biotransformation 9 hrs
  3. **Persistent Organic pollutants (POPs):** Polycyclic aromatic hydrocarbons (PAHs), Polychlorinated biphenyls (PCBs), Halogenated and nitro aromatic compounds, Bioaccumulation and Biomagnification. 6 hrs
  4. **Elucidation of biodegradative pathways:** Isolation and characterization of metabolic products by physico-chemical methods, oxygen-uptake and enzymatic studies. 8 hrs
  5. **Enzymes of biodegradative pathways:** Monooxygenases, Dioxygenases, Esterases and Dehalogenases. Microbial enzymes and their industrial applications 6 hrs
  6. Development of genetically engineered microbial strains for degradation of toxic organic pollutants 4 hrs
  7. **Bioremediation:** Use of microbes in bioremediation of contaminated sites, **in situ** and **ex situ** bioremediation, bioaugmentation, phytoremediation and their applications in environmental pollution control , Biological treatment , Immobilized microbial technology 9 hrs
- 48 hrs**

## **Syllabus for Ph.D. Course work in Biochemistry**

### **Course-III: Area of Research**

#### **GLYCOBIOLOGY**

1. **Proteins**- Isolation, purification techniques for soluble and membrane bound proteins 5 hrs
2. Characterization of proteins for Primary, Secondary, Tertiary and Quaternary structure 10 hrs
3. **Carbohydrates**: Monosaccharides of biological origin, oligos, polysaccharides and their biological significance Methods used for characterization of carbohydrates, uses of enzymes, chemical methods, MALDI-TOF MS MS, NMR, Glycans, Complexity of glycans of glyconjugates, N and O linked glycans, biosynthesis and their characterization 13 hrs
4. **Carbohydrate binding proteins**: Lectins, classification structure, function and their applications. 10 hrs
5. **Cell biology**: Cell culture methods, cell based assays; proliferation, viability and apoptosis assays, Flowcytometry, confocal microscopy, Immunohistochemistry and western blotting, Cancer Biology. 10 hrs

**48 hours**

**Syllabus for Ph.D. Course work in Biochemistry**  
**Course-III: Area of Research**  
**NEUROCHEMISTRY**

**UNIT-1 GROSS ANATOMY OF BRAIN 07 Hours**

Components of the Central Nervous System (CNS), Cerebral topography, Topography of the Cerebellum and Brainstem, Development of the nervous system, The meninges, Covering of the brain and spinal cord (Dura Mater, Arachnoid Mater, Pia Mater). Cerebrospinal fluid -Formation, Circulation, Function and Composition. Blood-Brain Barrier (BBB).

**UNIT-2 THE NEURON 07 Hours**

The Neuron and its cellular components, Axonal Transport, Types of Neurons, Neuroglia, Myelinated Axons (PNS & CNS), Disorders associated with defected Myelination, Composition of Peripheral Nerves, Injury of the Neuronal cell body and Axonal damage, Recovery of Neuronal injury.

**UNIT-3 NEUROTRANSMITTERS 08 Hours**

Definition, Criteria for identifying neurotransmitter, Major classes of Neurotransmitter, its synthesis, removal, distribution and its physiological & clinical consideration, Receptors for Neurotransmitter, Mechanisms of regulation of receptors.

**UNIT-4 PROTEIN KINASE AND PHOSPHATASES IN SIGNALLING 08 Hours**

Introduction to reversible phosphorylation, Protein- serine/threonine and tyrosine kinase and phosphatase: structure and origin of protein phosphatase, effect of inhibitors on protein phosphorylation in intact cells. Calcineurin: its form, function and multiple roles in cell signaling with special emphasis on learning and memory.

**UNIT- 5 INHERITED AND NEURODEGENERATIVE DISEASES 10 Hours**

The Epilepsies, Phenotype and Mechanisms, Diseases Involving Myelin, Genetics of Neurodegenerative Diseases, Disorders of Amino Acid Metabolism, Lysosomal and Peroxisomal Diseases, Diseases of Carbohydrate, Fatty Acid and Mitochondrial, Metabolism, Disorders of Muscle Excitability, Neurodegenerative alpha-Synucleinopathies and Tauopathies, Neurodegenerative  $\alpha$ -Synucleinopathies and Tauopathies, Motor Neuron Diseases.

**Unit 6 BIOINFORMATICS 08 Hours**

**Biological Data bases:** resource data base generation (genome projects), structural data bases (protein data bases), data base mining and applications.

**Sequence analysis:** Sequence alignment (Global and Local), sequence analysis of Nucleic acids and proteins (FASTA and BLAST), Restriction mapping, Pair wise and multiple alignments, phylogenetic analysis.

**Drug designing:** Structure prediction of proteins, modeling, Drug designing, Molecular docking, evaluation and validation.

**Total Hours: 48 Hours**

11. Introduction to Bioinformatics Teresa Attwood, David Parry-Smith. Publishers Prentice Hall, 2003

**Syllabus for Ph.D. Course work in Biochemistry**  
**Course-III: Area of Research**  
**Protein Biology**

**UNIT- 1. PROTEINS AND AMINO ACIDS (8H)**

Amino acids classification and chemistry. Proteins– primary structure – secondary – tertiary – quaternary – super secondary structures. Sequence determination – Ramachandran plot. Globular and fibrous proteins. Protein folding and dynamics – Molecular chaperones – heat shock proteins. Protein denaturation (pH, temperature, chaotropic agents), Protein-Protein interactions, Functional proteins: Structure and Drug targets.

**Protein Folding:** Folding pathways; Intermediates of protein folding; Compact Intermediates; Role of chaperons (trigger factor, prefoldin), heat shock proteins (Hsp70, Hsp90), chaperonins (Group I & II) and enzymes in protein folding (PDI, PPI), Protein folding disorders.

**UNIT-2 BIOSIGNALING: (10H)**

Biosignaling is also known as cell signal transduction) is the transmission of molecular signals from a cell's exterior to its interior. Signals received by cells must be transmitted effectively into the cell to ensure an appropriate response. This step is initiated by cell-surface receptors. Signal transducing receptors are of four general classes: Receptors that penetrate the plasma membrane and have intrinsic enzymatic activity or are enzyme associated ([Enzyme-linked Receptors](#)); Receptors that are coupled, inside the cell, to G proteins ([7-TM Receptors](#)); Receptors that are found intracellularly and upon ligand binding directly alter gene transcription ([Nuclear Receptors](#)); [Ligand-gated ion channels](#).

Several small molecules within the cell act as intracellular messengers (also known as second messengers). These include cAMP, cGMP, nitric oxide, lipids and Ca<sup>2+</sup> ions.

**UNIT III - Protein Functioning (6H)**

One of the most important functions of cell signalling is to control and maintain normal physiological balance within the body. Activation of different signalling pathways leads to diverse physiological responses, such as cell proliferation, death, differentiation, and metabolism. Proliferation of damaged or malfunctioning cells is often a key factor in the generation of disorders such as [cancer](#), infectious diseases, inflammation, arteriosclerosis, [arthritis](#), and [neurodegenerative diseases](#).

Ageing: Theories of ageing – Ageing of stem cells – programmed cell death. Telomeres and Telomerase. Genes, epigenetic, nutrients regulations of ageing process. neurodegenerative – metabolic diseases. Anti-ageing approaches – stem cells and regeneration therapy.

**UNIT- IV – PROTEIN EXPRESSION STUDIES (10H)**

Genetic Engineering: Culture of *E. coli* cells & plasmid isolation, Preparation of competent cells, Transformation, Restriction enzymes, Ligation of DNA, Primers designing, Polymerase chain reaction, Generating Mutants, Sub-cloning of GFP protein. Mutagenesis: Effect of amino acid changes on protein function, site-directed mutagenesis

Expression Systems – *E. coli*, Yeast, Introduction, detection and purification of expressed protein - Engineering – Protein/peptide chemical synthesis - Protein-polynucleotide interactions

#### **UNIT- V PURIFICATION OF PROTEINS AND ENZYMES: (12)**

Extraction methods, Ammonium sulphate fractionation; Purification strategies: Gel filtration chromatography, Ion-Exchange chromatography, Affinity chromatography, Dye-ligand; Electrophoresis: SDS and Native, Western Blotting; Proteomics: 2DE and Mass Spectrometry.

Protein folding structure and function: Primary Structure, post translational modification of proteins (viz. glycosylation, N-terminal, modification, hydroxylation & modified amino acids). Secondary structure - UV, CD and fluorescence spectrophotometry. Quaternary structure - X-ray. Functional proteins - Hemoglobin and enzymes / peptide hormones.

Structural and functional aspects of proteins and DNA: Relationships between structure and function and their role in human diseases; Protein-DNA interactions; Protein-RNA interactions; Protein-protein interactions; Protein aggregation; Non-enzymatic glycosylation (Protein-sugar interaction); Methods to study these interactions.

#### **UNIT- VI – PROTEOMIC APPROACH**

**(4H)**

Data processing, Data mining; Bioinformatics – concept and applications; Biological databases – Primary and Secondary; Sequence Databases (EMBL, Gen Bank, DDBJ, SWISS-PROT, PIR, TrEMBL); Protein Family/Domain Databases (PROSITE, Pfam, PRINTS & SMART); Structure Database (PDB); Tools like BLAST, FASTA and EMBOS.

## **BT CT 1.1 - BIOMOLECULES**

**50 Hrs**

### **Unit 1**

**Chemical bonding:** Covalent bonds, Ionic bonds, Hydrogen bonds, Co-ordinate bonds, Electrostatic forces, Vander-Waal's forces, Hydrophobic forces, Molecular orbitals in chemical bond formation, Sigma and Pi bonds, Bond length, Bond strength, Bond energy and bond radius, formation of chemical bonds with carbon and other elements. Geometry of carbon compounds, stereo-isomers, tetrahedral structure, Conformation and Configuration of Optically active molecules, asymmetric and chiral centers, D and L isomers, R and S configurations, Cis-trans configuration.

**05 Hrs**

### **Unit 2**

**Water:** Structure & Properties of water, water as a solvent and its importance in biological system. pH and buffers - weak acid and weak base, Ionization of water and equilibrium constant, acid base theory and preparation of solutions, normality, molarity and molality. Henderson-Hasselbalch equation, Hydrogen ion and Hydroxyl ion concentration (pH), the pH scale, pK and pH relation, buffers concept, Importance and preparation of buffers.

**05 Hrs**

### **Unit 3**

**Bio-organic reactions:** Acid-base, Covalent and Metal ion catalysis, Concept of nucleophiles and electrophiles, Nucleophilic and substitution reactions  $SN_1$  and  $SN_2$  reactions and their importance. Oxidoreduction reactions

**03 Hrs**

### **Unit 4**

**Carbohydrates:** Properties and characteristics of Carbohydrates. Derivatives of monosaccharides, amino sugars, deoxy-sugars and glycosides Purification and Structure of homo and hetero polysaccharides, Starch, Cellulose, Glycogen, Dextrin, Hemi-cellulose, Xylan, Pectin, Lignin, Agar-agar, Chitin, Hyaluronic acid, Heparin, Chondroitinsulphate, Peptidoglycon and carbohydrates on cell surface.

**09 Hrs**

### **Unit 5**

**Nucleic acids:** Structure of nucleotides, DNA and RNA, conformation of DNA, RNA– mRNA, rRNA and tRNA.

**04 Hrs**

## **Unit 6**

**Amino acids and Proteins:** Classification, Structure and Properties of amino acids and classification of proteins. structural organization of proteins – primary, secondary, tertiary and quaternary structures (Haemoglobin – its conformational changes with respect to oxygen transportation), Conformational analysis, Ramachandran's plot and its significance, techniques of isolation and purification of proteins, Protein denaturation and renaturation kinetics with respect of RNA'ase, stability of proteins, Glycoproteins (N-glycan and O-glycan)

**10 Hrs**

## **Unit 7**

**Lipids:** Classification of phospholipids, Glyco and Sphingolipids, structure, properties and reactions of lipids. Cholesterol and its derivatives

**05 Hrs**

## **Unit 8**

**Vitamins:** Chemistry Fat and water soluble vitamins and their significance in metabolism.

**03 Hrs**

## **Unit 9**

**Secondary metabolites:** Alkaloids, Pigments and Secondary metabolites: General introduction, Chemistry of medicinally and industrially important Alkaloids, Terpenoids, Carotenoids, Essential oils.

**Pigments:** Chemistry of chlorophylls, Cytochromes, Heme, Phenolics and Tannins.

**03 Hrs**

## **Unit 10**

**Antibiotics:** Structure and Chemistry of Penicillin, Streptomycin, Chloramphenicol and Tetracyclins, Vancomycin, Peptide-antibiotics.

## PRACTICALS

### BTCP-1.5 Based on BTCT 1.1 Biomolecules

1. Safety in Laboratory – Biosafety and Safety notices.
2. Preparation of buffers: Citrate, Phosphate, Tris-HCl Buffer.
3. Chromatography techniques:
  - a. Separation of Plant Pigments and Amino acids by paper chromatography (Ascending and Descending).
  - b. Separation of Lipids by Thin Layer Chromatography.
4. Qualitative analysis of Carbohydrates, Amino acids and Lipids.
5. Estimation of Carbohydrates by Anthrone method.
6. Estimation of reducing sugars by DNS method.
7. Estimation of protein by Biuret and FCR method.
8. Estimation of Vitamins- Vitamin C, Thiamine and Riboflavin.
9. Estimation of Blood cholesterol.
10. Estimation of DNA by DPA method.
11. Estimation of RNA by Orcinol method.
12. Determination of Saponification values of fats.

#### Course outcomes

<b>Program code with title</b>	<b><u>BT CT 1.1 - BIOMOLECULES</u></b>	
<b>Units</b>	<b>Course Outcome</b>	<b>No of hours</b>
<b>Unit 1</b>	<b>Chemical bonding:</b> The students would understand the different chemical bonding, bond energy, confirmations and configurations of different biomolecules.	<b>05 Hrs</b>
<b>Unit 2</b>	<b>Water:</b> Students will understand the structure and properties of water molecules and its physical and physiological properties.  Students will also understand the pH and buffers preparations and its importance.	<b>05 Hrs</b>
<b>Unit 3</b>	<b>Bio-organic reactions:</b> Students will understand the acid- base concepts, and related bio reactions.	<b>03 Hrs</b>
<b>Unit 4</b>	<b>Carbohydrates:</b> Students get to know the types of carbohydrates, properties and their biological functions.	<b>09 Hrs</b>
<b>Unit 5</b>	<b>Nucleic acids:</b> Students will understand the structure and confirmations of Nucleic acids.	<b>04 Hrs</b>
<b>Unit 6</b>	<b>Amino acids and Proteins</b> Students will understand the types properties and functions of different amino acids in biological systems .	<b>10 Hrs</b>

<b>Unit 7</b>	<b>Lipids:</b> Students will get to know the classification of different lipids.	<b>05 Hrs</b>
<b>Unit 8</b>	<b>Vitamins:</b> Students will get to know the chemical nature of different vitamins and significance.	<b>03 Hrs</b>
<b>Unit 9</b>	<b>Secondary metabolites:</b> Students will familiarize with the different secondary metabolites	<b>03 Hrs</b>
<b>Unit 10</b>	<b>Antibiotics:</b> Students will understand the structure and significance of antibiotics.	<b>03 Hrs</b>

### **BTCT 1.2-Microbiology**

**50 Hrs**

#### **Unit 1**

History and scope of Microbiology

**02 Hrs**

#### **Unit 2**

**Microbial diversity:** Prokaryotes and Eukaryotes. Classification systems, Criteria used for microbial classification, morphological, staining, biochemical methods, serological techniques, Phage typing, DNA base composition, DNA finger printing, rRNA sequence Numerical Taxonomy, Chemotaxonomy, Classification of bacteria according to Bergey's Manual of systematic Bacteriology.

**06Hrs**

#### **Unit 3**

**Isolation of microorganisms:**

**Culture media:** Definition, Components and different types of culture media

**Sterilization techniques:** Physical and chemical methods

**Methods of isolation:** Serial dilution, spread plate, streak plate and pour plate methods

**06Hrs**

#### **Unit 4**

**Identification of microorganisms:**

**Microscopy:** Working principles and different types of microscopy

**Stains and staining techniques:** Different types of stains, methods of staining and their applications.

**06 Hrs**

#### **Unit 5**

**Microbial nutrition and growth:** Nutritional requirements, Growth curve, measurement of growth, Factors affecting the microbial growth.

**04 Hrs**

#### **Unit 6**

**Viruses:** Salient features and Structure of viruses, Multiplication of viruses (Lytic and Lysogenic cycles), viroids and prions.

**02Hrs**

#### **Unit 7**

**Bacteria:** General characters, classification, morphology and ultrastructure of bacteria. Bacterial multiplication, Spirochetes, Rickettsia, Chlamydia, Mycoplasma, Cyanobacteria, Actinomycetes and Extremophiles, Importance of bacteria in biotechnology

**04 Hrs**

#### **Unit 8**

**Fungi:** General characters, Structure and Classification of fungi. Importance of fungi in fermentation and antibiotic production

**02Hrs**

## **Unit 9**

**Algae:** General characters, Structure and Classification of Algae. Economic importance of Algae

**02 Hrs**

## **Unit 10**

**Agriculture microbiology:** Plant microbe interactions, Bio-fertilizers and bio-pesticides. Integrated pest management, transgenic plants

**04 Hrs**

## **Unit 11**

**Medical microbiology:** Important diseases caused by microorganisms. Different types and modes of actions of antibiotics.

**04 Hrs**

## **Unit 12**

**Food microbiology:** Microbes as foods, Fermentation, Fermented foods. Food spoilage and preservation techniques.

**04 Hrs**

## **Unit 13**

**Environmental microbiology:** Aerobiology, Soil microbiology and Aquatic microbiology. Waste treatment, Bioremediation and biodegradation of Xenobiotics, Biotechnological applications of microorganisms in the environment.

**04 Hrs**

## **PRACTICALS**

### **BTCP- 1.6 Based on BTCT 1.2-Microbiology**

1. Laboratory safety rules and regulation.
2. Principal and working of laminar air flow, Autoclave, Hot air oven, Incubator, colony counter, haemocytometer and microscope.
3. Culture media preparation
  - Preparation of Nutrient broth, agar plates, stabs and slants
  - Preparation of Blood Agar, Chocolate agar, MacConkey agar and EMB agar

4. Microbial techniques for culturing Bacteria: Streak Plate, pour plate, spread plate and standard plate.
5. Staining techniques:

<b><u>Program code with title</u></b>	<b><u>BT CT 1.2 - MICROBIOLOGY</u></b>	
<b>Units</b>	<b>Course Outcome</b>	<b>No of hours</b>
<b>Unit 1</b>	<b>History and scope of Microbiology:</b> Students will understand the history and contribution of scientists in the field of microbiology.	<b>02 Hrs</b>
<b>Unit 2</b>	<b>Microbial diversity:</b> Students will learn about the classification of microorganisms and different methods of classification.	<b>06Hrs</b>
<b>Unit 3</b>	<b>Isolation of microorganisms:</b>  Students will learn the different techniques for the isolation of microorganisms from different environment samples.	<b>06Hrs</b>
<b>Unit 4</b>	<b>Identification of microorganisms:</b>  Students familiarize with the different methods of isolation of microorganisms.	<b>06Hrs</b>
<b>Unit 5</b>	<b>Microbial nutrition and growth:</b> Students know about the different factors influencing the growth of microorganisms.	<b>04 Hrs</b>
<b>Unit 6</b>	<b>Viruses:</b> Students know about the structure and classification of viruses.	<b>02 Hrs</b>
<b>Unit 7</b>	<b>Bacteria:</b> Students study in detail about the structure general properties and Importance of bacteria in biotechnology.	<b>04 Hrs</b>
<b>Unit 8</b>	<b>Fungi:</b> Students know about the structure and	<b>02 Hrs</b>

	classification and economical significance of fungi.	
<b>Unit 9</b>	<b>Algae:</b> Students know about the structure and classification and economical significance of Algae.	<b>02 Hrs</b>
<b>Unit 10</b>	<b>Agriculture microbiology:</b> Students know about the important plant microbe interactions, biopesticides and biofertilizers.	<b>04 Hrs</b>
<b>Unit 11</b>	<b>Medical microbiology:</b> Students study in detail about the different types of diseases and their mode of transmission and importance of antibiotics.	<b>04 Hrs</b>
<b>Unit 12</b>	<b>Food Microbiology:</b> Students familiarize with fermentation, fermented foods, spoilage and preservation of food.	<b>04 Hrs</b>
<b>Unit 13</b>	<b>Environmental microbiology:</b> Students will study in detail about the different microbial interaction role of microorganisms in the degradation of xenobiotics in the environment.	<b>04 Hrs</b>

Preparation of bacterial smear, simple staining, Gram's staining, acid fast staining, Negative staining, Capsular staining, Endospore staining and Flagella staining.

6. Biochemical tests :

IMVIC Test, Catalase, Starch hydrolysis, citrate utilization, Fermentation of carbohydrates, Gelatin liquefaction test and IMVIC Test, oxycase test

7. Determination of Bacterial growth curve.

8. Study of antibiotic sensitivity test of bacteria: Disc/well diffusion method.

**BT CT 1.2 – MICROBIOLOGY**

### **BTCT 1.3 - BIOPHYSICAL AND BIOCHEMICAL TECHNIQUES**

**50 Hrs**

#### **Unit 1**

**Introduction to biophysics:** Scope of Biophysics, Bonds between atom & molecules, Ionic, Covalent, Hydrogen, Electrostatic, Disulphide & Peptide bonds, and Vander Waal's forces, Bond energies, Bond angles.

**03 Hrs**

#### **Unit 2**

**Acids and Bases,** Mole & Normality, Weak acids, Amphoteric electrolytes, pH, Calculation of pH from H & OH Concentration, measurements of pH, Henderson Haselbatch equation, Titration curve & pK values, Buffers & Stability of their pH, Numerical problems.

**03 Hrs**

#### **Unit 3**

**Microscopy:** Light Microscopy – Design and working of Compound, Phase contrast, Interference, Dark field Polarizing & Fluorescence microscope, Electron microscopy– Design and working of Scanning Electron Microscope (SEM), Transmission Electron Microscope (TEM), AFM. Super resolved fluorescence microscopy, Cryo-electron microscopy.

**04 Hrs**

#### **Unit 4**

**Centrifugation:** Basic principles, Forces involved, RCF Centrifugation, techniques- principles, types and applications. Centrifuges & Ultra-centrifuges types, optical methods used and applications of preparative (Differential, Density Gradient) and analytical (sedimentation velocity, sedimentation equilibrium) ultra-centrifugation.

**05 Hrs**

#### **Unit 5**

**Chromatography techniques:** Basic Concepts of adsorption & partition Chromatography, Principle Experimental set-up, Methodology & Applications of all types of Adsorption & Partition Chromatography methods-chromatography using paper, thin layer, HPTLC column (gel filtration, ion exchange, affinity), gas (GC,GLC), LCMS, HPLC: types of HPLC, Mobile phase elution , normal phase and reverse-phase HPLC,

column packing material, efficiency of column, types of HPLC – principles of methodologies, HPLC pumps -efficiency and suitability, Different injectors and Detectors; Ion Chromatography.

Membrane Techniques - Criteria of protein purity, equilibrium dialysis, ultra filtration and various membrane techniques.

**08 Hrs**

## **Unit 6**

**Electrophoretic techniques:** Principle, Electrophoretic mobility (EPM) estimation, factors affecting EPM, Instrument design & set-up, Methodology & Applications of Free & Zone (Paper, Cellulose acetate, Agarose & Starch gel, Pulsed-field, PAGE, SDS-PAGE, Capillary) Electrophoresis techniques, Principle, Experimental set-up, Methodology & Applications isoelectric focusing, 2D electrophoresis.

**06 Hrs**

## **Unit 7**

**Spectroscopic techniques:** Spectroscopy, Beer-Lambert's law, types of detectors, UV-Visible spectroscopy, Infrared spectroscopy, Raman spectroscopy, Fluorescent spectroscopy, Flame photometry, Atomic absorption, Plasma emission mass, ESR and NMR spectroscopy, ORD and CD. X-Ray Diffraction, X-Ray crystallography, Biological importance of Lasers, Microwaves and Radiations

**10 Hrs**

## **Unit 8**

**Synthesis of Nanomaterial's:** Physical methods: Methods based on evaporation, sputter deposition, chemical vapour deposition (CVD), electric arc deposition. Chemical Methods: colloids and colloids in solution, synthesis of nanoparticles by colloidal routes, micro emulsions, Sol-Gel method.

**Biological Methods:** Introduction to biomaterials, Synthesis using microorganisms and plant extracts.

**05 Hrs**

## **Unit 09**

**X-ray crystallography:** Unit cell, cell content, crystal symmetry, crystal systems, Bravais lattices, symmetry elements and operations, point groups and space groups. Bragg's law. Diffraction of x-rays by crystals, Atomic scattering factors and structure factors, amplitude and phase, Fourier transformation.

**04 Hrs**

## Unit 10

**Radioisotope techniques:** Nature of radioactivity, detection and measurement. GM counter and Scintillation counter, Auto radiography, Safety aspects and applications

02 Hrs

### PRACTICALS

#### BTCP-1.7 Based on BTCT 1.3-Biophysical and Biochemical techniques

1. Instrumentation: Spectrophotometer, Electrophoresis, Centrifuges, Micropipettes, Chromatographic techniques: Column, HPLC, GLC, GC-MS and NMR.
2. Demonstration of Beer-Lambert's Law.
3. Determination of pH using Indicators.
4. Determination of pKa value of acetate buffer.
5. Titration of strong acid with strong base.
6. Titration of weak acid and weak base.
7. Titration of mixture of strong and weak acids.
8. Titration curves of amino acids.
9. Colorimetric estimation of Inorganic phosphate.
10. Agarose gel electrophoresis for separation of Nucleic acids.
11. Separation of proteins by SDS-PAGE and Native PAGE.
12. Density Gradient centrifugation and separation of blood components.
13. Determination of acid value of fats.
14. Absorption curves of two different dyes.
15. Liposome Preparation: Sonication, light scattering, unicellular and multi cellular vesicles.
16. Synthesis and characterization of Nanoparticles from plants and microbial extracts.

<b>Unit 8</b>	<b>Synthesis of Nanomaterial's:</b> Students will learn about the different methods for synthesis of nanoparticles and their applications.	<b>05Hrs</b>
<b>Unit 9</b>	<b>X-ray crystallography:</b> Students will learn about the principle and the applications of X-ray crystallography.	<b>09Hrs</b>
<b>Unit 10</b>	<b>. Radioisotope techniques:</b> Students will learn about the different methods and applications of Radioisotope techniques.	<b>02 Hrs</b>

## **BT CT 1.4 - CELL BIOLOGY AND GENETICS**

**50 Hrs**

### **Unit 1**

**Cell Theory and the cell:** The cell theory, Organization of Prokaryotic and Eukaryotic cells, plasma membrane – organization, present model and functions, Mechanisms of membrane transport.

**05 Hrs**

### **Unit 2**

**Cell organelles:** Structure and functions of Endoplasmic reticulum, Golgi complex, Mitochondria, Chloroplast, Ribosome, Lysosomes and Peroxisomes.

**Nucleus:** Microscopic and submicroscopic organization, structure and functions of nuclear membrane, Ultrastructure of Nucleolus.

**08 Hrs**

### **Unit 3**

**Eukaryotic chromosome:** Chromatin, nucleosome structure, chromosome model, centromeric DNA, organization of telomere. Laws of DNA consistency and C-value paradox, Heterochromatin and its significance, Special types of chromosomes-B chromosomes, polytene and lampbrush chromosomes, sex chromosomes and sex determination, karyotyping.

**08 Hrs**

### **Unit 4**

**Cell division:** Mitotic apparatus, cytokinesis, chromosome movement. Regulation of eukaryotic cell cycle-overview of cell cycle, cyclin and cyclin dependent kinases, molecular mechanism of regulating mitotic events. Cell cycle control in mammalian cells, Mutation causing loss of cell cycle control. Meiotic process- stages, Chromosome pairing, Chiasma formation, molecular mechanism of recombination, synaptonemal complex, recombination nodules and holiday junction, model of recombination.

**08 Hrs**

### **Unit 5**

**Numerical changes in chromosomes:** Euploidy, haploidy their fundamentals and practical significance. Polyploidy-Types induction genetic significance, Aneuploidy-Types and genetics significance.

**04Hrs**

#### **Unit 6**

**Principles of Heredity:** Introduction, concepts and theories of Mendelian genetics, chromosomal theory of inheritance, extra chromosomal inheritance and interaction of genes.

**03 Hrs**

#### **Unit 7**

**Genome Organization and Structural Analysis of Gene:** Organization of *E coli* Genome- Functional classes of predicted genes common features of the genome of Achaea and eukaryotes, genome size and organization in yeast, *Arabidopsis*, *C. elegans* and *Drosophila*. Bar-locus complex loci and Pseudoalleles complementation, fine structure of rII locus, split genes and overlapping genes.

**04 Hrs**

#### **Unit 8**

**Linkage and Crossing Over:** Introduction to linkage, gene mapping in eukaryotes, sex linked inheritance, genetic control of chromosome pairing and molecular mechanism of crossing over, gene conversion.

**02 Hrs**

#### **Unit 9**

**Sex Determination and Dosage Compensation:** Sex determination in *Drosophila* and mammals, Secondary sex determination in mammals, Dosage compensation in *Drosophila* and mammals.

**02Hrs**

#### **Unit 10**

**Mutation:** Mutation and their types. Base pair and frame shift mutation, genetic suppression. Luria-Delbruck fluctuation test. Use of base analogs, alkylating agents and ionizing radiations to induce mutagenesis and their mechanism.

Molecular basis of mutation – spontaneous and induced mutation and their role in evolution.

Detection of mutation by Ames's test.

Chloroplast mutations in *Chlamydomonas*, variations in mirabilis, Mitochondrial mutations in yeast and *Neurospora*. Human diseases caused by mutations in mitochondrial genome.

04 Hrs

## Unit 11

**Population Genetics:** Gene pools, allele frequencies, Hardy Weinberg equation, non-random breeding, genetic drift, gene flow, selection, speciation.

02 Hrs

## PRACTICALS

### BTCP 1.8 Based on BTCT-1.4-Cell Biology and Genetics

1. Micrometry: Calibration and measurement of Onion epidermal cells yeast and spores.
2. Study of Mitosis using onion root tips.
3. Study of Meiosis using grasshopper testis or Onion flower buds.
4. Buccal epithelial smear for study of Barr bodies.
5. Differential counting of WBC's using blood smear.
6. Culture and maintenance of *Drosophila melanogaster* cultures.
7. Mounting of Salivary gland chromosomes from *Drosophila* larvae.
8. Study of Auxotrophic mutants using replica plate technique.
9. Isolation and vital Staining of Mitochondria
10. Isolation of Chloroplast by density gradient method.
11. Isolation of protoplasts by osmotic/enzymatic method.
12. Karyotype analysis in humans: Normal: Male and Female, Abnormal: Down syndrome, Turner, Cri Du chat and Klinefelter's Syndrome.

## **BIOTECHNOLOGY SECOND SEMESTER SYLLABUS**

### **FROM 2019-20 ONWARDS**

#### **BTCT 2.1- MOLECULAR BIOLOGY, BIOINFORMATICS AND BIOSTATICS**

##### **Unit 1**

**Organization of genetic material:** Genome organization in viruses, bacteria and eukaryotes. Interrupted genes, gene clusters, structure of nucleosome, chromatin and chromosome.

**03Hrs**

##### **Unit 2**

**Structural Polymorphism of DNA:** DNA Structure A, Band Z DNA, Super coiled DNA and DNA Binding Proteins,

**DNA viruses:** Double stranded (Pox virus and SV40 virus) and single stranded DNA viruses.

**Replication:** Rolling circle replication, semi-conservative replication, replication fork-leading and lagging strands, enzymes involved at different steps of replication.

Folded fiber model of *E. coli* chromosome, split genes, over-lapping genes, DNA amplification, the law of DNA constancy and C-value paradox. Structure, types and replication of RNA virus

**07Hrs**

##### **Unit 3**

**Transcription:** DNA Binding Proteins, Classes of RNA Molecules and RNA Polymerases, Prokaryotic and Eukaryotic transcription, Post transcription modification – mRNA processing, 5-capping, 3-polyadenylation, Splicing Mechanisms, rRNA and tRNA processing.

**03Hrs**

##### **Unit 4**

**Translation:** Genetic code and wobble hypothesis, tRNA and the Aminoacyl-tRNA synthetases, Clover leaf structure of tRNA prokaryotic and Eukaryotic translation machinery, Ribosomes, Mechanism of prokaryotic and eukaryotic transcription, Post translational modification of proteins, inhibitors of protein translation.

**03Hrs**

## **Unit 5**

**Gene as a Unit of Mutation:** Mutation, mutagens and types of Mutations, Molecular basis of spontaneous and induced mutations and their role in evolution. Transposon and site directed mutagenesis, environmental mutagenesis and toxicity testing, Hot spots, AME's Test, Comet Assay.

**03Hrs**

## **Unit 6**

**Computer Science:** Computer Architecture, Internal and External devices, computer software,

**Operating system:** Windows, UNIX (Ubuntu), LINUX, Macintosh, application software's like word processor, formatting the document, tables, mail merge and spell check. Spread sheets basics with MS Excel, labels, MS Power point, MS access

**Computer Viruses:** Overview and prevention

**Computer network:** Advantages of Networks, Types of Network (LAN & WAN) WIFI. Internet protocol (TCP/IP) File transfer protocols (FTP) WWW, HTTP. Etc., Cloud computing.

**07Hrs**

## **Unit 7**

**Programming** : Algorithm and flow chart, C and C++ programming, structure of C programme, Header file, Global declaration, Main function, variable declaration, control statement, conditional looping and unconditional control statement hub functions.

**03 Hrs**

## **Unit 8**

**Introduction to Bioinformatics:** Introduction to Biological Databases - Types of databases (Primary, secondary and complex databases), Bioinformatics platforms: NCBI, DDBJ EMBL, PUBMED. Nucleic Acid Sequence databases, Protein sequence database; Genomics, Transcriptomics, Proteomics and Metabolomics, PDB retrieval, Database visualization, Accessing bibliographic database, Integrated Information Retrieval, Extra 2 system. Bioinformatics softwares: Schrodinger, IMAGE J.

**04 Hrs**

## **Unit 9**

**Sequence alignment and phylogenetic:**

**Pair wise sequence alignment:** e.g. BLAST, FASTA & CONTIG sequences

**Multiple Sequence Alignment:** e.g. Clustal W & Clustal X,

Phylogenetic analysis with reference to nucleic acids –PHYLIP, MEGA and NTYSIS (3D &2D)

**Primer designing:** Primer 3, applied biosystems,

**03Hrs**

## **Unit 10**

**Structural biology:** Modeling, Protein secondary structure prediction – Chou Fasman rules –neural networks discriminant analysis, Prediction of trans-membrane segments in membrane proteins. Protein 3D structure prediction homology - identification of active sites/pockets, threading potential energy functions – energy minimization molecular dynamics simulated annealing.

b) Drug Design and discovery, steps in drug discovery, ADME, Lead identification, QSAR.

**04Hrs**

## **Unit 11**

**Commercial application of bioinformatics:** Definition, genome technology, High throughput sequencing and assembly. Genomics in medicine, Disease monitoring, profiles for therapeutic molecular targeting. Diagnostics, drug discovery and genomics, Gene evolution, Comparative proteomics and its applications, IPR and Bioinformatics patents

**03Hrs**

## **Unit 12**

### **Biostatistics:**

1. Organization, description and graphical representation of data.
2. Summary measures of – Central tendency (mean, mode, median), dispersion (Standard Deviation, Standard error) correlation (2-D, 3-D, Pearson, R value, Heatmap) and regression Chi square tests, tests of significance (t test, P-value, F, ANOVA).
3. Statistical softwares: MS Excel, MS access, Statistica, SPSS, Graph pad.

**07Hrs**

## **PRACTICALS**

### **BT CP 2.5 Based on BT CT 2.1 Molecular Biology, Bioinformatics and Biostatistics**

1. Isolation and estimation of DNA, RNA and plasmids.
2. Inheritance and pedigree analysis of simple Mendelian traits.

3. Induction and study of physical and chemical mutagens in bacteria/fungi
4. RFLP and RAPD analysis.
5. Demonstration of Southern blotting / Northern blotting/Western blot
6. Basic computer operations, Internet and its applications.
7. Programming in 'C'.
8. Virtual library – Bibliographic searches.
9. Sequence retrieval from nucleic acid and protein database.
10. Pair-wise comparison of sequences. (BLAST & FASTA)
11. Multiple sequence alignment.
12. Phylogenetic analysis
13. Primer designing.
14. Measures of Mean, Mode, Median, Central Tendency, Chi, Square Tests, t-test.
15. Organization, description and graphical representation of data
16. Mandatory visit to research institute/ Biotech industries

<b>Program code with title</b>	<b>BT CT 2.1- - MOLECULAR BIOLOGY, BIOINFORMATICS AND BIOSTATICS</b>	
<b>Units</b>	<b>Course Outcome</b>	<b>No of hours</b>
<b>Unit 1</b>	<b>Organization of genetic material:</b> Students will get to know the organization of genetic material.	<b>03Hrs</b>
<b>Unit 2</b>	<b>Structural Polymorphism of DNA</b> Students will get the details regarding different forms of DNA and replication.	<b>07Hrs</b>
<b>Unit 3</b>	<b>Transcription:</b> Students will familiarize with the DNA binding proteins and transcription machinery.	<b>03Hrs</b>
<b>Unit 4</b>	<b>Translation:</b> Students will learn about the genetic code translation and post translation modifications.	<b>03Hrs</b>
<b>Unit 5</b>	<b>Gene as a Unit of Mutation:</b> Students will learn about the different types of mutation transposans and AMe,S test	<b>03Hrs</b>
<b>Unit 6</b>	<b>Computer Science:</b> Students will learn about the basic concept of operating systems, different type of computer network and different type of viruses.	<b>07Hrs</b>
<b>Unit 7</b>	<b>Programming</b> : Students will learn about the Algorithm and flow chart and different programming languages.	<b>03Hrs</b>

<b>Unit 8</b>	<b>Introduction to Bioinformatics:</b> : Students will learn about the different Biological Databases and biological platforms.	<b>04Hrs</b>
<b>Unit 9</b>	<b>Sequence alignment and phylogenetic:</b> Students will learn about the different sequence alignment tools and about phylogenetic sequences.	<b>03Hrs</b>
<b>Unit 10</b>	<b>Structural biology</b> Students will learn about the modeling and structural prediction databases.	<b>04Hrs</b>
<b>Unit 11</b>	<b>Commercial application of bioinformatics:</b> Students will learn about the Comparative proteomics and its applications, IPR and Bioinformatics patents.	<b>03Hrs</b>

## **BT CT 2.2 – IMMUNOLOGY AND IMMUNOTECHNOLOGY**

**50 Hrs**

### **Unit 1**

**Immunology:** Fundamental concepts and anatomy of the immune system, History and scope of immunology, cells involved in immune system – T-lymphocytes, B-lymphocytes, Monocytes, Macrophages, APC, Neutrophils, Mast cells, Types of immunity-Adaptive immunity, Innate immunity, Components of Innate and Acquired immunity; Phagocytosis, Complement and Inflammatory responses, Haematopoiesis, Organs of the immune system- primary and secondary lymphoid organs, Lymphatic system, Lymphocyte circulation, Lymphocyte homing, Mucosal and Cutaneous associated Lymphoid tissue (MALT&CALT).

**08 Hrs**

### **Unit 2**

**Antigen:** Concept of haptens, determinants, conditions of antigenicity, antigens and immunogenicity, super-antigen. Self and non-self-recognition, epitopes mapping, paratopes, nature of B-cell and T – cell epitopes, haptens, carbohydrate antigens, blood group antigens, synthetic peptides as antigens.

**Immunoglobulin:** Structure and properties of immunoglobulin classes, Theories of antibody formation, Multiple myelomas and structural basis of antibody diversity, Freund's adjuvants and its significance.

**05Hrs**

### **Unit 3**

**Antigen-antibody Interaction and Immunotechniques:** Agglutination, Precipitation, Affinity, avidity and cross reactivity, Immuno double- diffusion, single radial immunodiffusion, Haemagglutination and Complement fixation, Direct and Indirect Immunofluorescence.

**05 Hrs**

### **Unit 4**

**Immunodiagnosics:** Anti-microbial immunity: a general scheme, Defense against bacteria, viruses, fungi and parasites, Immunodiagnosics in virology – Serological methods for detection and quantitation of viruses including Hepatitis, Influenza, HIV and others.

**04 Hrs**

### **Unit 5**

**Immunotechniques and applications:** Immuno-assays: SRID, ELISA, ELISA-PCR, RIA, Western Blotting, Immunofluorescence and their application. Immune deficiencies and autoimmunity, Immunoelectrophoresis, Flow cytometry, Immunoblot, Complement fixation test (CFT), Montoux test, Applications of these methods in diagnosis of Microbial infections.

**05Hrs**

## **Unit 6**

**Expressions and Regulation of Immune Response:** Regulation of immune response, Antigen processing and presentation, generation of humoral and cell mediated immune response, activation of B and T lymphocytes, cytokines and their role in Immune regulation, T cell regulation, MHC complex restriction, Immunological tolerance.

**04 Hrs**

## **Unit 7**

**Hypersensitivity reactions:** Allergy, Type I- Anaphylaxis, Type II- Antibody dependent cell cytotoxicity and Type III- Immune complex mediated reactions, Type IV- delayed type hypersensitivity. Symptoms and Immunological methods of diagnosis of hypersensitive reactions,

Lymphokines and cytokines—Assay methods, Immunological tolerance and modulation

**04 Hrs**

## **Unit 8**

**Transplantation immunology:** Structure and functions of MHC and the HLA systems, types of grafts, grafts rejection, GVH reactions, mechanism of graft rejection and prevention of graft rejection. Gene regulation and Ir-genes; HLA and tissue transplantation – Tissue typing methods for transplantations in humans; graft versus host reaction and rejection, Xeno-transplantation, (inter species, intra Species, Intra Genus) immunosuppressive therapy,

**04 Hrs**

## **Unit 9**

**Tumor immunology:** Tumor specific antigens, Immune response to tumors, Theory of surveillance, Immunodiagnosis of tumors – detection of tumor markers – Alpha-fetoprotein, Carcino-embryonic antigen, Cancer therapeutics.

**04 Hrs**

## **Unit 10**

**Immunization & Vaccine technology and recombinant vaccines :** Common immunization practice, types of vaccines and its application, edible vaccines, conventional vaccines, viral vaccines, bacterial vaccines, peptide vaccines, genetically engineered vaccines, Hybridoma technology, immunization of animals Isolation of stimulated spleen cells, myeloma cell lines used and fusion partners, Fusion method production, detection and applications of monoclonal and polyclonal antibodies, production and application of Lymphokines.

**05 Hrs**

## **Unit 11**

**Cytokines:** Structure and receptors, signal transduction, modulation of immune response cytokine profile of diseases.

**02Hr**

## **PRACTICALS**

### **BT CP 2.6 BASED ON BT CT 2.2 – IMMUNOLOGY AND IMMUNOTECHNOLOGY**

1. Blood film preparation and identification of cells, WBC and RBC count
2. Determination of Blood groups and Rh factor.
3. Estimation of Hemoglobin.
4. Demonstration of antigen administration to animals Mice / Rat.(Intra-muscular, Intra- veinal, Intra-peritoneal)
5. Determination of Bleeding Time (BT) and Clotting Time (CT).
6. Separation of Serum / Plasma from whole blood, Electrophoretic separation of serum proteins/plasma
7. Precipitation of Immunoglobulins from serum by Ammonium sulphate precipitation.
8. Agglutination tests (Haemagglutination, Latex agglutination, Bacterial agglutination).
9. Immunoprecipitation tests – Radial Immunodiffusion test / Ochterlony double diffusion test.
10. Demonstration of ELISA
11. Demonstration of Western blot.
12. Identification of Bacteria by Using Fluorescent Ab Technique (FAT)
13. Determination of antibody titer of the serum.
14. Immunoelectrophoresis – Rocket Immunoelectrophoresis.
15. Demonstration of Agglutination Reaction of Unknown Bacterial Culture by Slide Agglutination Technique

<b>Program code with title</b>	<b><u>BT CT 2.2- - IMMUNOLOGY AND IMMUNOTECHNOLOGY</u></b>	
<b>Units</b>	<b>Course Outcome</b>	<b>No of hours</b>
<b>Unit 1</b>	<b>Immunology</b> Students will get to know the fundamental concepts and cells involved in immunology.	<b>08Hrs</b>
<b>Unit 2</b>	<b>Antigen:</b> Students will get the details regarding epitopes, antigens and super antigens and also about immunoglobulins.	<b>05Hrs</b>
<b>Unit 3</b>	<b>Antigen-antibody Interaction and Immunotechniques:</b> Students will familiarize with the different type of antigen antibody interactions and its applications.	<b>05Hrs</b>
<b>Unit 4</b>	<b>Immunodiagnostics:</b> Students will learn about the different Serological methods for detection and quantization of viral diseases.	<b>05Hrs</b>
<b>Unit 5</b>	<b>Immunotechniques and applications:</b> : Students will learn about the different immunotechniques and applications of these methods in diagnosis of Microbial infections	<b>05Hrs</b>

<b>Unit 6</b>	<b>Expressions and Regulation of Immune Response::</b> Students will learn about the regulation of immune response and immune tolerance and MHC cells.	<b>04Hrs</b>
<b>Unit 7</b>	<b>Hypersensitivity reactions:</b> Students will learn about the different types of hypersensitivity reactions.	<b>03Hrs</b>
<b>Unit 8</b>	<b>Transplantation immunology:</b> Students will learn about the different types of transplantation.	<b>04Hrs</b>
<b>Unit 9</b>	<b>Tumor immunology</b> Students will learn about the different mechanism of tumor formation and tumor antigens.	<b>04Hrs</b>
<b>Unit 10</b>	<b>Immunization &amp; Vaccine technology and recombinant vaccines:</b> Students will learn about the different methods of immunization and also about the different types of vaccines.	<b>05Hrs</b>
<b>Unit 11</b>	<b>Cytokines</b> Students will learn about the different types of cytokines and receptors.	<b>02Hrs</b>

## **BTCT – 2.3 ENZYMOLOGY AND METABOLISM**

**50 Hrs**

### **Unit 1**

**Bioenergetics:** Thermodynamics– laws of thermodynamics, Gibbs free energy, endergonic & exergonic reactions. ATP-Structure, organization of respiratory electron transport system, mechanism of oxidative phosphorylation biological energy transducers, chemo-osmotic generation of ATP, High energy compounds.

Introduction to Metabolism- Catabolism, anabolism, catabolic, anabolic and amphibolic pathways

**06 Hrs**

### **Unit 2**

**Enzymes:** Definition, structure, properties and classification of enzymes, Co-factors and Co-enzymes, Kinetics of enzyme catalyzed reactions. Michaelis –Menten equation  $K_M$  and  $V_{max}$ , single substrate and double substrate reactions. Lineweaver and Burk modification, enzyme kinetics and enzyme inhibitory kinetics (competitive, uncompetitive, noncompetitive and mixed inhibitions and determination of  $K_i$ )

**Mechanism of enzyme action:** Induced fit hypothesis nature of catalysis, mechanism of lysozyme action.

**Enzyme regulation:** Covalent and Allosteric regulation activation and inhibition of enzyme activity and isoenzymes, ribozymes and abzymes.

**08 Hrs**

### **Unit 3**

**Carbohydrate Metabolism:** Sources of carbohydrates, enzymatic conversion of metabolites as glucose and fructose, Introduction, aerobic and anaerobic pathways, brief account of glycolysis, Kreb's cycle, Glyoxylate cycle, Gluconeogenesis, Pentose phosphate pathway (HMP shunt) & its regulation, Glycogenolysis and Glycogenesis, Substrate level phosphorylation, rate controlling steps and regulation of the metabolic pathways.

**08 Hrs**

### **Unit 4**

**Metabolism of lipids:** Beta-oxidation of saturated, unsaturated and branched chain fatty acids. Peroxisomal beta- oxidation, alpha and omega oxidation Biosynthesis of fatty acids, biosynthesis of long chain fatty acids and branched chain fatty acids, desaturation. Biosynthesis of phospholipids De novo pathway and inter conversion, cholesterol biosynthesis and regulation.

**06 Hrs**

### **Unit 5**

**Metabolism of Amino acids and proteins:** Synthesis of amino acid and their catabolism (Deamination, Decarboxylation, Transamination and Reductive transamination), Hydrolysis of proteins, proteases. Co-ordinated control of amino acid metabolism, formation of Ammonia and urea.

**04 Hrs**

### **Unit 6**

**Nucleotide metabolism:** Pathway for degradation of purines and pyrimidines, de-novo biosynthetic pathway of ribonucleotides, Salvage pathways and related disorders, biosynthesis of deoxyribonucleotides. Regulation of degradation and biosynthesis.

**04 Hrs**

### **Unit 8**

**Photosynthesis:** Chemistry and components of photosystems, absorption spectrum and active spectrum, Cyt-b, Cyt-f complex, ATP synthesis, pigments involved in photosynthesis, Chlorophyll a, Chlorophyll b, Bacterio-chlorophyll, Bacterio-rhodopsin, mechanism of light reaction and carbon fixation, C3, C4 and CAM pathways, Photorespiration and its impact in bacterial photosynthesis.

**04 Hrs**

### **Unit 9**

**Signal transduction:** Inter and Intra cellular signaling, signaling molecules–proteins and non-protein signals, signal synthesis, release and transport. Target cells and tissues, signal receptors, distribution and interaction between the signal transduction and the mechanism of transduction

Role of secondary messengers, such as Calcium, cAMP, cGMP, Phosphatidyl inositol, phosphate  
A General view of plant signals, phytohormones and their mechanisms

**06 Hrs**

## **Unit 10**

**Biochemistry of Hormones:** Biosynthesis and regulation of hormones, mechanisms of hormone transduction, Cell-cell transport of hormones, Hormone receptors, signal component receptors.

**04 Hrs**

## **PRACTICALS**

### **BT CP 2.7 Based on BT CT 2.3 Enzymology and Metabolism.**

1. Qualitative and quantitative analysis of carbohydrates / proteins / amino acids / lipids.
2. Estimation of Chlorophyll.
3. Determination of pKa of proteins and amino acids.
4. Purification of enzymes/proteins using ammonium sulphate, pH precipitation and organic solvent methods.
5. Isolation of enzymes from different biological sources (bacterial / fungal / plant / animal cells).
6. Effect of substrate concentration, temperature and pH on enzyme activity.
7. Study of enzyme kinetics—effect of inhibitors, Determination of  $K_m$ ,  $V_{max}$  and  $K_i$  of competitive and noncompetitive inhibitor.
8. Isolation of  $\alpha$ -amylase from sweet potato, assay of enzyme activity and specific activity.
9. Isolation of protease from papaya, assay of enzyme activity and specific activity
10. Enzyme assay-Trypsin, Urease and Phosphatase.
11. Immobilization of enzymes.
12. Estimation of urea, creatine and Creatinine

Program code with title	<b><u>BTCT – 2.3 ENZYMOLOGY AND METABOLISM</u></b>	
----------------------------	--	--

Units	Course Outcome	No of hours
Unit 1	<b>Bioenergetics:</b> Students will get to know the Thermodynamics– laws of thermodynamics, Metabolism- Catabolism, anabolism, catabolic, anabolic and amphibolic pathways.	08Hrs
Unit 2	<b>Enzymes:</b> Students will get the details regarding: Definition, structure, properties and classification of Michaelis –Menten equation Mechanism of enzyme action: Induced fit hypothesis nature of catalysis, mechanism of lysozyme action and Enzyme regulation:	05Hrs
Unit 3	<b>Carbohydrate Metabolism:</b> Students will familiarize with the. Sources of carbohydrates, , rate controlling steps and regulation of the metabolic pathways.	05Hrs
Unit 4	<b>Metabolism of lipids :</b> Students will learn about the : Biosynthesis of fatty acids, s De novo pathway and inter conversion, cholesterol biosynthesis and regulation.	05Hrs
Unit 5	<b>Metabolism of Amino acids and proteins:</b> Students will learn about the different Metabolism of Amino acids and proteins Synthesis of amino acid and their catabolism (	05Hrs
Unit 6	<b>Nucleotide metabolism:</b> Students will learn about the Pathway for degradation of purines and pyrimidines,. Regulation of degradation and biosynthesis.	04Hrs
Unit 7	<b>Photosynthesis:</b> Students will learn about the Chemistry and components of photo systems, Photorespiration and its impact in bacterial photosynthesis.	04Hrs
Unit 8	<b>Signal transduction:</b> Students will learn about the different types of <b>Inter</b> and Intra cellular signaling, signaling molecules–and the mechanism of	06Hrs

	transduction and also the Role of secondary messengers,	
<b>Unit 9</b>	<b>Biochemistry of Hormones:</b> Students will learn about Biochemistry of Hormones Biosynthesis and regulation and mechanisms of hormone transduction	<b>04Hrs</b>

#### BT ET 2.4 MOLECULAR CELL BIOLOGY

**50hrs**

##### **Unit 1**

**Basics of Cell biology:** Cell theory, Structure of Prokaryotic and Eukaryotic cells, Differences between Plant and Animal cells.

**03 Hrs**

##### **Unit 2**

**Cell Organelles and Cell Architecture:** Ultrastructure of Plasma Membrane, Different models of Plasma membrane structure. Ultrastructure and functions of cellular organelles: Nucleus, Chloroplast, Mitochondria, Endoplasmic Reticulum, Golgi bodies, Ribosomes, Lysosomes, Vacuoles and Centrosomes. Structure of microtubules, cilia, flagella and centrioles, Intermediate Filaments Actin and Myosin, functional role of actin filaments and motor proteins. Role of microtubules in intracellular movements.

**10Hrs**

##### **Unit 3**

**Chromosomal organization:** Molecular organization of eukaryotic chromosomes, Molecular features of telomeres, centromere, kinetochore, chromatin and heterochromatin. Mechanism and causes of chromosomal condensation and relaxation. Mutations, Chromosomal aberrations- deletions, duplications, translocation and inversion. Euploidy and Polyploidy.

**06 Hrs**

#### Unit 4

**Cell Cycle:** Cell cycle and division - mitosis, mitosis and meiosis, phases of cell cycle, DNA Replication, Transcription and Translation. Control system of Cell cycle and Checkpoints in cell cycle regulation,

**08 Hrs**

#### Unit 5

**Apoptosis:** Phenomenon of Apoptosis, Programmed cell death, Caspases, Apoptotic protease activating factor (APAF) mechanism of apoptosis at biochemical, cellular and gene level, Necrosis, factors regulating apoptotic death in normal cells and tumorous cells.

**08 Hrs**

#### Unit 6

**Developmental biology and Cell Differentiation:** Establishing multi-cellularity, formation of blastula, embryonic germ layer, tracking of migrating cells. Aggregation behavior in embryonic cells and possible understanding in the positional information on developing organs; Events during fertilization, post fertilization early embryonic development and in vitro fertilization, Roles of different proteins in fertilization and cellular differentiation, Stem cells and their differentiation application of Stem cells.

**10Hrs**

#### Unit 7

**Molecular biology of Cancer:** Characteristics of Cancer cells, The Genetic Basis of Cancer, Proto-onco genes and its regulation, Oncogenes, Viral Oncogenes, Regulation of gene expression and signal transduction in cancerous cells, cancer treatment.

**05 Hrs**

#### PRACTICALS

##### BT EP 2.8 Based on BTET 2.4 Molecular Cell Biology

1. Preparation of meiotic chromosomes using Haematoxylin
2. Isolation of mitochondrial DNA
3. Isolation of Chloroplast DNA
4. Preparation of Salivary gland chromosomes – *Drosophila melanogaster*
5. Biosafety and lab protocol
6. Micrometry and measurement of given biological sample
7. Fixation of plant and animal tissues, preparation of paraffin blocks and micrometry staining and microscopic observation.
8. Sub cellular fractionation and marker enzymes.
9. Cytological methods, chromosome counting and karyotype analysis.
10. Analysis of Polytene chromosomes, bar bodies and chromosomes.

11. Detection of cell apoptosis by Comet Assay.
12. Cytophotometric estimation of nuclear DNA.
13. Structural and numerical changes in chromosomes and chromosome banding

## **BIOTECHNOLOGY THIRD SEMESTER SYLLABUS**

### **FROM 2020-21 ONWARDS**

#### **BTCT 3.1 ANIMAL BIOTECHNOLOGY**

##### **Unit 1**

**Introduction to Tissue culture:** Definition, principle and significance of tissue culture. Equipment's and materials for animal cell culture technology. Maintenance of sterility and use of antibiotics, detection of Mycoplasma and viral contaminants, tissue culture media, natural, synthetic media and Sera, Sterilization of cell culture media and reagents, role of carbon dioxide in animal cell culture

**05 Hrs**

##### **Unit 2**

**Types of animal cell culture:** Primary and secondary cell culture, development of cell lines or established cultures. Biological characterization of cell cultures, contact inhibition, cell transformation, cancer cells, indefinite cell lines. Measurement of cell viability, cytotoxicity, Screening of cytotoxic compounds and its importance

**04 Hrs**

##### **Unit 3**

**Techniques of Animal cell culture:** *In-vitro*, Disaggregation of tissue and primary culture, subculture and establishment of cell line, Cloning and selection, Cell separation, Characterization, Differentiation, Transformation and immortalization, Quantification of cell culture. Scale-up and cell synchronization.

**04 Hrs**

##### **Unit 4**

**Stem cells and Tissue engineering:** Overview; self-renewal potential; differentiation versus stem cell renewal; trans-differentiation; cell cycle dynamics of different stem cells. Stem cell assays and protocols: Isolation of defined stem cell populations; Progenitor cell assays, sources of progenitor cells, cytokine and chemotherapy approaches to mobilization of progenitor cells.

**Stem cell Therapy:** Clinical applications of stem cell therapy; neurodegenerative diseases- Parkinson's disease, Alzheimers, spinal cord injury, other brain syndromes; tissue systems failures- diabetes,

cardiomyopathy, kidney failure, liver failure hemophilia, lymphoma and leukemic malignancies requiring stem cell therapy.

**Tissue Engineering:** Basic cell biology, cell-matrix interactions, receptor biology, tissue ablation, engineering angiogenesis, vascularization, material based immune therapy and skin, bone, liver, muscle tissue engineering.

**12 Hrs**

## **Unit 5**

**Animal reproductive system with reference to insects and mammals:** Organization, function, hormonal regulation of growth and reproduction in insects and mammals. Hormonal regulation of estrous cycle, menstrual cycle and pregnancy, IVF– embryo transfer technology in human and livestock. Mechanism of protein and steroid hormone action and importance of hormones as a biotechnological products.

**09 Hrs**

## **Unit 6**

**Hybridoma Technology:** Production of murine monoclonal antibodies (MAbs)-Fusion strategies, HAT Selection; Strategies for production of human MAbs-Humanization and antigenization of MAbs-Chimeric, CDR-grafted, SDR-grafted, veneered MAbs.

**03 Hrs**

## **Unit 7**

**Antibody Engineering:** Antibody fragments, Antibody gene cloning; Expression of recombinant antibody genes; Next generation display technologies for production of antibodies *in vitro*; combinatorial libraries and phage display libraries; Bio-specific and bi-functional antibodies; Immuno-conjugates; Catalytic antibodies.

**03 Hrs**

## **Unit 8**

**Polymeric Biomaterials:** Polyolefins, Polyamides, acrylic polymers, fluoro-carbon polymers, rubbers, thermoplastics. Physiochemical characteristics of biopolymers, biodegradable polymers for medical purposes, Synthetic polymeric membranes and their biological applications, Biopolymers in controlled release systems artificial skin. Dialysis membrane

**Composite Biomaterials:** Properties, classification and Applications of Composite Biomaterials in fabrication of bio-devices and implants. Applications of biomaterials in Drug delivery systems

**05 Hrs**

#### **Unit 9**

**Gene therapy:** Types of genetic diseases targeted for gene therapy. Human genome project and its applications

**02 Hrs**

#### **Unit 10**

The legal and socio-economic impact of biotechnology at national and international levels, public awareness, Biosafety regulations, guidelines for research in transgenic animals, public awareness of the processes of producing transgenic organisms.

**03 Hrs**

#### **PRACTICALS**

##### **BT CP 3.5 Based on BT CT 3.1 Animal Biotechnology**

1. Rearing, Maintenance and safety of laboratory animals – Rat/ Mouse/ Silkworm.
2. Preparation of animal cell culture media(Natural and Synthetic)
3. Viability test and Cell counting (Trypan Blue Staining)
4. Disaggregation of animal tissue by trypsinization
5. Studies on the Estrous cycle
6. Sperm counting and Sperm viability
7. Demonstration of techniques involved in Ovaryectomy, Orchiectomy, Adrenalectomy and Hysterectomy in mice/rat
8. Isolation of DNA from animal tissues
9. Isolation of Bovine Serum Albumin (BSA)
10. Demonstration of Cryo-preservation of animal cells.
11. Estimation of Cholesterol
12. Comet assay of blood sample
13. MTT assay for Cytotoxicity
14. Developmental stages of chick embryo
15. Initiation of primary culture from chick embryo
16. Visit Research institute to veterinary institute and IVF center.

<b>Program code with title</b>	<b><u>BTCT 3.1 ANIMAL BIOTECHNOLOGY</u></b>	
<b>Units</b>	<b>Course Outcome</b>	<b>No of hours</b>
<b>Unit 1</b>	<b>Introduction to Tissue culture::</b> Students will get to know the fundamental of Tissue culture role of nutrients in animal cell culture	<b>05 Hrs</b>
<b>Unit 2</b>	<b>Types of animal cell culture:</b> Students will get the details regarding cell culture, cell lines Biological characterization of cell cultures and. Measurement of cell viability assay and its importance	<b>04 Hrs</b>
<b>Unit 3</b>	<b>Techniques of Animal cell culture:</b> Students will familiarize with, Cell separation, Characterization, and . Scale-up and cell synchronization.	<b>04 Hrs</b>
<b>Unit 4</b>	<b>Stem cells and Tissue engineering:</b> Students will learn about <b>Stem</b> cells and Tissue engineering, Stem cell Therapy Clinical applications of stem cell therapy and basics of Tissue Engineering.	<b>12Hrs</b>
<b>Unit 5</b>	<b>Animal reproductive system with reference to insects and mammals:</b> Students will learn about the concept of, hormonal regulation, IVF– embryo transfer technology in human and livestock. Mechanism of protein and steroid hormone action and importance of hormones as biotechnological products.	<b>09Hrs</b>

<b>Unit 6</b>	<b>Hybridoma Technology:</b> students will learn about the Production of monoclonal antibodies (MAbs)-Fusion strategies,	<b>03Hrs</b>
<b>Unit 7</b>	<b>Antibody Engineering:</b> Students will Antibody gene cloning technologies for production of antibodies.	<b>03Hrs</b>
<b>Unit 8</b>	<b>Polymeric Biomaterials:</b> Students will get to know about biopolymers, Composite Biomaterials: Properties,. Applications of biomaterials in Drug delivery systems	<b>05Hrs</b>
<b>Unit-9</b>	<b>Gene therapy:</b> : Students will get to know about genetic diseases gene therapy. Human genome project and its applications	<b>02Hrs</b>
<b>Unit 10</b>	<b>Socio-economic impact of biotechnology:</b> Students will learn Biosafety regulations, guidelines for research in transgenic animals	<b>03 Hrs</b>

### **BT CT 3.2 – ENVIRONMENTAL BIOTECHNOLOGY AND BIODIVERSITY**

**50 Hrs**

#### **Unit 1**

Meaning, Scope and Concept of Environment and Environmental pollution

**02 Hrs**

#### **Unit 2**

**Aerobiology:** Air Ssampling techniques, Identification of airborne Bio-particles, Sources and characteristics of air pollutants, health hazards due to air pollution. Air borne diseases and controlling measures of air pollution

**06 Hrs**

#### **Unit 3**

**Soil biology:** Classification of soil based on physical and chemical characteristics, Microorganisms in various soil types. Soil pollution – sources and characteristics of soil pollutants, health hazards due to soil pollution, control measures of soil pollution

Interaction among soil microbes-mutualism, commensalisms, amensalism, parasitism, predation, competition, antibiosis and their significance Interrelationship between microbes, plant and soil Brief account on rhizosphere, Phyllosphere and Sphermoshere, Symbiotic and non-symbiotic association with

higher plants, role of enzymes of microbial origin in the release of plant nutrients

08 Hrs

#### Unit 4

**Water Ecosystem:** Fresh water and marine water ecosystems, Zonation of water ecosystem, water pollution-sources, and characteristics of water pollution and health hazards due to water pollution, eutrophication. Biological indicators of water pollution - Chemical, Microbiological and Biotechnological indicators Water purifications Brief account on water borne diseases and control measures

08 Hrs

#### Unit 5

**Waste Treatment:** Solid and Liquids wastes and their Characterization Physical, chemical and biological methods of solid waste treatment Saccharification, Gasification, Composting and wastewater recycling-chlorination, Ozonization, radiation, filtrations, reverse osmosis. Effluent treatment - (Dairy, Distillery, Tannery, Textile, Paper and sugar industries) Physical, chemical and biological sewage treatment-Trickling filters, oxidation pond, ditch and activated sludge treatment. Advanced waste water treatment-Rotating Biological Contactors (RBC), submerged aerobic filters, fluidized bed reactors, biological aerated flooded system and combination of anaerobic, denitrification and aerobic treatment of wastewater. Advanced activated sludge process.

08 Hrs

#### Unit 6

**Bioremediation:** Concepts and principles, *Insitu* and *Exsitu* Bioremediation and Phytoremediation. Biodegradation of pesticides and Xenobiotics (Halocarbons, C-1 compounds, aliphatic hydrocarbons, acyclic hydrocarbons, Aromatic hydrocarbons, polycyclic Hydrocarbons, Halogenated compounds) in soil and their influence on soil micro flora Biodegradation of natural polymers-Cellulose, Lignin, Pectin, Chitin Detergents, soaps and plastics. Bio-deterioration of paper, Leather, Wood, Textiles Mode of Deterioration and organisms involved. Bio-leaching, Bio-mining, and Production of Oils and fuels from wooden-waste.

05 Hrs

#### Unit 7

**Environmental Education:** Agrochemicals, Global Warming, Ozone depletion, Greenhouse effect, acid rain their impact and biotechnological approaches in the environment.

03 Hrs

## Unit 8

**Biodiversity and its conservation:** Current levels of biodiversity, extinction and endangered species, reasons of concern for loss of biodiversity, steps to preserve biodiversity, *In-situ* and *Ex-situ* conservation, gene banks, convention on biological diversity, Species conservation

04 Hrs

## Unit 9

Biological control and Integrated Pest Management (IPM)

03 Hrs

## Unit 10

Bioenergy: Biofuels, bio-ethanol, biodiesel, biogas, bio-hydrogen, Algal Biotechnology for Bio-energy, byproducts of sugar industries, Bioethanol,

03 Hrs

## PRACTICALS

### BT CP 3.6 Based on BT CT 3.2 Environmental Biotechnology and Biodiversity

1. Detection of coliforms for determination of purity of potable water samples by MPN method
2. Determination of DO, BOD, COD and TDS of water samples
3. Isolation of Bacteriophages from sewage water samples
4. Study of microflora of industrial waste and effluents
5. Selective enrichment of auxotrophic and antibiotic ( $\text{Tet}^R/\text{Ref}^R$ ) mutants
6. Isolation of DNA from environmental samples
7. Isolation of Xenobiotic degrading bacteria by selective enrichment technique
8. Isolation of plasmids for degradation of polluted environment.
9. Study of effect of heavy metals on crop plants.
10. Study on Biogenic methane production
11. Estimation of Phosphate, sulphates, Nitrates, major cat ions ( $\text{Na}^+$ ,  $\text{K}^+$ ,  $\text{Mg}^{++}$  and  $\text{Ca}^{++}$ ) and heavy metals in water samples
12. Effect of industrial effluents/ heavy metals on seed germination and seedling growth
13. Field excursion to an industrial area to assess environmental impact
14. Isolation and determination of Iron and Manganese reducing bacteria
15. Effect of herbicides (Glyphosate and 2, 4, - D) on chlorophyll content

<b>Units</b>	<b>Course Outcome</b>	<b>No of hours</b>
<b>Unit 1</b>	<b>Scope of Environment :</b> Students will understand the Meaning, Scope and Concept of Environment and Environmental pollution	<b>02 Hrs</b>
<b>Unit 2</b>	<b>Aerobiology:</b> Students will learn different Air sampling techniques,. Air borne diseases and controlling measures of air pollution	<b>06Hrs</b>
<b>Unit 3</b>	<b>Soil biology:</b> Students will learn properties of soil, characteristics of soil pollutants and control measures of soil pollution. Students will also understand about the different types of interaction between soil and microbes.	<b>08Hrs</b>
<b>Unit 4</b>	<b>Water Ecosystem:</b> Students will learn about different water ecosystems and also about Biological indicators of water. Students will get to know about water borne diseases and control measures.	<b>08Hrs</b>
<b>Unit 5</b>	<b>Waste Treatment:</b> Students will learn about Characterization of waste and its treatment.	<b>08Hrs</b>
<b>Unit 6</b>	<b>Bioremediation:</b> Students will familiarize with Concepts and principles of Bioremediation and also about Bio-leaching, Bio-mining.	<b>05Hrs</b>

<b>Unit 7</b>	<b>Unit 7</b> <b>Environmental Education:</b> Students will understand the consequences of Global Warming and their impact and biotechnological approaches in the environment.	<b>03Hrs</b>
<b>Unit 8</b>	<b>Biodiversity and its conservation:</b> Students will understand the importance of biodiversity and different methods for their conservation.	<b>04Hrs</b>
<b>Unit-9</b>	<b>Biological control :</b> Students will understand the concepts of Integrated Pest Management (IPM).	<b>03Hrs</b>
<b>Unit 10</b>	<b>Bioenergy:</b> Students will get to know the Biofuels, and Bio-energy, byproducts.	<b>03Hrs</b>

### **BT CT 3.3 – BIOPROCESS ENGINEERING AND TECHNOLOGY**

**50 Hrs**

#### **Unit 1**

**Introduction to Bioprocess Engineering:** Chronological development of fermentation industry, Industrial processes-Microbial biomass, Microbial metabolites, Recombinant products, Transformation process Isolation, Screening, Selection, Preservation and Maintenance of industrial important microorganisms.

**03 Hrs**

#### **Unit 2**

**Fermentation Technology:** Types of fermentation process, Solid-state fermentation, Liquid state fermentation, analysis of batch, fed batch and continuous bio-reactions. Stability of microbial reactors, analysis of mixed microbial population, Measurement and control of bio-process parameters

**04 Hrs**

#### **Unit 3**

**Bioreactors:** Basic design and function of a Bioreactor, body construction, aeration and agitation, attainment and maintenance of aseptic conditions, sterilization of Bioreactor. Ports for nutrients and inoculum, sampling, types of valves, Types of bioreactors: Specialized bioreactors– Tubular bioreactors, membrane bioreactors, Tower bioreactors, fluidized bed reactor, packed bed reactor and photo-bioreactors.

**05 Hrs**

#### **Unit 4**

**Bioprocess Development:** Upstream processing-Media Natural media, synthetic media and typical media. Media formulation strategies, sources of Carbon, Nitrogen, Vitamins and minerals Role of buffers, precursors, inhibitors, inducers and antifoam agents, Microbial growth kinetics, Specific growth rate. Monod equation, Strain improvement, Inoculum development for bacterial and fungal processes

**05 Hrs**

#### **Unit 5**

**Sterilization and Fermentation Process controls:** Midstream processing-Sterilization of fermentor, Media, feeds, air and filter sterilization, Method of batch sterilization and continuous sterilization process. Methods of measuring process Variables. Online Analysis and Control systems.Computer applications in fermentation technology.

**04 Hrs**

#### **Unit 6**

**Downstream Processing:** Objectives and criteria, removal of microbial cells and solid matter, Cell disruptions, foam precipitation, filtration, centrifugation, liquid-liquid extraction, chromatography, TFF membrane process, drying, crystallization, packaging. Quality control and quality assurance, Effluent treatment, DOC, COD and disposal.

**06 Hrs**

#### **Unit 7**

**Immobilization:** Definition and concepts of immobilization, enzyme and whole cell immobilization, Immobilization techniques – Adsorption, Cross-linking, ionic bonding, entrapment and encapsulation, Advantages and industrial applications of immobilized enzymes and cells

**03 Hrs**

#### **Unit 8**

**Industrial Production:** of Agar – Agar, Alginate, Alcohol (Ethanol), Organic acids (Citric, Acetic, Solvents (Glycerol & Acetone), Antibiotics (Penicillin & Streptomycin), Amino acids (Lysine & Glutamic acid), Single cell proteins (SCP), Vitamins (Riboflavin), Enzymes (Amylase, Lactase and Protease), Hydrocarbons – Biodegradable plastic or PHA and PHB, and recombinant protein (HCG, hepatitis – B vaccine).

**12 Hrs**

#### **Unit 9**

**Food processing:** Food spoilage and Food preservation Principles and general methods, elementary idea of canning, packing sterilization and Pasteurization of food products  
Food fermentation technology – Sausages, olives, bread, Idli and acidophilus milk Hazard analysis and critical control point (HACCP) concepts.

**04 Hrs**

#### **Unit 10**

**Entrepreneurship:** Potential entrepreneurship opportunities in biotechnology. Product development, marketing, resources, research and training units, Industrial licensing and venture capital, Biotech parks, Biotechnology industries in India, contract research (CRO) and Intellectual property rights (IPRs).

**04 Hrs**

### **PRACTICALS**

#### **BT CP 3.7 Based on BT CT 3.3 Bioprocess Engineering and Technology**

1. Study of Fermentor and bioreactor
2. Isolation and screening for industrially important microorganisms by crowd plat technique.
3. Study of antibiotic producing microorganisms in mass culture process and recovery of the product

4. Study of Alcohol fermentation – alcohol production from different substrates, Lab production of Wine, Estimation of percentage of Alcohol, Total acidity and volatile acidity in wine
5. Estimation of Alcohol by Potassium dichromate method.
6. Production of protease from *Bacillus* spp. by using Wheat bran, Coffee pulp through small scale fermentation process and its assay
7. Production of  $\alpha$ - Amylase using *Aspergillus oryzae*, *Bacillus* sp. using Wheat bran in small scale Solid state fermentation and its assay
8. Production of citric acid by *Aspergillus niger*, *Pencillium citrannum* and its estimation.
9. Immobilization of yeast cells by calcium alginate gel entrapment and assay for enzymes Invertase and Catalase
10. Production of alpha amylase from immobilized cells of *Bacillus* sp.
11. Production and analysis of SCP from *Spirulina* and Yeast
12. Production of Yoghurt, *Acidophilus* milk and Temph.
13. Rapid platform test for milk
14. Fat estimation in milk and milk products
15. Methylene Blue reduction test
16. Detection and quantification of Siderophores produced by *Pseudomonas* spp
17. Mandatory visit to Research Institutes / Industries and submission of report.

## **BT ET 3.4 – PLANT AND ANIMAL TISSUE CULTURE**

**50 Hrs**

### **Unit 1**

**Plant tissue culture and media:** Introduction to Cell and Tissue culture. Tissue culture as a technique to produce novel plants and hybrids, Tissue culture media: (Composition and Preparation). Initiation, maintenance of callus and suspension culture and single cell clones.

**07 Hrs**

### **Unit 2**

**Cell and Organogenesis:** Somatic embryogenesis, transfer and establishment of whole plants in soil. Shoot tip culture, rapid clonal propagation and production of virus free plants. Embryo culture and Embryo rescue. Anther, pollen and ovary culture for production of haploid plants and homozygous lines

**10 Hrs**

### **Unit 3**

**Protoplast isolation, fusion and cryopreservation:** Selection of hybrids cells and regeneration of hybrid plants, Symmetric and asymmetric hybrids and cybrids. Cryopreservation and DNA banking for germ plasm conservation.

**08 Hrs**

### **Unit 4**

**Animal cell, tissue and organ culture:** Historical perspectives, development and scope. Requirements for animal cell, tissue and organ culture – Equipments and materials for animal cell culture technology, advantages and limitations of tissue culture, aseptic handling, facilities, required media and cell lines. Organ and embryo culture: Choice of models, organ culture and histotypic culture Filter – well inserts, neuronal aggregates, whole embryo culture eggs, chick and mammalian embryos.

**07 Hrs**

### **Unit 5**

**Initiation of cell and primary culture:** Cultivation of animal cell in mass using Bioreactors, Biology of cell culture, evaluation of culture dynamics and maintenance of cell lines. Primary culture: Isolation of mouse and chick embryos, human biopsies, methods for primary culture, nomenclature of cell lines, Sub culture and propagation, immortalization of cell lines, cell line designation, selection of cell line and routine maintenance.

**06 Hrs**

## Unit 6

**Cell separation and characterization:** Density based, antibody based, magnetic and fluorescence based cell sorting. Characterization of cells based on morphology, chromosome analysis, DNA content, RNA and protein, enzyme activity, antigenic markers, cytotoxicity assays, Cell quantitation and Cell culture contamination, monitoring and eradication, Cryo preservation.

**05 Hrs**

## Unit 7

**Culturing of specialized cells:** Epithelial, mesenchymal, neural, ectodermal, hematopoietic, gonad and tumor cell Lymphocyte preparation and culture of amniocytes, fish cells and confocal microscopy, Stem cell culture and its applications

**03 Hrs**

## Unit 8

**Cell and tissue engineering:** Growth factors for *in-situ* tissue regeneration, biomaterials in tissue engineering, approaches for tissue engineering of skin, bone grafts, nerve grafts, Haemoglobin based blood substitutes, bio artificial or bio-hybrid organs, Limitations and possibilities of tissue engineering. Hybridoma technology and production of monoclonal antibodies

**04 Hrs**

## PRACTICALS

### BT EP 3.8 Based on BT ET 3.4 Plant and Animal Tissue Culture

1. Sterilization and preparation of plant tissue culture media.
2. Isolation of Ex-plant and maintenance of culture
3. Micro-propagation of Auxiliary buds and adventitious shoot
4. Anther culture for Haploid production.
5. Microspore culture for Haploid production
6. Initiation and establishment of cell suspension cultures.
7. Protoplast isolation and culture
8. Embryogenesis in cultured cells/Tissue.
9. Preparation of Synthetic seeds.
10. In-vitro pollination and cultures of ovary/ovule
11. Demonstration of bio-assay of hormones
12. Isolation of DNA from animal tissues
13. Demonstration of Cryo-preservation and Thawing
14. Sperm counting and Sperm viability
15. Animal Cell Culture: Preparation of media (Natural and Synthetic)
16. Preparation of metaphase chromosome from selected cells
17. Role of serum in cell culture
18. Estimation of Cholesterol

## **BIOTECHNOLOGY FOURTH SEMESTER SYLLABUS**

### **FROM 2020-21 ONWARDS**

#### **BT CT 4.1 GENETIC ENGINEERING**

**50 Hrs**

##### **Unit 1**

**Introduction to Genetic Engineering:** Scope and importance of Genetic engineering

**02 Hrs**

##### **Unit 2**

**Cloning Vectors:** Brief account of naturally occurring plasmids (Conjugative and Non conjugative plasmids, Degradative plasmids, Resistance plasmids, Fertility plasmids, Col-Plasmids), artificial plasmids (pBR322, pUC vectors, Ti and Ri plasmids), Bacteriophages, Phagemids, Cosmids, Fosmids, Artificial chromosomes (BAC's, YAC's), Shuttle vectors, expression vectors, M13 derived vectors and Viral vectors (SV40 and Bovine Papilloma Virus).

**08 Hrs**

##### **Unit 3**

**Tools of Genetic Engineering:** Restriction endonucleases- nomenclature and types, recognition sequences and mechanism of action. DNA Modification enzymes (nucleases, kinases, Alkalinephosphatase, Klenow-Fragment polymerase, Lambda-Exonuclease and Exonuclease-III) and ligases- types and mechanism of action.

**05 Hrs**

##### **Unit 4**

**Cloning and Construction of gene Libraries:** cDNA library- isolation and purification of mRNA, Synthesis of cDNA, cloning of cDNA in to plasmids and phage vectors,

**Genomic DNA Library:** Isolation and purification of Genomic and Plasmid DNA, preparation of DNA fragments for cloning, Construction of genomic DNA library with different vectors and screening techniques.

**05 Hrs**

## Unit 5

**Selection, Screening and Analysis of Recombinants:** Blotting Techniques- Southern Blotting, Northern Blotting, Western Blotting and DOT Blot, Nucleic Acid hybridization (Colony Hybridization and Plaque Hybridization), Immunological methods and *In vitro* Translation. Chromosome walking,

**Gel Electrophoresis:** Agarose gel Electrophoresis, PAGE and PFGE

**06 Hrs**

## Unit 6

**Labeling and Detection Techniques:** Labeling of DNA, RNA and Proteins (Radioactive and non-radioactive isotopes). DNA Sequencing (Chemical and Enzymatic method).

**04 Hrs**

## Unit 7

**Transformation Techniques:**

Transformation and Transfection techniques: Preparation of competent cells of bacteria, chemical methods- calcium phosphate precipitation method and liposome mediated method. Physical methods- Electroporation and Gene gun method. Biological methods-Agrobacterium mediated transformation, Co-cultivation methods, Chloroplast transformation, method of DNA transfer to yeast, mammalian and plant cells.

**06 Hrs**

## Unit 8

**Polymerase chain Reaction:** Methodology, types and applications.

**03 Hrs**

## Unit 9

**Chemical Synthesis of genes:** Methods (Phosphodiester, Phosphotriester and Phosphite ester methods principle and strategies). Oligonucleotide synthesis and application, synthesis of complete gene.

**04 Hrs**

## Unit 10

**Antisense and Ribozyme technology:** Molecular mechanism of antisense molecules, inhibition of splicing poly-adenylation and translation, disruption of RNA structure and capping Biochemistry of

Ribozyme, hammer head, hairpin and other Ribozymes, strategies for designing Ribozymes, application of antisense and Ribozymes technologies.

**03Hrs**

## **Unit 11**

**Applications of Genetic engineering and rDNA technology:** Transgenic plants (disease resistant, weedicide resistant, frost resistant, halo-tolerant and pest resistant) production of growth hormones, interferon, insulin, recombinant vaccines, gene therapy, anti-sense RNA technology RNA; requirement of recombinant molecules in health, pharmaceuticals, agriculture and industrial sectors, research labs.

**04 Hrs**

## **PRACTICALS**

### **BT CP 4.4 Based on BTCT 4.1 Genetic Engineering**

1. Isolation and Electrophoretic separation of genomic DNA from Bacteria, Plant and Animal tissues.
2. Gel elution and purification of DNA fragment
3. Isolation and electrophoretic separation of RNA from Bacteria, Plant and Animal tissues.
4. Quantification and purity check of Isolated DNA using UV spectrophotometer.
5. Isolation, purification and electrophoretic separation of plasmid DNA from Bacteria.
6. Restriction Digestion of Genomic DNA and Plasmid DNA with Restriction Endonucleases and separation of digested products in Agarose gel.
7. Effect of Agarose concentration on migration of DNA fragments.
8. DNA Ligation using T4 DNA Ligase and *E.coli* DNA ligase
9. Preparation of Competent cells using Calcium Chloride Method.
10. Transformation of Bacterial cells (blue white Selection).
11. Blotting techniques: Southern, Northern and Western Blotting
12. Amplification of DNA using Polymerase chain Reaction.

<b>Program code with title</b>	<b>BTCT 4.1 Genetic Engineering</b>	
<b>Units</b>	<b>Course Outcome</b>	<b>No of hours</b>
<b>Unit 1</b>	<b>Introduction to Genetic Engineering:</b> Student will understand the Scope and importance of Genetic engineering	<b>02 Hrs</b>
<b>Unit 2</b>	<b>Cloning Vectors:</b> Student will understand the different types of bacterial viral and fungal vectors and their properties and its importance in genetic engineering.	<b>08 Hrs</b>
<b>Unit 3</b>	<b>Tools of Genetic Engineering:</b> Student will gain the knowledge about the different enzymes used their mechanism and role in genetic engineering.	<b>05 Hrs</b>
<b>Unit 4</b>	<b>Cloning and Construction of gene Libraries:</b> Student will understand about the different type of library construction and screening using suitable vectors..	<b>05 Hrs</b>
<b>Unit 5</b>	<b>Selection, Screening and Analysis of Recombinants:</b> Students will get insight in to Blotting Techniques and different types of electrophoresis.	<b>06 Hrs</b>
<b>Unit 6</b>	<b>Labeling and Detection Techniques:</b> Student will understand the different methods of Labeling of DNA, RNA and Proteins.  Student will gain the knowledge about the DNA Sequencing	<b>04 Hrs</b>
<b>Unit 7</b>	<b>Transformation Techniques:</b> Student will understand the concept of transformation and transfection techniques and other methods of gene insertion.	<b>06 Hrs</b>
<b>Unit 8</b>	<b>Polymerase chain Reaction:</b> Student will understand the types and applications of Polymerase chain Reaction	<b>03 Hrs</b>
<b>Unit 9</b>	<b>Chemical Synthesis of genes:</b> : Student will understand the Different methods for Oligonucleotide synthesis and application, synthesis of complete gene.	<b>04 Hrs</b>
<b>Unit 10</b>	<b>Antisense and Ribozyme technology:</b> Student will understand the Molecular mechanism of antisense molecules and application of antisense and Ribozymes technologies.	<b>03 Hrs</b>
<b>Unit 11</b>	<b>Applications of Genetic engineering and rDNA technology:</b> Student will understand the use of transgenic organisms , recombinant molecules in health, pharmaceuticals, agriculture and industrial sectors, research labs for the welfare of human kind.	<b>04 Hrs</b>

## **BT CT 4.2 – PLANT BIOTECHNOLOGY**

**50 Hrs**

### **Unit 1**

**Plant tissue culture and media:** Introduction to Cell and Tissue culture. Tissue culture as a technique to produce novel plants and hybrids, Tissue culture media: (Composition and preparation). Initiation & maintenance of callus and suspension culture and single cell clones.

**04 Hrs**

### **Unit 2**

**Cell and Organogenesis:** Somatic embryogenesis, transfer and establishment of whole plants in soil. Shoot tip culture, rapid clonal propagation and production of virus free plants. Embryo culture and Embryo rescue. Anther, pollen and ovary culture for production of haploid plants and homozygous lines.

**06 Hrs**

### **Unit 3**

**Protoplast isolation, fusion and cryopreservation:** Selection of hybrid cells and regeneration of hybrid plants, Symmetric and asymmetric hybrid and cybrids. Cryopreservation, slow growth and DNA banking for germ plasm conservation

**05 Hrs**

### **Unit 4**

**Basic techniques in r-DNA technology:** Biolistics (Particle bombardment) Electroporation, microinjection and Agro bacterium mediated gene transfer. T-plasmid derived vector systems, structure and restriction site Mechanism of T-DNA transfer from Agrobacterium to plant cells. Marker and reporter genes used in plant system. Manipulation of gene expression in plants Isolation and uses of different promoters, production of marker free transgenic plants

**08 Hrs**

### **Unit 5**

**Plants transformation Technology:** Basis of tumor formation, hairy root, features of Ti and Ri plasmids, mechanisms of DNA transfer, role of virulence genes, use of Ti and Ri as vectors, Binary vectors, use of 35S and other promoters. Genetic markers, use of reporter gene with introns, use of scaffold attachment regions, methods of nuclear transformation, viral vectors and their applications multiple

gene transfers, vector-less or direct DNA transfer. Transformation of monocots, Trans gene stability and gene silencing.

**08 Hrs**

## **Unit 6**

**Application of plant transformation in plant productivity and performance:** Herbicide resistance, phosphinothricin, Glyphosate, sulfonyl urea, atrazine, insect resistance/ Bt genes, Non Bt like protease inhibitors, alpha amylase inhibitor, virus resistance coat protein mediated, nucleocapsid gene disease resistance, chitinase, 1-3 B glucanase, RJP antifungal proteins, thionins, PR proteins, nematode resistance, Abiotic stress, post-harvest losses, long self-life of fruits and flowers use of ACC synthase, polygalactouranase and ACC oxidase. Male sterile lines, bar and barnase systems, Carbohydrate composition and storage ADP glucose pyrophosphates

**08 Hrs**

## **Unit 7**

**Molecular marker aided breeding:** RFLP maps linkage analysis, RAPD markers. STS micro satellites SCAR (Sequence Characterized Amplified Regions) SSCP (Single strand conformational polymorphism) AFLP, QTL, map based cloning, molecular markers assisted selection, Molecular characterisation of homozygous and heterozygous for plant breeding.

**06 Hrs**

## **Unit 8**

**Plant genomics:** Arabidopsis thaliana (Mad-Box gene) as a model for plant genomics and Plant proteomics, Rice genome project, Genetic diversity and phylogenetic studies, Comparative genomics and analysis for selection of best species.

**05 Hrs**

## **PRACTICALS**

### **BT CP 4.5 Based on BTCT-4.2-Plant Biotechnology**

1. Aseptic culture techniques for establishment and maintenance of cultures
2. Preparation of stock solutions of MS basal medium and plant growth regulator stocks.
3. Isolation of Explant and maintenance of culture. Sub culture of callus, Organogenesis and Transfer of plants to soil.
4. Micropropagation by Proliferation of Auxiliary buds and by adventitious shoot proliferation.
5. Initiation and establishment of cell suspension cultures.

6. Anther culture for Haploid production.
7. Microspore culture for Haploid production.
8. Protoplast/ embryo isolation and culture.
9. Embryogenesis in cultured cells.
10. Preparation of Synthetic seeds.
11. *In vitro* fertilization and cultures of ovary/ovule.
12. Extraction and quantification of secondary metabolites from callus.
13. Histological preparation by Squash preparation of tissues to trace the path of differentiation.
14. Isolation of plant genomic DNA (C-TAB method) and Agarose electrophoresis.
15. PCR amplification of genomic DNA.
16. Preparation of competent cells
17. Transformation of protoplast by Electroporation.
18. Isolation of total RNA from plant.

## **BT CT 4.3 – MEDICAL BIOTECHNOLOGY**

**50 Hrs**

### **Unit 1**

**Medical Biotechnology:** Scope and Importance, Medical Biotechnology' Indian scenario.

**02 Hrs**

### **Unit 2**

**Cancer Biology:** Types of tumors, pre-disposing factors, cellular changes involved in tumor formation genes associated with cancer (Oncogenes and Tumor suppressive genes). Tumor formation, promotion and progression, prevention of cancer, carcinogens, airborne, foodborne and human Papillomavirus, Methods of tumor detection, tumor markers, treatment of cancer chemotherapy, radiotherapy, immunotherapy and gene therapy.

**07 Hrs**

### **Unit 3**

**Microbial diseases in humans:** Mode of infection, symptoms, epidemiology and control measures of diseases caused by

**Viruses:** HIV, Hepatitis-B, Rabies, HSV-1, H1N1

**Bacteria:** Gonorrhea, Tuberculosis, Anthrax, B, Plague

**Fungi:** Aspergillosis, Histoplasmosis, Cryptococcosis

**Protozoa:** Malaria, Amoebiasis

**08 Hrs**

### **Unit 4**

**Diagnostics:** Immunological diagnostics-RIA, ELISA, Fluorescence immune assays, Immuno-electrophoresis and Hemagglutination assay, Molecular diagnostic methods- PCR, DNA Fingerprinting, DNA Microarray in forensic science and disease diagnosis.

**06 Hrs**

### **Unit 5**

**Stem cells:** Types, sources, properties, Induced pluripotent stem cells (IPSCs) and applications of stem cells in tissue repair, tissue engineering, Organ Printing and regenerative medicine. Embryonic stem cells and its preservation

**05 Hrs**

## **Unit 6**

**Human genome project and its applications:** Examples of genes identified with various human diseases, molecular detection of pre symptomatic genetic diseases, Importance in health care, pre-natal diagnosis, genetic manipulation and ethical implications.

**05 Hrs**

## **Unit 7**

**Gene therapy:** Human diseases targeted for gene therapy, Types vectors, nanotechnology based gene therapy and other delivery systems for gene therapy. *Ex-vivo* and *In-vivo* gene therapy, tissue of choice for gene therapy *In-vitro* gene therapy and gene therapy of genetic diseases e.g. Neurological, Metabolic disorders and Cystic fibrosis, gene therapy for Acquired diseases (ADA gene in SCID), Cardiovascular diseases, Cancer etc. Importance of humanized antibodies and plasminogen activating factor in treating thrombosis

**05 Hrs**

## **Unit 8**

**Nano-biotechnology:** Introduction, types and synthesis of nano-materials, Nano biosensors, nanoparticles in drug delivery and gene delivery, Quantum Dots, Nanoparticles in realtime monitoring and disease diagnostics and cancer therapy Risk potential of nano-materials.

**05 Hrs**

## **Unit 9**

**Pharmaco-biotechnology:** Role of biotechnology in the production of pharmaceutical products, Drug targeting, Monoclonal antibodies and their application in Medicine.

**04 Hrs**

## **Unit 10**

**Ethical issues involved in stem cell research:** Use of cell cultures as alternative for animal model for research, testing of drugs on human volunteers, use of animals for research and testing. Animal cloning, human cloning, ethical and social issues, organ transplantation and xeno transplantation

## PRACTICALS

### BT CP 4.6 Based on BT CT 4.3 Medical Biotechnology

1. Detection of malarial parasite from human blood sample.
2. Study antibiotic sensitivity test by using paper disc as well as agar cup plate method.
3. Anaerobic culture method for anaerobes of clinical importance.
4. Presumptive identification of pathogens using colony morphology on selective/differential/ selective-differential/ Enrichment media.
5. Isolation and characterization of clinically significant species of *Staphylococcus sp.*, *Streptococcus sp.*, *Corynebacterium sp.*, *Bacillus sp.*, *Nocardia sp.*, *Neisseria sp.*, *Candida sp.*, and *Cryptococcus sp.*, *Enterobacteriaceae sp.*, *Vibrio sp.*, *Pseudomonas sp.*, and *Aeromonas sp.*.
6. Drug susceptibility testing by various methods according to NCCLS.
7. Determinations of MIC for selected antibiotics (Kirby-Bauer method and Checker board method).
8. Preparation of culture media: Simple tissue culture methods for growing different pathogenic microorganisms.
9. Conventional methods for isolation and identification of pathogenic bacteria / fungi.
10. Lymphocyte viability test in Rat/Mice (Typhan blue Dye exclusion test).
11. Microbial flora of mouth and study of commensal flora of human body.
12. Bacteriological examination of Urine, Blood, Pus Samples from Hospitals.
13. Estimation of urine bacteria by Calibrated loop direct streak method.
14. Study of stem cell from embryonic fluids.
15. Study of different cancer cell lines
16. Mandatory visit to hospital and medical research centers.

# KARNATAK UNIVERSITY, DHARWAD

"A" Grade  
NAAC Accredited

*Regulations and Syllabus*

*for*

*P.G. Department of Studies in*

**BOTANY**

(I to IV Semesters)

*Under Choice Based Credit System*

From

2008-09 & onwards

**1.4 Core paper (Ist Sem) .**

**w.e.f.2011-2012**

ವೊದಲ ಮುದ್ರಣ

- 2008-09

500 ಪ್ರತಿಗಳು

- ಮಾರಾಟಕ್ಕೆ 400 ಪ್ರತಿಗಳು (ಅನುಕ್ರಮ ಸಂಖ್ಯೆ ಹಾಗೂ ದರ ರೂ. 100/- ಮುದ್ರಿಸುವುದು)
- 100 ಪ್ರತಿಗಳ ಕಾರ್ಯಾಲಯದ ಉಪಯೋಗಕ್ಕೆ  
("ಕಾರ್ಯಾಲಯದ ಉಪಯೋಗಕ್ಕೆ" ಮುದ್ರಿಸುವುದು)

Regulations Governing Post-Graduate Programmes in the  
Faculty of Science & Technology under Choice Based Credit System  
(Framed under Section 44(1)(c) of the K. S.U. Act, 2000)

**1.0 Title**

These Regulations shall be called “Regulations Governing the Post-Graduate Programmes in the Faculty of Science & Technology under the Choice Based Credit System” in Karnatak University, Dharwad

**2.0. Commencement**

These Regulations shall come into force with effect from the academic year 2008-09.

**3.0. Definitions**

- a In these Regulations, unless otherwise provided:  
“Academic Council” means Academic Council of the University constituted according to the *Karnataka State Universities Act, 2000*.
- b “Board of Studies” means P.G. Board of Studies of the University, Adhoc/ Combined and Steering Committees of International Diploma Programmes in the discipline/subjects concerned.
- c “Compulsory Course” means fundamental paper, which the student admitted to a particular Post-Graduate Programme, should successfully complete to receive the Post Graduate Degree in the concerned subject.
- d Course Weightage” means number of credits assigned to a particular course.
- e “Credit” means the unit by which the course work is measured. One Credit means one hour of teaching work or two hours of practical work per week. As regards the marks for the courses, 1 Credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks.
- f “Cumulative Grade Point Average (CGPA)” refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward from first semester to subsequent semesters.
- g “Degree” means Post-Graduate Degree.
- h “Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each course by the candidate in both Internal Assessment and Semester-end Examinations.
- i “Grade Point Average (GPA)” refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester.
- j “Open Elective Course” means a paper offered by a Department to the students of other Departments.
- k “Post Graduate Programme” means semesterised Master’s Degree Programmes

excluding P.G. Diploma.

- l “Specialization course” means advanced paper offered by a Department that a student of that Department can opt as a special course.

- m “Student” means the student admitted to programmes under (k).

- n “University” means Karnatak University, Dharwad.

#### **4.0. Minimum Eligibility for Admission**

A candidate, who has successfully completed Bachelor’s Degree programme in Science or any other Degree programme of this University or of any other University recognized as equivalent thereto by this University, shall be eligible for admission to the Post Graduate Programmes in science provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the University from time to time.

Admissions shall be as per Government of Karnataka reservation policy and the directions issued in this regard from time to time.

#### **5.0. Duration of the Programme**

The duration of the study for the Post-Graduate Degree programme shall extend over a period of two (three in case of MCA) consecutive academic years, each academic year comprising two semesters, and each semester comprising sixteen weeks with a minimum of ninety working days.

However, the students, who discontinue the programme after one or more semesters due to extraordinary circumstances, are allowed to continue and complete the programme with due approval from the Registrar. Candidates shall not register for any other regular course other than Diploma and Certificate courses being offered on the campus during the duration of P.G. Programme.

#### **6.0. Medium of Instruction and Evaluation**

The medium of instruction shall be English. However, the students may write the examinations in Kannada if so provided by the concerned Board of Studies.

#### **7.0 Programme Structure**

- 7.1 The students of Post-Graduate Programme shall study the courses as may be approved by the concerned Board of Studies, Faculty and the Academic Council of the University from time to time subject to minimum and maximum credits as outlined in these regulations.

- 7.2 There shall be three categories of courses namely, Compulsory Courses,

#### Specialization Courses and Open Elective Courses.

- 7.3 Each programme shall have a set of Compulsory Courses, as stipulated in the regulations governing the concerned programme, that a student must complete to get the concerned degree.
- 7.4 In those programmes that offer specialization courses, the students shall choose the prescribed number of Specialization Courses offered within the Department.
- 7.5 Each Department shall offer Open Elective courses for students of other Departments. The students of a Department shall choose Open Elective courses from among those prescribed by the University and selected by the Department from time to time. P.G. Centers and affiliated colleges, can offer those Open Elective Courses which are approved or prescribed by their Parent Department of the University. Such Open Elective courses shall be taught by qualified teachers approved by the University.
- 7.6 The credits for each of the Compulsory Courses may vary from 2 to 4; for Specialization Course, from 2 to 4; and for Open Elective Course, from 2 to 4. Wherever project work/ field work/practical are involved in the course, the credits may extend to 6 or as otherwise provided by concerned programme.
- 7.7 The minimum credits for P.G. Programme shall be 96. In the case of MCA, the minimum number of credits shall be 158 and in case of M.Sc. Computer Science the minimum credits are 116.
- 7.8 The students shall undertake project/field work during the programme as a compulsory course or in lieu of Specialization Course or Open Elective Course if so specified by the concerned Board of Studies.
- 7.9 The ratio between Compulsory, Specialization and Open Elective may differ from department to department.
- 7.10 The detailed programme structure for Faculty of Science & Technology shall be as prescribed and shown in Annexure-I, Annexure –Ia & Annexure-Ib.
- 7.11 The Open Elective Courses generally will have practical component, unless otherwise specified by the respective Board of Studies. The number of students admitted to the course shall commensurate with the availability of infrastructure.
- 8.0. **Attendance**
- 8.1 Each course shall be taken as a unit for the purpose of calculating the attendance.
- 8.2 Each student shall sign the attendance register maintained by the Department for each course for every hour/unit of teaching/practical. The course teachers shall submit the monthly attendance report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the second week of the subsequent month.
- 8.3 Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.

- 8.4** A student shall be considered to have satisfied the required attendance for each course if he/she has attended not less than 75 % of the total number of instructional hours during the semester.
- 8.5** There is no provision for condoning shortage of attendance.
- 8.6** The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission afresh to the given semester.
- 8.7** Such of the candidates who have participated in State/National level Sports, NSS, NCC, Cultural activities and other related activities as stipulated under the existing regulations shall be considered for giving attendance for actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authorities within two weeks after the event.

## **9.0 Examination**

- 9.1** There shall be an examination at the end of each semester. The odd semester examinations shall be conducted by the respective Departments/ P.G.Centres/ Colleges. The even semester examinations shall be conducted by the University.
- 9.1.1** Unless otherwise provided, there shall be semester-end examination of 3 hours duration for 75/100 marks; 1.5 hours for 50 marks and 2/4 hours for 35/75 marks practical examination.
- 9.1.2** Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application form through the proper channel and shall also pay the fees prescribed.
- 9.1.3** The Office of the Registrar (Evaluation) shall allot the Register Number to the candidate at the 1st semester-end examination. That will be the Register Number of the candidate for all subsequent appearances at semester-end examinations.
- 9.1.4** The Answer scripts shall be in the safe custody of the University for a maximum period of six months from the date of announcement of results. These shall be disposed off after six months.
- 9.1.5** The programme under CBCS is a fully carry-over system. A candidate reappearing for either the odd or even semester examinations shall be permitted to take examinations as and when they are conducted (even semester examination in even semester and odd semester examination in odd semester).
- 9.1.6** Candidates who have failed, remained absent or opted for improvement in any course/ courses shall appear for such course/ courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.
- 9.1.7** Candidates who desire to challenge the marks awarded to them, in the even semester-

end examinations, may do so by submitting an application along with the prescribed fee to the Registrar (Evaluation) within 15 days from the announcement of results.

## **9.2. Odd Semester Examination**

- 9.2.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.
- 9.2.2** The BOE shall scrutinise the question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation).
- 9.2.3** The office of the Registrar Evaluation shall dispatch the question papers to the Departments/ P.G.Centres/ Colleges who shall conduct the Examinations according to the Schedule announced by the University.
- 9.2.4** The Chairperson of the Department/ Administrator of the P.G.Centre/ Principal of the College shall appoint one of their full time course teachers as Post Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts.
- 9.2.5** Answer scripts shall be valued by the examiners appointed by the University. However, in those centres where an examiner for a particular course is not available, then the answer scripts of that course shall be dispatched to the office of the Registrar (Evaluation) who shall arrange for valuation of the same.
- 9.2.6** There shall be single valuation. The examiners (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on the answer script.
- 9.2.7** The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be dispatched by the PGP Coordinator to the Registrar (Evaluation)'s Office at the conclusion of the valuation at the respective centres.
- 9.2.8** The Office of the Registrar Evaluation shall process and announce the results.

## **9.3. Even Semester**

- 9.3.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.
- 9.3.2** As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other Universities/ Research Institutes.
- 9.3.3** Each answer script of the semester-end examination (theory and project report) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averaged with nearer award of the two evaluations.

Provided that in case the number of answer scripts to be referred to the third examiner in a course exceeds minimum of 5 or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.

**9.3.4** Wherever dissertation/ project work is prescribed in the even semesters of a programme, the same shall be evaluated by both internal and external examiners. The evaluation shall be as prescribed by the concerned Board of Studies.

**9.3.5** In case of programmes with practical examination details of maximum marks, credits or duration may vary from Department to Department as specified by the concerned Board of Studies.

#### **9.4. Evaluation**

**9.4.1** Each Course shall have two evaluation components - Internal Assessment (IA) and the Semester End Exams.

**9.4.2** The IA component in a course shall carry 25% / 30% / 50% and the Semester End Examination shall carry 75% / 70% / 50% respectively, as the case may be. Courses having 25% & 30% / 50% marks as internal assessment shall have 3 / 5 marks allotted to attendance. However, in case of project work, the distribution of marks for Internal Assessment and Examination shall be left to the discretion of the concerned BOS.

**9.4.3** Marks for attendance shall be awarded to the students according to the following table.

For courses carrying 25 % of marks for IA, the attendance marks shall be

<b>Attendance (in percentage)</b>	<b>Marks</b>
Above 90	3
Above 80 and up to 90	2
Above 75 and up to 80	1

**9.4.4** Internal Assessment (IA) shall be based on written tests, practical and seminars. However, the number of IA components per course per semester shall not be less than two.

**9.4.5** The IA marks list shall be notified on the Department Notice Board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination, or as directed by the University.

**9.4.6** The tests shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.

**9.4.7** There is no provision for seeking improvement of Internal Assessment marks.

**9.4.8** The IA records, pertaining to Semester Examination, shall be preserved by the department/Centres/Colleges for a period of one year from the date of semester examination. These records may be called by the University or a body constituted by the University as and when deemed necessary.

**9.4.9** The dissertation/project work viva-voce shall be conducted by an internal and external examiner.

#### **10.0. Maximum duration for completion of the Programme**

**10.1** A candidate admitted to a post graduate programme shall complete it within a period, which is double the duration of the programme from the date of admission.

**10.2** Whenever the syllabus is revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabus.

**11.0. Declaration of Results**

**11.1** The minimum for a pass in each course shall be 40% of the total marks including both the IA and the semester-end examinations. Further, the candidate shall obtain at least 40% of the marks in the semester-end examination. There is no minimum for the IA marks.

**11.2** Candidates shall secure a minimum of 50% in aggregate in all courses of a programme in each semester to successfully complete the programme.

**11.3** Candidates shall earn the prescribed number of credits for the programme to qualify for the PG Degree.

**11.4** For the purpose of announcing the results, the aggregate of the marks secured by a candidate in all the semester examinations shall be taken into account. However, Ranks shall not be awarded in case the candidate has not successfully completed each of the semesters in first attempt or has not completed the programme in the stipulated time (vide Regulation 5) or had applied for improvement of results.

**12.0 Marks, Credit Points, Grade Points, Grades and Grade Point Average**

**12.1** The grade points and the grade letters to candidates in each course shall be awarded as follows:

Percentage of marks	Grade Points	Grade Letter
75 and above, up to 100.00 %	7.50 to 10.00	A
60 and above but less than 75 %	6.00 and above but less than 7.5	B
50 and above but less than 60 %	5.00 and above but less than 6.0	C
40 and above but less than 50 %	4.00 and above but less than 5.00	D
less than 40.00 %	Less than 4.00	F

**12.2** Credit Point (CP): The Credit Point for each course shall be calculated by multiplying the grade point obtained by the credit of the course.

**12.3** The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned by the student in all the courses by the total number of credits of those courses of the semester.

**12.4** The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points in all the semesters by the total number of credits in all the semesters. The CGPA to date shall be calculated by dividing the total number of credit points in all the semesters to date by the total number of credits in all the semesters to date.

CGPA for the I Semester =

Sum of the CP of the I Semester ÷ Sum of the credits of the I Semester

CGPA for the II Semester =  

$$\frac{\text{Sum of the CP of the I Sem} + \text{Sum of the CP of II Sem.}}{\text{Sum of the credits of the I Semester} + \text{II Semester}}$$

CGPA for the III and IV Semesters shall be computed accordingly.

- 12.5** The Grade Card at each semester examination shall indicate the courses opted by the student, the credit for the course chosen by the student, the credit points obtained in each course, the grade letter and the grade point average. No class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade Point Average.

- 12.6** Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below:

Cumulative Grade Point Average (CGPA)	Class to be awarded
7.5 to 10.0	First class with Distinction
6.0 and above but below 7.5	First Class
5.0 and above but below 6.0	Second Class

**13. Miscellaneous:**

- a** Notwithstanding anything contained in these regulations, the semester system at Post-Graduate level is hereby repealed.
- b** The provisions of any order, Rules or Regulations in force shall be inapplicable to the extent of its inconsistency with these Regulations.
- c** The University shall issue such orders, instructions, procedures and prescribe such format as it may deem fit to implement the provisions of this Regulations.
- d** The procedural details may be given by the University from time to time.
- e** Any unforeseen problems/ difficulties may be resolved by the Vice Chancellor, whose decision in the matter shall be final.

## Annexure-I

The Programme structure of the Master of Science Degree shall be as follows:

Semester	No. of compulsory & Specialization courses (credits/course)	Total credits for compulsory & Specialization courses	No. of open elective course (credits/course)	Total credits of open elective course	Total credits for the semester
Sem. I	Th :03 (04) =12 Pra/Th*:03 (02)=06	18	Th :01 (04) =04 Pra/Th*:01(02)=02	06	24
Sem. II	Th :03 (04) =12 Pra/Th*:03 (02)=06	18	Th :01 (04) =04 Pra/Th*:01(02)=02	06	24
Sem. III	Th :03 (04) =12 Pra/Th*:03 (02)=06	18	Th :01 (04) =04 Pra/Th*:01(02)=02	06	24
Sem. IV	Th :03/04** (04) =12/16 Pra/Th:03/04** (02)=06/08 Pj <sup>#</sup> 01 (06) =06	24		-	24
Total	Th 12/13 (4) =48/52 Pra/Th 12/13(02)=24/26 Pj:1 (06)=06	78	03 (04)=12 Pra/Th*:03(02)=06	18	96

Note: Except for IV semester, the concerned Department shall offer one each of open elective theory and practical course **or** two \* open elective Theory courses for students of other science departments.

\* Only for Mathematics; \*\* for Mathematics and Statistics; # except Mathematics & Statistics  
Abbreviations: Th = Theory; Pra = Practical; Pj = Project;

## **P.G. DEPARTMENT OF STUDIES IN BOTANY**

### **INTRODUCTION:**

The Karnatak University, Dharwad introduced Post Graduate course in Botany as early as 1951 in Karnatak Science College, Dharwad and shifted to the independent building in the year 1966. The Department offered general course in Botany, such as Plant Systematics, Cryptogamic Botany, Mycology, Anatomy, Cell Biology, Plant breeding, Plant Physiology etc. Subsequently several new papers have been introduced like Microbiology, Plant Pathology, Developmental Biology, Biological Techniques, Biophysics, Biostatistics and Computer Applications etc.

The Department in addition to imparting general courses in Botany has 5 options for specialization at M. Sc-IV semester viz. i) Genetics, Molecular Biology and Plant Breeding, ii) Tissue Culture and Biotechnology, iii) Reproductive Physiology and Morphogenesis, iv) Mycology, Plant pathology and Microbiology and v) Biodiversity and Environmental Biology. The teaching programme is designed to give our students current awareness in the wide variety of subjects with in-depth study of Plant Biology. Consequently, many of our students successfully completed National Level Examination like NET of UGC/CSIR/GATE. The excellent training given to the students has helped them to be placed in National/International Research Laboratories and Colleges and Universities in the Country and Abroad. Till today over 1000 students have taken their M. Sc. degree. The Department is also offering one year M. Phil Course in the above specializations. So far 50 candidates have obtained their M. Phil Degree and 134 candidates have obtained Ph.D. degree under different specializations.

Revision of the syllabus for updating the curriculum will be normally done in a span of 5-6 years. Introduction of the semester system and revision of the syllabus was made with effect from 2001-2002. Present syllabus includes all the topics of Botany prescribed for UGC-CSIR NET Examination. By now students have cleared NET and have qualified the SLET.

### **RESEARCH ACTIVITIES AND RESEARCH FACILITIES :**

Members of the staff and Research Scholars of this Department are actively engaged in research in the different fields of Botany like Cytology, Genetics, Embryology, Phycology, Mycology, Plant Pathology, Histochemistry, Reproductive Biology, Tissue Culture, Plant Biotechnology, Plant Biochemistry, Phytodiversity and Environmental Biology.

Facilities for research in Molecular Genetics, Mutation Breeding, Reproductive Physiology, Morphogenesis, Hydrobiology, Mycology and Plant Pathology, Tissue Culture, Microbiology, Biotechnology, Phycology, Phytodiversity and Plant Biochemistry are available. Sophisticated instrumentation facilities like Gel documentation, Lyophilizer, UV spectrophotometer, Fermenter, Cold chamber, Research microscope, PCR machine, Cytrophotometer, Computer internet connection, LAN net work etc. are available. The Department has Glass house, Orchidarium, Green house, Experimental garden, Herbarium facilities and Botanic garden harboring indigenous and exotic plants.

The Department has two glass houses for growing and acclimatization of Orchids and other plant species of Western Ghats. The Botanic garden of Karnatak University is a member of Botanic Garden Conservation International an International Organization involved in promotion, development and maintenance of Botanic Gardens and Biodiversity. It has over 400 species of higher plants.

# **KARNATAK UNIVERSITY, DHARWAD**

## **Post Graduate Department of Studies in Botany**

### **SYLLABUS & ADMISSION RULES**

For

#### **M. Sc. (Botany)**

(Choice Based Credit System)

w.e.f. 2008-2009

### **Admission rules**

for

**M. Sc. (Botany) Degree Course under**

**Choice Based Credit System (CBCS)**

#### **1.1. Duration of the Course:**

The M. Sc. Degree Course is of two years duration, spread over four semesters each of four months duration.

#### **1.2 (A) Eligibility for Admission:**

B.Sc. Graduates of Karnatak University or of any other University recognized as equivalent there to with Botany as optional subject. The candidate should have obtained at least 45% of marks in optional subjects as well as in aggregate. Relaxation in respect of SC / ST / Cat-I etc. will be followed as per prevailing rules of the University.

#### **(B) Admission:**

- (i) **Intake:** 40 + 4 (but may vary from time to time with the permission from the University) for the first semester. This includes admission under enhanced fee structure. Other rules for admission are as per University notification from time to time.
- (ii) **Admission to other Semesters:** Students are allowed to take admissions to successive semesters under carry over benefit (COB) facility all the way from the first semester to fourth semester.

#### **2. Attendance:**

Every student must have at least 75% attendance in each of the courses (Theory & Practical) in each semester. Shortage of attendance will be dealt with as per the University rules from time to time.

### **3. Medium of Instruction:**

The medium of instruction shall be in English.

### **4. Scheme of Instructions:**

In the First Semesters 4 Core theory papers of 4 credits each second and third semester there will be 3 Core Theory Papers of 4 credits each. In addition, in the I semester there will be 4 Practical Papers of 2 credits each, II and III Semester there will be 3 Practical Papers of 2 credits each.

In IV Semester there will be 3 Core Theory Papers of 4 credits each including one special paper, 3 Practical Papers of 2 credits each and one project work of 6 credits.

In each of II, III Semesters there will be one Elective paper of 6 Credits. These elective papers have to be chosen by the students of other departments.

Our M. Sc. students have to take one elective of 6 Credits in each of II, III Semesters offered by other departments. Study tour of minimum of 5 days is compulsory.

### **5. Scheme of Evaluation:**

Examination will be conducted at the end of each semester.

Each Core theory paper of credits 4 will have an examination of 3 hours and carrying maximum of 75 marks. Each Core practical will have examination of 3 hours duration and carrying 35 marks.

For each theory / practical of 4 and 2 credits, there will be an internal assessment test carrying 25 and 15 marks respectively.

Each elective paper will have examination of 3 hours duration carrying 75 marks, and will have internal assessment test for 25.

**6.** All other rules and regulations not covered above are as per the University rules prevailing at that time.

## **M. Sc. COURSE IN BOTANY**

**M. Sc BOTANY**

## **FIRST SEMESTER**

Theory papers:

Bot. Core Theory	1.1 Microbiology and Phycology
Bot. Core Theory	1.2 Systematic Botany of Angiosperms
Bot. Core Theory	1.3 Evolutionary Biology, Economic Botany and Plant Geography
Bot. Core Theory	1.4 Molecular Biology

## **SECOND SEMESTER**

Theory papers:

Bot. Core Theory	2.1 Ecology and Environmental Biology
Bot. Core Theory	2.2 Concepts in Biochemistry and Biophysics
Bot. Core Theory	2.3 Biotechnology, Computer applications and
Biostatistics	
Elective Theory	2.4 Medicinal Plants

## **THIRD SEMESTER**

Theory papers:

Bot. Core Theory	3.1 Plant Physiology
------------------	----------------------

Bot. Core Theory	3.2 Cell Biology and Genetics
Bot. Core Theory	3.3 Developmental Biology of Plants and Tissue Culture
Elective Theory	3.4 Plant Biotechnology

#### **FOURTH SEMESTER**

Theory papers:

Bot.Core Theory	4.1 Mycology and Plant Pathology
Bot.Core Theory	4.2 Plant Breeding and Plant Propagation
<b>Bot. Core Theory</b>	<b>4.3 Special Papers</b> (Allocated on the basis of choice cum merit basis)
	4.3.1 Plant Tissue Culture
	4.3.2 Reproductive Biology of Higher Plants
	4.3.3 Applied Microbiology, Applied Mycology and Plant Pathology
	4.3.4 Phytodiversity and Environmental Biology
<b>Project</b>	4.4

#### **SEMESTER - I**

**Bot.CT-1.1 : MICROBIOLOGY AND PHYCOLOGY**

**MICROBIOLOGY:**

**Unit 1.** Diversity in structure and organization and life cycles other than Eubacteria: Mycoplasmas, Spirochaetes, Rickettsias, Archaeobacteria, Methanogens, Halobacteria, Cyanobacteria, Plant Viruses and Prions. 4hrs

**Unit 2.** Fungi: Introduction, general features, classifications and Reproduction. 3hrs

**Unit.3.** Microorganisms in the ecosystem: Psychrophilic, Mesophilic, Acodophilic and Thermophilic microorganisms. Distribution of microorganisms in fresh and marine water and their useful and harmful role. Distribution of microorganisms in Soil and its role in Soil formation, Soil fertility, Symbiotic and Non- Symbiotic nitrogen fixation of VAM fungi, Biopesticides and Silage. Microbiology of **Air**: Algae, Fungi, Bacteria and Lichens, Pollen grains and others, Aeroallergens and Aeroallergy. 5hrs

**Unit 4.** Microbial genetics: Recombination, transformation, conjugation, transduction and parasexuality. bacteriophage, lytic and lysogenic cycles. 5 hrs

**Unit 5.** Role of Microbes in Metabolic pathways, Photosynthetic pigments in Bacteria- Oxygenic and Anoxygenic photosynthesis. Anabolic process (biosynthetic) pathways, catabolic (degradative) pathways, Microbial degradation of Cellulose, Lignin, Starch, Fermentation pathways, Homolactic acid fermentation pathway. 4hrs

**Unit 6.** Immunology: Introduction, physical and mechanical factors, Biochemical factors, Genetic factors, Cellular factors, Active immunity (Natural- Artificial), Passive immunity (Natural- Artificial). Precipitin test, inflammation and interferon. Scope of Immunology: Application in medicine, Application in treatment of diseases, Application in blood grouping, Application in organ transplantation and tissue grafting. 5hrs

## **PHYCOLOGY:**

### **Unit 1. Basic characters of Algae:**

- a. Origin of algae
  - b. Pigments in algae and classification 3
- hrs.

### **Unit 2. The prokaryotic algae:**

- a. Structure and composition of prokaryotic algal cell
  - b. Distribution and morphology of prokaryotic algae
  - c. Reproduction in prokaryotic algae
  - d. Nitrogen fixation and economics of prokaryotic algae. 5
- hrs.

### **Unit 3. The Eukaryotic Algae:**

- a. Structure and composition of eucaryotic algal cell
  - b. Range of thallus construction in eucaryotic algae
  - c. Mode of reproduction in eucaryotic algae 4
- hrs.

### **Unit 4. Algae and water Pollution:**

- a. Phytoplankton and their classification
  - b. Algae as indicators of water quality
  - c. Algal blooms- causes and effect
  - d. Algae in water supplies and their control. 4
- hrs.

### **Unit 5. Ecology of marine algae:**

- a. Distribution of marine algae
  - b. Factors controlling growth and distribution 2
- hrs.

### **Unit 6. Cultivation of algae:**

- a. Mass cultivation of microalgae
- b. Cultivation of –i) *Porphyra*: Structure, reproduction and protocol for cultivation of *Porphyra* ii) Agarophytes: Requirements, methodology, harvesting and processing of

agarophytes.  
hrs.

5

#### **Unit 7. Biochemicals from algae:**

Pigments, enzymes, vitamins, antibiotics, essential fatty acids, polysaccharides, hydrocarbons, plant growth regulators, osmoregulators, biosurfactants, sterols, bioflocculants, aminoacids and liposomes.  
hrs.

2

#### **Bot.CP-1.1: PRACTICALS (Based on Bot.CT1.1)**

##### **MICROBIOLOGY:**

1. Safety measures in microbiology laboratory.
2. Study of instruments: Hot air oven, Autoclave, Inoculation needles, petriplates, incubator, ultraviolet lamp, laminar flow hood.
3. Preparation of Culture media: PDA, CZA, Nutrient media, preparation of agar slants, method of inoculum transfer (pouring techniques).
4. Serial dilution technique.
5. Staining of Bacteria, Simple, Positive and Negative staining.
6. Microbial Examination by Petriplate expose method.
7. Rotrod sampler, leavening of Bread Yeast/ Fermentation of Yeast.
8. Observation of VAM fungi by root maceration technique.

##### **PHYCOLOGY:**

1. Thallus in prokaryotic algae
2. Thallus in eucaryotic algae
3. Phytoplankton and indicator algae
4. Marine algae
5. Enrichment culture of algae and enumeration
6. Separation of algal pigment.

#### **Bot.CT-1.2 : SYSTEMATIC BOTANY OF ANGIOSPERMS**

**Unit 1. Scope of systematic botany:**

Aims and objectives, Floras, Monographs, Floral diagram, Floral formulas. 1 hr

**Unit 2. Development and phases of classification:**

Pioneer phase, consolidation phase, Biosystematic phase, Alpha taxonomy, Beta taxonomy, Gamma taxonomy, Omega taxonomy, Serotaxonomy, Holotaxonomy. Horizontal classification and vertical classifications. 2 hrs

**Unit 3. Systems of classifications:**

General classification of plant kingdom based on evolution.  
Artificial classification- Linneous  
Natural classification- Bentham and Hooker  
Phylogenetic classification-  
a. Transitional phylogenetic system- Engler and Prantl  
b. Intentional phylogenetic system- Charles Bessey and John Hutchinson  
c. Contemporary phylogenetic system-Takhtajan, Robert Thorne, Cronquist, Dahlgren, Angiosperm phylogeny group (APG). 10 hrs

**Unit. 4. Taxonomic ranks and Numerical taxonomy:**

Concept of family, genus, species, intraspecific clones, Numerical taxonomy, aims and objectives. Advantages of Phenogram, cladogram, and dendrogram. 5 hrs

**Unit. 5. Taxonomic evidences:**

Anatomical, Embryological, Palynological, Chromosomal, Phytochemical and Molecular. 10 hrs

**Unit. 6. Plant nomenclature:**

Vernacular names and botanical names  
Principles of ICBN. Principles of priority  
Names of genus species, Hybrids, Type method author citation publication of names, nomina conservanda, names nova, names of cultivated plants, rejection of names effective and valid publications. Unified biological nomenclature biocode and phylocode 4 hrs

**Unit 7 Botanical Gardens and herbaria**

Nature and importance of Botanical garden in plants conservation, BSI and its role in plants conservation Herbarium collection and preparation of herbarium specimen and preservation method significance of herbarium. 4 hrs

**Unit 8 Salient features and systematic relationships of following families****Dicot Families:****a. polypetalous families:**

Ranunculaceae, Magnoliaceae, Capparaceae, Caryophyllaceae, Malvaceae, Tiliaceae, Sterculiaceae, Rhamnaceae, Sapindaceae, Rosaceae, Fabaceae

**b. Gamopetalous families:**

Apocynaceae, Bignoniaceae, Solanaceae, Scrophulariaceae.

**c. Monochlamydous families:**

Chenopodiaceae, Aizoaceae, Polygonaceae, Nyctaginaceae, Piperaceae, Lauraceae, Santalaceae, Loranthaceae, Urticaceae, Ulmaceae, Moraceae, Cannabinaceae.

### **Monocot families**

Pontederiaceae, Hydrocharitaceae, Amaryllidaceae, Commelinaceae, Arecaceae and Cyperaceae.

14 hrs

13. Plant taxonomy. By O.P. Sharma
14. Taxonomy of flowering plants. By Bhattacharya.

### **CP-1.2 : PRACTICALS ( Based on CT 1.2)**

- 1) Description of specimen from locally available families
- 2) Location of key characters and use of keys at family, genus and species level.
- 3) Field trips within and around the campus.
- 4) Training in using floras and herbaria for identification of specimen describing in the class.
- 5) Study of pollen grains useful in plant taxonomy
- 6) Preparation of herbarium sheets of wild and cultivated plants.
- 7) Preparation of key for available taxa.
- 8) Calculation of similarity coefficient and preparation of dendrogram of different taxa.

### **Bot. CT.1.3 : EVOLUTIONARY BIOLOGY, ECONOMIC BOTANY AND PLANT GEOGRAPHY**

#### **EVOLUTIONARY BIOLOGY:**

**Unit 1. Origin of life:**

Abiogenesis, hypothesis of panspermia. Theory of chemical evolution .origin of life at molecular level. Miller experiment, protenoids, microsphere, RNA first model. 5 hrs

**Unit 2. Process of origin of life:**

Structure of cosmos, primitive earth, prebiotic synthesis, evolution of progeno. origin and evolution of RNA world, ribonucleoproteins, adoptive radiation in progenote. evolution of eukaryotes : a. endosymbiotic hypothesis, invagination of surface membrane, molecular evolution, evolution of proteins, insulin, haemoglobin, cytochrom c and neutral theory of protein evolution.

5 hrs

**Unit 3. Theories of Evolution:**

Lamarckism Neolamarckism, Darwinism, Neodarwinism, Germplasm theory, Mutation theory and Synthetic theory.

5 hrs

**Unit 4. Population genetics and evolution:**

Mendelian population, Gene pool, gene frequency, genetic drift, founder effect, genetic polymorphism. Hardyweinbergh law: genetics equilibrium and mechanism of speciation.

**Unit 5. Pattern of evolution in plants:**

5

hrs

Evolution of vegetative, reproductive structures in Algae, fungi, bryophytes, pteridophytes and spermatophytes.(Evolution of sporophyte in bryophytes).Stelar evolution in pteridophytes, heterospory and seed habit. Fossil forms- lepidodendron, lepidocarpon, stigaria etc

5

hrs

**ECONOMIC BOTANY:**

**Unit 6.** Cultivation and economic uses of food plants, drug plants, food adjuncts, timber plants, rubber plants, beverage plant ,oil plants, sugar cellulose and starch plants. 10 hrs

**Unit 7.** Plants as renewable source of energy.

01

hr

**Unit 8.** Conservation of economically important plant genetic resources.

01

hr

**PLANT GEOGRAGHY:**

**Unit 9. Principles of plants Geography.**

02

hrs

**Unit 10. Origin of Islands and continents:**

Pangea, panthalasa, Laurasia, gondwana land, plate tectonics and continental drift.

02hrs

**Unit 11. Centers of origin of Cultivated plants:**

Vavilov centers and zhukosky centers with plants in each region.

03

hrs

**Unit 12. Geography and plant distribution:**

Floristic region of world, phytogeographical region of India, Hansesen's classification Distribution of plants based on altitude and latitude. 04hrs

### **Unit 13. Plant distribution and plant migration:**

contism, dricontinism and endemic distribution. Age and area hypothesis, wills theroy, vicaridess and theroy of tolerance. Plant migration and barrier for plant migration.

03 hrs

### **Bot.CP-1.3 : PRACTICALS ( Based on Bot.CT 1.3)**

1. Models to be shown (fossils can be demonstrated)
2. Demonstration of models/Explanation of models.
3. Explanation of Hardyweinbergh law with some genetic problems.
4. Steles in Pteridophytes.
5. Sprophytes of Bryophytes.
6. Photographs of Evolutionary biologists.

### **Bot.CT-1.4 : MOLECULAR BIOLOGY**

**Unit 1.** . Organization of prokaryotic and eukaryotic genome, genome size and C-value paradox. – 4 h.

**Unit 2.** Unit of replication, enzymes involved, replication origin and replication fork, fidelity of

replication, extrachromosomal replicons, DNA damage and repair mechanisms, homologous and site-specific recombination. 6 h.

**Unit 3.** Genetic rearrangements in progenitor cells, oncogenes, tumor suppressor genes, cancer

and the cell cycle, virus-induced cancer, metastasis, interaction of cancer cells with normal cells, apoptosis, therapeutic interventions of uncontrolled cell growth. 6 h.

**Unit 4.** . Homologous and non-homologous recombination including transposition. 4 h.

**Unit 5.** Transgenic microbes, animals and plants, molecular approaches to diagnosis and strain

identification. Methods for analysis of gene expression at RNA and protein level, large

scale expression, such as micro array based techniques. 6

h.

**Unit 6.** Genomics and its application to health and agriculture, including gene therapy. DNA sequencing methods, strategies for genome sequencing. FISH and chromosome walk and jumps. DNA chips and genome evolution. 6

h.

**Unit 7** Protein sequencing methods, detection of post translation modification of proteins. Proteome and proteomics. 4

h.

**Unit 8..** Molecular markers: RFLP, RAPD and AFLP techniques. Marker assisted selection. 4 h.

**Unit 9.** Cells and molecules involved in innate and adaptive immunity, antigens, antigenicity

and immunogenicity. B and T cell epitopes, structure and function of antibody molecules. generation of antibody diversity, monoclonal antibodies, antibody engineering, antigen-antibody interactions, MHC molecules, antigen processing and presentation, activation and differentiation of B and T cells, B and T cell receptors, humoral and cell-mediated immune responses, primary and secondary immune modulation, the complement system, Toll-like receptors, cell-mediated effector functions. 6 h.

**Unit 10.** Mutagenesis, molecular basis of mutation. DNA repair mechanisms and evolutionary

significance. 2

h.

## **Bot. CP- 1.4 Practical: MOLECULAR BIOLOGY( Based on CT:1.4)**

1. Isolation of genomic DNA and quantification.
2. Restriction digestion of DNA and agarose electrophoresis.
3. PCR amplification and agarose electrophoresis.
4. Isolation of proteins and quantification.
5. Electrophoretic separation of proteins.
6. Agrobacterium mediated transformation.
7. Isolation and purification of plasmid DNA.

## **SEMESTER- II**

### **Bot.CT-2.1 : ECOLOGY AND ENVIRONMENTAL BIOLOGY**

#### **ECOLOGY:**

##### **Unit 1. Ecosystems:**

Principles and concept of ecosystems- Components, production verses decomposition, Homeostasis (xenobiotics).

Principles and concept of energy in ecosystems- Energy and limiting factors, concepts of productivity, measurements of productivity, food chain, food webs and trophic levels

Diversity and characters of major ecosystems – Aquatic (Marine and Freshwater), Terrestrial and Agricultural ecosystems 10 hrs.

##### **Unit 2. Biotic community and ecological niche-**

A. Concept of biotic community:

Size and structure of biotic community- Physiognomy, Life-forms, stratification, ecotones and concept of edge-effect.

B. Ecological succession- causes and patterns of succession, concept of climax.

C. Concept of ecological niches, species coexistence, overlapping and niche segregation.

2 hrs.

##### **Unit 3. Species Diversity-**

A. Patterns of diversity in a community, Diversity measurement and indices.

B. Global distribution of organisms, concept of islands, biodiversity hotspots.

C. Conservation of biodiversity. 6 hrs.

##### **Unit 4. Population biology:**

Spacing and population density, Natality and mortality. Life table, population growth curves, carrying capacity. Regulation of population size, co-evolution. 5 hrs

**Unit 5. Interactions among organisms:**

- A. Negative interactions. Inter specific competition, Predation, Parasitism and antibiosis.
  - B. Positive interaction- Commensalism, co-operation and mutualism.
  - C. Pollination Biology
  - D. Herbivores and plant defense mechanism.
- hrs.

5

**Unit 6. Impact on Biodiversity:****Anthropogenic impact-**

Eutrophication, Heavy metal pollution, Ozone depletion, greenhouse effect, Global warming and its effect, Acid rains. Pesticide, particulate and nuclear radiation. Solid wastes. Noise Pollution. Pest population and its biological control, invasive species and their effects on native species in aquatic and terrestrial ecosystems.

12 hrs.

**REFERENCES :**

**Bot. CP- 2.1 : PRACTICALS (Based on CT 2.1)**

1. Study of vegetation by quadrat and line transect method. Determination of Importance Value Index (IVI).
2. Ecological Instruments: Thermometers, Anemometer, Altimeter, Barograph, Thermograph, Hair Hydograph, Psychrometer, Rain Guage.
3. Analysis of Water Sample: pH, Conductivity, Dissolved Oxygen, Carbonates and Bicarbonates, Chlorides, Free Carbon Dioxide, Hardness, Organic Matter.
4. Analysis of Soil samples: pH, Conductivity, Organic carbon, Moisture Equivalent, Capillary Power of soil, Percolation through soil, Saturation Capacity.
5. Estimation of Dust deposit on leaves.
6. Noise level measurements in different environment.
7. Measurement of productivity by light and dark bottle method.
8. Phytoplankton of freshwater habitats.

## **Bot.CT- 2.2 : CONCEPTS IN BIOCHEMISTRY AND BIOPHYSICS**

### **BIOCHEMISTRY:**

- Unit 1** Physical and chemical properties of water. Acid base chemistry, buffers, chemical bonding and bond energy in bimolecules 4-  
hrs
- Unit 2** Nucleotides and nucleic acids: structures of nucleotides and poly nucleotides. Chemical and physical properties of nucleic acids. Chemical synthesis of poly nucleotides. 4-  
hrs
- Unit 3** Amino acids- classification, properties, peptide bonds. 4-  
hrs
- Unit 4** Protein – Structures, Sequence, Conformation. 3-  
hrs
- Unit 5** Carbohydrates – Monosaccharide and Disaccharides. Structures of starch, cellulose, pectin and chitin. 4- hrs
- Unit 6** Lipids – classification and Chemical structures and physical properties of saturated and un saturated fatty acids. 4-  
hrs
- Unit 7** Enzymes – Nature and classification of enzymes. Enzymes kinetics, bisubstrate reaction. 5-  
hrs

### **BIOPHYSICS:**

- Unit 1** Atoms, bonds and molecules, basic Principle of diffusion, Osmosis and viscosity and their application in biology. 3-  
hrs
- Unit 2** Electromagnetic radiation – spectrum and light scattering, adsorption and emission of electromagnetic radiation by biomolecules. 4-  
hrs
- Unit 3** Fluorescence and phosphorescence of biomolecules – Theory of fluorescence, fluorescence detection. Spectroscopy applied to protein, nucleic acid and membranes. 5-  
hrs
- Unit 4** Nuclear magnetic resonance – Solid state NMR, magnetic resonance imaging, application of NMR in the study of protein, nucleic acid membranes and metabolism. 5-  
hrs
- Unit 5** Mass Spectrometry – Basic theory and instrumentation; Infrared spectroscopy basic theory and instrumentation. Laser - Knowledge of lasers, application in biology and Medicine . 5- hrs

### Bot. CP - 2.2: PRACTICALS (Based on Bot. CT 2.2)

1. Extraction of chloroplast pigments and demonstration of their absorption spectra.
2. Extraction of seed proteins.
3. Determination of iodine –fats and oils
4. Estimation of proteins- spectrophotometer.
5. Estimation of Phospholipids.
6. UV and Visible spectra of biomolecules.
7. Fractionation of proteins by gel filtration.
8. Interpretation of IR and NMR Spectra of small molecules.

### Bot. CT- 2.3 : BIOTECHNOLOGY , COMPUTER APPLICATIONS AND BIOSTATISTICS

#### BIOTECHNOLOGY:

**Unit 1** Introduction, Aim and scope of Biotechnology. Extraction and purification of DNA from bacteria, Fungi and plants. Restriction digestion and electrophoretic separation. The restriction DNA fragments in physical maps. Southern, northern blotting and hybridization techniques.

6 hrs

**Unit 2** Methods of cloning: Use of DNA linkers and adaptors for cloning. Selection methods for recombinant vectors. Methods for clone identification. Studying the location of cloned gene. Identifying and studying of the translation product of cloned gene. 5 hrs

**Unit 3** Marker and reporter genes used in plant systems. Manipulation of gene expression in plants. Isolation and uses of different promoters.

2 hrs

**Unit 4** *Agrobacterium* mediated gene transfer. Ti plasmid derived vector systems structure and restriction sites. The mechanism of T-DNA transfer from *Agrobacterium* to plant cells. Bt-toxin gene transfer to plants. And Transgenic expression.

2 hrs

**Unit 5** Engineering herbicide resistant, insect resistant, disease resistant (Viral, bacterial, fungal) and stress (abiotic) tolerant plants. 6hrs

**Unit 6** Antisense strategies for genetic manipulation in plants. Development of antisense technology for commercial purpose with special reference to fruit ripening and delay of senescence in flowering. 2hrs

**Unit 7** Production of vaccines, antigens and antibodies from plants. 1hrs

**Unit 8** Biotechnological application with reference to alkaloid biosynthesis. 1hrs

**Unit 9** Fuel biotechnology: Bio-diesel from lipids and other hydrocarbons. Desirable and undesirable features of biofuels. 1hrs

**Unit 10** Environmental applications of plant biotechnology and Phytoremediation. 1hrs

## **COMPUTER APPLICATIONS:**

**Unit 1** Knowledge of computer systems, hardware and software, CPU and other peripheral devices, software packages and programming language, scientific application packages. 3 hrs

**Unit 2** Awareness of Windows, documentation data analysis and presentation techniques using Windows programme. 2 hrs

**Unit 3** Computer and internet – The world wide web and local area network, information retrieval, communication using internet. Web data base directories, search engines, life science data bases, tools online and bioinformatics. 5 hrs

## **BIOSTATISTICS:**

**Unit 1** Principle and practice of statistical methods in biological research. 2 hrs

**Unit 2** Basic statistics measures of dispersion Measures of central tendencies (Mean, Median, Mode) Frequency of distribution, Standard deviation coefficient of

variation and standard error.

4 hrs

**Unit 3** Concept of probability – Probability distribution, binomial, poisson and normal distribution, the Chi-Square distribution. 4 hrs

**Unit 4** Tests of statistical significance – Hypothesis testing for a single population mean, difference between two population means, paired comparison. 5 hrs

**Unit 5** Regression and correlation – scatter diagram, simple linear regression and non-linear regression, correlation and correlation coefficient and application. One way analysis of variance, two – way analysis of variance and multivariate analysis of variance.

5 hrs

## Bot. CP- 2.3: PRACTICALS: (Based on CT 2.3)

## BIOTECHNOLOGY:

1. Isolation and estimation of DNA
2. Isolation and estimation of RNA
3. SDS polyacrylamide gel electrophoresis of seed proteins.
4. Immobilization of cells and enzymes
5. Chromatographic purification of RNA fragments
6. Demonstration of agarose gel electrophoresis of DNA fragments.
7. Growth characteristics of *E. coli* using plating and Turbido-metric method.

## COMPUTER APPLICATIONS AND BIOSTATISTICS

1. Determination of mean, median, mode, standard deviation and standard error from the given set of data.
2. Linear regression analysis, Analysis of variance.
3. Use of statistical packages for data analysis.
4. Data documentation analysis of windows.
5. Information retrieval and communication using internet.
6. Web data base directories and tools for biological science.

## Bot. ET- 2.4: MEDICINAL PLANTS

### Unit 1. Introduction to the Medicinal Plants:

#### Classification of drugs-

- a. Drugs from underground parts
- b. Drugs from Bark
- c. Drugs from stems & woods

- d. Drugs from Leaves
- e. Drugs from Flowers
- f. Drugs from Fruits & seeds
- g. Drugs from Lower plants 6 hrs.

#### **Unit 2 . Milestones in the study of medicinal plants in India:**

- a. Hortus Malabaricus
- b. Indian Medicinal Plants
- c. Indian Meteria Medica
- d. Poisonous plants of India
- e. Dictionary of folk medicines in India 8 hrs.

#### **Unit 3. Botany of medicinal plants:**

- a. Ethnomedicobotany and its scope
- b. Collection, identification and preservation of medicinal plants 5 hrs.

#### **Unit 4. Systems of medicines:**

- a. Evolution of systems of medicines
- b. Ayurveda system of medicine
- c. Siddha system of medicine
- d. Unani system of medicine
- e. Chinese system of medicine
- f. Tibetan system of medicine
- g. The Naturopathy and Aromatherapy
- h. The Homoeopathy 5 hrs.

#### **Unit 5. Indian Medicinal Plants Scenario:**

- a. Status and prospects of medicinal plants in India and Karnataka
- b. Stress on medicinal plants
- c. Conservation of medicinal plants 8 hrs.

#### **Unit 6. Medicinal plants and biotechnology:**

- a. Outlines of cell and Tissue culture of medicinal plants.
- b. Outlines of bioreactors and hairy root culture 6 hrs.

#### **Unit 7. Therapeutic properties of medicinal plants**

- a. Plants with antimicrobial properties
- b. Lectins and their applications
- c. Saponins and their applications. 6 hrs.

#### **Unit 8. Formulations of Traditional medicines:**

- a. Arishta and Asava
- b. Arka
- c. Avaleha and Paka
- d. Ghruta
- e. Churna
- f. Satva 3 hrs.

**Unit 9. Cultivation of important medicinal plants.** 3  
hrs.

**Bot. EP-2.4 :PRACTICALS (Based on Bot. ET 2.4)**

1. Identification of medicinal plants including herbarium preparation
2. Study of Drug parts- Morphology and Anatomy
3. Phytochemical analysis (Pharmacognostic studies):
  1. Crude extract of drug by soxhlet extractor
  2. Test for phytochemicals- depending on available chemicals.
4. Preparation of drugs as per traditional system of medicine.
5. Estimation of Biomass of medicinal plants.
6. Visit to a field to document medicinal plants.

**SEMESTER- III:**

**Bot. CT-3.1 : PLANT PHYSIOLOGY**

- Unit 1 Bioenergetics** – First and second law of thermodynamics. Relation between reduction potential and free energy change. 3-  
hrs
- Unit 2** Study of glycolysis and citric acid cycle metabolic regulation of glycolysis and citric acid cycle.. 3-  
hrs
- Unit 3** Oxidative phosphorylation and photophosphorylation. Electron transfer reaction in mitochondria, light absorption by chloroplast pigments. External manipulation of pH in isolated chloroplast and mitochondria and ADP phosphorylation. 10- hrs
- Unit 4 Nitrogen metabolism** –  
Uptake of nitrate and its reduction. Catalytic and genetic regulation of nitrate

reductase. Symbiotic nitrogen fixation. 5-  
hrs

**Unit 5** Carbohydrate biosynthesis and inter conversion photosynthetic carbon reduction cycle and its regulation. C-4 pathways and photorespiration. Biosynthesis of sucrose, starch and cellulose.

4- hrs

**Unit 6 Lipid metabolism –**

Fatty acid Biosynthesis and oxidation. Biosynthesis and catabolism of storage lipids. Biosynthesis and function of membrane lipids.

5- hrs

**Unit 7 Membrane transport –**

Organization of transport at plasma membrane and tonoplast, pumps carriers and ion channels, P-type and V-type ATPases , ABC transporters, measurement of membranes potential and channel current. Regulation of membrane transport in guard cells.

8-  
hrs

**Unit 8 Plant growth regulators :** Mechanism of action of Auxins, gibberellins, cytokinins,

ethylene, abscisic acid, jasmonic acid, triacontinol and salicylic acid. 10-  
hrs

Signal and Signal transduction pathways in plants. K. Palme (Ed.) Kluwer Academic publishers 1994.

Annual review of Plant Physiology and Plant Molecular Biology.

## Bot. CP- 3.1 : PRACTICALS (Based on CT 3.1)

1. Effect of time and enzyme concentration on the rate of enzyme action.
2. Effect of substrate concentration and pH on enzyme action.
3. Extraction of total lipids from plant tissue purification by column chromatography analysis by TLC
4. Determination of lipase activity in germinating seeds.
5. Determination of chlorophyll a/b ratio in C3 and C4 plants.
6. Crassulacean acid metabolism.
7. Estimation of proline from stressed plants.
8. Gibberellin induction of amylase activity in cereal grains.
9. Effect of light , K, Ca and some inhibitions and against stomatal opening.

10. Determination of Photosynthesis rates in C3 and C4 plants using IRGA.

## **Bot. CT- 3.2 : CELL BIOLOGY AND GENETICS**

### **CELL BIOLOGY:**

**Unit 1** Organization of prokaryotic and eukaryotic cell, plasma membrane – molecular organization, cell differentiation.

**Unit 2** Nucleus – microscopic and sub microscopic organization. Structure and function of nuclear membrane. Nucleolus- ultrastructure and role in ribosome synthesis. 5- hrs

**Unit 3** Eukaryotic Chromosome – chromatin, its chemical nature, macro molecular organization. Heterochromatin and its significance, special types of Chromosomes, polytene and lamp brush Chromosome. Sex Chromosome, Structural change in Chromosomes. Numerical changes in Chromosome. Euploidy, haploidy, polyploidy.

6-

hrs

**Unit 4** Cytoskeleton – Microtubules, Cilia, flagella, structure and function of ER, Golgi complex, mitochondria, Chloroplast, lysosome and peroxisome. 4-

hrs

**Unit 5** Mechanism of cell division Mitotic apparatus, cytokinesis, Chromosome movement,

molecular mechanisms of regulating mitotic events, meiotic stages, chromosome pairing, Chiasma formation. Cell signaling, Signaling pathways in plants. Molecular biology of signaling.

6- hrs

### **REFERENCES:**

Cooper, G.M. 1997. The cell : A molecular approach. ASM press, USA .

Karp, G. 2000: Cell and molecular Biology: concepts of experiments. John Wiley and sons Inc. New York.

### **GENETICS**

#### **Unit I. Classical Genetics:**

a. Mendelism: Rediscovery of Mendel principles. Reasons for Mendel, character selected by Mendel. genotype, phenotype, back cross and test cross.

b. Multiple alleles: Self sterility in tobacco. Blood groups in man.

c. Gene interaction: Complementary genes (Flower colour in sweet pea) Albinism in maize (lethal genes in plants)

d. Multiple gene interaction: Colour of wheat kernel, corolla length in tobacco.

e. Linkage in sweet pea (coupling and repulsion) T series of linkage: differential

multiplication theory and chromosome theory of linkage and factors affecting linkage.

f. Chromosome mapping in maize and *Drosophila*.

g. Sex determination in plants.

i. Extra chromosomal inheritance (chloroplast, mitochondria and episome). 8 hrs

## **Unit II. Gene and gene concept:**

Structure of plant gene, function of gene, mutation of gene: Transition and transversion: silent mutation, frame-shift mutation, nonsense mutation and point mutation and role of mutation in evolution. Transposons, as elements, split genes, selfish genes.

### **Regulation of gene expression in prokaryotes:**

Concept of operon model and mechanism of operon model (structural genes, promoter genes, regulator genes and operator genes)

### **Regulation of gene expression in eukaryotes:**

Regulation, transcription, processing, translation, one gene and one enzyme hypothesis, one gene and one polypeptide hypothesis.

8 hrs

## **Unit III. Genetic engineering:**

Gene cloning recombinant DNA and PCR, vectors: plasmids, cosmids, molecular sensors restriction endonucleases and molecular sutures ligases. gene theory, gene banks DNA chips, cloning of *Nif* genes, isolation and introduction of *Nif* gene. Genetically modified plants and food.

9 hrs

## **REFERENCES:**

Tamarin, R.M. 2000 : Principles of Genetics,. 6<sup>th</sup> Ed. WMC. Brown Publ. Co. London.

Goodenough, U. 1990 : Genetics 4<sup>th</sup> Ed. Holt Saunders. Tokyo.

## **Bot. CP-3.2 : PRACTICALS (Based on CT 3.2)**

### **CELL BIOLOGY:**

1. Stains and dehydration grades for cytological studies.
2. Squash and smear preparations of mitotic and meiotic Chromosome, preparation of permanent slides.
3. Determination of Chromosome number at mitotic metaphase and diakinesis/metaphase I of meiosis.
4. Calculation of Chiasma frequency.
5. Isolation and separation of sub cellular organelles.
6. Identification of B – Chromosome. Polytene Chromosome in chironomus and fruit fly.

## GENETICS:

1. Culture techniques and handling of fruit flies.
2. Life cycle of *Drosophila melanogaster*.
3. Identification of male and female flies.
4. Observation of mutant flies.
5. Crossing experiments and simple mendelian inheritance in fruit flies.
6. Study of growth curve in *E. coli*.
7. Conjugation in *E. coli*.
8. Problems in Genetics.

## Bot. CT-3.3 : DEVELOPEMENTAL BIOLOGY OF PLANTS AND TISSUE CULTURE

### Unit 1. Polarity in plants:

- a. Acellular, (Dictyostelium)
- b. Unicellular, (Acetabularia, Fucus egg, Equisetum spore)
- c. Multicellular, (Root hair and stigma formation)
- d. Organ, (Dorsiventral leaf)
- e. Colonial, (Volvox colony).

07

hrs

### Unit 2. Apical meristem:

Ultra structure, Biochemical activities, Regeneration and denovo in culture, split and damage apices. Bud dormance, Gene expression in shoot apex and SAM mutants. Quiescent center, genetics of root development.

07

hrs

### Unit 3. Leaf primordium:

Phyllotaxis, Mechanism of leaf primordium initiation. Experimental model of modification of positioning, Genetics of phyllotaxy, plastochorns. Transition of reproductive phase, Phase change and developmental switching at the apex. Vernalization and changes in biochemical activity.

07 hrs

### Unit 4. Developmental patterns at the flowering apex.

ABC model, and specification of floral organs homeotic mutants, reversal of flowering,

Molecular aspects of MADS box genes during, flower development. Modification of gene action by growth substances, Cellular differentiation between floral organs.

Senescence- a general account.

06

hrs

### Unit 5. Androgenesis and Gynogenesis:

Ultrastructural, Histochemical, Genetical and Functional aspects. Concept of male and female germ unit and their significance.

### Unit 6. Pollination and Fertilization:

Structural, Functional aspects of pollen style stigma. Current view of double fertilization and development of endosperm and its function.

07 hrs

### Unit 7. Cellular and biochemical aspects of embryogenesis:

Gene activity during zygotic embryogenesis. Structure and function of embryo suspensor.

Photo-morphogenesis, Photoreceptors. Structure and function. Photo-responses and molecular mechanism. 06 hrs

**Unit 8. Plant tissue culture:**

Laboratory organization, Nutrient media, Sterilization techniques, Micropropagation, Cell suspension culture, Haploid production, Protoplast isolation and fusion. Cryopreservation, Production of synthetic seeds. *In vitro* production of zygotes. 10 hrs

**REFERENCES:**

1. Embryology of Angiosperms (1984) Ed. B.M. Johri Springer-verlag Publications

7. Plant morphogenesis by Sinnott
8. Plant tissue culture by M.K. Razdhan

**Bot. CP 3.3 PRACTICALS (BASED ON Bot. CT 3.3)**

1. Development of Anther and ovule / Permanent slide preparation
2. Histochemical test of Anther and ovule at different stages of development
3. Preparation of Brewbaker or Kwakh medium for pollen germination
4. Hanging drop technique for pollen germination
5. Pollen acetolysis to study pollen exine ornamentation and aperture
6. Mounting of embryo and endosperms
7. Preparation of MS media for plant tissue culture
8. Inoculation of explants on a nutrient medium
9. Root apical and shoot apical meristem
10. Callus histology/cytology

**Bot. ET- 3.4 : PLANT BIOTECHNOLOGY :**

**Unit 1** Introduction: Definition Old and New Biotechnology. An interdisciplinary activity, Scope and importance, commercial potential, Biotechnology centers in India.  
3 hrs.

**Unit 2** Biofertilizers: Introduction, Types, Blue green algae, Sea weeds, Azolla, Vesicular arbuscular mycorrhizal fungi and Rhizobium. 6 hrs

**Unit 3** Industrial Biotechnology: Introduction, Industrial microbial products: Alcohol production (Beer), Antibiotics production (penicillin), production of Vitamins (Vitamin B<sub>12</sub>), production of Single Cell Protein, Algal protein: (Spirulina) Fungal protein: (Mushroom) and economic aspects.  
10 hrs

**Unit 4** Plant Tissue Culture: Introduction. Importance of plant tissue culture, Basic requirements for tissue culture laboratory, composition of tissue culture medium. Culture of plant tissues, Regeneration of plants, Root culture, meristem culture, Anther culture, Pollen culture. Role of tissue culture technology in crop improvements.  
10 hrs

**Unit 5** Biofuels: Introduction, Production of biogas, Structure of biogas plant, Biochemistry of methane production, Biogas research in India, Uses of biogas.  
5 hrs

**Unit 6** Plant Biotechnology Introduction, Somatic hybrids and cybrids, cytoplasmic gene transfer, gene transfer, Advantage and Limitations. 4 hrs

**Unit 7** Genetic Engineering: Introduction, Genetic Engineering of microorganisms, Vectors of gene cloning direct transformations, Microinjection, Nuclear transplantation, Isolation and cloning plasmid and Mitochondrial genes. Transgenic plants with *nif* genes. Improvement of seed proteins, production of disease free and disease resistant plants.  
12 hrs

### **SEMESTER- IV**

#### **Bot. CT-4.1 MYCOLOGY AND PLANT PATHOLOGY:**

##### **MYCOLOGY**

##### **Unit 1 Biological feature of fungi –**

Structure, mobility, life cycle pattern in fungi, reproduction – Asexual and sexual.

10-

hrs

**Unit 2** Structure and types of soil. Biological population and its relation with mycoflora. Perdation, parasitism and antagonism. Rhizosphere, Rhizoplane and non- Rhizosphere

fungi. Ecosystem and fungal community. 8-  
hrs

**Unit 3 Fungal physiology –**

Nutrition of carbon nitrogen, mineral, vitamin and growth regulators. Metabolisms and biosynthesis of carbohydrates and non-carbohydrates and nitrogen. 4  
hrs

**Unit 4** Secondary metabolites and their role. Fungi as genetic organism for genetic study 4  
hrs

**PLANT PATHOLOGY**

**Unit 1 .** The concept of disease in plants, classification of plant disease, attack of pathogens mechanical forces, chemical weapons, enzymes. Microbial toxins and growth regulators. 8  
hrs

**Unit 2.** Plant defense mechanism against pathogens, genetics of plants disease epidemiology. 4  
hrs

**Unit 3.** Management and control of plant disease. 3  
hrs

**Unit 4** Application of Biotechnology in relation to plant pathology. 4  
hrs

**Unit 5.** Environmental factors that cause plant disease. 5  
hrs

## **Bot. CP. 4.1 PRACTICALS (Based on CT 4.1)**

### **MYCOLOGY**

1. Vegetative organization in fungi.
2. Asexual reproduction in fungi.
3. Sexual reproduction in fungi.
4. Rhizosphere, Rhizoplane, phylloplane studies of fungi.
5. Fungal physiology – Growth and nutritional studies.

### **PLANT PATHOLOGY**

1. Disease of cereal crops.
  - a) Blast disease of Rice.
  - b) Yellow smut of wheat.
  - c) Loose smut of wheat.
  - d) Downy mildew of sorghum.
  - e) Anthraenose of sorghum
2. Disease of plantation crops.
  - a) Downy mildew of grapes.
  - b) Leaf rust of coffee.
  - c) Tikka disease of ground nut.
  - d) Late blight of potato.
3. Others -
  - a) Bean mosaic disease.
  - b) Sandal spike.
  - c) Tobacco mosaic virus disease.
  - d) Citrus canker.
  - e) Grass root sugarcane
  - f) Root knot of mulberry.
4. Isolation and inoculation of plant pathogens.
5. Estimation of spore production of fungal pathogens of leaves using Haemocytometer method.

Air dispersal of plant pathogens – an investigation using rotord sampler.

## **Bot. CT-4.2: PLANT BREEDING AND PLANT PROPAGATION**

### **PLANT BREEDING:**

#### **Unit 1. History and scope of plant breeding.**

5 Hrs

#### **Unit 2. Plant Genetic resources:**

- a. Importance and urgency.
- b. Sources of germplasm
- c. Systematic evaluation and utilization

d. Germplasm conservation	
e. Global and National organization for crop improvement	
f. Pattern of evolution in crop plants.	5
hrs	
<b>Unit 3. Conventional breeding methods:</b>	
a. Reproduction, Genetic basis, Sexual and crosspollination, Apomixis, Genetics induction and significance in plant breeding.	
b. Domestication, Plant introduction and acclimatization. Selection in self, cross pollinated and vegetative propagated plants.	
c. Hybridization: In self and cross pollinated plants. Vegetative propagated plants.	
d. Back cross: Technique and importance.	7
hrs.	
<b>Unit 4. Heterosis breeding</b>	
a. Inbreeding depression	
b. Homozygous and heterozygous balance	
c. Genetic basis of heterosis	
d. Heterosis and plant breeding	3
hrs.	
<b>Unit 5. Difference between production breeding to disease resistance</b>	
a. Types of resistance – Vertifolia effect, epiphytosis, vertical and horizontal resistance	
b. Genetics of post and parasite relation ship.	
c. Genetics of insect resistance	
d. Mechanism of drought resistance	
e. Genetics of drought resistance	
f. Breeding methods for disease insect and drought resistance	7
hrs.	
<b>Unit 6. Distant hybridization</b>	
a. Introduction history	
b. Barrier to the production of distant hybridization	
c. Techniques for production of distant hybrids.	
d. Sterility in distant hybrids.	
e. Consequence of segregation in distant hybrids.	
f. Importance of distant hybridization in crop improvement.	5
hrs.	
<b>Unit 7. Quality seeds.</b>	
a. Classes.	
b. Production	
c. Maintenance	
d. Development of seed industry	
e. The Indian seed act.	4
hrs.	
<b>PLANT PROPAGATION:</b>	
<b>Unit 1. Principles and concepts of plant propagation.</b>	1
hrs	

<b>Unit 2. Propagating structures :</b>	
Green house , shade house , net house, mist propagation unit, containers for growing plants.	2
hrs	
<b>Unit 3. Media for propagation –</b>	
Treatment of soil and soil mixtures, Fertilizers and sanitation	2
hrs	
<b>Unit 4. Plant nurseries –</b>	
Types, sites for their establishment, design and management.	2
hrs	
<b>Unit 5. Seed propagation –</b>	
Seed selection, testing and storage; principles and techniques, advantages and limitations; process of seed germination, seed dormancy, treatment to overcome pathogens. Seed viability tests, seed testing and seed certification (seed patent law). Hardening of seedlings.	
2 hrs	
<b>Unit 6. Vegetative propagation –</b>	
Advantage and limitations. Sources, selection and management of the vegetative propagation	4
hrs	
<b>Unit 7. Clones- Breeding of asexually propagated plants</b>	
Source production and viability and maintenance. Genetic variability. Techniques of propagation by cutting; types of cuttings, rooting media, factors influencing rooting, treating cuttings with growth regulators, leafy cuttings.	2
hrs	
<b>Unit 8. Propagation by specialized vegetative structures ;</b>	
Bulbs, tubers, corms, rhizomes, runners, suckers,	2
hrs	
<b>Unit 10. Layering and its natural modifications:</b>	
Types and procedures of layering; Factors affecting regeneration by layering.	2
hrs	
<b>Unit 11. Techniques of grafting and budding :</b>	
Objectives ,methods and limitations, stock-scion relationship; micro grafting and microbudding; graft incompatibility : tools and accessories required for cutting, grafting and budding.	
2 hrs	
<b>Unit 12. Propagation methods of some important plants :</b>	
Fruits and nuts; medicinal and aromatic plants; vegetables, ornamentals; succulents and cacti , house plants.	
2 hrs	
<b>Unit 13. Hydroponics:</b>	
A general account.	2
hrs

#### **Bot. CP- 4.2 : PRACTICALS : (Based on Bot. CT 4.2)**

1. Reproductive biology
  - a. Self, b. Cross pollinated plants, c. Vegetative reproduction
2. Hybridization : Emasculation, bagging and production of hybrids if possible apparent pollen fertility.
3. Origin, distribution and centers of diversity of crop plants: Wheat, Sorghum, Rice, Chilly, sugarcane, Cotton, Potato, Coffee, Sunflower and Ground nut.
4. Preparation of media- treatment of soil and soil mixtures.
5. Breaking of seed dormancy and growing seedlings after treating with hormones.
6. Propagate the bulbs (Lilium, tubers (Potato, Begonia), corms (Gladiolus), Rhizome (Canna) Sucker (Banana).
7. Different types of layering (Simple layering, Tit layering, serpentine layering, Air layering; stool layering).
8. Grafting experiments – Whip (or splice) grafting methods; side grafting; bark grafting, T-budding; Inverted T- budding; chip budding.
9. Demonstrate the experiments on the propagation of succulents by cutting and cacti by grafting.

#### **SPECIAL PAPERS:**

#### **Bot. CT-4.3.1. PLANT TISSUE CULTURE**

##### **TISSUE CULTURE:**

##### **Unit 1. Cellular toti potency –**

Cytodifferentiation, organogenesis, factors affecting organogenic differentiation. 2 hrs

##### **Unit 2. Somatic embryogenesis –**

Induction, development and maturation. Factors affecting somatic embryogenesis, applications of somatic embryogenesis and synthetic seeds. Molecular biology of somatic embryogenesis: induction, development, synchronizing somatic embryo

- development. Hormonal regulation of somatic embryogenesis. Late embryogenesis abundant (LEA) gene expression. Genes isolated from somatic embryos. Expression of 'non embryonic' genes during somatic embryogenesis. Somatic embryo as a genetic system.  
5 hrs
- Unit 3. Haploid production –**  
Androgenesis, anther and microspore culture, factors influencing anther/microspore culture, gynogenesis, production of haploids by wide hybridization. Applications. 4hrs
- Unit 4. Triploid production –**  
Methods and applications. 2 hrs
- Unit 5. In vitro pollination and fertilization –**  
Methods, factors affecting seed setting after in vitro pollinations, application. 2 hrs
- Unit 6. Zygotic embryo culture –**  
Techniques, culture requirements, applications. 2 hrs
- Unit 7. Somaclonal and gametoclonal variations:**  
Origin of somaclonal variation, mechanism underlying genetic variations, assessment of somaclonal variations. Isolation of variants – disease resistant lines, herbicide resistant lines, stress tolerant lines, applications. 4 hrs
- Unit 8. Protoplast isolation and culture –**  
Isolation, culture and regeneration of protoplasts. 4 hrs
- Unit 9. Somatic hybridization and cybridization –**  
Protoplast fusion methods, selection of hybrids and cybrids, assessment of hybridity. Molecular analysis of nuclear genes and organellar genes in the somatic hybrids/cybrids. Protoplasts as a tool in cell biology and biotechnology. 4 hrs
- Unit 10. Production of disease free plants-methods of virus elimination, eradication of pathogens other than viruses.**  
2 hrs
- Unit 11. Micro propagation:**  
Techniques, multiplication by axillary and apical shoots, multiplication by adventitious shoots, multiplication through callus cultures, factors influencing shoot multiplication and rooting. Acclimatization of plants transferred to soil. 4 hrs
- Unit 12. Production of secondary metabolites –**

Application of tissue culture for synthesis of useful compounds. Techniques of selecting cell lines for high yields of compounds of secondary metabolism. Mass cultivation of cells by bioreactors. Elicitor induced accumulation of products. 4 hrs

**Unit 13. Germplasm conservation –**  
Methods of conservation, cryopreservation.  
hrs

4

## Bot. CP-4.3.1 PRACTICALS : (Based on Bot. CT 4.3.1)

### PLANT TISSUE CULTURE

1. Micropropagation by proliferation of axillary bud.
2. Anther culture for haploid production.
3. Microspore culture for haploid production.

4. Protoplast isolation and culture.
5. Embryogenesis in cultured cells/tissues.
6. Preparation of synthetic seeds.
7. Extraction and quantification of secondary metabolites from callus.
8. PCR technique
9. Co-cultivation of leaf discs with *Agrobacterium* and study of GUS.

## **Bot. CT-4.3.2 : REPRODUCTIVE BIOLOGY OF HIGHER PLANTS**

**Unit 1. Introduction Reproductive biology** 1 hr

**Unit 2. Anther** – Composition and reorganization of cytoplasmic constituents in the meiocytes

during meiosis; Pollen formation : Structure and composition of pollen. The concept and significance of Male Germ Unit ; Formation of Generative and male cells in the pollen-their isolation, biochemistry, physiology and cytoskeletal organization. Complexity and specificity of sporophytic and gametophytic gene expression during anther development. Anther tapetum- Structure, composition and function. Pollen wall biology- Composition and function.

10 hrs.

**Unit 3. Pollen tube :**

Growth, composition chemotropism and cytoskeletal organization. 04 hrs.

**Unit 4. Ovule :**

Composition and cytoplasmic reorganization in the megasporocyte during meiosis; Megagametophyte- Structure, Composition and role of its constituent cells. The concept and significance of Female Germ Unit. Cytoskeletal organization of the megagametophyte cells. Expression of sporophytic and gametophytic specific genes during ovule and female gametophyte formation. Mutants that affect the development of pistil, ovule and female gametophyte.

10

hrs.

**Unit 5. Pollination :**

Structure, composition and function of stigma and style. Composition and role of stigmatic exudate and stylar matrix; Pollen-pistil interaction, Fertilization- Current outlook of double and preferential fertilization and their significance.

05hrs.

**Unit 6. *In vitro* fertilization and development of artificial zygotes and embryo through micromanipulation of male and female gametes.**

**Unit 7. Male sterility-**

Causes, biochemical and molecular aspects of cytoplasmic male sterility.

05hrs.

**Unit 8. Sexual incompatibility-**

Physiological and Biochemical mechanism of sporophytic and gametophytic self-incompatibility. Barriers of incompatibility

05hrs.

**Unit 9. Embryogenesis-**

Role of cellular and biochemical components during embryogenesis. Embryo suspensor- Biochemical, Physiological and Functional aspects. Regulation of gene activity during embryogenesis. Embryo mutants- lethal mutants, apical-basal mutants, pattern mutants and radial axis mutants.

05hrs.

#### **Unit 10. Endosperm-**

Biochemistry, Physiology and function.

05

hrs.

#### **References:**

1. Embryology of Angiosperms (1984) Ed. B.M. Johri Springer-verlag Publications

7. Plant morphogenesis by Sinnott
8. Plant tissue culture by M.K. Razdhan

#### **Bot. CP-4.3.2: PRACTICALS (Based on Bot CT 4.3.2)**

1. Preparation of thin sections to assess the cytoplasmic contents in the meiocytes during meiosis, tapetum and pollen, using carbohydrates, proteins and RNA test.
2. Preparation of thin sections of ovule to verify the chemical composition of female germ unit using carbohydrates, proteins and RNA tests.
3. Effect of Boron, calcium and volatile substances polluted gases on pollen germination and tube growth.
4. Experiment to know the chemotropic effects of calcium and /or pistillar tissues and pollen.
5. Composition of pollen tube and stigmatic papillae using cytochemical tests.
6. *In vivo* growth of pollen tube using appropriate stains.
7. Conduct the experiment on isolation of generative/male cells from the pollen using osmotic shock method (*Vicia faba*).
8. Isolate the embryo sac by using micromanipulation method.
9. Isolate the embryo suspensor and analyze the chemical composition in it by using cytochemical tests.
10. Microtome sections of ungerminated and germinated monocot/dicot plant embryos to show the chemical composition in the root apical meristem and shoot apical meristem.

11. Diagrammatic representation of different ovular mutants.
12. Diagrammatic representation to show the expression of different genes during the development of embryo in Arabidopsis or any other plant investigated.

**Bot. CT-4.3.3: APPLIED MICROBIOLOGY, APPLIED MYCOLOGY AND PLANT PATHOLOGY**

**APPLIED MICROBIOLOGY:**

**Unit 1 Agricultural Microbiology :** The rhizosphere, rhizosphere effect, Nitrogen fixation in the rhizosphere, growth promoting rhizobacteria, siderophores, mycorrhizae, Phosphate solubilizing bacteria and Actinorhizal symbiosis i.e.(Frankia induced nodulation).The new green revolution, gene exchange in bacteria, *Agrobacterium* mediated transfer of genes(Gene protection technology for plants) Anti body mediated resistance , Resistance due to inter-feron related genes, Manipulation of host genes for plant protection. Risks and Benefits.

4 hrs

**Unit 2 Industrial Microbiology:** Fomenters : Fermentation process, types of fermentation , alcoholic fermentation (Beer and Wine) , Organic acid fermentation (Citric acid) antibiotics production : (Penicillin) Enzymes (amylase),Production of steroid hormones, vaccines and production of Methane.

4 hrs

**Unit 3 Dairy Microbiology:** Sources of microbial contamination of milk , Types of microorganisms in milk- bacteria, fungi and yeast. Microbial examination of milk. Lactic acid production. Fermented dairy products. Methods of preservation of milk and milk products, pasteurization and sterilization.

4

hrs

**Unit 4 Environmental Microbiology :** Bio remediation, bio remediation of hydrocarbons, bio remediation of heavy metals, bio remediation of xenobiotics, Microbial leaching, Biomining , Bioleaching of copper , uranium and gold. Recovering of minerals from microorganisms, recovering of oil and single cell oil.

3 hrs

**Unit 5 Water Microbiology:** Types of water- Atmospheric water and Surface water, stored water and ground water, Microbial analysis of water, sanitary test for coliforms (presumptive test, confirmed test, completed test). IMViC test, purification of water sedimentation, filtration (slow sand filtration, rapid sand filtration) disinfection

3hrs

**Unit 6 Immunological Techniques:** Serological tests, precipitation of VDRL test for syphilis, ABO blood typing, Enzyme –linked immunosorbent assay (ELISA). Hybridoma technology, Radio immunoassay, Monoclonal antibodies , man made antibodies, production of antisera, vaccines and common immunization.

4 hrs

**APPLIED MYCOLOGY**

**Unit 1** Preservation and maintenance of cultures, Batch, synchronous, continuous, and phased culture and their applications.

6

hrs

**Unit 2** Mushroom production technology – advancement in technology of Mushroom cultivation with reference to strain improvement, wild edible mushrooms,

cultivated species in India and abroad.

6 hrs

**Unit 3** Non-industrial fungal metabolites, phytoalexins, hormones, pigments, lichen products and mycotoxins.

6 hrs

**Unit 4** Production of pharmaceutical products, fungal enzymes and their industrial applications. Production of single cell protein and feed stuffs

6

hrs

#### **PLANT PATHOLOGY:**

**Unit 1** Nature and concept of epidemiology of plant diseases. Inoculum production potential and distribution.

4 hrs

**Unit 2** Mechanism of infection, effect of environment on multiplication of pathogen and outbreak of disease.

4

hrs

**Unit 3** Defense mechanism systems in plants Biochemical and physiological changes in plants due to infection, Preventive measures – physical, chemical and biochemical methods.

6

hrs

**Unit 4** Plant disease forecasting, post harvest pathology, forest pathology and plant Quarantine.

6hrs

**Unit 5** Specific plant diseases – plant diseases caused by fungi, plant diseases caused by bacteria, virus, mycoplasma, nematodes, and parasitic higher plants.

6

hrs

### **Bot. CP-4.3.3: PRACTICALS (Based on Bot CT 4.3.3)** **APPLIED MICROBIOLOGY**

1. Study of diseases caused by Virus and Mycoplasm
2. study of rhizosphere microflora
3. study of phyllosphere microflora
4. Enumeration of micro organisms from spoiled vegetation
5. Examination of VAM in roots and isolation of VAM spores from rhizosphere soil.
6. Isolation and culturing of Rhizobium from root nodules in leguminous plants.
7. Microbial analysis of milk.

### **APPLIED MYCOLOGY:**

1. Stimulatory effect of plant extracts on spore germination of fungal pathogens.
2. Mushroom cultivation.
3. Paper chromatographic separation of amino acids from culture filtrates.
4. Detection and separation of mycotoxins by TLC.
5. Enzymatic reactions – degradation of carbohydrates.

### **PLANT PATHOLOGY:**

1. Market pathology of fruits, vegetables and seeds.
2. Qualitative and quantitative analysis of air borne pathogens.
3. Germination of powdery mildew conidia at different relative humidity levels.
4. Biochemical analysis of diseased plants.

## **Bot. CT 4.3.4 PHYTODIVERSITY AND ENVIRONMENTAL BIOLOGY**

### **PHYTODIVERSITY**

**Unit 1.** Introduction to phytodiversity and its classification- Genetic, specific and ecosystem diversity  
hrs. 2

**Unit 2. Floristic diversity in India:**  
a. Status of plant diversity  
b. Types of forests and their status  
c. Biogeographic zones of India.  
hrs. 6

**Unit 3. Climate and vegetation of Karnataka:**  
a. Floristics in Karnataka.  
b. Physiography, Geology, Soil and bioclimate of Karnataka  
c. Vegetation of Karnataka- A comparison of Western and Eastern Karnataka.  
d. A brief account of forest covers in Karnataka.  
hrs. 6

**Unit 4. Special phytodiversity centers:**  
a. Concept of Hot spots  
b. Hot spots in India  
c. Phytodiversity of the Western Ghats  
d. Mangrove ecosystems- Emphasis to Karnataka and Sunderbans.  
e. The Myristica swamps.  
f. The Tropical montane forests.  
hrs. 6

**Unit 5. Values and conservation of phytodiversity:**  
a. Ecological importance of species diversity.  
b. Uses of plants.  
c. Concept of RET plants.  
d. Ex situ and in situ conservation  
e. Biological Diversity Bill.  
hrs. 6

### **ENVIRONMENTAL BIOLOGY**

**Unit 1.** Structure and composition of Atmosphere, Lithosphere, Hydrosphere and Biosphere.  
Mass and energy transfer across the various interfaces. Material balance. 5  
hrs

**Unit 2.** Chemicals in Environment: 5  
hrs

- a. Air- Chemical composition of air, ambient air quality standards. Natural and anthropogenic sources of pollution. Primary and secondary pollutants. PAN, Smog, Acid rain and effects of pollutants on biota and materials.
- b. Water- Chemistry of water. Types, sources and effects of water pollutants. Water quality standards- Physico chemical and Biological.
- c. Soil- Structure and physico-chemical properties of soil. Soil pollution and control. Soil microorganisms and their function.

5 hrs

**Unit 3.** Environmental toxicology:

Definition, Toxic chemicals, their routes, bioaccumulation (xenobiotics), effects.

Pesticides in water. Biochemical aspects of arsenic, Cadmium, Lead and Mercury. 5 hrs

**Unit 4.** Environmental monitoring and management:

a. Physicochemical and biological monitoring

b. Remote sensing and geographical information system.

c. Biodegradation of pollutants- Role of microorganisms in the degradation of pollutants.

**Unit 5.** Environmental protection and conservation:

5

hrs

Environmental education and awareness. Environmental legislation ( a brief review of constitutional provisions and various environmental Protection Acts). Current environmental issues in India.

5

hrs

## PRACTICALS Bot. CP.4.3.4 (Based on Bot. CT 4.3.4)

## PHYTODIVERSITY

1. Phytodiversity of wetland ecosystem-Freshwater Plankton Study: Measurement and Diversity.
2. Phytodiversity of Wetland ecosystem- Marine Plankton study.
3. Study of mangroves- morphological and anatomical.
4. Phytodiversity of terrestrial ecosystem:
  - a. Stomatal index
  - b. Study of bark and branching.
  - c. Study of vein-lets
5. Phytodiversity utilization:  
The agarophytes, biofertilizers, biopesticides, medicinal plants etc.

## **ENVIRONMENTAL BIOLOGY**

1. Water Analysis:
  - a. Estimation of BOD and COD
  - b. Estimation of PO<sub>4</sub>, SO<sub>4</sub> and NO<sub>3</sub>.
  - c. Estimation of Major Cations- Na, K, Ca, Mg and Salinity
2. Effect of DDT and other pesticides on primary production.
3. Effect of Industrial effluent/Heavy metals on seed germination and seedling growth.
4. Estimation of Chlorophyll, Proline, Ascorbic acid in leaves of plants growing in polluted and unpolluted areas.
  - a. Sampling and identification of air spora.
  - b. Estimation of heavy metal content of road side plants.
  - c. Field excursion to an industrial area to assess environmental impact.

## P.G. Department of Studies in Botany, KARNATAK UNIVERSITY, DHARWAD

Core papers	I Sem	Page No from - To
CT 1.4 Molecular Biology	Sem.	38-39
OEC 2.4 Medicinal Plants	II Sem	45-46
OEC ET 3.4 Plant biotechnology	III Sem	52-53
CT 4.4 Project	IV Sem.	
Based on special paper CT.4.3.1,4.3.2,4.3.3 and 4.3.4		60-67

Chairman

M.Sc. Chemistry  
(Inorganic, Organic, Physical and Analytical Chemistry)

Choice Based Credit System  
(CBCS)

*Revised Syllabus*  
(w.e.f. 2019-20)

**Specific Course Outcome (Inorganic Chemistry)**

<b>Paper code and name</b>	<b>PG75T101A: Inorganic Chemistry–I</b>
<b>COURSE OUTCOMES</b>	
After studying this paper, students would learn <ul style="list-style-type: none"><li>➤ Properties of ionic compounds.</li><li>➤ Relationship between radius ratio and structure of ionic compounds.</li><li>➤ Structure and bonding in covalent inorganic compounds, based on various bonding theories viz. VSEPR, VBT and MOT.</li><li>➤ Band theory and its use in classification of materials such as conductors, insulators and semiconductors.</li><li>➤ Basics of organometallic chemistry, viz. 18 and 16 electron rules.</li><li>➤ Synthesis, structure, bonding and reactions of representative organometallics.</li><li>➤ Bonding theories in coordination compounds viz. MOT</li><li>➤ Basics of electronic spectra and magnetism.</li><li>➤ Stability of metal complexes, with reference to nature of metal and ligand.</li><li>➤ Theories of acids and bases.</li><li>➤ Basics of solid state chemistry, crystallographic methods, crystal defects and band theory.</li></ul>	

## PARTICULARS

### UNIT-I

#### **Structures and Energetics of Ionic Crystals and Covalent Bonds:**

Ionic Bond: Properties of ionic compounds, crystal lattices, closed packed structures, coordination number of an ion, radius ratio rule, structures of crystal lattices- NaCl, CsCl, ZnS and rutile. Lattice energy: Born Lande equation, Born-Haber cycle, uses of Born-Haber type of calculations. Covalent character in ionic bonds, Fajan's rules, hydration energy and solubility of ionic solids.

Covalent Bond: Valence bond theory, resonance, hybridization and energetics of hybridization. VSEPR theory: Deduction of molecular shapes. MOT of homo and heteronuclear molecules and MO treatment for the molecules involving delocalized  $\pi$ -bonding ( $\text{CO}_3^{2-}$ ,  $\text{NO}_3^-$  and  $\text{CO}_2$ ).

Walsh diagrams and Bent's rule.

(12 Hours)

### UNIT-II

#### **Coordination Chemistry:**

Coordination numbers 2–10 and their geometries. Crystal field theory of coordination compounds: octahedral, square planar, tetrahedral, trigonal bipyramidal and square pyramidal fields, measurement of  $10 Dq$  and factors affecting it, CFSE, Spectrochemical series and Jahn–Teller effect.

Structural evidences for ligand field splitting: hydration, ligation and lattice energies. Evidences for covalency in M–L bonding. MO theory of coordination compounds: MO energy level diagrams for octahedral and tetrahedral complexes without and with  $\pi$ -bonding.

Electronic Spectra: Spectroscopic ground terms, Orgel diagrams for transition metal complexes ( $T_d$  &  $O_h$ ).

Magnetism: Types, spin moment, spin–orbit coupling.

(12 Hours)

### UNIT-III

#### **Stability of Metal Complexes, Concepts of Acids and Bases and Non-aqueous Solvents:**

Stability of complexes: Step-wise and overall formation constants, factors affecting stability of metal complexes, determination of stability constants of metal complexes by spectrophotometric and polarographic methods.

Concept of acids and bases: Theories of acids and bases, Bronsted and Lewis acids and bases, Lux–Flood theory, leveling effect of solvents, hardness and softness, HSAB concept and its applications.

Non-aqueous solvents: Classification of solvents, properties of non-aqueous solvents. Reactions in non-aqueous media: Liquid ammonia, anhydrous sulphuric acid, anhydrous HF, liquid sulphur dioxide. Super acids.

**(12 Hours)**

#### **UNIT–IV**

##### **Solid State Chemistry:**

Crystal lattice: Unit Cell, Miller indices and planes, X–ray diffraction method, molecular solids, hydrogen bonding, metallic, covalent and ionic solids; structural classification of binary and tertiary compounds, determination simple structure, spinel and perovskite structures.

Band theory, conductors, semiconductors and insulators, energy bands, intrinsic and extrinsic semiconductors.

Perfect and imperfect crystals, intrinsic and extrinsic defects, point–, line– and plane–defects. Vacancy, Schottky and Frenkel defects. Schottky and Frenkel defect formation, colourcentres, non–stoichiometry.

**(12 Hours)**

**Total 48 Hours**

##### ***Recommended Books:***

1. Inorganic Chemistry–Principles of Structure and Reactivity, 4<sup>th</sup>Edn–J. E. Huheey, E.A. Keiter, R. L. Keiter and O.K. Medhi. Pearson Education (2009).
2. Shriver & Atkins’ Inorganic Chemistry, 5<sup>th</sup> Edn–P. Atkins, Tina Overton, J. Rourke, Mark Weller and F. Armstrong.Oxford University Press (2010)
3. Inorganic Chemistry, 2<sup>nd</sup>Edn. Catherine E. Housecroft and A.G. Sharpe, Pearson Prentice Hall (2005)
4. Concise Inorganic Chemistry–J. D. Lee, 5<sup>th</sup>Edn, New Age International (1996).
5. Solid State Chemistry and its Applications–A. R. West, John-Wiley and sons.

6. Solid state Chemistry–N. B. Hannay, Prentice-Hall of India Pvt. Ltd. New Delhi.

<b>Paper code and name</b>	<b>PG75P101A: Lab Course in Inorganic Chemistry</b>
<b>COURSE OUTCOMES</b>	
<p>➤ Student would learn to separate and determine the metal ions using gravimetric and volumetric methods such as</p> <ul style="list-style-type: none"> <li>❖ Fe(II) + Ni (II)</li> <li>❖ Fe(II) + Cu(II)</li> <li>❖ Zn(II) + Cu(II)</li> <li>❖ Zn(II) + Ni(II)</li> </ul> <p>➤ Students are also exposed to synthetic methodologies of the preparation of coordination compounds.</p>	

<b>PARTICULARS</b>
<ol style="list-style-type: none"> <li>Determination of iron in hematite ore using cerium(IV) solution (0.02M) as the titrant and gravimetric determination of insoluble residue.</li> <li>Determination of calcium and magnesium carbonates in dolomite ore using EDTA titration and gravimetric analysis of insoluble residue.</li> <li>Quantitative analysis of copper-nickel in alloy/mixture:             <ol style="list-style-type: none"> <li>Copper volumetrically using <math>\text{KIO}_3</math></li> <li>Nickel gravimetrically using DMG</li> </ol> </li> <li>Determination of lead and tin in a mixture: Analysis of solder using EDTA.</li> <li>Determination of Cr(III) and Fe(III) in a mixture: Kinetic masking.</li> <li>Quantitative determination of iron(III) gravimetrically and calcium(II) volumetrically in a mixture.</li> <li>Determination of iron(II) and nickel (II) in a mixture:             <ol style="list-style-type: none"> <li>Iron(II) volumetrically using <math>\text{K}_2\text{Cr}_2\text{O}_7</math> solution</li> <li>Nickel gravimetrically using DMG solution</li> </ol> </li> <li>Quantitative analysis of chloride and iodide in a mixture:             <ol style="list-style-type: none"> <li>Iodide volumetrically using <math>\text{KIO}_3</math></li> <li>Total halide gravimetrically</li> </ol> </li> <li>Preparation of complexes:             <ol style="list-style-type: none"> <li>Tris (thiourea) copper(I)sulphate monohydrate and</li> </ol> </li> </ol>

ii) Tris (oxalato) aluminate (III)

**Recommended Books:**

1. Fundamental of Analytical Chemistry, D.A. Skoog, D.M. West, Holler and Crouch 8th edition, 2005, Saunders College Publishing, New York.
2. Analytical Chemistry, G.D. Christian, 5th edition, 2001 John Wiley & Sons, Inc, India.
3. Vogel's Textbook of Quantitative Chemical Analysis, J. Mendham, R.C. Denney, J.D
4. Barnes and M.J.K. Thomas, 6th edition, Third Indian Reprint, 2003, Pearson Education Pvt. Ltd., New Delhi.
5. Practical Inorganic Chemistry– G. Pass and H. Sutcliffe, Chapman and Hall Ltd (1968)

<b>Paper code and name</b>	<b>PG75T201A:Inorganic Chemistry–II</b>
<b>COURSE OUTCOMES</b>	
After studying this paper, students would learn	
<ul style="list-style-type: none"><li>➤ Synthesis, properties and structures of compounds of non-transition elements such as B, Si, P, N, S, Halogens and Noble gases.</li><li>➤ Structure and Properties of interhalogen compounds, oxyacids.</li><li>➤ Synthesis, structure and bonding in transition metal organometallic compounds.</li><li>➤ Classification of molecules on the basis of point groups.</li><li>➤ Applications of group theory in chemical bonding and spectroscopy (IR and Raman).</li></ul>	

<b>PARTICULARS</b>
<b>UNIT–I</b>
<b>Chemistry of Non-Transition Elements:</b>
Alkali and alkaline earth metal complexes of crown ethers, cryptands and calixarenes and their biological importance.
Synthesis, properties and structures of boron, carbon and silicon compounds: Chemistry of higher boranes, classification, structures and MO description of bonding, framework electron counting, Wade's rules, chemistry of $B_5H_9$ , $B_{10}H_{14}$ and $B_nH_n^{2-}$ , boron nitride, borazines, carboranes, metalloboranes, metallocarboranes; silicates, silicones, graphite, graphene, carbon nanotubes and zeolites.

Hydrogen bonding and its influence on properties.

(12 Hours)

## UNIT-II

### Chemistry of Main Group Elements:

Nitrogen, phosphorous and sulphur compounds: Hydrides, oxides and oxy acids of nitrogen, phosphorous, sulphur and halogens. Phosphazines, phosphazene polymers, sulphur–nitrogen compounds: Binary sulphur nitrides:  $S_4N_4$ ,  $S_2N_2$  and  $(SN)_x$ . P–O and P–S cage compounds.

Chemistry of halogens and xenon: Interhalogens, psuedohalogens, polyhalide ions, oxyhalogen species. Xenon oxides and fluorides.

(12 Hours)

## UNIT-III

### Symmetry and Group Theory:

Molecular symmetry, representation of symmetry operation as matrices. Definition of groups, set of symmetry operations of molecules satisfying the condition of point groups. Representation, basis of representation, reducible and irreducible representation. The great orthogonality theorem, character tables. The direct product. Applications of group theory: Molecular vibrations; molecular vibration in symmetrical  $AB_2$ . Hybridisation (tetrahedral and trigonal planar geometries)

(12 Hours)

## UNIT-IV

### Organometallic Chemistry:

Organometallic compounds: Introduction, classification of organometallic compounds by bond type, nomenclature, classification of ligands  $\sigma$  and  $\pi$  ligands, hapticity of ligands, 18 and 16 electron rules, electron counting schemes. Ferrocene and ruthenocene: Preparation, structure and bonding. Complexes containing alkene and alkyne ligands: Preparation, structure and bonding. Carbene (Fischer and Schrock type) complexes: Synthesis, structure and bonding. The isolobal principles.

Use of organometallic reagents in hydrogenation, hydroformylation, isomerisation and polymerization reactions.

(12 Hours)

**Total: 48 Hours**

### *Recommended Books:*

1. Inorganic Chemistry–Principles of Structure and Reactivity, 4<sup>th</sup>Edn–J. E. Huheey, E.A. Keiter, R. L. Keiter and O.K. Medhi. Pearson Education (2009).

2. Shriver & Atkins' Inorganic Chemistry, 5<sup>th</sup> Edn–P. Atkins, Tina Overton, J. Rourke, Mark Weller and F.Armstrong.Oxford University Press (2010)
3. Inorganic Chemistry, 2<sup>nd</sup>Edn. Catherine E. Housecroft and A.G. Sharpe, Pearson Prentice Hall (2005)
4. Concise Inorganic Chemistry–J. D. Lee, 5<sup>th</sup>Edn, New Age International (1996).
5. Chemical Applications of Group Theory, 2<sup>nd</sup>Edn-F. A. Cotton, Wiley Eastern Ltd ( ).
6. Symmetry and Spectroscopy of Molecules–K. Veera Reddy, New Age International, (2011).
7. Group Theory in Chemistry–M. S. Gopinathanan and V. Ramakrishnan, Vishal Publishing Co. (2007)
8. Organometallic Chemistry–A unified Approach, R.C. Mehrotra and A. Singh, 2<sup>nd</sup>Edn. New Age International (2011).
9. F.A.Cotton and G.Wilkinson : Advanced Inorganic Chemistry, Wiley, 1991.
10. Basic Organometallic Chemistry – B D Gupta and A J Elias, Universities Press (2013)

<b>Paper code and name</b>	<b>PG75P201A: Lab Course in Inorganic Chemistry</b>
<b>COURSE OUTCOMES</b>	
➤ Students would learn semi- micro qualitative analysis of salt mixtures, containing three cations and two anions viz. W, Pb, Cu, Cd, Mo, As, Fe, Cr, Ti, Zr, Ce, V, Ni, Zn, Co, Ca, Sr, Ba, Mg, K, Na, Li and halides, nitrate, sulphate, phosphate, oxalate, borate, acetate.	

<b>PARTICULARS</b>
<ol style="list-style-type: none"> <li>1. Semimicro qualitative inorganic analysis of a mixture containing three cations (including one less common cation such as W, Mo, Ti, Zr, Ce, V and Li) and two anions (one of them may or may not be interfering anion such as <math>\text{PO}_4^{3-}</math>, <math>\text{BO}_3^{3-}</math>, <math>\text{C}_2\text{O}_4^{2-}</math>, <math>\text{F}^-</math> and <math>\text{CH}_3\text{COO}^-</math>).</li> <li>2. Separation and determination of Zn and Mg on an anion exchanger.</li> <li>3. Demonstration experiment: Determination of iron as the 8–hydroxyquinolate by solvent extraction.</li> </ol> <p><b>Recommended Books:</b></p>

1. Vogel's Text Book of Quantitative Chemical Analysis(5<sup>th</sup> Ed), G.H.Jeffrey, J.Bassette, J.Mendham and R.C.Denny, Longman, 1999.
2. Vogel's Qualitative Inorganic Analysis(7<sup>th</sup> Ed), G.Svehla, Longman ( 2001)

<b>Paper code and name</b>	<b>PG75O201A: Applied Inorganic Chemistry</b>
<b>COURSE OUTCOMES</b>	
<ul style="list-style-type: none"> <li>➤ Separation techniques such as ion exchange and solvent extraction.</li> <li>➤ The principles and classification of chromatographic methods such as paper, thin layer, column and liquid chromatography.</li> <li>➤ Analysis of data using different techniques.</li> <li>➤ thermal methods of analysis</li> <li>➤ The essential role of trace metals in biological processes.</li> <li>➤ The transport and storage of dioxygen in Heame proteins.</li> <li>➤ The structure and functions of Heamoglobin, Myoglobin, Hemocyanin etc.</li> <li>➤ The structure and functions of metalloproteins in electron transport processes.</li> <li>➤ The principles of transition metal coordination complexes in understanding functions of biological systems.</li> <li>➤ The role of metals in medicines.</li> </ul>	

<b>PARTICULARS</b>
<p style="text-align: center;"><b>UNIT-I</b></p> <p><b>Data Analysis:</b></p> <p>Types of errors, accuracy and precision, methods of minimization of systematic errors, mean and standard deviation, distribution of random errors, reliability of results, comparison of results-Student t-test, F-test and chi-square test, significant figures, confidence intervals, method of least squares, calibration curve and standard addition method.</p> <p style="text-align: right;"><b>(12 Hours)</b></p> <p style="text-align: center;"><b>UNIT-II</b></p> <p><b>Thermal Methods of Analysis and Inorganic Polymers:</b></p> <p>Thermal methods of analysis: Thermobalance, factors influencing thermogravimetric results, differntial thermal analysis: Instrumentation for differential thermal analysis (DTA) and differential scanning calorimetry (DSC). Applications of TG, DTA and DSC.</p> <p>Inorganic Polymers:Silicones, polyphosphazenes, synthesis, structure and applications.</p>

(12 Hours)

### UNIT–III

#### **Bioinorganic Chemistry:**

Metal ions in biological systems, deficiency of trace metal ions (Fe, Zn, Cu and Mn), metal ions and chelating agents in medicine: Treatment of toxicity due to inorganics (chelation therapy) and metal complexes as therapeutic agents.

Proteins and their functions: Heme proteins, oxygen uptake proteins-hemoglobin and myoglobin,

(12  
Hours)

### UNIT–IV

#### **Chromatography:**

Gas chromatography: Principles, instrumentation, stationary phases and types of carrier gases used in GC. Methods of sample injection, types of detectors, programmed temperature GC, plate and plate height theory in GC. Applications of GC and use of GC-MS in detection of samples.

(12 Hours)

**Total 48 hours**

#### ***Recommended Books:***

1. Vogel's Textbook of Quantitative Analysis. 6<sup>th</sup> Edition–J. Mendham, R. C. Denney, J. D. Branes and MJK Thomas. Publisher: Pearson Education.
2. Contemporary polymer Chemistry, Third edition–H. R. Allcock, F. W. Campe and J. E. Mark, Publisher: Pearson Education.
3. Inorganic Chemistry, 4<sup>th</sup> edn–J. E Huheey, R. L. Keiter and A. L. Keiter, Addison Wesley, 2000.
4. Inorganic Chemistry of Biological Processes, 2<sup>nd</sup> edn. –M. N. Hughes, Wiley, 1988.
5. Bioinorganic Chemistry–I. Bertini. H. B. Gray, S. J. Lippard and J. S. Valentine, Viva Books, 1998.
6. Bioinorganic Chemistry–A.K. Das, Books and Allied (P) Ltd, 2007.
7. Principles of Instrumental Analysis-Skoog, Holler and Nieman, Harcourt Afca, 2001.

8. Vogel's Text Book of Quantitative Inorganic Analysis., 4<sup>th</sup>Edn. –J. Bessett, R. C. Denney, G. H. Jeffery and J. Mendham, Longman Green and Company Ltd.
9. Quantitative Chemical Analysis, 6<sup>th</sup>Edn-D. C. Harris, W. H. Freeman and Company, New York, 2003.

<b>Paper code and name</b>	<b>PG75T301A: Advanced Coordination &amp; Bioinorganic Chemistry</b>
<b>COURSE OUTCOMES</b>	
After studying this paper, students would learn,	
<ul style="list-style-type: none"> <li>➤ To interpret the electronic spectra and magnetic properties of coordination compounds.</li> <li>➤ Indetail about the reaction mechanism of Inorganic metal complexes and to understand the substitution reaction mechanism along with the involvement of reactive intermediates.</li> <li>➤ Also, to understand their structure and reactivity through various inorganic reactions. This course gives idea about the way in which a reaction proceeds and its kinetics, especially for inorganic substitution reactions.</li> <li>➤ The essential role of trace metals in biological processes.</li> <li>➤ The transport and storage of dioxygen in Heame proteins.</li> <li>➤ The structure and functions of Heamoglobin, Myoglobin, Hemocyanin etc.</li> <li>➤ The structure and functions of metalloproteins in electron transport processes.</li> <li>➤ The principles of transition metal coordination complexes in understanding functions of biological systems.</li> <li>➤ The role of metals in medicines.</li> </ul>	

<b>PARTICULARS</b>
<p style="text-align: center;"><b>UNIT–I</b></p> <p><b>Electronic spectra and magnetic properties:</b></p> <p>Spectral properties of complexes: Term symbols for d<sup>n</sup> ions, spectroscopic ground states, selection rules, nature of spectral bands- band shapes, band intensities, band widths, spin-orbit coupling, Orgel diagrams, Tanabe–Sugano diagrams, Racah parameters, interpretation of spectra of octahedral, distorted octahedral, tetrahedral and square planar complexes, determination of 10Dq, B' and nephelauxetic parameterfrom absorption spectra of octahedral and tetrahedral complexes, charge transfer bands: Origin, types, and characteristics, intervalence charge–transfer bands.</p>

Magnetism: Determination of magnetic susceptibility (Gouy and Faraday methods), diamagnetic corrections, orbital contribution, ferro-ferri- and anti-ferro magnetism, Curie law, Curie-Weiss law, effect of temperature on dia-, para-, ferro- and anti-ferromagnetic compounds, temperature independent paramagnetism, effect of spin orbit coupling on spectral and magnetic properties and spin cross-over systems.

**(12 Hours)**

## **UNIT II: Inorganic reaction mechanisms**

Basic principles, lability, inertness, substitution reactions of octahedral complexes. Nature of substitution reactions: Theoretical approach to substitution mechanisms, mechanism of substitution reaction of complexes of cobalt: Acid hydrolysis and base hydrolysis of Co(III) complexes, substitution reactions of square planar complexes, reaction of Pt(II) complexes, trans-effect, theories of trans-effect, mechanism and kinetics of substitution of Pt(II) complexes. Electron tunneling hypothesis: Marcus-Hush theory, atom transfer reaction, one- and two-electron transfer. Inner sphere and outer sphere mechanisms.

**(12 Hours)**

## **UNIT-III**

### **Bioinorganic chemistry-I**

Metal ions in biological systems, essential and trace metals, disease due to metal deficiency and treatment: Iron, zinc, copper, manganese, sodium, potassium, magnesium and calcium. Metal complexes as therapeutic agents: Metal complexes in cancer therapy, metal complexes for the treatment of rheumatoid arthritis, vanadium in diabetes, metal complexes as radio diagnostic agents. Treatment of toxicity due to inorganics: Chelation therapy and requirements of a chelate/antidote. Mechanism of antidotes with poison rendering it inert: Arsenic, lead, mercury, iron, copper, plutonium, cyanide and carbon monoxide poisoning.

Ion transport across membranes and active transport of ions across biological membranes, ionophores.

Metal complexes in transmission of energy: Chlorophyll, photosystems-I and II in cleavage of water and model systems.

**(12 Hours)**

## **UNIT-IV**

### **Bioinorganic chemistry-II**

Transport and storage of dioxygen, heme proteins, oxygen uptake, functions of haemoglobin, myoglobin, hemerythrin and hemocyanins, synthetic oxygen carriers. Metal storage and transport: Ferritin, transferrin and ceruloplasmin. Electron transfer proteins:

Cytochromes, iron–sulphur proteins. Metalloproteins as enzymes: Carboxy peptidase, carbonic anhydrase, catalases, peroxidases, cytochrome P–450, cytochrome c–oxidase, superoxide dismutase, copper oxidases and vitamin B<sub>12</sub> coenzyme.

Biological nitrogen fixation, *in vivo*–and *in vitro*–nitrogen fixation.

**(12 Hours)**

**Total: 48 Hours**

***Recommended Books:***

1. Inorganic Chemistry-Principles of Structure and Reactivity, 4<sup>th</sup> Edn–J. E. Huheey, E.A. Keiter, R. L. Keiter and O.K. Medhi. Pearson Education (2009).
2. Shriver & Atkins' Inorganic Chemistry, 5<sup>th</sup> Edn–P. Atkins, Tina Overton, J. Rourke, Mark Weller and F.Armstrong.Oxford University Press (2010)
3. Electronic absorption Spectroscopy and Related Techniques–D. N. Satyanarayana, OUP, 2001.
4. Concepts and models of Inorganic Chemistry–B.Douglas, D. McDaniel &J.Alexander, 3<sup>rd</sup>Edn. Wiley Student Edn.(2013).
5. Elements of Magnetochemistry–R. L. Dutta and A Syamal : Affiliated East-West, 1993.
6. Inorganic Chemistry of Biological Processes, (2<sup>nd</sup>edn.)–M. N. Hughes, Wiley, 1988.
7. Bioinorganic Chemistry–Asim K. Das, Books and Allied (P) Ltd, (2007).
8. Principles of Bioinorganic Chemistry–S. J. Lippard and J. M. Berga. Panima Publishing Corporation.

<b>Paper code and name</b>	<b>PG75T302A: Molecular Spectroscopy</b>
<b>COURSE OUTCOMES</b>	
After studying this paper, students would be able to	
<ul style="list-style-type: none"> <li>➤ apply IR, NMR, UV-Vis, EPR, NQR and Mossbauer spectroscopic techniques in solving the structures of organic and inorganic compounds.</li> <li>➤ interpret the spectroscopic data of unknown compounds.</li> </ul>	

- use these techniques in their future research work.
- solve the spectroscopic problems in NET/SET/GATE exams.

## PARTICULARS

### UNIT-I

#### **Introduction and Vibrational Spectroscopy:**

Basic concepts and Introduction: Properties of electromagnetic radiation, Wave property: Interference and diffraction. Particle property: Photoelectric effect. Regions of the electromagnetic spectrum, energies corresponding to various kinds of radiation. Interaction of electromagnetic radiation with matter (absorption, emission, transmission, reflection, dispersion, polarisation and scattering). General application. 2

#### **Hours**

Vibrational spectroscopy: Infrared spectroscopy: Vibrational energy levels, infrared spectra of diatomic and polyatomic molecules, normal modes of vibration, force constant, selection rules, anharmonicity, the vibration-rotation spectroscopy. Infrared spectra of simple molecules and coordination compounds, changes in infrared spectra of donor molecules upon coordination (N,N-dimethylacetamide, urea, DMSO, pyridine N-oxide, ammine, cyano, cyanato and thiocyanato complexes), mono and multinuclear carbonyl complexes, nitrosyls, phosphine and arsine complexes. Change in spectra accompanying change in symmetry upon coordination ( $\text{NO}_3^-$ ,  $\text{SO}_4^{2-}$ ,  $\text{NO}_2^-$ , and  $\text{ClO}_4^-$ ), hydrogen bonding. Instrumentation including FTIR.

Raman spectroscopy: Theory, relation with IR spectroscopy, resonance Raman stimulated hyper and inverse Raman effects. Experimental techniques, structure determination from IR and Raman spectra.

**(12 Hours)**

### UNIT-II

#### **Magnetic Resonance spectroscopy-I:**

Nuclear magnetic resonance spectroscopy: Magnetic properties of nuclei, population of energy levels, the Larmor precession, relaxation processes, chemical shift, shielding mechanism, spin-spin interactions, rules governing the interpretation of first order spectra, effect of chemical exchange on spectra. Analysis of complex NMR spectra,  $^1\text{H}$ -NMR spectra of organic molecules and complex metal ligands. Spin-systems: First order and second order patterns. Long range coupling : Spin decoupling, CIDNP and NOE. NMR shift reagents.

NMR studies of nuclei other than proton,  $^{13}\text{C}$ -NMR (including heteronuclear coupling with other nuclei viz.,  $^{19}\text{F}$  and  $^{31}\text{P}$ ): Broad band and off resonance, decoupling methods, use of  $^{13}\text{C}$ -NMR in structural determination of organic and inorganic molecules.  $^{19}\text{F}$ ,  $^{31}\text{P}$ ,  $^{11}\text{B}$ ,  $^{15}\text{N}$ . Spectra of paramagnetic complexes, contact shift, double resonance technique. Instrumentation including FT-NMR.

Correlation NMR spectroscopy:  $^1\text{H}$ - $^1\text{H}$  (COSY) and  $^{13}\text{C}$ - $^1\text{H}$  (HETEROCOSY) methods.

**(12 Hours)**

### **UNIT-III**

#### **Magnetic Resonance spectroscopy-II and Mössbauer Spectroscopy:**

Electron Paramagnetic Resonance (EPR) Spectroscopy: Basic principles, selection rules, intensity, width, position of spectral line, multiplet structure of EPR spectra, hyperfine interaction, spin-orbit coupling, zero-field splitting and Kramer's degeneracy, rules for interpreting spectra, factors affecting the magnitude of values. Instrumentation. Applications to the study of free radicals, coordination compounds, biological studies and rate of electron exchange reactions.

Nuclear Quadrupole Resonance (NQR) Spectroscopy: Quadrupole nuclei, quadrupole movement, electric field gradient, the NQR experiment, structural information from NQR spectra.

Mössbauer Spectroscopy: Introduction, principles, conditions for Mössbauer spectroscopy, parameters from Mossbauer spectra, isomer shifts, electric quadrupole interaction, magnetic interactions, Mossbauer spectrometer. Applications in structure determination of  $\text{Fe}_3(\text{CO})_{12}$ , Prussian blue, oxyhemerythrin, hexacyanoferrates, nitroprusside, tin halides.

**(12 Hours)**

### **UNIT-III**

#### **Electronic Spectroscopy and Mass Spectrometry:**

Electronic spectroscopy: Molecular electronic absorption spectroscopy (UV-Visible), electronic spectra of diatomic molecules, electronic transitions, selection rules, assignment of transition, band intensities, substituent and solvent effect and charge transfer transitions. Application to organic and inorganic molecules.

Photoelectron spectroscopy: Basic principles: Photo-electric effect, ionisation process, Koopman's theorem. Photoelectron spectra of simple molecules, ESCA and chemical information from ESCA. Instrumentation. Auger electron spectroscopy, basic ideas.

Mass Spectrometry: Ionization and mass analysis. Instrumentation. Methods of ionization: EI, CI, DI, SI methods.

Fragmentation: Principles, odd electron ( $OE^+$ ) and even electron ( $EE^+$ ) ions, molecular ion and base peak, nitrogen rule, metastable ions. Isotope effects in chloro and bromo compounds. Fragmentation of inorganic and organic compounds: (i) normal and branched alkanes. (ii) alkenes. (iii) benzene and its derivatives. (iv) alcohols. (v) aldehydes. (vi) ketones. (vii) acids. (viii) esters. (ix) ethers. (x) amines. (xi) nitro compounds. (xii) halo compounds.

**(12 Hours)**

**Total 48 Hours**

***Books Recommended:***

1. Fundamentals of Molecular Spectroscopy - C. N. Banwell.
2. Physical Methods in Chemistry - R. S. Drago, Saunders college.
3. Structural Methods in Inorganic Chemistry - E. A. Ebsworth, D. W. H. Rankin and S. Cradock, ELBS.
4. Infrared Spectra of Inorganic and Coordination Compounds - K. Nakamoto.
5. Infrared Spectroscopy - C. N. R. Rao.
6. Electron Absorption Spectroscopy and Selected Techniques - D. N. Satyanarayana, University Press India Ltd. Hyderabad.
7. Introduction to Spectroscopy - D. L. Pavia, G. M. Lampman and G. S. Kriz, Thomson Learning, Singapore (2001)
8. Spectroscopic Identification of organic compounds - R. M. Silverstein and F. X. Webster, 6<sup>th</sup> Edition, Wiley and Sons, India Ltd. (2006).
9. Interpretation of Mass Spectroscopy - McLafferty.

<b>Paper code and name</b>	<b>PG75T303A: Selected topics in Inorganic Chemistry</b>
<b>COURSE OUTCOMES</b>	
After studying this paper, students would understand	
<ul style="list-style-type: none"> <li>➤ Synthesis, structure and bonding in metal carbonyl clusters.</li> <li>➤ Structure and bonding in metal halide clusters.</li> </ul>	

- Preparation, structure and bonding of metal nitrosyls,
- Chemistry of dinitrogen and dioxygen complexes.
- analysis of pesticides and insecticides.
- analysis of fuel and fertilisers.
- Chemistry of lanthanoids and actinoids
- Fluorescence, phosphorescence and photochemistry of transition metal complexes.

## PARTICULARS

### UNIT-I

#### **Metal Clusters:**

Metal  $\pi$ -acceptor complexes: Metal carbonyls, preparative methods, structure and bonding, vibrational spectra of metal carbonyls for bonding and structural elucidation, magnetic and X-ray evidences of structures, MO representation of bi- and tri-nuclear carbonyls, reactions of metal carbonyls. Metal carbonylates and carbonyl halides: Preparation and important reactions. Chemistry of metal nitrosyls: Preparation, structure and bonding, dinitrogen and dioxygen complexes. Metal-metal bonding in carbonyls and halides, evidences for M-M bonding, factors favouring M-M bond formation. Metal clusters: Bi-, tri-, tetra-, penta- and hexanuclear metal clusters and bonding in metal clusters.

**(12 Hours)**

### UNIT-II

#### **Lanthanides and actinides:**

Correlation of general properties of d-block elements with those of 4f and 5f elements.

Lanthanide series: Introduction, electronic structure, oxidation states, lanthanide contraction, abundance and extraction (solvent extraction and ion-exchange methods), lanthanides as shift reagents, chemical properties of compounds of lanthanides in II, III, and IV oxidation states. Magnetic properties, colour and spectra.

Actinides: Electronic structure and position in the periodic table, oxidation states, occurrence and synthesis of elements. Spectral and magnetic properties of compounds of actinides in comparison with those of lanthanides and d-block elements. Chemistry of separation of Np, Pu & Am from U & fission products. Uranium: Isotope separation/enrichment and chemistry of uranium salts.

**(12 Hours)**

### Unit–III

#### **Fuel analysis and agricultural chemistry:**

Fuels: Solid, liquid and gaseous fuels, ultimate and proximate analysis, calorific values, grading of coal. Liquid fuels: Flash point, aniline point, octane number and carbon residues. Gaseous fuels: Producer gas and water gas.

Analysis of soil: Inorganic and organic components of soil, collection and preparation of soil samples for analysis. Measurement of soil moisture, pH, total nitrogen, phosphorous, silica, lime, magnesia, manganese, sulphur and alkali salts.

Fertilizers: Fertilizer industries in India, manufacture of ammonia, ammonium salts, urea, nitrates, phosphates and superphosphates and mixed fertilizers.

(12 Hours)

### UNIT–IV

#### **Photoinorganic chemistry:**

Photochemical Reactions: Prompt and delayed reactions, quantum yield, laws of photochemistry, recapitulation of fluorescence and phosphorescence, d–d and charge transfer reactions. Excited states of metal complexes, energy transfer under conditions of weak interaction and strong interaction, exciplex formation. Conditions of the excited states to be useful as redox reactants: Photosubstitution, photooxidation, photoreduction and photochemical reactions of transition metal complexes including  $[\text{Ru}(\text{bipy})_3]^{2+}$  and  $[\text{Fe}(\text{bipy})_3]^{2+}$ . Application to photovoltaics: Water photolysis and carbon dioxide reduction. Solar energy conversion and storage.

(12 Hours)

#### **Recommended Books:**

1. Inorganic Chemistry–Principles of Structure and Reactivity, 4<sup>th</sup> Edn-J. E. Huheey, E.A. Keiter, R. L. Keiter and O.K. Medhi. Pearson Education (2009).
2. Shriver & Atkins' Inorganic Chemistry, 5<sup>th</sup> Edn-P. Atkins, Tina Overton, J. Rourke, Mark Weller and F.Armstrong.Oxford University Press (2010)
3. Concepts and models of Inorganic Chemistry-B.Douglas, D. McDaniel &J.Alexander, 3<sup>rd</sup>Edn. Wiley Student Edn.(2013).
4. Fundamentals of photochemistry–K. K. Rohatgi-Mukherjee, Revised Edn. New Age International.
5. Ferraudi G. L, Elements of Inorganic photochemistry, Wiley Eastern, 1988
6. Photochemistry and Photophysics of  $\text{Ru(II)}$  polypyridine complexes in the Bologna group. From early studies to recent developments, Coordination chemistry reviews, Vincenzo Balzani, Alberto Juris, 211, 97-115 ((2001).
7. F.A.Cotton and G.Wilkinson : Advanced Inorganic Chemistry, Wiley, 1991.

8. Environmental Chemistry–A. K. De (Wiley Eastern).
9. Environmental Chemistry–S. K. Banerji, ( Prentice Hall India), 1993.

<b>Paper code and name</b>	<b>G75P301A: Lab Course in Inorganic Chemistry</b>
<b>COURSE OUTCOMES</b>	
<ul style="list-style-type: none"> <li>➤ Students are exposed to different synthetic methodologies of coordination compounds.</li> <li>➤ Students are made to understand the characterization of prepared complexes by, various analytical methods viz. elemental analysis, metal percentage determination, chloride and sulphate determination etc.</li> <li>➤ Student would learn to establish the composition of coordination compounds.</li> <li>➤ Students are trained to scan, IR, NMR, UV-Vis spectra of prepared compounds and to interpret the observed spectra.</li> </ul>	

<b>PARTICULARS</b>
<p><b>I. Preparation of selected coordination compounds</b></p> <ol style="list-style-type: none"> <li>1. Bis(glycinato)copper(II) complex: cis-and trans-forms.</li> <li>2. Co(DMG)<sub>2</sub> model for Vit B<sub>12</sub> and reactions.</li> <li>3. Hexaamminecobalt(III) chloride</li> <li>4. Mercuric phenyl acetate</li> <li>5. Pentaamminechloridocobalt(III) chloride.</li> <li>6. Preparation of nitro- and nitrito-complexes. (examples for linkage isomers)</li> <li>7. Separation of optical isomers of cis-[Co(en)<sub>2</sub>Cl<sub>2</sub>]Cl.</li> <li>8. Tris(thiourea)copper(I) sulphate monohydrate.</li> <li>9. Hexaamminenickel(II) chloride.</li> <li>10. Mercury tetrathiocyanatocobaltate(II).</li> <li>11. Tris(acetylacetonato)manganese(III).</li> <li>12. Trans and cis-potassium dioxalatodiaquochromate(III).</li> <li>13. N, N-bis(salicylaldehyde)ethylenediaminecopper(II).</li> </ol> <p><b>II. Characterization</b></p> <ol style="list-style-type: none"> <li>1. Elemental analysis.</li> <li>2. N<sub>2</sub> analysis by Kjeldahl's method.</li> </ol>

3. Metal ion determination in above complexes.
4. Anion determination in above complexes.
5. IR, Electronic, NMR, Magnetic and CV studies wherever possible.
6. Interpretation of UV-VIS, IR and NMR spectra.

<b>Paper code and name</b>	<b>PG75T401A: Instrumental Methods of Analysis.</b>
<b>COURSE OUTCOMES</b>	
<p>After studying this paper, students would understand the working principles and applications of various instrumental methods such as.</p> <ul style="list-style-type: none"> <li>➤ atomic absorption and emission spectroscopy</li> <li>➤ molecular luminescence spectroscopy</li> <li>➤ electrophoresis and gel filtration</li> <li>➤ coulometry and amperometry</li> <li>➤ ion selective electrodes</li> <li>➤ thermal methods of analysis</li> <li>➤ polarography, voltammetry and stripping analysis</li> <li>➤ light scattering methods</li> </ul>	

<b>PARTICULARS</b>
<p style="text-align: center;"><b>UNIT-I</b></p> <p><b>Optical methods:</b></p> <p>Atomic absorption spectrometry: Theory, instrumentation, different types of nebulizers, non flame techniques, electrothermalvapourisers, cold vapour AAS determination of mercury, interferences, differences between AAS and flame photometry and analytical applications of AAS.</p> <p>Emission spectroscopy: Inductively coupled plasma optical emission spectrometry, theory and applications.</p> <p>Molecular luminescence spectroscopy: Theoretical basis for fluorescence and phosphorescence, instrumentation, factors affecting fluorescence, its applications in quantitative analysis and in the study of biomolecules.</p> <p>X-ray fluorescence elemental analysis.</p> <p><b>(12 Hours)</b></p> <p style="text-align: center;"><b>UNIT-II</b></p> <p><b>Analytical methods-I</b></p> <p>Coulometric methods of analysis: General discussion, coulometry at controlled potential, apparatus and general technique, applications, coulometric titrations (amperometriccoulometric): Principles, apparatus, comparison of coulometric titrations</p>

with conventional titrations, automatic coulometric titrations and applications.  
Amperometry: Principle, titrations, advantages and limitations. Applications.  
Ion selective electrodes: Glass ion selective electrodes, crystalline solid state ion selective electrodes, liquid-based ion selective electrodes and gas sensing electrodes.  
Supercritical fluid chromatography (SFC): Properties of supercritical fluids, instrumentation and operating variables, comparison of SFC with other types of chromatography. Applications.

**(12 Hours)**

### **UNIT-III**

#### **Analytical methods-II**

Polarography: Theory of classical polarography, polarograms, polarographic currents. Halfwave potential, oxygen interference, advantages and limitations. Pulse polarography. Applications of polarography.

Electrogravimetric analysis: Theory, apparatus, deposition and separation, electrolytic separation of metals, applications.

Electrophoresis: Theory and classification. Factors influencing the mobility-macromolecular size and charge, interaction with supporting electrolyte, pH and concentration discontinuities. Factors affecting electrophoretic phenomena-electrolysis, Electroosmosis, temperature and supporting media. Instrumentation. Methodology-preparation of gels-staining and destaining. Capillary electrophoresis methods - capillary zone electrophoresis, capillary gel electrophoresis.

Light-Scattering methods: Nephelometry and turbidometry-Principle, instrumentation and applications.

**(12 Hours)**

### **UNIT-IV**

#### **Analytical methods-III**

Thermal method of analysis: Introduction. Thermogravimetric analysis (TGA): Types of thermogravimetric analysis, principles, factors affecting the results, heating rate, furnace, instrument control/data handling. Instrumentation and applications.

Differential thermal analysis (DTA): Theory, variables affecting the DTA curves. Differences between TGA and DTA. General principles, instrumentation and applications.

Differential scanning calorimetry (DSC): Basic principle, differences between DTA and DSC. Instrumentation, power compensated DSC, Heat flux DSC. Applications.

Thermomechanical analysis. Dynamic mechanical analysis.

Voltammetry: Fundamentals of voltammetry. Cyclic voltammetry: Principles and

applications. Stripping analysis: Stripping voltammetry, basic principles, electrodes used for stripping analysis, apparatus for stripping analysis, applications, determination of lead in water by voltammetry.

**(12 Hours)**

**Total: 48 Hours**

Paper code and name	PG75T402A: Material, Nuclear and Environmental Chemistry
COURSE OUTCOMES	
<p>After studying this paper, students would receive the awareness of</p> <ul style="list-style-type: none"> <li>➤ nuclear reactions and use of nuclear energy in generating electricity.</li> <li>➤ safety measures to be adopted in handling radioactive materials.</li> <li>➤ Composition of atmosphere.</li> <li>➤ Various types of pollutants related to soil, water and air.</li> <li>➤ Use of chemistry in the betterment of society.</li> <li>➤ Nanomaterials and electron microscopes.</li> <li>➤ Synthetic methods for nanomaterials and carbon nanotubes.</li> <li>➤ Principle &amp; types of LED, LCD</li> <li>➤ The advantages and disadvantages of LED and LCD.</li> <li>➤ Properties of glass, ceramics and clay products.</li> </ul>	

PARTICULARS
<p style="text-align: center;"><b>Unit–I</b></p> <p><b>Nanomaterials and Electron Microscopies.</b></p>

Nanomaterials: Introduction, terminology, novel optical properties, nanolayers, carbon nanotubes, nanowires, quantum dots, nanocomposites, thin films, nanofoam, nanoclusters, smart nanostructures. Top-down and bottom-up fabrication: Solution-based and vapour-phase synthesis of nanomaterials, physical vapour deposition, chemical vapour deposition, sol-gel synthesis, combustion method and hydrothermal method.

One-dimensional control (CNT's and inorganic nanowires), two-dimensional control (quantum wells and solid-state superlattices) and three-dimensional control.

Electron microscopies: Scanning electron microscopy (SEM), transmission electron microscopy (TEM), scanning transmission electron microscopy (STEM). Scanning probe microscopies: Scanning tunneling microscopy (STM) and atomic force microscopy (AFM).

Nanosensors: Electrochemical sensors and biosensors.

**(12 Hours)**

## **UNIT-II**

### **Nuclear Chemistry:**

Nuclear reactions, nuclear fission and fusion, nuclear reactor, units of radiation energy, G-value. Chemical Dosimetry: Fricke and ceric sulphate dosimeters. Radiation chemistry of water. A brief introduction to radiolysis of liquids and solids.

Health and safety aspects: Biological effects of radiation, permissible exposure of radiation dose and radioactive waste management.

Radioanalytical techniques and isotopes: Radioactive techniques, tracer technique, neutron activation analysis, applications of radiation chemistry/isotopes (radiation synthesis, polymerization, medicine &, food irradiation). Radiometric titrations and  $^{14}\text{C}$  dating.

**(12 Hours)**

## **UNIT-III**

### **Air pollution and Water Pollution:**

Air pollutants, prevention and control, green house effect and acid rain. Carbon monoxide: Industrial and transportation sources.  $\text{SO}_x$ -sources, control technique, scrubbing, limestone injection process. Ozone hole and CFC's. Photochemical smog and PAN.  $\text{NO}_x$ : sources and  $\text{NO}_x$  control techniques. Particulates: Size distribution. Bhopal gas tragedy. Noise pollution.

Origin of waste water, types, water pollutants and their effects. Sources of water pollution: Domestic, industrial, agricultural soil and radioactive wastes as source of pollution. Measurement of colour, turbidity, total solids, acidity, alkalinity, hardness, sulphate, fluoride, phosphate and different forms of nitrogen in natural and polluted water.

Determination and significance of BOD, COD and TOC. Pesticides as water pollutants and analysis.

Toxic chemicals in the environment, impact of toxic chemicals on enzymes. Heavy metal pollution. Chemical speciation: Biochemical effects of heavy metals (Hg, As, Pb, Se).

**(12 Hours)**

#### **UNIT-IV**

##### **Chemistry of Selective Materials:**

Glasses, oxide glasses, bond type, viscosity, Zachariasen's rules, criteria of Sun and Rawson, chalcogenide glass, the photocopying process, glass ceramics, applications, ceramics—structures, mechanical properties and application, clay products, refractories, characterisation properties and applications.

LED: Principle, types, advantages and disadvantages of LED displays.

Liquid crystal display (LCD): Properties, twisted nematic field display, advantages and disadvantages of LCD, comparison of LCD & LED.

Shape memory alloys (SMA): Classification, working principles, non-linear optical materials and second harmonic generators.

**(12 Hours)**

**Total: 48 Hours**

<b>Paper code and name</b>	<b>PG75T403A: Organometallic and Solid State Chemistry</b>
<b>COURSE OUTCOMES</b>	
<p>Students would understand the</p> <ul style="list-style-type: none"> <li>➤ Metal ions as catalysts and their importance in synthetic procedures.</li> <li>➤ Catalysts in industrial applications such as, Wacker's process, Hydroformylation, Monsanto acetic acid synthesis, Water gas shift reaction, Fischer-Tropsch synthesis, Alkene polymerization, etc.</li> <li>➤ Structures of solids.</li> <li>➤ Optical properties of solids and their applications.</li> <li>➤ Magnetic properties of solids and their applications.</li> <li>➤ Phenomenon of superconductivity and its applications.</li> <li>➤ Alloys and phase diagrams.</li> </ul>	

#### **PARTICULARS**

## UNIT-I

### Organometallic Chemistry:

Chemistry of organometallic compounds with  $\pi$ -bonding ligands: Synthesis, structure, spectroscopy, reactions and bonding in metal-carbon  $\pi$ -bonded systems involving di-hapto to hexa-hapto ligands viz, olefins, acetylenes, allylic moieties, butadienes, cyclobutadienes, cyclopentadienes and arenes. Organometallic polymers.

(12 Hours)

## UNIT-II

### Fluxional behaviour of Organometallic Compounds:

Rates of rearrangement and techniques of study. Stereochemical non-rigidity in organometallic compounds, ring whizzing in  $\eta^1$ -Cp complexes, interchange of  $\eta^1$ - and  $\eta^5$ -Cp rings, allyl and allene complexes. Scrambling of carbonyl groups in metal carbonyls.

2 Hours

Homogeneous and heterogeneous catalysis involving metal complexes and organometallic complexes. Terminology in catalysis, oxidative additions and oxidative coupling reductive elimination, insertion reactions, hydrogenation of alkenes and related reactions, hydroformylation (Monsanto, Cativa and Wacker Processes), carbonylation, isomerisation and olefin polymerisation oligomerisation reactions. Water gas shift reaction.

8 Hours

Organometallic reagents in organic synthesis: Organo-iron, organo-copper and organo-palladium compounds.

8 Hours

(12 Hours)

## UNIT-III

### Solid State Chemistry:

Electrical properties: Survey of electrical properties and materials. 1 Hour

Super conductivity: Nature and properties of super conductivity materials, Meissner effect, type-I and II super conductors, theories, high temperature oxide super conductors, junction involving metal, super conductor and super conductor. Applications.

4 Hours

Ionic conductivity: Alkali halides-vacancy conduction. Silver chloride-interstitial conduction. Solid electrolytes:  $\beta$ -alumina, AgI and  $\text{Ag}^+$  ion solid electrolytes. Anion conductors, requirements for conductivity. Applications.

2 Hours

Magnetic properties: Mechanism of ferro- and anti-ferro magnetic ordering, selected examples of magnetic materials, their structures and properties, metals and alloys, transition metal oxides, spinels, garnets, ilmenites, perovskites, magnetoplumbites, applications and structure-property relation.

3 hours

Optical properties: Luminescence and phosphors, configurational coordinate model, some phosphor material, antistokes, phosphors and lasers.

2 Hours

(12 Hours)

#### UNIT-IV

**Mechanical Properties and Structural Transformation of Solids:**

Mechanical properties & dislocations in solids: Edge dislocations & screw dislocations.

Structural transformation of solids: Solid solutions, Hume–Rothery rules, substitutional solid solutions and interstitial solid solutions, solid solution mechanism, experimental methods for studying solid solutions (X-ray powder diffraction and density measurements).

Alloy systems: Phase diagrams, two and three component systems, study of alloy systems, steels with reference to iron, carbon systems and copper– zinc system.

**(12 Hours)**

**Total 48 Hours**

<b>Paper code and name</b>	<b>PG75D404A: Project Work</b>
<b>COURSE OUTCOMES</b>	
Project work is carried out by the students under the guidance of teachers in the department. A topic of research is chosen by the students, in consultation with the respective mentors.	
Students gather a complete knowledge in carrying out the research, which would help them in their higher studies (such as Ph.D programme) and in industrial career.	
Student may get a publication on successful completion of his/her project work.	

<b>PARTICULARS</b>
The project work may include in-plant training in industries/short term work in the department/other educational institutions/R&D organizations/data mining/review of current literature/theoretical methods/computer applications. Experimental work may involve studies on synthesis/measurements/study of properties/characterization by physical methods/activities for reported/unreported research or any suitable combination thereof.
In case of the students who would work outside the campus, the supervising staff member may visit to the work place at least once during the period and may be eligible for TA-DA as per the University rules.

<b>Paper code and name</b>	<b>PG75P401A: Lab Course in Inorganic Chemistry</b>

## Specific Course Outcome (Organic Chemistry)

<b>Paper Code and Name</b>	<b>PG75T102B: ORGANIC CHEMISTRY-I</b>
<b>COURSE OUTCOMES</b>	
<p>The above course gives the requisite benefits to the students as-</p> <ul style="list-style-type: none"> <li>➤ The localized chemical bonding helps the students to understand the hybridization bond distance, bond angles, bond energies etc..to the modern ideas in chemical technology.</li> <li>➤ The study of reaction mechanism impart the internal energy changes in reaction as well as nature of the intermediate in the organic reactions.</li> <li>➤ In the study of organic reactions the exploration of stereochemistry and conformational analysis gives the ideas of structure of organic molecules and their enantiomers, diastereomers, e pimers etc.. to the student to get the depth knowledge about the organic molecules.</li> <li>➤ To study the internal energetic <math>\pi</math> electrons in the aromatic compounds the gives the ideas regarding nature of organic reactions to the modern temples called as industry to understand by the students.</li> <li>➤ To overall view the studies of concepts in the organic chemistry reveals that the most exciting organic reactions and their products called organic molecules are</li> </ul>	

exploited in various industries to explore the knowledge to the students.

## UNIT-I

### Bonding in Organic Molecules:

Localized chemical bonding: Hybridization index, bonding in cyclopropane, bond distances, bond angles, bond energies, bond polarity, dipole moment and calculation of heat of reactions.

Delocalised chemical bonding: Conjugation, cross conjugation, steric inhibition of resonance, hyperconjugation, tautomerism, valence tautomerism. Bonding in fullerenes.

Bonding weaker than covalent: Hydrogen bonding, EDA complexes, inclusion compounds, complexes of crown ethers, catenanes and rotaxanes.

Structure and reactivity: Brönsted-Lowry concept of organic acids, conjugate acids and bases, pH, pKa values. Electronic, steric, and solvent effects on their strengths. General and specific acid base catalysis, running scale of acidity. Lewis acids and bases. HSAB concept.

(12 Hours)

## UNIT-II

### Organic Reaction Mechanisms:

Classification of organic reactions: Meaning and importance of reaction mechanism. Methods of determination of reaction mechanisms: Kinetic methods, order and molecularity, mechanistic implications from rate laws.

Non-kinetic methods: Product identification, cross over experiments, study of intermediates, isotopic labeling, kinetic isotope effects and stereochemical studies.

Nucleophilic substitutions (aliphatic): Mechanisms of  $S_N2$ ,  $S_N1$  (rearrangements in  $S_N1$  reactions) and  $S_{Ni}$ ,  $S_{RN}1$  pathways. Effects of structure, leaving groups and ambident nucleophiles.

Elimination Reactions:  $E_2$ ,  $E_1$ ,  $E_1CB$  pathways. Stereochemistry, product proportions in dehydration of alcohols, alkyl halides (chiral and achiral), Hoffmann and Saytzeff rules. Substitution v/s elimination and pyrolytic eliminations.

(12 Hours)

## UNIT-III

### Stereochemistry and Conformational Analysis:

Elements of symmetry and chirality, optical isomerism, optical activity, specific rotation. molecules with one asymmetric center. Fischer, Wedge and 3D representations, DL and RS systems indicating configuration. Ring compounds, molecules with two chiral centers: Fischer, Saw-Horse, Newmann projections and their transformations.

Enantiomers, diastereomers, epimers, racemization, resolution. Stereochemical correlation. Pseudo-asymmetric compounds.

Geometrical isomerism: E-Z nomenclature, configuration of geometrical isomers and *syn*- &

*anti*– isomers.

Conformational analysis: Conformational study of n-Butane, ethylene, chlorohydrin, 1,2-dichloroethane, 2-aminoethanol, di- & tri-substituted cyclohexanones and Curtin–Hammett principle.

(12 Hours)

#### UNIT–IV

##### **Aromaticity:**

Aromaticity and Huckel's rule: HMO theory, energy level diagrams, möbius systems, benzenoid and non-benzenoid aromatic compounds. Tropones, tropolones, borazine and azulene.

Heterocyclic Systems: Systems of the type pyrrole, pyridines, pyrilium cation, ferrocene. alternant and non-alternant hydrocarbons. Aromaticity of charged rings (3-8 membered), non aromatic, anti-aromatic and homo aromatic systems.

Physical methods to study aromaticity: X-ray, UV and <sup>1</sup>H–NMR methods.

Ring current as criteria for aromaticity. Annulenes and heteroannulenes [10-18].

(12 Hours)

**Total 48 Hours**

##### **Books Recommended:**

1. Organic Chemistry–P. Y. Bruice, 7<sup>th</sup> Edition, Pearson Education Pvt. Ltd., New Delhi (2013).
2. Organic Chemistry–S. H. Pine, McGraw-Hill, London (1987).
3. Mechanism and Structure in Organic Chemistry–1965, by [E.S. Gould](#).
4. Organic Chemistry–[R. T. Morrison and R.T. Boyd](#), Prentice Hall, New Delhi (1994).
5. Organic Chemistry–T. W. Graham Solomons, 4<sup>th</sup> Edition, John Wiley and Sons (1988).
6. Organic Chemistry–G. M. Loudon, 4<sup>th</sup> Edition, Oxford University Press, New York (2002).
7. Organic Chemistry Volume–I, II–I. L. Finar, 6<sup>th</sup> Edition, ELBS London (2004).
8. Organic Chemistry–F.A. Carey, 4<sup>th</sup> Edition, McGraw Hill (2000).
9. Advanced Organic Chemistry, Reactions, Mechanism and Structure–J. March, 3<sup>rd</sup> Edition, Wiley Eastern Ltd. (2004).
10. Stereochemistry–Conformation and Mechanism–P. S. Kalsi, Wiley–Eastern Ltd, New Delhi (1992).

11. Guidebook to Mechanism in Organic Chemistry–P. Sykes. Orient Longman, London (2002).

12. Aromaticity–P. J. Garratt, McGraw Hill Book company (1971).

<b>Paper Code and Name</b>	<b>PG75P102B: LAB COURSE IN ORGANIC CHEMISTRY-I</b>
<b>COURSE OUTCOMES</b>	
<ul style="list-style-type: none"><li>➤ The theoretical study of the organic reactions are proved by the synthesis of targeted organic molecules for further application in various industries.</li><li>➤ The students shall understand the imaginary organic reactions through the synthetic study of internal mechanistic transformations of one organic molecule to the another organic molecule.</li></ul>	
<b>Preparation of the following organic compounds:</b> <ol style="list-style-type: none"><li>1. Benzoic acid and benzyl alcohol from benzaldehyde (Cannizarro reaction).</li><li>2. **Scheme of Examination:**

i. Duration of examination	: 04 hours
ii. Experiments	: 35 marks
iii. Viva-Voce & Journal	: 05 marks
iv. Internal assessment	: 10 marks
Total	: 50 marks

**Paper Code and Name****PG75T202B: ORGANIC CHEMISTRY-II****COURSE OUTCOMES**

The above course gives the benefits to the students as-

- The students will be able to understand the aliphatic and aromatic electrophilic substitutions and nucleophilic reaction mechanism. This gives an insight into the organic reactions.
- Advanced stereochemistry course makes the students to differentiate the prochiral and achiral molecules, enantiomers, homotopic and diastereotopic ligands.
- This course also helps the students to classify and understand the reactions of mono and disaccharides.
- The students are made aware of classification and reactions of five membered heterocycles.

## UNIT-I

### Reaction Mechanism:

Aliphatic electrophilic substitutions: Bimolecular pathways.  $S_E2$ ,  $S_E1$  and  $S_{Ei}$  mechanisms. Reactions involving double bond shifts,  $\alpha$ -halogenation of aldehydes, Ketones, aliphatic diazonium coupling, nitrosation at carbon bearing active hydrogen, mercury exchange reactions.

Aromatic electrophilic substitutions: Mechanisms of aromatic, nitration, sulphonation, halogenation, isotope effects, energy profile diagrams. Kinetic and thermodynamic control, amination and sulphonation, Hammond's Postulate, o/p ratio, ipso-substitution, Vilsmeier Haack, Pechmann and Fries rearrangement.

Aromatic nucleophilic substitutions:  $S_{NAr}$ ,  $S_{N1}$  and aryne pathways. Meisenheimer complexes, mechanism and synthetic applications of vicarious nucleophilic substitution (VNS), Von-Richter, Goldberg, Bucherer, Shiemann reactions and Smiles rearrangement.

(12 Hours)

## UNIT-II

### Advanced Stereochemistry:

Prochirality: Homotopic, enantiotopic and diastereotopic atoms, groups and faces.

Stereochemical descriptors: Application to reduction of carbonyl compounds, cyanohydrin formation, addition of water to alkenes.

Optical activity due to molecular dissymmetry: Allenes, spiranes, biphenyls, atropisomerism, molecular crowding.

Conformational analysis of cyclohexane, mono substituted and disubstituted (1,2, 1,3, 1,4) cyclohexanes. *cis*- and *trans*-decalins. Chirality of cyclohexanes.

(12 Hours)

## UNIT-III

### Carbohydrates:

Monosaccharides: Conformational representation of monosaccharides and their transformations. Determination of configuration of the monosaccharides, mechanism of mutarotation-base catalyzed isomerisation of aldoses and ketoses. Epimerisation, anomeric effect, glycosides, ether and ester derivatives of carbohydrates. Acetone, amino ( $\beta$ -D-glucosamine, galactosamine, N-acetylmuramic acid (NAMA), N-acetyl neuraminic acid (NANA) and deoxysugars. Oxidation and reduction reactions of carbohydrates.

Disaccharides: Structure elucidation of maltose, lactose, sucrose, gentiobiose and meliobiose.

Trisaccharides: Raffinose and melezitose.

Polysaccharides: Structure and degradation of starch, cellulose and glycogen.

(12 Hours)

#### UNIT-IV

Chemistry of heterocycles: Nomenclature of heterocyclic compounds: (i) Hantzsch–Widmann (ii) Replacement Nomenclature

Structure, synthesis, reactivity and chemical reactions of indole, quinoline, isoquinoline, thiazole, imidazole, benzimidazole, coumarin, chromones, flavones and isoflavones.

**(12 Hours)**

**Total 48 hrs**

<b>PG75T301B : ORGANIC SPECTROSCOPY</b>	No of teaching hours
<p>The above course gives important spectroscopic study and students are able to prove the structure of organic molecules as-</p> <p>➤ The students will be able to understand the structure of organic molecules after studying the theoretical and experimental study of spectroscopic techniques.</p>	
<p><b>Electronic and Vibrational Spectroscopy:</b>          Introduction, energy considerations, experimental methods, Beer–Lambert’s law, theory and classification of electronic transitions, terminology, substituent and solvent effects.          UV spectral study of alkenes, dienes, polyenes, carbonyl and aromatic compounds. Steric effects, isobestic points, model compounds and charge transfer bands.          Vibrational Spectroscopy: Introduction, experimental methods, units, notation and regions. FT–IR, sampling techniques, complementarity of IR and Raman. Fundamental vibrations, overtones, Fermi resonance, group frequencies, factors affecting group frequencies: Conjugation, inductive, resonance, steric effects. Mechanical coupling, applications of IR in the study of H–bonding, stereoisomerism and tautomerism.          Identification of the following organic compounds by IR: Alkanes, alkenes, alkynes, aromatic compounds, aldehydes, ketones, alcohols, thiols, acids, acid chlorides, amides, amines, esters, halides, nitro compounds, etc.</p>	<b>12</b>
<p style="text-align: center;"><b>UNIT–II</b></p> <p><b>Proton Magnetic Resonance Spectroscopy:</b>          Introduction, magnetic properties of nuclei, resonance condition. Field frequency diagram, precession of nuclei, relaxation. Instrumentation: CW and FT–NMR techniques. Sample handling.          Chemical shift, mechanism of shielding and deshielding in alkanes, alkyl halides, alkenes, aromatic compounds, carbonyl compounds and annulenes. Chemical shifts of different types of organic compounds. Empirical rules.          Equivalence of protons: Chemical and magnetic equivalence. Spin–spin coupling, geminal–vicinal coupling, relative intensities. Karplus equation–Curve. Spin–systems, first order and second order patterns. Long range coupling: Spin decoupling, CIDNP and NOE.          Lanthanide Shift reagents.          Proton attached to elements other than carbon (OH, NH and SH). Exchange phenomena and temperature effects.</p>	<b>12</b>
<p><b>Multi–Nuclear NMR and Correlation Spectroscopy:</b>  <sup>13</sup>C–NMR, broad band and off resonance decoupling methods of detection.  <sup>13</sup>C–chemical shifts of different classes of organic compounds: Alkanes, alkyl halides, alkenes, alcohols, ethers, carbonyl compounds and aromatic</p>	<b>12</b>

compounds. $^{13}\text{C}$ - $^1\text{H}$ coupling DEPT. Introductory aspects of $^{15}\text{N}$ -, $^{19}\text{F}$ -, $^{31}\text{P}$ -, $^{10}\text{B}$ -, $^{11}\text{B}$ -NMR. Correlation NMR Spectroscopy: Theory, pulse sequences. FT-methods. $^1\text{H}$ - $^1\text{H}$ (COSY) and $^{13}\text{C}$ - $^1\text{H}$ (HETEROCOSY) methods	
<b>Mass Spectrometry and Composite Problems:</b> Ionisation and mass analysis. Instrumentation, methods of ionization, EI, CI, DI, SI methods. Fragmentation: Principles, odd electron ( $\text{OE}^+$ ) and even electron ( $\text{EE}^+$ ) ions, molecular ion and base peak, nitrogen rule, metastable ions. Isotope effects in chloro and bromo compounds. Stevenson rule. Fragmentation of: (i) normal and branched alkanes. (ii) alkenes (iii) benzene and its derivatives (iv) alcohols (v) aldehydes (vi) ketones (vii) acids (viii) esters (ix) ethers (x) amines (xi) nitro compounds (xii) halo compounds (xii) peptides. McLafferty and McLafferty + 1 rearrangement. Calculation of molecular formula. Calculation of H-deficiency index. Composite problems: Applications of UV, IR, NMR and MS methods and chemical reactions in structure elucidation of organic compounds.	12
<b>PG75T302B : STEREOCHEMISTRY AND REACTION MECHANISM</b>	
The above course gives the benefits to the students as- <ul style="list-style-type: none"> <li>➤ Dynamic stereochemistry course makes the students to understand stereospecific and stereoselective reactions along with asymmetric synthesis.</li> <li>➤ Stereochemistry of compounds other than carbon are studied and makes the students to understand stereochemistry of cyclic, acyclic and other compounds containing hetero atoms.</li> <li>➤ The students are able to study the reaction mechanism of nucleophilic substitutions at allylic and triagonal carbon atom with stability of intermediates.</li> <li>➤ This course also helps the students to study addition and elimination reactions along with the stereochemistry products and their proportions in the organic reactions.</li> </ul>	
<b>UNIT-I</b>  <b>Dynamic Stereochemistry:</b> Stereoselectivity in organic synthesis, stereospecific and stereoselective reaction, principle of stereoselectivity, stereoselectivity in addition, elimination and substitution reaction. Asymmetric Synthesis: Chiral pool synthesis, enantioselectivity and diastereoselectivity in acyclic system, addition of nucleohphiles to carbonyl group, Cram's rule and Prelog's rule for diastereselection. 1,2-Addition predictions: Various outcomes using predictive models such	12

<p>as Cram chelate and Felkin-Anh.</p> <p>Chiral Auxiliaries: Chiral auxiliaries in aldol condensations and Diels-Alder reaction. Oxazolidinones and chiral sulphoxides.</p> <p>Chiral Reagents: Isopinocampheylboranes, BINOL and DIBAL.</p> <p>Chiral Catalysts: Calculation of enantiomeric excess, asymmetric epoxidation-Sharpless and Jacobsen Katsuki asymmetric epoxidation, epoxidation using dioxiranes.</p> <p>Stereochemistry of catalytic hydrogenation: Metal (Pd, Pt, Ni) catalyzed hydrogenation, diimide reduction, rhodium and Ruthenium catalysts with chiral phosphine ligands like (R)-PROPHOS, (R)-BINAP and (R, R)-DIOP. Asymmetric transformations, stereochemistry of carbene and nitrene addition.</p>	
<p style="text-align: center;"><b>UNIT-II</b></p> <p><b>Stereochemistry of Compounds other than Carbon:</b></p> <p>Stereochemistry of nitrogen compounds: Quaternary ammonium salts, amines, tertiary amine oxides, oximes, determination of configuration of aldoximes and ketoximes, stereochemistry of compounds (cyclic and acyclic) containing nitrogen.</p> <p>Stereochemistry of Phosphorus compounds, arsenic, sulphur compounds and silicon compounds.</p>	<b>12</b>
<p style="text-align: center;"><b>UNIT-III</b></p> <p><b>Reaction Mechanism-I:</b></p> <p>Nucleophilic substitution at allylic and trigonal carbon atom, Tsuji-Trost reaction. Neighbouring group participation: Definition, participation of <math>\sigma</math>, <math>\pi</math> cyclopropane aromatic rings in nucleophilic substitution reaction. Nucleophilic substitution at silicon.</p> <p>Addition Reactions: Electrophilic addition across alkenes, <i>cis- and trans</i>-alkenes and dienes. Addition of nitrogen, oxygen and sulphur nucleophiles across carbonyl compounds.</p>	<b>12</b>
<p><b>Reactive Intermediates and Activating agents</b></p> <p>Reactive Intermediates: Formation, structure, stability and reactions of the following reactive intermediates: Carbocations (classical and non-classical), carbanions, carbenes (identification by <math>^1\text{H}</math> NMR and <math>^{13}\text{C}</math> NMR), carbenoids, free radicals (ESR of organic free radicals), nitrenes, ylides, Wittig and Tebbe olefination, enamines and Stork enamine reactions.</p> <p style="padding-left: 40px;">Applications of the following in organic synthesis: Acetyl chloride, antimony pentachloride, borontrifluoride etherate, copper (I) trifluoromethane sulphonate, ethylaluminium dichloride, lithium halides</p>	<b>12</b>

and lithium perchlorides	
<b>PG75T303B CHEMISTRY OF NATURAL PRODUCTS</b>	
<p>The above course gives the benefits to the students as-</p> <ul style="list-style-type: none"> <li>➤ The students understand the important steroidal hormones and their structure synthesis stereochemistry and spectral features.</li> <li>➤ The students will be aware of natural alkaloids and terpenes which are being exploited in pharmaceutical industry and perfumery industry along with photochemical synthesis of some important narcotic alkaloids.</li> <li>➤ In the ongoing teaching, the students are enabled to make more focus on Natural fatty acids and Prostaglandins which are having remarkable applications in various oleochemical and pharmaceutical industry,</li> <li>➤ This course also helps the students to understand the biomolecules such as nucleosides, nucleotides and peptides with amino acid sequences.</li> </ul> <p>To overall view, the studies of natural products reveal the structures of the most exciting biomolecules, natural fatty acids, prostaglandins and steroidal hormones</p>	<b>12</b>

<b>CHOT-4.1 ORGANIC SYNTHESIS</b>	
<p>The above course gives the benefits to the students as-</p> <ul style="list-style-type: none"> <li>➤ The students are able to understand the retrosynthetic analysis to get a target and helps to make them for the research work.</li> <li>➤ The study of newer reagents and reactions make the students to recent development in the synthesis of most potential biomolecules.</li> </ul> <p>Studies on oxidations and reductions enable the students to differentiate the methods involved in the organic synthesis</p>	
<p style="text-align: center;"><b>UNIT – I</b></p> <p><b>Synthetic Design and retrosynthetic analysis:</b> Protecting groups in organic synthesis: Principle of protection, protection of hydroxyl (–OH), amino (–NH<sub>2</sub>, –NH), carboxylic (–COOH), carbonyl (RCOR') groups, their synthetic applications and methods of deprotection. Retrosynthetic analysis: Terminology, synthon, synthetic equivalent, functional group interconversion and disconnection approach, one group C–X and two group disconnections. Applications of C–C disconnection in the synthesis of substituted 1,1–, 1,2–, 1,3– and 1,4– bifunctional compounds. Retrosynthetic analysis and forward synthesis for alcohols, benzocaine, acetone cyanohydrin, <i>p</i>–methoxy acetophenone, 6–methyl quinoline, pirindol, 6–methoxy indole –3–acetic acid. Application to the synthesis of juvabione, taxol, longifolene, Prelog–Djerassi lactone.</p>	<b>12</b>
<p style="text-align: center;"><b>UNIT–II</b></p> <p><b>Oxidations and Reductions:</b> Oxidations: Oxidation of organic compounds using KMnO<sub>4</sub>, PCC, OsO<sub>4</sub>, CrO<sub>3</sub>, K<sub>2</sub>Cr<sub>2</sub>O<sub>7</sub>, SeO<sub>2</sub>, Pb(OAc)<sub>4</sub>, HIO<sub>4</sub>, oxygen, Oppenauer oxidation, Swern oxidation, ozonolysis. Hydroboration– isomerisation and oxidation. Application in the synthesis of esters, E–Z alkenes, conjugated dienes, alkynes. Conditions: Catalytic oxidation and Pt, photosensitized oxidation of alkenes, oxidation with molecular oxygen, aromatization, silver based reagents. Reductions: Reduction of organic compounds using the following reagents: LiAlH<sub>4</sub>, NaBH<sub>4</sub>, lithium hydridoalkoxyaluminates, MPV reduction, catalytic hydrogenation, dissolving metal reduction (including acylation)</p>	<b>12</b>

condensation), Clemmensen reduction. Birch Reduction, Wolf–Kishner reduction (Huang–Minlon modification), Raney–Ni desulphurisation	
<p style="text-align: center;"><b>UNIT–III</b></p> <p><b>Newer Reactions:</b>            Mechanism and strategic applications of the following named reactions: Suzuki coupling, Prins reaction, Shapiro reaction, Mitsunobu reaction, Robinson annulation, Junjappa–Ila aromatic and heteroaromatic annulations, Pauson–Khand reaction, Simon–Smith reaction, Huisgen 1,3–dipolar cycloaddition reaction, O'Donnell Aminoacid synthesis, Heck arylation, Desmartin reaction, Houben–Hoesch reaction, Sonogashira reaction, Buchwald–Hartwig reaction.</p>	<b>12</b>
<p style="text-align: center;"><b>UNIT–IV</b></p> <p><b>Newer Reagents:</b>            Methods of preparation, mechanism of action and application of the following reagents in Organic synthesis: DCC, 1,3–dithiane (Corey–Seebach reaction), LDA, DDQ, Wilkinson catalyst, crown ethers, trimethyl silyl iodide, trimethyl silyl cyanide, hydrosilane, Iwanov reagent, Peterson reaction, Julia olefination, Woodward and Prevost hydroxylations, Lawesson's reagent</p>	<b>12</b>
<b>PG75T401B: PHOTOCHEMISTRY AND PERICYCLIC REACTIONS</b>	
<p>The above course gives the benefits to the students as-</p> <p>The students are able to understand the classifications and features of pericyclic reactions and are being useful in research work.</p> <ul style="list-style-type: none"> <li>➤ Students understand the molecular rearrangements, mechanistic pattern etc.</li> <li>➤ The biochemical mechanism is useful for students to study the biochemical reaction associated with enzymes and vitamins.</li> </ul>	
<p style="text-align: center;"><b>UNIT–I</b></p> <p><b>Organic Photochemistry:</b>            Bonding and antibonding orbitals, principles of photochemistry, photochemical processes, singlet and triplet states, energy transfer and photosensitisation, photochemical reactions, photoreduction, Photochemical fragmentation reactions: Norish type–I, type – II cleavages (Yang cyclisation)–di–pi methane rearrangement, optical pumping, photochemistry of cyclohexadienones, photo–Fries rearrangement, Paternò–Büchi reaction, photochemistry of alkenes, benzenes,</p>	

cyclohexanes and photochemistry of vision.	
<p style="text-align: center;"><b>UNIT-II</b></p> <p><b>Pericyclic Reactions:</b>  Pericyclic reactions: Classification and features, molecular orbital symmetry, frontier orbitals of ethylene, 1,3-butadiene, 1,3,5-hexatriene and allyl systems.  Electrocyclic processes: Introduction, Woodward-Hoffmann rules for <math>4n</math>- and <math>(4n+2)-\pi</math> systems, stereochemistry under thermal and photochemical conditions.  Cycloaddition reactions: Introduction, supra facial and antra facial addition, [2+2] and [4+2] cycloaddition reaction (Diels-Alder reaction) FMO analysis under thermal and photochemical conditions.  Sigmatropic rearrangements: Classification, FMO approach for [1,3], [1,5] and [3,3] sigmatropic rearrangements, supra and antra facial hydrogen shifts. Walk, Claisen-Cope, oxy-Cope and aza-Cope rearrangements.  Vitamin-D group isomerizations</p>	
<p style="text-align: center;"><b>UNIT-III</b></p> <p><b>Molecular Rearrangement:</b>  Molecular Rearrangement: Classification and general mechanistic pattern for electrophile, free radical and nucleophile rearrangement. Mechanisms of the following rearrangement:  (i) C-C migration: Wagner-Meerwein, pinacol-pinacolone, dienone-phenol, benzilic, Favorskii, Sommelet-Hauser, Stevens, Smiles, Fritsch-Butenberg-Wiechell.  (ii) C-N migration: Benzidine rearrangement, Neber, Beckmann, Hofmann, Curtius, Lossen, Schmidt.  (iii) C-O migration: Baeyer-Villiger, Dakin, Payne (including <i>aza</i> and <i>thia</i>), hydroperoxide, Crigee, Rupe, Ferrier, Petasis, Bamford-Stevens.  (iv) O-C migration: Baker-Venkataraman, Fries and Wittig rearrangements.</p>	
<p style="text-align: center;"><b>UNIT-IV</b></p> <p><b>Organo-Lithium, -Magnesium, -Zinc, and -Tin Compounds:</b>  Organolithium and organomagnesium: Preparation, properties of organolithium and organomagnesium compounds and their uses in organic synthesis and in the preparation of organometallic compounds, Gilman reaction, LDA.  Organozinc compounds: Preparation, structure and bonding, applications in C-C bond forming reactions viz., Simmons-Smith reaction, Negishi coupling, Fukuyama coupling, Barbier reaction and zinc acetylides.</p>	
<b>PG75T403B HETEROCYCLIC AND MEDICINAL CHEMISTRY</b>	

<p>The above course gives the benefits to the students as-</p> <ul style="list-style-type: none"> <li>➤ The students are made aware of the classification, nomenclature and reactions of three, four and seven membered heterocycles.</li> <li>➤ The students are able to understand transformations, photochemistry and rearrangements of heterocycles.</li> <li>➤ This course also helps to the student to study modern theories of drug actions and SAR studies and chemotherapy.</li> </ul>	
<p><b>Heterocyclic Chemistry–I</b> Chemistry of three, four, and seven membered heterocycles with one heteroatom. Three membered: oxiranes, aziridines and thiranes. Four membered: oxetanes, azetidines and thietanes. Seven membered: oxepines, azepines and thiepinines.</p>	
<p><b>UNIT–II</b> <b>Heterocyclic Chemistry–II</b> Transformations, Photochemistry and rearrangement in heterocycles. Transformations of: (i) coumarins to benzofurans, (ii) sydnones to pyrazoles, (iii) chromones to pyrazoles (iv) furans to pyridines and (v) pyrroles to pyridines. Heterocycles in functional group transformations: (i) alkanes from thiophenes, (ii) cycloalkanes from pyrazolines, (iii) dienes from pyrroles (iv) alcohols from isoxazodiolines (v) esters from trichlorocyanuric acid, (vi) acetylenes from 1,2,3-selenadiazoles and (vii) deoxygenation of phenols tetrazoles. Rearrangements in heterocycles: (i) Dimroth rearrangement, (ii) Boulton–Katritzky rearrangement and (iii) Fischer Indole cyclisation.</p>	
<p style="text-align: center;"><b>UNIT–III</b></p> <p><b>Medicinal Chemistry–I:</b> Modern theories of drug action, concept of receptors, computer aided drug design, qualitative and quantitative SAR. Sulfa drugs: Sulfadiazines, sulfamethazines, sulfaguanidines, sulfaisoxozoles and sulfamerazine. Analgesics: Classification of narcotic and non–narcotic analgesics. Narcotic: Opium alkaloids, morphine, metopon, benzomorphan and phenazocine. Non–Narcotic: 4–Phenylpiperidines, pethidine, di–isopropylamines, methadone, pyrazolones and antipyrine. Anti–Fertility Drugs: Steroidal and non–steroidal compounds,</p>	

norethindrone, mestranil, norgestrol and non-steroidal antifertility drugs.	
<b>Medicinal Chemistry-II:</b> Antineoplastic agents: Nitrogen mustards, chlorabucil, sarcolycin dopan and cyclophosphomide. Pteridines: Amethopterin, pyrimidines, 5-fluorouracil, cis-platines, anti-platines, etc. Antibiotics: Structure, synthesis, stereochemistry and spectral features of the following antibiotics: natural penicillins, semisynthetic penicillins, patulin, chloramphenicol, steptomycin, structural features and uses of common antibiotic drugs. Norfloxacin, rifamycin and amoxycillin.	
<b>PG75D401B :PROJECT WORK</b> In this course students are exposed to extensive literature survey which will help them to understand the given research problem. <ul style="list-style-type: none"> <li>➤ The students will be exposed to the spectroscopic methods which will help them to synthesize the previously unknown molecules.</li> <li>➤ The outcome of research work is being published in the international journals of repute which makes students to inspire in the future research field.</li> </ul>	
<b>Preparation of Derivatives / Spectral Analysis</b>	
The project work may include in-plant training in Industries/short term work in the department/other educational institutions/R&D organizations/data mining/review of current literature/theoretical methods/computer applications. Experimental work may involve studies on synthesis/measurements/study of properties/characterization by physical methods/activities for reported/unreported research or any suitable combination thereof.	
<b>PG75P401B: LAB COURSE IN ORGANIC CHEMISTRY</b>	
<ul style="list-style-type: none"> <li>➤ The students will be trained in purification methods by column chromatographic techniques</li> </ul>	
Multi-step preparation of organic compounds involving various reactions like addition, elimination, oxidation, hydrolysis etc. and purification methods like distillation and crystallization.	

<p><b>Recommended Books:</b></p> <ol style="list-style-type: none"> <li>1. Vogel's Textbook of Practical Organic Chemistry Revised–B.S. Furniss, A. J. Hannaford, P.W.G. Smith, A. R. ## Specific course outcome (Physical Chemistry)

<b>Paper Code and Name</b>	<b>PG75T103C: PHYSICAL CHEMISTRY: QUANTUM CHEMISTRY, REACTION KINETICS, THERMODYNAMICS &amp; ELECTROCHEMISTRY AND INTRODUCTION TO POLYMERS</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
1.	This course helps students a better understanding to describing and predict the behaviour of matter at atomic and molecular level.
2.	At the end of this course, the students will learn, the kinetics and mechanism of reactions take place and also the significance of activation parameters.
3.	In this course, the students will learn, the energy of activation and entropy of a chemical reaction
4.	This course provides the fundamentals of polymers, their synthesis and degradation.

<b>PARTICULARS</b>	<b>Teaching Hours (Total. 48)</b>
<b>Unit 1: Quantum Mechanics</b>	
Review of classical mechanics: Equation of motion for a particle, Newtonian, Lagrangian and Hamiltonian equations of motion, elementary wave motion. Operators, eigen values and expectation values, commuting operators, linear operator and Hermitian operators. Solutions of Schrödinger equations of a free particle, particle in a box problem: in one and three dimensions, degeneracy, reflection and penetration of a particle in a one-dimensional box of semi-infinite barrier, a particle in a box of finite walls. Rigid rotator, derivation of selection rules for transitions in rotating molecule, linear harmonic oscillator, Hermite polynomials. Equation for the hydrogen atom in spherical polar coordinates and an indication of the method of its solution, the quantum numbers and their significance. Hydrogen-like atoms, properties of the H-atom wave functions. Electronic energy states of H-atom. Many electron systems and the self-consistent field method. Electronic configurations in the periodic table. Pauli exclusion principle.	12 Hours

<b>UNIT-II: Reaction Kinetics:</b>	
<p>A critical account of collision and transition state theories.</p> <p>Kinetics and mechanism: Steady state approximation and simple examples relating kinetics to mechanism. Theories of Unimolecular reactions: RRKM theory. Isomerisation of methyl isocyanide. Chain Reactions, examples of chain reactions, general aspects of chain reactions. Chain-length, chain transfer reactions, chain inhibition, kinetics of branching chain reactions and explosion limits.</p>	12 Hours
<b>UNIT-III: Thermodynamics:</b>	
<p>Thermodynamic criteria for spontaneous chemical changes. Systems at (i) constant volume and temperature and (ii) constant pressure and temperature (derivation of <math>dA \leq 0</math> &amp; <math>dG \leq 0</math>). Dependence of free energy on pressure and temperature. Standard free energies and their determination. Relation between free energy change and equilibrium constant. Gibbs-Helmholtz equation and their different forms. The pressure dependence of free energy of non-ideal gases and fugacity. Standard state for non-ideal gas. Equilibrium constant for system of non-ideal gases. Lewis and Randall rule. Temperature dependence of free energy and equilibrium constants.</p> <p>Partial miscibility, activity and activity coefficients of components of solutions, partial molar quantities and their determinations. Gibbs-Duhem equation and the calculation of activity of a component in solutions. Duhem-Margules equation. Ternary systems and phase diagram of ternary systems.</p>	12 Hours
<b>UNIT-IV: Polymers :</b>	
<p>Review on basic concepts of polymers and their classifications. Homopolymers, copolymers, terpolymers, addition polymers and condensation polymers with examples. Comparison between addition polymers and condensation polymers. Tacticity with examples of polystyrene and PMMA. Elastomers, difference between elastomer and thermoplastic, approaches to increase processability.</p> <p>Techniques of free-radical polymerization: Bulk, solution, suspension, emulsion and precipitation polymerization.</p> <p>Reactions of vinyl polymers: Functional group reactions, ring-forming reactions and block &amp; graft copolymer formation. Crosslinking reactions: peroxide crosslinking, sulphur vulcanization, radiation crosslinking, photo crosslinking, electron beam crosslinking and miscellaneous crosslinking reactions. Polymer degradation: Chemical, thermal and radiation degradations.</p>	12 hours

<b>Paper Code and Name</b>	<b>PG75P103C: LAB COURSE IN PHYSICAL CHEMISTRY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
1.	This course is designed in such a way that it provides a bridge to the students and attempts to make a link between their undergraduate experiments to master level.
2.	The aim is to make students gain familiarity with a variety of physicochemical measurement techniques of some basic physical chemistry experiments like spectrometry, conductometry, potentiometry, law etc.
3.	Also familiarize the students with general information and chemical mathematics, calibration of glassware's, concentration measures of solutions and treatment of experimental data

<b>PARTICULARS</b>	<b>Teaching Hours</b>
<p>1. General Information and Chemical mathematics: Calibration of glasswares, concentration measures of solutions- concept of normality, molarity, molality and mole fraction, preparation of standard solution. Treatment of Experimental data – Errors, type of errors, Accuracy and precision. Mean deviation, standard deviation, significant figures, Methods of average and least squares.</p> <p>2. Spectrophotometry: To obtain the absorption curve of <math>\text{KMnO}_4</math> solution on a colorimeter and hence verify Beer–Lamberts law.</p> <p>3. Potentiometry: Determination of the dissociation constant of dibasic acids (minimum two acids and titration with <math>\text{NaOH}</math>)</p> <p>4. Conductance: Simultaneous estimation of <math>\text{H}_2\text{C}_2\text{O}_4</math> and <math>\text{HCl}</math> in the mixture conductometrically by titrating with <math>\text{NaOH}</math>.</p> <p>5. Distribution law: Studying the distribution of benzoic acid between water and benzene and hence determine the degree of association of benzoic acid in benzene.</p>	

<p>6. Viscosity: Determination of viscosity average molecular weight of polystyrene in toluene by Ubbelohde Viscometer</p> <p>7. Thermochemistry: Determine the relative strength of <math>\text{CH}_3\text{COOH}</math> and <math>\text{ClCH}_2\text{COOH}</math> by calorimetric method.</p> <p>8. Reaction Kinetics: Determination of activation parameters of the reaction of acid hydrolysis of methyl acetate at two different temperatures.</p> <p>9. Cryoscopy: Determination of cryoscopic constant of benzene and nitrobenzene</p> <p>10. Refractometry: Analysis of a binary mixture (glycerol and water) by refractive indices measurement.</p>

<b>Paper Code and Name</b>	<b>PG75T203C: PHYSICAL CHEMISTRY–II MOLECULAR SPECTROSCOPY, ELECTRONIC SPECTROSCOPY, THERMODYNAMICS, REACTION KINETICS AND INTRODUCTION TO POLYMERS</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
1.	This course demonstrates the development of physical science.
2.	This course describes the arrangement of atoms and molecules in crystalline solids and also exhibits how crystalline solids show strong diffraction pattern when exposed to X-rays, neutron and electrons.
3.	This course helps to understand the solvent and ionic strength effects on kinetics of solutions and also about Stopped-Flow technique.
4.	This course helps in understanding the basics of redox reactions at surface of the electrode and also helpful in understanding the electric double layer at inter-phase region between the electrode and electrolyte.

<b>PARTICULARS</b>	<b>Teaching Hours (Total. 48)</b>
<b>UNIT–I: Microwave Spectroscopy and X–ray Diffraction</b>	
<p>Microwave spectroscopy: Gaseous microwave spectra and rotational transitions: Study of inversion of ammonia and hindered rotations in molecules. Instrumentation. Stark effect in molecular spectra, first and second order Stark effects.</p> <p>X–ray diffraction: Origin and production of X-rays, interaction of X-rays with matter: Absorption, scattering and diffraction. Reciprocal lattice: Bragg's law in reciprocal space. Instrumentation: Sources, filters, monochromatic detectors. Crystal structure: Unit cell, lattices, planes and Miller indices. Debye-Scherrer powder methods and Weissenberg camera. Numerical problems.</p>	12 Hours
<b>UNIT–II: Reaction Kinetics:</b>	
<p>Kinetics in Solution: Effect of solvent, pressure and ionic strength for ion–ion, ion–neutral molecule type reactions and cage effects.</p> <p>Potential energy surfaces, methods employed in the construction of potential</p>	12 Hours

surfaces, calculating reactions.	
Fast Reactions: Techniques for fast reactions, flow methods, stopped flow technique, relaxation methods and flash photolysis. Numerical problems.	
<b>UNIT–III: Electrochemistry:</b>	
<p>Introduction to electrochemistry, Debye-Huckel and Bjerrum models and the corresponding theoretical expression for activity coefficient and Debye–Huckel–Onsagar theory of conductance of strong electrolytes.</p> <p>Electrochemistry of Solution: Activity of ions in solution, solvation number and their determination, ion-solvent interactions, ion-ion interactions and free energy of ions in solution and triple ion formation, conductance minima and free energy of ions in solution. Born model for calculating the free energy of ion-solvent interaction and its modifications. The enthalpy and entropy of ion–solvent interaction. Electrical double layer: Electrocapilarity, Lippman equation (surface excess), theories of electrical double layer: Helmholtz–Perrin, Gouy–Chapman and Stern theories. Effect of ions on zeta potential. Over potentials, exchange current density, derivation of Butler–volmer equation and Tafel plot.</p>	12 Hours
<b>UNIT–IV: Polymer chemistry</b>	
<p>Transitions in polymers: Definition of glass transition temperature (<math>T_g</math>) and flow temperature (<math>T_f</math>) and melting temperature (<math>T_m</math>), thermal behaviour of amorphous and crystalline polymers, factors affecting the <math>T_g</math>. Plasticizers, properties and their effect on <math>T_g</math> of PVC and diethylhexylsuccinate, efficiency of plasticizers, comparison of <math>T_g</math> and <math>T_m</math>. <math>T_g</math> of copolymers and polymer blends, relation between <math>T_g</math> and <math>T_m</math>.</p> <p>Polymer molecular weight: Number average and weight average molecular weights, polydispersity and molecular weight distribution in polymers. Numerical problems on determination of molecular weights.</p> <p>Kinetics of polymerization: Kinetics of free-radical addition polymerization, cationic polymerization, anionic polymerization, copolymerization and determination of reactivity ratios.</p> <p>Polymer synthesis: Ziegler–Natta polymerization (isotactic and syndiotactic) and its limitations. Metallocene catalysis polymerization (isotactic). Metathesis polymerization: Acyclic diene metathesis polymerization (ADMET) and ring opening metathesis polymerization (ROMP). Group transfer polymerization (GTP) and advantages of GTP.</p>	12 hours

<b>Paper Code and Name</b>	<b>PG75P203C: LAB COURSE IN PHYSICAL CHEMISTRY</b>
<b>COURSE OUTCOMES (COs)</b>	
This lab course aims to develop further the skills and techniques gained during last semester experiments.	
1.	It consists of several experiments that use different techniques to explore fundamental concepts of solubility of a solute, cryoscopic determination of the degree of dissociation of a given strong electrolyte, spectrophotometry, conductance. Potentiometry, viscometry, etc.
2.	This course also helps the students to learn thermal behaviour of crystalline and amorphous polymers and also synthesis and kinetics of polymerization

<b>PARTICULARS</b>	<b>Teaching Hours</b>
<ol style="list-style-type: none"> <li>Solubility: Determine the heat of solution of a solute (e.g oxalic acid or benzoic acid) by solubility method.</li> <li>Coulometric titration: Titration of <math>I_2</math> against <math>Na_2S_2O_3</math>.</li> <li>Cryoscopy: Determination of the degree of dissociation of a given strong electrolyte and the determination of the number of ions present in the solute using cryoscopy method.</li> <li>Spectrophotometry: To obtain the absorption spectra of coloured complexes (Ferric-thiocyanate and Cupric-ammonia complexes) and hence verify the Beer-Lambert's law and estimation of metal ions in solution by spectrophotometry.</li> <li>Conductance: (i) Determination of equivalent conductance of a weak electrolyte at different concentrations and the applicability of Ostwald's law. (ii) Determination of equivalent conductance of a weak electrolyte from Kohlrausch's law.</li> <li>Potentiometry: Potentiometric determination of formal redox potential of <math>Fe^{2+}/Fe^{3+}</math> and <math>Ce^{4+}/Ce^{3+}</math> or <math>Cr^{6+}/Cr^{3+}</math> couples by titrating <math>Fe^{2+}</math> solution with <math>Ce^{4+}</math> or <math>Cr^{6+}</math>.</li> <li>Reaction Kinetics: Investigation of autocatalytic reaction between potassium permanganate and oxalic acid in the presence of <math>H_2SO_4</math>.</li> </ol>	

8. Viscosity: Determination of limiting viscosity number (Staudinger index) of polystyrene.	
9. pH metry: Titration of acetic acid against NaOH and hence determine the acid dissociation constant ( $K_a$ ).

<b>Paper Code and Name</b>	<b>PG75T301C: QUANTUM MECHANICS, DIFFRACTION &amp; GROUP THEORY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
1.	This course covers the application and solution of the Schrodinger equation in spherical polar coordinates and Schrodinger's equation for atoms of many electron systems.
2.	Elemental analysis by emission spectroscopy

3.	This course explains the locations of atoms and molecules in crystalline solids and also exhibits how crystalline solids show strong diffraction pattern when exposed to x-rays, neutrons and electrons.
4.	Group theory helps to know the structure and behaviour of molecules and crystals depending on their different symmetry.

PARTICULARS	Teaching Hours (Total. 48)
<b>UNIT–I: Quantum Mechanics:</b>	
Equation for hydrogen atom and its solutions, separation of variables, the $\phi$ , $\theta$ and radial equations, the problems of spherical symmetry.  Approximate methods in quantum mechanics: variation method and variation theorem, linear variation functions, secular equations and secular determinants. Application of variation method to hydrogen molecule ion, hydrogen molecule and normal helium atom.  Perturbation theory (first order and non-degenerate), application of perturbation theory to the helium atom.	12 Hours
<b>UNIT–II: Atomic Structure and Atomic Spectra:</b>	
A summary of the hydrogen spectrum. Alkali spectra and alkali like spectra, spark spectra and arc spectra. Moseley lines.  Helium and alkaline earth spectra. Multiplet structure of line spectra. Doublet structure of alkali spectra and compound doublets, triplets and singlets of alkaline earths and helium, prohibition of intercombinations. Multiplicities and term symbols.  Space Quantization: Zeeman effect, normal and anomalous Zeeman effects, Paschen–Back effect and Stark effect.	12 Hours
<b>UNIT–III: Symmetry Properties of Molecules and Group Theory</b>	
Introduction to symmetry, molecular symmetry, symmetry elements, symmetry operations and matrix method in symmetry. Molecular point groups: point groups identification of point groups, construction of group multiplication tables, symmetry species and point group character tables.  Reducible and irreducible representations, properties of irreducible representation, Mulliken symbolism rules for irreducible representation, structure of character tables, the standard reduction formula and the great orthogonality theorem. Normal mode analysis: number of normal modes of vibrational symmetry types, infrared and Raman activity, Rule of mutual	12 Hours

exclusion.	
<b>UNIT–IV: Diffraction Studies:</b>	
<p>X-ray diffraction: Reciprocal lattice, indexing of single crystal rotation photographs, determination of molecular parameters, the structure factor calculations, Fourier series and phase problems. Refinements of Fourier procedures and general concept of solution of structures.</p> <p>Neutron diffraction: Neutron diffraction and differences from X-ray diffraction.</p> <p>Electron diffraction: Theoretical principles, structure analysis: visual comparison of intensities, radial distribution function and its refinements. The rotating sector method.</p>	12 hours

<b>Paper Code and Name</b>	<b>PG75P302C: SPECTROSCOPY &amp; VOLTAMMETRY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
1.	This course covers the theory that allows us to deduce the bond lengths and bond angles from rotational spectra experiments. Vibrational spectra provide information on bond lengths, bond strength and molecular geometry.

2.	NMR Technique is a powerful tool for the elucidation of molecular structure. Also, it helps us to gain insight into bonding and molecular structure.
3.	The EPR spectroscopy is helpful in elucidating the structures of paramagnetic complexes and CD and ORD spectra are useful in gross structural determination of organic compounds.
4.	Voltametric techniques are useful in understanding the type of reactions at electrode surface and quantitative determination of electroactive compounds.

PARTICULARS	Teaching Hours (Total. 48)
<b>UNIT-I: Rotational and Vibrational Spectroscopy</b>	
<p>Rotation of polyatomic molecules: classification of molecules, momental ellipsoid, energy levels of linear, symmetric, spherical and asymmetric top molecules and their symmetry properties. Selection rules. Thermal distribution of rotational energy levels. Infrared rotational spectra and non rigid rotor treatment.</p> <p>Vibration of molecules: Molecule as harmonic oscillator, vibrational eigen functions and eigen values. Hermite polynomials, calculation of transition of probabilities and selection rules. The anharmonic oscillator, energy levels, selection rules and IR spectra. Anharmonicity and Morse equations.</p> <p><b>Rotation-vibration spectra of polyatomic molecules: Rotation - vibration spectra, shapes of absorption bands in case of (i) linear, (ii) symmetric top, (iii) spherical top and (iv) asymmetric top, molecules. Isotopic effects. Applications of IR spectroscopy. Numerical problems on IR spectroscopy.</b></p>	12 Hours
<b>UNIT-II::Nuclear Magnetic Resonance-I:</b>	
<p>Magnetic properties of nuclei: concept of nuclear spin, interaction between spin and external magnetic field, energies and energy levels of nuclear spin states, population of energy levels. Larmor precession, relaxation processes and relaxation times, theoretical principles underlying NMR, experimental set up and instrumentation: continuous wave and pulsed Fourier transform technique in NMR.</p> <p>Concept of chemical shift, shielding and deshielding mechanisms, diamagnetic-anisotropy, ring currents.</p> <p>Spin-spin coupling, coupling constants and rules governing the interpretation of first order <math>^1\text{H}</math>-NMR spectra and elucidation of structure. Kinetic applications.</p>	12 Hours
<b>UNIT-III: Magnetic Resonance Spectroscopy-II and Optical Spectroscopy</b>	
Nuclear quadrupole resonance spectroscopy: Theory and instrumentation, effect of magnetic field on the spectra, relationship between electric field gradients and molecular structure. Applications. The interpretation of eQq	12 Hours

<p>data, effect of crystal lattices on the magnitude of <math>eQq</math>. Structural information from NQR spectra.</p> <p>Electron spin resonance spectroscopy: Introduction and theoretical principles. Intensity, frequency, position and representation of ESR absorptions. Hyperfine structure of ESR absorptions. Zero field splitting and Kramer's degeneracy. Instrumentation. Applications to the study of free radicals and compounds with unpaired electrons: ESR spectra of hydrogen and nitrogen atoms, semi-quinone ion, naphthalene negative ion, methyl radical and methyl substituted radicals. Measurements of distribution of unpaired electron density in radicals. Study of coordination compounds by ESR technique.</p> <p>Optical rotatory dispersion and circular dichroism: Simple theoretical account and instrumentation. Treatment of data, applications to gross structure determination, octant rule, determination of stereochemistry and absolute configuration.</p>	
<b>UNIT-IV: Voltammetry:</b>	
<p>Voltammetry: Principles, and instrumentation, voltammetric techniques: Linear sweep voltammetry, staircase and square wave voltammetry, anodic stripping voltammetry, cathodic stripping voltammetry, cyclic voltammetry, normal and differential pulse voltammetry and their theoretical aspects, electrodes, cells and their set-up. Electron transfer (ET) or charge transfer process: reversible ET, irreversible ET, quasi reversible ET and their diagnostic tests. Applications of voltammetric techniques.</p> <p>Polarography: Principles, dropping mercury electrode (DME), instrumentation, linear scan polarography, polarography currents, polarograms. Diffusion current at dropping electrodes, residual currents, advantages and disadvantages of dropping mercury electrode, current-sampled polarography, half wave potentials. Pulse polarography. Applications.</p>	12 hours

<b>Paper Code and Name</b>	<b>PG75T303C:STATISTICAL MECHANICS AND POLYMER CHEMISTRY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
1.	This course provides methods for calculation of microscopic properties of many particle systems in terms of microscopic properties using statistical laws.
2.	This course provides the information of properties and applications of polymers in industry and biomedical field and also how electrochemical cell can be used to obtain the power.
3.	This course helps the students to understand how the polymer membranes are used in water and solvent purification technique and also provides utilization of information in various fields of science and Technology.

<b>PARTICULARS</b>	<b>Teaching Hours (Total. 48)</b>
<b>UNIT-I: STATISTICAL MECHANICS &amp; POLYMER CHEMISTRY- I</b>	
Microscopic and macroscopic systems. Microstates and macrostates. Assemblies of independent localised and non-localised systems. Phase space or $\gamma$ -space and $\mu$ -space. Ensembles.  Classical statistics: Maxwell-Boltzmann distribution for ideal gases and mixture of gases. Determination of Lagrangian multipliers, alpha and beta.  Heat capacities of solids: Einstein's theory of heat capacity of solids, Debye's theory, characteristic temperature and use of Debye equation for the determination of heat capacity at low temperature.  Entropies and heat capacities of ortho-, para-hydrogen systems, comparison of third law entropies with statistical entropies.	12 Hours
<b>UNIT-II: Statistical Mechanics and Statistical Thermodynamics-II:</b>	
Quantum statistics: Bose-Einstein, Fermi-Dirac and comparison with Maxwell-Boltzmann statistics. Numerical problems.  Partition functions: Definition of partition function and separation of partition functions. Translational, Sackur-Tetrode equation, rotational, vibrational and electronic partition functions for monoatomic, diatomic and polyatomic gaseous molecules. Equipartition of energies.	12 Hours
<b>UNIT-III: Polymer Chemistry and Fuel cells:</b>	

<p>Dendrimers and hyper-branched polymers: introduction to dendrimers, methods of preparation, common properties and applications. Synthesis of polyamidoamines using divergent route and dendratic polyether macromolecules using convergent route. Hyper-branched polymers, preparation of aromatic polyesters by the self-condensation of 3, 5-bis (acetoxy)benzoic acid.</p> <p>Polymeric nonlinear optical: Materials, definition, classification of NLO materials, basic molecular characteristics of second-order NLO materials, types of second-order NLO materials with examples, schematic representation of experimental setup for the measurement of second harmonic generation (SHG). Preparation of polyimide from diamino NLO chromophores.</p> <p>Semiconducting polymers: basic criteria for semiconducting properties, electrochemical polymerization, precursor route to poly (p-phenylenevinylene) (PPV) and synthesis of poly (3-allylthiophene).</p> <p>Fuel cells: Introduction, difference between conventional cell and a fuel cell, limitations, advantages, types of fuel cells. Construction and working of hydrogen-oxygen and methanol-oxygen fuel cells. Applications of fuel cells.</p>	12 Hours
<b>UNIT-IV: Polymer Membrane Chemistry:</b>	
<p>Polymer membranes in separation science: mechanism of transport in polymeric membranes and rejection performance, and industrial applications of micro filtration (MF) and ultrafiltration (UF) membranes. Reverse osmosis (RO): principles of RO process and determination of its efficiency in terms of flow of water and salt. Preparation of polyamide and cellulose based RO membranes. Electrodialysis: principle of ED, working model of ED. Preparation of ion-exchange membranes grafted on polyethylene film using styrene and chloromethylstyrene. Preparation of styrene-divinyl benzene based ion exchange membranes. Preparation of anion exchange membranes using chloromethylated polysulfone and 4, 4'-bipyridine. Preparation of sulfonated poly(phosphazene) membrane. Preparation of ion exchange membrane using 4-vinyl pyridine and epichlorohydrin. Applications of Electrodialysis.</p> <p>Vinyl polymers (preparation, properties and commercial importance): polyethylene, polypropylene, polystyrene, polymethylmethacrilate, polyvinyl chloride, polytetrafluoroethylene. Polyesters: poly(ethylene terephthalate). Polyamides: aramides (Kevlar and Nomex), polyimides, polysulphone, polyurethanes, polyureas. Natural polymers: polyisoprenes, chitosan.</p>	12 hours

Paper Code and Name	PG75P301C: LAB COURSE IN PHYSICAL CHEMISTRY
COURSE OUTCOMES (COs)	
1.	This lab course is designed to expand and deepen the knowledge in the variety of experimental methods presented in physical chemistry laboratory previously.
2.	This lab is based on several sets of advanced experiments on various topics in physical chemistry including viscosity, verification of the Debye-Huckel-Onsager equation conductometrically, reaction kinetics, potentiometric estimation of a mixture of halides, cryoscopy, pH-metry, spectrophotometric estimation of metal ion. etc.

PARTICULARS	Teaching Hours
1. Viscosity: Determination of number average molecular weight by hydroxyl end group analysis.	
2. Conductance: Verification of the Debye-Huckel-Onsager equation for strong electrolytes.	
3. Reaction Kinetics: Studying the acid catalysed kinetics of oxidation of glycine by chloramine-T (CAT) and hence determination of order of reaction w.r.t. CAT and glycine and hence overall order of the reaction.	
4. Potentiometry: Potentiometric estimation of a mixture of halides, (KCl, KBr and KI) by titrating against AgNO <sub>3</sub>	

<ol style="list-style-type: none"> <li>5. Cryoscopy: Determination of the molecular weight of the given solute by the vacuum flask method.</li> <li>6. pH metry: Determine the acid and base dissociation constant of an amino acid and hence find its isoelectric point</li> <li>7. Refractometry: Analysis of a binary mixture (glycerol and water) by refractive indices measurement.</li> <li>8. Spectrophotometry: Individual and simultaneous estimation of Fe(III) and Cu(II) spectrophotometrically by titrating against EDTA.</li> <li>9. X-Ray diffraction: To determine the lattice constant and Bravais lattice using X-ray diffraction pattern.</li> <li>10. Zeeman effect: Study the Zeeman effect and determine <math>e/m</math> ratio of electron.</li> </ol>

<b>Paper Code and Name</b>	<b>PG75P302C: LAB COURSE IN PHYSICAL CHEMISTRY</b>
<b>COURSE OUTCOMES (COs)</b>	
1.	This lab course is designed with the aim that student demonstrates capabilities such as experiment design and implementation with an emphasis on safety rules. demonstrating measurement capabilities, analysis and discussion, developing independent thinking abilities.
2.	This lab is based on the following set of advanced experiments on various topics in physical chemistry including adsorption, conductometric titration of moderately weak acid with strong base, determination of degree of hydrolysis of urea hydrochloride by studying kinetics of hydrolysis of methyl acetate using HCl and equinormal urea hydrochloride solutions, acid and base dissociation constants of an amino acid and its isoelectric point, etc.

<b>PARTICULARS</b>	<b>Teaching Hours</b>
<ol style="list-style-type: none"> <li>1. Surface Tension: Variation of surface tension of aqueous solutions of a liquid (n-propyl alcohol) with concentration and determination of limiting cross sectional area of the alcohol molecule.</li> <li>2. Adsorption: Investigation of adsorption of oxalic acid from aqueous solution by activated charcoal and examine the validity of Freundlich and Langmuir's adsorption isotherm.</li> <li>3. Conductance: Moderately weak acid like salicylic acid vs NaOH (Salt line method and alkali method).</li> <li>4. Reaction Kinetics: Determination of degree of hydrolysis of urea hydrochloride by studying kinetics of hydrolysis of methyl acetate using HCl and equinormal urea hydrochloride solutions.</li> <li>5. Potentiometry: (i) Acid and base dissociation constants of an amino acid and its isoelectric point and (ii) Mean ionic activity coefficient of hydrochloric acid at different concentrations using a concentration cell without transference: influence of ionic strength on the mean ionic activity coefficient.</li> <li>6. Refractometry: Variation of refractive index with composition of mixture (e.g., <math>\text{CCl}_4</math> and <math>\text{CH}_3\text{COOC}_2\text{H}_5</math>).</li> <li>7. Transport Number: Transference number of <math>\text{Ag}^+</math> and <math>\text{Cl}^-</math> ions by making boundary method.</li> </ol>	

<p>8. Viscosity: Determination of molecular weight of polyhexamethylene sebacamide (nylon 6, 10) by amine end group analysis.</p> <p>9. Optics: To determine the wavelength of He–Ne laser by measuring the fringe width from interference pattern.</p>

<b>Paper Code and Name</b>	<b>PG75P303C: LAB COURSE IN PHYSICAL CHEMISTRY</b>
<b>COURSE OUTCOMES (COs)</b>	
1.	This lab course is designed to provide students with idea of scientific activity.
2.	This laboratory is based on several sets of experiments covering a wide range of topics in physical chemistry such as solubility study, the effect of addition of an electrolyte on the solubility of an organic acid. construction of phase diagram of three component system. studying the kinetics of saponification of ethyl acetate by _____ conductance _____ method. determination of step wise heat of neutralization of a poly basic acid. reaction kinetics of H <sub>2</sub> O <sub>2</sub> and HI: clock reaction, etc.

PARTICULARS	Teaching Hours
<ol style="list-style-type: none"> <li>1. Solubility: Study the effect of addition of an electrolyte (NaCl, KCl, Na<sub>2</sub>SO<sub>4</sub> and K<sub>2</sub>SO<sub>4</sub>) on the solubility of an organic acid (Benzoic acid or salicylic acid).</li> <li>2. Phase equilibria: Construction of phase diagram of three component system (water, benzene and ethanol or acetic acid, water and chloroform or benzene).</li> <li>3. Conductance: Studying the kinetics of saponification of ethyl acetate by conductance method and hence determine the rate constant.</li> <li>4. Thermochemistry: Determination of step wise heat of neutralization of a polybasic acid.</li> <li>5. Reaction Kinetics: Reaction kinetics of H<sub>2</sub>O<sub>2</sub> and HI: Clock reaction.</li> <li>6. Potentiometry: Potentiometric determination of stability constant of Cu<sup>2+</sup>–EDTA complex.</li> <li>7. Cryoscopy: Determination of degree of dissociation of given electrolytes (KCl, urea) using cryoscopy method.</li> <li>8. Refractometry: Molar refraction of a solid substance by dissolving it in a solvent.</li> <li>9. Solid state: Determine the curie temperature of ferromagnetic material.</li> <li>10. X-ray diffraction: Determine the linear position and inter planar spacing using X-Ray diffraction patterns.</li> </ol>

<b>Paper Code and Name</b>	PG75T401C: QUANTUM MECHANICS AND SOLID-STATE CHEMISTRY
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
1.	This course describes the quantum mechanical treatment of the molecules by using different theories.
2.	The course solid state chemistry provides the properties and applications of solids.

<b>PARTICULARS</b>	<b>Teaching Hours (Total. 48)</b>
<b>UNIT–I: Chemical Bonding–I</b>	
Electronic structure of diatomic molecules. The Born–Oppenheimer approximation. Valence bond and molecular orbital theories of chemical bonding, comparison of the two theories. Applications of valence bond and molecular orbital theories to hydrogen molecule and hydrogen molecule ion. Improvements in the Hitler–London wave functions.  Bonding and antibonding molecular orbitals. Molecular orbital theory applied to homonuclear and heteronuclear diatomic molecules, molecular electron configuration and calculation of bond order.  Slater orbitals, Hartree–Fock self-consistent field method for many electron atoms. Configuration interaction and Rootham equations.	12 Hours
<b>UNIT- II: Chemical Bonding–II</b>	
Localized and non–localized molecular orbitals, hybridization and direct valence. Quantum mechanical treatment to $sp$ –, $sp^2$ – and $sp^3$ –hybridization and the geometry associated with $sp$ –, $sp^2$ – and $sp^3$ –orbitals.	12 Hours

Conjugated and aromatic molecules: Huckel molecular orbital theory and MO description of normal and cyclic butadienes, ethylene and aromatic molecules (benzene as an example), calculation of delocalization energies, fractional bond orders, charge density calculations and extended Huckel theory.	
<b>UNIT–III: Solid State Chemistry–I</b>	
<p>Introduction, properties of Solids: Malleability, ductility, elasticity, plasticity, brittleness hardness, enantiotropy, monotropy and isomorphism. Allotropy and polymorphism of solids. Bonding in solids: Ionic, covalent, metallic, molecular and hydrogen bonded crystals. Lattice energy of ionic crystals. Numerical problems.</p> <p>Imperfection in solids: Types of defects including Frenkel and Schottky defects, thermodynamics of Frenkel and Schottky defects.</p> <p>Reactivity in solid state: Introduction, thermodynamics, classification, experimental methods for the study, kinetic equation, energy of activation of solid-state reactions, diffusion mechanism in solid state reactions, factors affecting the reactivity of solids.</p>	12 Hours
<b>UNIT–IV: Solid State Chemistry–II</b>	
<p>Semiconductors: Bonding and conductivity, mechanism of conductivity, energy bands in semiconductors, impurity conductors, p–n and n–p–n junctions and importance of semiconductors.</p> <p>Superconductors: Occurrence of super conductivity, its destruction by magnetic fields, effect of I.R. and isotope effect, B.C.S. theory of superconductivity applications</p>	12 hours

<b>Paper Code and Name</b>	<b>PG75T402C: CATALYSIS AND POLYMER CHEMISTRY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
1.	This course describes the reaction kinetics of homogeneous and heterogeneous catalyzed reactions and industrial applications.
2.	This course gives the different methods available for the polymer weight determination.
3.	This unit provides the information regarding thermal characterization techniques and method of polymer fabrication and synthesis of polymers.

<b>PARTICULARS</b>	<b>Teaching Hours (Total. 48)</b>
<b>UNIT–I: Homogeneous Catalysis:</b>	
Homogeneous Catalysis: Introduction, general catalytic mechanism: equilibrium treatment and steady-state treatment, activation energies for catalysed reactions. Acid-Base catalysis: General acid–base catalysis, mechanism of acid-base catalysis, catalytic activity and acid-base strength, salt effects in acid-base catalysis and specific acid-base catalysis: Bronsted relation and linear free energy changes. Acidity functions: Zucker–Hammett hypothesis and Bunnett hypothesis.	12 Hours
Enzyme Catalysis: Influence of substrate concentration, pH, temperature and inhibitors, transient-phase kinetics. Mechanism of enzyme catalysis: Michaelis–Menten mechanism and Lineweaver–Burk plot.	
<b>UNIT–II: Adsorption and Heterogeneous Catalysis</b>	

<p>Adsorption: The phenomenon of adsorption and thermodynamics of adsorption, adsorption isotherms, Langmuir adsorption isotherm, Langmuir constant and Gibbs energy of adsorption, Langmuir adsorption with lateral interaction, BET adsorption isotherm, Freundlich isotherm and adsorption on heterogeneous surface.</p> <p>Heterogeneous catalysis: Catalysis at surfaces, mechanism of heterogeneous catalysis: Langmuir–Hinshelwood mechanism and Eley–Rideal mechanism. Transition–state theory of heterogeneous surface reaction: Rates of chemisorption, rates of desorption, unimolecular and bimolecular surface reactions. Industrial applications of heterogeneous catalysis. Comparison of homogenous and heterogeneous reaction rates.</p>	12 Hours
<b>UNIT–III: Polymer Rheology and Molecular Weight Determination:</b>	
<p>Rheological Properties: Introduction, Hook’s law, Newton’s equation and stress-strain behaviour in polymers.</p> <p>Measurements of average molecular weights: Osmometry, viscometry, light scattering, and gel permeation chromatography. Practical significance of polymer molecular weight and related numerical problems.</p>	12 Hours
<b>UNIT–IV: Thermal and Polymer Fabrication Techniques</b>	
<p>Thermal method of analysis: Introduction, thermal characterization techniques: Thermogravimetric analysis (TGA) and differential thermal analysis (DTA), introduction, experimental procedure, advantages and disadvantages of TGA/DTA. Differential scanning calorimetry (DSC): Introduction, experimental setup, heat capacity, glass transition temperature, crystallization, melting and determination of percent crystallinity.</p> <p>Methods of Polymer Fabrications: Fabrication of polymer films, solution casting, melt pressing, melt extrusion and bubble blown. Fabrication of shaped polymer objects: compression moulding, injection moulding, reaction injection moulding, blow moulding, extrusion moulding and calendaring. Spinning industrial polymers: Solution spinning and melt spinning</p>	12 hours

<b>Paper Code and Name</b>	<b>PG75T403C: SPECTROSCOPY AND MICROSCOPY</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
1.	The Raman spectroscopy is commonly used in chemistry to provide a structural fingerprint by which molecules can be identified.
2.	The mass spectrometry is helpful in determining the structure of a compound by observing its fragmentation and its uses in analytical laboratories.
3.	Photoelectron spectroscopy involves the study of the electronic structure of molecules. Mossbauer spectroscopy is used to study nuclear structure with the absorption and reemission of gamma rays.
4.	Microscopic techniques make it possible to assess the morphology, composition, physical properties, and dynamic behaviour of materials.

<b>PARTICULARS</b>	<b>Teaching Hours (Total. 48)</b>
<b>UNIT–I: Raman Spectroscopy:</b>	
<p>Introduction to scattering phenomenon, Raman effect: Theories of Raman effect (Classical and quantum theory). Concept of polarizability and polarizability ellipsoid. Rotational–Raman Spectra and vibrational–Raman spectra of Molecules.</p> <p>Symmetry selection rule and prohibition of inter–combination, influence of nuclear spin in case of homonuclear diatomic molecules, ortho– and para–modifications. Rotational–vibrational–Raman spectra, rule of mutual exclusion. Polarization of Raman lines and depolarization ratio. An introduction to Laser resonance Raman spectroscopy. Structure elucidation using combined Raman and infrared spectroscopy (e.g.H<sub>2</sub>O, N<sub>2</sub>O and CO<sub>2</sub>). Numerical problems.</p>	12 Hours
<b>UNIT–II: Mass Spectrometry:</b>	
<p>Mass Spectrometry: Introduction, theoretical principles and instrumentation: ionization and ionization methods (electron ionization, chemical ionization, desorption ionization and electron spray ionization techniques). Mass analyser (magnetic deflection and time of flight mass analyser).</p> <p>Metastable ions. Ionization and appearance potentials, experimental determination of ionization and appearance potential and applications in mass spectrometry.</p>	12 Hours

<p>Fragmentation: Principles, Stevenson rule, odd electron (<math>OE^+</math>) and even electron (<math>EE^+</math>) ions, molecular ion and base peak, fragmentation pattern and correlation with structure. Isotope effects in chloro and bromo compounds. McLafferty rearrangement.</p> <p>Nitrogen Rule. Application of mass spectrometry in structure diagnosis and determination of empirical molecular formula from the peak intensities of molecular ion and isotopic peaks. Numerical problems.</p>	
<b>UNIT–III: Photoelectron and Mössbauer Spectroscopy</b>	
<p>Photoelectron Spectroscopy: Introduction, photoelectric effect, instrumentation. Valence and binding energies, molecular term symbols, shift in energies due to chemical effects. Auger electron spectroscopy (AES), its advantages and limitations. Electron spectroscopy for chemical analysis (ESCA). Applications to free molecules and surfaces.</p> <p>Mössbauer Spectroscopy: Theoretical principles, Mössbauer effect, conditions for Mössbauer spectroscopy and instrumentation. Resonance line shifts, chemical shifts, electric quadrupole interactions and magnetic interactions. Applications of Mössbauer Spectroscopy</p>	12 Hours
<b>UNIT–IV: Microscopy:</b>	
<p>Introduction to Microscopy.</p> <p>Scanning electron microscopy (SEM): Introduction, principle and instrumentation, sample preparation, scanning process, image formation and applications of SEM.</p> <p>Transmission electron microscopy (TEM): Introduction, principle and instrumentation, sample preparation, advantages/disadvantages and applications of TEM.</p> <p>Atomic force microscopy (AFM): Introduction, principle, imaging modes, topographic image, advantages/disadvantages and applications of TEM.</p> <p>Attenuated total reflectance (ATR) spectroscopy: Introduction, principle, sampling method, crystal methods for ATR, factors affecting the spectrum, sampling: liquid and solid sampling. Applications.</p> <p>Photoacoustic spectroscopy: Introduction, principle, photoacoustic effect, advantages and limitations of photoacoustic spectroscopy, examples and applications of photoacoustic spectroscopy.</p>	12 hours

<b>Paper Code and Name</b>	<b>PG75P401C: LAB COURSE IN PHYSICAL CHEMISTRY</b>
<b>COURSE OUTCOMES (COs)</b>	
1.	This course is planned to familiarize and introduce the students to modern laboratory instrumentation and experimental techniques in physical chemistry.
2.	It consists of a number of experiments that use different techniques to explore fundamental concepts in variation of solubility of an organic acid, studying the kinetics of saponification of ethyl acetate by conductance method and hence determine the rate constant, thermochemistry. reaction kinetics, etc.

<b>PARTICULARS</b>	<b>Teaching Hours</b>
1. Viscosity: Viscosity of air by Rankine's method. 2. Solubility: Variation of solubility of $\text{Ca(OH)}_2$ in NaOH solution and hence determination of the solubility product of $\text{Ca(OH)}_2$ . 3. Thermochemistry: (i) Heat of reaction (precipitation/formation) of $\text{BaSO}_4$ . (ii) Heat of transition of Glauber's salt ( $\text{Na}_2\text{SO}_4 \cdot 10\text{H}_2\text{O}$ ) 4. Surface Tension: Critical micelle concentration of a soap molecule. (e.g., Potassium laurate). 5. Potentiometry: Determination of degree of hydrolysis and $K_h$ of aniline hydrochloride 6. Polarimetry: Kinetics of inversion of sucrose and determination of catalytic coefficient. 7. Cryoscopy: Determination of activities of electrolytes and non-electrolytes using cryoscopy method. 8. Spectrophotometry: Investigation of complex formation between $\text{Fe}^{+3}$ and salicylic acid and determination of empirical formula, stability, $\Delta G$ value calculation and pH effects. 9. Glass transition temperature: Determination of glass transition temperature by dilatometer. 10. Solid state: To determine the electron-phonon coupling constant of copper

Paper Code and Name	PG75P403C: LAB COURSE IN PHYSICAL CHEMISTRY
COURSE OUTCOMES (COs)	
1.	This lab course is designed so that the students learn how to describe experimental results and analyse them quantitatively and develop the ability of scientific communications through written reports and frontal presentations
2.	The experiments include, determination of molecular surface energy and association factor, determination of formula of the complex formed between copper ions and ammonia by distribution method, kinetics of oxidation of 2-propanol by chromic acid and determination of Transport number of $\text{Ag}^+$ and $\text{NO}^-$ in solution (concentration cells).

PARTICULARS	Teaching Hours
1. Surface Tension: Molecular surface energy and association factor.	
2. Phase Equilibria: Formula of the complex formed between copper ions and ammonia by distribution method.	
3. Refractometry: Ionization constant of bromphenol blue.	
4. Reaction Kinetics: Kinetics of oxidation of 2-propanol by chromic acid and determination of effect of addition of $\text{Mn(II)}$ on the reaction rate.	
5. Reaction Kinetics: Studying the kinetics of reaction between CAT and indigocaramine spectrophotometrically and determination of rate constant	
6. Potentiometry: Transport number of $\text{Ag}^+$ and $\text{NO}_3^-$ in solution (concentration cells)	
7. Viscosity: Effect of temperature on the viscosity of the liquid Viscosity of	

<p>air by Rankine's method.</p> <p>8. Solid state: Determination of magnetic susceptibility of paramagnetic substance by Quinke's method</p> <p>9. Solid state: Determine the relative integrated intensities of ZnS by Debye Scherrer pattern.</p> <p>Computer applications: The students will be taught to operate a PC and how to run standard programs and packages such as MS-WORD, EXCEL, ORIGIN, SIGMA PLOT, CHEM SKETCH etc. and solve chemistry problems. Problems will be taken preferably from physical chemistry for plotting first and second derivative curves, linear plots etc. Problems from chemical kinetics, polymer chemistry, analytical chemistry, electrochemistry, spectroscopy etc. will be solved.</p>

## Specific Course Outcome (Analytical Chemistry)

<b>Paper Code and Name</b>	<b>PG75T104D: ANALYTICAL CHEMISTRY</b>
<p style="text-align: center;"><b>COURSE OUTCOMES</b></p> <p>After studying this paper, students will learn</p> <ul style="list-style-type: none"> <li>➤ The classification of analytical techniques, classical quantitative techniques (volumetry and gravimetry) with regard to minimization of errors, mechanism of precipitation and factors influencing precipitation, coprecipitation and post-precipitation, usage of organic reagents in gravimetric analysis,</li> <li>➤ Selection of suitable indicators in various titrimetric analysis such as neutralization reactions, redox reactions, complexometric reactions and precipitation reactions. The application of these titrimetric methods for inorganic analysis.</li> <li>➤ The classification and theory of various chromatographic methods such as column chromatography, TLC, HPLC, GC and Ion-exchange chromatography.</li> <li>➤ The applications, advantages and limitations of various chromatographic techniques.</li> <li>➤ Use of solvent extraction method in the quantitative determination of metal ions.</li> </ul>	
<p style="text-align: center;"><b>UNIT-I</b></p> <p><b>Language of Analytical Chemistry, Data Treatment and Gravimetric Analysis:</b></p> <p>Language of analytical chemistry: Definition of analysis, determination, measurement, techniques and methods. Classification of analytical techniques. Selection of an analytical method: Accuracy, precision, sensitivity, selectivity, robustness and ruggedness. Figures of merit of analytical methods: Sensitivity, detection limit and linear dynamic range.</p> <p>Errors and Treatment of analytical Data: Limitations of analytical methods—Errors: determinate and indeterminate errors, minimization of errors. Statistical treatment of finite samples, measures of central tendency and variability, mean, median, range, standard deviation and variance. Student's t-test, confidence interval of mean. Testing for significance and comparison of two means and two standard deviations. Comparison of an experimental mean and a true mean. Criteria for the rejection of an observation, Q-test. External standard calibration, the least squares methods, regression equation and correlation coefficient.</p> <p>Gravimetric analysis: Mechanism of precipitation, factors influencing precipitation, coprecipitation, postprecipitation and organic reagents used in gravimetry (oxime and dmg).</p> <p style="text-align: right;"><b>(12 Hours)</b></p>	
<p style="text-align: center;"><b>UNIT-II</b></p> <p><b>Titrimetric Methods:</b></p> <p>Titrimetric Analysis: Principles of titrimetric analysis. Classification of reactions in titrimetry.</p>	

Titration curves for strong acid and strong base, weak acid and strong base and weak base and strong acid titrations. Titration curves, quantitative applications, selecting and standardizing a titrant, inorganic analysis, alkalinity, acidity and ammonium salts.

Complexometric titrations: Indicators for EDTA titrations, theory of common indicators, titration methods employing EDTA, direct, back and displacement titrations, indirect determinations, titration of mixtures using masking and demasking agents.

Redox Titrations: Balancing redox equations, calculation of the equilibrium constant of redox reactions, titration curves, theory of redox indicators, calculation of standard potentials, determination of chemical oxygen demand (COD) in natural and waste waters.

Precipitation titrations: Titration curves, titrants and standards, indicators for precipitation titrations involving silver nitrate, the Volhard, the Mohr and the fajan's methods

**(12 Hours)**

### **UNIT-III**

#### **Separation Methods-I:**

Fundamentals of chromatography: General description, definition, terms and parameters used in chromatography, classification of chromatographic methods, criteria for selection of stationary and mobile phase and nature of adsorbents.

Column chromatography: Theories, plate theory, rate theory, band broadening-eddy diffusion, longitudinal diffusion and resistance to mass transfer, column efficiency, Van Deemter's equation and its modern version, interrelationships, capacity factor, selectivity factor, column resolution, distribution constant and applications of conventional column chromatography, advantages and limitations.

Thin layer chromatography (TLC): Definition, mechanism, efficiency of TLC plates, methodology, selection of stationary and mobile phases, development, spray reagents, identification and detection, reproducibility of  $R_f$  values, qualitative and quantitative analysis.

High performance liquid chromatography (HPLC): Instrumentation, pumps, column packing, characteristics of liquid chromatographic detectors, UV and fluorescence detectors, advantages and applications.

**(12 Hours)**

### **UNIT-IV**

#### **Separation methods-II**

Gas chromatography (GC): Principle, instrumentation, columns, study of detectors, thermal conductivity, flame ionization and mass spectrometry, factors affecting separation, retention volume, retention time and applications.

Ion exchange chromatography (IEC): Definition, principle, requirements for ion-exchange resin, types of ion-exchange resins, resin properties-ion-exchange capacity and its determination, resin selectivity and factors affecting the selectivity, applications of IEC in purification and recovery processes.

Solvent extraction: Nernst partition law, efficiency and selectivity of extraction. Extraction systems: Extraction of covalent neutral molecules, extraction of uncharged metal chelates and synergic extraction, extraction of ion-association complexes-non chelated complexes and chelated complexes. Use of salting out agents. Methods of extraction–batch and continuous extractions. Applications (special emphasis on extraction of iron and copper).

**(12 Hours)**

**Total: 48 Hours**

***Recommended Books:***

1. Fundamental of Analytical Chemistry, D.A. Skoog, D.M. West, Holler and Crouch, 8<sup>th</sup> edition, Saunders College Publishing, New York (2005).
2. Analytical Chemistry, G.D. Christian, 6<sup>th</sup> edition, Wiley–India (2007).
3. Quantitative Analysis, R.A. Day and A.L. Underwood, 6th edition, PHI Learning Pvt Ltd. New Delhi(2009).
4. Vogel's Textbook of Quantitative Chemical Analysis, J. Mendham, R.C. Denney, J.D.Barnes and M.J.K. Thomas, 6<sup>th</sup> edition, Third Indian Reprint, Pearson Education Pvt. Ltd.(2007).
5. Analytical Chemistry Principles, John H. Kennedy, 2nd edition, Saunders College Publishing, California(1990).

Paper Code and Name	PG75P104D: LAB ANALYTICAL CHEMISTRY
COURSE OUTCOMES	
<p><b>I. Organic Chemistry Practical</b></p> <p>Quantitative analysis</p> <ol style="list-style-type: none"> <li>1. Titrimetric Estimation of amino acids.</li> <li>2. Estimation of glucose by Bertrand's method.</li> <li>3. Estimation of keto group.</li> <li>4. Iodine value of oil (Chloramine - T method)</li> <li>5. Estimation of Nitro group by reduction using SnCl<sub>2</sub>.</li> </ol> <p>Qualitative Analysis</p>	

Separation of binary mixture of organic compounds using ether and identification of separated compounds by systematic qualitative organic analysis.

Please Note: 1) Individual organic compounds are to be given after the candidate reports the nature of the mixture. 2) Ether insoluble acids and ether insoluble Neutral organic compounds may be given. 3) Low boiling liquids and Amino acids need not be given.

The following mixtures may be given.

1. Acid + Base
2. Acid + Neutral
3. Base + Neutral
4. Phenol + Acid
5. Base + Phenol

## **II. Physical Chemistry Practicals**

1. Determination of molecular radius of glycerol molecule by viscosity method.
2. Estimation of metal ions of ferric-thiocyanate and cupric-ammonia complexes by spectrophotometrically.
3. Determination of relative strength of acids (HCl and H<sub>2</sub>SO<sub>4</sub>) by studying the hydrolysis of methyl acetate.
4. Determination of dissociation constants of weak monobasic acids potentiometrically by titrating against NaOH.
5. Comparison of strengths of chloroacetic acid and acetic acid using conductometric method.
6. Determine the dissociation constant of acetic acid pH-metrically by titrating against NaOH.

### ***Recommended Books:***

1. Practical Physical Chemistry by A. M. James and F. E. Prichard, Longmans, London.
2. Experiments in Physical Chemistry by Shoemaker and Garland, McGraw Hill, New York.  
Experiments in Physical Chemistry by Daniels, Alberty and Williams, McGraw Hill, New York.
3. Experimental Physical Chemistry by W. G. Palmer, Cambridge University Press, London.
4. Advanced Physico-Chemical experiments by J. Rose. 6. Text Book of Physical Chemistry by S. Glasstone, , McGraw Hill, London.
5. Text book of Quantitative Analysis by A. I. Vogel, ELBS, Harlow.
6. Advanced Practical Physical Chemistry by J. B. Yadav, Goel Publishing House.
7. Experimental Physical Chemistry by V. D. Athawale and Parul Mathur, New Age International Publishers.

9. Advanced Physical Chemistry Experiments by Gurtu and Gurtu, Pragati Prakashan Educational Publishers, 3rd Edition 2007.

**Scheme of Examination:**

- |                            |            |
|----------------------------|------------|
| i. Duration of examination | : 04 hours |
| ii. Experiment             | : 35 marks |
| iii. Viva-Voce & Journal   | : 05 marks |
| iv. Internal assessment    | : 10 marks |
| Total                      | : 50 marks |

Paper Code and Name	PG75T301D: Instrumental Methods of Analysis.
<b>COURSE OUTCOMES (COs)</b>	
<p>After studying this paper, students will learn,</p> <ul style="list-style-type: none"> <li>➤ Principles, theory, instrumentation and analytical applications of various optical methods such as AAS, emission spectroscopy and molecular luminescence spectroscopy.</li> <li>➤ Principles, theory, instrumentations and analytical applications of coulometry, amperometry, polarygraphy, electrophoresis, electrogravimetry, supercritical fluid chromatography, voltammetry, nephelometry and turbidometry besides their advantages of each method.</li> <li>➤ The types and importance of ion-selective electrodes in selective determination.</li> <li>➤ The use of thermal methods such as TGA, DTA, and DSC for characterization of inorganic compounds, polymers, pharmaceutical etc.</li> </ul>	
<b>UNIT-I</b>	
<p><b>Optical Methods:</b></p> <p>Atomic absorption spectrometry: Theory, instrumentation, different types of nebulizers, non flame techniques, electrothermal vapouriser, cold vapour AAS determination of mercury, interferences, differences between AAS and flame photometry and analytical applications of AAS.</p> <p>Emission Spectroscopy: Inductively coupled plasma optical emission spectrometry–theory and applications.</p> <p>Molecular Luminescence Spectroscopy: Theoretical basis for fluorescence and phosphorescence, instrumentation, factors affecting fluorescence, its applications in quantitative analysis and in the study of biomolecules. X-ray fluorescence elemental analysis.</p>	
<b>(12 Hours)</b>	
<b>UNIT-II</b>	

### **Analytical methods–I**

Coulometric methods of analysis: General discussion, coulometry at controlled potential, apparatus and general technique, applications, coulometric titrations (amperometric coulometric): Principles, apparatus, comparison of coulometric titrations with conventional titrations, automatic coulometric titrations and applications.

Amperometry: Principle, titrations, advantages and limitations and applications.

Ion selective electrodes: Glass ion selective electrodes, crystalline solid state ion selective electrodes, liquid-based ion selective electrodes and gas sensing electrodes.

Supercritical fluid chromatography (SFC): Properties of supercritical fluids, instrumentation and operating variables, comparison of SFC with other types of chromatography and applications.

**(12 Hours)**

### **UNIT–III**

#### **Analytical methods–II:**

Polarography: Theory of classical polarography, polarograms, polarographic currents. Halfwave potential, oxygen interference, advantages and limitations. pulse polarography and applications of polarography.

Electrogravimetric analysis: Theory, apparatus, deposition and separation, electrolytic separation of metals and applications.

Electrophoresis: Theory and classification, factors influencing the mobility–macromolecular size and charge, interaction with supporting electrolyte, pH and concentration discontinuities. Factors affecting electrophoretic phenomena–electrolysis, electroosmosis, temperature and supporting media. Instrumentation. Methodology: Preparation of gels–staining and destaining. Capillary electrophoresis methods: Capillary zone electrophoresis and capillary gel electrophoresis.

Light–scattering methods: Nephelometry and turbidometry: Principle, instrumentation and applications.

**(12 Hours)**

### **UNIT–III**

#### **Analytical methods–III**

Thermal method of analysis: Introduction.

Thermogravimetric analysis (TGA): Types of thermogravimetric analysis, principles, factors affecting the results, heating rate, furnace, instrument control/data handling. Instrumentation and applications.

Differential thermal analysis (DTA): Theory, variables affecting the DTA curves, differences between TGA and DTA, general principles. Instrumentation and applications.

Differential scanning calorimetry (DSC): Basic principle, differences between DTA and DSC.

Instrumentation, power compensated DSC, heat flux DSC and applications.

Thermomechanical analysis and dynamic mechanical analysis.

Voltammetry: Fundamentals of voltammetry. Cyclic voltammetry: Principles and applications.

Stripping analysis: Stripping voltammetry, basic principles, electrodes used for stripping analysis, apparatus for stripping analysis, applications and determination of lead in water by voltammetry.

**(12 Hours)**

**Total 48 hours**

***Recommended Books:***

<b>Paper Code and Name</b>	<b>PG75T302D: MOLECULAR SPECTROSCOPY</b>
<b>COURSE OUTCOMES (COs)</b>	
After studying this paper, students will learn <ul style="list-style-type: none"><li>➤ Importance of interaction of electromagnetic radiation with matter.</li><li>➤ The principle, theory and instrumentation of various spectroscopic techniques.</li><li>➤ Application of different spectroscopic techniques (UV-Vis, IR, NMR, EPR, Mossbauer) in the structural elucidation of organic/Inorganic compounds, biomolecules etc.</li></ul>	

## UNIT-I

### Basic concepts, Electronic Spectroscopy and Mass Spectrometry:

Properties of electromagnetic radiation.

Wave property: Interference and diffraction. Particle property: Photoelectric effect.

Regions of the electromagnetic spectrum, energies corresponding to various kinds of radiation. Interaction of electromagnetic radiation with matter (absorption, emission, transmission, reflection, dispersion, polarisation and scattering). General application.

Electronic spectroscopy: Molecular electronic absorption spectroscopy (UV-Visible), electronic spectra of diatomic molecules, electronic transitions, selection rules, assignment of transition, band intensities, substituent and solvent effect and charge transfer transitions. Application to organic and inorganic molecules.

Mass Spectrometry: Ionization and mass analysis.

Fragmentation: Principles, odd electron ( $OE^+$ ) and even electron ( $EE^+$ ) ions, molecular ion and base peak, nitrogen rule, metastable ions. Isotope effects in chloro and bromo compounds. Fragmentation of inorganic and organic compounds

## UNIT-II

### Vibrational Spectroscopy:

Vibrational spectroscopy: Infrared spectroscopy: Vibrational energy levels, infrared spectra of diatomic and polyatomic molecules, normal modes of vibration, force constant, selection rules, anharmonicity, the vibration-rotation spectroscopy. Infrared spectra of simple molecules and coordination compounds, changes in infrared spectra of donor molecules upon coordination (N,N-dimethylacetamide, urea, DMSO, pyridine N-oxide, ammine, cyano, cyanato and thiocyanato complexes), mono and multinuclear carbonyl complexes, nitrosyls, phosphine and arsine complexes. Change in spectra accompanying change in symmetry upon coordination ( $NO_3^-$ ,  $SO_4^{2-}$ ,  $NO_2^-$ , and  $ClO_4^-$ ), hydrogen bonding. Instrumentation including FTIR.

Raman spectroscopy: Theory, relation with IR spectroscopy, resonance Raman stimulated hyper and inverse Raman effects. Experimental techniques, structure determination from IR and Raman spectra.

(12 Hours)

## UNIT-III

### Magnetic Resonance spectroscopy:

Nuclear magnetic resonance spectroscopy: Magnetic properties of nuclei, population of energy levels, the Larmor precession, relaxation processes, chemical shift, shielding mechanism, spin-spin interactions, rules governing the interpretation of first order spectra, effect of chemical exchange on spectra. Analysis of complex NMR spectra,  $^1H$ -NMR spectra of organic molecules and complex metal ligands. Spin-systems: First order and second order patterns.

Long range coupling : Spin decoupling, CIDNP and NOE. NMR shift reagents.  
NMR studies of nuclei other than proton,  $^{13}\text{C}$ -NMR (including heteronuclear coupling with other nuclei viz.,  $^{19}\text{F}$  and  $^{31}\text{P}$ ),  $^{19}\text{F}$ ,  $^{31}\text{P}$ ,  $^{11}\text{B}$ ,  $^{15}\text{N}$ . Spectra of paramagnetic complexes, contact shift, double resonance technique. Instrumentation including FT-NMR.

(12 Hours)

#### UNIT-IV

##### **Electron Paramagnetic Resonance and Mössbauer Spectroscopy:**

Electron Paramagnetic Resonance (EPR) Spectroscopy: Basic principles, selection rules, intensity, width, position of spectral line, multiplet structure of EPR spectra, hyperfine interaction, spin-orbit coupling, zero-field splitting and Kramer's degeneracy, rules for interpreting spectra, factors affecting the magnitude of values. Instrumentation. Applications to the study of free radicals, coordination compounds, biological studies and rate of electron exchange reactions.

Mössbauer Spectroscopy: Introduction, principles, conditions for Mössbauer spectroscopy, parameters from Mossbauer spectra, isomer shifts, electric quadrupole interaction, magnetic interactions, Mossbauer spectrometer. Applications in structure determination of  $\text{Fe}_3(\text{CO})_{12}$ , Prussian blue, oxyhemerythrin, hexacyanoferrates, nitropruside, tin halides.

(12 Hours)

**Total 48 Hours**

##### ***Books Recommended:***

10. Fundamentals of Molecular Spectroscopy - C. N. Banwell.
11. Physical Methods in Chemistry - R. S. Drago, Saunders college.
12. Structural Methods in Inorganic Chemistry - E. A. Ebsworth, D. W. H. Rankin and S. Craddock, ELBS.
13. Infrared Spectra of Inorganic and Coordination Compounds - K. Nakamoto.
14. Infrared Spectroscopy - C. N. R. Rao.
15. Electron Absorption Spectroscopy and Selected Techniques - D. N. Satyanarayana, University Press India Ltd. Hyderabad.
16. Introduction to Spectroscopy - D. L. Pavia, G. M. Lampman and G. S. Kriz, Thomson Learning, Singapore (2001)
17. Spectroscopic Identification of organic compounds - R. M. Silverstein and F. X. Webster, 6<sup>th</sup> Edition, Wiley and Sons, India Ltd. (2006).
18. Interpretation of Mass Spectroscopy - McLafferty.

<b>Paper Code and Name</b>	<b>PG75T303D: Selected Topics in Analytical Chemistry-I.</b>
<b>COURSE OUTCOMES (COs)</b>	
<p>After studying this paper, students will learn</p> <ul style="list-style-type: none"> <li>➤ Classification, properties and analytical and biological applications of different types of sensors</li> <li>➤ The importance of various elements in biological systems, their structural and functional roles such as dioxygen transportation and storage, electron transfer in different processes, metalloenzymes etc.</li> <li>➤ Use of metal complexes in medicine.</li> <li>➤ The overview, principles and types of automated systems and their advantages and disadvantages in the analysis.</li> <li>➤ Use of computer software programmes in chemistry for better understanding.</li> </ul>	

<b>Paper Code and Name</b>	<b>PG75P301D: Lab course in Analytical Chemistry–I</b>
<b>COURSE OUTCOMES</b>	
<p>After carrying out the experiments mentioned in this paper, students will learn</p> <ul style="list-style-type: none"> <li>➤ The hands on experience of various analytical instruments such as nephelometer/turbidometer (sulphate/phosphate content in ground water) and colorimeter (<math>\text{Ti}^{4+}</math> using <math>\text{H}_2\text{O}_2</math> and composition of <math>\text{Fe}(\text{phen})_3]2^+</math>), complexometric titration using EDTA (calcium in Milk and <math>\text{Fe}^{2+}/\text{Fe}^{3+}</math> in a mixture), and Ion-Exchange chromatography (chloride and Bromide; Cadmium and zinc). Upon acquiring the required knowledge as well as practical skills, the students can extend it for the analysis of different metal ions in different samples including soil, environmental, pharmaceutical etc samples.</li> </ul>	
<ol style="list-style-type: none"> <li>1. Nephelometric/turbidimetric determination of sulphate/phosphate in ground water samples.</li> <li>2. Determination of calcium in milk powder using EDTA.</li> <li>3. Separation and determination of chloride and bromide on an anion exchanger.</li> <li>4. Cation exchange chromatographic separation of cadmium and zinc and their estimation by</li> </ol>	

EDTA titration.

5. Analysis of a mixture of iron(II) and iron(III) by EDTA titration using pH control.
6. Evaluation of the composition of Fe(II)–1,10-phenanthroline complex by spectrophotometry.
7. Colorimetric determination of Ti(IV) using H<sub>2</sub>O<sub>2</sub>.

**Scheme of Examination:**

- |                            |            |
|----------------------------|------------|
| 1. Duration of Examination | : 4 hours  |
| 2. Experiment              | : 35 marks |
| 3. Viva-voce and Journal   | : 05 marks |
| 4. Internal assessment     | : 10 marks |
| Total                      | : 50 marks |

**Recommended Books:**

1. A text Book of Quantitative Inorganic Analysis–A.I Vogel
2. Vogel's Text Book of Quantitative inorganic Analysis, Basset, Denney, Jeffery & Mendham
3. Colorimetric Determination of Traces of Metals–E.B Sandell.
4. Analytical Chemistry–G.D Christian, 4<sup>th</sup> ed, Wiley, 1986.

<b>Paper Code and Name</b>	<b>PG75P302D: Lab course in Analytical Chemistry-II</b>
<b>COURSE OUTCOMES</b>	
After carrying out the experiments mentioned in this paper, students will learn  The hands on experience in paper & column chromatography (separation of amino acids and plant pigments), conductometric titrations, visual and potentiometric titrations (iron in razor blade and pharmaceuticals), complexometric titrations (Al and Mg in antacid) and precipitation titration (saccharin in Tablets). Such knowledge is helpful to students to analyse a variety of samples in quality control/ quality assurance.	
<b>Chromatography:</b>  (i) Paper chromatography: Qualitative separation of amino acids in a given mixture (ii) Column chromatography: Separation of plant pigments  <b>2. Conductometric titrations:</b>  (i) Sodium acetate with HCl (ii) NH <sub>4</sub> Cl with NaOH (iii) HCl, CH <sub>3</sub> COOH and CuSO <sub>4</sub>	

3. Estimation of iron in razor-blade by potentiometric & visual titration using sodium vanadate.
4. Assay of iron in pharmaceutical preparation by visual & potentiometric titration by  $\text{Ce}(\text{SO}_4)_2$
5. Determination of aluminium and magnesium in antacids by EDTA titration.
6. Determination of saccharin in tablets by precipitation titration.

**Scheme of Examination:**

- |                            |            |
|----------------------------|------------|
| 1. Duration of Examination | : 4 hours  |
| 2. Experiment              | : 35 marks |
| 3. Viva-voce and Journal   | : 05 marks |
| 4. Internal assessment     | : 10 marks |
| Total                      | : 50 marks |

3. Colorimetric Determination of Traces of Metals–E.B Sandell.
4. Analytical Chemistry–G.D Christian, 4<sup>th</sup> ed, Wiley, 1986.

<b>Paper Code and Name</b>	<b>PG75T401D: Pollution and Analysis</b>
<b>COURSE OUTCOMES (COs)</b>	
<p>After studying this paper , students will learn</p> <ul style="list-style-type: none"> <li>➤ causes for different types of pollution (soil, air, water, radiation and noise)and their hazardous effects on life and solutions for minimization of pollution.</li> <li>➤ Different methods of analysis to understand extent of pollution by determining pH organic matter and trace metals in soil; hardness, fluoride and dissolved oxygen in water; measurement of noise and analysis of radionuclides.</li> <li>➤ Analysis of pollutants present in soil, water &amp; air, and radioactive substances.</li> <li>➤ Determination of Chemical Oxygen Demand(COD) and Biological Oxygen Demand(BOD) using laboratory techniques.</li> </ul> <p>This training makes the students analyze air, water and soil samples by linking theory to practicals. They can also suggest suitable remedies to the concerned.</p>	
<b>UNIT–I</b>	
<p><b>Soil pollution and Analysis:</b></p> <p>Soil pollution: Acidification, salinisation, sodification, agrochemical pollution, urban and industrial pollution, effects of soil pollution and solutions for soil pollution.</p>	

Soil analysis: Preparation of laboratory sample, measurement of pH and conductivity, acidic and alkaline soil. Analysis of major constituents: Organic matter, nitrogen, sulphur, sodium, potassium and calcium. Analysis of trace elements: Copper, molybdenum, zinc and boron.

**(12 Hours)**

## **UNIT-II**

### **Air Pollution and Analysis:**

Air pollutants: Classification and properties of air pollutants, emission sources, major emissions from global sources. Behaviour and fate of air pollutants, wet precipitation, dry deposition, interaction at the earth's surface, chemical reactions in the atmosphere, photochemical smog, effects of air pollution on human health, vegetation and materials.

Air pollution sampling and measurement: Ambient air sampling, collection of gaseous and particulate air pollutants. Analysis of air pollutants: SO<sub>2</sub>-ambient air measurements, stack gas measurement chemiluminescent techniques, CO-NDIR, amperometric, FID & catalytic oxidation methods, Coulometric & chemiluminescent methods. Hydrocarbon measurement: Total and individual hydrocarbons by chromatographic methods, particulates optical & mass measurement methods.

**(12 Hours)**

## **UNIT-III**

### **Water Pollution and Analysis:**

Sources of water pollution, classification of water pollutants: Organic, inorganic, sediment, thermal and radioactive materials, effects and solutions. Analysis of water parameters: Hardness, carbonate, bicarbonate, chloride, sulphate, fluoride, sodium, potassium, iron, chromium, manganese, chlorine demand, dissolved oxygen, biochemical oxygen demand and chemical oxygen demand.

**(12 Hours)**

## **UNIT-IV**

### **Noise and Radiation Pollution and analysis:**

Noise pollution: Concept of sound, noise and hearing problems, measurement of noise, sources of noise, effects of noise pollution. Regulation and control rules 2000 for noise pollution.

Radiation Pollution: Sources, effects, protection from radiation pollution, disposal of radioactive waste. Analysis of radionuclides.

**(12 Hours)**

**Total: 48 Hours**

### ***Recommended Books:***

1. Environmental Chemistry, S.E. Manahan, CRC Press/ Lewis Publishers, 1994
2. Environmental Chemistry with Green Chemistry, A.K. Das, Books and Allied (P) Ltd, (2012)

3. Environmental Chemistry, A.K.Dey, New Age International,(P) Ltd, Publishers, New Delhi
4. Environmental Chemistry, B.K.Sharma, Goel Publishing House.
5. Environmental Science and Technology, S.E. Manahan, Lewis Publishers, New York
6. Environmental pollution analysis, S.M.Khopkar, New Age International,(P) Ltd, Publishers, New Delhi

<b>Paper Code and Name</b>	<b>PG75T402D: Quality control, Analysis of Food, Beverages and Pharmaceuticals</b>
<b>COURSE OUTCOMES</b>	
<p>After studying this paper , students will learn</p> <ul style="list-style-type: none"> <li>➤ Basic concepts of quality control and quality assurance</li> <li>➤ Importance of quality control in drugs, pharmaceuticals and raw materials</li> <li>➤ Law related case studies of quality control section in various industries</li> <li>➤ Classification and analysis of beverages, food preservative, adulterants, drugs, pharmaceuticals, dairy products and edible oils.</li> </ul> <p>This knowledge is very useful to students seeking jobs in industries in Quality assurance and quality control. The knowledge on analysis in clinical studies is useful to diagnose the ailments or deficiencies.</p>	
<p style="text-align: center;"><b>UNIT-I</b></p> <p><b>Quality Control:</b></p> <p>An introduction to quality control and quality assurance: Basic concepts, quality assurance, aspects of specification and tolerance, quality acceptance, sampling, reliability, cost aspects of quality decisions. Importance of quality control: Drugs and pharmaceuticals. Sources of impurities in pharmaceutical chemicals. Quality control in raw materials, production (in process), finished product. Current trends in quality control, ISO-9000 and ISO-14000 series. Laws related to quality control. Case studies of quality control in various industries such as plastics and polymers, fertilizers, agrochemicals, petrochemicals, dyes and pharmaceuticals.</p> <p style="text-align: right;"><b>(12 Hours)</b></p> <p style="text-align: center;"><b>UNIT-II</b></p> <p><b>Analysis of Beverages, Food Preservatives and Adulterants:</b></p> <p>Introduction: Soft drinks, alcoholic drinks, tea, coffee and fruit juices. Analysis of Caffeine in coffee and tannin in tea, detection of chicory in coffee, chloral hydrate in toddy. Estimation of methyl alcohol in alcoholic beverages, poisonous materials derived from containers. Food preservatives like sodium benzoate, sodium propionate, sodium sulphate, potassium metabisulphate (qualitative and quantitative analysis).</p>	

Food Adulterants: Artificial sweeteners like saccharin and dulcin, coal tar dyes and non-permitted colours and trace metals, detection and estimation.

**(12 Hours)**

### **UNIT-III**

#### **Drugs and Pharmaceutical Analysis:**

Antibiotics: Introduction, classification, structure elucidation, stereochemistry and reaction mechanism of penicillins, tetracycline and chloramphenicol.

Analysis of common drugs:

Analgesics: Aspirin and paracetamol. Anthelmintics: Mebendazole. Antiallergies: Chlorpheniramine maleate. Anti-inflammatory agents: Oxyphenbutazone. Antimalarials: primaquine phosphate. Antituberculosists: Isoniazid (INH). Narcotics: Nicotine, morphine. Sedatives: Diazepam. Vitamins: A, B<sub>1</sub>, B<sub>2</sub>, B<sub>6</sub>, C & folic acid.

**(12 Hours)**

### **UNIT-IV**

#### **Analysis of dairy products and edible oils:**

Chemistry, principles and analysis of liquids (edible): (i) general composition of edible oils, qualitative tests to purity, rancidity of fats and oil, estimation of rancidity, hydrogenated fat, tests for common edible oils like groundnut oil, castor oil, cottonseed oil & mustard oil. Tests for adulterants like argemoss oil & mineral oils and (ii) analytical principles in the analysis of dairy products composition of milk and milk products, alcohol test, fermentation, dye reduction. Methylene blue and resazurin tests. Tests to distinguish between buffed oleomargarine, phosphate tests for efficacy of pasteurization. Analysis of fat content, mineral in milk and butter. Estimation of added water in milk.

**(12 Hours)**

**Total: 48 Hours**

#### ***Recommended Books:***

1. Analysis of Foods, H.E.Cox
2. Chemical Analysis of Foods, H.E.Cox
3. Foods: Facts and Principles; N. Shakuntala Many and S. Swamy, 4<sup>th</sup> Edtn., New Age International (1998)
4. Pharmaceutical analysis : Ed. By T.Higuchi and E.B. Hanssen, Wiley New York
5. Quantitative analysis of drugs: D.C.Garratt, Chappman and Hall, New York
6. Drugs and Pharmaceutical sciences Series; Marcel Dekkar, Vol. II, INC. New York

<b>Paper Code and Name</b>	<b>PG75T403D: Selected Topics in Analytical Chemistry – II</b>
<b>COURSE OUTCOMES</b>	
<p>After studying this paper , students will learn</p> <ul style="list-style-type: none"> <li>➤ Analysis of various biomedical samples, ores, minerals, fertilizers, metals, alloys and cement.</li> <li>➤ Types, composition and purification methods of crude oil.</li> <li>➤ Analysis of products and residues produced in refinery process of crude oil</li> <li>➤ Usage of various analytical techniques in the evaluation of crude oil and its product.</li> </ul> <p>The students will realise the importance of analysis and also the possible adulteration.</p>	
<p style="text-align: center;"><b>UNIT– I</b></p> <p><b>Analysis of Biomedical samples:</b></p> <p>Composition of body fluids and detection of abnormal levels of certain constituents leading to diagnosis of disease. Sample collection and preservation of physiological fluids, analytical methods for the constituents of physiological fluids (blood, serum, urine). Blood–estimation of glucose, cholesterol, urea, haemoglobin and bilirubin. Urine: Urea, uric acid, creatinine, calcium phosphate, sodium, potassium and chloride. Biological significance, analysis and assay of enzymes (pepsin, monoamine oxidase, tyrosinase), vitamins (thiamine, ascorbic acid, vitamin–A) and hormones (progesterone, oxytocin, insulin). Chemical, instrumental and biological assays to be discussed wherever necessary. Estimation of poisonous materials such as lead, mercury and arsenic in biological materials.</p> <p style="text-align: right;"><b>(12 Hours)</b></p>	
<p style="text-align: center;"><b>UNIT–II</b></p> <p><b>Analysis of Ores, Minerals and Fertilizers:</b></p> <p>Composition, properties and analysis of minerals and ores: Hematite, pyrolusite, dolomite, chromate, bauxite, limestone, zirconite, gypsum and epsom.</p> <p>Fertilizer analysis: Types, analysis of nitrogenous fertilizers, organic nitrogenous, phosphatic and potassic fertilizers.</p> <p>Pesticide and insecticide analysis: introduction, classification and analysis of DDT, gammexane, endosulphon, zinaf, ziram, malathian, thiram, thiometon, simazine &amp; chloridane.</p> <p style="text-align: right;"><b>(12 Hours)</b></p>	

### UNIT–III

#### **Metals, Alloys and Cement Analysis:**

Steel, Cu–Ni alloy, solder, bronze, brass, aluminum alloy, ferroalloys of silicon, molybdenum, chromium, titanium and vanadium. Analysis of structural materials: Cement and glass. Analysis of refractory materials: Fire clay, fluorspar. Analysis of cement

**(12 Hours)**

### UNIT–IV

#### **Analytical procedures in refineries:**

Types of crude oil (sweet and sour), composition of crude oil, causes for corrosion in refinery (sulfidic & naphthenic acid) crude oil refining, fractional distillation (atmospheric and vacuum distillation). Purification processes (merox, alkylation, reformulation, hydrotreating, cracking etc.). Products of refinery (naphtha, gasoline, diesel, furnace oil, lube oil etc.), residues of refining processes (sulfur, pet coke). Specifications of gasoline, jet fuel and diesel in India and abroad. Paraffins, iso-paraffins, olefins, naphthenes, aromatics.

Analytical techniques used in crude oil and products evaluation: True boiling point distillation, spectroscopic evaluation (NIR & FTIR), density, viscosity, cloud point, pour point, PIONA analysis in gasoline, simulated distillation, GC–MS, HPLC, cetane number and octane number .

**(12 Hours)**

**Total: 48 Hours**

#### ***Recommended Books:***

1. Technical methods of analysis: R.C.Griffin
2. Analytical Chemistry: Principles; J.H.Kennedy, 2<sup>nd</sup> Edn., Saunders, 1990
3. Principles of Instrumental methods of analysis: Skoog, Holler and Nieman, 5<sup>th</sup> Edn., Saunders 1998
4. Quantitative analysis: Day and Underwood, Prentice Hall, 1998
5. Fundamentals of petroleum refining: M.A.Fahim, T.A.Alsahhaf and Amal Elkilani, Elsevier Science, ISBN; 978–0–444–52785–1
6. Analytical methods in petroleum upstream applications. Etd., by Cesar Ovalles, Carl E. Rechsteiner Jr., CRC Press, Taylor and Francies Group
7. Industrial Chemistry: B.K.Sharma, Goel Publishing House
8. Quantitative analysis, An instrumental approach: Srivastava and Jain, S. Chand 1997
9. Biochemistry: The chemical reactions of living cells. D.E.Metzler, Academic Press.
10. Enzymes Chemistry: Impact and application Edn. Collin J.Suckling, Academic Press.

<b>Paper Code and Name</b>	<b>PG75D404D: PROJECT WORK</b>
<b>COURSE OUTCOMES (COs)</b>	
<p>During the project work, students will find new problems in the frontier areas of Research and work on them either in Industry/other educational institutions/R&amp;D organization/parent institution by applying the theoretical and practical knowledge gained during their M.Sc Course. This is the platform wherein the student can make use of his novel ideas to implement for the betterment of the society</p>	

<b>Paper Code and Name</b>	<b>PG75P401D: Instrumental Methods of Analysis.</b>										
<b>COURSE OUTCOMES (COs)</b>											
<ol style="list-style-type: none"> <li>1. Analysis of water for alkalinity and acidity by pH metric method</li> <li>2. Determination of strength of commercial phosphoric acid by pH titration</li> <li>3. Determination of ammonia in household cleaners by conductometric titrations.</li> <li>4. Determination of sodium and potassium in soil by flame photometry</li> <li>5. Determination of phosphate in domestic waste water by spectrophotometry.</li> <li>6. Analysis of mercury/lead in industrial effluents by spectrophotometry</li> <li>7. Determination of DO, BOD and COD of a waste water sample by titrimetry</li> <li>8. Determination of fluoride by spectrophotometric method</li> <li>9. Soil analysis</li> </ol> <p><b>Scheme of practical examination:</b></p> <table> <tr> <td>1. 3. Viva voce and Journal	: 05										
4. Internal assessment	: 05										
Total	: 50										

<b>Paper Code and Name</b>	<b>PG75P402D: Instrumental Methods of Analysis.</b>
<b>COURSE OUTCOMES (COs)</b>	
1. Analysis of medicines: APC tablet, paracetamol, sulpha drugs by potentiometry/spectrophotometry/titrimetry 2. Assay of aspirin / caffeine / phenacetin by spectrophotometry 3. Determination of vitamin A in vanaspathi by UV spectrophotometry. 4. Isolation of casein and lactose from milk 5. Food analysis: Determination of iron in mustard sugar, phosphorus in peas, ascorbic acid in tomato, benzoic acid in food products 6. Determination of iodine value of an oil sample 7. Saponification of an oil sample	
<b>Scheme of practical examination:</b>	
1. Duration of practical examination	: 4 hrs
2. Experiment	: 35 marks
3. Viva voce and Journal	: 05
4. Internal assessment	: 05
Total	: 50
<b>Recommended Books:</b>	
1. A text Book of Quantitative Inorganic Analysis–A.I Vogel 2. Vogel’s Text Book of Quantitative inorganic Analysis, Basset, Denney, Jeffery & Mendham 3. Colorimetric Determination of Traces of Metals–E.B Sandell. 4. Analytical Chemistry, G.D. Christian, 5 <sup>th</sup> edition, 2001 John Wiley & Sons, Inc. India	

<b>Paper Code and Name</b>	<b>PG75P403D: Instrumental Methods of Analysis.</b>
<b>COURSE OUTCOMES (COs)</b>	
1. Analysis of fertilizers: Urea, super phosphates 2. Analysis of pyrolusite ore 3. Analysis of alloys: cupronickel and bronze 4. Analysis of cement 5. Determination of (i) aluminium and magnesium in a mixture 6. Analysis of Stainless steel-Ni gravimetrically using DMG, Fe volumetrically using Ce(IV),	

Cr volumetrically by persulphate oxidation,

7. Analysis of body fluids: Determination of cholesterol, glucose in blood; uric acid, creatinine in urine .

**Scheme of practical examination:**

| 4. Internal assessment               | : 05       |
| Total                                | : 50       |

***Recommended Books:***

1. A text Book of Quantitative Inorganic Analysis–A.I Vogel
2. Vogel's Text Book of Quantitative inorganic Analysis, Basset, Denney, Jeffery & Mendham
3. Colorimetric Determination of Traces of Metals – E.B Sandell.
4. Analytical Chemistry, G.D. Christian, 5<sup>th</sup> edition, 2001 John Wiley & Sons, Inc. India

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPARTMENT OF STUDIES IN CHEMISTRY**

**Ph.D. Course work**

**Course I: Research Methodology (Common to all)**

Total: 48 hrs

1. **Nature and Scope of research in Chemistry:** survey of literature (use of computer devices in literature survey, location of journals). Need of literature survey. Research areas, Theoretical and fundamental research, Inter disciplinary research.

8 hrs
2. **Research problem:** literature survey, choice of research problem, writing research papers/review article research proposal/ dissertation/ Synopsis, Thesis, Research journals in chemistry, significance of research publications in terms of impact factors, H-index etc, conferences, work-shops. Conventions (their organizations).

10hrs
3. **Intellectual Property Rights:** intellectual property rights: Concept and evolution. Law of designs. Law of copy rights and trademarks. Law of patents.

6hrs
4. **Application of Computers in Chemistry:** Software's used in chemical research (Chemdraw ultra, Chems sketch). Internet for Chemists: Online Search of chemical data bases and online journals. Search engines in chemical research viz. Sci-finder, Scopus, Beilstein cross fire etc.

8hrs
5. **Recent advances in Chemistry:** Outstanding discoveries and Nobel prizes in Chemistry during last five years.

7hrs
6. **Statistical treatment of analytical data:** Reliability of results-confidence interval. Estimation of detection of limits. Significant numbers. Comparison of results- Student's test, comparing the two means and standard deviation F-test, t-test and paired t-test and paired t-test. Rejection of a result: Q-test. Number of replication determination. Correlation and regression-correlation coefficient, linear regression.

9hrs

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPARTMENT OF STUDIES IN CHEMISTRY**

**Ph.D. Course work**

**Course II: Cognate/Core subject: Chemistry (Common to all)**

Total: 48hrs

1. **Separation techniques:** Chromatography in chemical research, Principle, theory application of thin layer chromatography, gas chromatography (GSC and GLC), HPLC application of GCMS.

8hrs
2. **Instrumental methods in chemical research:** Introduction, theory, instrumentation application of the following in the structural elucidation of organic compounds as well as in complexes.
  - i. IR/FTIR spectroscopy.
  - ii. UV/Visible spectroscopy.
  - iii.  $^1\text{H}$  and  $^{13}\text{C}$  NMR, ESR spectroscopy.
  - iv. Mossbauer spectroscopy and X-ray diffraction studies.

22hrs
3. **Thermal analysis:** Introduction, theory, instrumentation and applications of TGA, DTA and DSC.

5hrs
4. **Green Chemistry:** Biocycles, green chemistry in day today life, principles, synthetic methods, industrial applications.

7hrs
5. **Nanomaterials:** Introduction to 'nanomaterials, physical and chemical properties of nanomaterials, applications of nano technology.

6hrs

**KARNATAK UNIVERSITY, DHARWAD**  
**P.G. DEPARTMENT OF STUDIES IN CHEMISTRY**

**Course-work for Ph.D**

**PAPER –III(OPTIONAL)**

**Advanced coordination chemistry (Inorganic)**

**1.Ligand Systems:**

Novel ligand systems containing O,N, S, P as coordinating sites, cyclic and acyclic ligand systems, ligands with high denticity.

4hrs

**2.Preparations of coordination compounds:**

Preparative methods : Simple addition reactions, substitution reactions, oxidation-reductions, Thermal dissociation methods, Preparations in inert atmosphere, Reactions of coordinated ligands, Preparations involving trans and cis effects, other methods of preparing coordination compounds.

6hrs

**3. Theories of transition metal compounds:**

Crystal field theory: Crystal field splitting in weak field, strong field and intermediate field. Non- octahedral complexes, Tetrahedral complexes, square planar complexes, other stereo chemistries.

Molecular orbital theory: Introduction, Octahedral complexes, metal-ligand  $\sigma$  interactions, metal ligand  $\pi$  interactions. Tetrahedral complexes and complexes with other geometries.

8hrs

**4. Electronic spectra of transition metal complexes:**

Term symbols for  $d^n$  ions, spectroscopic ground states, selection rules. Spectral bands-band shapes, band width, band intensities. Effect of spin-orbit coupling, Orgel diagrams, Tanabe-Sugano diagrams, Racah parameters, Interpretation of spectra of octahedral, tetrahedral, square planar and other geometries. Charge transfer spectra, Intervalence charge transfer.

7hrs

**5. Magnetic properties of transition metal complexes:**

Introduction, classical magnetism, orbital contribution, orbital contribution reduction factor, spin-orbit coupling, diamagnetic corrections, magnetically non-dilute compounds. Spin equilibria.

5hrs

**6. f- electron system: Lanthanides and actinides:**

Electronic structure of the Lanthanide and actinide ions, spin-orbit coupling. Excited state of f-electron system. Electronic spectra of f-electron system, Crystal field and f-f intermediates. f-d and charge transfer transitions. Magnetism of Lanthanide and actinide ions

5hrs

**7. Other methods of studying coordination compounds:**

Vibrational spectroscopy, Resonance Raman spectroscopy, spectroscopic methods unique to optically active molecules.

NMR and Mossbauer Spectroscopy. Electron paramagnetic resonance spectroscopy. Photoelectron spectroscopy. Fluorescence. Molar Conductivities, Cyclic Voltammetry. X-ray crystallography.

15hrs

**8. Reaction mechanism in transition metal complexes:**

Energy profile of a reaction, inert and labile complexes, kinetics of octahedral substitution and mechanistic aspects. Acid hydrolysis, factors affecting acid hydrolysis, base hydrolysis, conjugate base mechanism and evidences in its favour. Anation reactions, Substitution reactions in square planar complexes, trans effect, mechanism of substitution. Electron transfer reactions- inner sphere and outer sphere reactions, complimentary and Non-complimentary reactions.

Photochemistry of metal complexes- types of photochemical reactions, photo substitution and photo redox reactions and solar energy conversions.

10hrs

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPARTMENT OF STUDIES IN CHEMISTRY**  
**Ph.D Course Work**  
**Course III: Advanced Organic Synthesis (Organic) Optional**  
**Total : 48Hrs**

1. Synthesis of Sydnones, Coumarins, Chromones, Benzimidazoles, Indoles, Quinolines, thiazoles, Fused thiazoles, Oxadiazoles, thiadiazoles, imidazothidiazoles and their reactions (thermal, photochemical and rearrangements), oleochemicals and their applications
2. Heterocycles in biological systems and drugs: Imidazoles, NADH, Isoalloxazines, Pyridoxal, pteridines, folic acid, Vit - B<sub>12</sub> and their role in biological systems. Fatty acid metabolism and their biosynthesis.
3. Synthesis and mechanism of action of sulphapyridine, sulphathiazole, sulphamerazine, sulphamethazine, cephalosporins, ciprofloxacin, enosacin, nalidixic acid, rifampicin.
4. Newer reactions and reagents:

Newer reactions: Des - martin oxidation, Buchwald - Hartwig, Sonogashira and Stille cross Coupling reactions, Corey - Bakshi - Shibata reduction, Dimroth rearrangement, Heck arylation, Sharpless aminohydroxylation and dihydroxylation.

Newer reagents: NBS, DCC, Fermy's salt, LDA, DDQ, Wilkinson catalyst, Gillmann reagent.

5. Retrosynthetic analysis of functionalised aliphatic, aromatic and simple heterocyclic compounds involving single and multiple C-C and C-X disconnections. Concept of synthons, Synthetic equivalents, FGI, Functional group interconversions of aromatic and mono and biheterocyclic compounds involving oxidation, reduction, substitution, addition, elimination and rearrangement reactions.
6. Carbon - Carbon forming reactions: Application of acid, base and metal catalysed reactions of functionalized organic compounds involved in multistep synthesis.

**REFERENCE BOOKS AND WEBSITES:**

7. Strategic applications of named reactions in organic synthesis by Barbara Czako and Laszlo Kurti, Elsevier, 2005.
8. Modern methods of Organic synthesis by Carruthers.
9. Disconnection approach, Stuart Warren.

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPARTMENT OF STUDIES IN CHEMISTRY**

**Ph.D. Course work**

**Course III: Advanced Polymer Chemistry (Physical) Optional**

Total 48hrs

1. **Analytical Methods:** Types of errors. Mean value and standard deviation, standard deviation and probability. Methods of least squares. Calibration curves. Significant figures, significant figures in arithmetic, significant figure and graphs.  

9hrs
2. **Characterization and analysis of polymer surface:** Gel permeation chromatography (GPC), scanning electron microscopy (SEM), transmission electron microscopy (TEM), electron spectroscopy for chemical analysis (ESCA), atomic force microscopy (AFM), photo-acoustic spectroscopy (PAS) and attenuated total reflectance spectroscopy (ATR).  

10hrs
3. **Pervaporation:** An overview, history, definition, theory, sorption in membranes, diffusion in membranes, performance parameters, influence parameters, advantages and disadvantages, applications. Types of membranes, membrane modules, tubular modules, hollow fiber modules, plate and frame systems, spiral wound modules.  

10hrs
4. **Nonlinear optical materials:** Definition and history. Basic aspects of nonlinear optical phenomena, reaction between molecular and macroscopic properties, linear optical effects, nonlinear optical effects, second harmonic generation (SHG). Experimental methods: Kurtz-Perry powder technique, electric field induced second harmonic generation, Hyper-Rayleigh scattering, Maker fringe technique. Electric field poling methods, relaxation of SHG in poled polymers. Basic molecular characteristics of nonlinear optical (NLO) materials, second-order NLO materials, application of NLO materials.  

10hrs
5. **Drug delivery systems:** Concepts and system design, fundamental of rate-controlled drug delivery, oral/targeted drug delivery systems, micro- and nano-particles transdermal systems, nasal and ocular systems, protein and gene delivery systems, patient compliance, in-vitro and in-vivo testing of drug delivery system, drug-conjugates, micro-encapsulation.  

9hrs

**KARNATAK UNIVERSITY, DHARWAD**

**DEPARTMENT OF STUDIES IN CHEMISTRY**

**Ph.D. Course work**

**Paper III: Polymer Blends**

**Total: 60 hrs**

1. **Concepts and Definitions:** Polymer, Monomer, Oligomer, Repeating Unit, Degree of Polymerization and Functionality. Copolymers-Random Copolymer. Alternating Copolymer, Graft Copolymer, Block Copolymer, Addition and Condensation, Organic and Inorganic, Homopolymer and Copolymers, Linear, Branched and Cross-linked Polymers. Thermoplastics and thermosets, Elastomers and fibres.  
12hrs
2. **Thermoplastics Materials and Rubber:** Introduction to thermoplastic and plasticisers-Poly (ethylene glycol) and Glycerol. **Thermoplastic Materials-** Vinyl Plastics-Poly(ethylene), Poly (vinyl chloride), Poly (vinyl acetate), Poly (ethylene vinyl acetate), Poly(propylene), Poly(styrene), Poly (vinyl alcohol), Poly (vinyl pyrrolidone), Fluorocarbon Thermoplastic: poly(tetrafluoroethylene). Cellulose Base Plastics – Cellulose acetate, Cellulose acetate butyrate, Cellulose acetate propionate, Polyamide-Nylon 6,6. **High Temperature Thermoplastics:** Poly(imides), Poly(sulphones), Poly (ether ether ketone). **Elastomers;** Natural Rubber, Vulcanization, Styrene-Butadiene Rubber, Butadiene Rubber, Butyl Rubber, Silicone Rubber.  
12hrs
3. **Thermosets:** Introduction. **Thermoset Materials:** Phenolics-Phenol Formaldehyde, Urea Formaldehyde, Melamine Formaldehyde. **Polyester resins** – Polyesters, Alkyd Resins. Polyurethanes, Epoxy Resins, Polyimides, Silicones.  
12hrs
4. **Preparation of Polymer Blends:** Definition of Polymer Blend. Advantage and Reasons of Blending, Polymers Blending technique's-melt Blending (Mixing), Latex Blending, Solution Blending. Types of Polymer Blends- Miscible Polymer Blend and immiscible Polymer Blend. Basic Thermodynamics. Blend Morphology.  
12hrs
5. **Characterization Technique: Techniques:Thermal Analysis Techniques-** Differential Scanning Calorimetry (DSC), Thermogravimetry Analysis (TGA), Microscopy Techniques- Scanning Electron Microscopy (SEM), Transmission Electron Microscopy (TEM) and Atomic Force Microscopy (AFM), Mechanical Behaviour-Universal Testing Machine (UTM), Amorphous and Crystallinity-XRD, Spectroscopy Technique-FT-IR.  
12hrs

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPARTMENT OF STUDIES IN CHEMISTRY**

**Ph.D. Course work**

**Paper-III (Optional)**

**Advanced Analytical Chemistry**

**1. Statistical Analysis: Evaluating the Data**

Evaluation of analytical data, precision and accuracy, normal distribution curve, graphical presentation of results, method of average, method of linear least square, statistical aid to hypothesis, t-test, F-test, chi-square test, rejection of data. Use of Excel sheets in the treatment of analytical data.

5hrs

**2. Electroanalytical techniques:**

Voltammetry: General Introduction, principle, instrumentation and applications of cyclic voltammetry, differential pulse voltammetry, square wave voltammetry and stripping voltammetry with special emphasis on the assay of bioactive compounds/drugs and/or their interactions with biomolecules (proteins and DNA).

Electrochemical sensors: Modified electrodes, types of modified electrodes, their fabrication, modified electrodes (with C<sub>60</sub>, CNTs, graphene, metal oxide nano particles) as voltammetric sensors and biosensors for analytical and binding applications.

10hrs

**3. Spectral methods of analysis**

i) Spectrofluorometry: Construction of Jablonski diagram, photophysical pathways of excited molecular system (radiative and non-radiative), phosphorescence, fluorescence quenching: quenching by excimer and exciplex emission, factors affecting quenching, Stern-Volmer and modified Stern-Volmer equation, Fluorescence resonance energy transfer between donor (protein) and acceptor (quencher) molecules. Types of quenching mechanisms and analytical applications of quenching with special emphasis on drug-protein and drug-DNA interactions,

and assay of drugs. Evaluation of binding and thermodynamic characteristics of interactions. Applications of fluorescence life time, synchronous and 3-D fluorescence.

14hrs

**ii).** Ultraviolet and visible spectroscopy: Introduction, laws of absorption, instrumentation, applications with emphasis on assay of drugs (anticancer, antihypertensive, antiallergic and anti-inflammatory).

4hrs

**iii).** FT-IR: Introduction, sampling technique, absorption of common functional groups, factors affecting IR bands, utility of FTIR in the study of biomolecular interactions.

**iv).** Circular dichroism: Fundamentals, CD curves and applications in the characterization of ligand-biomolecule interactions.

3hrs

**4.Recent advances in Analytical Chemistry:** Recent papers published in Talanta and Analytical Chemistry Journals during the last two years.

9hrs

# **KARNATAK UNIVERSITY, DHARWAD**

DEPARTMENT OF STUDIES IN COMMERCE

Regulations and Syllabi

For

MASTER OF COMMERCE

CHOICE BASED CREDIT SYSTEM

(M.Com CBCS)

( I to IV Semesters)

With effect from 2021-22 onwards

## **PART-A**

Regulations Governing Post-Graduate Programmes under Choice Based Credit System in the Faculty of Commerce, from 2021-2022

Master Degree Programme in Commerce (M.Com) Regulations Governing the Post Graduate Master Degree Programme under Choice Based Credit System (KU-CBCS)

*(Framed under Section 44(1)(c) of the K. S.U. Act, 2000)*

### **1.0 Title**

These Regulations shall be called “Regulations Governing the Post-Graduate Programmes in the Faculty of Commerce under the Choice Based Credit System,” in Karnatak University, Dharwad.

### **2.0 Commencement**

These Regulations shall come into force with effect from the academic year 2021-22.

### **3.0 Definitions**

In these Regulations, unless otherwise provided.

- A** “Academic Council” means Academic Council of the University constituted according to the *Karnataka State Universities Act, 2000*.
- B** “Board of Studies” means P.G. Board of Studies in Commerce, Karnatak University, Dharwad.
- C** “Compulsory Course” means fundamental paper, which the student admitted to a particular Post-Graduate Programme, should successfully complete to receive the Post Graduate Degree in the concerned subject.
- D** “Course Weightage” means number of credits assigned to a particular course.
- E** “Credit” means the unit by which the course work is measured. One Credit means one hour of teaching work or two Hrs of practical work per week. As regards the marks for the courses, 1 Credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks.
- F** “Cumulative Grade Point Average (CGPA)” refers to the cumulative Grade Point Average weighted across all the semesters and is carried forward from first semester to subsequent semesters.
- G** “Degree” means Post-Graduate Degree.
- H** “Grade” is an index to indicate the performance of a student in the selected course. These

Grades are arrived at by converting marks scored in each course by the candidate in both Internal Assessment and Semester-end Examinations.

- I** “Grade Point Average (GPA)” refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester.
- J** “Open Elective Course” means a paper offered by a Department to the students of other Departments.
- K** “Post Graduate Programme” means semesterised Master’s Degree Programmes under CBCS in the Faculty of Commerce excluding P.G. Diploma, Post Graduate International Diploma.
- L** “Specialization course” means advanced paper offered by a Department that a student of that department can opt as a special course.
- M** “Student” means the student admitted to programmes under (k).
- N** “University” means Karnatak University, Dharwad.

#### **4.0 Minimum Eligibility for Admission**

A candidate, who has successfully completed Bachelor’s Degree programme **in Commerce** of this University or of any other University recognized as equivalent thereto by this University, shall be eligible for admission to the Post Graduate Programmes **in Commerce** provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the University from time to time.

Admission shall be as per the Govt. of Karnataka Reservation Policy and directions issued in this direction from time to time.

#### **5.0 Duration of the Programme**

The duration of study for all the P.G. Programmes shall extend over a period of two consecutive academic years, each academic year comprising two semesters, and each semester comprising sixteen weeks with a minimum of ninety working days.

However, the students, who discontinue the programme after one or more semesters due to extraordinary circumstances, are allowed to continue and complete the programme with due approval from the Registrar. Candidates shall not register for any other regular course other than Diploma and Certificate courses being offered on the campus during the duration of P.G. Programme.

#### **6.0 Medium of Instruction and Evaluation**

The medium of instruction for all programmes except languages shall be English. However, the students may write the examinations in Kannada if so provided by the Board of Studies in Commerce (PG).

## **7.0 Programme Structure**

- 7.1** The students of Post-Graduate Programme shall study the courses as may be approved by the Board of Studies in Commerce (PG), Faculty and the Academic Council of the University from time to time subject to minimum and maximum credits as outlined in these regulations.
- 7.2** There shall be three categories of courses namely, Compulsory Courses, Specialization Courses and Open Elective Courses.
- 7.3** Each programme shall have a set of Compulsory Courses, as stipulated in the regulations governing the concerned programme, that a student must complete to get the concerned degree.
- 7.4** In those programmes that offer specialization courses, the students shall choose the prescribed number of Specialization Courses offered within the Department.
- 7.5** a) The Department shall offer Open Elective courses for students of other Departments in second and third Semesters.
- b) The M.Com. students of the department shall choose Open Elective courses from among those prescribed by the University and selected by the Department from time to time. P.G. Centers and affiliated colleges, can offer those Open Elective Courses which are approved or prescribed by the P.G. Department of Commerce on the main campus. Such Open Elective courses shall be taught by qualified teachers approved by the University.
- 7.6** The credits for each of the Compulsory Courses shall be 4; for Specialization Course, 4; and for Open Elective Course, 4. The credits for the project work in the IV Semester shall be 2 for dissertation and 2 for Viva-Voce.
- 7.7** A student shall register for a minimum of 92 credits during the whole duration of the P.G. Programmes as stipulated in the General Regulations.
- 7.8** The students shall undertake project in the IV semester as a compulsory course.
- 7.9** The detailed programme structure for the M.Com. Course shall be as stated in Annexure –I.

## **8.0 Attendance**

- 8.1** Each course shall be taken as a unit for the purpose of calculating the attendance.
- 8.2** Each student shall sign the attendance register maintained by the Department for each course for every hour/unit of teaching/practical. The course teachers shall submit the monthly attendance report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the second week of the subsequent month.
- 8.3** Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.
- 8.4** A student shall be considered to have satisfied the required attendance for each course if

he/she has attended not less than 75 % of the total number of instructional Hrs during the semester.

- 8.5 There is no provision for condoning shortage of attendance.
- 8.6 The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission afresh to the given semester.
- 8.7 Such of the candidates who have participated in State/National level Sports, NSS, NCC, Cultural activities and other related activities as stipulated under the existing regulations shall be considered for giving attendance for actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authorities within two weeks after the event.

## **9.0 Examination**

- 9.1 There shall be an examination at the end of each semester. The odd semester examinations shall be conducted by the Department/P. G. Centres/ Colleges. The even semester examinations shall be conducted by the University.
- 9.1.1 There shall be semester-end examination of 3 Hrs duration for the courses carrying 75 marks.
- 9.1.2 Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application form through the proper channel and shall also pay the fees prescribed.
- 9.1.3 The Office of the Registrar (Evaluation) shall allot the Register Number to the candidate at the 1st semester-end examination. That will be the Register Number of the candidate for all subsequent appearances and semester-end examinations.
- 9.1.4 The Answer scripts shall be in the safe custody of the University for a period of six months from the date of announcement of results.
- 9.1.5 The programme under CBCS is a fully carry-over system. A candidate reappearing for either the odd or even semester examinations shall be permitted to take examinations as and when they are conducted (even semester examination in even semester and odd semester examination in odd semester).
- 9.1.6 Candidates who have failed, remained absent or opted for improvement in any course/ courses shall appear for such course/ courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.
- 9.1.7 Candidates who desire to challenge the marks awarded to them, in the even semester examinations may do so by submitting an application along with the prescribed fee to the Registrar (Evaluation) within 15 days from the announcement of results.

## **9.2 Odd Semester Examination**

- 9.2.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.
- 9.2.2** The BOE shall scrutinise the question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation).
- 9.2.3** The office of the Registrar Evaluation shall dispatch the question papers to the Department/ P.G.Centres/ Colleges who shall conduct the Examinations according to the Schedule announced by the University.
- 9.2.4** The Chairperson of the Department/ Administrator of the P.G.Centre/ Principal of the College shall appoint one of their full time course teachers as Post Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts.
- 9.2.5** Answer scripts shall be valued by the examiners appointed by the University. However, in those circumstances where an examiner for a particular course is not available, then the answer scripts of that course shall be dispatched to the office of the Registrar (Evaluation) who shall arrange for valuation of the same.
- 9.2.6** There shall be single valuation. The examiners (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on the answer script.
- 9.2.7** The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be dispatched by the PGP Coordinator to the Registrar (Evaluation)'s Office at the conclusion of the valuation at the respective centres.
- 9.2.8** The Office of the Registrar Evaluation shall process and announce the results.

## **9.3 Even Semester:**

- 9.3.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.
- 9.3.2** As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other Universities/ Research Institutes.
- 9.3.3** Each answer script of the semester-end examination (theory and project report) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averaged with nearer award of the two evaluations.

Provided that in case the number of answer scripts to be referred to the third examiner in a course exceeds minimum of 5 or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.

- 9.3.4 There shall be a project work in the fourth semester of the programme, the same shall be evaluated by both internal and external examiners.

#### 9.4 Evaluation

- 9.4.1 Each Course shall have two evaluation components - Internal Assessment (IA) and the Semester End Exams.
- 9.4.2 The IA component in a course shall carry 25% and the Semester End Examination shall carry 75%. Courses having 25% marks as internal assessment shall have 3 marks allotted to attendance. However, in case of project work, the distribution of marks for Internal Assessment and Examination shall be left to the discretion of the concerned BOS.
- 9.4.3 Marks for attendance shall be awarded to the students as stipulated below :

Attendance (in percentage)	Marks
Above 90	3
Above 80 and up to 90	2
Above 75 and up to 80	1
75	No marks

- 9.4.4 Internal Assessment (IA) shall be based on written tests/ assignments/ seminars and /or any other instructional activity. However, the number of IA components per course per semester shall not be less than two.
- 9.4.5 The IA marks list shall be notified on the Department notice board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination.
- 9.4.6 The tests shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.
- 9.4.7 There is no provision for seeking improvement of Internal Assessment marks.
- 9.4.8 The IA records, pertaining to Semester Examination, shall be preserved by the department/Centres/Colleges for a period of one year from the date of semester examination. These records may be called by the University or a body constituted by the University as and when deemed necessary.
- 9.4.9 The project viva-voce shall be conducted by an internal and external examiner.

#### 10.0 Maximum duration for completion of the Programme

- 10.1 A candidate admitted to a post graduate programme shall complete it within a period, which is double the duration of the programme from the date of admission.
- 10.2 Whenever the syllabus is revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabus.

## 11.0 Declaration of Results

- 11.1 The minimum for a pass in each course shall be 40% of the total marks including both the IA and the semester-end examinations. Further, the candidate shall obtain at least 40% of the marks in the semester-end examination. There is no minimum for the IA marks.
- 11.2 Candidates shall secure a minimum of 50% in aggregate in all courses of a programme in each semester to successfully complete the programme.
- 11.3 Candidates shall earn the prescribed number of credits for the programme to qualify for the PG Degree.
- 11.4 For the purpose of announcing the results, the aggregate of the marks secured by a candidate in all the semester examinations shall be taken into account. However, Ranks shall not be awarded in case the candidate has not successfully completed each of the semesters in first attempt or has not completed the programme in the stipulated time (vide Regulation 5) or had applied for improvement of results.

## 12.0 Marks, Credit Points, Grade Points, Grades and Grade Point Average

- 12.1 The grade points and the grade letters to candidates in each course shall be awarded as follows:

Percentage of marks	Grade Points	Grade Letter
75 and above, up to 100.00 %	7.50 to 10.00	A
60 and above but less than 75 %	6.00 and above but less than 07.5	B
50 and above but less than 60 %	5.00 and above but less than 6.0	C
40 and above but less than 50 %	4.00 and above but less than 05.00	D
less than 40.00 %	Less than 4.00	F

- 12.2 Credit Point(CP): The Credit Point for each course shall be calculated by multiplying the grade point obtained by the credit of the course.
- 12.3 The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned by the student in all the courses by the total number of credits of those courses of the semester.
- 12.4 The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points obtained in all the semesters by the total number of credits in all the semesters. The CGPA to date shall be calculated by dividing the total number of credit points in all the semesters to date by the total number of credits in all the semesters to date.

$$\text{CGPA for the I Semester} = \frac{\text{Sum of the CP of the I Semester}}{\text{Sum of the credits of the I Semester}}$$

$$\text{CGPA for the II Semester} = \frac{\text{Sum of the CP of the I Sem} + \text{Sum of the CP of II Sem.}}{\text{Sum of the credits of the I Semester} + \text{II Semester}}$$

CGPA for the III and IV Semesters shall be computed accordingly.

- 12.5 The Grade Card at each semester examination shall indicate the courses opted by the

student, the credit for the course chosen by the student, the credit points obtained in each course, the grade letter and the grade point average. No class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade Point Average.

- 12.6** Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below:

<b>Cumulative Grade Point Average (CGPA)</b>	<b>Class to be awarded</b>
7.5 to 10.0	First class with Distinction
6.0 and above but below 7.5	First Class
5.0 and above but below 6.0	Second Class

**13.0 Miscellaneous**

- A** Notwithstanding anything contained in these regulations, the semester system at Post-Graduate level is hereby repealed.
- B** The provisions of any order, Rules or Regulations in force shall be inapplicable to the extent of its inconsistency with these Regulations.
- C** The university shall issue such orders, instructions, procedures and prescribe such format as it may deem fit to implement the provisions of this Regulations.
- D** The procedural details may be given by the University from time to time.
- E** Any unforeseen problems/ difficulties may be resolved by the Vice Chancellor, whose decision in the matter, shall be final.

## **PROJECT WORK**

### **BROAD GUIDELINES RELATING TO PROJECT WORK**

The student shall take up a project work in the elective selected by him/her during the IV Semester. The rationale behind the introduction of project work is to :

- a) Expose the students to various operational aspects of business organizations.
- b) Help them to sharpen their writing skills ; and
- c) Channelise their thinking towards the application of the concepts that are learnt in the course.

#### **The Project may be :**

- a) Comprehensive case study
- b) Inter-organizational study
- c) Field study

#### **Project Report :**

The information collected through project work has to be presented in an organized and structured way. The suggested pattern of the report is as under ;

##### **Chapter : I Introduction**

- Need of the Study
- Objectives
- Methodology

##### **Chapter : II Conceptual Frame work of the Problem selected**

##### **Chapter : III Background of the sample unit or size** (in case of case study or sample - based study)

##### **Chapter : IV Analysis of Data**

##### **Chapter : V Findings and suggestions**

##### **Bibliography**

The subject matter organized as above has to be neatly typed and submitted in the hard bound/spiral bond form. The ideal size of the report may be in the range of 50 to 60 pages.

#### **Submission of Project Report :**

Two copies of the Project Report shall be submitted to the Chairman, Department of Studies in Commerce through Local Head or Principal concerned.

<b>Paper Code and Name</b>	<b>PG63T103: Organisational Behaviour</b>	
<b>COURSE OUTCOMES (COs)</b>		
After completing this paper, the students will be able to:		
CO 1	Developing a compatible organisational behaviour and individual behaviour in business organisations	
CO 2	Designing effective techniques of enhancing satisfaction level of individuals	
CO 3	Creating innovative and effective organisational leaders	
CO 4	Resolve organisational conflicts amicably causing reduced hardships to organisation and employees	
CO 5	Designing effective stress management and change management approaches	
<b>PARTICULARS</b>		<b>Teaching Hrs (Max. 64)</b>
<b>Unit 1: Introduction:</b>		
Concept, nature and importance of organization and organization theory – basic elements and types of organization; organizational behavior (OB) – concept, nature, importance and limitations; contributing disciplines to the field of organizational behavior; stage in the evaluation of OB; models of OB.		12 Hrs
<b>Unit 2: Individual Behaviour:</b>		
Foundations of individual behavior; values, attitudes, personality and emotions; methods of changing employee attitudes; values – concept, types and influence on human behavior; job satisfaction – concept, factors and outcomes.		12 Hrs
<b>Unit 3: Group Behaviour</b>		
Nature of groups; types and determinants of group behavior; process of group formation; group norms, group cohesiveness, small groups, team building.		14 Hrs
<b>Unit 4: Linkage between Behavior and Management Functions</b>		
Decision making – process of decision-making; policy formulation; Leadership – Concept and theories of leadership; leadership styles, directing and disciplining; Motivation – nature, importance, basic motivation process; theories relating to motivation; effective communication.		14 Hrs
<b>Unit 5: Organizational Conflict</b>		
Nature and implications of conflict; causes and effect; conflict resolution process and techniques; transactional analysis; work stress – coping the stress and change management.		12 Hrs
<b>Suggested Readings:</b>		
1. Robbins, Judge and Vohra, Organisational Behaviour, Pearson Education, New Delhi. 2. M Parikh and Rajen Gupta, Organizational Behaviour, TMH, New Delhi. 3. C B Gupta, Organisational Behaviour, Sultan Chand & Sons, New Delhi. 4. Uma Sekaran, Organisational Behaviour – Text and Cases, TMH, New Delhi. 5. K Ashwathappa and G Sudarshan Reddy, Organizational Behaviour – Text, Cases and Games, HPH, Mumbai. 6. Kalliath Brough and O Manimalla, Organizational Behaviour, TMH, New Delhi. 7. Ricky Griffin, Organizational Behaviour, Managing People and Organizations, Cengage Learning, New Delhi.		

8. Fred Luthans, Organizational Behaviour, TMH, New Delhi.	
9. Uday Narain Pareekh, Understanding Organisational Behaviour, Oxford University Press, New Delhi.	
10. Gupta N S, Organizational Theory and Behaviour, HPH, Mumbai.	

<b>Paper Code and Name</b>	<b>PG63T104: Strategic Management</b>	
<b>COURSE OUTCOMES (COs)</b>		
After completing this paper, the students will be able to:		
CO 1	Enlightening the top echelons on the linkages between vision, mission and strategies	
CO 2	Develop strategies keeping core competencies acquired over the years	
CO 3	Develop competitive building blocks and design approaches to increase competitive advantage	
CO 4	Enlighten all stake holders on the linkages between strategy formulation, implementation and evaluation	
CO 5	Identify endogenous and exogenous forces influencing strategic decision making	
<b>PARTICULARS</b>		<b>Teaching Hrs (Max. 64)</b>
<b>Unit 1: Strategic Management:</b>		
Concept of Strategy and Strategic Management; nature and scope of strategic management, types of strategies - intentional and emergent – functional classification; levels of strategic management, formal planning and strategic intent, strategic planning process, strategic management v/s operational management, GAP analysis.		12 Hrs
<b>Unit 2: Corporate Mission and Objectives:</b>		
Concept of mission and vision, constituents of corporate mission, stakeholders – goals and corporate mission; objectives – concept, hierarchy and importance of objectives setting, corporate governance and strategy, ethics in strategic management.		12 Hrs
<b>Unit 3: External and Internal Analysis</b>		
Concept of environment, types and importance environment analysis; PEST analysis; analysis of Michael Porter’s Five Forces Model, strategic groups and preparation of ETOP; internal analysis – concept of competitive advantage, generic building blocks, core competencies and competitive advantage – resources and capabilities; value chain analysis; internal factor analysis and preparation of SAP.		14 Hrs
<b>Unit 4: Strategy Formulation and Implementation</b>		
Strategic planning and approach to strategic formulation, developing alternative strategies, types of strategies; strategy activation, policies, organization structure, resources, commitment and corporate culture.		14 Hrs
<b>Unit 5: Strategic Evaluation and Control</b>		
Concept and purposes of strategic evaluation and analysis, GAP analysis; strategic control system; ROI, budgeting, auditing systems; feedback and information systems.		12 Hrs
<b>Suggested Readings:</b>		
1. Hill and Jones, Strategic Management– Text & Cases, Cengage Learning, New Delhi.		
2. John A Pearce,Richard Robinson and Amita Mital, Strategic Management – Formulation, Implementation and Control, TMH, New Delhi.		
3. Lawrence Jauch and William F Glueck, Business Policy and		

	Strategic Management, TMH, New Delhi.	
4.	Hitt, Ireland, Hoskisson and Manikuttu, Strategic Management, Cengage Learning, New Delhi	
5.	R Srinivasan, Strategic Management – The Indian Content, PHI, New Delhi.	
6.	Dess, Eisner, Lumpkin and McNamara, Strategic Management: Creating Competitive Advantages, TMH, New Delhi.	
7.	Upendra Kachru, Strategic Management, TMH, New Delhi.	
8.	Azar Kazmi, Strategic Management and Business Policy, TMH, New Delhi.	
9.	G Hamel and C K Prahalad, Competing for the Future, Free Press, New York.	
10.	M.E.Porter, Competitive Advantage, Free Press, New York.	

Paper Code and Name	PG63T105: Security Analysis and Portfolio Management	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Function as independent investment consultants and design investment plan based on one's requirements and resources	
CO 2	Develop valuation models for corporate stocks and bonds	
CO 3	Assist individual and firms in developing efficient investment portfolios	
CO 4	Identify by types and nature of investment alternative	
CO 5	Identify all variables – economic, industry, company and psychological variable influencing market valuation of scrips	
CO 6	Bring out the significance of regulatory performance of SEBI, PFRDA, IRDA stock exchanges etc	
PARTICULARS		Teaching Hrs (Max. 64)
Unit 1: Investment:		
Meaning, nature, objectives and scope; investment, speculation and gambling; investment plan; avenues of investment - marketable and non-marketable securities; development of debt and stock markets in India; stock trading mechanism; stock exchanges in India – demutualization and corporatisation – stock indices – meaning, types and methods of developing stock indices – BSE & NSE stock indices; financial regulation – meaning and importance; role of SEBI as a market regulator		12 Hrs
Unit 2: Security Analysis:		
Meaning and methods; Fundamental Analysis – meaning and importance; Economic Analysis- significance, process and determinants; Industry Analysis- industry life cycle analysis and Five-Forces Model; Company Analysis – nature, scope and methods of analysis; Technical Analysis – meaning and significance; fundamental analysis v/s technical analysis; Dow theory, classification of trends; chart types and patterns; technical indicators and evaluation of technical analysis – Efficient Market Hypothesis (EMH) – meaning and classification of EMH; random walk		12 Hrs

theory; testing of EMH; equity valuation – meaning and methods – accounting, cash flow and dividend valuation models; estimating return and risk of securities.	
<b>Unit 3: Portfolio Theory</b>	
Meaning and classification of portfolio theories – traditional and modern – assumptions; Modern Portfolio Theory of Markowitz – principles and assumptions – estimating return and risk of two-stock, three-stock and infinite stocks; determination of optimum portfolio; minimum variance portfolio; leveraged and unleveraged portfolios – capital allocation line and capital market line.	14 Hrs
<b>Unit 4: Sharpe's Single Index Model</b>	
Meaning of single factor and single index models –assumptions and estimating return and risk; development of optimum portfolio; Asset Pricing Model – meaning and types; - Capital Assets Pricing Model of William Sharpe – assumptions – systematic and unsystematic risks - security market line and characteristic line – estimating beta and alpha of efficient portfolio; market portfolio, empirical evidence on CAPM.; Arbitrage Pricing Theory and Multi-Factor Models – meaning, assumptions, and estimating return and risk of portfolio – beta coefficients for macro-factors; arbitrage opportunity.	14 Hrs
<b>Unit 5: Portfolio Revision and Performance Evaluation</b>	
Portfolio Revision and Performance Evaluation – Meaning and Necessity of Portfolio revision; evaluation methods - Rate of Return and risk – variability and beta – performance measures – Treynor Measure, Sharpe Measure, Jensen Measure – $M^2$ Measure, Fama's Measure of Net Selectivity Method.	12 Hrs

Paper Code and Name	PG63T202: Mergers and Acquisitions	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Work as independent consultant on various dimensions of mergers	
CO 2	Create suitable valuation approaches for firms involved in M&As and suitable exchange ratios.	
CO 3	Structure M&A deals after undertaking due diligence	
CO 4	Develop a proper blend of financial and legal measures to thwart hostile takeovers	
CO 5	Design effective exit and entry strategies in restructuring corporate activities	
PARTICULARS		Teaching Hrs (Max. 64)
<b>Unit 1: Mergers and Acquisitions;</b>		
Meaning, types and motives for mergers; merger waves – meaning, classification and reasons; industrial shocks and industrial clustering in mergers; theories of corporate mergers - efficiency theories, information and signaling, agency problems and managerialism etc; measurement of cost and benefits of mergers; sources and measurement of value creation in mergers		12 Hrs
<b>Unit 2: Valuation and Financing of Mergers:</b>		
Merger Process – Steps involved and characteristics of target companies–due diligence process – target valuation methods; determination of stock exchange ratio – book value, EPS and MPS methods –usefulness of P/E ratio; methods of payment;		12 Hrs
<b>Unit 3: Legal process of mergers in India:</b>		
Merger failures – meaning, reasons and strategies to control merger failures; methods of analysis of post-merger performance; analysis of merger trends and failures in India.		14 Hrs
<b>Unit 4: Market for Corporate Control:</b>		
Meaning, objectives and types of takeovers; open offer v/s tender offer; SEBI's		14 Hrs

takeover code – meaning, objectives and broad takeover guidelines of SEBI; takeover defenses-need, types and effect of takeover defenses; takeovers in India and defenses employed; financing of takeovers.	
<b>Unit 5: Other forms of restructuring;</b>	
Restructuring-meaning, reasons and significance of corporate restructuring; forms of restructuring –expansion, sell-offs, corporate control and changes in ownership structure; sources and measurement of value creation in corporate restructuring; corporate restructuring in India-private and public sector enterprises; effects of restructuring.	12 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. J.F. Weston, K S Chung &amp; S E Hoag, Mergers Restructuring and Corporate Control, PHI, New Delhi.</li> <li>2. J.F. Paper Code and Name	PG63T203: Business Research Methods	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Design an effective business analysis report based on internal and external data sources	
CO 2	Develop the regression models based on individual business characteristics	
CO 3	Put business performance to rigorous statistical analysis to identify trends and causative relationship	
CO 4	Create a reporting mechanism	
CO 5	Prepare questionnaires, schedules, etc. to elicit responses to quires	
PARTICULARS		Teaching Hrs (Max. 64)
Unit 1: Business Research:		
A theoretical framework: concept of business research, importance of research in business decisions, business research process, business research design		12 Hrs

<b>Unit 2: Data collection in business research:</b>	
Methods and techniques of data collection, sampling and sampling design, questionnaire designing and development, attitude measurement and scaling	12 Hrs
<b>Unit 3: Organisation of business research:</b>	
Defining business research problem, formulation of hypotheses, testing of hypotheses, experimental design	14 Hrs
<b>Unit 4: Data processing and analysis in business research:</b>	
Coding tabulation, data presentation, description and inferences from sample data, analysis of association. Multivariate analysis regression analysis, discriminant analysis, factor analysis, cluster analysis and multi-dimensional scaling.	14 Hrs
<b>Unit 5: Report writing and presentation in business research:</b>	
Substance of report writing and presentation, presentation of business research reports.	10 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. William G. Zikmund and Atanu Adhikari, Business Research Methods, Cengage Publications, New Delhi.</li> <li>2. ### M.COM. III – SEMESTER

Paper Code and Name	PG63T301: Accounting Information System	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Design information system in business integrating all key activities.	
CO 2	Adopt suitable software as required by Business decisions.	
CO 3	Develop E-Commerce business by suitable adoption of E-commerce framework	
CO 4	Generate periodical financial statements, with the use of recording system	
CO 5	Strengthening Tally ERP in business activities	
PARTICULARS		Teaching Hrs (Max.

	<b>64)</b>
<b>Unit 1: Business Information Systems</b>	
Power of digital systems, purpose of information systems; data, information and information systems, computer equipment for information systems; types of information systems; components, activities and resources of information systems; information systems in business functions – accounting, finance, engineering, SCM, CRM, HRM, ERP; strategic uses of information systems – creating and maintaining strategic information systems;	12 Hrs
<b>Unit 2: System Development Process and Computer Software:</b>	
System analysis, design, implementation and maintenance; Business Software – meaning and types of software; business application software – software suites and integrated packages; system software - operating systems and functions.	12 Hrs
<b>Unit 3: Introduction to E-commerce:</b>	
Introduction an Overview, Electronic Commerce – Cutting edge, Electronic Commerce Framework, Electronic Payment Systems, Electronic Cash, Smart Cards and Electronic Payment Systems, Credit Card Based Electronic Payment Systems, Risks and Electronic Payment Systems.	10 Hrs
<b>Unit 4: Transaction Processing :</b>	
Transaction cycle, accounting records, file structures, documentation techniques; transaction processing models; revenue cycles – revenue cycle activities and physical systems; sales order processing and cash receipts systems; POS systems; expenditure cycle – purchase and cash disbursement activities; basic and advanced technology expenditure cycle; integrated purchases and cash processing system; payroll– physical payroll system; fixed asset systems; conversion cycle – world-class environment and lean manufacturing; accounting in lean manufacturing environment.	12 Hrs
<b>Unit 5: Practicals with accounting software's :</b>	
Tally ERP-9 - Introduction, processing transactions in tally, business organizations double entry book keeping, inventory basics, POS invoicing TDS, TCS, & GST processing in tally, processing payroll functions in management controls, other utilities Security Control Backup & Restore of company and user creation, report generation	10 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. James O'Brien, George M Marakas and Ramesh Behl, Management Information Systems, New Delhi.</li> <li>2. James A Hall, Accounting Information Systems, Cengage Publications, New Delhi.</li> <li>3. Effy Oz, Management Information Systems, Cengage Publications, New Delhi.</li> <li>4. Marshall B Romney and Paul Steinbart, Accounting Information Systems; PHI, New Delhi.</li> <li>5. Jones and Rama, Accounting Information Systems – A Business Process Approach, Cengage Publications, New Delhi.</li> <li>6. Joseph Wilkinson and Michael Cerullo, Accounting Information Systems,</li> </ol>	

John Wiley Publications, New Delhi.	
7. James Bockholdt, Accounting Information System, TMH, New Delhi.	
8. Robert Hurt, Accounting Information Systems, TMH, New Delhi.	
9. Leslie Turner and Andrea Weickgenannt, Accounting Information Systems – The Processes and Controls, John Wiley Publications, New Delhi.	
10. Mark Simkin, Carolyn Norman and Jacob Rose, Core Concepts of Accounting Information Systems, John Wiley Publications, New Delhi.	

Paper Code and Name	PG63T302: International Finance	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Function as an independent executive discharging the responsibilities of international business organisation	
CO 2	2. Assist business in dealing foreign exchange transactions	
CO 3	Develop a comprehensive risk management strategy incorporating internal and external techniques	
CO 4	Undertake an evaluation of international capital budgeting decisions.	
CO 5	Design cost efficient and value maximising capital structure for multi national corporations.	
PARTICULARS		Teaching Hrs (Max. 64)
Unit 1: International financial management:		
Meaning and objectives, global financial manager – functions of financial management – scope –Relationship to domestic financial management.		12 Hrs
Unit 2: Environment of international financial management:		
Multinational/ transnational corporations – foreign exchange market – dealers in foreign exchange market, foreign exchange transactions, sale and purchase transactions – spot and forward transactions, hedging, speculation and arbitrage operations, equilibrium in foreign exchange market.		10 Hrs
Unit 3: Financing foreign operations:		
Corporate sources and uses of funds, national capital markets, Euro markets, special financial vehicles, interest rate and currency swaps, debt, equity swaps, internal leasing, designing global financing strategy.		12 Hrs
Unit 4: International capital budgeting:		
Basics of capital budgeting, issues, foreign project appraisal – political risk analysis, growth options and project evaluation. Multinational working capital management, short-term financing, objectives and options, borrowing strategy and exchange risk management, current assets management strategy		10 Hrs
Unit 5: Foreign exchange risk management:		
Foreign exchange risk and exposure, types of foreign exchange risks, transaction, transaction and economic exposure – internal and external techniques of foreign exchange risk management		10 Hrs
Suggested Readings:		
1. P G Apte, International Financial Management, PHI, New Delhi.		
2. Milind Sathye, Larry Rose, Larissa Allen and Raw Weston, International		

Financial Management, Wiley India Publications, New Delhi. 3. P K Jain, J Peyrard and Surendra Yadav, International Financial Management, Trinity Press, New Delhi. 4. Buckley Adrian, Multinational Finance, PHI, New Delhi 5. Alan Shapiro, Multinational Financial Management, Wiley Publications, New Delhi. 6. C Jeevanandan, Foreign Exchange and Risk Management, Sultan Chand & Sons, New Delhi. 7. Imad Moosa, International Finance, TMH, New Delhi. 8. Eiteman, Stonehill and Moffett, Multinational Business Finance, Pearson Publications, New Delhi. 9. Jeff Madhura, International Financial Management, Cengage Publications, New Delhi. 10. Cheol Eun, International Financial Management, TMH, New Delhi.

**SPECIALISATION GROUP - A: Operations/ Production Management**

Paper Code and Name	PG63T303A: Operations/ Production Management	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Develop suitable operations management strategy	
CO 2	Identify cost efficient plant locations	
CO 3	Design products and services keeping marketing requirements.	
CO 4	Identify suitable statistical quality control methods l.	
CO 5	Underscore the significance and design suitable supply chain management system.	
PARTICULARS		Teaching Hrs (Max. 64)
Unit 1: Operations/ Production Management:		
Introduction, meaning and definition, objectives, nature and context of operations management, relationship between strategic management and operations management, operations strategy and competitiveness		12 Hrs
Unit 2: Plant Locational Planning:		
Stages in the selection of planning, selection of locality and selection of site, determinants of plant location, plant location theories, qualitative and quantitative models for plant location, locational break-even analysis.		12 Hrs
Unit 3: Product Design and Process Selection:		
Product design and process selection for manufacturing operations and service operations, waiting line management, quality management, statistical quality control methods.		10 Hrs

<b>Unit 4: Design of Facilities and Jobs:</b>	
Strategic capacity planning linear programming, just in time production systems, facility location, facility layout, job design, and work measurement, learning curves, wage incentives, production control techniques, measurement of productivity	10 Hrs
<b>Unit 5: Supply Chain Management:</b>	
Forecasting, aggregate planning, inventory systems for dependent and independent demand, material revising the system, business process re-engineering, synchronous manufacturing and theory of constraints.	10 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. Elwood Buffa and Rakesh Sarin, Modern Production/Operations Management, Wiley India Publications, New Delhi.</li> <li>2. K Aswathappa and S Bhatt, Production and Operations Management, HPH, Mumbai.</li> <li>3. S A Chunnawalla and D R Patel, Production and Operations Management, HPH, Mumbai.</li> <li>4. S Chary, Production and Operations Management, TMH, New Delhi.</li> <li>5. K C Jain, P L Verma and Kartikey, Production and Operations Management, Dreamtech Press, Mumbai.</li> <li>6. B Mahadevan, Operations Management – Theory and Practice, Pearson Education, New Delhi.</li> <li>7. Sushil Gupta and Martin Starr, Production and Operations Management, CRC Press, New York.</li> <li>8. Rusell and Taylor, Operations Management, Wiley Publications, New Delhi. Jay Heizer and Barry Render, Operations Management, Pearson Education, New Delhi.</li> <li>9. William J Stevenson, Operations Management, TMH, New Delhi.</li> </ol>	

Paper Code and Name	PG63T303B: Cost Management	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Design a suitable combination of internal and external cost management techniques.	
CO 2	Design integrated and comprehensive system of recording cost and financial transactions.	
CO 3	Broden management understanding of element-wise cost management techniques.	
CO 4	Design a suitable method for accounting of cost in joint and by product manufacturing operations.	
CO 5	Generate effective cost management reports to serve managerial decision making.	
Unit 1 Introduction-		
concept, features, objectives and importance of cost management; factors affecting cost management; financial accounting v/s cost management; cost accounting v/s cost management; uses of cost management; techniques of cost		12 Hrs

management-traditional and contemporary techniques-bench marking, JIT, TQM, FMT, outsourcing, theory of constraints, etc. Cost management practices in Corporate India.	
<b>Unit 2 Accounting Systems for recording of Costs</b>	
-Non-integral and Integral systems of recording of costs; costing profit and loss account; reconciliation of cost and financial profits.	10 Hrs
<b>Unit 3: Cost Management Issues in Elements of Cost-</b>	
material cost management-design, purchase, storage, issues and inventory management; techniques of inventory control; labour cost management –time keeping and booking, idle time and overtime, labour turnover; compensation and incentive schemes; labour efficiency evaluation; Overhead cost management-significance; departmentalization, recovery methods, under and over absorption; capacity costs.	10 Hrs
<b>Unit 4: Product Costing Systems-</b>	
job costing-cost flow, and cost tracking in job order systems; job costing in service industries; process costing-characteristics of process costing system; flow of costs in process costing; equivalent units- FIFO and average methods.	12 Hrs
<b>Unit 5: Joint and By-product Costing-</b>	
meaning and distinction between joint products and by-products; methods of allocating joint costs; point of separation and further processing decisions; accounting for by-products; effect of joint products on cost control and decision making.	12 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. S N Maheswari, Cost and Management Accounting, Sultan Chand &amp; Sons, New Delhi.</li> <li>2. Jain and Narang, Advanced Cost Accounting, Kalyani Publishers, Ludhiana.</li> <li>3. Colin Drury, Management and Cost Accounting, Cengage Publications, New Delhi.</li> <li>4. Hilton, Maher and Selto, Cost Management – Strategies for Business Decisions, TMH, New Delhi.</li> <li>8. Hansen and Mowen, Cost Management – Accounting and Control, Cengage Publications, New DelhiHornegren, Foster and Datar,</li> <li>9. Cost Accounting – A Managerial Emphasis,Cecily Raiborn and Michael Kinney, Cost Accounting Principles, Cengage Publications, New Delhi</li> </ol>	

<b>Paper Code and Name</b>	<b>PG63T303C: Advanced Management Accounting</b>	
<b>COURSE OUTCOMES (COs)</b>		
After completing this paper, the students will be able to:		
CO 1	Design accounting system from insurance entities in India keeping in view the legal provisions	
CO 2	Design exhaustive accounting system for all types of power generation and distribution entities.	
CO 3	Design system of recording banking related transactions.	
CO 4	Design suitable system for early detection and management of overview accounts.	
CO 5	Design accounting software for start ups and unicorns involved in hotels , hospital and education institutions	
<b>Unit 1 Management Accounting-</b>		
Meaning and significance of management accounting; decision-making process-pull and push system of information; Strategic Management Accounting (SMA) – evolution, meaning, significance and scope; traditional management accounting v/s SMA, application of SMA; Balanced Scorecard (BSC) – Evolution, meaning, preparation, benefits and limitations of balanced score card; SMA and BSC application in Indian Industries		12 Hrs
<b>Unit 2 Budget and Budgetary Control -</b>		
Meaning and objectives of budget, budgeting and budgetary control; pre-requisites of budgeting process-budget period, budget committee and budget factor; classification and preparation of functional and master budgets; cash budget; fixed and flexible budgeting process – methods involved in preparing flexible budget; performance, programme and zero-base budgeting methods; advantages and limitations of budgeting; activity based budgeting; practical problems.		10 Hrs
<b>Unit 3: Standard Costing System</b>		
Meaning, objectives and significance of standard costing, industries of application; budgetary control v/s standard costing; pre-requisites of standard costing system – standards committee, types and fixation of standard costs; analysis of variances – material, labour, overhead, sales and profit variances; reconciliation of profits; disposal and accounting treatment of variances; investigation of variances; reporting of variances; practical problems		10 Hrs
<b>Unit 4: Divisional Performance Analysis</b>		
Decentralized organizations and responsibility centres – cost, revenue, profit and investment centres; measuring the performance of investment centre-ROI, residual income and EVA methods; measuring income and invested capital; issues involved in divisional performance evaluation; rewarding performance of managers.		12 Hrs
<b>Unit 5: Transfer Pricing-</b>		
Meaning, objectives, importance and methods of transfer pricing; external market price, negotiated transfer prices; standard v/s actual costs; choosing right transfer pricing methods; tax issues in transfer pricing; transfer pricing in the service industry.		10 Hrs
<b>Suggested Readings:</b>		

<ol style="list-style-type: none"> <li>1. Edward Blocher, Chen, Cokins and Thomas Lin, Cost Management – A Strategic Emphasis, TMH, New Delhi.</li> <li>2. Hilton, Maher and Selto, Cost Management – Strategies for Business Decisions, TMH, New Delhi.</li> <li>3. Hansen and Mowen, Cost Management – Accounting and Control, Cengage Publications, New Delhi</li> <li>4. ## SPECIALISATION GROUP – B: ACCOUNTING AND TAXATION

<b>Paper Code and Name</b>	<b>PG63T304A: Company Accounts</b>	
<b>COURSE OUTCOMES (COs)</b>		
After completing this paper, the students will be able to:		
CO 1	Design effective and efficient accounting methods for corporate keeping in view legal requirements.	
CO 2	Design suitable accounting methods for computing managerial remuneration and advisable profits.	
CO 3	Undertake the process of recording all M&A transactions.	
CO 4	Integrate subsidiary financial accounts with parents company.	
CO 5	Generate statements summarizing Liquidation effects on wealth shareholders.	
PARTICULARS	Teaching Hrs (Max. 64)	
<b>Unit 1 Company Final Accounts</b>		
:Legal provisions relating to maintenance of annual accounts by corporate entities in India; meaning and measurement of divisible profits; provisions and computation of managerial remuneration, transfer of profits to reserves and payment of dividend out of reserve rules; preparation of vertical form of financial statements.		12 Hrs

<b>Unit 2 Valuation of Goodwill and Shares: -</b>	
Concept and classification of goodwill, objectives and methods of valuation of goodwill; share valuation – need and methods of valuation;	10 Hrs
<b>Unit 3 Accounting for Mergers and Amalgamations -</b>	
AS 14 - Accounting for Amalgamations – classification and methods of accounting accounting treatment of inter-corporate sale, purchase, owings, stocks and investments in M&As; accounting for internal reconstruction – alteration of capital v/s reduction of capital; disposal of capital reduction.	12 Hrs
<b>Unit 4: Liquidation of Companies:</b>	
Meaning and types of liquidation; liquidation v/s winding up of companies; preparation of statement of affairs and deficiency accounts; preparation of liquidators' financial statement of account and List-B Contributories Statement.	12 Hrs
<b>Unit 5: Group Accounts</b>	
:Nature, need and significance of group accounts; preparation of consolidated financial statements –pre-acquisition and post-acquisition profits; accounting for unrealized profits and inter-company transactions; chain and cross holdings treatment – single and multiple subsidiaries; preparation of consolidated profit and loss account; accounting standard recommendations relating to consolidation of group accounts.	10 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. S.N.Maheshwari and S K Maheswari, Advanced Accountancy, Vol. II, Vikas Publications, New Delhi.</li> <li>2. Jain and Narang, Advanced Accountancy, Vol. II, Kalyani Publishers, Ludhiana,</li> <li>3. Gupta and Radhaswami, Advanced Accountancy, Vol. II, Sultan Chand New Delhi.</li> <li>4. D Chandra Bose, Advanced Accounting – Vol. 2, PHI, New Delhi.</li> </ol>	

<b>Paper Code and Name</b>	<b>PG63T304B: Accounting for Specialised Institutions</b>	
<b>COURSE OUTCOMES (COs)</b>		
After completing this paper, the students will be able to:		
CO 1	Design accounting system from insurance entities in India keeping in view the legal provisions	
CO 2	Design exhaustive accounting system for all types of power generation and distribution entities.	
CO 3	Design system of recording banking related transactions.	
CO 4	Design suitable system for early detection and management of overview accounts.	
CO 5	Design accounting software for start ups and unicorns involved in hotels , hospital and education institutions.	
<b>Unit 1 Accounting for Insurance Companies:</b>		
Legal provisions as per Insurance Act 1938, LIC Act 1956 and GIC Act; IRDA Act and provisions relating to final accounts; revenue accounts and final accounts of life and non-life insurance companies; life assurance fund, valuation balance sheet and dividend distribution.		12 Hrs
<b>Unit 2 Double Account System:</b>		
Meaning of double account system; single account v/s double account system; advantages and disadvantages of double account system; maintenance of records and registers; annual accounts of electricity companies.		12 Hrs
<b>Unit 3 Accounts of Banking Companies –</b>		
Nature, scope and provisions relating to final accounts of Banking Companies as per Banking Regulation Act, 1949 and its amendments; prudential norms, classification of assets and measurement of capital adequacy ratio and provisioning requirements; preparation of annual financial statements		10 Hrs
<b>Unit 4: Accounting for Hotels –</b>		
nature, objectives and significance of hotel accounting; visitors’ ledger; methods of accounting and preparation of final accounts of hotel undertakings; Accounting for Hospitals – Need and significance of hospital accounting; forms of balance sheet, income statement-capital and revenue expenditure, adjustments		12 Hrs
<b>Unit 5: Accounts for Educational Institutions –</b>		
significance of accounting for educational institutions- special features of educational institutions.accounting; accounting for government grants, classification of accounts; Preparation of final accounts of educational institutions- income and expenditure a/c and Balance Sheet.		10 Hrs
<b>Suggested Readings:</b>		
1. S N Maheshwari and S K Maheswari, Advanced Accountancy, Vol. II, Vikas Publications, New Delhi. 2. Jain and Narang, Advanced Accountancy, Vol. II, Kalyani Publishers, Ludhiana, 3. Gupta and Radhaswami, Advanced Accountancy, Vol. II, Sultan Chand New		

Delhi.	
4. Shukla and Grewal, Advanced Accounts, Vol. II, S. Chand and Co., New Delhi	
5. Hrishikesh Chakraborty, Advanced Accounts, Oxford, New Delhi.	
6. Praveen Sharma, Advanced Accountancy, Pooja Law Publishing House, New Delhi.	
7. Ashok Shegal and Deepak Shegal, Advanced Accounting – Vol. II, Taxmann Publications, New Delhi.	
8. S.K.Paul, Advanced Accounts, World Press, Calcutta.	
9. M Hanif and A Mukherjee, Advanced Accounting, Vol. II, TMH, New Delhi.	
10. D Chandra Bose, Advanced Accounting – Vol. 2, PHI, New Delhi.	

Paper Code and Name	PG63T304C: Corporate Tax Planning (Direct Taxes) –I	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Develop a strong base of knowledge among existing tax practitioners	
CO 2	Develop a band of professional maning taxation related issues at organization level.	
CO 3	Identify tax minimization opportunities	
CO 4	Integrate tax planning strategies with corporate financing decisions	
CO 5	Design compensation packages economizing the total tax oatgo.	
	Teaching Hrs (Max. 64)	
Unit 1 Corporate tax planning:		
Meaning and objectives, scope of corporate tax planning, tax planning, tax avoidance and tax evasion, types of companies, residential status of a company and tax incidence, areas for corporate tax planning, tax management, assessment of income, filing of returns.		12 Hrs
Unit 2 Taxation of companies:		
Computation of income under the heads, of income applicable to corporate assesses, set off and carry forward of losses, deductions available in respect of gross total income, computation of taxable income, tax liability of a company.		12 Hrs
Unit 3 Tax planning and promotion of a company:		
Tax planning with reference to setting up of a new business, location of new business, nature of business, forms of organization, tax planning in respect of newly established industrial undertakings in free trade zones, newly established 100% export oriented undertakings, tax planning in respect of industrial undertakings, engaged in infrastructural development or other activities.		12 Hrs
Unit 4: Tax planning and corporate financial decisions :		
Tax planning vis-a-vis corporate capital structure, investment decision, dividend sion, issue of bonus share, tax planning and merger or demerger decisions, tax planning		12 Hrs

reference to other managerial decisions, purchase of assets out of owned funds or out of owned funds, own or lease, purchase by installments or hire, sale of assets used for scientific research work, make or buy, shutdown or continue.	
<b>Unit 5: Need and Tax planning and employees' remuneration:</b>	
Formulation of an ideal wage policy or salary package for employees, provision for various perquisites and facilities, tax incidence of a wage policy in the hands of employees, deduction of tax at source.	10 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. Vinod Singhania and Monika Singhania, Corporate Tax Planning &amp; Business Tax Procedure, Taxmann Publications, New Delhi.</li> <li>2. Vinod Singhania and Kapil Singhania, Direct Tax Law and Practice, Taxman Publications, New Delhi.</li> <li>3. Manoharan and Hari, Direct Tax Laws, Snow White Publications, New Delhi.</li> <li>4. Girish Ahuja and Ravi Gupta, Direct Tax Law – Theory &amp; Practice, Bharat Law House, New Delhi.</li> <li>5. T G Suresh, Direct Tax Laws, CCH India, New Delhi.</li> <li>6. Monica Duggal, Corporate Tax Planning, New Age, New Delhi.</li> <li>7. Lall, B.B., Direct Taxes, Konark, New Delhi.</li> <li>8. Mehrotra and Goyal, Direct Taxes – Tax Planning and Management, Sahitya Bhavan Publications, Agra.</li> <li>9. Dinkar Pagare, Tax Laws, Sultan Chand, New Delhi.</li> <li>10. ## SPECIALISATION GROUP – C: ACCOUNTING AND FINANCE

<b>Paper Code and Name</b>	<b>PG63T305A: Basics of Financial Derivatives</b>		
<b>COURSE OUTCOMES (COs)</b>			
After completing this paper, the students will be able to:			
CO 1	Develop professional who can be involved in regulation and process of derivatives trading.		
CO 2	Develop the forward and future heading strategies.		
CO 3	Broden the understanding of basic and advanced option pricing models.		
CO 4	Develop and implement options trading strategy.		
CO 5	Develop professional managing swap transactions.		
<b>Unit 1</b> Introduction to Derivatives –			
Definition and Origin of Derivatives; Derivative Markets and Instruments – Basic Derivatives – Forwards, Futures, and Options; Derivative Terminologies; uses of			12 Hrs

derivatives; Growth of Derivatives in India – stock, commodity and currency derivatives; Process of derivative trading; Regulation of Derivative Trading in India and Role of SEBI in the Development of Derivative Trading.	
<b>Unit 2</b> Forwards and Futures –	
Structure of Forwards and Futures Markets; Forward Contracts – Futures Exchanges and Contracts; Types of Futures; Mechanics of Future Trading; Major Characteristics; Trading Process; Price Quotations; Hedging and Speculation with Commodity Futures, Interest Rate Futures, Currency Futures and Stock Index Futures, Principles of Pricing Forwards, Futures and Options on Futures Contracts; Forwards and Futures Hedging, Pricing of Index Futures Contracts – Stock Index Arbitrage.	12 Hrs
<b>Unit 3</b> Options –	
Option Pricing; Principles of Call and Put Option Pricing; Binomial and Black-Scholes Option Pricing Models; Factors Affecting Option Prices; Basic and Advanced Option Strategies; Types of Options – Interest Rate Options; Currency Options and Trading Strategies; Option Pricing Models; Complex Investment Strategies, Covered Call Writing, Protective Put, Straddles and Strangles, Spreads–Evaluation of Option Based Investment Strategies; Risk Associated with Options; Options Sensitivities.	12 Hrs
<b>Unit 4:</b> Swaps and Interest rate Forwards and Options;	
Evolution of Swap Market; Interest Rate Swaps, Currency Swaps and Equity Swaps, Swap Terminology; Motivations Underlying Swaps; Mechanics of Swap Transactions; Valuation and Application of Swaps. Forward Rate Agreements – Interest Rate Options Interest rate Swaptions and Forwards; Interest Rate Derivatives	10 Hrs
<b>Unit 5:</b> : Commodity Derivatives	
Evolution of Commodity Derivative Markets in India; Products, Participants, Functions and Instruments Available for Trading; Pricing of Commodity Futures; Hedging, Speculation, Arbitrage Trading; Clearing and Settlement, Risk Management and Regulatory Framework.	12 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. N R Parasuraman, Fundamentals of Financial Derivatives, Wiley Publications, New Delhi.</li> <li>2. Sundaram and Das, Derivatives – Principles and Practice, TMH, New Delhi.</li> <li>3. Sunil Parmeswaran, Fundamentals of Financial Instruments, Wiley Publications, New Delhi.</li> <li>4. Janakiraman, Derivatives and Risk Management, Pearson Educations, New Delhi.</li> <li>5. S L Gupta, Financial Derivatives, PHI, New Delhi.</li> <li>6. Hull C J and Basu Sankarshan, Options, Futures and Other Derivatives, Pearson Education, New Delhi,</li> <li>7. Kolb R W, Futures, Options and Swaps, Blackwell Publishers, New Delhi.</li> <li>8. Kumar S S, Financial Derivatives, PHI, New Delhi</li> <li>9. O P Agarwal, Financial Derivatives and Risk Management, HPH, New Delhi.</li> </ol>	

10. Stulz M R, Risk Management and Derivatives, Cengage Learning, New Delhi.

<b>Paper Code and Name</b>	<b>PG63T305B: Basics of Financial Econometrics</b>	
<b>COURSE OUTCOMES (COs)</b>		
After completing this paper, the students will be able to:		
CO 1	Understand the concept of Forward and Future markets and its impact on Financial decisions	
CO 2	Learn various regression model, usage of SPSS and MS Excel in regression model and implications on decision	
CO 3	Develop models on various financial decisions based on time series and forecasting techniques	
CO 4	Develop solutions to simultaneous equation to real life situation	
CO 5	Impact of decisions with respect to types of non-linear models and testing for non-linearity	
<b>Unit 1</b> Structure of Forwards and Futures Markets; Forward Contracts –		
Futures Exchanges and Contracts; Types of Futures; Mechanics of Future Trading; Major Characteristics; Trading Process; Price Quotations; Hedging and Speculation with Commodity Futures, Interest Rate Futures, Currency Futures and Stock Index Futures, Principles of Pricing Forwards, Futures and Options on Futures Contracts; Forwards and Futures Hedging, Pricing of Index Futures Contracts – Stock Index Arbitrage.		12 Hrs
<b>Unit 2</b> Regression Model –		
meaning and significance; simple and classical regression model – assumption and properties of OLS estimator; t-test and significance level; precision and standard error; multiple linear regression – constant term, parameters, F-test; goodness of fit statistics; hedonic pricing models; diagnostic test – assumptions and multicollinearity; heteroscedasticity and autocorrelation; Durbin-Watson and Breusch Godfrey tests distinction; Use of SPSS and MS Excel in regression model.		12 Hrs
<b>Unit 3</b> Univariate Time Series Modelling and Forecasting –		
notation and concepts; moving average processes, auto regressive processes; partial autocorrelation processes; ARMA processes – building ARMA models –Box-Jenkins approach – exponential smoothing and forecasting in econometrics; Use of SPSS and MS Excel in Univariate Modelling.		12 Hrs
<b>Unit 4:</b> Multivariate Models –		
single equation v/s systems-based approach to building models; cause and consequence and solutions to simultaneous equation bias; structural model; methods of estimating simultaneous equations model; Vector Autoregressive Models (VAR) advantages and disadvantages of VAR; Use of SPSS and MS Excel		10 Hrs

<b>Unit 5: Modelling Volatility and Correlation –</b>	
types of non-linear models and testing for non-linearity; models for volatility – historical volatility, Exponentially Weighted Moving Average (EWMA) models – Auto Regressive Models – ARCH models; Generalised ARCH (GARCH) models – estimating ARCH and GARCH; Use of SPSS and MS Excel.	12 Hrs
<b>Suggested Readings:</b>

H, Using Econometrics: A Practical Guide, Addison Publications, New Delhi</li> </ol>	

Paper Code and Name	PG63T305C: Corporate Financial Risk Management	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Develop professionals capable of measuring and managing financial risk	
CO 2	Design effective framework for the risk management	
CO 3	Identify risk-return relationships of various investment alternatives	
CO 4	Design and implement value at risk approaches	
CO 5	Formulate effective adoption of methods of real options in corporate financial decisions	
Unit 1 Introduction –		
Meaning and definition of risk and risk management; need, scope and significance of financial risk management; conventional and modern view of risk management; relation between risk management, firm performance and valuation; types of risks and risk management approaches; risk management framework–risk profile and risk		12 Hrs

management policy; measurement of risk – risk and returns of financial assets – Markowitz revolution – mean-variance framework; CAPM; APT and Multi-Factor models.	
<b>Unit 2 Risk Assessment Tools and Techniques –</b>	
Risk Adjusted Value – Discounted Cash Flow (DCF) approaches – DCF value of an asset, risk adjusted discount rates, certainty-equivalent cash flows, hybrid model; post valuation risk adjustment – rationale, downside risks and upside risks; disadvantages of post valuation adjustments; Relative Valuation Approaches – basis and risk adjustment; DCF v/s Relative Valuation.	12 Hrs
<b>Unit 3 Probabilistic Approaches –</b>	
Scenario Analysis – best case/worst case; Multiple Scenario Analysis; Decision Tree – steps and usefulness; risk adjusted value & decision tree; Simulation – steps and uses; simulations with constraints; issues and risk adjusted value and simulation; comparing probabilistic approach – complement or replacement.	12 Hrs
<b>Unit 4: Value at Risk (VaR) –</b>	
Meaning and history of VaR; measuring VaR – variance-covariance method; historical simulation, Monte Carlo Simulation – comparing approaches; limitations of VaR; extension of VaR; VaR as an assessment tool.	12 Hrs
<b>Unit 5: Real Options –</b>	
Essence of real options; real options, risk adjusted value and probabilistic assessments; real option example – option to delay on investment; option to expand, option to abandon an investment; caveats on real options; real options in a risk management framework; option pay offs; determinants of option value – option pricing models – Binomial and Black-Scholes model.	10 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. Aswath Damodaran, Strategic Risk Taking – A Framework for Risk Management, Wiley Publications, Pearson Education, New Delhi.</li> <li>2. ## SPECIALISATION GROUP – E: BANKING & FINANCE

Paper Code and Name	PG63T306A: Principles of Bank Management	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Develop the individual with comprehensive knowledge of banking operation who would work at various positions of banking decision-making hierarchy.	
CO 2	Formulate tools for matching assets and liabilities time sequence to avoid the risk of illiquidity.	
CO 3	Identify all endogenous and exogenous variables influencing bank’s lending and deposits policies and adopt management methods.	
CO 4	Design suitable methods of rating of banking customers for banking functions	
CO 5	Design systems of monitoring loan beneficiary performance and recovery process	
Unit 1 Bank Management:		
Concept and objectives, Facets of bank management, functions of Bank Management – planning, organizing, controlling, coordinating and communication.		12 Hrs
Unit 2 Management of Liquidity:		
of Liquidity Management, Priorities in the employment of bank funds, Problems of resource allocation.		10 Hrs
Unit 3 Management of Primary and Secondary Reserves:		
Nature of Primary reserves, secondary reserves, Factors influencing, estimating liquidity needs.		12 Hrs
Unit 4: Management of credit:		
Principles of sound bank lending, Factors influencing loan policy in a bank, Credit appraisal and follow-up actions.		12 Hrs
Unit 5: Management of Profitability:		
Profit planning, measures to improve profitability, Management of investments, Management of deposits		10 Hrs
Suggested Readings:		
1. VC Joshi & V V Joshi, Managing Indian Banks, Response Books, New Delhi 2. Halen Woodruffee, Services Marketing, Macmillan, New Delhi. 3. Rajeev K. Seth, Marketing of Banking services, Macmillan Publications, New Delhi.		

4. R M Srivastava, Management of Indian Financial Institutions, HPH, Mumbai. 5. P Subba Rao, Principles & Practice of Bank Management, HPH, Mumbai. 6. M Bhole, Financial Institutions & Markets, TMH, New Delhi 7. H R Machiraju, Indian Financial System, Vikas Publications, New Delhi 8. R M Srivastava, Management of Commercial Banks, Pragati Books, Meerut. 9. K C Shekar, Theory and Practice of Banking, Vikas, Delhi 10. Vasant Desai, Indian Financial System, Himalaya, Mumbai

**(Meant for Students of other departments)**

Paper Code and Name	PG63T307: (OPEN ELECTIVE COURSE) Digital Marketing	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Develop individual capable of rendering services in digital activity	
CO 2	Design appropriate product, promotion and pricing strategies	
CO 3	Formulate policies for effective combination of social marketing channels	
CO 4	Identify the profile of various users groups and integrate with networking models	
CO 5	Equip learners on security and ethical issues in use of digital marketing issues.	
<b>Unit 1 Digital Marketing –</b>		
Meaning, Understanding digital marketing process, Evolution of Digital Marketing from traditional to modern era, Role of Internet; current trends, Drivers of the new marketing environment, Digital Marketing Mix		12 Hrs
<b>Unit 2 Mobile Marketing</b>		
Meaning, Advantages and disadvantages of mobile marketing, Mobile Advertising, Forms of Mobile Marketing.		12 Hrs
<b>Unit 3 Social Media Marketing I –</b>		
Meaning, understanding existing social media platforms, penetration & characteristics; Face book Marketing-meaning, Best practices for Face book advertising, Understanding Face book best practices.		10 Hrs
<b>Unit 4: Social Media Marketing II-</b>		
LinkedIn Marketing: - Introduction and Importance of LinkedIn Marketing, Twitter Marketing: - Introduction to Twitter Marketing, how twitter Marketing is different than other forms of digital marketing, Digital Marketing Strategies through Instagram and Snap chat.		12 Hrs
<b>Unit 5: Email Marketing:</b>		
Advantages and disadvantages of Email marketing, Types of email marketing, setting up email marketing account, Best platforms to do email marketing.		10 Hrs
<b>Suggested Readings:</b>		
1. Seema Gupta Digital Marketing Mc-Graw Hill 1 st Edition – 2017		

2. Ian Dodson The Art of Digital Marketing Wiley Latest Edition 3. Puneet Singh Bhatia Fundamentals of Digital Marketing Pearson 1 st Edition – 2017 4. ## M.COM. IV SEMESTER

Paper Code and Name	PG63T401: Business Communication and Networking	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Design suitable analogue and digital modals for data communication	
CO 2	Integrate wired and wireless media for effective communication	
CO 3	Develop individuals capable of developing network topologies and network devices	
CO 4	Identify relative merits and demerits of wire wireless communication	
CO 5	Develop system capable of reduces errors in communication	
PARTICULARS		Teaching Hrs (Max. 64)
Unit 1: Fundamental of data communication and networking:		
Introduction – Data Communication, Networks, Internet, Intranet, Protocols, OSI & TCP/IP Models Addressing. Physical Layer – Signals, Analog, Digital, Analog VS Digital, Transmission impairment, Data Rate Limits, Performance. Digital Transmission – Line Coding (Umipolar, Polar, Biphase), Block Coding (4B/5B Encoding), Analog to digital conversion, PCM, Transmission Modes		12 Hrs
Unit 2: Transmission media and switching:		
Transmission Media – Guided and Unguided. Comparison between wired and wireless media Switching – Switching, Circuit-Switched Circuit Switching Networks, Concepts, Control Signalling, Soft switch Architecture, Packet switching, Pocketsize, X.25, Frame Relay, ATM, Message Switching. Address mapping – static mapping, dynamic mapping. ARP- need, methods, need of RARP and ICMP. Definition of fragmentation and reassembly		10 Hrs
Unit 3: Network topologies and network devices:		
Introduction to Topology, The Technical Connotation of Topology, What are the Basic		12 Hrs

Types of Topology. How Is the Physical Topology Classified? An Overview of network, Types of network, need and concept of network devices. Connecting Devices-discussion on Routers, switches, repeaters, Bridges, Switches and Gateways. Ways of accessing the internet- Dial-up access, SLIP, PPP, leased lines, DSL basics, internet access by cable. Modems-basics, types, operation, applications	
<b>Unit 4: Error detection, correction in wire wireless communication:</b>	
Error correction & detection. Types of errors. Detection VS Correction, Block Coding, Hamming Distance, Wired LAN – LLC. MAC, Ethernet, Ethernet frame, Addressing, Concept of MBase, V Ethernet, Bridged, Switched, Full Duplex Ethernet, Concept of Fast and Gigabit Ethernet Wireless LAN- Introduction to WLAN (Architecture Hidden Exposed Station Problem) Introduction to Bluetooth & Architecture, Cellular telephony, Concept of 3G, 4G, 5G cellular telephony	10 Hrs
<b>Unit 5: Network management technology:</b>	
Introduction to system and network security, security attacks, security services and mechanisms, Security at Application Layer, Firewalls and their types. DMZ, Limitations of firewalls, Intruders, Intrusion detection (Host based, Networked, Distributed), Viruses and related threats, virus countermeasures. Denial of service attacks, Hacking, Security policies and plan, Strategies for a secure network	12 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. Data Communications and Networks- 2nd edition -Achyut S Godbole- and Atul Kahate Tata McGraw-Hill</li> <li>2. Data Communications &amp; Networking – 5th Edition- B A Forouzan- Tata McGraw-Hill.</li> <li>3. Computer Networks- 4th Edition- Andrew S Tanenbaum- Pearson-Prentice Hall</li> <li>4. Computer Networking - James F. Kurose &amp; Keith W. Ross- PEARSON</li> <li>5. Computer Communications and Networking Technologies - Michael A. Gallo &amp; William M. Hancock BROOKS&amp;COLE.</li> <li>6. Computer Networks and Internets -Douglas E. Comer- PEARSON.</li> <li>7. Data and Computer Communications- Eighth Edition- William Stallings- Pearson Education.</li> <li>8. Refer the course contents at NPTEL website of IIT Khargapur of course- Communication Networks and Switching.</li> <li>9. Network Security Bible, 2nd edition, Eric Cole, Wiley Publishers. Data communication and networks –James Irvine and David Harley- Publishers: Wiley India</li> </ol>	

Paper Code and Name	PG63T402: Corporate Governance
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Design effective monitoring mechanisms for reducing agency related issues
CO 2	Underline to the management on the relative significance of ownership structure and governance performance
CO 3	Develop appropriate compensative plans to attract to retain and motivate managers capable of exemplary performance
CO 4	Develop effective borrowings methods of non-compliance corporate governance codes
CO 5	Compare and corporate governance standards to design an appropriate code

PARTICULARS	Teaching Hrs (Max. 64)
<b>Unit 1: Introduction:</b>	
Meaning and significance of corporate governance; governance v/s management; governance v/s accounting; Agency Conflict – reasons and types of agency conflict; mechanisms for resolving agency conflict – internal governance mechanisms – concentrated ownership, block shareholders, managerial compensation and ownership, financial policy, organizational structure, etc., and external governance mechanisms - role of judiciary, media, shareholders activism, gatekeepers, etc; theories of corporate governance-agency theory, stewardship theory etc; corporate governance models – US/UK model, European model and Japanese Model; linkages between corporate governance and economic development.	12 Hrs
<b>Unit 2: Corporate Governance in India:</b>	
Evolution and Growth of Corporations in India; ownership pattern of Indian Companies - family-managed and widely-held; governance models in India - managing agency model, business-house model and US/UK model; evolution of business houses/groups and classification; pyramid structure of ownership and tunneling; progress of governance in India; governance standards in public sector enterprises, banking and insurance companies	10 Hrs
<b>Unit 3: Corporate Boards :</b>	
Meaning, role and responsibilities and types of corporate boards; legal powers boards in India; board functions – traditional and strategic; theories relating to strategic role of boards and functions; determinants of board effectiveness-size, composition, information, compensation, meetings and evaluation of board performance; role and functions of board chairman; duties and responsibilities of directors; Socrates directors – meaning and principles; board dynamics; succession planning; role and responsibilities of CEOs vis-à-vis governance	12 Hrs
<b>Unit 4: Board Committees :</b>	
Need, objectives, types, number and functions of board committees-audit, compensation, nomination, environment, risk, strategic committees, etc.; requirements for effective board committees; determinants of board committees in companies; linkage between board committees and governance standards	12 Hrs
<b>Unit 5: Governance Committees:</b>	
Committees in UK - Cadbury, Hampel, Greenbury, Smith and Combined Code; Kings Committee recommendations, OECD principles of governance; Governance Committees in India - CII, Birla, Naresh Chandra and Narayan Murthy Committees - major recommendations; listing agreement and clause-49; role of SEBI in enforcement of governance code; extent of compliance of governance code in India	10 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. N Balasubramanian, Corporate Governance and Stewardship, TMH, New Delhi</li> <li>2. N Balasubramaniam, Corporate Boards and Governance, Sterling Publishers, New Delhi.</li> <li>3. A C Fernando, Corporate Governance – Principles, Policies and Practices, Pearson Education, New Delhi.</li> <li>4. Jayati Sarkar and Subrata Sarkar, Corporate Governance in India, Sage Publications, New Delhi.</li> <li>5. Subash Chandra Das, Corporate Governance in India, PHI, New Delhi.</li> </ol>	

6. Swami Parthasarathy, Corporate Governance: Principles, Mechanisms and Practice, Dreamtech, New Delhi 7. Thomas Clarke, International Corporate Governance, Routledge Publishers, London. 8. Donald Chew & Gillan, Corporate Governance at the Crossroads: A Book of Readings; McGraw Hill, New York. 9. Robert Monks and Nell Minnow, Corporate Governance, Blackwell Publishing, Singapore. 10. Soloman and Soloman, Corporate Governance and Accountability, Wiley Publications, New Delhi

## SPECIALISATION GROUP - A: COST MANAGEMENT AND CONTROL

Paper Code and Name	PG63T403A: Strategic Cost Management	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Develop individuals with advanced Knowledge of strategic cost management capable of serving corporates	
CO 2	Design algorithm of implementing activity-based costing in business activities	
CO 3	Identify factors having bearing on cost elements in various phases of product life cycle	
CO 4	Monitor the operations of just in time and integrate it with logistic management	
CO 5	Coordinate on the linkages among various parts involved in strategic cost methods	
PARTICULARS		Teaching Hrs (Max. 64)
Unit 1: Activity based costing:		
Inadequacies of traditional methods of overhead absorption, concept of ABC, Kaplan and Cooper’s approach to ABC, cost drivers and cost pools, main activities and its cost drivers, allocation of overhead under ABC – characteristics, steps, implementation and benefits of ABC system.		12 Hrs
Unit 2: Learning Curve Model:		
Concept and phases of learning curve, graphical representation, learning curve applications and factors affecting learning curve, experience curve		10 Hrs
Unit 3: Life cycle costing:		
Concept and characteristics, activities and phases in product life cycle short product and extension of product life cycle, Turning Point Indices in product life cycle		12 Hrs
Unit 4: Just in time approach:		
Concept, philosophy of JIT, sources of waste, aims and objectives of JIT, features and methodology in implementation of JIT, planning for adoption and limitations of JIT costing		10 Hrs
Unit 5: Target Costing and throughput accounting:		
Target costing- meaning, definitions, scope, significance of target costing; throughput		12 Hrs

accounting- meaning, definitions, scope and significance of throughput accounting	
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. S P Jain and K L Narang, Advanced Cost Accounting, Kalyani Publications, Ludhiana.</li> <li>2. Colin Drury, Cost and Management Accounting, Cengage Publications, New Delhi.</li> <li>3. Ravi M Kishore, Business Strategy and Strategic Cost Management, Taxmann Publications, New Delhi.</li> <li>4. Robert Kaplan and Anthony Atkinson, Advanced Management Accounting, PHI, New Delhi.</li> <li>5. Horngren, Foster and Datar, Cost Accounting: A Managerial Emphasis, PHI, New Delhi.</li> <li>6. Edward Blocher, Cost Management: A Strategic Emphasis, TMH, New Delhi.</li> <li>7. Hilton, Cost Management, TMH, New Delhi.</li> <li>8. Shank and Govindraj, Strategic Cost Management, Simon and Schuster, New York.</li> <li>9. Kanhaiya Singh, Management Accounting: Concepts and Strategic Costing Decisions, Wiley India Pvt Ltd, New Delhi.</li> <li>10. Lin Thomas, Cases and Readings in Strategic Cost Management, McGraw Hill Publications, New York</li> </ol>	

Paper Code and Name	PG63T403B: Quantitative Methods for Cost Accountants:	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Design effective cost minimisation and optimisation	
CO 2	Identify areas of applicability's of assignment techniques	
CO 3	Develop PERT and CPM network models for business entities involved in project implementation	
CO 4	Priorities quantitative techniques based on cost and performance standards	
CO 5	Chalk out areas of applicability of linear programming models	
PARTICULARS		Teaching Hrs (Max. 64)
Unit 1: Introduction:		
Meaning and definition of quantitative techniques, linkage between business decision making and quantitative techniques, different quantitative techniques, areas for application of quantitative techniques in business		12 Hrs
Unit 2: Linear programming:		
Meaning and objectives of linear programming, application areas, assumptions of linear programming, application of linear programming technique for profit maximization and cost minimization problems, graphic and simplex methods, duality		12 Hrs

and post-optimality analysis	
<b>Unit 3: Transportation technique:</b>	
Meaning and objectives, areas for application, formulation of transportation problems, steps involved in finding the optimal solution, methods of obtaining initial solution, methods of testing optimality of feasible solution, unbalanced transportation problem, degeneracy in transportation problem	14 Hrs
<b>Unit 4: Assignment technique:</b>	
Meaning and objectives, areas of application, peculiarities of assignment problems, methods solving an assignment problem, complete enumeration method, simplex method, transportation method, and Hungarian method, constrained assignment problem, unbalanced assignment problem, assignment problem and minimization case, traveling salesman problem	14 Hrs
<b>Unit 5: Techniques for project cost management:</b>	
Drawing an arrow network and numbering the events, estimation of jobs, duration and concept of critical path and probability consideration, assumptions in PERT analysis, crashing a network and determining of project cost trade off, scheduling a network with various constraints like manpower, equipment, etc	12Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. N D Vohra, Quantitative Techniques for Management, TMH, New Delhi.</li> <li>2. M P Gupta and R B Khanna, Quantitative Techniques for Decision Making, PHI, New Delhi.</li> <li>3. J K Sharma, Quantitative Techniques for Management, Trinity Press, New Delhi.</li> <li>4. Barry Render, Ralph Stair and Michael Hanna, Quantitative Techniques for Management, Pearson Education, New Delhi.</li> <li>9. Ramanath and R Shringi, Quantitative Techniques for Management, HPH, Mumbai.</li> <li>10. Leonard W.Hein, The Quantitative Approaches to Management Decisions, PHI, New Delhi</li> </ol>	

<b>Paper Code and Name</b>	<b>PG63T403C: COST AND MANAGEMENT AUDIT:</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	Design appropriate blend of cost and management programme
CO 2	Generate cost audit for wider circulation among the members of management team
CO 3	Undertake or resolve basis in business entities corporate social cost benefit analyses

CO 4	Chalk in programmes for effective implementations of internal audit programme	
CO 5	Design audit programme of NGOs, SHGs, Municipalities etc and compete audit programmes	
PARTICULARS		Teaching Hrs (Max. 64)
<b>Unit 1: Cost Audit:</b>		
Nature, Scope, utility and Advantages of Cost Audit; Companies (Cost Records & Audit) Rules, 2014. Professional Ethics, Misconduct, Offences and Penalties; Format of Cost Audit Report – XBRL – Salient Features Section Reporting issues under Cost Audit, cost auditing and assurance standards		12 Hrs
<b>Unit 2: Cost Accounting Standards:</b>		
meaning, objectives, significance, generally accepted costing principles, cost accounting standard board, cost accounting standard setting process, cost accounting standards, (1, 3,6,7,8,9,10, and 11)		10 Hrs
<b>Unit 3: Management Audit:</b>		
Meaning, Nature, Scope, utility, Energy Audit, Efficiency Audit, Propriety Audit and Systems Audit . Evaluation of Corporate Image - Corporate Development Audit – Impact of environmental pollution, Social Cost Benefit Analysis, Corporate Social Audit and Safety audit		12 Hrs
<b>Unit 4: Internal Audit:</b>		
Concept of Internal Audit, Operational Audit and other related issues ; Provisions of Internal Audit under Companies Act, 2013; Audit Planning, Audit Programme, Audit working papers . Receivables Audit, Reporting to Management		10 Hrs
<b>Unit 5: Audit of Services and Local Bodies:</b>		
Audit of Hospitals, Hotels, educational Institutions, Co-operative Societies, Self Help Groups, Non-Governmental Organizations (NGOs), corporations, municipalities, Panchayats		12 Hrs
<b>Suggested Readings:</b>		
<ol style="list-style-type: none"> <li>1. Jain Abhishek G, Cost and Management Audit, Himalaya Publishing House (HPH), New delhi</li> <li>2. Robert Kaplan and Anthony Atkinson, Advanced Management Accounting, PHI, New Delhi.</li> <li>3. Arora M.N., Cost Management, Himalaya Publishing House (HPH), New delhi</li> <li>4. Saxena, V/ Vashist, C., Advanced Cost &amp; Management Accounting, Sultan Chand &amp; Sons</li> <li>5. Colin Drury, Cost and Management Accounting, Cengage Publications, New Delhi</li> <li>6. Kanhaiya Singh, Management Accounting: Concepts and Strategic Costing Decisions, Wiley India Pvt Ltd, New Delhi.</li> <li>9. Cost and Management Audit by J.G. Tikha, ENCOMS BOMBAY</li> <li>10. Cost and Management Audit by Datta Chowdary</li> </ol>		

## SPECIALIZATION GROUP - B: ACCOUNTING AND TAXATION

<b>Paper Code and Name</b>	<b>PG63T404A: Contemporary Issues in Accounting:</b>	
<b>COURSE OUTCOMES (COs)</b>		
After completing this paper, the students will be able to:		
CO 1	Design effective methods of accounting for price level changes	
CO 2	Develop professional capable of accounting for human resource in financial statements	
CO 3	Develop effective system of identifying majoring recording and reporting of social and environmental performance	
CO 4	Educate top echelons of business entities on the relative significance of socio environmental performance	
CO 5	Design appropriate error detection mechanisms and effective management	
<b>PARTICULARS</b>		<b>Teaching Hrs (Max. 64)</b>
<b>Unit 1: Inflation Accounting:</b>		
Limitations of historical Cost accounting; meaning, objectives and methods of accounting for inflation-CPP and CCA methods – measurement of net monetary gain, COSA, gearing adjustment and preparation of Annual Accounts as per CPP and CCA; Guidance note of ICAI on price level accounting		12 Hrs
<b>Unit 2: Human Resource Accounting (HRA):</b>		
Meaning, objectives, significance and development of HRA; issues involved in HRA; methods for valuation of human resources; accounting methods as developed for HRA; HRA practices in the World and in India		10 Hrs
<b>Unit 3: Social and Environmental Accounting:</b>		
- meaning, objectives and significance of social accounting; theories of social accounting; process and scope, concepts of social accounting theory; recent developments in social accounting– GRI, UN Global Compact, Accountability Assurance Standard, Social Responsible Index, ISO 26000 – Standard on CSR; CSR reporting in India and in the World; preparation of Social Cost Benefit Analysis; Social Audit; Environmental Accounting – definition, meaning, objectives, significance and classification; TBL Reporting; EFA - Recognition and Accounting for Environmental Assets, Liabilities and Contingent Liabilities; EMA – cost classification and uses of EMA; GRI Guidelines and Measurement; EA in India; concept, methods and application of shadow pricing; carbon credit and carbon accounting - meaning and development; environmental audit		12 Hrs
<b>Unit 4: Accounting for Intangibles:</b>		
Meaning, objectives, economic significance and classification of intangibles; valuation and accounting methods; AS – 26 and its application in accounting for Intangibles in India; meaning, objectives, significance and methods of brand accounting and valuation; concept, meaning, objectives and significance of measurement of Organizational Capital and Intellectual Capital.		10 Hrs

<b>Unit 5: Creative Accounting :</b>	
Meaning, definitions, causes, techniques, extent and effects of creative accounting, ethical issues involved in creative accounting; determinants of creative accounting practices; detecting and control of creative accounting; creative accounting practices in India – Role of SEBI, stock exchanges, SFIO, etc., Forensic Accounting- meaning, objectives and role of forensic accounting	12 Hrs
<b>Suggested Readings:</b>	
<ol style="list-style-type: none"> <li>1. S N Maheswari and S K Maheswari, Advanced Accounting – Vol II, Vikas Publications, New Delhi.</li> <li>2. R L Gupta and Radhaswamy, Advanced Accounting – Vol 2, Sultan Chand &amp; Sons, New Delhi.</li> <li>3. S K Chakravarthy, Topics in Accounting and Finance, OUP, New Delhi.</li> <li>4. Paper Code and Name	PG63T404B: Corporate Tax Planning (GST and Customs)–II:	
COURSE OUTCOMES (COs)		
After completing this paper, the students will be able to:		
CO 1	Identify the structure and modalities involved in levying of GST regime.	
CO 2	Develop individuals capable of managing GST regime in business entities.	
CO 3	Generate input tax credit reforms and device process of recouping the same.	
CO 4	Generate GST returns on a regular basis and upload the same.	
CO 5	Properly account for GST related transactions and incorporate data generated in management reports.	
PARTICULARS		Teaching Hrs (Max. 64)
Unit 1: Introduction :		
Meaning, scope and significance of GST; principles of subsumation and taxes subsumed; classification of goods and services and GST rates; GST model in India – CGST, SGST and IGST; GST Administration in India – GST Council - functions and challenges; GST Network – objectives structure, administration and functions; operational aspects of GST–process of registration for manufacturer, service provider and dealer, etc; amendment and cancellation of registration; tax invoice, credit and		12 Hrs

debit notes; accounts and records; filing of returns – forms, time schedule; assessment, payment of tax	
<b>Unit 2: Levy and Collection of Tax (HRA):</b>	
CGST Act, 2017 – levy and collection of central and state GST, composition levy, taxable person, power to grant exemption from tax; Time and Value of Supply – time of supply of goods and services; change in rate of tax in respect of supply of goods or services; value of taxable supply; Illustrative problems	12 Hrs
<b>Unit 3: Valuation of Goods and Services under GST:</b>	
Introduction to valuation under GST, meaning and types of consideration; valuation rules; other cases for valuation of supply, imported services and goods; valuation for discount; transaction value – meaning and condition; inclusive and exclusive discount; methods of valuation – computed value, residual value method; rejection of declared value; Illustrative problems	10 Hrs
<b>Unit 4: Input Tax Credit System:</b>	
Introduction, meaning of Input Tax Credit, eligibility and conditions for taking Input Tax Credit – CGST, SGST and IGST; recovery of Input Tax Credit and interest thereon, taking input tax credit in respect of inputs sent for job work, reverse charge, manner of distribution of credit by input; service distributor; Illustrative problems	10 Hrs
<b>Unit 5: Tax Planning and Customs Duty:</b>	
– Scope and coverage of customs law, nature, types, classification, rates and valuation of customs duty; exemptions, remissions, demand, recovery and refunds in customs, export schemes, duty drawbacks, types of valuation for Customs Duty – tariff value, transaction value; methods of valuation; general provisions about baggage	12 Hrs
<b>Suggested Readings:</b>

# KARNATAK UNIVERSITY, DHARWAD

## POST – GRADUATE DEPARTMENT OF STUDIES IN COMMERCE

### Regulations and Syllabi of the P.G. Diploma in Entrepreneurial Finance Programme (PGDEF) ( I to II Semesters)

## **Preamble:**

**The world** is witnessing a significant innovation in entrepreneurial activities. It is intriguing as to the germination and establishment these newer forms of business entities and their survival in the context of highly competitive business world. These innovative entities continue to arrive and survive.

The traditional commerce or business syllabi are devoid of all these contemporary world of new business forms emerging and as a result the student community is deprived of keeping themselves abreast of this business phenomenon. Resistance to change is also a reason for the existing undergraduate or post-graduate commerce curriculum to be stationary. However, it was felt that this gap in knowledge of the contemporary business phenomenon has to be bridged and the young learners should exit the frontals of University Education System equipped with the contemporary developments and contribute to the survival of these units and to further the entrepreneurial innovation.

The crux of the survival of all these newer forms of business entities like start-ups, unicorns, etc is the method of financing. The newer entities are seeking all creative and innovative ideas in financing. The Indian business tycoons like Mr Ratan Tata, Mr Ajiz Premiji, etc are mentoring the new born entities.

Against this background, the present Post-Graduate Diploma Programme in Entrepreneurial Finance (PGDEF) is designed by the University to enable the commerce graduates to add to their kitty the wherewithals to survive in competitive world and be tremendous useful to the business community and society at large. The programme is add-on and can be completed along with the Post-Graduate Course in Commerce or even otherwise also.

# PART-A

## Regulations Governing Post-Graduate Diploma in Entrepreneurial Finance

### (PGDEF) Programme (PGDEF)

#### Under the

#### Faculty of Commerce

*(Framed under Section 44(1)(c) of the K. S.U. Act, 2000)*

#### 1.0 Title

These Regulations shall be called “Regulations Governing the Post Graduate Diploma in Entrepreneurial Finance Programme (PGDEF),” Karnatak University, Dharwad.

#### 2.0 Commencement

These Regulations shall come into effect from the date of assent by His Excellency, the Chancellor of the University.

#### 3.0 Definitions

In these Regulations, unless otherwise provided:

- A “**Academic Council**” means Academic Council of the University constituted according to the *Karnataka State Universities Act, 2000*.
- B “**Board of Studies**” means P.G. Board of Studies in Commerce, Karnatak University, Dharwad.
- C **Course** means paper, which the student admitted to P.G. Diploma in Entrepreneurial Finance Programme (PGDEF), should successfully complete to receive the Post Graduate Diploma of Entrepreneurial Finance Programme.
- D “**Student**” means the candidate admitted to P.G. Diploma in Entrepreneurial Finance Programme (PGDEF).
- E “**University**” means Karnatak University, Dharwad.

#### 4.0 Minimum Eligibility for Admission

A candidate, who has successfully completed Bachelor’s Degree programme in **Commerce** of this University or of any other University recognized as equivalent thereto by this University, shall be eligible for admission to the P.G. Diploma in Entrepreneurial Finance Programme (PGDEF) provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the University from time to time. Admission shall be as per the Govt. of Karnataka Reservation Policy and directions issued in this direction from time to time.

## **5.0 Duration of the Programme**

The duration of P.G. Diploma in Entrepreneurial Finance Programme (PGDEF) shall be year duration comprising of two semesters.

## **6.0 Medium of Instruction and Evaluation**

The medium of instruction for P.G. Diploma in Entrepreneurial Finance Programme (PGDEF) shall be in English. However, the students may write the examinations in Kannada if so provided by the Board of Studies in Commerce (PG).

## **7.0 Programme Structure**

7.1 The students of P.G. Diploma in Entrepreneurial Finance Programme (PGDEF) shall study the courses as may be approved by the Board of Studies in Commerce (PG), Faculty and the Academic Council of the University from time to time subject to minimum and maximum marks as outlined in these regulations.

7.2 The detailed programme structure for P.G. Diploma in Entrepreneurial Finance Programme (PGDEF) shall be as stated in Annexure –I.

## **8.0 Attendance**

8.1 Each course shall be taken as a unit for the purpose of calculating the attendance.

8.2 Each student shall sign the attendance register maintained by the Department for each course for every hour/unit of teaching. The course teachers shall submit the monthly attendance report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the second week of the subsequent month.

8.3 Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.

8.4 A student shall be considered to have satisfied the required attendance for each course if he/she has attended not less than 75 % of the total number of instructional hours during the semester.

8.5 There is no provision for condoning shortage of attendance.

8.6 The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission afresh to the given semester.

## **9.0 Examination**

9.1 There shall be an examination at the end of each semester conducted by the University.

9.1.1 There shall be semester-end examination of 3 hours duration for the courses carrying 75 marks.

9.1.2 Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application form through the proper channel and

shall also pay the fees prescribed.

- 9.1.3 The Office of the Registrar (Evaluation) shall allot the Register Number to the candidate at the 1st semester-end examination. That will be the Register Number of the candidate for subsequent appearances and semester-end examinations.
- 9.1.4 The Answer scripts shall be in the safe custody of the University for a period of six months from the date of announcement of results.
- 9.1.5 The programme is a fully carry-over system. A candidate reappearing for either the first or second semester examinations shall be permitted to take examinations as and when they are conducted.
- 9.1.6 Candidates who have failed, remained absent or opted for improvement in any course/ courses shall appear for such course/ courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.
- 9.1.7 Candidates who desire to challenge the marks awarded to them in the semester end examinations may do so by submitting an application along with the prescribed fee to the Registrar (Evaluation) within 15 days from the announcement of results.

## **9.2 First semester**

- 9.2.1 There shall be a Board of Examiners to set, scrutinize and approve question papers.
- 9.2.2 The BOE shall scrutinize the question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation).
- 9.2.3 The office of the Registrar Evaluation shall dispatch the question papers to the Department/ P G Centres/ Colleges who shall conduct the Examinations according to the schedule announced by the University.
- 9.2.4 The Chairperson of the Department/ Administrator of the P. G. Centre/ Principal of the College shall appoint one of their full time course teachers as Post Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts for first semester.
- 9.2.5 Answer scripts shall be valued by the examiners appointed by the University. However, in those circumstances where an examiner for a particular course is not available, then the answer scripts of that course shall be dispatched to the office of the Registrar (Evaluation) who shall arrange for valuation of the same.
- 9.2.6 There shall be single valuation for first semester. The examiners (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on marks list.
- 9.2.7 The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be dispatched by the PGP Coordinator to the Registrar (Evaluation)'s Office at the conclusion of the valuation at the respective centres.

9.2.8 The Office of the Registrar Evaluation shall process and announce the results.

### 9.3 **Second Semester:**

9.3.1 There shall be a Board of Examiners to set, scrutinise and approve question papers.

9.3.2 As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other Universities/ Research Institutes.

9.3.3 Each answer script of the semester-end examination (theory and project report) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averaged with nearer award of the two evaluations.

Provided that in case the number of answer scripts to be referred to the third examiner in a course exceeds minimum of 5 or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.

### 9.4 **Evaluation**

9.4.1 Each Course shall have two evaluation components - Internal Assessment (IA) and the Semester End Exams.

9.4.2 The IA component in a course shall carry 25% and the Semester End Examination shall carry 75%. Courses having 25% marks as internal assessment shall have 3 marks allotted to attendance.

9.4.3 Marks for attendance shall be awarded to the students as stipulated below :

<b>Attendance (in percentage)</b>	<b>Marks</b>
Above 90	3
Above 80 and up to 90	2
Above 75 and up to 80	1
75	No marks

9.4.4 Internal Assessment (IA) shall be based on written tests/ assignments/ seminars and /or any other instructional activity. However, the number of IA components per course per semester shall not be less than two.

9.4.5 The IA marks list shall be notified on the Department notice board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination.

9.4.6 The tests shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.

9.4.7 There is no provision for seeking improvement of Internal Assessment marks.

9.4.8 The IA records, pertaining to Semester Examination, shall be preserved by the department/Centres/Colleges for a period of one year from the date of semester

examination. These records may be called by the University or a body constituted by the University as and when deemed necessary.

**10.0 Maximum duration for completion of the Programme**

- 10.1 A candidate admitted to P.G. Diploma in Entrepreneurial Finance Programme (PGDEF) shall complete it within a period, which is double the duration of the programme from the date of admission.
- 10.2 Whenever the syllabi are revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabi.

**11.0 Declaration of Results**

- 11.1 The minimum marks for a pass in each course shall be 40% of the total marks including both the IA and the semester-end examinations. Further, the candidate shall obtain at least 50% of the marks in the semester-end examination. There is no minimum for the IA marks.
- 11.2 Candidates shall secure a minimum of 50% in aggregate in all courses of the programme in each semester to successfully complete the programme.
- 11.4 For the purpose of announcing the results, the aggregate of the marks secured by a candidate in two semester examinations shall be taken into account. However, Ranks shall not be awarded in case the candidate has not successfully completed each of the semesters in first attempt or has not completed the programme in the stipulated time or had applied for improvement of results.
- 11.5 The grading of candidates at the examination shall be as follows:

<b>Percentage of Marks</b>	<b>Class</b>
70.00 % and above	First class with Distinction
60.00 to 69.99%	First Class
50.00 to 59.99%	Second Class
Below 50%	Fail

# Annexure – I

<b>Paper Code</b>	<b>DP63T102 Innovation and Entrepreneurship</b>
<b>and Name</b>	
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Develop individuals Knowledge of innovation and entrepreneurship
CO 2	Understand different classifications of innovation and entrepreneurship opportunities
CO 3	Knowledge about different business models and start up
CO 4	Understanding knowledge about Board and board meetings
CO 5	Knowledge on rewarding system

<b>DP63T102 Innovation and Entrepreneurship</b>		<b>Teaching Hours (Max. 64)</b>
<b>Unit 1: Introduction:</b>		
Concept of innovation, objectives, need and significance of innovation; relationship between innovation and entrepreneurship growth and developments; benefits of innovation to business, employees, customers and society;		12 Hours
<b>Unit 2: Classification of innovation:</b>		
Incremental, disruptive, architectural and radical; innovation models – employee innovation, customers, partner/supplier, competitor and public innovation; Oslo's classification – organizational, process, product, marketing and eco-innovation.		8 Hours
<b>Unit 3: Entrepreneurial Opportunities:</b>		
Opportunities, discovery/creation, pattern identification and recognition for venture creation; prototype and exemplar models; reverse engineering; innovation process and decision-making – entrepreneurial ecosystem, ideation, development and exploitation of opportunities; negotiation, decision-making process and approaches; effectuation and causation		6 Hours
<b>Unit 4: Crafting Business Models and Lean Start-ups:</b>		
Introduction to business models; creative value propositions-conventional, industry logic, value innovation logic; customer focussed innovation; analyzing and building business models, introduction to lean start-ups, business pitching.		
<b>Unit 5: Nurturing Innovation:</b>		
meaning, objectives, need and significance; innovation environment; Board, Board Chairman and CEO responsibilities in developing creative and learning organization; developing structure to identify and evaluate ideas; learning from competitors; developing reward system – methods of rewarding

<b>Paper Code and Name</b>	<b>DP63T103</b> Entrepreneurial Accounting
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Understand and learn skill on managerial application of accounting information
CO 2	Learn to maintain books of records and preparation of financial statements in entrepreneurial entities
CO 3	Understand the significance of ratio analysis and types of accounting ratios
CO 4	Understanding various asset management and Knowledge on rewarding system

<b>DP63T103</b> Entrepreneurial Accounting	<b>Teaching Hours (Max. 64)</b>
<b>Unit 1: Introduction:</b>	
Accounting as an information system; managerial application of accounting information; accounting concepts and conventions; accounting standards and their applicability to MSMEs	12 Hours
<b>Unit 2: Accounting cycle:</b>	
Recording, classifying and summarizing and generation of accounting statements of entrepreneurial entities – interim and annual financial statements;	8 Hours
<b>Unit 3: Cash Flow Analysis:</b>	
Meaning and classification of cash flow – operating investing and financing cash flows; measuring operating cash flows; funds from operations and cash from operations; computation of cash flows	6 Hours
<b>Unit 4: Ratio Analysis:</b>	
Meaning, objectives and significance of ratio analysis; types of accounting ratios; historical and budgeted ratios; computation of functional financial ratios – liquidity,	

structural, efficiency and profitability ratios; limitations of ratio analysis.	
<b>Unit 5: Nurturing Innovation:</b>	
Comparison between traditional and contemporary measurement of operating performance; measuring Operating Performance and Prediction - Return on cash adjusted assets, return on sales, return on market value of assets, cash flow return on assets; use of percentage change to detect abnormal operating performance; time adjusted and inflation adjusted ratios; Prediction of industrial sickness through ratios – univariate and multivariate models – Altman’s and L C Gupta models.

<b>Paper Code and Name</b>	<b>DP63T104 Corporate Finance – I</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Develop basic knowledge of corporate finance
CO 2	Design effective framework for the leverage analysis in start-up and SMEs
CO 3	Identify risk-return relationships of various investment alternatives
CO 4	Design and implement value at risk approaches

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 64)</b>
<b>Unit 1: Basics of Corporate Finance:</b>	
Concept of Finance and Business Finance; emergence of corporate finance and reasons for its growth; nature and scope of finance function; objectives of finance function – profit maximization v/s wealth maximization; financial decisions and risk-	12 Hours

return trade-off; finance function in start-up and SMEs	
<b>Unit 2: Leverage Analysis and Capital Structure Decision:</b>	
Concept of Leverage and Classification – Significance and Measurement of Operating, Financial and Total Leverage; leverage analysis in start-up and SMEs	8 Hours
<b>Unit 3: Designing Optimum Capital Structure:</b>	
Theoretical Explanation – Net Income and Net Operating Approaches; MM Model, Traditional Approach, Trade-off models, pecking order hypothesis and signalling hypothesis; determinants of capital structure decision; capital structure decisions in Start-up and SMEs	6 Hours
<b>Unit 4: Capital Budgeting Decisions:</b>	
Concept of Capital Budgeting – features, significance and types of capital budgeting decisions; measurement of project's cash inflows and outflows; evaluation criteria – accounting rate of return, payback methods; discounted cash flow methods – NPV, IRR, PI, NTV; Conflict between NPV and IRR – cross rate and MIRR; multiple IRRs; capital rationing Decisions; complex investment projects; capital budgeting in start-up and SMEs.	
<b>Unit 5: Capital Budgeting Decisions under Risk and Uncertainty:</b>	
– Concept of risk and uncertainty and comparison; methods of incorporating risk/uncertainty – traditional and statistical methods; decision – tree method; risk or uncertainty in start-ups and SMEs

<b>Paper Code</b>	<b>DP63T105 Entrepreneurial Finance - I</b>
<b>and Name</b>	

<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Understand the concept of Entrepreneurial Finance
CO 2	Knowledge about significance Start-up Financing
CO 3	Learn financial aspects of a business plan and due diligence to the entrepreneur
CO 4	Learn to understand Financial Planning and Forecasting on budgeting
CO 5	Understand history of venture capital financing and Learn the factors considered before investing

<b>DP63T105 Entrepreneurial Finance - I</b>		<b>Teaching Hours (Max. 64)</b>
<b>Unit 1: Introduction:</b>		
Concept of Entrepreneurial Finance, objectives, nature, scope and importance; role of entrepreneurial finance; entrepreneurial finance v/s corporate finance; growth of entrepreneurial finance in US, UK and other western countries;		12 Hours
<b>Unit 2: Start-up Financing:</b>		
– Meaning and significance; traditional small business financing options – debt financing, government sources of small business loans and equity financing; rollover retirement funds to start or finance business; new sources of debt and equity financing; stages of venture life cycle; sources of financing to MSMEs		8 Hours
<b>Unit 3: Business Planning:</b>		
Difference between various plans of new ventures and established small business; purpose and importance of business plans; elements of sound business plan; financial aspects of a business plan; due diligence to the entrepreneur and outside investors; implementation and revision of business plan; reasons for failure of business plan		6 Hours
<b>Unit 4: Financial Planning and Forecasting:</b>		
Concept of financial planning and process of financial planning; preparation of cash budget; sales budget and sales forecast; interrelationship between planning, budgeting and forecasting; projecting financial needs, break even analysis and financial forecasting; determinants of MSMEs financing needs		
<b>Unit 5: Venture Capital:</b>		
Meaning, objectives and nature of venture capital; advantages and disadvantages of		

venture capital; history of venture capital financing; organizing venture capital firms; factors considered before investing; securities involved in venture financing – common stocks, convertible bonds, convertibles preferred, warrants and options; pre-investment stage –deal flow, selection and evaluation; investment stage –ownership structure and contracting; post-investment stage – behaviour growth and success/failure; venture life cycle ad financing through venture life cycle

## POST GRADUATE DIPLOMA IN ENTREPRENEURIAL FINANCE

### SECOND SEMESTER

#### PAPER -WISE DETAILED CONTENTS

<b>Paper Code and Name</b>	<b>DP63T201 Corporate Finance – II</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Understand the significance and types of Cost of Capital and Measurement
CO 2	Learn about dividend theories and Working Capital Management Decisions

CO 3	Develop skill on inventory management techniques
CO 4	Study on the determination of the optimum cash balance

<b>DP63T201 Corporate Finance – II</b>		<b>Teaching Hours (Max. 64)</b>
<b>Unit 1: Cost of Capital and Measurement :</b>		
Concept, significance and types of cost of capital; cost of specific source of capital – debt, preference, retained earnings and external equity; overall cost of capital – book value weights, market value weights and marginal weights; cost of capital in start-ups and SMEs		12 Hours
<b>Unit 2: Dividend Decisions :</b>		
pay-out and retention ratios and market value behaviour; dividend theories – Walter’s, Gordon’s and MM models; residual theory; determinants of dividend decisions; stock dividends and stock splits; dividend decision in start-ups and SMEs		8 Hours
<b>Unit 3: Working Capital Management Decisions :</b>		
Concepts of working capital and need; types of working capital; investment and financing working capital – liquidity and profitability tangle; determinants of working capital and computation – operating cycle approach to measurement; WCM practices in Start-ups and SMEs		6 Hours
<b>Unit 4: Inventory, Debtors and Payables Management :</b>		
Meaning and objectives of holding inventories; inventory management techniques; analysis of investment in inventory and inventory control techniques; receivables management – credit policy and optimum credit policy; monitoring receivables and factoring; payables management - meaning and cost of credit; techniques of payables management;		
<b>Unit 5: Cash Management Practices:</b>		
– Facets of Cash Management and motives for holding cash; cash planning – cash forecasting and budgeting – short-term cash forecasts and long-term cash forecasting; determining the optimum cash balance; investing surplus cash in marketable securities; cash management practices in start-ups and SMEs

<b>Paper Code and Name</b>	<b>DP63T202 Entrepreneurial Finance - II</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Understand the concept of Mentor financing, Angel financing,
CO 2	Knowledge about Crowd funding
CO 3	Learn concept relating to seed financing structure and mezzanine debt, mezzanine tools and Revenue-based Financing
CO 4	Develop knowledge on investment in private equity categories

<b>DP63T202 Entrepreneurial Finance - II</b>	<b>Teaching Hours (Max. 64)</b>
<b>Unit 1: Mentor Financing:</b>	
What do mentors do? Characteristics of good mentor; how to find a mentor; what to look for in a mentor; nurturing the mentoring relationship, learning from a mentor through apprenticeship	12 Hours
<b>Unit 2: Angel Financing:</b>	
Meaning and Significance of angel investing; characteristics of business angels; etymology and origin; source and extent of funding; investment profile; superangel – meaning and features; useful tips on getting funds from business angels	8 Hours
<b>Unit 3: Crowd Funding:</b>	
Meaning, history and types of crowd funding; reward based equity, software value token, debt-based, duration based; role of crowd funding; platforms – meaning and services; significant campaign; benefits and risks involved in crowd funding; crowd sourcing – definition and historical examples	6 Hours
<b>Unit 4: Seed Financing :</b>	
Meaning, usage and significance;; seed capital v/s venture capital; Mezzanine Financing – Meaning and structure; uses; mezzanine debt; mezzanine tools; Revenue-based Financing or Royalty-Based Financing (RBF): Meaning and history; RBF v/s	

bank financing; working of RBF, application of RBF; RBF qualifications and application process; RBF v/s venture capital; pros and cons of RBF; RBF v/s conventional loans	
<b>Unit 5: Private Equity and Buy Outs:</b>	
Meaning and key features; history and development; investment in private equity categories – investor categories; direct v/s indirect investment; private equity market; private equity v/s hedge funds; private equity in the 1980s, 1990s and in 2000s; Buy-outs – meaning, history and role of buyouts in financing start-ups; variations in buyouts – LBOs, MBOs, Buy and Built, Recaps, Secondary Buyouts; Public to Private; issue of high risk bonds (junk bonds); restrictions on issue of junk bonds; growth of junk bonds market the world over

<b>Paper Code</b>	<b>DP63T203 Capital Market Financing of SMEs</b>
<b>and Name</b>	
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Understand the concepts of SMEs Financing
CO 2	Develop linkages between SME equity markets, SME listing in IPOs,BSE and NSE market
CO 3	Equip in individuals to get knowledge about Debt market

CO 4	Broden the understanding of basic and advanced knowledge about SEBI
------	---

DP63T203 Capital Market Financing of SMEs		Teaching Hours (Max. 64)
<b>Unit 1: Introduction to SMEs Financing:</b>		
Meaning and functions of capital markets; Capital market and its constituents; need and significance of capital market financing; sources of financing MSMEs; problems involved in raising funds in capital market; SMEs Capital Markets – meaning and historical background; types of SME capital markets – exchange market – domestic market and international market; non-exchange market form – OTC market; market for unlisted SME shares.		12 Hours
<b>Unit 2: SME Equity Markets:</b>		
Meaning and establishment of independent SME stock exchanges; Alternative Investment Market (AIM); platform; board; SMEs Stock Exchanges in India by BSE and NSE – establishment, objectives and functioning; challenges involved in development of SME stock exchanges		8 Hours
<b>Unit 3: Benefits of SME Listing:</b>		
SEBI norms for listing; eligibility criteria; modes of listing, difference from main board listing; global comparison; SMEs and IPOs – listed SMEs and Current IPOs; standardised lot size for SME exchange; SME listing agreement; direct listing on BSE SME Platform; migration from SME Exchange to main board		6 Hours
<b>Unit 4: SMEs Debt Market :</b>		
meaning and historical background; need and significance; types of SMEs Bond Instruments – SME collective note, SMEs joint bond and SME private placement bond		
<b>Unit 5: Regulatory Structure:</b>		
Need and significance of regulatory structure – SEBI (Issue of Capital and Disclosure Requirement) Regulation 2009 (SEBI ICDR Regulations); ICDR Regulations applicable to SMEs; market makers obligations; market makers and SEBI guidelines		
<b>References:</b>

<b>Paper Code and Name</b>	<b>DP63T204 Start-Up Valuation Methods</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Develop professional who can be involved in regulation and process of valuation of start-ups.
CO 2	Develop the knowledge about discounted cash flow methods of start-up models.
CO 3	Broden the understanding of basic and advanced other valuation methods.
CO 4	Develop and implement Real World Start-up Valuation Models
CO 5	Understand Entrepreneurs' Perspective on Value and opportunity Cost and choosing entrepreneurship

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 64)</b>
<b>Unit 1: Introduction:</b>	
Concept and objectives of valuation; business valuation – meaning and objectives; foundations of new venture valuations – myths about new venture valuation; challenges involved in valuation of start-ups; overview of valuation models	12 Hours
<b>Unit 2: Valuation in Practice :</b>	
Criteria for selecting start-up valuation models; implementing the continuing value concept; Discounted Cash Flow Methods – meaning and measurement of cash flows; two stage and three-stage growth models; free cash flow to equity models; free cash flow to all stakeholders and adjusted present value approach; excess return models – economic value added; capital structure and firm value	8 Hours
<b>Unit 3: Other Valuation Methods :</b>	
Relative Valuation Methods – earnings multiples; book value or replacement value, revenue multiples; the Berkus Method, Scorecard Valuation Method; Cost-to-Duplication Method; Risk Factor Summation Method; Venture Capital Method; First	6 Hours

Chicago Method	
<b>Unit 4: Real World Start-up Valuation Models :</b>	
Standard Earnings Multiple Method; Human Capital Plus Market Value Method; Exit Method, Customer-Based Valuation Model; Comparison Valuation Method; Combo Platter Method; etc	
<b>Unit 5: Entrepreneurs' Perspective on Value:</b>	
Opportunity Cost and choosing entrepreneurship; entrepreneur as on under diversified investor; factors influencing entrepreneurs cost of capital; valuing partial commitment investment; implementing partial commitment; short cuts and extensions; benefits of diversification	
<b>References:</b> <ol style="list-style-type: none"> <li>1. Murat Akkaya, Start-Up Valuation: Theories, Models and Future,</li> <li>2. <b>Paper Code and Name</b>	<b>DP63T205 Cost Accounting for Entrepreneurs</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Understand the knowledge of managerial applications of cost accounting
CO 2	Design different classifications of cost accounting
CO 3	Broaden management understanding of analysis and measurement of cost management techniques.
CO 4	Design a suitable method for accounting of cost in organisations
CO 5	Generate effective cost management reports to serve managerial decision making relating to budgetary control and standard costing

PARTICULARS	Teaching Hours (Max. 64)
<b>Unit 1: Introduction:</b>	
Concept of Cost Accounting – meaning, nature and characteristics; functions of cost accounting; managerial applications; financial accounting v/s cost and management accounting; techniques of cost accounting	12 Hours
<b>Unit 2: Cost Concept and Classification;</b>	
meaning of cost and classification – element-wise, behaviour, functional, traceability, controllability, etc., managerial classification of cost – implied or opportunity cost, sunk cost, etc., managerial uses of cost classification in start-ups and SMEs	8 Hours
<b>Unit 3: Product/Service Costing Methods and their applications in start-ups and SMEs:</b>	
concept of output, job and operating costing methods – cost accumulation, analysis and measurement of unit cost; process costing – features, computation of gain or loss and measurement of unit cost	6 Hours
<b>Unit 4: Marginal Costing and Break-even Analysis :</b>	
meaning, nature and assumptions of marginal cost; marginal costing v/s absorption costing; marginal costing equation; managerial applications of marginal costing; break-even analysis – meaning, nature and assumptions, contribution margin ratio and managerial applications of breakeven analysis; merits and demerits of marginal costing	
<b>Unit 5: Budgetary Control and Standard Costing Techniques :</b>	
Concept of budget and budgetary control; budget process; preparation of various functional budgets and variance analysis; flexible budgeting; standard costing system – concept of standard cost and standard costing; developing cost standards for various elements of cost and analysis of variances; application in start-ups and SMEs

<b>Paper Code and Name</b>	<b>PH63T101 Research Methodology</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Develop knowledge base in identifying relative advantages of alternative research method.
CO 2	Develop intellectual abilities of designing research scheme suiting conflicting stakeholder interest.
CO 3	Equip abilities of designing and developing alternative models of data manipulation.
CO 4	Enhance abilities of data analysis and interpretation.
CO 5	Build acumen of effective report preparation and presentation.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 64)</b>
<b>Unit 1: Research Methodology: An Introduction</b>	
Meaning objectives and types of research significance of research basics of applied research Social Science Research and difficulties research process criteria of good research	12 Hours
<b>Unit 2: Sampling Techniques &amp; Its Methods:</b>	
Meaning and significance nature of sampling population v/s sampling, sampling size sampling frame cluster sampling methods of sampling probability sampling simple random sampling stratified random sampling cluster Sampling and multistage sampling and non probability sampling deliberate sampling convenience sampling snowball sampling find quota sampling sampling error	8 Hours
<b>Unit 3: Research Methods:</b>	
Introduction experiment and surveys collection of primary data difference between questionnaire and schedule methods of data collection Primary and secondary observation experimentation interviewing surveys are questionnaires content analysis methods of collecting secondary data Tools and techniques	6 Hours
<b>Unit 4: Hypotheses Testing:</b>	
Meaning of hypothesis and reason for developing hypothesis null and alternative hypothesis hypothesis framing Type 1 and type 2 error level of significance procedure for hypothesis testing power of testing limitation of the test of hypothesis	
<b>Unit 5: Interpretation and Report Writing:</b>	
Meaning of interpretation techniques of interpretation report writing and its significance process of report writing layout of the Research report types of reports.	
<b>References:</b>

<b>Paper Code and Name</b>	<b>PH63T102 CONTEMPORARY ISSUES IN BUSINESS RESEARCH</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO1	Identify relative advantages of alternative data source.
CO 2	Design effective means of measuring event performance.
CO 3	Design the effective methods of measuring operating performance.
CO 4	Develop intellectual abilities of incorporating econometric models in business research.
CO 5	Optimise the use of alternative econometric test to enhance the quality of research reports.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 64)</b>
<b>Unit 1: Introduction:</b>	
Meaning , nature and managerial value or business research, applied and basic business research, types of business research -explorative, descriptive, causal. experiments, Stages In the business research; contemporary research issues in business - procurement. operations, marketing, HR, finance, Governance. etc Formulation of business research problem	12 Hours
<b>Unit 2: Sources of data in business research:</b>	
Primary sources or Data sampling size of sample and response rate types of sampling techniques sampling error case studies need and significance silent features of effective interview schedule and questionnaire development of interview schedule and questionnaires rating scale field studies types of secondary data time series data cross section data longitudinal of micro panel data sources of secondary data internet government Agencies International Agencies private organisation or an individual accuracy of data measurement scale of variables ratio scale interval scale ordinal scale nominal scale	8 Hours
<b>Unit 3: Financial Analysis Tools:</b>	
Financial data adjustment development of trends and percentage as common size and comparative financial statements nature and classifications of financial ratios measuring operating performance return on cash adjustment acids return on sales return on market value of assets cash flow return on assets use of percentage change to detect at normal operating performance I am adjustment and inflationary adjustment ratio DU point analysis, Measurement of financial productivity ratio analysis in service sector banks spread analysis and car Carmel analysis ratio analysis in insurance power transportation hospitals educational institutions detecting abnormal operational performance	6 Hours
<b>Unit 4: Event Study Methodology :-</b>	
Concept and Significance of event studies; announcement and estimation period, model specification and computation of stock returns in the short run; detecting long run abnormal stock returns-long run CAR, Three factor model and	

BHAR model; control-" approach, calendar time approach; scope and intercept estimation; AAR and CAR testing significance; standardised AA (SAR)	
<b>Unit 5: Basics of Econometrics :</b>	
Meaning and importance of Econometrics; types of econometrics; methodology of econometrics; application of regression analysis to business research - some basic ideas of two-variable and three-variable models; multiple regression analysis - meaning and its assumptions; meaning of dummy variable, multi-collinearity, heteroscedasticity and autocorrelation; panel data regression models

&  
Chairman

02. Dr. Dinesh J. Narayankar  
M. A., M.Phil., Ph.D. (LL.B (Spl))

Assistant Professor

03. Dr. Tanushri N. Anchan  
Ph.D.

Assistant Professor

M.A.,

## Course: Post Graduation in Criminology and Forensic Science

**Objectives of the Course:** The course is designed to acquaint students with the nature of Crime and its treatment & prevention. In recent years, the concept of crime has undergone considerable change. Sophisticated methods have been designed by unscrupulous members of society to commit crimes.

The perpetrators of crime include persons in high places, public officials, criminal gangs who have come on the scene which indulge in smuggling, illegal human trafficking and drugs, boot legging, book making, child abuse etc., communal disturbances leading to the large scale destruction of life and property have become quite common. These developments have necessitated a re-examination of our pre-conceived notions regarding causes of crime and methods used for its prevention and control.

The course dwells on the methods of punishment and their efficacy and examines several alternatives to imprisonment, like probation, conditional release, parole and communication of sentences.

Further, it would help them to avail all options to inculcate those areas of knowledge in the day-today police work.

Indeed, the need to pursue the constitutional and legally ordained tasks by the police in a systematic and scientific manner is most felt in the area of Crime Investigation and it is here that the police outfits have to put the knowledge and skill of science in the process of gathering evidence towards upholding the rule of law.

There is a great need to infuse amongst them the urge to invoke science in all their role and goal endeavors and to make them realize that application of scientific style is not only the correct and valid procedure besides being simpler and humane. From that desirable angle the theme of the seminar becomes very relevant.

With that noble objective in mind, we thought that it would be proper as well as appropriate that selected cases of investigation where science was full availed and further the variety and sweep of science must be brought to the knowledge of the layman, besides focusing the attention amongst the public the significance of the issue.

Innovative urge coupled by methodical way of analyzing facts and materials available, reconstructing a crime scene has been getting an increasingly firmer and reliable foundation and thus we have the application of science to the enforcement of Rule of Law.

Illustrations and so many other details so provided, it will enthuse especially the investigation personals at various levels in the state to emulate the ideas and inculcate a real and lasting urge to tackle all their crime detecting tasks by applying all available strategies and methods of investigation.

Further, it is also necessary to infuse amongst the common people the awareness of the subject especially with regard to preserving the scene of crime as such a step helps immensely in crime fighting.

Projects are especially designed for students to focuses on the natural phenomenon in the society and alternative means to reciprocate them in proper way.

The objective is to develop among students a greater understanding of social costs of crime and the effective ways of lessening them.

SUMMARY OF THE CREDITS FOR THE COURSE OF MASTER'S IN CRIMINOLOGY AND FORENSIC SCIENCE

KARNATAK UNIVERSITY DHARWAD  
Syllabus of M.A. /M.Sc. in Criminology and Forensic Science

Semester System Course under the Choice Based Credit Scheme (KU-CBCS)

With effect from 2015-16 onwards;

GENERAL REGULATIONS

1. Eligibility condition: students who seek admission to the M.A. /M.Sc degree in Criminology and Forensic Science must possess any degree of this University or any other recognized university as equivalent there to by this university shall be eligible for admission to post-graduate programmes under the K.U.CBCS Scheme, provided they also satisfy the eligibility conditions like percentage of marks etc., as may be prescribed by the university and as per ordinance.
2. The M.A. /M.Sc. Semester under CBCS in Criminology and Forensic Science degree course extends for a period of two years [4-semesters]. There will an examination at the end of the each semester.
3. In order to eligible for the M.A./ M.Sc degree course a candidate has to complete the prescribed semesters under CBCS Study, including theory, practical's, internship/block placement, field work, projects etc for a duration of two years.
4. Medium of instruction shall be English for all the subjects in M.A. / M.Sc Criminology and Forensic Science course.
5. There shall be three categories of courses viz. Compulsory course, Specialization course and Open elective course. Compulsory and Specialization courses are from the P.G. department of Criminology and Forensic Science. The open electives are the courses offered for the other Social Science department students.
6. There shall be internal assessment for each paper of 25 marks for each semester and practical's also.
7. Each compulsory, specialization and elective course will have four credits. At the end of the 4<sup>th</sup> semester student has to undertake project work / dissertation of the fieldwork done.

8. The student shall register for minimum of 22 credits and maximum of 26 credits per semester. The student has to clear the minimum credits per semester.
9. Evaluation of Field-Work and Internship/Block Placement shall be done on the basis of reports submitted by the students, and the receiving supervisor from the faculty allotted to the students, besides the viva-voce examination held at the end of the IIIrd semester.

A maximum of 25 Marks (10+12+3 for tests and attendance) is awarded for Internal Assessment. The concerned faculty supervisor, to whom the students are assigned, shall assess the performance of the students and allot the internal assessment marks for the Field Visit. The remaining 25 Marks shall be allotted to the report submitted regarding the details of the institutions visited.

Completion of an internship with any Criminology or Forensic Science affiliated institution is compulsory. This internship has to be undertaken by the students at the end of M.A/M.Sc II semester [During Vacation]. A detailed report of the internship undertaken along with the certification of the institution the student worked for, should be submitted to the Chairperson of the department which shall carry 25 marks. The intake capacity for the M.A. / M.Sc semester CBCS course is 20 students every year. Enhanced payment seats will be available as per the university rules.

10. The intake capacity for the M.A. / M.Sc semester CBCS course is 20 students every year. Enhanced payment seats (10) will be available as per the university rules.
11. The students shall be considered to have satisfied the requirement of attendance if he/she has attended not less than 75% of total number of classes held till the end of the semester. Each paper shall be taken as a unit for calculating the attendance. Each student will have to sign his/her attendance for every hour of teaching in each paper. The course teacher shall submit monthly attendance report to the Chairman at the end of every month. The Chairman of the Department shall notify the attendance of every student on the notice Board of the Department during the second week of subsequent month. The Chairman of the Department shall send the attendance information to the Registrar from time to time, at the end of every month and end of the every semester, the detailed statement of attendance. In order to encourage regularity in attendance a maximum of three marks shall be awarded to the students as shown below.

Marks for Attendance in each Paper / Course.

Percentage of Attendance	Internal Assessment Marks
Above 90	03 Marks
Above 80 & up to 90	02 Marks
Above 75 & 80	01 Marks

Below 75	No Marks
----------	----------

Note: If the fraction is more than 50, the percentage of attendance shall be rounded off to the next higher number.

If student do not satisfy the requirement attendance of 75% in each paper they shall not be permitted to appear for the semester end examination. Such candidates may seek admission fresh to the given semester  
Evaluation:

Evaluation of the papers will have two components

I) Internal Assessment and II)  
Semester end Examination.

Internal assessment shall consist of two components

Two written tests 10+12 Marks each = 22 Marks

Attendance = 03 Marks

-----

25 Marks

01. Attendance rules for granting semester terms as per the rules of the university.
02. Fees, Application form for admission scholarship, Library and Cultural activities as per rules of the university.

**POST GRADUATE PROGRAMME- CHOICE BASED CREIT SCHEME (CBCS)**  
**M.A. /M.Sc. in Criminology and Forensic Science**  
**Course outline**

<b>PG33</b>	<b>MA/MSc - CRIMINOLOGY &amp; FORENSIC SCIENCE</b>
<b>Programme Specific Outcomes</b>	
After graduating from the programme students can	
PSO 1. identify the key stages of criminology and criminal justice processes, and at each stage, locate the core institutions involved and the key roles performed by those who inhabit them.	
PSO 2. summarize and differentiate the major theories about crime, criminalization, and victimization. Correction and punishments, then apply theories to critically analyze contemporary injustices.	
PSO 3. describe the differences between popular perceptions of criminal justice institutions and the lived realities of victims, criminals, and justice workers, criminogenic needs of offenders correction.	
PSO 4. recognize how social forces affect the perception and pursuit of justice in India and around the world, factors contributing to commission of crime, preventive measures of crime.	
PSO 5. critically assess how power and privilege impact law making and law enforcement, nepotism politicians and people in higher socio economic status.	
PSO 6. use criminological and forensic theories, methods, or investigative techniques to assess patterns of crime, criminalization, and victimization and to establish justification for a course of action.	
PSO 7. through written or oral communication, describe differential impacts on diverse members of society and provide sustained, focused justifications for the value of diversity for a more just society. Determines cause for offences through scientific evaluation of crime.	
PSO 8. Apply the Laboratory skills to participate in the career needs of Forensic community. Become trained in the laboratory skills of different division of Forensic Science. Be able to work with different Research & Development organizations across the world.	
PSO 9. apply collaborative skills, ethical reasoning, analytic skills, research technique and knowledge about crime to address an injustice, and advance causes of justice	
PSO 10. pursue advanced professional training and/or a meaningful justice-related career in law enforcement agencies, private detectives, forensic science laboratory, vigilance department, legal advocacy etc.

PG33T101	SEMESTER - I
CRIMINOLOGY	
Course outcomes	
<p>After successfully completing this course students</p> <p>CO 1. are able to use and understand the subject matter of criminology</p> <p>CO 2. have a general understating regarding evolution of the criminology, criminal law and crime</p> <p>CO 3. are able critically evaluate trends in crime</p> <p>CO 4. have begun to think critically about cause for crime and preventive measures and role of society, family and law endorsement in prevention of criminal activities.</p> <p>CO 5. understand the basic details of various aspects of criminology and criminal justice.</p>	

PG33T101	CRIMINOLOGY
Unit – I: Introduction of Criminology	
a. Definition of criminology: Social, psychological and legal approaches.	
b. Nature & scope of criminology.	
c. Relation with other social sciences.	
d. Relevance of criminology to contemporary society.	
Unit – II: Introduction of Crime	
a. Meaning, Definition & Nature of crime.	
b. Crime in: Ancient, Medieval society & Modern society	

c. Characteristic of Crime; Crime, Sin and Vice
d. Classification of Crime
i. IPC
ii. Statistical
iii. American
iv. British Common Law
Unit – III: Criminal
a. Meaning & Definition
b. Classification
i. Cesare Lombroso
ii. M.J .Sethna
iii. Havelock Ellis
iv. Handerson

c. Types of Criminals- General Idea
i. Professional Criminals
ii. Habitual Criminals
iii. White Collar Criminals
Unit – IV: Crime Trends
a. NCRB and its role
b. Crimes under Special and Local Law
c. Crimes against Person
d. Crimes against Property
e. Crimes against weaker section with special reference to Women and Children
Unit – V: Causes & Prevention of Crime

a. Causes of Crimes
i. Social Causes
ii. Psychological Causes
iii. Economic Causes
iv. Biological Causes
v. Geographical Causes and etc...
b. Prevention of Crimes
i. The role of Family
ii. The role of Society
iii. The role of Police
iv. The role of NGOs
Suggested Readings
1. Ahuja Ram, 2000, Criminology, Rawat Publications, New Delhi.
2. Barns H.E. and Teeters N. K. – New Horizons in Criminology, Prentice Hall of India Pvt. Ltd., New Delhi, 1966

8. Srivatsava S. S. – Criminology and Criminal Administration, Central Law Agency Allahabad, 2002
9. Sutherland Edwin H. and Crassey D.R.– Principles of Criminology, Times of India Press, Bombay, 1965

10. Vadakumchery James – Criminology and Penology, Kairali Book International, Trivandrum, 1983

PG33T102	SEMESTER - I
THEORIES OF CRIME	
Course outcomes	
After successfully completing this course students	
<p>CO 1. are able to understand evolution and functions of schools of criminology and its pioneers.</p> <p>CO 2. will have a general understanding regarding different domains helping criminology to build up theories.</p> <p>CO 3. are able to analyze the role of criminological theories in evaluating crimes</p> <p>CO 4. will have better understanding regarding sociological theories, social process theories and radical approach in critical evaluation of crime.</p> <p>CO 5. gives a detailed background of theoretical evolution of crime and criminal behavior for a better comprehension of current crime prevention and deterrence techniques.</p>	

PG33T102	THEORIES OF CRIME
Unit- I: Pre-classical, Classical, and Neo-classical schools	
a. Pre classical ideas – Demonology.	
b. Classical theories – Ideas of Bentham and Beccaria.	
c. Neo - classical theories – Golly Garaud and Rossi	
Unit –II: Positivism in Criminology	
a. Morphological theories – Cesare Lombroso, Enrico Ferri, Rafael Garafalo.	
b. Biological theories – Family-Genetics. Chromosomes and Genes, Study of twins and family trees-Kallikas, Jukes.	
c. Anthropological theories – Kretschmer Constitution Hooton, Sheldon.	
d. Endocrinological Approaches.	
Unit -III: Sociological Theories	

a. Cartographic School- Adolf Quetlet, Peter Kropotkin.
b. Culture Conflict Theory – Thorsten Sellin.
c. Chicago School of Crime – Ecology of Crime – Social Disorganization, Crime, unemployment Poverty, Broken homes.
d. Social Structure and Anomie theory – Emile Durkhiem, Robert K Merton.
e. Social Learning – Differential Association Theory – EH Sutherland – Differential Opportunity, Differential Identification and White Collar crime
f. Containment Theory – Reckless and Denitz.
Unit -IV: Social Processes Theories
a. Labeling Theory – Edwin Lemert and Becker
b. Shame and Re-integrative Theory – Braithwite.
c. Rational Choice Theory – Cornis& Clarke
d. Routine Activity Theory – Cohen & Felson.
e. Psychological Theories – Psychoanalytical Theories, Personality Theories, Mental Retardation, Psychosis and Psychoneurosis.
Unit - V: Radical Approach
a. Development of Radical Criminology: Meaning, Scope and Relevance.
b. Left Radical View – Richard Quinney, Erickson
c. Critical Criminology – Tailor, Walton and Young.
d. Multi-Factor Approach
Suggested Readings
1. Ahuja Ram, 2000, Criminology, Rawat Publications.
2. Akers, Ronald. L and Sellers. Christine S, 2004 Criminological Theories Introduction, Evaluation and application, Roxbury Pub. Com.

3. Brien, Martin O, 2008, Criminology, Routledge Publishers.

7. Qadri, S.M.A. 2005, Criminology, Eastern Book Company.
8. Schmalleger. Frank, 1999, Criminal Justice today, Prentice Hall, New Jersey.
9. Siegal Larry, J. 2000, Criminology, Wadsworth Thomson Learning.
10. Sutherland E.H., 1968, Principles of Criminology (6th Edition), Times of India Press, Bombay.

PG33T103	SEMESTER - I
FORENSIC SCIENCE	
Course outcomes	
After successfully completing this course students	
<p>CO 1. are able to understand the origin of forensic science as a subject of critical crime analysis. Will understand the different branches been helping hand for forensic science in probing crime.</p> <p>CO 2. will obtain knowledge regarding forensic science laboratories its functions and administration.</p> <p>CO 3. have a general understating regarding different types of body fluids and its medico legal importance. Gain knowledge regarding conclusive evidences like fingerprint and DNA.</p> <p>CO 4. are able to know the specification and difference between counterfeit and genuine currency notes its making process and its examination.</p> <p>CO 5. are able critically evaluate vocal anatomy related to speaker identification in ransom extortion and kidnapping cases.</p>	

## Unit –I: Introduction to Forensic Science

- a. Meaning, Definition, Scope, History and Development of Forensic Science.
- b. Pioneers in Forensic Science & their Contribution to the field of Forensic Science.
- c. Principles, Methods and Various Sections of Forensic Science Laboratory like,
- d. Forensic, Toxicology, Serology, Finger Print, Arson and Explosion,
- e. DNA Test, Document Analysis and Voice Examination a brief Explanation.
- f. State and Central Forensic Science Laboratories.

## Unit –II: Medico-Legal Importance of Body Fluids &amp; Hair Etc.

- a. Blood, Semen, Saliva and their tests.
- b. Inheritance of Blood Group and DNA tests.
- c. Identification and Traces of Human Hair and Structure.
- d. Identification and Traces of Animal Hair and Structure.
- e. Identification and Traces of Fiber, Paint, Soil, Cigarette and Beedi.

## Unit –III: Finger Print&amp; Foot Print

- a. History, Meaning and Develop of Finger Prints.
- b. Patterns, Ridges and Characteristics of Finger Prints and its Importance.
- c. Primary and Single Digit Classification, Counting and its Importance.
- d. Developing, Lifting, Comparison and Identification of Chance and Latent Finger Prints.
- e. Developing, Lifting, Comparison of Foot Print, Track Prints, Walking Picture, Surface and Sunken Foot Prints.
- f. Trace Marks, Skid Marks, Development, Lifting and Comparison.

## Unit –IV: Counterfeit Currency Notes

- a. Bank Note Printing : Lithography, Intaglio, Letterpress

b. Security features of Currency Notes
i. Substrate features      ii. Design features
iii. Ink features                  iv. Shiny features
c. Counterfeit Methods : Individual Working Method and Half Tone Technique
d. Examining Counterfeit Notes
i. Paper Examination
ii. Print Quality and Color
iii. Feature checks and Security marks
iv. Process to Detect Fake notes.
Unit –V: Speaker identification and Tape Authentication
a. Voice production theory- vocal anatomy, Speech signal processing & pattern recognition- basic factors of sound in speech, acoustic characteristics of speech signal,
b. Fourier analysis, frequency & time domain representation of speech signal, analogue to digital signal and conversion,
c. Fast Fourier transform, quantization, digitization and speech enhancement, analysis of audio-video signal for authenticity, Introduction to the techniques of pattern recognition and comparison
Suggested readings
1. Ashok. M, Naya Vignana Mattu Police Vignana. ( Kannada)
2. Brenner, John C, 2000, Forensic Science, An Illustrated Dictionary, CRC Press, USA.
3. Handbook of Forensic Science, Karnataka Police Academy.
4. Mordby, J Deed Reckoning – The Art of Forensic science Detection, CRC Press LLC, Boca Raton FL, CRC Press (2000)
5. Nabar, B. S. Forensic Science, (2000)
6. Nanda B. B, 2001, Forensic Science in India, Select Publishers, New Delhi.

7. Saferstein: Criminalistics – An Introduction to Forensic Science, Prentice hall Inc. USA 91995)
8. Sharma B R: Forensic Science in Criminal Investigation and trials. (2010)
9. Sharma, B. R. 1990, Forensic Science in Criminal Investigation and Trials, Central Law Agency, Allahabad.
10. Sharma, J. D., 1988, Forensic Science and Toxicology, Lawyers Home, Indore.

PG33T104	SEMESTER - I
RESEARCH METHODOLOGY	
Course outcomes	
After successfully completing this course students	
CO 1. are able to use and understand meaning and characteristics of criminological research. Including steps involving in underrating research.	
CO 2. have a general understating regarding types of research methods, formation of hypothesis and research design.	
CO 3. are able critically evaluate hypothesis testing and sample selection.	
CO 4. have begun to think critically about research report writing purpose and characteristics of a research report and research methodology.	
CO 5. are trained in managing research and analysis.	

PG33T104	RESEARCH METHODOLOGY
Unit – I: Introduction	
a. Meaning, Definitions, Nature, Scope, Characteristics, Purpose and Summary of Research	
b. Major Steps in Social Research	
c. Motivating factors of Social Research	
d. Natural and Social Science Assumptions	
e. Difficulties in the way of Social Research	
Unit –II: Scientific Attitude and Theory Formation	
a. Meaning and Definitions	
b. Theory Formation:	
i. Utility of Theory	
ii. Formation of Research Problems, Selecting of Topic, Place etc.	
iii. Inductive and Deductive Reasoning Theory	

c. Types of Research Methods
d. Types of Social Research Studies
Unit – III: Hypotheses and Research Design
a. Hypotheses: Meaning, Definitions, Importance, Characteristics, Types and Sources of Hypotheses
b. Difficulties in formulation of Hypotheses
c. Test of Hypotheses
d. Research Design: Introduction, Meaning, and Definitions
e. Types of Research Design
Unit – IV: Sampling
a. Meaning, Definitions, Importance of Sampling
b. Types of Sampling: Probability or Random Sampling and Non Probability Sampling, Precaution Sampling,
c. Advantages and Disadvantages of Sampling Methods
d. Characteristics of good sample
e. Merits and Demerits of Random Sampling Method
Unit – V: Report writing
a. Social Research Report Preparation
b. Purpose of the Report/Major Steps
c. Definitions, Contents of a Report
d. Characteristics of good Report
e. Types of Report Writing
f. Precautions, Conclusion
Suggested Readings

1. Bailey Carol A. 1996, A Guide to Field Research, Pine Forge Press, California.
2. Choudhary, C.M. 1998, Research Methodology, Sublime Publications, Jaipur
3. Coolican, Hugh, 1990, Research Methods and statics in Psychology, Hodder & Stoughton, London.

PG33T105	SEMESTER - I
CRIMINAL JUSTICE SYSTEM& JUVENILE JUSTICE SYSTEM	
Course outcomes	
After successfully completing this course students	
<p>CO 1. are able to understand the evolution and types of criminal justice system</p> <p>CO 2. have a general understating regarding police administration, its hierarchy and objectives.</p> <p>CO 3. are able critically evaluate the functions of judicial system, correctional administration, prosecution and procedures of policy making.</p> <p>CO 4. Have better understating regarding juvenile justice system acts related to its functions, authorities for juvenile administration.</p> <p>CO 5. have begun to think critically about cause for youth deviance, alienation of youth and preventive measures for youth crime and recent trend in youth crime.</p>	

PG33T105 CRIMINAL JUSTICE SYSTEM& JUVENILE JUSTICE SYSTEM
Unit -I: Introduction to Criminal Justice System
a. Criminal Justice System: Meaning, Purpose and Social Relevance
b. Legislative Process and Criminal Justice System.
c. Historical Evolution – Overview of Criminal Justice Sectors National and International Perspective.
d. Accusatorial and Inquisitorial Systems of Criminal Justice System.
e. Co-ordination in Criminal Justice System.
Unit -II: Police System
a. Organization set up of Indian Police in Modern Society
b. Objective of Police System.
i. Maintenance of Law and Order
ii. Investigation of Crimes

iii. Protection of Life
iv. Production of Property Rights
v. Prevention of Crime
c. Functions of Police Organizations interface with the community, Executive, prosecution and judiciary. Police Image.

Unit -III: Judicial System & Prosecution System
a. Importance of judicial system in modern society.
b. Judicial Administration in India. Presiding Officer, Prosecutor and Defense Counsel.
c. Salient Feature of India Judicial System: Independence, Public and Fair Trial.
d. Fundamental Elements in Judicial Functioning: Due Process, Speedy Trials and Access to Justice.
e. Meaning, Purpose and Relevance of Prosecution
f. Prosecution Organization in the States
g. Relationship between Police and Prosecution
h. Prosecution in Lower Court and Prosecution in Appellate Court.
Unit -IV: Correctional System
a. Historical Development of Prison
b. Objectives of Imprisonment
c. Types of Prisons
d. Prison Organization in India
e. Modernization of Prisons
Unit -V: Juvenile Justice System& Children in need of Care and Protection
a. Salient features of JJ Act 2000 and Amended Act 2006. Model rules.
b. CWCs and JJBs

c. Institutions for Juveniles/children
d. The role of police with reference to children – SJPU, Child Welfare Officer.
e. Street Children & Child Labor
f. Child Abuse-physical, Psychological and Sexual
g. Child Trafficking & Children in Disturbed Areas-Identity, Livelihood
h. POCSO – Prevention of Children from Sexual Offences Act
Unit- VI: Children in Conflict with Law
a. Youth Deviance-Recent Trends-Pornography, MMS, Date Rapes, Ragging and Sexual Harassment.
b. Youth Violence-State Response-State Violence
c. Juvenile Gangs, Status Offence
d. Youth Alienation and Crimes
Suggested Readings
1. Ahuja Ram, 2000, Criminology, Rawat Publications, Delhi.
2. Albanese Jay S. 2000, Criminal Justice Allyn and Bacon.
3. Banerjee. D, 2005, Central Police Organizations Part I and Part II, Allied Publishers Pvt. Ltd.

PG33P106	SEMESTER - I
LAB BASED PRACTICALS- FORENSIC SCIENCE	
Course outcomes	
After successfully completing this course students	
<p>CO 1. are able to use and understand the practical application of forensic science in criminal investigation.</p> <p>CO 2. have a general understating regarding fingerprints, footprints and its types and classification and analytical methods.</p> <p>CO 3. are able evaluate the questioned documents and glass fracture examination methods in crime investigation.</p> <p>CO 4. have better understating regarding examination of currency notes, and methods of hair and fibers identification.</p> <p>CO 5. have begun to think critically about preliminary and confirmatory examination of blood sample and acquire knowledge about blood grouping.</p>	

PG33P106	LAB BASED PRACTICALS- FORENSIC SCIENCE
Simulated Crime Scene Exercise on:	
1. Finger Prints: Henry's Primary, Secondary, Sub-Secondary and Final Classification. Development of latent finger prints, Lifting, Preservation and Comparison of finger prints.	
2. Lifting and tracing footprints.	
3. Examination of Questioned Documents and Identification of Handwriting and Typescripts.	
4. Examination of Glass Fracture & tool marks	
5. Physical and instrumental examination of currency notes & coins.	
6. Morphological Examination of Hair and Fiber.	
7. Identification of Human and Animal Hair.	
8. Blood Test: Benzedine, Phenolphthalein, Haemin Crystal Test, Microscopic and Blood Grouping.	

*Evaluation of Practical Journal
** Viva-Voce

PG33T201	SEMESTER - II
CONTEMPORARY CRIMES	
Course outcomes	
After successfully completing this course students	
CO 1. are able to and understand the tends and types of economic crimes, organized crimes and its farms.	
CO 2. have a general understating regarding legislation for organized crimes, types of terrorism and its causes.	
CO 3. are able evaluate the effects of terrorism on society, acquire knowledge regarding cybercrime its nature and types.	
CO 4. have better understating regarding preventive measures of cybercrimes, and IT acts and legislative procedures for cyber criminals.	
CO 5. have begun to think critically about environmental crimes wild life protection and prosecution of criminals, and the role of police & public in prevention of contemporary crimes.	

PG33T201	CONTEMPORARY CRIMES
Unit – I: Economic Crimes	
a. Nature, Meaning and Forms	
b. Tax-Evasion	
c. Accounting Fraud & Money laundering	
d. Misbranding and Adulteration	
e. Corruption & Bribery	
f. NDPS Act	
Unit – II: Organized Crimes	

a. Meaning, definition, nature and forms of Organized Crime
b. Organized crime Syndicates.
c. Investigation prosecution and punishment of organized crime offenders
d. Relevant Legislations
Unit – III: Terrorism
a. Concept, Nature and Forms of Terrorism and Hijacking
b. Causes of Terrorism
c. Investigation, prosecution and punishment under Anti-Terrorism laws.
d. National and International linkages of Terrorism
Unit – IV: Cyber Criminology
a. Concept, Nature and Types of Cyber Crimes
b. Software Piracy
c. Cyber Attack, Identity Theft, Internet Fraud, Hacking, Spam, Cyber Terrorism: Technical and Legal aspects.
d. Prevention Strategies: Cyber Security, Awareness Generation, Detection, Reporting
e. Legal Measures: Prosecution and Sentencing
Unit – V: Environmental Crimes
a. Nature, Significance and Forms
b. Offence under Wild Life (Protection) Act.
c. Offence under Environment (Protection) Act.
d. Social and Legal Measures for Controlling Crime.
e. Green Bench
Suggested Readings
1. Chinnard, Marshall B, 1983, Corporate Ethics and crime, Sage Publications.

9. Padhy, Prafullah, 2006, Organized Crime, Isha Books, Delhi.
10. Paranjapa NV, 2001, Criminology and Penology 2nd edition, Central Law Publication Allahabad.

PG33T202	SEMESTER - II
POLICE ADMINISTRATION & POLICE SCIENCE	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand the historical development of police, its role in contemporary India. CO 2. have a general understating regarding organization and hierarchy of police department. CO 3. are able appraise the training process and acts related to police administration, CO 4. have better understating regarding police investigation, procedures and powers of police. CO 5. have begun to think critically about police image, public opinion on police administration , community policing and the measures for easy administration of police.	

## Unit –I: Police Administration

- a. History of Police and Policing in Modern India
- b. Role of Police in Independent India
- c. Constitutional provisions regarding police in India

## Unit - II: Organization and Structure of Police

- a. Types of Police Organization
  - i. State Police
  - ii. Civil Police
  - iii. Armed and other branches
  - iv. District Police
  - v. Police Station
- b. Crime record statistics (State level and National level)
- c. International Co-operation in Police
- d. International Criminal Police Organization
- e. Police in Police Stations

f. Investigation under letter rogatory

g. Central Police Organizations

h. Police Reforms and Modernization

## Unit - III: Training and Orientation

- a. Recruitment and Training of Police
  - i. Police Act of 1861 – Recent State enactments
  - ii. Police Reforms in Independent India since 3rd National Police Commission
- b. Recommendations (NPC), 1979.

i. State Police Reform Commission
ii. National Police Commission Report : Dharma Vira
iii. Police Report in 1990s Riberio Committee Report,
iv. Padmanabaiah Committee Report,
v. NH Vohra Committee Report PIL by Sh. Prakash Singh (Ex DGP, BSF)
vi. Police establishment Board.
Unit - IV: Police Investigation: Procedures and Function
a. Recording of F.I.R, Case Diary, Charge Sheet and Dying Declaration.
b. Executive powers and duties of police officers in the investigation of crime
c. Inspection of Scene of crime, Sketching, Collection, Preservation and Transportation of Physical Clues to Expert.
d. Investigation of crimes and relations with Courts/Magistrate Specialties of Investigation.
i. Homicides
ii. Property Offences
iii. Crimes against women
iv. Economic Offences
v. Communal violence
vi. Custodial violence
e. Use of technology in crime investigation.
f. Citizen's rights during investigation.
Unit - V: Police Image
a. Dimensions of Police accountability in India
i. Courts
ii. Executive Magistrates
iii. State Government
iv. CAO

v. Citizens/Community
b. Police public relations in India and abroad
i. Peace Committee
ii. Village Police system
iii. Koban (Japan)
iv. Police Board (UK)
v. Sheriff (USA mode)
c. Participation of public in crime prevention
d. Programmes for redressal of Public grievances.
Suggested Readings

PG33T203	SEMESTER - II
FORENSIC MEDICINE & TOXICOLOGY	
Course outcomes	
After successfully completing this course students	
<p>CO 1. are able to understand and use the knowledge of forensic medicine , its legal importance.</p> <p>CO 2. have a general understating of wounds, injuries, types of death and its medico legal importance's.</p> <p>CO 3. are able appraise the types of poisons and roots of administering poison.</p> <p>CO 4. have better understating regarding effects of poisoning, function and fatal dose of poisons.</p> <p>CO 5. have begun to think critically about forensic medicine and toxicology in apprehension of criminal, investigation and evaluation methods.</p>	

PG33T203	FORENSIC MEDICINE & TOXICOLOGY
Unit - I: Forensic Medicine	
a. Meaning, Definition, Nature and Scope.	
b. Inquest Coroners, Magistrate and Police.	
i. Identification of Dead and Living Person.	
ii. Medico-Legal Autopsy.	
iii. Identification of Decomposed and Mutilated Bodies.	
iv. Super Imposition.	
Unit – II : Medico-Legal Importance of Wounds, Injuries and Death	
a. Types, Modes and Signs of Death.	

i. Medico-Legal Importance of Death.
ii. Medico-Legal Importance of Violent Deaths.
b. Wounds and Injuries, Meaning, Types
i. Medico-Legal Importance of Wounds and Injuries.
ii. Defense Wounds.
iii. Wounds and Injuries in Rape Cases.
c. Abortion and Infanticide, Meaning, Causes and Classification.
d. Determination of Age, Sex and Height through Bones.

e. Medico-Legal Laboratory Services.
Unit – III: Taxonomy of Poisons
a. Meaning, Definition, Nature, Scope, Medico-Legal Importance of Toxicology.
b. Classification of Poisons.
i. Corrosives ii. Irritants
iii. Inorganic iv. Mechanical
v. Organic vi. Neurotics, etc...
Unit – IV: Medico-Legal Importance of poisons
a. Routes of Administration and Elimination.
b. Actions of Poisons.
c. Factors Modifying the Actions of Poisons.
d. Evidence of Poisoning.
e. Antidotes and Stomach Wash Tube.
f. Isolation, Identification and Estimation of Poison from Viscera.
Unit – V: Function and Fatal Dose of Poisons
a. Characteristics of Poison, Fatal Dose, Fatal Period.

b. Post-Mortem Appearance and Analysis of the Following Poison (Autopsy Examination).	
i. Arsenic	ii. Opium
iii. Bhang	iv. Potassium Cyanide
v. Endrine	vi. Strychnous NuxYomica
vii. Snake Poison	viii. Pesticide
Suggested Readings

PG33T204	SEMESTER - II
STATISTICAL METHODS	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand and use the knowledge of statistics in crime evaluation and criminological research. CO 2. have a general understanding of methods of data collection and interpretation of data. CO 3. are able to comprehend measures of central tendency and dispersion. CO 4. have better understanding regarding correlation, hypothesis and regression. CO 5. have begun to think critically about statistical methods in criminal investigation and case analysis, hypothesis testing and its importance.	

PG33T204	STATISTICAL METHODS
Unit – I: Introduction: Statistics and Data Collection	
a. Definition, Meaning and Scope	
b. Observation: Controlled Observation	
c. Simple / Un-Controlled Observation	
d. Participant Observation and Non Participant Observation	
e. Merits and De-Merits of Observation	
Unit – II: Methods of Data Collection	
a. Questionnaire Method: Definitions, Objectives, and Types	
b. Merits and De-Merits of Questionnaire Method	
c. Interview Method: Definition, Types, Limitations, Characteristics,	
d. Merits and De-Merits of Interview Method	
e. Case Study Method: Characteristics, Sources of Information	
Unit – III: Interpretation	

a. Meaning of Interpretation, Technical Interpretation,
b. Data: Finding, Classification, Codification, Tabulation and Generalization
c. Tabulation of Grouped and Un-Grouped Data
d. Measures of Central Tendency: Mean, Median and Mode
e. Examples
Unit – IV: Measurement and Rating Scales
a. Meaning, Definitions, Importance and Purposes of Scaling
b. Measures of Dispersion: Mean Deviation and Standard Deviation
c. Measures of Dispersion: Quartile Deviation and Range
d. Measures of Dispersion: Co-efficient Range
e. Examples
Unit – V: Correlation, Regression and Hypothesis Testing
a. Karl Pearson's Correlation Co-efficient Range
b. Rank Correlation and Regression
c. Scatter Diagram and Chi-Square Test
d. Hypotheses Testing: t-Test and z-Test
e. Examples

PG33P205	SEMESTER - II
LAB BASED PRACTICALS - POLICE SCIENCE	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand and use the knowledge of police science in criminal investigation. CO 2. have a general understanding of FIR making, handling, packing of evidence, preservation of evidence and forwarding for examination. CO 3. are able to comprehend case study of homicide, house breaking, accidental death. CO 4. have better understanding regarding IQ test, perception and test of attention. CO 5. have begun to think critically about importance of collection and preservation of evidences, general guidelines for crime scene evaluation.	

PG33P205	LAB BASED PRACTICALS-POLICE SCIENCE
1. Police Science: FIR, Scene of Crime, Search, Panchnama, Inspection, Sketching, Report Writing, Photographing, Evaluation of Evidence, Physical Clues, Reconstruction of Scene of Crime; Handling, Packing and Forwarding the Physical clues to concern expert.	

2. Case Studies: Murder/ Homicide, Theft, House Breaking, Scene of Traffic Accident, Poisoning Cases, Accidental Deaths and Injuries Cases.
3. Psychological Practical: Sensation, Perception, Attention, Illusions, Memory, Imagination and I.Q. Assessment.
4. Collection and Preservation of Evidence:
o General guidelines for lifting of crime scene exhibits.
o Photography and sketching of crime scene.
o Collection of evidence in case of rape and murder.
o Collection of clues in Hit & run accident case including marking of skidmarks and other examinations.
o Cases involving firearms
*Evaluation of Practical Journal

PG33T206O	SEMESTER - II
INTRODUCTION TO POLICE SCIENCE (Open Elective Course)	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand and use the knowledge of police science in criminal investigation. CO 2. have a general understanding of organization and hierarchy of police department. CO 3. are able to comprehend powers and functions of police in crime investigation, evidence analysis and evaluation. CO 4. have begun to think critically about importance of crime investigation and measures used in prevention of crime. CO 5. students interested in working for police departments receive a complete understanding of the functioning and administration of policing.	

PG33T2060	INTRODUCTION TO POLICE SCIENCE (Open Elective Course)
Unit - I: Introduction to Police Administration	
a. Meaning and Concept of the Police	
b. History of Police Administration	
c. Development of Police System	
d. Recruitment and Training of Police Personal	
e. Karnataka Police Act-1963	
Unit - II: Organization Set-up of Police	
a. Central Police System	
b. State Police System	
c. Special Investigation Wings CBI, Interpol, COD Etc.	
d. Lokayukta	
Unit - III: Police Station and its work	
a. Recording of F.I.R. Case –Diary, Dying declaration	
b. Charge Sheet	
c. Town and Rural Police System	
d. Traffic Police	
e. Women Police	
Unit - IV: Investigation of Crime	
a. Scene of Crime-Meaning, Types and Procedure	
b. Physical clues-Meaning and Importance	
c. Investigation of Cognizable and Non-cognizable offences	
i. Murder, Rape ,Robbery, Dacoity	

ii. Investigation of Traffic Accidents
iii. 3 I's of Investigation
Unit – V: Prevention of Crime
a. Beat, Patrolling and Surveillance its Meaning and Importance
b. Community Policing
c. Importance of 144 Section of Cr.P.C.
Suggested Readings

FORENSIC PSYCHOLOGY	
Course outcomes	
After successfully completing this course students	
<p>CO 1. are able to understand and use the knowledge of domestic violence, its characteristics and witness protection in forensic psychological view point.</p> <p>CO 2. have a general understanding of professional practice, forensic consultancy and supervision, the use of cognitive interviewing techniques in criminal investigation.</p> <p>CO 3. are able to comprehend cases related to suicide and aggression , preventive measures and risk assessment.</p> <p>CO 4. have begun to think critically about application of forensic psychology in crime investigation &amp; courtroom, narco-analysis and brain fingerprinting in providing justice and extracting truth, diagnosing and treating sexual offenders.</p> <p>CO 5. students interested in working as consultants in policing, court trails are supported through this course.</p>	

PG33T301	FORENSIC PSYCHOLOGY
Unit -I: Psychology and Legal System	
a. Definitions of crime,	
b. Defining Forensic Psychology,	
c. Psychology and the legal process interaction,	
d. Fundamental distinction between psychology and law,	
e. Functioning of Domestic courts,	
f. Family law issues, custody & adoption,	
g. Domestic violence charter and witness protection.	
Unit –II: Professional Practice	
a. Forensic Consultancy and Supervision	

b. The psychologist as a consultant
c. Core competences
d. Roles and application to forensic settings
e. Conducting investigations
f. The use of cognitive interviewing techniques Communicating effectively
g. Presenting evidence and providing feedback

h. Consultancy in practice: Demonstrating the consultancy skills needed using the Negotiation Adviser role as an illustration
Unit - III: Forensic Risk Assessment
a. Introduction to risk assessment,
b. Definition, methodology;
c. Risk assessment of suicides,
d. Risk assessment of violence.
Unit –IV: Application of Psychology in Investigation & Courtroom
e. Child witness in court,
f. Giving of expert testimony,
g. Eyewitness testimony,
h. Forensic lie detection,
i. Narcoanalysis and Brain Fingerprinting,
j. Interviewing techniques,
k. Offender profiling.
Unit -V: Violent and Sexual offenders: Intervention
a. Effective treatment approaches for offenders across the lifespan.
b. Interventions: Punishment, diversions, and alternative routes to crime prevention.

c. Psychotherapy with criminal offenders.
d. Diagnosing and treating sexual offenders.

PG33T302	SEMESTER - III
CRIME AGAINST WOMEN & CHILDREN	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand status of women and trends in crime against women in present scenario. CO 2. have a general understanding of different type of crimes against women. CO 3. are able to comprehend laws related to women protection, crime against children, abuses and trafficking. CO 4. have begun to think critically about children legal provisions, and preventive measures for crime against children and women. CO 5. the course provides information and training regarding support and assistance to sufferers of crime against women and children.	

PG33T302	CRIME AGAINST WOMEN & CHILDREN
Unit -I: Introduction to Crime against Women & Children	
a. Status of Women under Indian context	
b. Current crime trend against women in India and across the globe.	
c. Current crime trend against children in India and across the globe.	
d. Antecedents of crimes against women.	
e. Causes of crimes against children.	
Unit -II: Crime against Women	
a. Social crimes against women – Female feticide& infanticide, Child marriage, Dowry, Sati, Domestic violence, illegal termination of pregnancy, Acid Attacks	
b. Sexual offences against women – Rape, molestation, incest, sexual harassment at work, Pornography	
c. Other Offences – Illegal trafficking, forced prostitution, stalking, Kidnapping & abduction.	
Unit -III: Social Legislations relating to Women	

a. Maternal Termination Pregnancy Act, Prenatal Diagnostic Law.
b. Prevention of Commission of Sati Act, Prevention of Immoral Trafficking Act.
c. Dowry Prohibition Act, Prohibition of Indecent representation of women.
d. The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013
e. Protection of Women from Domestic Violence Act, 2005 and Women-Related Legislations
Unit -IV: Issues of Children in India
a. Abuse – Physical, Emotional, Psychological and Sexual Abuse
b. Labor & Street Offences – Begging, forceful labor on streets and other industries, institutions, drug pedaling and boot legging etc.
c. Trafficking, forced prostitution and engaging in child pornography.
Unit -V: Legal Provisions for Children
a. Juvenile Justice Care and Protection ACT (JJACT)
b. POCSO
c. Role of Governmental and Non-governmental Organizations
d. Role of Criminal Justice System in Prevention of Crime against children

PENOLOGY & CORRECTIONAL ADMINISTRATION	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand forms of punishment, historical development of penology and theories based on punishment. CO 2. have a general understanding of different type prisons, prison administration and concepts of reformation. CO 3. are able to comprehend correctional laws, types of correctional institutions and judicial provisions. CO 4. have begun to think critically about non institutional treatment of inmates, the role of prison and society in correction of inmates. CO 5. it trains the learners and equips them in connecting the prison functioning of the past to the present for improvisation.	

PG33T303	PENOLOGY & CORRECTIONAL ADMINISTRATION
Unit – I: Introduction to Penology & Correctional Administration	
a. Meaning, Definition & Scope of Penology	

b. Development of Correctional Administration
c. Nature, meaning and importance of punishment
d. Forms of punishment in ancient, medieval and modern times
e. Theories of punishment
Unit -II: Prison System
a. Meaning & Definition of prison
b. Prisons in ancient, medieval and modern times
c. Types of prisoners
d. Prison Reforms : Role of inquiry committees and commissions
e. Prison administration
Unit – III: Prison Legislations
a. History and evolution of prison legislations in India
b. Prisons Act.
c. Prisoners Act : Transfer of Prisoners Act
d. Jail Manuals
Unit – IV: Institutionalized form of Treatment
a. Meaning and purpose
b. Types of Institutions
c. Adult institutions
i. Juvenile institutions
ii. Children’s homes
iii. Open institutions
d. Correctional programmes, counseling and psychological services
e. Vocational training and work programme : Classification

i. Educational and literacy
ii. Religious sessions
iii. Therapeutic treatment
iv. Games, recreation and other
f. Remission, temporary release, pre-mature release and after care services.
g. Role of NGO's
Unit - V: Non Institutional Form of Treatment
a. Meaning, purpose and importance
b. Types of non-institutional treatment
c. Probation, meaning, scope and legal provisions under probation of offenders Act and other laws.
d. Parole, meaning scope and legal provisions
e. After care and rehabilitation services
f. Role of NGO's in supervision and rehabilitation
g. Difference between institutional and non-institutional form of treatment.

PG33T304	SEMESTER - III
FORENSIC DOCUMENTS	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand and use the knowledge of forensic document in analyzing questioned documents, its application, classification and types of examination.	
CO 2. have a general understanding of various types of documents and its general - individual characteristics and procedure in handling forgery cases.	
CO 3. are able to comprehend examination of type writers and procedures used, examination process of security documents, analyzing its nature and features.	
CO 4. have begun to think critically about advancements in forensic document examination recent trend and techniques used.	
CO 5. The role of forensic document examiner in providing acceptable report of document analysis.	

PG33T304	FORENSIC DOCUMENTS
Unit - I: Document Examination –Introduction &Overview	
a. Scope & application in Crime Investigation	
b. Various Indian Laws with reference to Indian Penal Code & Indian Evidence Act.	
c. Nature & Problems of Forensic Document Examination.	
d. Preservation, Packing & Marking of Documents.	
e. Development & Classification of Handwritings and Classification of Forensic Documents.	

Unit - II: Principles of Handwriting Examination
a. Various writing features, terminologies, definitions, general characteristics, individual characteristics of handwriting.
b. Variations- Natural & disguised, Principles of handwriting identifications, comparison process.
c. Preliminary examination of documents, effect of age, illness, posture, emotions, Ink analysis and writing instrument on handwriting.
Unit - III: Document Forgery & Alterations
a. Examination of signatures & built up document. Identification of writer of forged writings /signatures.

b. Importance of tremors in identification.
c. Examination and identification of anonymous letter and its writer.
d. Detection & decipherment of alterations & erasures including additions, overwriting, obliterations.

Unit - IV: Mechanical Impressions & Security Documents
a. Examination of type writings and their identification, working, examination of manual, cheque writers, identification of typist of manual type writers
b. Examination of security docs including currency notes, travel documents, passports, visas. Identity cards, different types of security features and their examination including water marks and security printing.

Unit – V: Advances in Documents Examination & Quality Assurances
a. Advances in Forensic Document Examination, Introduction to Computer Forensics, edocument and digital signatures.
b. Final examination and report writing, opinion writing and writing of reasons for opinion, Importance of no opinion or qualified opinions
c. Marking of photographs and their presentation, Preparation of juxtapose charts in support of reasons and Case Studies.

PG33F305V	SEMESTER - III
FIELD VISITS – LOCAL INSTITUTIONS VISITS	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand and use the real life experience of different correctional institutions. CO 2. have a general understanding of juvenile institutions and committees with its powers, types of prisons and its functions, judicial institutions its power and functions, special units of police and its functions. CO 3. are able to comprehend the role of all correctional, judicial and juvenile institutions in reformation of offenders. CO 4. have begun to think critically about the practical reality of the administration of institutions and get exposure to actual functions of correctional institution. CO 5. could able to have knowledge regarding administration and hierarchy of institutions.	

## UNIT-I

- 1) Visit to Prison Institution
- 2) Visit to Sate Home for Men
- 3) Visit to Sate Home for Women.
- 4) Visit to Observation Home.

## UNIT-II

- 1) Child welfare Committee
- 2) Visit to Juvenile Home (Recreation)
- 3) Visit to Juvenile justice Board
- 4) Visit to Juvenile Special Home.

## UNIT-III

- 1) Visit to Court Proceeding
- 2) Visit to Civil Court.
- 3) Visit to Criminal Court.
- 4) Visit to Lokayukta Office.

## UNIT-IV

- 1) Visit to Local Police Station
- 2) Visit to S. P. Office.
- 3) Visit to NGOs.

## UNIT-V

- 1) Local Crime Record Bureau.
- 2) Visit to After-Care Services.
- 3) Visit to Hospital for Post-Mortem Cases.

<input type="checkbox"/> Attendance for the visit to all the institutions is compulsory.
<input type="checkbox"/> At the end of the semester the students' are expected to submit a concise report with the details of their experiences and observations on each visit carried out.
<input type="checkbox"/> An internal assessment for 25 Marks shall be conducted during the III <sup>rd</sup> Semester.

PG33F305I	SEMESTER - III
INTERNSHIP/BLOCK PLACEMENT	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand and use the field knowledge pertaining to different concepts in criminology and forensic science. CO 2. have a general understanding of specified concepts students opt for, will get exposure to research methodology used in accomplishing the opted research topic. CO 3. are able to comprehend different methods used for research work, recent trends in criminology and forensic science research. CO 4. have begun to think critically about problems of crime, new and advanced methods could be used in prevention and detection of crime, legal provisions for adopting the outcome of the research in crime investigation. CO 5. have a better interaction with experienced officials and seek specialized guidance.	

PG33F305I	INTERNSHIP/BLOCK PLACEMENT
<input type="checkbox"/> This part of the programme is introduced to enable the students to utilize their vacation between the semesters productively and acquire practical skills on the classroom information provided. This component is to help them have direct hands on experience in the field concerning the related subject area.	

- The students will have to work in institutions like NGOs, Forensic Labs, B.P.R & D., Police Stations, Women and Children Welfare Department, Police Training Centre or other institutions allied with Criminal Justice System (Subject to Permission Procured) during the month of June and July as a part of the Internship Program. The student is expected to work closely with the workers of the institution and record their learning experiences and submit a weekly report to the Department. Towards the end of the IIIrd Semester the students shall have to submit an Internship/Block Placement Report on the institution they were placed in.

- The performance of the students in the program shall be assessed based on the Internship/Placement report they submit (25 Marks) and a Viva-Voce examination (25 Marks) towards the end of the IIIrd Semester by a committee consisting of the Chairperson of the Department and Examiners. The Total Marks allotted to Internship/Block Placement Program shall be 50 Marks.

PG33T306SA	SEMESTER - III
FINGERPRINTS – (specialization)	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand the role fingerprint in crime investigation CO 2. have a general understanding of fingerprint classification, different types of fingerprints and fingerprint recording methods. CO 3. are able to comprehend different methods of development of fingerprints, and forms of ridge characteristics and analysis. CO 4. have begun to think critically about judicial value of fingerprints, importance of fingerprints in identifying culprits. CO 5. training in the updating system of fingerprint analysis.	

PG33T306SA	FINGERPRINTS – (specialization)
Unit-I: Introduction	
a. Meaning, Scope and its Importance of Fingerprints in Criminal Investigation.	
b. Historical Development of Finger Prints.	

c. Individuality of Finger Prints.
Unit-II: Finger Prints Classification System
a. Types of Finger Print Patterns and its Definition.
b. Basic Finger Print Patterns.
c. Classification of Finger Prints, 10 Digits and Single Digits etc.
d. Recording of Finger Prints.
Unit-III: Search, Preservation and Collection of Fingerprints
a. Scene of Crime Prints and Searching
i. Visible Prints
ii. Plastic Prints
iii. Latent Prints
b. Searching of Latent Prints, Their Collection and Preservation.
c. Finger Prints of Deceased Person.
Unit-IV: Methods of Developing Latent Prints
a. Developing of Latent Prints: - Physical Methods and Chemical Methods.
b. Physical Methods and Usage of various Powders.
c. Chemical Methods and Their Types.
d. Other Methods of Finger Print Development
i) Laser Method                      ii) Electronographic Method etc.
Unit-V: Identification and Comparison
a. Types of Ridge Characteristics.
b. Comparison of Chance, Latent Print with Suspect Finger Prints.
c. Ridge Counting System and Matching Points of Ridge Characteristics.
d. Evidential Value of Finger Prints in the Court of Law.

e. Submission of the evidentiary report to the Court of Law.

<b>PG33T306SB</b>	<b>SEMESTER - III</b>
<b>CORPORATE CRIMES</b>	
Course outcomes	
After successfully completing this course students	

- CO 1. are able to understand nature and types of corporate frauds,
- CO 2. have a general understanding of characteristics, trends in corporate frauds.
- CO 3. are able to comprehend fraud in banking sectors, types of insurance frauds.
- CO 4. have begun to think critically about preventive measures, causes of corporate frauds, and effects on economy of the nation.
- CO 5. Training in the current system of corporate frauds and overcoming the same.

PG33T306SB	CORPORATE CRIMES
Unit I– Introduction	
a. Meaning, Definition & Nature of Corporate Frauds	
b. Types of Corporate Frauds	
i. Bankruptcy related Frauds	
ii. Exploiting assets & scams	
iii. Mortgage Frauds	
iv. Share Sale Frauds	
c. Role of Depositories & Role of Clearing Corporation in Corporate Frauds	
Unit II – Corporate Fraud	
a. Meaning & Definition of Fraud	
b. Types of Fraud:- Individual & Corporate	
c. Characteristics of Fraud	
d. Trends of Scams: National & Global Perspective	
Unit III – Fraud in Banking Sector	
a. Definition & Scope of Fraud in Banking Sector	
b. Banking Impersonation	
c. Types of Frauds	
i. Fraud against Accounts	

ii. Fraud against Card (Debit/Credit )
iii. Electronic Fraud
iv. Miscellaneous Fraud
d. Role of Vigilance officer in Prevention of Bank Frauds
e. Role of Investigation in Bank Frauds
Unit IV – Insurance Frauds
a. Definition , Nature & Scope of Insurance
b. Losses due to Insurance Frauds
c. Types of Insurance Frauds
i. Property Insurance
ii. Motor Insurance
iii. Health Insurance
d. Role of Investigation in Insurance Frauds
Unit – V: Prevention of Corporate Crimes
a. Regulation and Supervision
b. Corporate Governance
c. Co-operation with the Private Sector
d. Suspicious Transaction Reporting
Suggested Readings

PG33T307O	SEMESTER - III
FUNDAMENTALS OF FORENSIC SCIENCE (open elective course)	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand nature purpose of forensic science, techniques used in forensic investigation of crime. CO 2. have a general understanding of, types of forensic laboratories, divisions and functions of forensic laboratories, biological and physical evidences, its collection, preservation and forwarding methods. CO 3. are able to cogitate the importance of fingerprints and footprints in crime investigation, procedure involved in analyzing case from available physical evidences. CO 4. have begun to think critically about questioned documents, its importance in establishing relativity to alteration in the documents. CO 5. are trained in crime scene analysis.	

PG33T307O	FUNDAMENTALS OF FORENSIC SCIENCE (open elective course)
Unit- I: Introduction	
a. Definition, nature and purpose of Forensic Science	
b. Functions of the Forensic Science Laboratories	
c. Techniques for investigation of crime	

Unit- II: Divisions of Forensic Science
a. Forensic Chemistry and Toxicology
b. Finger Print, Forensic Ballistics
c. Forensic aspects of arson and explosion
d. DNA Test
e. Documentation Examination
f. Voice Pattern Analysis
Unit -III: Body Fluids
a. Blood, semen, Saliva and its importance
b. Importance of blood grouping
c. Importance of DNA
d. Collecting, Preserving & Forwarding of Physical Clues to Forensic Laboratories
Unit- IV: Finger Prints & Footprint
a. Meaning, Importance and development, Classification of Finger print
b. Ridge Characteristics and its importance
c. Importance of Lifting and Comparison of Finger Prints
d. Foot Print : Lifting, Comparison, & Classification
Unit – V: Questioned Documents
a. Meaning & importance of Questioned Documents
b. Characteristic and Principles of Handwriting
c. Identification of Handwriting
d. Importance of Typescript & their Identification
Suggested Readings

PG33T401	SEMESTER - IV
FORENSIC BALLISTICS	
Course outcomes	
After successfully completing this course students	
<p>CO 1. are able to understand and analyze the knowledge of ballistics in identifying criminal, components of firearms and its fictional aspects.</p> <p>CO 2. have a general understanding of different types of ballistics, ammunitions used, and types propellants and its compositions.</p> <p>CO 3. are able to comprehend forms of ballistics, analytical patterns of ballistics and its effects.</p> <p>CO 4. have begun to think critically about various types of marks produced by firearms, its identification and classification, different investigative techniques used for firearm crime analysis.</p> <p>CO 5. training in study of explosives.</p>	

PG33T401	FORENSIC BALLISTICS
Unit – I Classification & Characteristics of Ballistics	
a. History & Development, classification of firearms	
b. Various components of small arms, different automatic mechanisms used in small firearms.	
c. Projectile, Velocity determination	
d. Identification of Origin	
Unit –II Ammunition & Identification	
a. Types of ammunitions, classifications, constructional features of different types of cartridges, types of primer and priming composition.	
b. Propellants and their composition	
c. Various types of bullets and compositional aspects.	
d. Manufacture of firearms, various processes associated with manufacture of ammunitions.	

Unit – III Internal, Intermediate and External Ballistics
a. Ballistics – Definition of Internal, Intermediate and External
b. Internal Ballistics – Definition, Ignition of propellants, factors affecting internal ballistics, lock time, ignition time, erosion, corrosion and gas cutting, theory of recoil.
c. Intermediate ballistics – Definitions, effects on the motion of projectile and firearms, gas flow field near the muzzle flash, blast, and silencer.
d. External Ballistics
Unit –IV Tool marks and Identification
a. Tool marks – Types of tool marks, compressions, striated, ejective marks, individual; and pertinent characteristics.
b. Principles and practice of Identification of firearms, ammunition and their components, types of marks produced during the firing process, measurement of rifling details, process of matching and non-matching characteristics of evidence and test cartridge cases and bullets, writing of reports, effect of human decomposition on bullet striations.
c. Determination of range of firing, burning, scorching, blackening, tattooing, gunshot residue distribution, determinants of range of firing, characteristics of the shot, factors affecting these phenomena, IR photography of tattooing around gunshot holes.
Unit – V Investigation of Ballistics
a. Crimes committed by firearms, various types of visible/invisible physical evidence available in crime involving firearms.
b. Photography/ Videography/sketching of crime scene; location, documentation, collection, preservation and forwarding of physical evidence, maintaining the authenticity and integrity of physical evidence,
c. Various legal requirements in the handling of clue materials, various precautions to be taken while handling the physical evidence.
d. Various problems including medico-legal problems arising in crime involving firearms, chain of custody.

Suggested Readings

PG33T402	SEMESTER - IV
CRIMINAL LAW	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand principles of criminal law, various sections of Indian Penal Code. CO 2. have a general understanding of right to private defense, procedure of criminal investigation and prosecution. CO 3. are able to comprehend criminal trial, prosecution, warrant of arrest, and other important criminal procedures. CO 4. have begun to think critically about judicial and constitutional provisions, fair trial, parole probation. CO 5. are able to understand the powers and duties of police and courts.	

PG33T402	CRIMINAL LAW
Unit -I: General Principles and specific Offences	
a. Elements of Criminal liability	
b. Principles of group liability (Section 149, 34, 109, 120B IPC)	
c. Offences against person (IPC) Homicide, Kidnapping Abduction, Rape.	
d. Offence against property (Theft, Robbery, Dacoity and Cheating, Criminal Breach of Trust).	
Unit -II: General Exception	
a. Right to Private Defence against Person.	
b. Right to Private Defence against Property	
c. Insanity and Intoxication	
d. Necessity and Mistake	
Unit -III: Criminal Investigation and Prosecution	

a. FIR, Investigation, Arrest and Charge Sheet
b. Custody, Remand and Bail
c. Prosecution
d. Process to Ensure Attendance Summon, Warrant, Search Warrant.
Unit -IV: Criminal Trial
a. Summon Trials, Warrant Trials and Sessions Trial
b. Right to Accused (pre-sentence hearing Sec 235(2). 248)2_, fair/speedy
c. Trial, Right against self-incrimination.
d. Rights of Victims (Plea Bargaining and Victim Participation).
e. Free Legal Aid.
f. Punishments under IPC.
Unit -V: Evidence law: Scope and relevance
a. Relevancy and admissibility of facts
b. Relevancy of confessions and dying declarations
c. Appreciating expert evidence in court
d. Burden of proof.

PG33T403	SEMESTER - IV
VICITMIOLOGY & VICITIM ASSISTANCE	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand concept of Victimology, nature and theories pertaining to Victimology, psychological and criminological perspective of Victimology. CO 2. have a general understanding of UN declaration, judicial responses, policies for victim assistance, various patterns of victimization. CO 3. are able to comprehend victim compensation, forms of victims, handling procedure of various types of victims. CO 4. have begun to think critically about providing justice to the victim under the purview of criminal law. CO 5. procedural aspects of prevention of victimization, after care service for victim of different crimes, judicial and psychological supports.	

PG33T403	VICITMIOLOGY & VICITIM ASSISTANCE
Unit -I: Introduction to Victimology	
a. Victim and Victimization : Concept, Nature &Theories	
b. Historical Development of Victimology	

c. Key Concepts in Victimology: Victim Precipitation, Victimization Proneness, Victim Responsiveness, Victim Psychology
d. Psycho-dynamics of Victimization
e. Primary Victimization, Secondary Victimization, Tertiary Victimization, Victim Vulnerability
f. Victimless Crimes
Unit – II: National and International Concern for Victims of Crime
a. U.N. Declaration on Basic Principles of Justice for Victims of Crime and Abuse of Power (1985)
b. World Society of Victimology
c. National Policy Concerns for Victims of Crime- Communal Strife, Caste Violence etc
d. State Initiatives and Crime Victims

e. Judicial Response
Unit – III : Patterns of Victimization
a. Victims of Crime
b. Victims of Abuse of Power
c. Women Victims – Dowry, Battered women, Rape and other kind of sexual harassment
d. Child Victims
e. Victims of group violence.
Unit – IV: Victim Compensation
a. Restitution
b. Ex-Gratia Grant
c. Compensation by Insurance Companies
d. Compensation for Victims of Crime and abuse of power
e. Victim Compensation- An International Perspective

Unit – V: Victim Assistance
a. Role of citizens and voluntary organizations
b. Preventing Victimization
c. Assisting victims during crime investigation and trial
d. Legal aid to victims of crime – Counseling, guidance and rehabilitation of special kinds of victims of crime and child abuse
e. National Organization for Victim Assistance (NOVA), USA & Victim Witness Assistance Programs (V W A)
f. Introduction to Restorative Justice System
Suggested readings

PRIVATE DETECTIVE & SECURITY MANAGEMENT	
Course outcomes	
After successfully completing this course students	
<p>CO 1. are able to understand development of private detectives, types of investigators, powers and functions of investigative agencies.</p> <p>CO 2. have a general understanding of security management, risk management, principle on loss control. Aviation security, hostage situation and negotiation.</p> <p>CO 3. are able to comprehend disaster management, rescue and relief operation, accidental fire extinguishing techniques, role and functions of fire brigade in emergency.</p> <p>CO 4. have begun to think critically about modern security maintenance measures, use of advanced security devices, gaining knowledge regarding computer data security.</p> <p>CO 5. are trained in industrial security.</p>	

PG33T404	PRIVATE DETECTIVE & SECURITY MANAGEMENT
Unit-I: Introduction	
a. Meaning, Definition& Scope	
b. Types of Investigators	
c. Comparing Law Enforcement & Private Detectives	
d. Power/Responsibility and Danger/Risk of Being a Private Detective	
Unit – II: Introduction to Security Management	
a. Meaning, Concept, Evolution & Importance.	
b. Security Programmes.	
i. System & Elements	
ii. Series of Operational Measures against Security Hazards.	
iii. Physical, Personal & information Security.	

iv. Security Officer, Hardware's & Alarm, Procedures & Controls
c. Security Programmes Planning.
i. Specific Planning Principles on Loss Control Efforts.
ii. Security Planned Development.
iii. Risk Management.

Unit-III: Civil Aviation Security
a. Role and Importance
b. Action Plan to Protect and Secure Airports, Aircrafts, Vital Installation, Passengers and other Materials.
c. Security Management of Hijacking, & Sabotage,
d. Bombs and Bomb Threat.
e. Hostage & Negotiation.
Unit-IV: Security and Disaster Management
a. Meaning and Types of Disaster
b. Anti-Disaster Management/ Committee
c. Warning and Evaluation Plans.
d. Head Count and Its Importance in Emergency.
e. Rescue and Relief Operation.
Unit-V: Fire Brigade and Safety
a. Meaning, Importance of Fire Brigade, Fire Fighting.
b. Fire Types & its Extinguishers.
c. Various Physical and Chemical Equipments for Dousing Fire.
d. Basic Training of Fire Extinguisher to Security and other Employees.
e. Role and Functions of Fire Brigade in Emergency.

f. Rescue of Victims and Salvage of Property.
Unit-VI: Modern Industrial Security Devices
a. Access Control System: - Meaning and Importance and Types.
b. Interior Protection: C.C. TV System, Internal Theft.
c. External Protection: External Theft, Robbery & Dacoit.
d. Strike & Security.
e. Computer Data Security.

CYBER CRIMES AND CYBER LAWS	
Course outcomes	
After successfully completing this course students	
<p>CO 1. are able to understand, characteristics, types of cybercrimes, its meaning and historical development.</p> <p>CO 2. have a general understanding of crimes upon computer and types of crimes committed by using computers.</p> <p>CO 3. are able to comprehend investigating techniques of cybercrimes, search seizure and protection evidence in cybercrimes.</p> <p>CO 4. have begun to think critically about Sections of IT act, role of cyber police in protection of intellectual properties and preventive measures of cybercrimes.</p> <p>CO 5. are equipped to handle and prevent basic forms of cyber offences.</p>	

PG33T405	CYBER CRIMES AND CYBER LAWS
Unit-I: Introduction to Cyber Crime	
a. Meaning, Definition of the Cyber Crime.	
b. Historical development of Computer related crimes.	
c. Scope and extension of Cyber Crime.	
d. Types of Cyber Crime.	
e. Characteristics of Cyber Crime and Cyber Criminal.	
Unit-II: Understanding of Computer	
a. Computer as an Object: Unauthorized access, Possession of information, Transferring Virus.	
b. Computer as a Subject: Sabotage of computer systems or computer networks. Theft of data/information,	
c. Computer as an Instrument: Facilitating crimes	
d. Computer as an Incidental.	

Unit-III: Investigation of Cyber Crime
a. Perpetrators and Victims of Cyber Crime.
b. Modus Operandi of Cyber Crime.
c. Investigations of Cyber Crime.
d. Raid kid and Investigation Tools.
e. Safeguarding the evidence in crime scene.
Unit-IV: Search, Seizure, Preservation and Packing
a. Preparing for Search and Completing the Search.
b. Precaution during Search and Seizure.
c. Packing, Transportation and Storing the Seized Computers.
d. Guidelines for Preserving and Submitting Computer Hardware Evidence (CPU).
Unit-V: Relevant Section of IT Act 2000, ITAA 2008 and Punishment
a. Tampering with Computer Source Documents.
b. Hacking with Computer System.
c. Publishing of Information which is obscene in Electronic form.
d. Protected System and Penalty for Misrepresentation.
e. Breach of Confidentiality and Privacy.
f. Laws relating to Cyber crime; Salient features of IT Amendment Act-2008,
g. Amendments arising due to enactment of IT Amendment Act-2008 in IPC, Cr.P.C., I.E.A.
Suggested Readings

PG33T406SA	SEMESTER - IV
INVESTIGATIVE JOURNALISM (specialization paper)	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand the investigative journalism, various forms of media, and forensic journalism. CO 2. have a general understanding regarding theories of reporting, types and objectives. CO 3. are able to comprehend types of investigation, policy related to criminal justice, and international perspective of investigative journalism. CO 4. have begun to think critically about investigating journalism, its role in identification of culprit, preventive measures of criminal acts. CO 5. will understand its role in identification of culprit, preventive measures of criminal acts.	

PG33T406SA	INVESTIGATIVE JOURNALISM (specialization paper)
Unit - I: Introduction	

a. Definition, nature and scope of journalism
b. Fundamentals of reporting, editing and writing policies and legislations relating to journalism
c. Various forms of media- print, electronic (broadcast) media – radio, television, internet
d. Forensic journalism: scene of crime, clues of crime, correlate with other evidences, drawing conclusion.
Unit - II: Theories of Reporting
a. Report writing- techniques and styles of writing for various types of media, editing and concise writing.
b. Objectivity in Reporting,
c. Interpretative Reporting,
d. Investigative Reporting Advocacy and
e. Development Reporting.
Unit - III: Investigation and the Criminal Justice Process
a. Investigating the politicians - The law to legislative coverage and privilege
b. Investigating the enforcers
c. Investigating the departmental mismanagement in recruitment, training, promotions and transfers
d. Investigating the illegal arrests and detentions
e. Practice of human rights violations
f. Investigating the judicial system- The relating to contempt and defamation
g. Investigating the correctional system- Existing prison culture, administration, riots, prisoner's unrest, corruption in prison and prison offences.
Unit - IV: International Models on Investigative Journalism
a. Photography- Importance of photography in crime investigation

b. Documents -Primary documents, secondary documents
c. Evidences- Primary Evidence and Secondary Evidence
d. Bugging- Types of cameras, positioning and sound receivers and recording
e. Crime Analysis-mapping, drawing conclusions (International models on investigations and its application has to be explained with already unraveled actual cases)
Unit - V: Crime Reporting, Editing, Report Writing
a. Functions of crime reporter- Reporters contacts, networks of investigator journalists, maintaining, rewarding and handling sources; ethical issues in handling sources.
b. Searching evidence, interviewing experts and victims, evaluating sources, weighing evidences, verifying facts and reporting.
c. Crime reporting types- crime reporting in print media and electronic media
d. Investigative reporting, court procedures reporting, speedy reporting, interpretative reporting, depth reporting.

PG33T406SB	SEMESTER - IV
HUMAN RIGHTS	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand nature and scope of human rights, theories related to human rights. CO 2. have a general understanding of universal declaration of human rights. CO 3. are able to comprehend preventive measures of violation of human rights, Human Rights Organization, Commission of Committees. CO 4. have begun to think critically about constitutional provisions of human rights, powers and functions of NHRC and SHRC recommendations. CO 5. understand the national and international relevance of Human Rights.	

PG33T406SB	HUMAN RIGHTS
Unit-I: Human Rights in the Criminal Justice Administration	
a. Meaning, Nature and Scope of Human Rights	
b. Theories of Human Rights.	
c. Historical Development of Human Rights.	
d. Universal Declaration of Human Rights 1948.	
e. Human Rights and Criminal Justice System in India.	
Unit-II: Provisions of Human Rights	
a. International Convention- U.N Charter and Universal Declaration of Human Rights.	
b. International Bill of Human Rights.	
c. International Covenant on Civil and Political Rights.	
d. International Covenant on Economic, Social and Cultural Rights	

Unit-III: Human Rights and the Constitution of India
a. Relevant Provision under Cr. P. C (Sec 50, 54, 56 to 58, 167,300 & 303,304,322,436,437& 438.)
b. Indian Evidence Act. (Sec, 24 to 26, 112,114 & 133)
c. Human Rights issues in India.
d. Specific Rights
i. Right to Life, Liberty & Equality , Right to Fair Hearing in the Court, Right to Freedom from torture & other Cruel and Inhuman Degrading Treatment, Right of the Child.
ii. Women's Rights.
iii. Prisoners Right.
iv. Victims Right.
Unit-IV: Protection of Human Rights
a. Preventive Measures for the Protection of Human Rights.
b. Human Rights Organization, Commission of Committees.
c. State Human Rights Commission.
d. Role of Central & State Government in Formation of Committee Members.
Unit-V: Powers, Functions of NHRC and SHRC
a. Powers and Functions of SHRC
b. Recent Cases Dealt by NHRC & SHRC
c. Recommendation of NHRC & SHRC
Suggested Readings

PG33F407D	SEMESTER - IV
PROJECT WORK/ DISSERTATION	
Course outcomes	
After successfully completing this course students	
CO 1. are able to understand different concepts of criminology and forensic science. CO 2. have a general understanding regarding research methods in criminology and forensic science. CO 3. are able to comprehend different fields in criminogenic research, forensic application of the study and selection of research topics from different criminological and forensic fields. CO 4. have begun to think critically about selection of topic, sampling and research design. CO 5. Able to understand the importance of research and its applicability to criminal justice and forensic science.	

PG33F407D	PROJECT WORK/DISSERTATION
o For Dissertation, each student shall select one research topic compulsory with the consultation of your concerned faculty.	

o This Dissertation shall carry 100 marks and 4 credits. 75 marks for Dissertation/ Fieldwork study and 25 marks for viva. The completed work shall be submitted at least two weeks prior the concluding of 4 <sup>th</sup> Semester.
Objectives
1. Knowledge from the program is applied to the development of Research Skills.
2. Applying Particular theoretical perspectives to specific area of crime and the Institutions of crime control.
3. Developing an in-depth Dissertation on a Specific area of theory or research.
4. Designing Research Strategies into the Understanding of Crime.
5. All the Students shall take this Paper Compulsorily and work under a Faculty Guide.

## **Fake news and Crime**

**Credit :04**

**60 hours**

### **Module:1 News media**

- Introduction to News media
- Meaning, Definition, scope
- Types of media
- New media
- Electronic and print media
- Social medias

### **Module:2 Fake news**

- Meaning and definition of fake news
- Types of Fake news
- Source of fake news
- Motivation for fake news
- Verification of fake news

### **Module:3 Digital media**

- Electronic media
- Types of Digital media
- Characteristics of Digital media
- Importance of digital news for the current scenario
- Social media

### **Module: 4 Media and society**

- Interdependency of the society
- News and its impact on the society
- Social media and attitude of society
- Various problems caused by fake news

### **Module 5: control**

- Laws in India related to fake news
- Techniques to detect fake news
- Necessity of awareness about disinformation
- Role of Educational institute and other organisation to prevent the problem
- International guidelines related to fake news

## **PH.D. COURSEWORK**

### **PAPER III – AREA OF SPECIALIZATION**

#### **QUESTIONED DOCUMENTS**

##### **Unit I: Introduction to Questioned Documents**

- Definition, Types, Principles and Preliminary examination of documents
- Reproduction of documents through photographic and mechanical means and their examination
- Scope and application in Investigation of crime
- Evidentiary value of questioned documents
- Case studies involving documents in investigation
- Linguistics, stylistics, forensic stylistics- Definition, Methodology, Use in personal identification, Application in different Indian vernacular languages, Limitations, Case studies

##### **Unit II: Questioned Document Analysis**

- Hand writing analysis
- Examination of Alterations such as Erasures, Obliterations & Additions
- Indentations, Secret writings and Charred documents
- Age of documents
- Examination of Typescripts, printed matter, (types of printers) including currency notes and lottery tickets. Mechanical impressions
- Examination of Credit Cards and Similar materials

##### **Unit III: Evidentiary value of Inks**

- Inks – Historical development
- Types and composition of inks
- Inks, Papers and their scientific examinations with modern methods
- Influencing factors on ink analysis

##### **Unit IV: Ink analysis with advanced technology**

- Ink technology

- Physical and non-destructive techniques: ESDA, Projectina, Video Spectral Comparator, UV-IR Illuminating chamber, Transmitted light source, Oblique light source, digital camera, optical instruments, Compound and Stereo Microscope.
- Chemical and destructive techniques – TLC, HPLC, HPTLC, capillary electrophoresis

### **Unit V: Statistical applications in ink analysis**

- Understanding how statistics can address forensic science (chemometric methods)
- Application of multivariate statistics (PCA and HCA)
- Pearson correlation, cluster dendogram, PLS-DA (PLS Discriminant analysis), etc

### **Suggested readings**

2. Osborn, A. S. (1998) Questioned Documents, Universal Law Pu
3. Levinson, L. (2001) Questioned Document: A Lawyer's Handbook, Academic Press, Great Britain
4. Hilton, O. (1982) Scientific Examination of Questioned Documents, Elsevier, New York
5. Brunelle, R. L., & Crawford, K. R. (2003) Advances in the Forensic Analysis and Dating of Writing Ink, Charles C Thomas Publication Limited
6. Miranda, M. D. (2016). Forensic Analysis of Tattoos and Tattoo Inks, CRC Press
7. Vastrick, T. W. (2004) Forensic Document Examination Techniques, Inst of Internal Auditors
8. Koppenhaver, K. M. (2007) Forensic Document Examination: Principles and Practice, Humana, Germany

## **PhD COURSE WORK SYALLBUS**

### **PAPER-III Area of research**

### **FORENSIC PSYCHOLOGY**

#### **UNIT-I: Psychology and legal system**

1. Introduction to Psychology and forensic Psychology.
2. Psychology and legal process interaction.
3. Relationship between criminology, psychology and forensic science.
4. Fundamental distinction between psychology and law.

#### **UNIT-II: Forensic Risk Assessment**

1. Introduction to risk assessment.
2. Definition, types of risk assessment.
3. Risk assessment in various cases. (Disaster, suicides, violence, domestic violence, accidents).

#### **UNIT-III: Industrial Psychology**

1. Definitions of Organizational Behaviour, History, Hawthorne studies, fundamentals of organizational behavior.
2. Dynamics of people and organization, Theoretical frameworks. Models and Approaches of organizational behavior.
3. Foundations of Individual Behaviour.
4. Leadership, Power and Meaning and Importance.
5. Coping with Organizational Life.

#### **UNIT-IV: Disaster Management.**

1. Introduction on Disaster
2. Risk and Vulnerability Analysis.
3. Disaster Preparedness and Response.

#### **UNIT-V: Application of psychology in personnel health**

1. Introduction to Counseling: Definition; Concept; Scope; Characteristics of a Good Counselor; Ethics in Counseling
2. Approaches to Counseling: Psychoanalysis; Behaviouristic; Humanistic; Cognitive
3. Application of Counseling: Family set up; Educational set up; Organizational set up; Clinical set up
4. Types of Counseling: Individual Counseling; Group Counseling; Family Counseling; Premarital and Marital Counseling; Career Counseling

## **Regulations governing one-year P.G. Diploma In Computer Applications**

### **PREAMBLE**

**INTRODUCTION:** The area of Computer Science and its applications is advancing rapidly, especially during the last few years. In view of the present developments in the area and needs of job market, the Board of Studies in Computer Science, decided to revise the present syllabus of PGDCA course.

### **OBJECTIVES**

To train students in various aspects of Computer applications  
To provide diverse and fulfilling career options in computer applications.

### **COURSE OFFERED**

One year P.G. Diploma course in Computer Application (concurrent course)

### **COURSE STRUCTURE:**

#### **1. Title:**

The course shall be called P.G. Diploma in computer Applications (PGDCA)

#### **2. Duration:**

This course is extended over a period of one academic year with two semesters. Each semester will have 16 weeks duration.

#### **3. Eligibility:**

A candidate who has passed the Bachelor's degree examination with a minimum of 45% marks in any discipline is eligible for admission to the course. In case of SC/ST students the relaxation for eligibility condition shall be as fixed by the University from time to time.

#### **4. Medium of Instruction:**

The medium of instruction will be in English only.

#### **5. Hours of Instruction:**

There shall be four hours per week for every theory & practical papers.

#### **6. Number of papers:**

Each semester will have a total of 600 marks consisting theory and practical.

#### **7. Attendance:**

A student shall obtain a minimum of 75% of the total instruction/practical hours in each paper/practical as per the University regulations.

A student who does not satisfy the above requirement of attendance shall not be eligible to appear for the examination and should seek fresh admission to the semester.

#### **8. Scheme of Examination:**

The board of examiners will scrutinize and approve the question papers set by the paper setters selected from a panel of examiners.

There shall be single valuation for theory and practical examination. Marks shall be awarded for theory and practical examinations.

There shall be a University examination at the end of each semester. Each semester examination will have theory and practical as prescribed.

The composition of the marks shall be as under:

Each theory paper and practical will have 80 marks for the semester examination and 20 marks for Internal Assessment.

Duration of the theory examination shall be of three hours.

The question Paper format shall be as follows:

The Question Paper shall consists of two parts. Answering five full questions choosing at least two question from each part.

Each full question carrying 16 marks. Full question may divided into sub questions.

**9. Internal Assessment marks:**

Each theory/practical paper will have 20 marks for Internal Assessment.

No minimum marks are prescribed for Internal Assessment.

Internal Assessment marks once awarded will hold good even if a candidate reappears for the examination.

**10. Declaration of results.**

The grading of successful candidate at the examination shall be as follows:

Percentage marks	Class
70.00 to 100.00 %	First Class with Distinction
60.00 to 69.99 %	First Class
50.00 to 59.99 %	Second Class
Below 50%	Fail

**Scheme of Study and Examination for P.G. Diploma in Computer Science Applications**  
(Not under CBCS Scheme)  
(PGDCA) (With effect from 2017-2018 onwards)

**SEMESTER-I**

## **PG Diploma in Computer Application**

### **PROGRAM OUTCOMES (PO)**

PO1: It will equip the students with skills required for designing, developing applications in Information Technology.

PO2: Students will be able to learn the latest trends in various subjects of computers & information technology.

PO3: The PG Diploma is aimed at graduates with a computing background and provides a detailed coverage of the key concepts and challenges in data and resource protection and computer software security.

PO4: To give hands on to students while developing real life IT application as part of the study.

PO5: To train graduate students in basic computer technology concepts and information technology applications.

PO6: Design and develop applications to analyze and solve all computer science related problems.

### **PROGRAM SPECIFIC OUTCOMES (PSO)**

PSO1: To expose the students to open Source technologies so that they become familiar with it and can seek appropriate opportunity in trade and industry.

PSO2: Able to provide socially acceptable technical solutions to real world problems with the application of modern and appropriate programming techniques.

PSO3: Design applications for any desired needs with appropriate considerations for any specific need on societal and industrial aspects.

## PGDCA 1.1 INTRODUCTION TO OFFICE AUTOMATION

Total Hours: 48

### Course Outcome

Upon Completion of the course, the students will be able to

- To provide an in-depth training in use of office automation, internet and internet tools.
- The course also helps the candidates to get acquainted with IT.
- Learning Outcomes: After completion of the course, students would be able to documents, spreadsheets, make small presentations and would be acquainted with internet.

### UNIT-I

**Introduction to computers:** Anatomy of Computer System, Hardware and Software Components, Memory unit: Types of memory, ROM, RAM, types of RAM & ROM, Introduction to cache and virtual memory.

[2 Hours]

### UNIT-II

**MS-word:** Introduction, what is Word-Processing, Important Features of MS-Word, Creating and Editing a documents, Entering Text in the documents, Moving Around the documents, Formatting a Document

**Formatting A Document:** Format and align text, Line and paragraph spacing, add bulleted and numbered lists, add borders and shading, Changing the Layout of a Document.

Using Editing and Proofing Tools: Spell and grammar check, Shortcut Menus, Find and replace text.

Working with Tables: Insert a table, convert a table to text, Navigate and select text in a table, resize parts of a table, align text in a table, format a table, Insert and delete columns and rows, Borders and shading, Merge table cells.

[20 Hours]

### UNIT-III

**MS-Excel:** The Basics Creating a New Workbook Navigating in Excel Moving the Cell Pointer Using Excel Menus Using Excel Toolbars: Hiding, Displaying, and Moving Toolbars Entering Values in a Worksheet and Selecting a Cell Range, saving a Workbook & Reopening a saved workbook

**Formatting a Worksheet:** Formatting Fonts & Values Adjusting Row Height and Column Width, Changing Cell Alignment, Adding Borders, Applying Colors and Patterns, Using the Format Painter, Using AutoFormat Merging Cells, Rotating Text and using AutoFit

**Managing your workbooks:** Inserting and Deleting Worksheets Renaming and Moving Worksheets, protecting a Workbook Hiding Columns, Rows and Sheets, Entering Date Values and using AutoComplete

**Formulas:** Creating a basic Formula Calculating Value Totals with AutoSum Editing & Copying Formulas Fixing Errors in Your Formulas

**Creating & Working with Charts:** Creating a Chart Moving and Resizing a Chart Formatting and Editing Objects in a Chart, working with Pie Charts Adding Titles, Gridlines, and a Data Table Formatting a Data Series and Chart Axis Annotating a Chart Working with 3-D Charts.

[20 Hours]

### UNIT-IV

**PowerPoint:** What's New in PowerPoint, Understanding the PowerPoint Program Screen.

**Presentation:** Creating a New Presentation, Inserting and Deleting a Slide and Selecting a Layout Opening a Presentation, Navigating a Presentation Using Undo, Redo and Repeat Saving a Presentation.

**Inserting and Editing Text:** Inserting Text Editing Text, Cutting, Copying, and Pasting Text, Moving and Copying Text with the Mouse, Checking Your Spelling, Finding and Replacing Text Inserting Symbols and Special Characters

**Formatting Text:** Changing Font Type, Changing Font Size, Changing Font Color, Changing Font Style, Using the Font Dialog Box, Using the Format Painter Using WordArt. Formatting a Presentation: Using Document Themes, Changing the Background of a Slide Rearranging Slides Adding Headers and Footers Using the Slide Master Working with Bulleted and Numbered Lists Changing Paragraph Alignment and Line Spacing Working with Tabs and Indents.

**Working with Objects:** Inserting Clip Art Inserting Pictures and Graphics Files Formatting Pictures and Graphics Inserting Shapes Formatting Shapes Resize, Applying Special Effects to Objects Grouping Objects.

**Working with Tables:** Creating a Table, Adjusting Column Width and Row Height, Inserting and Deleting Rows and Columns, Merging and Splitting Cells, Working with Borders and Shading Applying a Table Style.

**[6 Hours]**

2. Office Automation Concepts and Tools by Tsichritzis, D. (Ed.)
3. Microsoft Office 2016 by Joan Lambert.

## PGDCA 1.2 C PROGRAMMING

Total Hours: 48]

### Course Outcome

Upon Completion of the course, the students will be able to

- Able to implement the algorithms and draw flowcharts for solving Mathematical and Engineering problems.
- Demonstrate an understanding of computer programming language concepts.
- To be able to develop C programs on linux platform

### UNIT-I

**Introduction to Programming Paradigms:** Evolution of programming languages, Structured programming, Procedural programming, object oriented programming, Functional programming and Logic programming, compilation process, object code, source code, executable code, fundamentals of algorithms, flow charts.

[10Hours]

### UNIT-II

**Fundamentals:** C character set Identifiers & Keywords, data types, constants, variables and arrays, declarations, expressions, statements, symbolic constants

**Data types:** Properties of type and objects, data objects, variables and constants, data types, specification and implementations of elementary data types, declaration, type checking and type conversion, assignment and initialization, structured data types-vectors and arrays, records, lists, character strings, files and input-output.

[12 Hours]

### UNIT-III

**Operators and Expressions:** Arithmetic operators, unary operators, relational and logical operators, assignment operators, conditional operators, Library functions.

[8 Hours]

### UNIT-IV

**Control Statements:** Branching, Looping, Nested control structures, switch break, continue statements, comma operator, go to statement.

**Functions:** Defining a function, accessing a function, function prototypes, passing arguments to a function, recursion.

[8 Hours]

### UNIT-V

**Arrays:** Defining and processing, one-dimensional Array, Multidimensional Array declaration and their applications, Passing arrays to a function.

**String:** String variables, declaring & initializing string variables, reading & writing strings, string Functions - concatenation, comparison, copy, length implementing the above functions without using built-in string functions, arithmetic operations on characters, programming examples.

## PGDCA 1.3 WINDOWS OPERATING SYSTEM

Total Hours: 48

### Course Outcome

Upon Completion of the course, the students will be able to

- Understand the basic components of a computer operating system, and the interactions among the various components.
- The course will cover an introduction on the policies for scheduling, deadlocks, memory management, synchronization, system calls, and file systems

### UNIT-I

**Windows Overview:** History, understanding the OS architecture, Graphics interface, Benefits, Screen attributes: icons and bars, Mouse vs. keyboard input, Features and accessories of the Windows program, Objects and their properties.

[8 Hours]

### UNIT-II

**Installing Windows:** Exploring OS Editions, Planning Clean Installs vs. Upgrades, Understanding Installation Types, Using Virtualized Installations

**Program management:** Creating, saving and editing documents, Concurrent execution of programs, Sharing data between programs

**Folder and file management:** Working with files, Naming files, Copying and moving files, Deleting files, Managing folders a. Creating, Viewing, Expanding and collapsing.

[10 Hours]

### UNIT-III

**Managing the Desktop:** Understanding Desktop Features, Working with Gadgets, Changing Display Settings, Creating Shortcuts

**Control panel:** Customizing screens, Screen colors, Pattern, Spacing icons, selecting time/date, Customizing printing, changing the print queue, configuring the printer(s), Adding printers.

**Working with fonts:** changing, removing, adding, Customizing mouse and keyboard use, System properties and the device manager.

[10 Hours]

### UNIT-IV

**Management tools:** DOS sessions, Explorer, Memory configuration, Safe mode

**Device Management:** Understanding Device Drivers, Exploring Plug-and-Play Operations, Connecting and Managing Devices, Using Disk Defragmenter, Performing a Disk Cleanup, Scheduling Tasks.

**Managing Applications:** Planning for Local and Network Applications, Install and uninstall applications, Configuring and Removing Applications, Using Group Policy for Application Control, Understanding Application Virtualization, The Difference between Services and Standard Applications.

[10 Hours]

### UNIT-V

**Controlling Malware:** Understanding Malware Types, Planning for Malware Protection, Understanding Microsoft Protection Methods

**Backup and Recovery:** Planning for Backups, Testing Recovery Processes, Working with System Restore, Using Recovery Boot Options.

**Windows Update:** Understanding Hotfixes and Service Packs, Planning for Windows Update and Microsoft Update.

[10 Hours]

## **PGDCA 2.1 PAGE MAKER AND ADOBE PHOTOSHOP**

Total Hours: 48

### **Course Outcome**

Upon Completion of the course, the students will be able to

- This class provides you with the concepts and skills to use Adobe Page Maker effectively.
- Our goal is to make sure your class meets your objectives, not ours.
- Courses that relate to this class: Adobe Illustrator and Adobe Photo-shop.

## **PAGE MAKER**

### **UNIT I**

**Introduction:** Introduction to Page Maker Page Maker Icon and help, Tool Box, Styles, Menus etc., Different screen Views, Importing text/Pictures, Auto Flow, Columns, formatting text.

[10 Hours]

### **UNIT-II**

**Master Pages & customization:** Master Pages and Stories, Story Editor, Menu Commands and short-cut commands, Spell check, Find & Replace, Import Export etc., Fonts, Points Sizes, Spacing etc., Installing Printers, Scaling (Percentages), Printer setup Use of D.T.P. in Advertisements, Books & Magazines, News Paper, Table Editor.

[10 Hours]

## **ADOBE PHOTOSHOP**

### **UNIT-III**

**Introduction:** Introduction to Adobe Photoshop & Documents, Various Graphic Files and Extensions, Vector Image and Raster Images, Various Colour Modes and Models.

[10 Hours]

### **UNIT-IV**

**Layers & Filters:** Introduction to Screen and Work Area, Photoshop Tools & Palettes , Layers Palette ,Working with Layers , New Layer via Cut , New Layer via Copy ,Working with Images, The Filter Menu, Filter Gallery , Extract Filter,Noise Filters, Sketch Filters.

[10 Hours]

### **UNIT -V**

**Printing and Customization:** Import, Export, Automate, Printing, Customize Workspace, Creating an Action.

**[8 Hours]**

## PGDCA 2.2 Corel DRAW

Total Hours: 48

### Course Outcome

Upon Completion of the course, the students will be able to

- Have sufficed knowledge about the entire software.
- He will be well versed with drawing grids, segments, using rulers, coloring, manipulating effects, moderating shapes etc.

### UNIT-I

**Introduction to CorelDRAW:** Use and importance in Designing, Various Graphic Files and File Extensions ,Vector Image and Raster Images , Introduction to Screen and Work Area.

[10 Hours]

### UNIT-II

**Introduction to Tools of CorelDRAW:** Managing Palettes ,Working with Images, Patterns and Textures ,Working with Shapes, Colours and Fills ,Image Rasterisation and Editing, Transformation Menu.

[10 Hours]

### UNIT-III

**CorelDRAW Files:** Coreldraw Files and supporting documents, Import and Export of Files and File formats Page Setup and Designing, Using Styles and Templates, Working with Text, Formatting Text, Text Attributes.

[10 Hours]

### UNIT-IV

**Page Layout and Layers:** Designing Different Page Layouts, Column Layout, Special Effect to Objects and Texts, Contour Tool ,Layout for News Paper and Magazines, Working with Layers Hiding/Showing Layers - Deleting Layers, Masking Layers.

[10 Hours]

### UNIT-V

**Printing and Customization:** Preparation of Visiting Cards & Invitation Cards, Shaping Dockers & Logo Design Introduction Brochure & Books, Introduction to Magazine Designing, Web Photo Gallery Printing.

[8 Hours]

## PGDCA 2.3 TALLY AND SPSS

Total Hours: 48

### Course Outcome

Upon Completion of the course, the students will be able to

- MS Paint
- Photoshop
- PageMaker
- Adobe Photoshop CC
- Adobe creative team, Adobe press

### TALLY

#### Unit-I

**Manual Accounting:** Accounting, Need for accounting, Types of accounts, Rules of debit & credit, Accounting principles or standards, Accounting concepts, Accounting conventions, Accounting system, Recording transactions in journal, Ledger (Classifying), Trial balance, Final Accounts, Trading & P/L statement, Balance sheet, Adjustment Entries, Summary.

[8 Hours]

#### UNIT-II

**Computerized Accounting:** Installing Tally – Requirements & procedure for installing tally, Education mode, Changing default settings through tally. Opening screen of tally, Creating Company, shutting a company, Altering/Modifying existing Company, Buttons on the button Panel

**Accounting Information:** Menu related to accounts, Groups, Managing Groups, Creating new group & sub group, Displaying, altering & deleting a group, Creating, Displaying & altering multiple groups.

**Ledgers:** Displaying, altering & deleting single and Multiple Ledgers.

[8 Hours]

#### UNIT-III

**Cost categories & Cost centers:** Creating, Displaying, Altering & Deleting a cost category and cost centers, Vouchers in Tally, Inventory information, stock categories, stock item, Multiple Stocks, Multiple Godowns, reports and internet capabilities.

[8 Hours]

### SPSS

#### UNIT-IV

**Introduction to PASW:** Menus, Tool Bar, Dialogue Box, Designate Window, Basic steps for performing any Statistical Procedure

**Data Management:** Creating a Data File, Defining Variables, Entering & Saving Data, Opening an existing Data File, Inserting Variables, Inserting Cases, Identifying Duplicate Cases, Identifying Unusual Cases, Sorting Cases, Merging a File: Add Cases, For Adding Variables, Data Aggregation, Splitting File, Selecting Cases, Listing Cases.

[8 Hours]

#### UNIT-V

**Data Transformation:** Computing a New Variable, Recoding Variables, Types of measurement Scales, Descriptive Statistics, Crosstabs.

**Describing Data Graphically:** Line Chart, Pie Chart, Bar Chart, Histogram and the Standard Normal

Curve, Box Plot, Scatter Diagram, P-P Plot, Q-Q Plot, Chart Builder, Formatting Charts.

[8 Hours]

#### UNIT-IV

**One Sample t-Test:** Hypothesis testing, Independent Sample t-Test, Sample t-Test, Procedure for Testing for Differences in Means between Groups, Interpretation of Null Results.

**Nonparametric statistics:** Runs Test, Chi-Square Test, Mann-Whitney U Test, Wilcoxon Signed Rank

Test, Kruskal-wallis Test.

KARNATAKUNIVERSITY, DHARWAD

*Regulations and Syllabus*  
*for*  
*P.G. Studies in*  
**MASTER OF COMPUTER**  
**APPLICATIONS**  
*(M.C.A.)*  
**(I-IV Semester)**

**Revised Syllabus**

*Under*  
*Choice Based Credit System (CBCS)*  
From  
2020-21 onwards

**Regulations Governing Post-Graduate Programmes in the  
Faculty of Science & Technology under Choice Based Credit System**  
(Framed under Section 44(1))(c) Of the K.S.U.Act.2000)

**1.0 Title**

These Regulations shall be called “Regulations Governing the Post-Graduate Programmes in the Faculty of Science & Technology under Choice Based Credit System” in Karnatak University, Dharwad

**2.0 Commencement**

These Regulations shall come into force with effect from the academic year 2020-21.

**3.0 Definitions**

- a In these Regulations, unless otherwise provided;  
“Academic Council” means Academic Council of the University constituted according to the *Karnataka State Universities Act, 2000*.
- b “Board of studies means P. G. Board of studies of the University, Adhoc/Combined and Steering Committees of International Diploma programmes in the discipline/subjects concerned.
- c “Compulsory Course” means fundamental paper, which the student admitted to a particular Post-Graduate Programme, should successfully complete to receive the Post Graduate Degree in the concerned subject.
- d Course Weightage “means number of credits assigned to a particular course.
- e “Credit” means the unit by which the course work is measured. One Credit means one hour of teaching work or two hours of practical work per week. As regard the marks for the courses, 1 Credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks.
- f “Cumulative Grade Point Average(CGPA)” refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward from first semester to subsequent semesters.
- g “Degree” means Post-Graduate Degree.
- h “Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each course by the candidate in both Internal Assessment and Semester-end Examinations.
- i “Grade Point Average”(GPA)” refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester.
- j “Open Elective Course “means a paper offered by a Department to the students of other Departments.
- k “Post Graduate Programme“ means semester wise Master’s Degree Programme’s excluding P. G. Diploma.
- l “Specialization course” means advanced paper offered by a Department that a student of that Department can opt a special course.

m “Student” means the student admitted to programmes under (k).

n “University “means Karnatak University, Dharwad.

#### **4.0 Minimum Eligibility for Admission**

A candidate who has successfully completed Bachelor’s Degree programme in Science or any other Degree programme of this University or of any other University recognized as equivalent there to by this university, shall be eligible for admission to the Post Graduate Programmes in science provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the university from time to time and Government of Karnataka (Karnataka Examination Authority), Bangalore.

Admission shall be as per Government of Karnataka reservation policy and the directions issued in this regard from time to time.

#### **5.0 Duration of the programme**

The duration of the study for the Post-Graduate Degree programme shall extend over a period of two consecutive academic years, each academic year comprising two semesters, and each semester comprising sixteen weeks with a minimum of ninety working days.

However the student, who discontinue the programme after one or more semesters due to extraordinary circumstances, are allowed to continue and complete the programmer with due approval from the Registrar. Candidates shall no register for any other regular course other than diploma and certificate courses being offered on the campus during the duration of P.G. Programme.

#### **6.0 Medium of Instruction and Evaluation**

The medium of instruction shall be in English.

#### **7.0 Programme Structure**

**7.1** The student of Post –Graduate programme shall study the courses as may be approved by the concerned Board of Studies, Faculty and the Academic Council of the University from time to time minimum and maximum credits as outlined in these regulations.

**7.2** There shall be three categories of courses namely, compulsory courses, specialization Courses and Open Elective Courses.

**7.3** Each programme shall have a set of compulsory courses, as stipulated in the regulations governing the concerned programme that a student must complete to get the concerned programme that a student must complete to get the concerned degree.

**7.4** In those programmes that offer specialization courses, the student shall choose the prescribed number of specialization courses offered within the Department

**7.5** Each Department shall offer Open Elective courses for students of other Departments, The students of a Department shall choose Open Elective courses from among those prescribed by the university and selected by the Department from time to time. P.G. Centers and affiliated colleges can offer those open Elective Course, which are approved or prescribed by their Parent Department of the University. Such open Elective courses shall be taught by qualified teachers approved by the University.

**7.6** The credits for each of the Compulsory Courses may vary from 2 to 4; for Specialization Course, from 2 to 4; and for Open Elective Course, from 2 to 4, wherever project work/field work/practical are involved in the course, the credits may extend to 6 or as otherwise provided by concerned programme.

**7.7** The minimum credits for P.G. Programme shall be 96. In the case of MCA, the minimum number of credits shall be 158 and in case of M Sc. Computer Science the minimum credits are 116.

- 7.8 The student shall undertake project/field work during the programme as a compulsory course or in lieu of Specialization Course or open Elective Course if so specified by the concerned Board of Studies.
- 7.9 The ratio between Compulsory, Specialization and Open Elective may differ from department to department.
- 7.10 The detailed programme structure for Faculty of Science & Technology shall be as prescribed and shown in Annexure-I, Annexure-IA, Annexure-Ib.
- 7.11 The Open Elective courses generally will have practical component, unless otherwise specified by the respective Board of Studies. The number of students admitted to the course shall commensurate with the availability of infrastructure.

## **8.0 Attendance**

- 8.1 Each course shall be taken as a unit for the purpose of calculating the attendance.
- 8.2 Each student shall sign the attendance register maintained by the Department for each course for every hour/unit of teaching /practical. The course teachers shall submit the monthly attendance report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the second week of the subsequent month.
- 8.3 Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.
- 8.4 A student shall be considered to have satisfied the required attendance for each course if he/she has attended not less than 75% of the number of instructional hours during the semester.
- 8.5 There is no provision for condoning shortage of attendance.
- 8.6 The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission afresh to the given semester.
- 8.7 Such of the candidates who have participated in State/National level Sports, NSS, NCC, Cultural activities and other related activities as stipulated under the existing regulations shall be considered for giving attendance for actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authorities within two weeks after the event.

## **9.0 Examination**

- 9.1 There shall be an examination at the end of each semester. The odd semester examinations shall be conducted by the respective Department/P.G. Centers/Colleges. The even semester examination shall be conducted by the University.
- 9.1.1 Unless otherwise provided, there shall be semester-end examination of 3 hours duration for 75/100 marks; 1.5 hours for 50 marks and 2/4 hours for 35/75 marks practical examination.
- 9.1.2 Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application from through the proper channel and shall also pay the fees prescribed.
- 9.1.3 The office of the Registrar (Evaluation) shall allot the Register Number to the candidate at the 1<sup>st</sup> semester-end examination. That will be the Register Number to the candidate for all subsequent appearance at semester-end examinations.
- 9.1.4 The answer scripts shall be in the safe custody of the University for a maximum period of six months from the date of announcement of results. These shall be disposed off after six months.
- 9.1.5 The programme under CBCS is a fully carry-over system. A candidate reappearing for either the odd or even semester examinations shall be permitted to take examinations as and when they are conducted (even semester examination in even semester and odd semester examination in odd semester)

- 9.1.6** Candidate who have failed, remained absent or opted for improvement in any course/courses shall appear for such course/courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.
- 9.1.7** Candidates who desire to challenge the marks awarded to them, in the even semester-end examinations, may do so by submitting an application along with the prescribed fees to the Registrar (Evaluation) within 15 day from the announcement of results.

## **9.2 Odd Semester Examination**

- 9.2.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.
- 9.2.2** The BOE shall scrutinise and approve question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation).
- 9.2.3** The office of the Registrar Evaluation shall dispatch the question papers to the Department/P.G.Center/Colleges who shall conduct the Examinations according to the Schedule announced by the University.
- 9.2.4** The Chairperson of the Department/Administrator of the P.G. Center/Principal of the College shall appoint one of their full time courses teachers as Post Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts.
- 9.2.5** Answer scripts shall be valued by the examiners appointed by the University. However, in those centers where an examiner for a particular course is not available, then the answer scripts of that course shall be dispatched to the officer of the Registrar (Evaluation) who shall arrange for valuation of the same.
- 9.2.6** There shall be single valuation. The examiners (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on the answer script.
- 9.2.7** The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be dispatched by the PGP Coordinator to the Registrar (Evaluation)'s Officer at the conclusion of the valuation at the respective centers.
- 9.2.8** The Office of the Registrar Evaluation shall process and announce the results.

## **9.3 Even Semester**

- 9.3.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.
- 9.3.2** As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other University/Research Institutes.
- 9.3.3** Each answer script of the semester-end examination (theory and project report) shall be assessed by two examiners (one internal and another external). The Marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averaged with nearer award of the two evaluations.  
Provided that in case the number of answer scripts to be referred to the third examiner in a course exceeds minimum of 5 or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.
- 9.3.4** Wherever dissertation/project work is prescribed in the even semesters of the programme, the same shall be evaluated by both internal and external examiners. The valuation shall be as prescribed by the concerned Board of Studies.
- 9.3.5** In case of programmes with practical examination details of maximum marks, credits or duration may vary from Department to Department as specified by the concerned Board of Studies.

#### **9.4 Evaluation**

**9.4.1** Each Course shall have two evaluation components – Internal Assessment (IA) and the Semester End Exams.

**9.4.2** The IA component in a course shall carry 25% / 30% / 50% and the Semester End Examination shall carry 75% / 70% / 50% respectively, as the case may be. Courses have 25% & 30%/50% marks as internal assessment shall have 3/5 marks allotted to attendance. However, in case of project work, the distribution of marks for Internal Assessment and Examination shall be left to the discretion of the concerned BOS.

**9.4.3** Marks for attendance shall be awarded to the students according to the following table

For courses carrying 25% of marks for IA, the attendance marks shall be

<b>Attendance (in Percentage)</b>	<b>Marks</b>
Above 90	3
Above 80 and up to 90	2
Above 75 and up to 80	1

Internal Assessment (IA) shall be based on written tests, practical and seminars.

**9.4.4** However, the number of IA components per course per semester shall not be less than two.

**9.4.5** The IA marks list shall be notified on the Department Notice Board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination, or as directed by the University.

**9.4.6** The test shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.

**9.4.7** There is no provision for seeking improvement of Internal Assessment marks.

**9.4.8** The IA records, pertaining to Semester Examination, shall be preserved by the department/Centers/Colleges for a period of one year from the date of semester examination. These records may be called by the University or a body constituted by the University as and when deemed necessary.

**9.4.9** The dissertation/project work viva-voce shall be conducted by an internal and external examiner.

#### **10.0 Maximum duration for completion of the Programme**

**10.1** A candidate admitted to a post graduate programme shall complete it within a period, which is double the duration of the programme from the date of admission.

**10.2** Whenever the syllabus is revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabus.

#### **11.0 Declaration of Results**

**11.1** The minimum for a pass in each course shall be 40% of the total marks including both the IA and the semester-end examinations. Further, the candidate shall obtain at least 40% of the marks in the semester-end examination. There is no minimum for the IA marks.

**11.2** Candidates shall secure a minimum of 50% in aggregate in all courses of a program in each semester to successfully complete the program.

**11.3** Candidates shall earn the prescribed number of credits for the program to qualify for the PG Degree.

- 11.4** For the purpose of announcing the results, the aggregate of the marks secured by a candidate in all the semester examinations shall be taken into account. However, Ranks shall not be awarded in case the candidate has not successfully completed each of the semesters in first attempt or has not completed the program in the stipulated time (vide Regulation 5) or had applied for improvement of results.

**12.0 Marks, Credit Points, Grade Points, Grades and Grade Point Average.**

- 12.1** The grade points and the grade letters to candidates in each course shall be awarded as follows:

Percentage of marks	Grade Points	Grade Letter
75 and above, up to 100.00 %	7.50 to 10.00	A
60 and above but less than 75 %	6.00 and above but less than 07.5	B
50 and above but less than 60 %	5.00 and above but less than 6.0	C
40 and above but less than 50 %	4.00 and above but less than 05.00	D
less than 40.00 %	Less than 4.00	F

- 12.2** Credit Point (CP): The Credit Point for each course shall be calculated by multiplying the grade point obtained by the credit of the course.

- 12.3** The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned by the student in all the courses by the total number of credits of those courses of the semester.

- 12.4** The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points in all the semesters by the total number of credits in all the semesters. The CGPA to date shall be calculated by dividing the total number of credit points in all the semesters to date by the total number of credits in all the semesters to date.

CGPA for the I Semester = Sum of the CP of the I Semester / Sum of the credits of the I Semester

CGPA for the II Semester = Sum of the CP of the I Semester + Sum of the CP of II Semester / Sum of the credits of the I Semester + II Semester

CGPA for the III and IV Semesters shall be computed accordingly.

- 12.5** The Grade Card at each semester examination shall indicate the courses opted by the student, the credit for the course chosen by the student, the credit points obtained in each course, the grade letter and the grade point average. No class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade Point Average.

**12.6** Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below:

Cumulative Grade Point Average (CGPA)	Class To Be Awarded
7.5 to 10.0	First Class With Distinction
6.0 and above but below 7.5	First Class
5.0 and above but below 6.0	Second Class

**13. Miscellaneous:**

- a.** Notwithstanding anything contained in these regulations, the semester system at Post-Graduate level is hereby repealed.
- b.** The provisions of any order, Rules or Regulations in force shall be inapplicable to the extent of its inconsistency with these Regulations.
- c.** The University shall issue such orders, instructions, procedures and prescribe such format as it may deem fit to implement the provisions of this Regulations.
- d.** The procedural details may be given by the University from time to time.
- e.** Any unforeseen problems/ difficulties may be resolved by the Vice Chancellor, whose decision in the matter shall be final.

## Annexure-I

**The Program structure of the Master of Science Degree shall be as follows:**

Semester	No. of compulsory & Specialization courses (credits/course)	Total credits for compulsory & Specialization courses	No. of open elective course (credits/course)	Total credits of open elective course	Total credits for the semester
Sem. I	Th :03 (04) =12 Pra/Th*:03 (02)=06	18	Th :01 (04) =04 Pra/Th*:01(02)=02	06	24
Sem. II	Th :03 (04) =12 Pra/Th*:03 (02)=06	18	Th :01 (04) =04 Pra/Th*:01(02)=02	06	24
Sem. III	Th:03(04)=12 Pra/Th*:03 (02)=06	18	Th :01 (04) =04 Pra/Th*:01(02)=02	06	24
Sem. IV	Th :03/04** (04) =12/16 Pra/Th: 03/04* *(02)=06/08 Pj <sup>#</sup> 01 (06) =06	24		-	24
Total	Th 12/13 (4) =48/52 Pra/Th 12/13(02)= 24/26 Pj: 1 (06)=06	78	03 (04)=12 Pra/Th*:03(02)=06	18	96

**Note:** Except for IV semester, the concerned Department shall offer one each of open elective theory and practical course or two \* open elective Theory courses for students of other science departments. \* Only for Mathematics; \*\* for Mathematics and Statistics; # except Mathematics & Statistics Abbreviations: Th = Theory; Pra = Practical; Pj = Project

GRADE CARD										
Program: MCA (.....)										
Name of the candidate:			Semester:IV							
Seat No:			Month & Year:							
Course	Course Code	Credit	IA Marks		Theory/ Practical		Max	Marks Obtained	Semester Grade Point	Credit Point
Compulsory Courses			Max	Obt	Max	Obt				
Course - I	XX CT 4.1	04	25	15	75	45	100	60	6.00	24.00

<b>Total</b>		<b>14</b>					<b>350</b>			

XX refers to course abbreviations. 4.1 refers to IV semester course 1; e.g. CHI CT 1.1= Chemistry Inorganic compulsory theory 1.1

# except for Mathematics and Statistics; \* For Statistics and mathematics; +Only for Statistics; ^only for Mathematics

**GPA for IV Semester = CP (IV Sem) / Credits (IV Sem) = 200 / 24.00 = 8.33**

GPA for I Semester = CP (I Sem) / Credits (I Sem)

CGPA for I Semester = GPA for I Semester CP (ISem) + CP (IISem)

CGPA for II Semester= CP(I SEM)+CP(II SEM)

---

Credit(I Sem)+ Credit(II Sem)

CGPA for III Semester= CP(I SEM)+CP(II SEM)+CP(III SEM)

---

Credit(I Sem)+ Credit(II Sem) +Credit(III Sem)

CGPA for the program = CP(I SEM)+CP(II SEM)+CP(III SEM)+CP(IV Sem)

---

Credit(I Sem)+ Credit(II Sem) +Credit(III Sem)+ Credit(IV Sem)

(\*CP:Credit Points)

## Annexure-1a

The program structure of the **MC**A shall be as follows:

Semester	No. of compulsory & Specialization courses (credits/course)	Total credits for compulsory & Specialization courses	No. of open elective course (credits/course)	Total credits of open Elective course	Total credits for the semester
Sem. I	Th :05 (04) =20Pra:01(04)=04	24	Th :01 (04) =04 Pra:01(02)=02	06	30
Sem. II	Th :05 (04) =20Pra:01(04)=04	24	Th :01 (04) =04 Pra:01(02)=02	06	30
Sem. III	Th :05 (04) =20Pra:01(04)=04	24	Th :01 (04) =04 Pra: 01(02)=02	06	30
Sem. IV	Th :05 (04) =20Pra:01(06)=06	26	-----	-----	26
Total	Th 20 (04) =80 Pra 03(04)=12 Pj : 1 (06)=06	98	Th:03 (04)=12 Pra:03(02)=06	18	116

**Note:** Except for I and IV semester, the concerned Department shall offer one each of open elective theory and practical for students of other science departments.

**Abbreviations:** Th = Theory; Pra = Practical; Pj = Project;

**Programme Outcomes (PO):**

<b>Programme Outcomes</b>	
<b>PO1</b>	Apply knowledge of Computing fundamentals, Computing specialization, Mathematics, and domain knowledge appropriate for the computing specialization to the abstraction and conceptualization of computing models from defined problems and requirements.
<b>PO2</b>	Identify, formulate, and solve complex Computing problems reaching substantiated conclusions using fundamental principles of Mathematics, Computing sciences, and relevant domain disciplines.
<b>PO3</b>	Design and evaluate solutions for complex computing problems, and design and evaluate systems, components, or processes that meet specified needs with appropriate consideration to societal, and environmental considerations.
<b>PO4</b>	Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of information to provide valid conclusions.
<b>PO5</b>	Create, select, adapt and apply appropriate techniques, resources, and modern computing tools to complex computing activities, with an understanding of the limitations.
<b>PO6</b>	Understand and commit to professional ethics and information security, responsibilities, and norms of professional computing practice.
<b>PO7</b>	Recognize the need, and have the ability, to engage in independent learning for continual development as a Computing professional.
<b>PO8</b>	Demonstrate knowledge and understanding of computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
<b>PO9</b>	Communicate effectively with the computing community, and with society at large, about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.
<b>PO10</b>	Understand and assess societal, environmental, health, safety, legal, and cultural issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.
<b>PO11</b>	Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.
<b>PO12</b>	Identify a timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

**Programme Specific Outcome (PSO):**

<b>Program Specific Outcome (PSOs)</b>	
PSO1	Gain the knowledge of computer programs/computer-based systems in the areas related to algorithms, networking, web design, database systems, data mining, artificial intelligence, IoT, Finite Automata and advanced java and operating system.
PSO2	Acquire professional skills and knowledge of software design and testing methods which will help to work as software engineer.
PSO3	Provide effective and efficient real time solutions using acquired knowledge in various domains.
PSO4	To make graduates understand cross cultural, societal, professional, legal and ethical issues prevailing in industry.
PSO5	Develop the ability to communicate ideas effectively.
PSO6	They will possess leadership and managerial skills with best professional ethical practices and social concern and will be able to communicate technical information effectively, both orally and in writing.
PSO7	Design and develop various application software projects to meet the demands of IT industry using modern software tools like php, java, net beans, .NET framework, mysql and spss.
PSO8	The subjects in the syllabus help the students to prepare for NET and KSET exams, so that they can join teaching profession or research work.
PSO9	The students can work on academic projects.

## MCA 1.1: Digital Logic and Computer Design

Total Hours: 48

### Course Outcome

**Course Code: MCA 1.1**      **Course Name: Digital Logic and Computer Design**

Upon Completion of the course, the students will be able to

- Introduce the concept of digital and binary systems.
- To design and analyze combinational logic circuits.
- To design and analyze sequential logic circuits.
- To learn the system design and memory organization

### Unit-I

**10 Hrs**

**Number Systems:** binary, octal hexadecimal, number base conversion, addition, subtraction of binary numbers, one's and two's complements, positive and negative numbers, character codes ASCH, EBCDIC.

**Boolean algebra and Logic gates:** Axiomatic definition of Boolean algebra, Basic theorems and properties, Boolean functions, canonical and standard forms, logic functions using gates and design of combinational circuits.

### Unit-II

**10 Hrs**

**Simplification of Boolean functions:** Karnaugh maps, product of sums, sum of products, simplification, NAND and NOR implementation, don't care condition.

**Combinational and Sequential logic:** Adders, subtractors, code, converters, decoder multiplexer, flip-flops, shift registers, counters.

### Unit-III

**10 Hrs**

**Processor Logic Design:** Processor organization, arithmetic logic unit, design of arithmetic and logic circuits, design of arithmetic logic unit, status registers, design of shifter, processor unit, design of accumulator.

**Control Logic Design:** Processor Organization, Hardware control micro program control, control of processor unit, PLA control, micro program sequencer, computer design.

### Unit- IV

**10 Hrs**

**Micro – computer System Design:** Microcomputer organization, microprocessor organization, instructions and addressing modes, subroutines and interrupts, memory organization, input-output interface, programmed input-output, input – output processor, input – output device characteristics, direct memory access (DMA).

**Unit-V****8 Hrs**

**Memory Organization:** Serial access, random access memories (RAM), read only memories (ROM), virtual memory, cache memory.

**Introduction to 8085 Assembly Language Programming:** The 8085 Programming model, Instruction classification, Instruction format, How to write, Assemble and Execute a simple program, Overview of the 8085 Instruction set.

***References:***

1. Digital Logic and Computer Design, Morris Mano, PHI
2. Digital Computer Fundamentals, Bartee, T.C., MC Graw Hill
3. Computer Architecture and Organization, Tanenbaum A.S., Mc Graw Hill
4. Computer Architecture and Organization, hayes, J.P., Mc Graw Hill
5. Introduction to Microprocessors, Gaonkar, Tata Mc Graw Hill
6. Digital Computer Electronics Malvino & Brown Shird Education, TMH.

## MCA 1.2: Discrete Mathematical Structures

### Course Outcome

Upon Completion of the course, the students will be able to

- Comprehend and evaluate mathematical arguments revolving around computation.
- Understand the basics of Combinations and Permutations.
- Understand the basics of Graphs and Trees to real world applications.
- Represent relations matrices and digraphs.

Total Hours : 48

#### Unit-I

**10Hrs**

**The Foundations: Logic and Proofs:** Propositional Logic, Applications of Propositional Logic, Propositional Equivalences, Predicates and Quantifiers, Nested Quantifiers, Rules of Inference, Introduction to Proofs, Proof Methods and Strategy

#### Unit-II

**10Hrs**

**Basic Structures: Sets, Functions, Sequences, Sums, and Matrices:** Sets, Set Operations, Functions, Sequences and Summations, Matrices.

#### Unit-III

**10Hrs**

**Induction and Recursion:** Mathematical Induction, Strong Induction and Well-Ordering, Recursive Definitions and Structural Induction, Recursive Algorithms, Program Correctness.

**Advanced Counting Techniques:** Applications of Recurrence Relations, Solving Linear Recurrence, Relations, Divide-and-Conquer Algorithms and Recurrence Relations, Generating Functions, Inclusion-Exclusion, Applications of Inclusion-Exclusion.

#### Unit-IV

**08Hrs**

**Relations :** Relations and Their Properties, n-ary Relations and Their Applications, Representing Relations, Closures of Relations, Equivalence Relations, Partial Orderings.

#### Unit-V

**10 Hrs**

**Graphs:** Graphs and Graph Models, Graph Terminology and Special Types of Graphs, Representing Graphs and Graph Isomorphism, Connectivity, Euler and Hamilton Paths, Shortest-Path Problems, Planar Graphs, Graph Coloring.

**Trees:** Introduction to Trees, Applications of Trees, Tree Traversal, Spanning Trees, Minimum Spanning Trees.

#### Reference Book:

1. Discrete Mathematics and Its Applications, Kenneth H. Rosen: Seventh Edition, 2012.

2. Discrete Mathematical Structure, Bernard Kolman, Robert C. Busby, Sharon Ross, 2003.
3. Graph Theory with Applications to Engg& Comp. Sci.: Narsingh Deo-PHI 1986
4. Discrete and Combinatorial Mathematics Ralph P. Grimaldi, B. V. Ramana, Pearson, Education, 5 Edition
5. Discrete Mathematical Structures. Trembley and Manohar.

## **MCA 1.3: Introduction to Algorithms**

Total Hours : 48

### **Course Outcomes:**

Upon Completion of the course, the students will be able to

- Understand the difference between program and algorithms.
- Learn how to write the algorithms.
- Understand the importance of algorithms.

### **Unit-I:**

**10 hrs**

#### **Introduction to Computer Problem Solving**

Introduction, The Problem-solving Aspect, Top- down Design, Implementation of Algorithms, Program Verification, The Efficiency of Algorithms, The Analysis of Algorithms.

#### **Fundamental Algorithms**

Introduction, Exchange of Values of Two Variables, Counting, Summation of a Set of Numbers, Factorial Computation, Sine Function Computation, Generation of the Fibonacci sequence, Reversing the Digits of an Integer, Base Conversion, Character to Number Conversion

### **Unit-II:**

**10hrs**

#### **Factoring Methods**

Introduction, Finding the Square Root of a Number, The Smallest Division of an Integer, The Greatest Common Divisor of Two Integers, Generating Prime Numbers, Computing the Prime Factors of an Integer, Generation of Pseudo-random Numbers, Raising a Number to a large Power, Computing the  $n$ th Fibonacci number

### **Unit-III:**

**10hrs**

#### **Array Techniques**

Introduction, Array Order Reversal, Array Counting or Histogram Ming, Finding the Maximum Number in a Set, Removal of Duplicates from an Ordered Array, Partitioning an Array, Finding the  $k$ th Smallest Element, Longest Monotone Subsequence

### **Unit-IV:**

**10hrs**

#### **Merging, Sorting and Searching**

Introduction, the Two-way Merge, Sorting by Selection, Sorting by Exchange, Sorting by Insertion, Sorting by Diminishing Increment, Sorting by Partitioning, Binary Search.

### **Unit-V:**

**08 hrs**

#### **Dynamic Data Structure Algorithms**

Introduction, Stack Operations, Queue Addition and Deletion, Linked List Search, LinkedList Insertion and Deletion, Binary Tree Search, Binary Tree Insertion and Deletion.

#### **Recursive Algorithms**

Introduction, Binary Tree Traversal, Recursive Quick sort, Towers of Hanoi Problem, Sample Generation, Combination Generation, Permutation Generation.

## **MCA 1.4: Data Structures using C**

**Total hours :48**

### **Course Outcomes:**

Upon Completion of the course, the students will be able to

- Learn to analyze algorithms and algorithm correctness.
- Learn to summarize searching and sorting techniques.
- Learn to describe stack, queue and linked list operation.
- Learn to have knowledge of tree and graphs concepts.

### **Unit- I INTRODUCTION TO DATA STRUCTURES**

08Hrs

Basic concepts: Introduction to data structures, classification of data structures, operations on data structures; Searching techniques: Linear search and Binary search; Sorting techniques: Bubble sort, selection sort, insertion sort and comparison of sorting techniques.

### **Unit II - II LINEAR DATA STRUCTURES**

10 Hrs

Stacks: Primitive operations, implementation of stacks using Arrays, applications of stacks, arithmetic expression conversion and evaluation; Queues: Primitive operations; Implementation of queues using Arrays, applications of linear queue, circular queue and double ended queue (deque).

### **Unit - III LINKED LISTS**

12 Hrs

Linked lists: Introduction, singly linked list, representation of a linked list in memory, Types of linked lists: Single linked lists, Circular linked lists, doubly linked lists; operations on a single linked list; Applications of linked lists: Polynomial representation and sparse matrix manipulation.

### **Unit - IV NON LINEAR DATA STRUCTURES**

10 Hrs

Trees: Basic concept, binary tree, binary tree representation, array and linked representations, binary tree traversal, binary tree variants, application of trees; Graphs: Basic concept, graph terminology, graph implementation, graph traversals, Application of graphs, Priority Queue.

### **Unit - V Binary search tree and HASHING**

08 Hrs

Binary search trees, properties and operations; Balanced search trees: AVL trees; Introduction to M-Way search trees, B trees; Hashing and collision: Introduction, hash tables, hash functions, collisions, applications of hashing.

## MCA 2.1: PROBABILITY AND STATISTICS

Total Hours : 48

### Course Outcomes:

Upon Completion of the course, the students will be able to

- Understanding the basic probability axioms and rules.
- Understanding to derive the probability density function of transformations of random variables and use these techniques to generate data from various distributions.
- Understanding to translate real-world problems into probability models.
- Understanding to calculate probabilities of absorption and expected hitting times for discrete time Markov chains.

Unit I:

8hrs.

**Probability :** Sample space and Events - Probability -The Axioms of probability - some Elementary Theorems - Conditional probability -Baye's Theorem - Random variables – Discrete and continuous probability distributions.

Unit II:

10hrs.

**Distributions** Binomial, Poisson and normal Distributions, related properties. Sampling Distributions – Sampling Distribution of means.

UNIT III:

8 hrs.

**Estimation** Point Estimation - Interval Estimation – Introduction to student's t-distribution - Confidence interval for Single Mean and Single Proportion (Large and Small samples).

Unit IV:

14hrs.

**Testing of Hypothesis-I :**Testing of hypothesis-Introduction- Null hypothesis-Alternative hypothesis- Type I and Type II errors – Critical region. Test of hypotheses for Single Mean (Large and small samples) - Test of hypotheses for Single Proportion (Large and small samples).**Testing of Hypothesis-II:** Tests of hypotheses for difference of Means (Large and Small samples) - Tests of hypotheses for difference of proportions(Large samples) – Introduction to Chi-Square distribution and Goodness of Fit.

Unit V:

8hrs.

**Correlation & Regression:** Coefficient of correlation- Regression Coefficient- The lines of regression- The rank correlation.

## MCA 2.2: COMPUTER NETWORKS

Total Hours : 48

### Course Outcomes:

Upon Completion of the course, the students will be able to

- Understanding the network protocols.
- Understanding the network architecture and its components.
- To learn the different encoding and decoding mechanisms involved in different types of transmission media and to measure the transmission impairments.
- Understand different wireless and mobile networks concepts.

### UNIT-I:

10hrs

**Foundation-** Building a Network, Applications, Requirements, Architecture, Software, Performance.

**Direct Links-** Connecting to a Network, Technology Landscape, Encoding, Framing, Error Detection, Reliable Transmission, Multi-Access Networks

### UNIT-II:

10hrs

**Internetworking:** Switching Basics, Switched Ethernet, Spanning Tree Algorithm, Broadcast and Multicast, Virtual LANs (VLANs), What Is an Internetwork? Service Model, Global Addresses, Datagram Forwarding in IP, Subnetting and Classless Addressing, Address Translation (ARP), Host Configuration (DHCP), Error Reporting (ICMP), Virtual Networks and Tunnels, Routing- Network as a Graph, Distance-Vector (RIP), Link State (OSPF), Metrics

### UNIT-III:

10hrs

**Global Internet-** Routing Areas, Inter-domain Routing (BGP)

**IP Version 6-** Historical Perspective, Addresses and Routing, Packet Format, Advanced Capabilities

**Multicast-** Multicast Addresses, Multicast Routing (DVMRP, PIM, MSDP)

**Multiprotocol Label Switching-** Destination-Based Forwarding, Explicit Routing, Virtual Private Networks and Tunnels

### UNIT-IV:

10hrs

**Simple Demultiplexor (UDP)**

**Reliable Byte Stream (TCP)-** End-to-End Issues, Segment Format, Connection Establishment and Termination, Sliding Window Revisited, Triggering Transmission, Adaptive Retransmission

**Remote Procedure Call-** RPC Fundamentals

**Transport for Real-Time (RTP)-** Requirements, RTP Design, Control Protocol

**Congestion Control- TCP Congestion Control**

**UNIT-V:****08hrs**

**Applications-Traditional Applications-** Electronic Mail (SMTP, MIME, IMAP), World Wide Web (HTTP), Web Services

**Multimedia Applications-** Session Control and Call Control (SDP, SIP, H.323), Resource Allocation for Multimedia Applications

**Reference books:**

1. Larry Peterson, "Computer Networks- A system approach", 5<sup>th</sup> edition, Elsevier

4. Behrouz Forouzan, "Data Communications and Networking", 4<sup>th</sup> edition, McGraw Hill, 2017

## **MCA 2.3: PYTHON PROGRAMMING**

**Total 48hrs.**

### **Course Outcomes:**

Upon Completion of the course, the students will be able to

1. Acquire programming skills in core Python.
2. Acquire Object Oriented Skills in Python
3. Develop the skill of designing Graphical user Interfaces in Python
4. Develop the ability to write database applications in Python

### **Unit-I**

12hrs.

**INTRODUCTION TO PYTHON PROGRAMMING:** Python interpreter and interactive mode; values and types variables, expressions, statements, tuple assignment, Order of operations, comments, debugging; modules and functions: function Calls, adding new functions, Definitions and Uses, flow of execution, parameters and arguments, Fruitful functions. Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: state, while, for, range, break, continue, pass; recursion; Strings: string slices, immutability, string functions and methods, string module; Lists as arrays.

### **Unit-II**

12hrs.

**LISTS, TUPLES, DICTIONARIES:** Lists: Traversing a List, list operations, list slices, list methods, Map, Filter and Reduce, list loop, mutability, aliasing, cloning lists, list parameters; Dictionaries: operations and methods; advanced list processing - list comprehension; Tuples: tuple assignment, tuple as return value.

### **Unit-III**

07hrs.

**FILES, MODULES, PACKAGES:** Files and exception: text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, packages: PANDAS, NUMPY, SCIKIT-LEARN;

### **Unit-IV**

10hrs.

**CLASSES AND OBJECTS:** Introduction, Defining Classes, Creating Objects, Data Abstraction and Hiding through Classes, Class method and self argument, Class Constructor (init() Method), Data Members, Calling a Class Method from another Class Method, Class Methods and Static Methods, Inheritance, Types of Inheritance, Abstract Classes and Interfaces, Operator Overloading, Overriding Methods.

### **Unit-V**

07hrs.

**Multithreading, GUI Programming, Graphics, Plotting and Web Programming:** Multithreading-Introduction, Threading Module (Creating a Thread, Synchronizing Threads) GUI Programming with tkinter Package, Simple Graphics using Turtle, Plotting Graphs in Python, Web Programming using Python.

### **REFERENCES:**

4. Robert Sedgewick, Kevin Wayne, Robert Dondero, —Introduction to Programming in Python: An Inter-disciplinary Approach, Pearson India Education Services Pvt. Ltd., 2016.

## **MCA 2.4: DATABASE MANAGEMENT SYSTEM**

**Total hours: 48**

### **Course Outcomes:**

Upon Completion of the course, the students will be able to

- Analyze the asymptotic performance of algorithms.
- Apply important algorithmic design paradigms and methods of analysis.
- Ability to analyze the performance of *algorithms*.
- Ability to choose appropriate *algorithm* design techniques for solving problems.

### **UNIT-I INTRODUCTION TO DBMS**

10Hrs

Introduction, characteristics of database, advantages of DBMS over file processing system, A Brief History of Database Applications. Database softwares (microsoft SQL server, oracle RDBMS, MySQL) Data Models, Schemas, and Instances; Three-Schema Architecture and Data Independence; Database Languages and Interfaces; Centralized and Client/Server Architectures for DBMS.

### **UNIT-II DATA MODELING**

10 Hrs

Entity-Relationship Diagram, Relational Model - Constraints, Languages, Design, and Programming, Relational Database Schemas, Update Operations and Dealing with Constraint Violations; Relational Algebra and Relational Calculus; Codd Rules.

### **Unit-III: Enhanced Data Models**

12 Hrs

Temporal Database Concepts, Multimedia Databases, Deductive Databases, XML and Internet Databases; Mobile Databases, Geographic Information Systems, Genome Data Management, Distributed Databases and Client-Server Architectures.

### **UNIT-IV SQL AND NOSQL**

08 Hrs

Data Definition and Data Types; Constraints, Queries, Insert, Delete, and Update Statements; Views, Stored Procedures and Functions; Database Triggers, SQL Injection. NOSQL: NOSQL and Query Optimization; Different NOSQL Products, Querying and Managing NOSQL; Indexing and Ordering Data Sets; NOSQL in Cloud.

### **UNIT -V NORMALIZATION FOR RELATIONAL DATABASES**

08 Hrs

Functional Dependencies and Normalization; Algorithms for Query Processing and Optimization; Transaction Processing, Concurrency Control Techniques, Database Recovery Techniques, Object and Object-Relational Databases; Database Security and Authorization.

### **References:**

1. "Database System Concepts" by Silberschatz, Korth, Sudarshan, 4th Edition, McGraw Hill Publication.

4. “Fundamentals of Database Systems” by Elmsari, Navathe, 5th Edition, Pearson Education (2008).

## **MCA OEC 2.7: Computer Concepts and Office Automation**

Total Hours: 48

Upon Completion of the course, the students will be able to

- Understand different Computer Peripherals.
- Understand and apply different Software components.
- Learn about Microsoft office software and its applications.

### **Unit-I**

**10 Hrs**

**Basics:** History and generations of Computer, Types of Computer, Organization of Computer System, Hardware and Software Components, Memory unit: Types of memory, ROM, RAM, types of RAM & ROM, Introduction to cache and virtual memory.

### **Unit-II**

**10 Hrs**

**Number system:** Binary Octal, Hexa-decimal, Number base conversion, Binary addition, Subtraction, One's and Two's compliment, Character codes – ASCII, EBCDIC.

### **Unit-III**

**10 Hrs**

**Operating System:** Types of operating system, Functions, Introduction to DOS and WINDOWS operating system.

**Software:** Types of languages, Types of software (System and Application software).

### **Unit-IV**

**10 Hrs**

**Network and Internet:** History and evolution of Computer Network, Types of network (LAN, MAN & WAN), Internet and its applications.

### **Unit-V**

**08 Hrs**

**Office Automation:** Working with MS-Word, MS-Excel and MS-POWER POINT

### **Reference:**

1. Computer Concepts & C Programming, P.B.Kottur, Sapna Book House Bangalore 2009

5. Microsoft Office-Complete reference, Curt Simmons, Mc Graw Hill, 2003

## MCA 3.1: Design and Analysis of Algorithms

Total Hours : 48

### Course Outcomes:

Upon Completion of the course, the students will be able to

- Analyze the asymptotic performance of algorithms.
- Apply important algorithmic design paradigms and methods of analysis.
- Ability to analyze the performance of *algorithms*.
- Ability to choose appropriate *algorithm* design techniques for solving problems.

### Unit-I:

12 hrs

**Introduction:** What is an algorithm?, Fundamentals of Algorithmic Problem Solving, Important Problem Types, Fundamental data Structures.

**Fundamentals of the Analysis of Algorithm Efficiency:** Analysis Framework, Asymptotic Notations and Basic efficiency classes, Mathematical analysis of Recursive and Non-recursive algorithms.

**Brute Force and Exhaustive Search:** Selection Sort and Bubble Sort, Sequential Search and Brute-Force String Matching, Depth-First Search and Breadth-First Search

### Unit-II:

8 hrs

#### Decrease-and-Conquer

Insertion Sort, Topological sorting, Algorithms for Generating Combinatorial Objects, Binary Search.

#### Divide-and-Conquer

Merge sort, Quick sort, Binary tree Traversals and related properties, Multiplication of large integers, Strassen's Matrix Multiplication

### Unit-III:

10 hrs

#### Space and Time Tradeoffs

Sorting by Counting, Input Enhancement in String Matching, Hashing.

### Unit-IV:

10 hrs

#### Dynamic Programming

Computing a binomial coefficient, Warshall's and Floyd's Algorithms, The Knapsack Problem and Memory Functions.

### Unit-V:

08 hrs

**Greedy Technique** Prim's Algorithm, Kruskal's Algorithm, Dijkstra's Algorithm.

#### Limitations of Algorithm Power

Lower-Bound Arguments, Decision Trees, P, NP and NP-Complete Problems.

### Reference Books:

1. Introduction to the Design and Analysis of Algorithms, 3<sup>rd</sup> Edition, by Anany Levitin, Pearson, 2012,

2. Introduction to Algorithms, , 3Ed, by T. Cormen , C. Leiserson , R. Rivest , C Stein. International Edition, MIT Press, 2009.
3. Fundamentals of Computer Algorithms, *Ellis Horowitz; Sartaj Sahni; SanguthevarRajasekaran, Universitypress*, 2008.
4. Algorithm Design, Michael T Goodrich and Roberto Tamassia, Wiley India.
5. Introduction to Design and Analysis of Algorithms “R C T Lee, S S Tseng, R C, Chang, Y T Tsai, A Strategic Approach, Tata McGraw Hill.

### **MCA 3.3: Data Mining**

Total Hours: 48

#### **Course Outcomes:**

Upon Completion of the course, the students will be able to

- Data preprocessing and data quality.
- Modeling and designing of data warehouses.
- apply Algorithms for data mining.
- Ability to apply acquired knowledge for understanding data and select suitable methods for data analysis.

#### **Unit-I**

**10 Hrs**

Data mining – Motivation – Importance - DM Vs KDD - DM Architecture - Data Types – DM Tasks –DM System Classification - Primitives of DM - Data Mining Query Language - DM Metrics - DM Applications - DM Issues – Social Implications of DM

#### **Unit-II**

**10 Hrs**

Data Preprocessing: Summarization - Data cleaning - Data Integration and Transformation - Data Reduction - Discretization and Concept Hierarchy Generation

#### **Unit-III**

**10 Hrs**

Mining Frequent Patterns – Frequent Item set Mining Methods. Classification: Classification by Decision Tree Induction – Bayesian Classification – Rule based Classification - Prediction– Accuracy and Error Measures

#### **Unit-IV**

**10 Hrs**

Cluster Analysis – Types of Data in Cluster Analysis – Categorization of clustering Methods – Partition Methods - Outlier Analysis – Mining Data Streams – Social Network Analysis – Mining the World Wide Web

#### **Unit-V**

**8 Hrs**

Data Warehousing: OLTP Vs OLAP - Multidimensional Data Model -DW Architecture Efficient Processing of OLAP queries - Metadata repository – DWH Implementation – OLAM

#### **References:**

## MCA 3.4: WEB TECHNOLOGIES

**Total Hours : 48**

### Course Outcomes:

Upon Completion of the course, the students will be able to

- Students are able to develop a dynamic webpage by the use of java script and DHTML.
- Students will be able to write a well formed / valid XML document.
- Students will be able to connect a java program to a DBMS and perform insert, update and delete operations on DBMS table.
- Students will be able to write a server side java application called Servlet to catch form data sent from client, process it and store it on database.
- Students will be able to write a server side java application called JSP to catch form data sent from client and store it on database.

### Unit-I:

**10 hrs**

Web essentials – W3C - clients – servers - communication – markup languages – XHTML – simple XHTML pages style sheets – CSS

### Unit-II:

**12 hrs**

**Client side programming:** Introduction to Java script, Basic Syntax, Variables and Data types, Statements, Operators, Literals, Functions, Objects, Arrays, Built-in objects, Java script debuggers.

**Host objects Browsers and the DOM:** Introduction to Document Object Model, DOM history and levels, Intrinsic Event Handling, Modifying Element Style, The Document tree, DOM Event handling.

### Unit-III:

**12 hrs**

**Server side programming:** (Java servlets) - Servlet Architecture Overview, A “Hello World!” Servlet, Servlet Generating Dynamic Content, Servlet lifecycle, Parameter Data, Sessions, Cookies, URL Rewriting, Other Servlet capabilities, Data Storage, Servlets and Concurrency.

**Separating Programming and Presentation (JSP Technology):** Introduction to Java Server Pages, JSP and Servlets, Running JSP Applications, Basic JSP, Java Beans Classes and JSP, Tag Libraries and Files, Support for the Model – View Controller Paradigm.

### Unit-IV:

**07 hrs**

**Representing Web Data:** XML, XML document and Vocabularies, XML Declaration, XML Namespaces, Java Script and XML: Ajax, DOM based XML processing, Event-oriented Parsing: SAX, Transforming XML Documents, Selecting XML Data: XPath Template-based Transformation: XSLT, Displaying XML Documents in browsers.

### Unit-V:

**07 hrs**

**Web Services:** JAX-RPC, WSDL, XML Schema and SOAP: Web Service Concepts, Writing a Java Web Service, Writing a Java Web Service Client, Describing Web Services: WSDL, Representing Data Types: XML Schema, Communicating Object Data: SOAP.

Databases and Java Servlets, Databases and JSP

### References

2. Chris Bates, “Web Programming – Building Internet Applications”, “Wiley India, 2006.

## MCA OEC 3.7: SPSS Software

Total Hours: 48

### Course Outcomes:

Upon Completion of the course, the students will be able to

- Understand how to start SPSS.
- Define a variety of statistical variables.
- Enter basic data into SPSS and carry out a statistical analysis that can test hypotheses.

### UNIT-I

10Hrs

**Table of Contents:** Overview of PASW Statistics, Introduction to PASW: Menus, Tool Bar, Dialogue Box, Designate Window, Basic Steps for performing any Statistical Procedure

**Data Management:** Creating a Data File, Defining Variables, Entering the Data, Saving Data, Opening an existing Data File, Inserting Variables, Inserting Cases, Identifying Duplicate Cases, Identifying Unusual Cases, Sorting Cases, Merging a File: Add Cases, For Adding Variables, Data Aggregation, Splitting File, Selecting Cases, Listing Cases

### UNIT-II

10Hrs

**Data Transformation:** Computing a New Variable, Recoding Variables, Automatic Recode, Visual Binning, Rank Cases

**Describing Data Numerically:** Types of Measurement Scales, Summary Measures, Frequencies, Descriptive Statistics, Explore, Crosstabs

### UNIT-III

10Hrs

**Describing Data Graphically:** Line Chart, Pie Chart, Bar Chart, Histogram and the Standard Normal Curve, Box Plot, Scatter Diagram, P-P Plot, Q-Q Plot, Chart Builder, Formatting Charts

### UNIT-IV

10Hrs

**One Sample t-Test :** Hypothesis Testing, Steps in Hypothesis Testing, Assumptions of Hypothesis Testing, Testing for Population Mean, Statistical and Practical Significance

**Independent Sample t-Test:** Assumptions of Independent Sample t-Test, Procedure for Testing for Differences in Means between Groups, Interpretation of Null Results, Effect Size

### UNIT-V

08Hrs

**Nonparametric Statistics:** Runs Test, Chi-Square Test, Mann-Whitney U Test, Wilcoxon Signed Rank Test, Kruskal-Wallis Test

### References

5. A Visual Approach to SPSS for Windows: A Guide to SPSS 17.0, by Leonard D. Stern, Pearson (2009)

## MCA 4.1:Software Engineering

Total Hours : 48

### Course Outcomes:

Upon Completion of the course, the students will be able to

- Learn the phases of software development.
- Develop process models and process system models.
- Gather, understand, analyze and specify requirements.
- Develop architectural diagram, and implement by following coding principles.
- Apply testing strategies and handle software product maintenance issues.

### Unit-I

10 Hrs

**The Product and The Process:** Evolving role of software, software characteristics and components, Crisis, Software Myths, Software Engineering-A Layered Technology, Software process, linear sequential model, Prototyping model, RAD model, Evolutionary software process model.

**Project Management Concepts:** The Management Spectrum, The People, The Product, The Process, and The Project .W5HH Principle.

**Software Process and Project Metrics:** Measures, Metric Indicators, Metric in process and the Project Domains ,Software Measurement, Metrics for software quality.

### Unit-II

10 Hrs

**Software Project Planning:** Project Planning Objectives, Software Project Estimation, decomposition Techniques, Empirical Estimation Models.

**Risk Analysis and Management:** Software Risks, Risk Identification, Risk Projection, Risk Refinement and Risk Mitigation, Monitoring, and Management.

### Unit-III

10Hrs

**Analysis Concepts and Principles:** Requirement analysis, communication techniques, analysis principles, software prototyping and specification.

**Analysis Modeling:** Elements of analysis model, data modeling, functional modeling, behavioral modeling, the mechanics of structured analysis, data dictionary, other classical analysis methods.

### Unit-IV

10hrs

**Design Concepts and Principles:** Software design and software engineering design process, design principles, design concepts, design methods, data design, architectural design and process, transform and transaction mappings, design post processing, architectural design optimization, interface design, procedural design.

### Unit-V

08 hrs

**Software Testing Techniques and Strategies:** Fundamentals, Test case design, White box testing, Basis path testing, Control structure testing, Black box testing, Software testing strategies.

**Software Configuration Management:** Configuration management, maintenance costs, maintenance side effects, maintenance tissues.

**Software Quality Assurance:** Quality Concepts, Software Quality Assurance, FTR, ISO 9001, ISO-9002, ISO-9003, Introduction to CASE, DOD standard 2167 A.

**REFERENCES:**

## **MCA 4.3: ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING**

**Total Hours : 48**

### **Course Outcomes:**

Upon Completion of the course, the students will be able to

- Fundamental understanding of the history of artificial intelligence (AI) and its foundations. Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning.
- Demonstrate awareness and a fundamental understanding of various applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models.

### **Unit-I:**

**12 hrs**

Introduction: Introduction to AI applications and AI techniques, Production systems, control strategies, reasoning - forward and backward chaining. Intelligent Agents: Definitions of a rational agent, reflex, model-based, goal-based, and utility-based agents, the environment in which a particular agent operates.

### **Unit-II:**

**12 hrs**

Searching Techniques and Game Playing: Breadth first search, depth first search, iterative deepening, uniform cost search, hill climbing, simulated annealing, genetic algorithm search, heuristic search, Best first search, A\* algorithm, AO\* algorithm, Minimax and game trees, refining minimax, Alpha - Beta pruning, constraint satisfaction.

### **Unit-III:**

**10 hrs**

Knowledge Representation: First order predicate calculus, resolution, unification, natural deduction system, refutation, logic programming, PROLOG, semantic networks, frame system, value inheritance, conceptual dependency, Ontologies. Planning: basic representation for planning, symbolic-centralized vs. reactive-distributed, partial order planning algorithm.

### **Unit-IV:**

**07 hrs**

Machine learning: Introduction to different types of learning, Supervised and Unsupervised learning — Reinforcement learning- Basics of Neural network models.

### **Unit-V:**

**07 hrs**

Applications of Artificial Intelligence- Natural Language Processing, Speech recognition, Computer vision, Expert systems.

### **REFERENCE:**

1. S. Russell and P. Norvig, Artificial Intelligence: A Modern Approach (3rd ed.), Pearson Education, 2010.
2. Elaine Rich and Kelvin Knight, Artificial Intelligence, Tata McGraw Hill, 2002.
3. Nils J Nilson, Artificial Intelligence: A New Synthesis, Morgan Kaufmann Publishers, Inc., San Francisco, California, 2000.

## **MCA 4.4: OPERATION RESEARCH**

**Total Hours : 48**

### **Course Outcomes:**

Upon Completion of the course, the students will be able to

- Formulate and solve problems as networks and graphs.
- Develop linear programming (LP) models for shortest path, maximum flow, minimal spanning tree, critical path, minimum cost flow, and transportation problems.
- Solve the problems using special solution algorithms.

### **UnitI**

**10hrs**

Introduction: History, Definitions, Features of Operation Research, Models and modeling in OR, Methods for solving OR models, Advantages of OR Study. Linear Programming: Structure of Linear programming model, General Mathematical model of LPP, guidelines on linear programming models, Examples of LP model formulation.

### **UnitII**

**12hrs**

Linear programming: Graphical solution Methods of LP problems, Simplex algorithm(Maximization case), Simplex algorithm (Minimization case): two phase and Big-M method. Duality in Linear programming

### **Unit III**

**10hrs**

Transportation Problem : Mathematical model of transportation problem, The transportation algorithm, NWCM, LCM, VAM, Test for optimality, variations in Transportation problem.

### **UnitIV**

**10hrs**

Assignment Problem: Mathematical models of Assignment Problem, Hungarian method for solving Assignment problem. Network Models: Scope and definition of Network models, minimal spanning tree algorithm, TSP as a network model, project management :CPM and PERT.

### **UnitV**

**6hrs**

Decision Theory and Decision Trees : Steps in decision making, Types of Decision making environment Decision making under uncertainty, Decision making under risk, Posterior probabilities and Bayesian Analysis, Decision Tree Analysis.

### **CORE THEORY ELECTIVES: I**

<b>Subject Code</b>	<b>Elective Title</b>
MCA 3.2A	Linear Algebra
MCA 3.2B	Operating System Concepts
MCA 3.2C	Computer Graphics
MCA 3.2D	Mobile Computing
MCA 3.2E	Cloud Computing
MCA 3.2F	Business Intelligence Systems

**MCA 3.2A: LINEAR ALGEBRA**  
**Total hours-48**

**Course Outcomes:**

Upon Completion of the course, the students will be able to

- Solve systems of linear equations
- Use matrix algebra and the related matrices to linear transformations
- Compute and use determinants
- Compute and use eigenvectors and eigenvalues
- linear dependence and independence and spanning
- Familiar with the notion of a linear transformation and its matrix.

**Unit-I**

**12hrs**

**Introduction to Vector:** Vector and linear combination, Length and Dot products, Matrices.

**Solving Linear Equations:** Vectors and linear equations, The idea of elimination, Elimination using matrices, Rules for matrix, Inverse Matrices, Elimination=Factorization:  $A=LU$ , Transposes and permutations.

**Unit-II**

**12hrs**

**Vector Spaces and Subspaces:** Spaces of Vectors, The Null space of A, The Complete Solution to  $Ax=b$ , Independence, Basis and Dimension, Dimension of the Four Subspaces.

**Unit-III**

**10hrs**

**Orthogonality:** Orthogonality of the four subspaces, Projections, Least squares approximations, Orthogonal bases and Gram-Submidt.

**Determinants:** The properties of Determinants, Permutations and Cofactors, Cramer's Rule, Inverses, and Volumes.

**Unit-IV**

**07hrs**

**Eigenvalues and Eigenvectors:** Introduction to Eigenvalues, Diagonalizing a Matrix, Systems of Differential equations, Symmetric Matrices, Positive Definite Matrices.

**Unit-V**

**07hrs**

**Single Value Decomposition (SVD):** Image processing by Linear Algebra, Bases and Matrices in the SVD, Principal Component Analysis (PCA by SVD), The Geometry of the SVD.

## MCA 3.2B: Operating System Concepts

Total hours: 48

### Course Outcomes:

Upon Completion of the course, the students will be able to

- Understanding the concepts of Allocate Main Memory based on various memory management techniques
- Compare Memory allocation techniques, page replacement policies for dynamic memory management.
- Schedule CPU time using scheduling algorithm for processors. Compare various scheduling algorithms

### Unit-I

10Hrs

**Introduction:** Operating system concepts, types of operating system—Batch, interactive, time sharing, real time and distributed operating systems. Operating system services, system calls, system components, system programs.

**Process Management:** Processes—process scheduling, operation on processors, co-operating process threads, interprocess communication, concept of critical section problem and solution, semaphores and implementation.

### Unit-II

10Hrs

**CPU Scheduling:** Scheduling criteria and scheduling algorithms, multiple processor scheduling.

**Deadlock:** Deadlock

problem, characterization, prevention, avoidance, detection, recovery, combined approach to deadlock handling.

### Unit-III

10 Hrs

**Memory Management:** Logical and physical address, swapping overlays, contiguous allocation, paging segmentation, segmentation with paging, virtual memory—demand paging and page replacement algorithms.

### Unit-IV

10 Hrs

**Disk and Drum Scheduling:** Physical characteristics FCFS, Shortest seek time first, SCAN scheduling, selection of disk scheduling algorithm, sector queuing.

### Unit-V

08Hrs

**File System:** Files, access method, directory structure, protection and file system implementation, allocation methods.

**Protection:** Goals, mechanism and policies, domain of protection, access matrix and its implementation, dynamic protection structure, revocation, security.

## MCA3.2C:Computer Graphics

TotalHours:48

### Course Outcomes:

Upon Completion of the course, the students will be able to

- Using algorithms for scan conversion and filling of basic objects and their comparative analysis.
- Use of geometric transformations on graphics objects and their application in composite form.

### Unit-I

10Hrs

**Introduction:** Computer graphics and its applications in various fields. Hardware system for graphics working of different input devices, visual display devices and hard copy device. Introduction to different coordinate systems.

**Raster Scan display:** Concepts of resolution, aspect ratio, refresh rate and frame buffer.  
**Random scan displays:** Concepts of display file and display file interpreted comparison between raster scan and random scan. Implementation of graphics in 'C' language and study of various graphics functions.

### Unit-II

10Hrs

**Line drawing methods:** DDA algorithm and Bresenham's algorithm for different scope conditions, midpoint method for line generation. Two-dimensional transformation: Mathematical treatment of basic transformations such as translation, scaling and rotation. Development of composite transformation matrices using homogeneous coordinates. General fixed point scaling and pivot point rotation.

**Clipping:** Study of Cohen-Sutherland line clipping procedure and Sutherland-Hodgman polygon clipping procedure.

**Windows and viewports:** Derivation of generalized window to viewport transformation matrix. Introduction to interrupt-driven programming in 'C' and interacting with the mouse.

### Unit-III

10 hrs

**Three-dimensional Computer Graphics:** Introduction to left and right hand coordinate systems. Basic 3D transformation. Hidden line removal. Projection: Study of orthographic and oblique parallel transformation equations for them.

### Unit-IV

10 Hrs

**Graphic software standards:** GKS and PHIGS. Study of various attributes of output primitives such as line attributes, area fill attributes and character attributes.

**Graphics Software Study:** DirectX and OpenGL

### Unit-V

08Hrs

**Segments:** Concepts and advantages. Segment table various operations on segments. Data structures for the display file array on segment, linked list and paging schemes.

**Miscellaneous topics** – Brief introduction to Bezier curves and their application, fractal morphing and animation.

## **MCA 3.2D: MOBILE COMPUTING**

**Total hours: 48**

**Upon Completion of the course, the students will be able to**

- To get familiar with various generations of mobile communications.
- To understand the concept of cellular communication.
- To understand the basics of wireless communication.
- Knowledge of GSM mobile communication standard, its architecture, logical channels, advantages and limitations.

### **UNIT-1**

**10hrs**

#### **Mobile Computing Architecture: An Overview**

Mobile IP, Cellular and WLAN Wi-Fi IEEE 802.11X Networks, Ad Hoc Networks, Wireless Personal Area Network, Mobile Enterprise Network, Mobile Cloud Network, Mobile Computing, Mobile Computing Operating System, Mobile Computing Architecture, Design Considerations for Mobile Computing, Mobile Computing and the Apps, Limitations of Mobile Devices, Security Issues

### **UNIT-2**

**10hrs**

#### **Mobile Client Devices and Pervasive Computing**

Moving beyond Desktops, Pervasive Computing, Mobile Devices-Classifications and Characteristics, Tablet and e-Book Reader, Smart Identification Devices: Smart Cards, Labels, and Tokens, RFID, Smart Sensors, Actuators, and Mobile Robotic Systems, Smart Home and Appliances, Limitations and Devices Design Constraints, Automotive Systems

### **UNIT-3**

**10hrs**

#### **Second-generation Architecture—GSM, GPRS, and Others**

GSM Services, GSM System Architecture, Call Routing, Public Land Mobile Network (PLMN) Interface, GSM Subscriber Addresses and Identities, Protocols, Localization, Call Handling, Handover, Security, Introduction to SMS, General Packet Radio Service, High-speed Circuit-switched Data

### **UNIT-4**

**10hrs**

#### **Wireless Medium Access Control, CDMA, 3G, WiMax, 4G and 5G Networks**

Modulation, Medium Access Control, Exposed and Hidden Terminal Problem, Near and Far Terminal Problem, and Power Control for Medium Access, MAC Algorithms, WLAN and CAMA/CA Wireless Protocols, Applications of 3G Mobile Services, 3G Mobile Services: IMT2000 and UMTs, CDMA 2000: 3G, WCDMA 3G, OFDM, High-speed Packet Access, Long-term Evolution and WiMax 16E, 4G Networks: HS-OFDM, LTE Advanced and WiMax 16M, Upcoming 5G Network Features

### **UNIT-5**

**08hrs**

#### **Mobile IP Network Layer**

Mobile IP, Packet Delivery and Handover Management, Location Management, Registration, IP Header: Encapsulation and Routes Optimization, Mobility Binding, Tunneling, and Reverse Tunneling, Dynamic Host Configuration Protocol, Cellular IP, Mobile IP with IPv6, Voice over IP, IP Security

#### **Reference Books:**

## **MCA 3.2E Cloud Computing**

**Total hours: 48**

### **Course Outcomes:**

Upon Completion of the course, the students will be able to

- Identify the technical foundations of cloud systems architectures.
- Analyze the problems and solutions to cloud application problems.
- Apply principles of best practice in cloud application design and management.
- Identify and define technical challenges for cloud applications and assess their importance.

### **Unit –I: New Computing Paradigms and Services**

08Hrs

Edge computing, Grid computing, Utility computing, Distributed computing, Cloud computing and its history and evolution

### **Unit –II: Introduction to Cloud Computing**

10 Hrs

Cloud Computing Architectural Framework, Cloud Deployment Models, private, public and hybrid, Challenges in adapting a cloud in the context of i) Security issues ii) Bandwidth and iii) Integration issues, Virtualization in Cloud Computing, Parallelization in Cloud Computing, Security for Cloud Computing, Cloud Economics

### **Unit-III : Cloud source Service Models**

10 Hrs

Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Seven Business Models for cloud, five-layer cloud service stack, compute and storage cloud services case studies Jeff Bezos and Amazon

### **Unit -IV : Foundational Elements of Cloud Computing**

10 Hrs

Virtualization, Browser as a platform, Introduction to Web 2.0, Introduction to Autonomic Systems, Service Level Agreements, Cloud Computing architecture and industry frameworks such as MapReduce.

### **Unit –V: Cloud Computing Practices**

10 Hrs

Virtualization, Cloud Computing Operating System, Creating Windows servers on the cloud, Creating Linux servers on the cloud, Deploying applications on the cloud, Major cloud solutions.

## **MCA 3.2F: BUSINESS INTELLIGENCE SYSTEMS**

**Total hours: 48**

### **Course Outcomes:**

Upon Completion of the course, the students will be able to

- Introduce the concepts and components of Business Intelligence (BI)
- Evaluate the technologies that make up BI (data warehousing, OLAP)
- Define how BI will help an organization and whether it will help yours
- Identify the technological architecture that makes up BI systems
- Plan the implementation of a BI system

### **Unit-I**

**12hrs.**

Decision support and Business intelligence-Changing Business environment and computerized decision support, managerial decision making and support for decision making-DSS concept and framework Business intelligence-Major tools and techniques of managerial decision support –BI architecture.

### **Unit-II**

**12hrs.**

Essentials of Business Intelligence-Origin and drivers of business intelligence, successful BI implementation ,characteristics of BI-Architecting the data ,Enterprise Data model and its Benefits, Granularity of Data in Data warehouse and role of Metadata

### **Unit-III**

**10hrs.**

Advanced Data Warehousing principles- Data Warehousing architecture, DW development, real time DW and DW Administration and security issues-Visualization of Dimension model-Star, snowflake and other advanced models-Aggregated Fact Tables-Relational DBMS Support for Dimensional Modelling-Advanced Topics in Dimensional Modelling-Selecting a Modelling Tool-Populating Data Warehouse.

### **Unit-IV**

**07hrs.**

Dimensional modelling in BI environment-Dimensional Modelling-Modelling considerations-Dimensional model design life cycle-Case studies-Business Analytics and data visualization-Business analytics overview, reports and queries, Advanced Business Analytics, data visualization Real time BI, Business analytics and web intelligence-Structure of mathematical models for decision support and visual interactive simulation.

### **Unit-V**

**07hrs.**

Business performance Management-Business Intelligence Applications: Marketing models, Logistic and production models and Data Development analysis.

### Core Theory Electives-II

Subject Code	Elective Title
MCA 4.2A	Computer Vision
MCA 4.2B	Internet of Things (IoT)
MCA 4.2C	Mobile Communications
MCA 4.2D	Deep learning
MCA 4.2E	Information Security and Cryptography
MCA 4.2F	Soft Computing

**MCA4.2A:Computer Vision**  
**Total Hours : 48**

**Course Outcomes:**

Upon Completion of the course, the students will be able to

- identify basic concepts, terminology, theories, models and methods in the field of computer vision,
- describe known principles of human visual system,
- describe basic methods of computer vision related to multi-scale representation, edge detection and detection of other primitives, stereo, motion and object recognition,
- suggest a design of a computer vision system for a specific problem

**Unit- I:**

**12hrs**

**Introduction and image processing** : What is computer vision? History of computer vision, Photometric image formation, the digital camera, Image processing: Point operators, Linear filtering, Neighbor hood operators.

**Unit -II:**

**10 hrs**

**Feature detection and matching** : Feature detectors, feature descriptors, feature tracking, edge detection, edge linking, Lines: successive approximation, Hough transform, vanishing points, Application: Rectangel detection.

**Unit-III :**

**10 hrs**

**Segmentation** : Active contours: snakes, Dynamic snakes and condensation, Scissors, Level Sets. Split and merge : Watershed, Region splitting(divisive clustering), Region merging (agglomerative clustering) Graph-based segmentation.

**Unit-IV :**

**8 hrs**

**Color Image processing:** color fundamentals, color models, Pseudo color image processing, color transformations, color image smoothing and sharpening, Image segmentation based on color.

**Unit-V:**

**8 hrs**

**Recognition** : Object detection, Face recognition, Instance recognition, category recognition, context and scene understanding

**References :**

## MCA 4.2B: INTERNET OF THINGS (IoT)

Total Hours: 48

### Course Outcomes:

Upon Completion of the course, the students will be able to

- explain the definition and usage of the term “Internet of Things” in different contexts
- understand the key components that make up an IoT system
- differentiate between the levels of the IoT stack and be familiar with the key technologies and protocols employed at each layer of the stack
- apply the knowledge and skills acquired during the course to build and test a complete, working IoT system involving prototyping, programming and data analysis
- understand where the IoT concept fits within the broader ICT industry and possible future trends

### Unit-1

10hrs

Introduction to IoT: what is IOT? Genesis of IoT and digitization, IOT impact, Convergence of IT and OT, IOT challenges.

**IoT Network Architecture and Design:** Drivers behind New Network Architectures, IoT architecture drivers, Comparing IoT Architectures, A Simplified IoT Architecture, The Core IoT Functional Stack, IoT data management and compute stack

### Unit-2

10hrs

**Engineering IoT networks:** Smart Objects: The “Things” in IoT, Sensors, Actuators, and Smart Objects, Wireless Sensor Networks (WSNs), Communication Protocols for Wireless Sensor Networks, Connecting Smart Objects, Communications Criteria, IoT Access Technologies.

### Unit-3

10hrs

**IP as the IoT Network Layer:** The Business Case for IP, The Need for Optimization, IP versions, Optimizing IP for IoT, header compression, Fragmentation, Mesh addressing, 6TiSCH, RPL, Authentication and encryption on constrained nodes.

### Unit-4

10hrs

**Application Protocols for IoT:** The Transport Layer, IoT Application Transport Methods, Application Layer Protocol Not Present, SCADA, A Little Background on SCADA, Adapting SCADA for IP, Tunneling Legacy SCADA over IP Networks, SCADA Protocol Translation, SCADA Transport over LLNs with MAP-T, Generic Web-Based Protocols, IoT Application Layer Protocols, CoAP

### Unit-5

08hrs

**Data and Analytics for IoT:** An Introduction to Data Analytics for IoT, Structured Versus Unstructured Data, Data in Motion Versus Data at Rest, Machine Learning Overview, Supervised Learning, Unsupervised Learning, Machine Learning and Getting Intelligence from Big Data, Predictive Analytics, Big Data Analytics Tools and Technology, Edge Analytics Core Functions, Network Analytics

### References:

4. Cuno Pfister, “ Getting started with internet of things”, O’Reilly, 2011

## **MCA 4.2C: MOBILE COMMUNICATIONS**

**Total Hours : 48**

### **Course Outcome:**

Upon Completion of the course, the students will be able to

- explain the basic physical and technical settings functioning of mobile communications systems,
- describe the basic principles of mobile communication system.
- conduct field experiments and measurements, and measurements in the laboratory on actual components, devices, equipment and systems,
- interpret the collected data and measurement results,
- describe the development and implementation of mobile communication systems,
- test mobile communication equipment for the technical functionality.

### **Unit-1**

**10hrs**

Introduction and overview of wireless communication: Wireless Comes of Age 2, The Global Cellular Network, The Mobile Device Revolution, Future Trends, The Trouble With Wireless, Signals for Conveying Information, Analog and Digital Data Transmission, Channel Capacity, Transmission Media, Spectrum Considerations, Line-Of-Sight Transmission, Fading in the Mobile Environment, Channel Correction Mechanisms, Digital Signal Encoding Techniques, Coding and Error Control, Orthogonal Frequency Division Multiplexing (OFDM)

### **Unit-2**

**10hrs**

Signal Encoding Techniques and error control: Signal Encoding Criteria, Digital Data, Analog Signals, Analog Data, Analog Signals, Analog Data, Digital Signals, Orthogonal Frequency Division Multiplexing, Orthogonal Frequency Division Multiple Access (OFDMA), Single-Carrier FDMA, Error Detection, Block Error Correction Codes, Convolutional Codes, Automatic Repeat Request

### **Unit-3**

**10hrs**

Wireless LAN Technology - Overview and Motivation, IEEE 802 Architecture, IEEE 802.11 Architecture and Services, IEEE 802.11 Medium Access Control, IEEE 802.11 Physical Layers, Gigabit Wi-Fi 356  
Bluetooth and IEEE 802.15- The Internet of Things, Bluetooth Motivation and Overview, Bluetooth Specifications, Bluetooth High Speed and Bluetooth Smart, IEEE 802.15, ZigBee

### **Unit-4**

**10hrs**

Cellular Wireless Networks :  
Principles of Cellular Networks, First-Generation Analog, Second-Generation TDMA, Second-Generation CDMA, Third-Generation Systems, Approach to 4G, LTE Architecture, Evolved Packet Core.

### **Unit-5**

**08hrs**

Mobile Applications and Mobile IP - Mobile Application Platforms, Mobile App Development, Mobile Application Deployment, Mobile IP

### **References:**

1. Cory Beard and William Stallings, “wireless communication networks and system”, Pearson, 2016
2. Jochen Schiller, “Mobile Communication”, Addison-wesley, 2016
3. Gordon stuber, “Principles of Mobile Communication”, Springer, 2013

## MCA 4.2D: DEEP LEARNING

**Total Hours : 48**

### **Course Outcome:**

Upon Completion of the course, the students will be able to

- Recognize the characteristics of deep learning models that are useful to solve real-world problems.
- Understand different methodologies to create application using deep nets.
- Identify and apply appropriate deep learning algorithms for analyzing the data for variety of problems.
- Implement different deep learning algorithms
- Design the test procedures to assess the efficacy of the developed model.
- Combine several models in to gain better results

Unit I : 10hrs

**Introduction** : Historical context and motivation for deep learning; basic supervised classification task, optimizing logistic classifier using gradient descent, stochastic gradient descent, momentum, and adaptive sub-gradient method.

Unit II : 10hrs

**Neural Networks** : Feed forward neural networks, deep networks, regularizing a deep network, model exploration, and hyperparameter tuning.

Unit III : 8hrs

**Optimization for training deep models** : Challenges in Neural Network optimization, Basic Algorithms, Parameter Initialization Strategies, Algorithm with Adaptive Learning Rates, Approximate second order Methods, Optimization Strategies and Meta-Algorithms.

Unit IV : 12hrs

**Convolutional Networks and Sequence Modeling** : Motivation, Convolution operation, Pooling, Variants of the Basic Convolution Function, Structured outputs, Efficient Convolution Algorithms. Sequence Modeling: Recurrent Nets Unfolding computational graphs, recurrent neural networks (RNNs), bidirectional RNNs, encoder-decoder sequence to sequence architectures, deep recurrent networks, Recursive neural networks .

Unit V: 8hrs

**Autoencoders**: Undercomplete autoencoders, regularized autoencoders, sparse autoencoders, denoising autoencoders, representational power, layer, size, and depth of autoencoders, stochastic encoders and decoders, denoising autoencoders, Learning manifolds with Autoencoders, Applications of Autoencoders.

## **MCA 4.2E: INFORMATION SECURITY AND CRYPTOGRAPHY**

**Total Hours: 48**

### **Course Outcome:**

Upon Completion of the course, the students will be able to

- To Understand Basics Of Cryptography And Network Security.
- To Be Able To Secure A Message Over Insecure Channel By Various Means.
- To Learn About How To Maintain The Confidentiality, Integrity And Availability Of A Data.
- To Understand Various Protocols For Network Security To Protect Against The Threats In The Networks.

### **Unit – I : Basics of Information Security**

10Hrs

Information Security Overview, Threat and Attack Vectors, Types of Attacks, Common Vulnerabilities and Exposure (CVE), Security Attacks, Fundamentals of Information Security, Computer Security Concerns, Information Security Measures.

### **Unit –II Information Security Policies, Procedures**

08 Hrs

Information Security Policies-Necessity-Key Elements and Characteristics, Security Policy Implementation, Configuration, Security Standards-Guidelines and Frameworks

### **Unit-III : Encryption techniques**

12 Hrs

Classical Encryption Techniques Symmetric Cipher Model- Cryptography, Cryptanalysis and Brute-Force Attack, Block Ciphers and the Data Encryption Standard - Block Cipher Structure- Stream Ciphers and Block Ciphers, Feistel Cipher Structure, The Data Encryption Standard-Encryption and Decryption, Advanced Encryption Standard (AES), International Data Encryption Algorithm(IDEA).

### **Unit –IV : Public Key Encryption**

08 Hrs

Characteristics of Public Key System; RSA Technique – Encryption-Method; Key Exchange; Diffie-Hellman Scheme; Cryptographic Hash Functions; Digital Signature – Properties of Digital Signature, Certificates; Certificate Authorities.

### **Unit-V : IP and Web Security**

10 Hrs

IP security: Overview - Architecture – Authentication Header - Encapsulating Security Payload - Key management – Web security: Web security considerations – Secure Socket Layer and Transport Layer Security – Secure electronic transaction – Web issues.

### **References:**

8. Network Security and Cryptography: Bernard Menezes, CENGAGE Learning.

### **MCA4.2F: SOFT COMPUTING**

**Total Hours: 48**

#### **Course Outcome:**

Upon Completion of the course, the students will be able to

- Learn About Soft Computing Techniques and Their Applications
- Analyze Various Neural Network Architectures
- Understand Perceptron's and Counter Propagation Networks.
- Define The Fuzzy Systems
- Analyze The Genetic Algorithms and Their Applications.

#### **Unit-I**

**10hrs**

Soft Computing and its Techniques, Soft Computing versus Hard Computing, Applications of Soft Computing in the current industry.

#### **Unit-II**

**12hrs**

Neural Network (NN), Biological foundation of Neural Network, Neural Model and Network Architectures, Perceptron Learning, Supervised Hebbian Learning, Back-propagation, Associative Learning, Competitive Networks, Hopfield Network, Computing with Neural Nets and applications of Neural Network.

#### **Unit-III**

**10hrs**

Fuzzy sets, Operations on Fuzzy sets, Fuzzy Relations, Fuzzy Measures, Applications of Fuzzy Set Theory to different branches of Science and Engineering.

#### **Unit-IV**

**10hrsNeuro**

Fuzzy and Soft Computing, Adaptive Neuro-Fuzzy Inference System Architecture, Hybrid Learning Algorithm, Learning methods that Cross-fertilize ANFIS and RBFN.

#### **Unit-V**

**05hrs**

Coactive Neuro Fuzzy Modeling, Framework Neuron Functions for Adaptive Networks, Neuro Fuzzy Spectrum, Hybridization of other techniques.

#### **References:**

KARNATAK UNIVERSITY, DHARWAD

*Regulations and Syllabus*  
*for*  
*P.G. Studies in*  
**MASTER OF COMPUTER SCIENCE**  
*(M.Sc. (CS))*  
**(I-IV Semester)**

**Revised Syllabus**  
*Under*  
*Choice Based Credit System (CBCS)*  
From  
2021-22 onwards

**Regulations Governing Post-Graduate Programmes in the  
Faculty of Science & Technology under Choice Based Credit System**  
(Framed under Section 44(1))(c) Of the K.S.U.Act.2000)

**1.0 Title**

These Regulations shall be called “Regulations Governing the Post-Graduate Programmes in the Faculty of Science & Technology under Choice Based Credit System” in Karnatak University, Dharwad

**2.0 Commencement**

These Regulations shall come into force with effect from the academic year 2021-22.

**3.0 Definitions**

a In these Regulations, unless otherwise provided;

“Academic Council” means Academic Council of the University constituted according to the *Karnataka State Universities Act, 2000*.

b “Board of studies means P. G. Board of studies of the University, Adhoc/Combined and Steering Committees of International Diploma programmes in the discipline/subjects concerned.

c “Compulsory Course” means fundamental paper, which the student admitted to a particular Post-Graduate Programme, should successfully complete to receive the Post Graduate Degree in the concerned subject.

d Course Weightage “means number of credits assigned to a particular course.

e “Credit” means the unit by which the course work is measured. One Credit means one hour of teaching work or two hours of practical work per week. As regard the marks for the courses, 1 Credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks.

f “Cumulative Grade Point Average(CGPA)” refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward from first semester to subsequent semesters.

g “Degree” means Post-Graduate Degree.

h “Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each course by the candidate in both Internal Assessment and Semester-end Examinations.

i “Grade Point Average”(GPA)” refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester.

j “Open Elective Course “means a paper offered by a Department to the students of other Departments.

- k “Post Graduate Programme“ means semesterised Master’s Degree Programmes excluding P. G. Diploma.
- l “Specialization course” means advanced paper offered by a Department that a student of that Department can opt a special course.
- m “Student” means the student admitted to programmes under (k).
- n “University “means Karnatak University, Dharwad.

#### **4.0 Minimum Eligibility for Admission**

A candidate who has successfully completed Bachelor’s Degree programme in Science or any other Degree programme of this University or of any other University recognized as equivalent there to by this university, shall be eligible for admission to the Post Graduate Programmes in science provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the university from time to time.

Admission shall be as per Government of Karnataka reservation policy and the directions issued in this regard from time to time.

#### **5.0 Duration of the programme**

The duration of the study for the Post-Graduate Degree programme shall extend over a period of two consecutive academic years, each academic year comprising two semesters, and each semester comprising sixteen weeks with a minimum of ninety working days.

However the student, who discontinue the programme after one or more semesters due to extraordinary circumstances, are allowed to continue and complete the programmer with due approval from the Registrar. Candidates shall no register for any other regular course other than diploma and certificate courses being offered on the campus during the duration of P.G. Programme.

#### **6.0 Medium of Instruction and Evaluation**

The medium of instruction shall be English.

#### **7.0 Programme Structure**

- 7.1** The student of Post –Graduate programme shall study the courses as may be approved by the concerned Board of Studies, Faculty and the Academic Council of the University from time to time minimum and maximum credits as outlined in these regulations.
- 7.2** There shall be three categories of courses namely, compulsory courses, specialization Courses and Open Elective Courses.
- 7.3** Each programme shall have a set of Compulsory Courses, as stipulated in the regulations governing the concerned programme that a student must complete to get the concerned programme that a student must complete to get the concerned degree.

- 7.4 In those programmes that offer specialization courses, the student shall choose the prescribed number of specialization courses offered within the Department
- 7.5 Each Department shall offer Open Elective courses for students of other Departments, The students of a Department shall choose Open Elective courses from among those prescribed by the university and selected by the Department from time to time. P.G. Centers and affiliated colleges can offer those open Elective Course, which are approved or prescribed by their Parent Department of the University. Such open Elective courses shall be taught by qualified teachers approved by the University.
- 7.6 The credits for each of the Compulsory Courses may vary from 2 to 4; for Specialization Course, from 2 to 4; and for Open Elective Course, from 2 to 4, wherever project work/field work/practical are involved in the course, the credits may extend to 6 or as otherwise provided by concerned programme.
- 7.7 The minimum credits for P.G. Programme shall be 96. In the case of MCA, the minimum number of credits shall be 158 and in case of M Sc. Computer Science the minimum credits are 116.
- 7.8 The student shall undertake project/field work during the programme as a compulsory course or in lieu of Specialization Course or open Elective Course if so specified by the concerned Board of Studies.
- 7.9 The ratio between Compulsory, Specialization and Open Elective may differ from department to department.
- 7.10 The detailed programme structure for Faculty of Science & Technology shall be as prescribed and shown in Annexure-I,Annexure-IA,Annexure-Ib.
- 7.11 The Open Elective courses generally will have practical component, unless otherwise specified by the respective Board of Studies .The number of students admitted to the course shall commensurate with the availability of infrastructure.

## **8.0 Attendance**

- 8.1 Each course shall be taken as a unit for the purpose of calculating the attendance.
- 8.2 Each student shall sign the attendance register maintained by the Department for each course for every hour/unit of teaching /practical. The course teachers shall submit the monthly attendance report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the second week of the subsequent month.
- 8.3 Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.
- 8.4 A student shall be considered to have satisfied the required attendance for each course if he/she has attended not less than 75% of the number of instructional hours during the semester.

- 8.5** There is no provision for condoning shortage of attendance.
- 8.6** The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission afresh to the given semester.
- 8.7** Such of the candidates who have participated in State/National level Sports, NSS, NCC, Cultural activities and other related activities as stipulated under the existing regulations shall be considered for giving attendance for actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authorities within two weeks after the event.

## **9.0 Examination**

- 9.1** There shall be an examination at the end of each semester. The odd semester examinations shall be conducted by the respective Department/P.G. Centers/Colleges. The even semester examination shall be conducted by the University.
- 9.1.1** Unless otherwise provided, there shall be semester-end examination of 3 hours duration for 75/100 marks; 1.5 hours for 50 marks and 2/4 hours for 35/75 marks practical examination.
- 9.1.2** Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application from through the proper channel and shall also pay the fees prescribed.
- 9.1.3** The office of the Registrar (Evaluation) shall allot the Register Number to the candidate at the 1<sup>st</sup> semester-end examination. That will be the Register Number to the candidate for all subsequent appearance at semester-end examinations.
- 9.1.4** The answer scripts shall be in the safe custody of the University for a maximum period of six months from the date of announcement of results. These shall be disposed off after six months.
- 9.1.5** The programme under CBCS is a fully carry-over system. A candidate reappearing for either the odd or even semester examinations shall be permitted to take examinations as and when they are conducted (even semester examination in even semester and odd semester examination in odd semester)
- 9.1.6** Candidate who have failed, remained absent or opted for improvement in any course/courses shall appear for such course/courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.
- 9.1.7** Candidates who desire to challenge the marks awarded to them, in the even semester-end examinations, may do so by submitting an application along with the prescribed fees to the Registrar (Evaluation) within 15 day from the announcement of results.

## **9.2 Odd Semester Examination**

- 9.2.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.
- 9.2.2** The BOE shall scrutinise and approve question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation).
- 9.2.3** The office of the Registrar Evaluation shall dispatch the question papers to the Department/P.G. Center/Colleges who shall conduct the Examinations according to the Schedule announced by the University.
- 9.2.4** The Chairperson of the Department/Administrator of the P.G. Center/Principal of the College shall appoint one of their full time courses teachers as Post Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts.
- 9.2.5** Answer scripts shall be valued by the examiners appointed by the University. However, in those centers where an examiner for a particular course is not available, then the answer scripts of that course shall be dispatched to the officer of the Registrar (Evaluation) who shall arrange for valuation of the same.
- 9.2.6** There shall be single valuation. The examiners (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on the answer script.
- 9.2.7** The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be dispatched by the PGP Coordinator to the Registrar (Evaluation)'s Officer at the conclusion of the valuation at the respective centers.
- 9.2.8** The Office of the Registrar Evaluation shall process and announce the results.

## **9.3 Even Semester**

- 9.3.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.
- 9.3.2** As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other University/Research Institutes.
- 9.3.3** Each answer script of the semester-end examination (theory and project report) shall be assessed by two examiners (one internal and another external). The Marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averaged with nearer award of the two evaluations.

Provided that in case the number of answer scripts to be referred to the third examiner in a course exceeds minimum of 5 or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.

**9.3.4** Wherever dissertation/project work is prescribed in the even semesters of the programme, the same shall be evaluated by both internal and external examiners. The valuation shall be as prescribed by the concerned Board of Studies.

**9.3.5** In case of programmes with practical examination details of maximum marks, credits or duration may vary from Department to Department as specified by the concerned Board of Studies.

#### **9.4 Evaluation**

**9.4.1** Each Course shall have two evaluation components – Internal Assessment (IA) and the Semester End Exams.

**9.4.2** The IA component in a course shall carry 25% / 30% / 50% and the Semester End Examination shall carry 75% / 70% / 50% respectively, as the case may be. Courses have 25% & 30%/50% marks as internal assessment shall have 3/5 marks allotted to attendance. However, in case of project work, the distribution of marks for Internal Assessment and Examination shall be left to the discretion of the concerned BOS.

**9.4.3** Marks for attendance shall be awarded to the students according to the following table

For courses carrying 25% of marks for IA, the attendance marks shall be

<b>Attendance (in Percentage)</b>	<b>Marks</b>
Above 90	3
Above 80 and up to 90	2
Above 75 and up to 80	1

Internal Assessment (IA) shall be based on written tests, practical and seminars.

**9.4.4** However, the number of IA components per course per semester shall not be less than two.

**9.4.5** The IA marks list shall be notified on the Department Notice Board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination, or as directed by the University.

**9.4.6** The test shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.

**9.4.7** There is no provision for seeking improvement of Internal Assessment marks.

**9.4.8** The IA records, pertaining to Semester Examination, shall be preserved by the department/Centers/Colleges for a period of one year from the date of semester examination. These records may be called by the University or a body constituted by the University as and when deemed necessary.

**9.4.9** The dissertation/project work viva-voce shall be conducted by an internal and external examiner.

**10.0 Maximum duration for completion of the Programme**

**10.1** A candidate admitted to a post graduate programme shall complete it within a period, which is double the duration of the programme from the date of admission.

**10.2** Whenever the syllabus is revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabus.

**11.0. Declaration of Results**

**11.1** The minimum for a pass in each course shall be 40% of the total marks including both the IA and the semester-end examinations. Further, the candidate shall obtain at least 40% of the marks in the semester-end examination. There is no minimum for the IA marks.

**11.2** Candidates shall secure a minimum of 50% in aggregate in all courses of a program in each semester to successfully complete the program.

**11.3** Candidates shall earn the prescribed number of credits for the program to qualify for the PG Degree.

**11.4** For the purpose of announcing the results, the aggregate of the marks secured by a candidate in all the semester examinations shall be taken into account. However, Ranks shall not be awarded in case the candidate has not successfully completed each of the semesters in first attempt or has not completed the program in the stipulated time (vide Regulation 5) or had applied for improvement of results.

**12.0 Marks, Credit Points, Grade Points, Grades and Grade Point Average**

**12.1** The grade points and the grade letters to candidates in each course shall be awarded as follows:

Percentage of marks	Grade Points	Grade Letter
75 and above, up to 100.00 %	7.50 to 10.00	A
60 and above but less than 75 %	6.00 and above but less than 07.5	B
50 and above but less than 60 %	5.00 and above but less than 6.0	C
40 and above but less than 50 %	4.00 and above but less than 05.00	D
less than 40.00 %	Less than 4.00	F

**12.2** Credit Point (CP): The Credit Point for each course shall be calculated by multiplying the grade point obtained by the credit of the course.

**12.3** The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned by the student in all the courses by the total number of credits of those courses of the semester.

**12.4** The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points in all the semesters by the total number of credits in all the semesters. The CGPA to date shall be calculated by dividing the total number of credit points in all the semesters to date by the total number of credits in all the semesters to date.

CGPA for the I Semester = Sum of the CP of the I Semester / Sum of the credits of the I Semester

CGPA for the II Semester = Sum of the CP of the I Semester + Sum of the CP of II Semester / Sum of the credits of the I Semester + II Semester

CGPA for the III and IV Semesters shall be computed accordingly.

**12.5** The Grade Card at each semester examination shall indicate the courses opted by the student, the credit for the course chosen by the student, the credit points obtained in each course, the grade letter and the grade point average. No class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade Point Average.

**12.6** Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below:

Cumulative Grade Point Average (CGPA)	Class To Be Awarded
7.5 to 10.0	First Class With Distinction
6.0 and above but below 7.5	First Class
5.0 and above but below 6.0	Second Class

### **13. Miscellaneous:**

- a.** Notwithstanding anything contained in these regulations, the semester system at Post-Graduate level is hereby repealed.
- b.** The provisions of any order, Rules or Regulations in force shall be inapplicable to the extent of its inconsistency with these Regulations.
- c.** The University shall issue such orders, instructions, procedures and prescribe such format as it may deem fit to implement the provisions of this Regulations.
- d.** The procedural details may be given by the University from time to time.
- e.** Any unforeseen problems/ difficulties may be resolved by the Vice Chancellor, whose decision in the matter shall be final.

## Annexure-I

The Program structure of the Master of Science Degree shall be as follows:

Semester	No.of compulsory& Specialization courses (credits/course)	Total credits for compulsory &Specialization courses	No. of open elective course (credits/course)	Total credits of open elective course	Total credits for the semester
Sem. I	Th :03 (04) =12  Pra/Th*:03 (02)=06	18	Th :01 (04) =04 Pra/Th*:01(02)=02	06	24
Sem. II	Th :03 (04) =12  Pra/Th*:03 (02)=06	18	Th :01 (04) =04 Pra/Th*:01(02)=02	06	24
Sem. III	Th:03(04)=12 Pra/Th*:03 (02)=06	18	Th :01 (04) =04 Pra/Th*:01(02)=02	06	24
Sem. IV	Th :03/04** (04) =12/16  Pra/Th: 03/04* *(02)=06/08 Pj <sup>#</sup> 01 (06) =06	24		-	24
Total	Th 12/13 (4) =48/52  Pra/Th 12/13(02)= 24/26  Pj : 1 (06) =06	78	03 (04)=12 Pra/Th*:03(02)=06	18	96

**Note:** Except for IV semester, the concerned Department shall offer one each of open elective theory and practical course or two \* open elective Theory courses for students of other science departments. \* Only for Mathematics; \*\* for Mathematics and Statistics; # except Mathematics & Statistics Abbreviations: Th = Theory; Pra = Practical; Pj = Project

II	M.Sc.2.1	Computer Networks	4	4	3	25	75	100
	M.Sc.2.2	Linear Algebra	4	4	3	25	75	100
	M.Sc.2.3	Database Management System	4	4	3	25	75	100
	M.Sc.2.4	Python Programming	4	4	3	25	75	100
	M.Sc.2.5	DBMS Lab (using My SQL)	4	4	3	25	75	100
	M.Sc.2.6	Python Programming Lab	4	4	3	25	75	100
	<b>Open Elective</b>							
	OEC 2.7	Computer Concepts and Office Automation	4	4	3	25	75	100
		<b>Total</b>	<b>28</b>	<b>28</b>	<b>21</b>	<b>175</b>	<b>525</b>	<b>700</b>

### SEMESTER - III

Sem. No.	Paper Code	Paper Title	Credits	No. of Hrs/Week Theory/ Practical	Duration of exam In Hrs Theory/ Practical	Internal Assessment Marks Theory/ Practical	Marks at the Exams	Total Marks
III	M.Sc.3.1	Design and Analysis of Algorithms	4	4	3	25	75	100
	M.Sc.3.2	Core Theory Electives-I	4	4	3	25	75	100
	M.Sc.3.3	Web Technologies	4	4	3	25	75	100
	M.Sc.3.4	Artificial Intelligence and Machine Learning	4	4	3	25	75	100
	M.Sc.3.5	Web Tech. Lab	4	4	3	25	75	100
	M.Sc.3.6	Artificial Intelligence and Machine Learning Lab	4	4	3	25	75	100
	<b>Open Elective</b>							
	OEC 3.7	SPSS Software	4	4	3	25	75	100
		<b>Total</b>	<b>28</b>	<b>28</b>	<b>21</b>	<b>175</b>	<b>525</b>	<b>700</b>

#### Core Theory Electives-I:

Subject Code	Elective Title
M.Sc.3.2 A	Operating System Concepts
M.Sc.3.2 B	Computer Vision
M.Sc.3.2 C	Mobile Computing
M.Sc.3.2 D	Business Intelligence Systems
M.Sc.3.2 E	Computer Graphics

### SEMESTER - IV

Sem. No.	Paper Code	Paper Title	Credits	No. of Hrs/Week Theory/ Practical	Duration of exam In Hrs Theory/ Practical	Internal Assessment Marks Theory/ Practical	Marks at the Exams	Total Marks
IV	M.Sc.4.1	Software Engineering	4	4	3	25	75	100
	M.Sc.4.2	<b>Core Theory Electives-II</b>	4	4	3	25	75	100
	M.Sc.4.3	Data Mining	4	4	3	25	75	100
	M.Sc.4.4	Operation Research	4	4	3	25	75	100
	M.Sc.4.5	Data Mining Lab	4	4	3	25	75	100
	M.Sc.4.6	Project	4	4	3	25	75	100
		<b>Total</b>	<b>24</b>	<b>24</b>	<b>18</b>	<b>150</b>	<b>450</b>	<b>600</b>

#### Core Theory Electives-II:

Subject Code	Elective Title
M.Sc.4.2 A	Cloud Computing
M.Sc.4.2 B	Internet of Things (IoT)
M.Sc.4.2 C	Mobile Communications
M.Sc.4.2 D	Deep learning
M.Sc.4.2 E	Information Security and Cryptography
M.Sc.4.2 F	Soft Computing

## M.Sc.1.1: COMPUTER ORGANIZATIONS AND ARCHITECTURE

Total Hours: 48

Upon Completion of the course, the students will be able to

- Explain the concepts of binary numbers, computer instructions and peripheral devices.
- Able to solve number conversions and Boolean expressions.
- Analyze the functions of combinational logic, instruction formats and basics of memory.
- Evaluate the importance of logic gates, flip-flops and addressing modes.
- Capable of design the digital circuits using logic gates.
- Build combinational and sequential logic circuit.
- Identify the components of register, input/output and memory organizations.

### Unit-I

10 Hrs

**Number Systems:** binary, octal hexadecimal, number base conversion, addition, subtraction of binary numbers, one's and two's complements, positive and negative numbers, character codes ASCH, EBCDIC.

**Boolean algebra and Logic gates:** Axiomatic definition of Boolean algebra, Basic theorems and properties, Boolean functions, canonical and standard forms, logic functions using gates and design of combinational circuits.

### Unit-II

10 Hrs

**Simplification of Boolean functions:** Karnaugh maps, product of sums, sum of products, simplification, NAND and NOR implementation, don't care condition.

**Combinational and Sequential logic:** Adders, subtractors, code, converters, decoder multiplexer, flip-flops, shift registers, counters.

### Unit-III

10 Hrs

**Processor Logic Design:** Processor organization, arithmetic logic unit, design of arithmetic and logic circuits, design of arithmetic logic unit, status registers, design of shifter, processor unit, design of accumulator.

**Control Logic Design:** Processor Organization, Hardware control micro program control, control of processor unit, PLA control, micro program sequencer, computer design.

### Unit-IV

10 Hrs

**Micro – computer System Design:** Microcomputer organization, microprocessor organization, instructions and addressing modes, subroutines and interrupts, memory organization, input-output interface, programmed input-output, input – output processor, input – output device characteristics, direct memory access (DMA).

### Unit-V

8 Hrs

**Memory Organization:** Serial access, random access memories (RAM), read only memories (ROM), virtual memory, cache memory.

**Introduction to 8085 Assembly Language Programming:** The 8085 Programming model, Instruction classification, Instruction format, How to write, Assemble and Execute a simple program, Overview of the 8085 Instruction set.

5. Introduction to Microprocessors, Gaonkar, Tata Mc Graw Hill
6. Digital Computer Electronics Malvino & Brown Shird Education, TMH.

## M.Sc.1.2: THEORY OF COMPUTATION

Total Hours: 48

Upon Completion of the course, the students will be able to

- Discuss key notions of computation, such as algorithm, computability, decidability, reducibility, and complexity, through problem solving.
- Explain the models of computation, including formal languages, grammars and automata, and their connections.
- Analyze and design finite automata, pushdown automata, Turing machines, formal languages, and grammars.
- Solve computational problems regarding their computability and complexity and prove the basic results of the theory of computation.

### Unit-I

10Hrs

**Introduction To Finite Automata:** Introduction to Finite Automata, the central concepts of Automata theory, deterministic finite automata, non-deterministic finite automata, an application. Finite automata with Epsilon-transitions.

### Unit-II

10 Hrs

**Regular Expressions and Languages, Properties Of Regular Languages:** Regular expression, Finite Automata and Regular Expressions, Applications of Regular Expressions, Proving languages not to be regular, Closure properties of Regular languages, Decision properties of Regular languages. Equivalence and minimization of automata.

### Unit-III

10 Hrs

**Context-Free Grammars And Languages:** Context-free grammars. Parse trees, Applications, Ambiguity in grammars and languages.

**Pushdown Automata:** Definition of the Pushdown automata, The languages of a PDA, Equivalence of PDA's and CFG's, Deterministic Pushdown Automata.

### Unit-IV

10Hrs

**Properties Of Context-Free Languages:** Normal forms for CFGs, The pumping lemma for CFGs, Closure properties of CFLs.

**Introduction To Turing Machines:** Problems that computers cannot solve. The Turing Machine, Programming techniques for Turing Machines, Extensions to the basic Turing Machine, Restricted Turing Machines, Turing Machine and Computers.

### Unit-V

08 Hrs

**Un decidability:** A Language that is not recursively enumerable, An Undecidable problem that is RE, Post's Correspondence problem. Other un decidable problems.

## MSc 1.3: DATA STRUCTURES USING C

Total Hours: 48

Upon Completion of the course, the students will be able to

- Describe how arrays, records, linked structures, stacks, queues, trees, and graphs are represented in memory and used by algorithms.
- Describe common applications for arrays, records, linked structures, stacks, queues, trees, and graphs.
- Write programs that use arrays, records, linked structures, stacks, queues, trees, and graphs.
- Demonstrate different methods for traversing trees.
- Compare alternative implementations of data structures with respect to performance.
- Compare and contrast the benefits of dynamic and static data structures implementations.
- Describe the concept of recursion, give examples of its use, describe how it can be implemented using a stack.
- Design and implement an appropriate hashing function for an application.
- Discuss the computational efficiency of the principal algorithms for sorting, searching, and hashing.

### **Unit- I INTRODUCTION TO DATA STRUCTURES**

**08Hrs**

Basic concepts: Introduction to data structures, classification of data structures, operations on data structures; Searching techniques: Linear search and Binary search; Sorting techniques: Bubble sort, selection sort, insertion sort and comparison of sorting techniques.

### **Unit - II LINEAR DATA STRUCTURES**

**10 Hrs**

Stacks: Primitive operations, implementation of stacks using Arrays, applications of stacks, arithmetic expression conversion and evaluation; Queues: Primitive operations; Implementation of queues using Arrays, applications of linear queue, circular queue and double ended queue (deque).

### **Unit - III LINKED LISTS**

**12 Hrs**

Linked lists: Introduction, singly linked list, representation of a linked list in memory, Types of linked lists: Single linked lists Circular linked lists, doubly linked lists; operations on a single linked list; Applications of linked lists: Polynomial representation and sparse matrix manipulation.

### **Unit - IV NON LINEAR DATA STRUCTURES**

**10 Hrs**

Trees: Basic concept, binary tree, binary tree representation, array and linked representations, binary tree traversal, binary tree variants, application of trees; Graphs: Basic concept, graph terminology, graph implementation, graph traversals, Application of graphs, Priority Queue.

### **Unit - V Binary search tree and HASHING**

**08Hrs**

Binary search trees, properties and operations; Balanced search trees: AVL trees; Introduction to M-Way search trees, B trees; Hashing and collision: Introduction, hash tables, hash functions, collisions, applications of hashing.

**M.Sc. 1.4: PROBABILITY AND STATISTICS**  
**Total Hours: 48**

Upon Completion of the course, the students will be able to

- Able to understand the basic knowledge on fundamental probability concepts, including random variable, probability of an event, additive rules and conditional probability
- Able to understand the concept of Bayes' theorem
- Able to understand the basic statistical concepts and measures
- Able to develop the concept of the central limit theorem
- Able to understand several well-known distributions, including Binomial, Geometrical, Negative Binomial, Pascal, Normal and Exponential Distribution
- Able to understand the concepts of various parameter estimation methods.
- Able to perform hypotheses testing Skills
- Able to apply the central limit theorem to sampling distribution
- Able to use estimation technique to determine point estimates confidence interval and sample size.
- Able to apply the appropriate Chi-Squared test for independence and goodness of fit
- Able to perform and analyze hypotheses tests of means, proportions and variances using both one-and two-sample data sets.
- Able to solve problems independently
- Able to appreciate the diversity of the applications of central limit theorem
- Able to appreciate the diversity of the applications of hypothesis testing

Unit I: 8hrs.

**Probability:** Sample space and Events - Probability -The Axioms of probability - some Elementary Theorems - Conditional probability -Baye's Theorem - Random variables – Discrete and continuous probability distributions.

Unit II: 10hrs.

**Distributions Binomial,** Poisson and normal Distributions, related properties. Sampling Distributions – Sampling Distribution of means.

**UNIT III:** 8 hrs.

**Estimation** Point Estimation - Interval Estimation – Introduction to student's t-distribution - Confidence interval for Single Mean and Single Proportion (Large and Small samples).

Unit IV: 14hrs.

**Testing of Hypothesis-I** : Testing of hypothesis-Introduction- Null hypothesis-Alternative hypothesis- Type I and Type II errors – Critical region. Test of hypotheses for Single Mean (Large and small samples) - Test of hypotheses for Single Proportion (Large and small samples). **Testing of Hypothesis-II**: Tests of hypotheses for difference of Means (Large and Small samples) - Tests of hypotheses for difference of proportions(Large samples) – Introduction to Chi-Square distribution and Goodness of Fit.

Unit V: 8hrs.

**Correlation & Regression**: Coefficient of correlation- Regression Coefficient- The lines of regression- The rank correlation.

## M.Sc. 2.1: COMPUTER NETWORKS

Total Hours: 48

Upon Completion of the course, the students will be able to

- Describe the functions of each layer in OSI and TCP/IP model.
- Explain the functions of Application layer and Presentation layer paradigms and Protocols.
- Describe the Session layer design issues and Transport layer services.
- Classify the routing protocols and analyze how to assign the IP addresses for the given network.
- Describe the functions of data link layer and explain the protocols.
- Explain the types of transmission media with real time applications

### UNIT-I:

10hrs

**Foundation-** Building a Network, Applications, Requirements, Architecture, Software, Performance.

**Direct Links-** Connecting to a Network, Technology Landscape, Encoding, Framing, Error Detection, Reliable Transmission, Multi-Access Networks

### UNIT-II:

10hrs

**Internetworking:** Switching Basics, Switched Ethernet, Spanning Tree Algorithm, Broadcast and Multicast, Virtual LANs (VLANs), What Is an Internetwork? Service Model, Global Addresses, Datagram Forwarding in IP, Subnetting and Classless Addressing, Address Translation (ARP), Host Configuration (DHCP), Error Reporting (ICMP), Virtual Networks and Tunnels, Routing- Network as a Graph, Distance-Vector (RIP), Link State (OSPF), Metrics

### UNIT-III:

10hrs

**Global Internet-** Routing Areas, Inter-domain Routing (BGP)

**IP Version 6-** Historical Perspective, Addresses and Routing, Packet Format, Advanced Capabilities

**Multicast-** Multicast Addresses, Multicast Routing (DVMRP, PIM, MSDP)

**Multiprotocol Label Switching-** Destination-Based Forwarding, Explicit Routing, Virtual Private Networks and Tunnels

### UNIT-IV:

10hrs

**Simple Demultiplexor (UDP)**

**Reliable Byte Stream (TCP)-** End-to-End Issues, Segment Format, Connection Establishment and Termination, Sliding Window Revisited, Triggering Transmission, Adaptive Retransmission

**Remote Procedure Call-** RPC Fundamentals

**Transport for Real-Time (RTP)-** Requirements, RTP Design, Control Protocol

**Congestion Control-** TCP Congestion Control

### UNIT-V:

08hrs

**Applications-Traditional Applications-** Electronic Mail (SMTP, MIME, IMAP), World Wide Web (HTTP), Web Services

**Multimedia Applications-** Session Control and Call Control (SDP, SIP, H.323), Resource Allocation for Multimedia Applications

**Reference books:**

4. Behrouz Forouzan, “Data Communications and Networking”, 4<sup>th</sup> edition, McGraw Hill, 2017

## M.Sc. 2.2: LINEAR ALGEBRA

Total Hours: 48

Upon Completion of the course, the students will be able to

- Solve systems of linear equations
- Analyze vectors in  $R^n$  geometrically and algebraically.
- Recognize the concepts of the terms span, linear independence, basis, and dimension, and apply these concepts to various vector spaces and subspaces,
- Use matrix algebra and the related.
- Matrices to linear transformations, Compute and use determinants, Compute and use eigenvectors and eigenvalues.
- Find the eigenvalues and eigenvectors of a square matrix using the characteristic polynomial and will know how to diagonalize a matrix when this is possible;
- Understand the basic ideas of vector algebra: linear dependence and independence and spanning;
- Familiar with the notion of a linear transformation and its matrix.
- Find the change-of-basis matrix with respect to two bases of a vector space.

### Unit – I

12hrs.

**Introduction to Vector:** Vector and linear combination, Length and Dot products, Matrices.

**Solving Linear Equations:** Vectors and linear equations, the idea of elimination, Elimination using matrices, Rules for matrix, Inverse Matrices, Elimination=Factorization:  $A=LU$ , Transposes and permutations.

### Unit-II

12hrs.

**Vector Spaces and Subspaces:** Spaces of Vectors, The Null space of A, The Complete Solution to  $Ax=b$ , Independence, Basis and Dimension, Dimension of the Four Subspaces.

**Orthogonality:** Orthogonality of the four subspaces, Projections, Least squares approximations, Orthogonal bases and Gram-Submidt.

### Unit-III

10hrs.

**Determinants:** The properties of Determinants, Permutations and Cofactors, Cramer's Rule, Inverses, and Volumes.

### Unit-IV

7hrs.

**Eigen values and Eigenvectors:** Introduction to Eigenvalues, Diagonalizing a Matrix, Systems of Differential equations, Symmetric Matrices, Positive Definite Matrices.

**Unit-V** 7hrs.

**Single Value Decomposition (SVD):** Image processing by Linear Algebra, Bases and Matrices in the SVD, Principal Component Analysis (PCA by SVD), The Geometry of the SVD.

**REFERENCES:**

- 4) Introduction to Linear Algebra with applications by Jim De Franza & Daniel Gagliardi, Waveland Press.

## **M.Sc 2.3: DATA BASE MANAGEMENT SYSTEM**

Upon Completion of the course, the students will be able to

- Explain the features of database management systems and Relational database.
- Design conceptual models of a database using ER modeling for real life applications and also construct queries in Relational Algebra.
- Create and populate a RDBMS for a real life application, with constraints and keys, using SQL.
- Retrieve any type of information from a data base by formulating complex queries in SQL.
- Analyze the existing design of a database schema and apply concepts of normalization to design an optimal database.
- Build indexing mechanisms for efficient retrieval of information from a database.

### **UNIT-I INTRODUCTION TO DBMS**

10Hrs

Introduction, characteristics of database, advantages of DBMS over file processing system, A Brief History of Database Applications. Database softwares (microsoft SQL server, oracle RDBMS, MySQL) Data Models, Schemas, and Instances; Three-Schema Architecture and Data Independence; Database Languages and Interfaces; Centralized and Client/Server Architectures for DBMS.

### **UNIT-II DATA MODELING**

10 Hrs

Entity-Relationship Diagram, Relational Model - Constraints, Languages, Design, and Programming, Relational Database Schemas, Update Operations and Dealing with Constraint Violations; Relational Algebra and Relational Calculus; Cod Rules.

### **Unit-III: Enhanced Data Models**

12 Hrs

Temporal Database Concepts, Multimedia Databases, Deductive Databases, XML and Internet Databases; Mobile Databases, Geographic Information Systems, Genome Data Management, Distributed Databases and Client-Server Architectures.

### **UNIT-IV SQL AND NOSQL**

08 Hrs

Data Definition and Data Types; Constraints, Queries, Insert, Delete, and Update Statements; Views, Stored Procedures and Functions; Database Triggers, SQL Injection. NOSQL: NOSQL and Query Optimization; Different NOSQL Products, Querying and Managing NOSQL; Indexing and Ordering Data Sets; NOSQL in Cloud.

### **UNIT -V NORMALIZATION FOR RELATIONAL DATABASES**

08 Hrs

Functional Dependencies and Normalization; Algorithms for Query Processing and Optimization; Transaction Processing, Concurrency Control Techniques, Database Recovery Techniques, Object and Object-Relational Databases; Database Security and Authorization.

4. “Fundamentals of Database Systems” by Elmsari, Navathe, 5th Edition, Pearson Education (2008).

## **M.Sc.2.4: PYTHON PROGRAMMING**

**Total 48hrs.**

Upon successful completion of this course, the student will be able to:

- Define and demonstrate the use of built-in data structures “lists” and “dictionary”.
- Design and implement a program to solve a real world problem.
- Design and implement GUI application and how to handle exceptions and files.
- Make database connectivity in python programming language

### **Unit-I**

**12hrs.**

**INTRODUCTION TO PYTHON PROGRAMMING:** Python interpreter and interactive mode; values and types variables, expressions, statements, tuple assignment, Order of operations, comments, debugging; modules and functions: function Calls, adding new functions, Definitions and Uses, flow of execution, parameters and arguments, Fruitful functions. Conditionals: Boolean values and operators, conditional (if), alternative (if-else), chained conditional (if-elif-else); Iteration: state, while, for, range, break, continue, pass; recursion; Strings: string slices, immutability, string functions and methods, string module; Lists as arrays.

### **Unit-II**

**12hrs.**

**LISTS, TUPLES, DICTIONARIES:** Lists: Traversing a List, list operations, list slices, list methods, Map, Filter and Reduce, list loop, mutability, aliasing, cloning lists, list parameters; Dictionaries: operations and methods; advanced list processing - list comprehension; Tuples: tuple assignment, tuple as return value.

### **Unit-III**

**07hrs.**

**FILES, MODULES, PACKAGES:** Files and exception: text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, packages: PANDAS, NUMPY, SCIKIT-LEARN;

### **Unit-IV**

**10hrs.**

**CLASSES AND OBJECTS:** Introduction, Defining Classes, Creating Objects, Data Abstraction and Hiding through Classes, Class method and self argument, Class Constructor (init() Method), Data Members, Calling a Class Method from another Class Method, Class Methods and Static Methods, Inheritance, Types of Inheritance, Abstract Classes and Interfaces, Operator Overloading, Overriding Methods.

### **Unit-V**

**07hrs.**

**Multithreading, GUI Programming, Graphics, Plotting and Web Programming:** Multithreading-Introduction, Threading Module (Creating a Thread, Synchronizing Threads) GUI Programming with tkinter Package, Simple Graphics using Turtle, Plotting Graphs in Python, Web Programming using Python.

## **M.Sc. OEC 2.7: COMPUTER CONCEPTS AND OFFICE AUTOMATION**

**Total Hours: 48**

Upon Completion of the course, the students will be able to

- Understanding the concepts of computers and the use of MS office packages.
- Identify the role of MS-word and its potential application in real-life context.
- Knowledge in the application of various menus and their uses in MS office packages.
- Having hands-on training on the use of MS-Excel and MS-Power Point
- Learnt to create simple database applications.

### **Unit-I 10 Hrs**

**Basics:** History and generations of Computer, Types of Computer, Organization of Computer System, Hardware and Software Components, Memory unit: Types of memory, ROM, RAM, types of RAM & ROM, Introduction to cache and virtual memory.

### **Unit-II 10 Hrs**

**Number system:** Binary Octal, Hexa-decimal, Number base conversion, Binary addition, Subtraction, One's and Two's compliment, Character codes – ASCII, EBCDIC.

### **Unit-III 10 Hrs**

**Operating System:** Types of operating system, Functions, Introduction to DOS and WINDOWS operating system.

**Software:** Types of languages, Types of software (System and Application software).

### **Unit-IV 10 Hrs**

**Network and Internet:** History and evolution of Computer Network, Types of network (LAN, MAN & WAN), Internet and its applications.

### **Unit-V 08 Hrs**

**Office Automation:** Working with MS-Word, MS-Excel and MS-POWER POINT

## M.Sc. 3.1: DESIGN AND ANALYSIS OF ALGORITHMS

Total Hours: 48

Upon Completion of the course, the students will be able to

- Choose appropriate advanced data structure for given problem.
- Calculate complexity.
- Select appropriate design techniques to solve real world problems.
- Apply the dynamic programming technique to solve the problems.
- Apply the greedy programming technique to solve the problems.
- Select a proper pattern matching algorithm for given problem

### Unit-I:

12 hrs

**Introduction:** What is an algorithm?, Fundamentals of Algorithmic Problem Solving, Important Problem Types, Fundamental data Structures.

**Fundamentals of the Analysis of Algorithm Efficiency:** Analysis Framework, Asymptotic Notations and Basic efficiency classes, Mathematical analysis of Recursive and Non-recursive algorithms.

**Brute Force and Exhaustive Search:** Selection Sort and Bubble Sort, Sequential Search and Brute-Force String Matching, Depth-First Search and Breadth-First Search

### Unit-II:

8 hrs

#### Decrease-and-Conquer

Insertion Sort, Topological sorting, Algorithms for Generating Combinatorial Objects, Binary Search.

#### Divide-and-Conquer

Merge sort, Quick sort, Binary tree Traversals and related properties, Multiplication of large integers, Strassen's Matrix Multiplication

### Unit-III:

10 hrs

#### Space and Time Tradeoffs

Sorting by Counting, Input Enhancement in String Matching, Hashing.

### Unit-IV:

10 hrs

#### Dynamic Programming

Computing a binomial coefficient, Warshall's and Floyd's Algorithms, The Knapsack Problem and Memory Functions.

### Unit-V:

08 hrs

**Greedy Technique** Prim's Algorithm, Kruskal's Algorithm, Dijkstra's Algorithm.

#### Limitations of Algorithm Power

Lower-Bound Arguments, Decision Trees, P, NP and NP-Complete Problems.

### References:

### M.Sc. 3.3: WEB TECHNOLOGIES

**Total Hours: 48**

Upon Completion of the course, the students will be able to

- Students are able to develop a dynamic webpage by the use of java script and DHTML.
- Students will be able to write a well formed / valid XML document.
- Students will be able to connect a java program to a DBMS and perform insert, update and delete operations on DBMS table.
- Students will be able to write a server side java application called Servlet to catch form data sent from client, process it and store it on database.
- Students will be able to write a server side java application called JSP to catch form data sent from client and store it on database.
- Students will be able to write web services.

#### **Unit-I:**

**10 hrs**

Web essentials – W3C - clients – servers - communication – markup languages – XHTML – simple XHTML pages style sheets – CSS

#### **Unit-II:**

**12 hrs**

**Client side programming:** Introduction to Java script, Basic Syntax, Variables and Data types, Statements, Operators, Literals, Functions, Objects, Arrays, Built-in objects, Java script debuggers.

**Host objects Browsers and the DOM:** Introduction to Document Object Model, DOM history and levels, Intrinsic Event Handling, Modifying Element Style, The Document tree, DOM Event handling.

#### **Unit-III:**

**12 hrs**

**Server side programming:** (Java servlets) - Servlet Architecture Overview, A “Hello World!” Servlet, Servlet Generating Dynamic Content, Servlet lifecycle, Parameter Data, Sessions, Cookies, URL Rewriting, Other Servlet capabilities, Data Storage, Servlets and Concurrency.

**Separating Programming and Presentation (JSP Technology):** Introduction to Java Server Pages, JSP and Servlets, Running JSP Applications, Basic JSP, Java Beans Classes and JSP, Tag Libraries and Files, Support for the Model – View Controller Paradigm.

#### **Unit-IV:**

**07 hrs**

**Representing Web Data:** XML, XML document and Vocabularies, XML Declaration, XML Namespaces, Java Script and XML: Ajax, DOM based XML processing, Event-oriented Parsing: SAX, Transforming XML Documents, Selecting XML Data: XPath Template-based Transformation: XSLT, Displaying XML Documents in browsers.

#### **Unit-V:**

**07 hrs**

**Web Services:** JAX-RPC, WSDL, XML Schema and SOAP: Web Service Concepts, Writing a Java Web Service, Writing a Java Web Service Client, Describing Web Services: WSDL, Representing Data Types: XML Schema, Communicating Object Data: SOAP. Databases and Java Servlets, Databases and JSP

### **M.Sc. 3.4: Artificial Intelligence and Machine Learning**

**Total Hours: 48**

Upon Completion of the course, the students will be able to

- Apply artificial intelligence techniques, including search heuristics, knowledge representation, planning and reasoning
- Describe the key components of the artificial intelligence (AI) field
- Explain search strategies and solve problems by applying a suitable search method analyze and apply knowledge representation
- Describe and list the key aspects of planning in artificial intelligence
- Analyze and apply probability theorem and Bayesian networks
- Describe the key aspects of intelligent agents
- Differentiate the key aspects of evolutionary computation, including genetic algorithms and genetic programming
- Describe the key aspects of machine learning
- Analyze problem specifications and derive appropriate solution techniques for them
- Design and implement appropriate solutions for search problems and for planning problems

#### **Unit-I:**

**12 hrs**

Introduction: Introduction to AI applications and AI techniques, Production systems, control strategies, reasoning - forward and backward chaining. Intelligent Agents: Definitions of a rational agent, reflex, model-based, goal-based, and utility-based agents, the environment in which a particular agent operates.

#### **Unit-II:**

**12 hrs**

Searching Techniques and Game Playing: Breadth first search, depth first search, iterative deepening, uniform cost search, hill climbing, simulated annealing, genetic algorithm search, heuristic search, Best first search, A\* algorithm, AO\* algorithm, Minimax and game trees, refining minimax, Alpha - Beta pruning, constraint satisfaction.

#### **Unit-III:**

**10 hrs**

Knowledge Representation: First order predicate calculus, resolution, unification, natural deduction system, refutation, logic programming, PROLOG, semantic networks, frame system, value inheritance, conceptual dependency, Ontologies. Planning: basic representation for planning, symbolic-centralized vs. reactive-distributed, partial order planning algorithm.

#### **Unit-IV:**

**07 hrs**

Machine learning: Introduction to different types of learning, Supervised and Unsupervised learning — Reinforcement learning- Basics of Neural network models.

#### **Unit-V:**

**07 hrs**

Applications of Artificial Intelligence- Natural Language Processing, Speech recognition, Computer vision, Expert systems.

## M.Sc. OEC 3.7: SPSS SOFTWARE

**Total Hours: 48**

Upon Completion of the course, the students will be able to

- Be comfortable using SPSS as a data analysis tool
- Understand how to work with SPSS
- Understand how to learn to use new features of SPSS on their own
- Understand how to acquire information (samples)
- Understand how to enter and reorganize information within SPSS
- Understand how to effectively summarize research finds using SPSS
- Through the use of appropriate indexes and tables
- Choose charts to successfully highlight their research results
- Understand and interpret charts
- Understand the basic principles behind inferential statistics
- Carry out inferential statistical analysis using SPSS
- Integrate information and build models
- Edit SPSS output
- Use SPSS output to produce scientifically sound research reports

### **UNIT-I 10Hrs**

#### **Table of Contents**

Overview of PASW Statistics, Introduction to PASW: Menus, Tool Bar, Dialogue Box, Designate Window, Basic Steps for performing any Statistical Procedure

#### **Data Management**

Creating a Data File, Defining Variables, Entering the Data, Saving Data, Opening an existing Data File, Inserting Variables, Inserting Cases, Identifying Duplicate Cases, Identifying Unusual Cases, Sorting Cases, Merging a File: Add Cases, For Adding Variables, Data Aggregation, Splitting File, Selecting Cases, Listing Cases

### **UNIT-II 10Hrs**

#### **Data Transformation**

Computing a New Variable, Recoding Variables, Automatic Recode, Visual Binning, Rank Cases

#### **Describing Data Numerically**

Types of Measurement Scales, Summary Measures, Frequencies, Descriptive Statistics, Explore, Crosstabs

### **UNIT-III 10Hrs**

#### **Describing Data Graphically**

Line Chart, Pie Chart, Bar Chart, Histogram and the Standard Normal Curve, Box Plot, Scatter Diagram, P-P Plot, Q-Q Plot, Chart Builder, Formatting Charts

### **UNIT-IV 10Hrs**

#### **One Sample t-Test**

Hypothesis Testing, Steps in Hypothesis Testing, Assumptions of Hypothesis Testing, Testing for Population Mean, Statistical and Practical Significance

### **Independent Sample t-Test**

Assumptions of Independent Sample t-Test, Procedure for Testing for Differences in Means between Groups, Interpretation of Null Results, Effect Size

### **UNIT-V**

**08Hrs**

### **Nonparametric Statistics**

Runs Test, Chi-Square Test, Mann-Whitney U Test, Wilcoxon Signed Rank Test, Kruskal-Wallis Test

### **References:**

## M.Sc.4.1: SOFTWARE ENGINEERING

Total Hours: 48

Upon successful completion of this course, the students will be able to

- Define various software application domains and remember different process model used in software development.
- Explain needs for software specifications also they can classify different types of software requirements and their gathering techniques.
- Convert the requirements model into the design model and demonstrate use of software and user interface design principles.
- Distinguish among SCM and SQA and can classify different testing strategies and tactics and compare them.
- Justify role of SDLC in Software Project Development and they can evaluate importance of Software Engineering in PLC.
- Generate project schedule and can construct, design and develop network diagram for different.

### Unit-I

10 Hrs

**The Product and The Process:** Evolving role of software, software characteristics and components, Crisis, Software Myths, Software Engineering-A Layered Technology, Software process, linear sequential model, Prototyping model, RAD model, Evolutionary software process model.

**Project Management Concepts:** The Management Spectrum, The People, The Product, The Process, and The Project .W5HH Principle.

**Software Process and Project Metrics:** Measures, Metric Indicators, Metric in process and the Project Domains ,Software Measurement, Metrics for software quality.

### Unit-II

10 Hrs

**Software Project Planning:** Project Planning Objectives, Software Project Estimation, decomposition Techniques, Empirical Estimation Models.

**Risk Analysis and Management:** Software Risks, Risk Identification, Risk Projection, Risk Refinement and Risk Mitigation, Monitoring, and Management.

### Unit-III

10Hrs

**Analysis Concepts and Principles:** Requirement analysis, communication techniques, analysis principles, software prototyping and specification.

**Analysis Modeling:** Elements of analysis model, data modeling, functional modeling, behavioral modeling, the mechanics of structured analysis, data dictionary, other classical analysis methods.

### Unit-IV

10hrs

**Design Concepts and Principles:** Software design and software engineering design process, design principles, design concepts, design methods, data design, architectural design and process, transform and transaction mappings, design post processing, architectural design optimization, interface design, procedural design.

### Unit-V

08 hrs

**Software Testing Techniques and Strategies:** Fundamentals, Test case design, White box testing, Basis path testing, Control structure testing, Black box testing, Software testing strategies.

**Software Configuration Management:** Configuration management, maintenance costs, maintenance side effects, maintenance tissues.

**Software Quality Assurance:** Quality Concepts, Software Quality Assurance, FTR, ISO 9001, ISO-9002, ISO-9003, Introduction to CASE, DOD standard 2167 A.

## M. Sc 4.3: DATA MINING

Total Hours: 48

Upon successful completion of this course, the students will be able to

- Understand Data Warehouse fundamentals, Data Mining Principles
- Design data warehouse with dimensional modelling and apply OLAP operations.
- Identify appropriate data mining algorithms to solve real world problems
- Compare and evaluate different data mining techniques like classification, prediction, clustering and association rule mining
- Describe complex data types with respect to spatial and web mining.
- Benefit the user experiences towards research and innovation.

### Unit-I

10 Hrs

Data mining – Motivation – Importance - DM Vs KDD - DM Architecture - Data Types – DM Tasks – DM System Classification - Primitives of DM - Data Mining Query Language - DM Metrics - DM Applications - DM Issues – Social Implications of DM

### Unit-II

10 Hrs

Data Preprocessing: Summarization - Data cleaning - Data Integration and Transformation - Data Reduction - Discretization and Concept Hierarchy Generation

### Unit-III

10 Hrs

Mining Frequent Patterns – Frequent Item set Mining Methods. Classification: Classification by Decision Tree Induction – Bayesian Classification – Rule based Classification - Prediction– Accuracy and Error Measures

### Unit-IV

10 Hrs

Cluster Analysis – Types of Data in Cluster Analysis – Categorization of clustering Methods – Partition Methods - Outlier Analysis – Mining Data Streams – Social Network Analysis – Mining the World Wide Web

### Unit-V

8 Hrs

Data Warehousing: OLTP Vs OLAP - Multidimensional Data Model -DW Architecture Efficient Processing of OLAP queries - Metadata repository – DWH Implementation – OLAM

## **M.Sc.4.4: OPERATION RESEARCH**

**Total Hours: 48**

Upon successful completion of this course, the students will be able to

- Formulate a real-world problem as a mathematical programming model
- Understand the theoretical workings of the simplex method for linear programming and perform iterations of it by hand
- Understand the relationship between a linear program and its dual, including strong duality and complementary slackness
- Perform sensitivity analysis to determine the direction and magnitude of change of a model's optimal solution as the data change
- Solve specialized linear programming problems like the transportation and assignment problems
- Solve network models like the shortest path, minimum spanning tree, and maximum flow problems
- Understand the applications of, basic methods for, and challenges in integer programming
- Understand how to model and solve problems using dynamic programming
- Model a dynamic system as a queuing model and compute important performance measures
- Learn optimality conditions for single- and multiple-variable unconstrained and constrained non-linear optimization problems, and corresponding solution methodologies

**Unit- I** **10hrs.**  
Introduction: History, Definitions, Features of Operation Research, Models and modeling in OR, Methods for solving OR models, Advantages of OR Study. Linear Programming: Structure of Linear programming model, General Mathematical model of LPP, guidelines on linear programming models, Examples of LP model formulation.

**Unit- II** **12hrs.**  
Linear programming: Graphical solution Methods of LP problems, Simplex algorithm(Maximization case), Simplex algorithm (Minimization case): two phase and Big-M method. Duality in Linear programming

**Unit- III** **10hrs.**  
Transportation Problem : Mathematical model of transportation problem, The transportation algorithm, NWCM, LCM, VAM, Test for optimality, variations in Transportation problem.

**Unit -IV** **10hrs.**  
Assignment Problem: Mathematical models of Assignment Problem, Hungarian method for solving Assignment problem. Network Models: Scope and definition of Network models, minimal spanning tree algorithm, TSP as a network model, project management :CPM and PERT.

**Unit- V****6hrs.**

Decision Theory and Decision Trees : Steps in decision making, Types of Decision making environment Decision making under uncertainty, Decision making under risk, Posterior probabilities and Bayesian Analysis, Decision Tree Analysis.

**Core Theory Electives: I**

<b>Paper Code</b>	<b>Paper Title</b>
M.Sc.3.2 A	Operating System Concepts
M.Sc.3.2 B	Computer Vision
M.Sc.3.2 C	Mobile Computing
M.Sc.3.2 D	Business Intelligence Systems
M.Sc.3.2 E	Computer Graphics

## M. Sc 3.2A: Operating System Concepts

Total Hours: 48

Upon Completion of the course, the students will be able to

- Describe the important computer system resources and the role of operating system in their management policies and algorithms.
- Understand the process management policies and scheduling of processes by CPU
- Evaluate the requirement for process synchronization and coordination handled by operating system
- Describe and analyze the memory management and its allocation policies.
- Identify use and evaluate the storage management policies with respect to different storage management technologies.
- Identify the need to create the special purpose operating system.

### Unit-I

10 Hrs

**Introduction:** Operating system concepts, types of operating system – Batch, interactive, time sharing, real time and distributed operating systems. Operating system services, system calls, system components, system programs.

**Process Management:** Processes-process scheduling, operation on processors, co- operating process threads, interprocess communication, concept of critical section problem and solution, semaphores and implementation.

### Unit-II

10 Hrs

**CPU Scheduling:** Scheduling criteria and scheduling algorithms, multiple processor scheduling.

**Deadlock:** Deadlock problem, characterization, prevention, avoidance, detection, recovery, combined approach to deadlock handling.

### Unit-III

10 Hrs

**Memory Management:** Logical and physical address, swapping overlays, contiguous allocation, paging segmentation, segmentation with paging, virtual memory-demand paging page replacement algorithms.

### Unit-IV

10 Hrs

**Disk and Drum Scheduling:** Physical characteristics FCFS, Shortest seek time first, SCAN scheduling, selection of disk scheduling algorithm, sector queuing.

### Unit-V

08 Hrs

**File System:** Files, access method, directory structure, protection and file system implementation, allocation methods.

**Protection:** Goals, mechanism and policies, domain of protection, access matrix and its implementation, dynamic protection structure, revocation, security.

## M.Sc. 3.2B: COMPUTER VISION

**Total Hours: 48**

Upon Completion of the course, the students will be able to

- identify basic concepts, terminology, theories, models and methods in the field of computer vision,
- describe known principles of human visual system,
- describe basic methods of computer vision related to multi-scale representation, edge detection and detection of other primitives, stereo, motion and object recognition,
- suggest a design of a computer vision system for a specific problem

### **Unit- I:**

**12hrs**

**Introduction and image processing:** What is computer vision? History of computer vision, Photometric image formation, the digital camera, Image processing: Point operators, Linear filtering, Neighbor hood operators.

### **Unit -II:**

**10 hrs**

**Feature detection and matching:** Feature detectors, feature descriptors, feature tracking, edge detection, edge linking, Lines: successive approximation, Hough transform, vanishing points, Application: Rectangel detection.

### **Unit-III:**

**10 hrs**

**Segmentation:** Active contours: snakes, Dynamic snakes and condensation, Scissors, Level Sets. Split and merge: Watershed, Region splitting (divisive clustering), and Region merging (agglomerative clustering) Graph-based segmentation.

### **Unit-IV:**

**8 hrs**

**Color Image processing:** color fundamentals, color models, Pseudo color image processing, color transformations, color image smoothing and sharpening, Image segmentation based on color.

### **Unit-V:**

**8 hrs**

**Recognition:** Object detection, Face recognition, Instance recognition, category recognition, context and scene understanding

## M. Sc 3.2C: MOBILE COMPUTING

Upon Completion of the course, the students will be able to

- Explain the principles and theories of mobile computing technologies.
- Describe infrastructures and technologies of mobile computing technologies.
- List applications in different domains that mobile computing offers to the public, employees, and businesses.
- Describe the possible future of mobile computing technologies and applications.

### UNIT-1

10hrs

#### Mobile Computing Architecture: An Overview

Mobile IP, Cellular and WLAN Wi-Fi IEEE 802.11X Networks, Ad Hoc Networks, Wireless Personal Area Network, Mobile Enterprise Network, Mobile Cloud Network, Mobile Computing, Mobile Computing Operating System, Mobile Computing Architecture, Design Considerations for Mobile Computing, Mobile Computing and the Apps, Limitations of Mobile Devices, Security Issues

### UNIT-2

10hrs

#### Mobile Client Devices and Pervasive Computing

Moving beyond Desktops, Pervasive Computing, Mobile Devices-Classifications and Characteristics, Tablet and e-Book Reader, Smart Identification Devices: Smart Cards, Labels, and Tokens, RFID, Smart Sensors, Actuators, and Mobile Robotic Systems, Smart Home and Appliances, Limitations and Devices Design Constraints, Automotive Systems

### UNIT-3

10hrs

#### Second-generation Architecture—GSM, GPRS, and Others

GSM Services, GSM System Architecture, Call Routing, Public Land Mobile Network (PLMN) Interface, GSM Subscriber Addresses and Identities, Protocols, Localization, Call Handling, Handover, Security, Introduction to SMS, General Packet Radio Service, High-speed Circuit-switched Data

### UNIT-4

10hrs

#### Wireless Medium Access Control, CDMA, 3G, WiMax, 4G and 5G Networks

Modulation, Medium Access Control, Exposed and Hidden Terminal Problem, Near and Far Terminal Problem, and Power Control for Medium Access, MAC Algorithms, WLAN and CAMA/CA Wireless Protocols, Applications of 3G Mobile Services, 3G Mobile Services: IMT2000 and UMTs, CDMA 2000: 3G, WCDMA 3G, OFDM, High-speed Packet Access, Long-term Evolution and WiMax 16E, 4G Networks: HS-OFDM, LTE Advanced and WiMax 16M, Upcoming 5G Network Features

### UNIT-5

08hrs

#### Mobile IP Network Layer

Mobile IP, Packet Delivery and Handover Management, Location Management, Registration, IP Header: Encapsulation and Routes Optimization, Mobility Binding, Tunneling, and Reverse Tunneling, Dynamic Host Configuration Protocol, Cellular IP, Mobile IP with IPv6, Voice over IP, IP Security

**Reference Books:**

2. Pattnaik, “Fundamentals of mobile computing”, 2<sup>nd</sup> edition, PHI
3. Uwe Hansmann, “Principles of mobile computing”, 2<sup>nd</sup> edition, Springer international, 2014

## **M. Sc 3.2D: BUSINESS INTELLIGENCE SYSTEMS**

**Total hours: 48**

Upon Completion of the course, the students will be able to

- Describe the concepts and components of Business Intelligence (BI).
- Critically evaluate use of BI for supporting decision making in an organization.
- Understand and use the technologies and tools that make up BI (e.g. Data warehousing, Data reporting and use of online analytical processing (OLAP)).
- Understand and design the technological architecture that underpins BI systems.
- Plan the implementation of a BI system.

Unit-I 12hrs.

Decision support and Business intelligence-Changing Business environment and computerized decision support, managerial decision making and support for decision making-DSS concept and framework Business intelligence-Major tools and techniques of managerial decision support –BI architecture.

Unit-II 12hrs.

Essentials of Business Intelligence-Origin and drivers of business intelligence, successful BI implementation ,characteristics of BI-Architecting the data ,Enterprise Data model and its Benefits, Granularity of Data in Data warehouse and role of Metadata

Unit-III 10hrs.

Advanced Data Warehousing principles- Data Warehousing architecture, DW development, real time DW and DW Administration and security issues-Visualization of Dimension model-Star, snowflake and other advanced models-Aggregated Fact Tables-Relational DBMS Support for Dimensional Modelling-Advanced Topics in Dimensional Modelling-Selecting a Modelling Tool-Populating Data Warehouse.

Unit-IV 07hrs.

Dimensional modelling in BI environment-Dimensional Modelling-Modelling considerations-Dimensional model design life cycle-Case studies-Business Analytics and data visualization-Business analytics overview, reports and queries, Advanced Business Analytics, data visualization Real time BI, Business analytics and web intelligence-Structure of mathematical models for decision support and visual interactive simulation.

---

Unit-V 07hrs.

## M.Sc. 3.2E: Computer Graphics

Total Hours: 48

Upon successful completion of this course, the students will be able to

- Explain the core concepts of computer graphics, including viewing, projection, perspective, modelling and transformation in two and three dimensions,
- Apply the concepts of color models, lighting and shading models, textures, hidden surface elimination, anti-aliasing, and rendering,
- Interpret the mathematical foundation of the concepts of computer graphics,
- Describe the fundamentals of animation, parametric curves and surfaces, and spotlighting, identify a typical graphics pipeline and
- Apply graphics programming techniques to design and create computer graphics.

### Unit-I

10 Hrs

**Introduction:** Computer graphics and its applications in various fields. Hardware system for graphics working of different input devices, visual display devices and hard copy device. Introduction to different coordinate systems.

**Raster Scan display:** Concepts of resolution, aspect ratio refresh rate and frame buffer.

**Random scan displays:** Concepts of display file and display file interpreted comparison between raster scan and random scan. Implementation of graphics in 'C' language and study of various graphics functions.

### Unit-II

10 Hrs

**Line drawing methods:** DDA algorithm and Bresenham's algorithm for different slope conditions, midpoint method for line generation. Two-dimensional transformation: Mathematical treatment of basic transformation such as translation scaling and rotation. Development of composite transformation matrices using homogeneous coordinates. General fixed point scaling and pivot point rotation.

**Clipping:** Study of Cohen Sutherland line clipping procedure and Sutherland hodgmen polygon clipping procedure.

**Windows and view ports:** Derivation of generalized window to view port transformation matrix. Introduction to interrupt driven programming in 'C' and interacting with the mouse.

### Unit-III

10 hrs

**Three-dimensional Computer Graphics:** Introduction to left and right hand coordinate systems. Basic 3D transformation. Hidden line removal. **Projection:** Study of orthographic and oblique parallel transformation equations for them.

### Unit-IV

10 Hrs

**Graphic software standards:** GKS and PHIGS. Study of various attributes of output primitives such as line attributes, area fill attributes and character attributes.

**Graphics Software Study:** DirectX and Open GL

### Unit-V

08 Hrs

**Segments:** Concepts and advantages. Segment table various operations on segments.

Data structures for the display file arrays on segment, linked list and paging schemes M  
**Miscellaneous topics** – Brief introduction to Bezier curves and their application,  
fractal morphing and animation.

**Core Theory Electives-II:**

Subject Code	Elective Title
M.Sc.4.2 A	Cloud Computing
M.Sc.4.2 B	Internet of Things (IoT)
M.Sc.4.2 C	Mobile Communications
M.Sc.4.2 D	Deep learning
M.Sc.4.2 E	Information Security and Cryptography
M.Sc.4.2 F	Soft Computing

## M.Sc 4.2A CLOUD COMPUTING

Total Hours: 48

Upon Completion of the course, the students will be able to

- Describe the principles of Parallel and Distributed Computing and evolution of cloud computing from existing technologies
- Implement different types of Virtualization technologies and Service Oriented Architecture systems
- Elucidate the concepts of NIST Cloud Computing architecture and its design challenges
- Analyze the issues in Resource provisioning and Security governance in clouds
- Choose among various cloud technologies for implementing applications CO6 Install and use current cloud technologies

### Unit –I: New Computing Paradigms and Services

08Hrs

Edge computing, Grid computing, Utility computing, Distributed computing, Cloud computing and its history and evolution

### Unit –II: Introduction to Cloud Computing

10 Hrs

Cloud Computing Architectural Framework, Cloud Deployment Models, private, public and hybrid, Challenges in adapting a cloud in the context of i) Security issues ii) Bandwidth and iii) Integration issues, Virtualization in Cloud Computing, Parallelization in Cloud Computing, Security for Cloud Computing, Cloud Economics

### Unit-III : Cloud source Service Models

10 Hrs

Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Seven Business Models for cloud, five-layer cloud service stack, compute and storage cloud services case studies Jeff Bezos and Amazon

### Unit -IV : Foundational Elements of Cloud Computing

10 Hrs

Virtualization, Browser as a platform, Introduction to Web 2.0, Introduction to Autonomic Systems, Service Level Agreements, Cloud Computing architecture and industry frameworks such as MapReduce.

### Unit –V: Cloud Computing Practices

10 Hrs

Virtualization, Cloud Computing Operating System, Creating Windows servers on the cloud, Creating Linux servers on the cloud, Deploying applications on the cloud, Major cloud solutions.

## M.Sc. 4.2B: INTERNET OF THINGS (IoT)

**Total Hours: 48**

Upon Completion of the course, the students will be able to

- Interpret the impact and challenges posed by IoT networks leading to new architectural models.
- Compare and contrast the deployment of smart objects and the technologies to connect them to network.
- Appraise the role of IoT protocols for efficient network communication.
- Elaborate the need for Data Analytics and Security in IoT.
- Illustrate different sensor technologies for sensing real world entities and identify the applications of IoT in Industry.

### Unit-1

**10hrs**

Introduction to IoT: what is IOT? Genesis of IoT and digitization, IOT impact, Convergence of IT and OT, IOT challenges.

**IoT Network Architecture and Design:** Drivers behind New Network Architectures, IoT architecture drivers, Comparing IoT Architectures, A Simplified IoT Architecture, The Core IoT Functional Stack, IoT data management and compute stack

### Unit-2

**10hrs**

**Engineering IoT networks:** Smart Objects: The “Things” in IoT, Sensors, Actuators, and Smart Objects, Wireless Sensor Networks (WSNs), Communication Protocols for Wireless Sensor Networks, Connecting Smart Objects, Communications Criteria, IoT Access Technologies.

### Unit-3

**10hrs**

**IP as the IoT Network Layer:** The Business Case for IP, The Need for Optimization, IP versions, Optimizing IP for IoT, header compression, Fragmentation, Mesh addressing, 6TiSCH, RPL, Authentication and encryption on constrained nodes.

### Unit-4

**10hrs**

**Application Protocols for IoT:** The Transport Layer, IoT Application Transport Methods, Application Layer Protocol Not Present, SCADA, A Little Background on SCADA, Adapting SCADA for IP, Tunneling Legacy SCADA over IP Networks, SCADA Protocol Translation, SCADA Transport over LLNs with MAP-T, Generic Web-Based Protocols, IoT Application Layer Protocols , CoAP

### Unit-5

**08hrs**

**Data and Analytics for IoT:** An Introduction to Data Analytics for IoT, Structured Versus Unstructured Data, Data in Motion Versus Data at Rest, Machine Learning Overview, Supervised Learning, Unsupervised Learning, Machine Learning and Getting Intelligence

from Big Data, Predictive Analytics, Big Data Analytics Tools and Technology, Edge Analytics Core Functions, Network Analytics

## M.Sc.4.2C: MOBILE COMMUNICATIONS

**Total Hours: 48**

Upon Completion of the course, the students will be able to

- To get aware of historical development of different wireless technologies
- To get familiar with key concepts of wireless networks, standards, technologies and their basic operations
- To learn about various wireless local area network standard, design and analyse various medium access
- To learn how to evaluate MAC and network protocols using network simulation software tools.
- The students should get familiar with the wireless/mobile market and the future needs and challenges
- Understand the concepts, applications of wireless sensor networks, Bluetooth and Zigbee

### Unit-1

**10hrs**

*Introduction and overview of wireless communication*

Wireless Comes of Age 2, The Global Cellular Network, The Mobile Device Revolution , Future Trends, The Trouble With Wireless, Signals for Conveying Information, Analog and Digital Data Transmission, Channel Capacity, Transmission Media, Spectrum Considerations, Line-Of-Sight Transmission, Fading in the Mobile Environment, Channel Correction Mechanisms, Digital Signal Encoding Techniques, Coding and Error Control, Orthogonal Frequency Division Multiplexing (OFDM)

### Unit-2

**10hrs**

*Signal Encoding Techniques and error control*

Signal Encoding Criteria, Digital Data, Analog Signals, Analog Data, Analog Signals, Analog Data, Digital Signals, Orthogonal Frequency Division Multiplexing, Orthogonal Frequency Division Multiple Access (OFDMA), Single-Carrier FDMA, Error Detection , Block Error Correction Codes, Convolutional Codes, Automatic Repeat Request

### Unit-3

**10hrs**

*Wireless LAN Technology - Overview and Motivation, IEEE 802 Architecture, IEEE 802.11 Architecture and Services, IEEE 802.11 Medium Access Control, IEEE 802.11 Physical Layers, Gigabit Wi-Fi 356*

Page

*Bluetooth and IEEE 802.15- The Internet of Things, Bluetooth Motivation and Overview, Bluetooth Specifications, Bluetooth High Speed and Bluetooth Smart, IEEE 802.15, ZigBee*

**Unit-4** **10hrs**

*Cellular Wireless Networks*

Principles of Cellular Networks, First-Generation Analog, Second-Generation TDMA, Second-Generation CDMA, Third-Generation Systems, Approach to 4G, LTE Architecture, Evolved Packet Core.

**Unit-5** **08hrs**

*Mobile Applications and Mobile IP* - Mobile Application Platforms, Mobile App Development, Mobile Application Deployment, Mobile IP

**References:**

1. Cory Beard and William Stallings, “wireless communication networks and system”, Pearson, 2016
2. Jochen Schiller, “Mobile Communication”, Addison-wesley, 2016

## M.Sc.4.2D: DEEP LEARNING

**Total Hours: 48**

Upon Completion of the course, the students will be able to

- Identify the deep learning algorithms which are more appropriate for various types of learning tasks in various domains.
- Implement deep learning algorithms and solve real-world problems.

### Unit- I

**10hrs**

**Introduction:** Historical context and motivation for deep learning; basic supervised classification task, optimizing logistic classifier using gradient descent, stochastic gradient descent, momentum, and adaptive sub-gradient method.

### Unit- II

**10hrs**

**Neural Networks:** Feed forward neural networks, deep networks, regularizing a deep network, model exploration, and hyperparameter tuning.

### Unit-III

**8hrs.**

**Optimization for training deep models:** Challenges in Neural Network optimization, Basic Algorithms, Parameter Initialization Strategies, Algorithm with Adaptive Learning Rates, Approximate second order Methods, Optimization Strategies and Meta-Algorithms.

### Unit-IV

**12hrs**

**Convolutional Networks and Sequence Modeling:** Motivation, Convolution operation, Pooling, Variants of the Basic Convolution Function, Structured outputs, Efficient Convolution Algorithms. Sequence Modeling: Recurrent Nets Unfolding computational graphs, recurrent neural networks (RNNs), bidirectional RNNs, encoder-decoder sequence to sequence architectures, deep recurrent networks, Recursive neural networks.

### Unit-V

**8hrs**

**Autoencoders** : Under complete autoencoders, regularized autoencoders, sparse autoencoders, denoising autoencoders, representational power, layer, size, and depth of autoencoders, stochastic encoders and decoders, denoising autoencoders, Learning manifolds with Autoencoders, Applications of Autoencoders.

## M.Sc 4.2E: INFORMATION SECURITY AND CRYPTOGRAPHY

**Total Hours: 48**

Upon Completion of the course, the students will be able to

- Identify and analyze network security attacks and counter measures to prevent those attacks.
- Analyze the applications of discrete mathematics and understand their implementation in cryptography.
- Apply the knowledge of existing encryption and decryption techniques to provide security solutions.
- Assess impact of public key cryptosystems and key management to ensure secure exchange of information.
- Investigate the security requirements and solutions for maintaining Data integrity using modern techniques for data transmission.

### **Unit – I : Basics of Information Security**

10Hrs

Information Security Overview, Threat and Attack Vectors, Types of Attacks, Common Vulnerabilities and Exposure (CVE), Security Attacks, Fundamentals of Information Security, Computer Security Concerns, Information Security Measures.

### **Unit –II Information Security Policies, Procedures**

08 Hrs

Information Security Policies-Necessity-Key Elements and Characteristics, Security Policy Implementation, Configuration, Security Standards-Guidelines and Frameworks

### **Unit-III : Encryption techniques**

12 Hrs

Classical Encryption Techniques Symmetric Cipher Model- Cryptography, Cryptanalysis and Brute-Force Attack, Block Ciphers and the Data Encryption Standard - Block Cipher Structure- Stream Ciphers and Block Ciphers, Feistel Cipher Structure, The Data Encryption Standard-Encryption and Decryption, Advanced Encryption Standard (AES), International Data Encryption Algorithm(IDEA).

### **Unit –IV : Public Key Encryption**

08 Hrs

Characteristics of Public Key System; RSA Technique – Encryption-Method; Key Exchange; Diffie-Hellman Scheme; Cryptographic Hash Functions; Digital Signature – Properties of Digital Signature, Certificates; Certificate Authorities.

### **Unit-V : IP and Web Security**

10 Hrs

IP security: Overview - Architecture – Authentication Header - Encapsulating Security Payload - Key management – Web security: Web security considerations – Secure Socket Layer and Transport Layer Security – Secure electronic transaction – Web issues.

## **M.Sc.4.2F: SOFT COMPUTING**

**Total Hours: 48**

Course Outcomes: At the end of the course the student should be able to

- Learn about soft computing techniques and their applications
- Analyze various neural network architectures
- Understand perceptron's and counter propagation networks.
- Define the fuzzy systems
- Analyze the genetic algorithms and their applications.

### **Unit-I**

**10hrs**

Soft Computing and its Techniques, Soft Computing versus Hard Computing, Applications of Soft Computing in the current industry.

### **Unit-II**

**12hrs**

Neural Network (NN), Biological foundation of Neural Network, Neural Model and Network Architectures, Perceptron Learning, Supervised Hebbian Learning, Back-propagation, Associative Learning, Competitive Networks, Hopfield Network, Computing with Neural Nets and applications of Neural Network.

### **Unit-III**

**10hrs**

Fuzzy sets, Operations on Fuzzy sets, Fuzzy Relations, Fuzzy Measures, Applications of Fuzzy Set Theory to different branches of Science and Engineering.

### **Unit-IV**

**10hrs**

Neuro Fuzzy and Soft Computing, Adaptive Neuro-Fuzzy Inference System Architecture, Hybrid Learning Algorithm, Learning methods that Cross-fertilize ANFIS and RBFN.

### **Unit-V**

**05hrs**

Coactive Neuro Fuzzy Modeling, Framework Neuron Functions for Adaptive Networks, Neuro Fuzzy Spectrum, Hybridization of other techniques.

# KARNATAKA UNIVERSITY, DHARWAD

*Department of Computer Science*

*Revised Syllabus of  
Course Work for Ph.D Programme  
in Computer Science*

From  
2021-22 onwards

## **PROGRAMME SPECIFIC OUTCOMES (PSOS)**

After completion of this programme, the student will be able to:

1. Model computational problems by applying mathematical concepts and design solutions using suitable data structures and algorithmic techniques.
2. Design and develop solutions by following standard software engineering principles and implement by using suitable programming languages and platforms.
3. Develop system solutions involving both hardware and software modules

### **Program Educational Objectives (PEOs)**

1. Achieve professional competency in the field of Computer Science.
2. Acquire domain knowledge to pursue higher education and research.
3. Become socially responsible engineers with good leadership qualities and effective interpersonal skills.

**Karnatak University, Dharwad**  
Department of Computer Science

Course Work for Ph.D Programme

(W.e.f.2021-22 and onwards)  
Course Structure and Scheme of Examination

Sl No.	Course	Paper Code No.	Name of the Course	Contact hours per week	Maximum Marks			Examination hours
					Continuous Assessment (IA)	Course end examination	Total

**Course I**  
**Compu.Sci. CW 1: RESEARCH METHODOLOGY**

**COURSE OUTCOMES (COs)**

**After completing this paper, the students will be able to:**

**CO 1: Identify and discuss the role and importance of research in the social sciences.**

**CO 2: Identify and discuss the issues and concepts salient to the research process.**

**CO 3: Identify and discuss the complex issues inherent in selecting a research problem, selecting an appropriate research design, and implementing a research project.**

**CO 4: Identify and discuss the concepts and procedures of sampling, data collection, analysis and reporting.**

**UNIT-I : INTRODUCTION**

**08hrs.**

Meaning, Objectives, Types of Research, Research Approaches, Significance of Research, Research Methods versus Methodology, Research and Scientific Method, Research Process, Criteria of Good Research, Problems Encountered by Researchers in India.

Defining the Research Problem: Research Problem, Selecting the Problem, Necessity of Defining the Problem, Technique Involved in Defining a Problem.

**UNIT-II: RESEARCH DESIGN**

**12hrs**

Meaning, Need for Research Design, Features of a Good Design, Important Concepts relating to Research Design, Different Research Designs. Cluster Analysis: Introduction, distance measures Clustering algorithms, agglomerative clustering.

Scientific body in research: Ethical, legal, social and scientific issues in research. A brief idea about the funding agencies such as DST (Department of Science and Technology), DBT (Department of Biotechnology), ICMR (Indian Council of Medical Research), CSIR (Council of Scientific & Industrial Research) and UGC (University Grants Commission). Role of IPR (Intellectual Property Rights) in Research and Development.

**UNIT-III: DATA COLLECTION**

**08 hrs.**

Introduction, Experiments and surveys, Collection of Primary and Secondary Data, selection of appropriate method for data collection, case study method. DATA PREPARATION: Data Preparation process, Some problems in preparation process, Missing values and Outliers, types of Analysis, Statistics in research.

**UNIT-IV: TESTING OF HYPOTHESIS**

**10 hrs.**

Hypothesis, Basic Concepts Concerning Testing the Hypotheses, Test Statistic and Critical region, critical value and Decision Rule, Procedure for Hypothesis Testing, Hypothesis Testing for – Means, Proportions, variance, difference of two mean, difference of two proportions, difference of two variances;P-Value approach, power of test, Limitations of the Tests of Hypotheses. ChiSquare Tests.

**UNIT V: INTERPRETATION AND REPORT WRITING**

**10 hrs.**

Meaning of Interpretation, Technique of Interpretation, Precaution in Interpretation, Significance of Report Writing, Different Steps in Writing Report, Layout of the Research Report, Types of Reports, Oral Presentation, Mechanics of Writing a Research Report, Precautions for Writing Research Reports.

Citation: MLA and APA, Publication, Impact factor: definition and calculation, H-index : introduction, calculation, g-index, Plagiarism: introduction, Ethics and morals, Copyright, Trademarks and Patents.

**Course II**  
**Compu. Sci. CW 2: Concrete Mathematics**

Total Hours: 48

**COURSE OUTCOMES (COs)**

**After completing this paper, the students will be able to:**

**CO 1: To read well-known and popular literature in Computer Science and Mathematics**

**CO 2: To develop mathematical skills, formulating and solving complex problems mathematically**

**CO 3: To practice with presentation of results (solutions of mathematical problems)**

**CO 4: To understand the application of mathematics in real life**

**UNIT-I**

**10Hr**

The Foundations: Logic and Proof, Sets and Functions: Logic, Proposition Equivalences, Predicates and Quantifiers, Nested Quantifiers, Methods of Proof, Sets, Sets Operations, Functions.  
Mathematical Reasoning, Induction, and Recursion: Proof Strategy, Sequences and Summations, Mathematical Induction, Recursive Definitions and Structural Induction, Recursive Algorithms, Program Correctness

**UNIT-II**

**15Hr**

Counting: The Basic of Counting, the Pigeonhole Principle, Permutation and Combinations, Binomial Coefficients, Generalized Permutation and Combinations, Generating Permutation and Combinations.  
Advanced Counting Techniques : Applications of Recurrence Relations, Solving Linear Recurrence, Relations, Divide-and-Conquer Algorithms and Recurrence Relations, Generating Functions, Inclusion-Exclusion, Applications of Inclusion-Exclusion.  
Relations: Relations and Their Properties, n-ary Relations and Their Applications, Representing Relations, Closures of Relations, Equivalence Relations, Partial Orderings.

**UNIT-III**

**5 Hr**

Discrete Probability: An Introduction to Discrete Probability, Probability Theory, Expected Value and Variance

**UNIT-IV**

**10Hr**

Growth of Functions: Asymptotic notation, Standard notations and common functions.  
Summations: Summation formulas and properties, Bounding Summations.  
Recurrences: The substitution method, the iteration method, the master method, proof of the master theorem.

**UNIT-V**

**8 Hr**

Sets: Sets, Relations, Functions, Graphs, and Trees. Counting and Probability: Counting, Probability, Discrete random variable, the geometric and binomial distributions, the tails of the binomial distribution, Probabilistic analysis.

### Course III

#### Compu.Sci CW 3.1: Digital Image Processing and pattern Classification

Total No.hours : 48 hrs

#### COURSE OUTCOMES (COs)

After completing this paper, the students will be able to:

- CO 1:** Explain the fundamentals of digital image and its processing.  
**CO 2:** Perform image enhancement techniques in spatial and frequency domain.  
**CO 3:** Elucidate the mathematical modelling of image restoration and compression  
**CO 4:** Apply the concept of image segmentation.  
**CO 5:** Describe object detection and recognition techniques.

#### UNIT I

6 Hrs

**Introduction:** Definition, Origin, and Examples of Digital Image Processing, Fundamental “ Steps in Digital Image Processing.

**Digital Image Fundamentals:** Basic concepts, Image digitization, Basic Relationships between pixels. Digital image Properties.

#### UNIT II

10 Hrs

**Intensity Transformations and Spatial Filtering:** Intensity transformations, contrast stretching histogram equalization, Correlation and convolution, Smoothing filters, sharpening filters gradient and Laplacian.

**Filtering in the Frequency Domain:** Fourier Transforms and properties, FFT (Decimation in Frequency and Decimation in Time Techniques), Convolution, Correlation, 2-D sampling, Discrete Cosine Transform, Frequency filtering.

#### UNIT III

10 Hrs.

**Image Restoration and Reconstruction:** Basic Framework, Interactive Restoration, Image deformation and geometric transformations, image morphing, Restoration techniques, Noise characterization, Noise restoration filters, Adaptive filters, Linear, Position invariant degradations, Estimation of Degradation functions, Restoration from projections.

#### UNIT IV

10 Hrs.

**Image Segmentation:** Boundary detection based techniques, Point, line detection, Edge detection, Edge linking, local processing, regional processing, Hough transform, Thresholding, Iterative thresholding, Otsu's method, Moving averages, Multivariable thresholding, Region based segmentation, Watershed algorithm, Use of motion in segmentation.

**Representation and Description:** Boundary following, Chain codes, Polygon Approximation Approaches, signatures, Boundary descriptors, Regional descriptors, Uses of principal components for description.

#### UNIT V

12 Hrs.

**Pattern Classification:** Bayesian Decision Theory, Parameter Estimation, nonparametric techniques, Supervised and Unsupervised Learning.

4. Richard O. Duda, Peter E. Hart, David G. Stork. "Pattern Classification", John Wiley & Sons, 2nd Edition, 2008.
5. Earl Gose, Richard Johnsonbaugh, Steve Jost "Pattern Recognition and Image Analysis", Prentice Hall PTR, 1996

### **Course III**

#### **Compu.Sci. CW 3.2: Information and Network Security**

**Total No. hours : 48 hrs**

#### **COURSE OUTCOMES (COs)**

**CO 1: Analyze and evaluate the cyber security needs of an organization.**

**CO 2: Determine and analyze software vulnerabilities and security solutions to reduce the risk of exploitation.**

**CO 3: Measure the performance and troubleshoot cyber security systems.**

**CO 4: Implement cyber security solutions and use of cyber security, information assurance, and cyber/computer forensics software/tools.**

**CO 5: Comprehend and execute risk management processes, risk treatment methods, and key risk and performance indicators**

**CO 6: Design and develop a security architecture for an organization. g) Design operational and strategic cyber security strategies and policies.**

#### **Unit – I : Basics of Information Security**

**08Hrs**

NSTISSC(National Security Telecommunications and Information Systems Security Committee) security model, Components of an Information System, Securing components, Balancing Information Security and Access, Approaches to Information Security implementation; The Security System Development Life Cycle. Introduction; Information Security Policy, Standards, and Practices

#### **Unit – II: Classical Encryption Techniques**

**10 Hrs**

Symmetric Cipher Model- Cryptography, Cryptanalysis and Brute-Force Attack, Block Ciphers and the Data Encryption Standard - Traditional Block Cipher Structure- Stream Ciphers and Block Ciphers, Feistel Cipher Structure, The Data Encryption Standard-Encryption and Decryption, Advanced Encryption Standard-AES, International Data Encryption Algorithm(IDEA).

#### **Unit – III : Public Key Cryptography**

**08 Hrs**

Public Key Cryptography and RSA Principles of Public-Key Cryptosystems-Public-Key Cryptosystems, Applications for Public-Key Cryptosystems, Requirements for Public-Key Cryptosystems, Public-Key Cryptanalysis, The RSA algorithm-Algorithm, Computational Aspects, The security of RSA, Other Public key cryptography algorithms- Diffie-Hellman Key Exchange

#### **Unit – IV: Cryptographic Hash Functions**

**10Hrs**

Cryptographic Hash Functions Applications of Cryptographic Hash Functions, Secure Hash Algorithms-SHA-512 Logic, Message Authentication Codes – Message Authentication Requirements, Message Authentication Functions Message Encryption, Message Authentication Code, Digital Signatures-Properties, Attacks and Forgeries, Digital Signature Requirements, Direct Digital Signature, Remote Authentication: KERBEROS.

**Unit –V : Transport Layer Security and Network Security Applications**

12Hrs

Web Security Considerations, Secure Socket Layer, Transport Layer security, HTTPS, Secure ShellSSH. Pretty good privacy, notation, operational description. Block chain: Introduction to block chain, types of block chain.

**Reference Books**

1. Cryptography And Network Security, Principles And Practice Sixth Edition, William Stallings, Pearson
2. Information Security Principles and Practice By Mark Stamp, Wiley India Edition
3. Cryptography & Network Security, Forouzan, Mukhopadhyay, McGrawHill
4. Cryptography and Network Security AtulKahate, TMH
5. Cryptography and Security, C K Shyamala, N Harini, T R Padmanabhan, Wiley-India
6. Information Systems Security, Godbole, Wiley-India

**Course III****Compu.Sci. CW 3.3 :Artificial Intelligence and Machine Learning****COURSE OUTCOMES (COs)**

**CO 1: Demonstrate fundamental understanding of the history of artificial intelligence (AI) and its foundations.**

**CO 2: Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning.**

**CO 3: Demonstrate awareness and a fundamental understanding of various applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models.**

**CO 4: Demonstrate proficiency developing applications in an 'AI language', expert system shell, or data mining tool.**

**CO 5: Demonstrate proficiency in applying scientific method to models of machine learning.**

**CO 6: Demonstrate an ability to share in discussions of AI, its current scope and limitations, and societal implications**

**Unit-I:****12 hrs**

Introduction: Introduction to AI applications and AI techniques, Production systems, control strategies, reasoning - forward and backward chaining. Intelligent Agents: Definitions of a rational agent, reflex, model-based, goal-based, and utility-based agents, the environment in which a particular agent operates.

**Unit-II:****12 hrs**

Searching Techniques and Game Playing: Breadth first search, depth first search, iterative deepening, uniform cost search, hill climbing, simulated annealing, genetic algorithm search, heuristic search, Best first search, A\* algorithm, AO\* algorithm, Minimax and game trees, refining minimax, Alpha - Beta pruning, constraint satisfaction.

**Unit-III:****10 hrs**

Knowledge Representation: First order predicate calculus, resolution, unification, natural deduction system, refutation, logic programming, PROLOG, semantic networks, frame system, value inheritance, conceptual dependency, Ontologies. Planning: basic representation for planning, symbolic-centralized vs. reactive-distributed, partial order planning algorithm.

**Unit-IV:****07 hrs**

Machine learning: Introduction to different types of learning, Supervised and Unsupervised learning — Reinforcement learning- Basics of Neural network models.

**Unit-V:****07 hrs**

Applications of Artificial Intelligence- Natural Language Processing, Speech recognition, Computer vision, Expert systems.

## EMPLOYABILITY ASPECTS OF THE CURRICULUM

Programme: M.A. Economics      Programme Code: PG34

### I SEMESTER

#### PG 34 T M.A. Economics Programme Outcomes

- ❖ To impart in depth knowledge to students about economic theories, working of labour and factor markets and how income generated and distributed.
- ❖ Students would be able to apply **economic** theories and concepts to contemporary social issues, as well as formulation and analysis of policy and recognize the role of ethical values in **economic** decisions.
- ❖ To give students in depth knowledge into special fields of choice like agricultural economics, industrial economics, financial market, development economics, international trade, urban economics, rural economics, economics of social sector, econometrics, mathematics and statistics for economics
- ❖ Familiarize the students about the how the economy is influenced by economic policy, technological advances and demographic conditions.
- ❖ In addition to the learning of advanced economic theory and its applications, provide a competitive edge in State and Central Civil Services, NET/ SET exams etc

**M.A. ECONOMICS**  
**CHOICE BASED CREDIT SYSTEM**

**I SEMESTER**

**COURSE CODE: PG34T 101: MICRO ECONOMIC ANALYSIS-I**

**Course Outcome:**

- ❖ Understand the economic behaviour of individual economic agents, consumers and firms
- ❖ Analyse the process of price formation in different type of markets
- ❖ Apply the microeconomic tools to estimate demand, production, costs and profits of business firms

**Module -I: Introduction and Basic Concepts**

**6 Hours**

Basic economic problems - Choice and scarcity - Characteristics of equilibrium and disequilibrium systems.

**Module -II: Demand and Supply Analysis**

**16 Hours**

Theories of Demand - Utility analysis - Indifference curves and their applications - Revealed preference theory - Revision of demand theory by Hicks - Lancaster's approach to demand theory - Consumer's choice involving risk - Recent developments in demand analysis - (Pragmatic approach and Linear expenditure systems) - Elasticities of demand (Price, Cross, Income) - Theoretical aspects and empirical estimation  
Factors Influencing Supply - Changes in Supply - Supply Elasticity - Determinants of Supply Elasticity - Market Determination of Price and Quantity - Equilibrium Supply and Demand.

**Module -III: Theory of Production and Costs**

**14 Hours**

Production function - Short-run and Long-run - Law of variable proportions – Isoquants - Least cost combination of inputs - Returns to scale - Multi-product firm - Elasticity of substitution - Technical progress and production function - Cobb-Douglass - CES, VES and Translog production functions and their properties - Empirical evidences; Traditional and modern theories of costs - Economies of Scale and Economies of Scope - Empirical evidence - Derivation of cost functions from production functions.

**Module -IV: Price and Output Determination under Different Markets**

**16 Hours**

Marginal analysis as an approach to price and output determination - Perfect competition - Short and long-run equilibrium of the firm and industry - Supply curve - Monopoly - Short and long-run equilibrium - Price discrimination - Monopoly control and regulation - Monopolistic competition - Equilibrium of the firm and the group with product differentiation and selling costs - Excess capacity under monopolistic competition – Oligopoly - Non-collusive (Cournot, Bertrand, Edgeworth, Chamberlin, Kinked Demand Curve and Stackelberg's Solution) and Collusive (Cartels and Mergers, Price Leadership and Basing Point Price System) Models.

**Module -V: Alternative Theories of the Firm**

**8 Hours**

Critical evaluation of marginal analysis; Baumol's sales revenue maximization model; Williamson's model of managerial discretion; Marris model of managerial enterprise; Full

cost pricing rule; Bain's limit pricing theory and its recent developments including Sylos-Labini's model; Behavioural model of the firm; Game theoretic models.

## **COURSE CODE: PG34T 102: MACRO ECONOMIC ANALYSIS-I**

### **Course Outcome:**

- ❖ Study the macroeconomic measurement indicators.
- ❖ Understand the importance of national income and economic development and various types of national income accounts.
- ❖ In-depth understanding of theories of employment and determination of output and income

### **Module-I: National Income and Accounts**

**8 Hours**

Measurement of Macro Variables and Economic Performance - Important Concepts: GNP, GDP, NNP, NDP, NI, PI, DPI - Real GDP versus Nominal GDP - GDP Deflator, National Income and Economic Welfare; National Income Accounts: Social Accounting; Input-Output Accounting; Flow of Funds Accounting and Balance of Payments Accounting; Importance of National Income Analysis.

### **Module-II: Theories of Employment**

**16 Hours**

The Classical Theory of Employment: Say's Law of Markets and Quantity Theory of Money; Classical Full Employment Equilibrium; Savings, Investment and Rate of Interest; Wage-Price Flexibility as a Remedy for Unemployment; Policy Implications of the Classical Equilibrium Model; A Critique of the Classical Theory of Employment and Income; Keynesian Macro Economics- Before Keynes, Keynesian Revolution, and after Keynes; Keynesian Theory of Employment: Concept of Underemployment Equilibrium; Role of Aggregate Demand and Aggregate Supply Functions; Principle of Effective Demand.

### **Module-III: Consumption Function and Investment Function**

**16 Hours**

Consumption Function and its Determinants: Implications of Consumption Function; Alternative Theories of Consumption Behaviour - Irving Fischer and Inter-temporal Choice - Franco Modigliani and the Life-Cycle Hypothesis - Robert Hall and the Random-Walk Hypothesis. - David Laibson and the Pull of Instant Gratification; Investment Function and its Determinants: Business Fixed Investment, Residential Investment, Inventory Investment - Equilibrium Income and Output in Simple Two Sector Model, Three Sector and Four Sector Models; Multiplier and Accelerator Analysis; Relevance and Critique of Keynesian Macroeconomics.

### **Module-IV: Equilibrium Analysis for Real and Money Markets**

**16 Hours**

Simple Keynesian Model; IS-LM Model: Interaction of Real and Monetary Sectors of the Economy – Keynesian Version of the IS-LM Model – Neo-Classical version of the IS-LM Model; Fiscal and Monetary Policy Analysis in an IS-LM Model; IS-LM Model with Government Sector – Policy Analysis in a Keynesian Model – Policy Analysis in a Neo-Classical Model – Fiscal Policy and Crowding out – The Role and Relative Effectiveness of Fiscal and Monetary Policy; The Aggregate Supply and Aggregate Demand Model: The Neo-Classical Three Sector Model – Pigou Effect - The Keynesian Three Sector Model - Keynes Effect.

### **Module-V: New Classical Economics**

**4 Hours**

Emergence of New Classical Macroeconomics: Rational Expectations Analysis - Policy Conclusions and Implications - Supply-Side Economics - Theoretical Propositions and Implications.

**Reading List:**

1. Ackeley G. (1978): *Macro Economics: Theory and Policy*, McMillan, New York.
2. Blackhouse, R and A. Salansi (Eds) (2000): *Macro Economics and the Real World*, OUP, London.
3. Branson, W.A. (1989): *Macro Economic Theory and Policy*, Harper and Row, New York.
4. Dornbusch, R and F. Stanley (1997): *Macro Economics*, McGraw Hill, New York.
5. Edward Shapiro (1996): *Macro Economic Analysis*, Galgotia Publications, New Delhi.
6. Frisch, H. (1983): *Theories of Inflation*, Cambridge University Press, Cambridge.
7. Gupta, R.D. and Rana A.S. (1998): *Post-Keynesian Economics*, Kalyani Publishers, Ludhiana.
8. Gordon, R. and Harris S.G. (1998): *Macro Economics*, Addison Wesley
9. Hall, R.E. and J. B. Taylor (1986): *Macro Economics*, W. W. Norton, New York.
10. Jha, R. (1999): *Contemporary Macro Economic Theory and Policy*, New Age International, New Delhi.
11. Reddy, Y. V. (2000): *A Review of Monetary and Financial Sector Reforms in India*, UBSPD, New Delhi.
12. Romer, D.L. (1996): *Advanced Macro Economics*, McGraw Hill, New York.
13. Sheffrin, S. M. (1996): *Rational Expectations*, Cambridge University Press, Cambridge.
14. Taylor. K. (1983): *Structuralist Macro Economics*, Basic Books, New Longman.
15. Turnovsky, S. J. (1977): *Macro Economic Analysis and Stabilization Policy*, Cambridge University Press, Cambridge.

## **COURSE CODE: PG34T 103: ECONOMICS OF GROWTH AND DEVELOPMENT-I**

### **Course Outcome:**

- ❖ Economics of Growth and Development helps to understand the several concepts and measurement of economic growth and development,
- ❖ Students have the knowledge on growth and distributive Justice-poverty measurement and income distribution and their value, development gap, causes, consequences and measures to reduce development gap.
- ❖ Compare the classical and neo-classical growth and development models etc; analyse the impact on output, income and employment both in developed and developing countries.
- ❖ It also demonstrates the experience of success and failure in the economies of different regions of the world.

### **Module-1: Economic Development: An Overview :**

**14 Hours**

Economic Development - Sustainable Development -Ethics and Economic Development - Why Study Development Economics?; Measurement of Economic Development - Concept of Human Development - Human Development Index - Human Capability Approach to Development - Development as Freedom - Development versus Displacement.

### **Module-2: Theory of Poverty and Income Distribution**

**8 Hours**

Growth and Distribution Justice - Kuznet's Hypothesis; Poverty and its Measurement - Poverty Alleviation Measures; Convergence and Divergence Economic Theories; Development Gap - Causes, Consequences and Measures to Reduce Development Gap.

### **Module-3: Grand Theories of Economic Growth and Development**

**14 Hours**

Classical Theory of Economic Development and its Salient Features- Adam Smith's and David Ricardo's Theories of Growth - Karl Marx: Growth and Decay of Capitalism; Theory of Social Change, Surplus Value Theory, Reserve Army and Materialistic Interpretation of History; Schumpeter's Growth Theory: Capitalistic Development, Crisis in Capitalism, Innovation, Degeneration of Capitalism - Structural Analysis of Development.

### **Module-4: Neo-Classical Growth Theories**

**14 Hours**

Stylized Factors of Neo-Classical Growth Theory; J.E. Meade's Growth Model; Harrod-Domar Model; Kaldor & Mirrlees Model; Mrs. Joan Robinson's Model; Cambridge Criticism of Neo-Classical Growth Model

### **Module-5: Partial Theories of Economic Growth and Development**

**10 Hours**

Salient Features of Partial Theories; Vicious Circle of Poverty - Theory of Circular Cumulative Causation; Lewis Model; Big-push and Critical Minimum Effort Thesis; Balanced and Unbalanced Growth Theories; Dualistic Theories - Dixit - Marglin Models - Dependency Theory of Development; Two Sector Model of Uzawa; Endogenous Growth Models - Romar-Lucas Model.

**Reading List:**

1. Adelman, Irma (1961): *Theories of Economic Growth and Development*, Stanford University Press, Stanford, USA.
2. Branko, Milanovic (2016): *Global Inequality: A New Approach for the Age of Globalization*, Harvard University Press, Cambridge.
3. Higgins, Benjamin (1968): *Economic Development: Theory, Principles and History*, W. W. Norton, New York, USA.
4. Meier Gerald M. (2005): *Leading Issues in Economic Development*, Oxford University Press, New York, USA.
5. Ray, Debraj (1998): *Development Economics*, Princeton University Press, New Jersey.
6. Rogers, Peter P. and K. F. Jalal and J. A. Boyd (2005): *Sustainable Development*, The Continuing Education Division, Harvard University and Glen Educational Foundation, Harvard.
7. Srivastava, O. S. (1996): *Economics of Growth, Development and Planning*, Vikas Publishing House Pvt. Ltd., New Delhi.
8. Thrilwal, A. P. (2006): *Growth and Development*, 6<sup>th</sup> Edition, West Press Ltd., New Delhi.
9. Todaro, Michael. P. (1989): *Economic Development in the Third World*, 4<sup>th</sup> Edition, Orient and Longman, London.

## **COURSE CODE: PG34T 104: MATHEMATICS FOR ECONOMICS**

### **Course Outcome:**

- ❖ Students will learn applications of equilibrium equations and graphs which are directly useful in economic analysis.
- ❖ Students will be familiar with the maxima, minima, elasticity, decide the optimal level of production for a firm.
- ❖ Demonstrate the rules of differentiation, calculating integration, describe the importance and application of integration in consumer's and producer's surpluses.
- ❖ Demonstrate knowledge of basic concept of linear program, duality, capacity to solve linear programming problems, familiar with the basic techniques most commonly used in economic problems

### **Module-I: Basic Mathematical Concepts**

**14 Hours**

Importance of Mathematical Economics; Basic Concepts– Exponents, Functions, Types of functions– Linear and Non-Linear Functions, Factoring, Quadratic, Cubic, Exponential and Logarithmic Functions; Simultaneous Equations– Solutions for Two Variables And Three Variables; Graphs– Slopes and Intercepts, Graphs of Non-Linear Functions; SGR and CAGR.

### **Module-II: Applications of Equilibrium Equations and Graphs**

**12 Hours**

Market Equilibrium of Demand and Supply– Single and Multi-Commodity System; Effects of Specific Tax and Subsidy on Market Equilibrium Price and Quantity; Equilibrium of Income Determination Models; IS-LM Analysis; Production-Possibilities Frontiers.

### **Module-III: Derivatives and Integral Calculus**

**14 Hours**

Derivatives– Rules of Derivatives; Marginal Concepts– Relationship among TC, MC, AC; TR, MR, AR; Utility; Elasticity of Demand and Supply– its types; Partial Derivatives and Applications; Maxima and Minima in Single and Multivariable Functions; Integration– Indefinite Integral, Rules of Integration, Definite Integral; Properties of Definite Integral, Economic Application to Integrals of Consumer's Surplus and Producer's surplus; Difference Equations– Definitions and Concepts, Lagged Income Determination Model, The Cobweb Model, The Domar Growth Model, The Harrod Model, The Solow Growth Model.

### **Module-IV: Matrix and Determinants**

**10 Hours**

Concept of Matrix– Types of Matrices, Minor and Cofactors, Rank of a Matrix, Inverse of a Matrix; Determinants– its Properties, Second and Third-Order Determinants, Solution of Simultaneous Equations by using Crammer's Rule; Jacobian Determinants, Leontief Input-Output Models– its structure, The Open Model and The Closed Model.

### **Module-V: Linear Programming**

**10 Hours**

Basic Concepts– Advantages of LPP, Formulation of LPP, Feasible, Basic and Optimal Solutions, Solution of Linear Programming through Graphical Method and Simplex Method; Corner Rule Method, The Row Minima Method, Lowest Cost Entry Method (LCEM), Vogel's Approximation Method (VAM); Duality Theorems– Economic interpretation of a

Dual– Micro and Macro Level; Concept of a Game; Strategies– Simple and Mixed; Value of a Game; Saddle Point Solution; Simple Applications.

**Reading List:**

1. Allen, R.G.D. (1974): *Mathematical Analysis for Economists*, Macmillan Press, New Delhi.
2. Barry, Bressler (2001): *A unified Introduction to Mathematical Economics*, McGraw Hill, New Delhi.
3. Black J. and J.F. Bradley (1973): *Essential Mathematics for Economists*, John Wiley & Sons. London.
4. Chaing, A.C. (1986): *Fundamental Methods of Mathematical Economics*, McGraw Hill, New York.
5. Edward T. Dowling (1992): *Introduction to Mathematical Economics*, Schaum's Outline Series Tata Mc Graw Hill, New Delhi.
6. Mehta, B. C. and G.M.K Madnani (2004): *Elementary Mathematics in Economics*, Laxkshmi Narain Agarwal, Agra.
7. Mike Rosser and Piotr Lis (2016): *Basic Mathematics for Economists*, Routledge, New York.
8. Monga, G.S. (1972): *Mathematics and Statistics for Economists*, Vikas Publishing House, New Delhi.
9. Veerachamy, R. (2002): *Quantitative Methods for Economists*, New Age International Publishers, Bangalore.
10. Yamane, Taro (1975): *Mathematics for Economists*, PHI, New Delhi.

## **COURSE CODE: PG34T 105: INDIAN ECONOMY**

### **Course Outcomes:**

- ❖ Identify the problems of Indian Economy
- ❖ Investigate the causes for the persistent problems in agricultural, industrial, financial and foreign trade sectors
- ❖ Evaluation of the reform measures undertaken by the government; and
- ❖ Analyse the impact of monetary and fiscal policies and major economic events like the budget

### **Module-I: An Overview of Indian Economy 12 Hours**

Characteristics of Indian Economy; Demographic Features of Indian population; Trends in the growth of National Income; Green Accounting; Structural Changes in the Economy; Poverty and Inequality; Trends in Savings, Investment and Capital Output Ratio and their Implications; India's Development Experience; Planning and Development Strategies; Planning Commission to NITI Aayog; Parallel Economy and its Implications.

### **Module -II: Agricultural Sector 14 Hours**

Agriculture-Importance; Cropping Pattern; Land Reforms; Farm size and efficiency; Agricultural Labour Problems; Mechanization and Green Revolution; Agricultural Finance and Rural Indebtedness and Farmers' Suicide; Agricultural Marketing; Agricultural Price; Agricultural Co-operatives; Technological Factor in Agriculture Growth-Seeds Fertilizers, Irrigation; Food problem and Public Distribution System; WTO and Agriculture.

### **Module -III: Industrial Sector 14 Hours**

Importance of Industrialization; Growth and Structural Composition; Structural Transformation; Small-Scale Industries- Role and Performance; Privatization and Public Sector, Private Sector Industries and their Performance and Problems; Industrial Labour; Industrial Finance; Development Banks; Capital Market; Industrial Monopoly; MRTP; New Industrial Policy; Competition Law mergers; acquisitions and Takeover.

### **Module -IV: Foreign Trade Sector 10 Hours**

Exchange Rate policy of India; Trends in India's Foreign Trade; Balance of Payment; Problems of Policies; New Foreign Trade Policy; Export promotion V/S Import Substitution; Foreign Direct Investment in India; Globalisation and its impact on India's Trade and Investment.

### **Module -V: Financial Sector 10 Hours**

RBI; Money and Money Markets; Monetary Policy; Money Supply; Commercial Banks; Banking and Non-Banking Financial Sector; Financial Sector Reforms; Demonetisation and its Impact.

### **References:**

**COURSE CODE: PG34T 106A: AGRICULTURAL ECONOMICS**  
**(Specialisation/Optional Paper)**

**Course Outcome:**

- ❖ Agriculture economics helps to understand the nature and scope of agriculture economics, importance, its modernization, relation with other sector and it also proved with some theories.
- ❖ It analyses the agricultural production and productivity, efficiency in traditional agriculture and their value, resource combination and substitution, cost concepts and supply curves, laws of returns, farm budgeting,
- ❖ It demonstrates the growth trends in five-year plans, variations in output and productivity, cropping pattern, public investment and capital formation, technological progress, food security and sustainable agriculture.
- ❖ It provides the knowledge on Institutional and technological change in Indian agriculture and agriculture marketing, state policy, terms of trade between agriculture and non-agriculture prices and international trade.

**Module-I: Agriculture and Economic Development :**

**14 Hours**

Nature and scope of agricultural economics; Traditional agriculture and its modernization;

Role of agriculture in economic development; Interdependence between agriculture and industry— some empirical evidence; Models of interaction between agriculture and the rest of the economy; Agricultural development, poverty and environment

**Module-II: Agricultural Production and Productivity:**

**12 Hrs**

Agricultural production — Resource use and efficiency; Production function analyses in agriculture; Factor combination and resource substitution; Cost and supply curves; Size of farm and laws of returns — Theoretical and empirical findings; Farm budgeting and cost concepts; Supply response of individual crops and aggregate supply; Resource use efficiency in traditional agriculture; Technical change, labour absorption and gender issues in agricultural services

**Module-III: Agricultural Growth in India**

**12 Hrs**

Agricultural Production under Five Year Plans - Recent Trends in Agricultural Growth in India - Cropping Pattern Shifts - Impact of Agriculture on Industry - Diversification of Agriculture - Inter-Regional Variations in Growth, Output and Productivity - Role of Public Investment and Capital Formation in Indian Agriculture - Strategy of Agricultural Development and Technological Progress - Sustainable Agriculture in India - Food Security: Nature of Food Problem - PDS - Right to Food.

**Module-IV: Institutional and Technological Change in Indian Agriculture: 12 Hrs**

Land Reforms - Land Reform Measures - Achievements and failures of Land Reforms - Problems of Marginal and Small Farmers – Technical change in Indian Agriculture – Expansion of irrigation, use of HYV seeds, fertilizers, plant protection measures, Machinery and electricity in agriculture - Soil Conservation, Dry Farming, Land Reclamation and Development -Pricing of Inputs – Subsidies.

### **Module-V: Agricultural Marketing, Prices and International Trade: 10 Hrs**

- ❖ Market structure and imperfections; Regulated markets; Marketed and marketable surplus; Behaviour of agricultural prices — Cobweb model; State policy with respect to agricultural marketing; Terms of trade between agricultural and non-agricultural prices; Objectives of agricultural price policy — Instruments and evaluation - International trade in agricultural commodities – Trends and Patterns - Impact of World Trade Organisation on Indian agriculture.

#### **Reading List:**

9. Rao, C. H. Hanamantha (2006): *Agriculture, Food Security, Poverty, and Environment*, Oxford University Press, New Delhi.
10. Rao, C. H. Hanumatha (1994): *Agricultural Growth, Rural Poverty and Environmental Degradation in India*, Oxford University Press, New Delhi.
11. Rudra, A. (1982): *Indian Agricultural Economics: Myths and Reality*, Allied Publishers, New Delhi.
12. Saini, G.R. (1979): *Farm Size, Resource Use Efficiency and Income Distribution*, Allied Publishers, New Delhi.
13. Sankaran, S. (1973): *Agricultural Economy of India*, Progressive Corporation Private Ltd., Bombay.
14. Swaminathan, M. S. (2007): *Agriculture Cannot Wait: New Horizons in Indian Agriculture*, Academic Foundation, New Delhi.

## **COURSE CODE: PG34T 106B: INDUSTRIAL ECONOMICS (Specialization /Optional)**

### **Course Outcome:**

- ❖ Learn how economic theories are used in analysis of industrial location. Evaluate these theories in view of empirical evidence. Describe policy Implications of these theories.
- ❖ Develop an understanding about different industrial policies, structure and Composition of industry.
- ❖ Develop an understanding of economics of integration, diversification and Integrations.
- ❖ To understand the basic issues such as productivity, efficiency and capacity Utilization involved in the industrial development of India and measures Required for improving productivity and efficiency

### **Module-I: Framework and Problems of Industrial Economics: 16 Hrs**

Concepts and Organization of Firm; Ownership, Control and Objectives of the Firm; Passive and Active Behaviour of the Firm; Market Structure; Product Differentiation; Entry Conditions; Economies of Scale; Market Structure and Profitability; Theories of Industrial Location; Weber and Sargent Florence; Factors Affecting Location.

### **Module-II: Market Conduct and Performance: 12 Hrs**

Product Pricing; Marginal Costing; Administered Pricing; Theories and Evidence; Investment; Expenditure; Theories and Empirical Evidence on Mergers and Acquisitions; Diversification, Size and Growth of a Firm; Growth and Profitability of a Firm; Constraints on Growth, Productivity, Efficiency and Capacity Utilization; Concept and Measurement.

### **Module-III: Indian Industrial Growth and Pattern: 12 Hours**

Classification of Industries; Industrial Policy in India; Role of Public and Private Sector; Recent Trends; Multinational Corporations and Transfer of Technology. Liberalisation and Privatization, Regional Industrial Growth in India; Industrial Concentration and Remedial Measures; Issues in Industrial Pollution and Environmental Preservation, Pollution Control Policies; Industrial Sickness.

### **Module-IV: Industrial Finance: 12 Hours**

Role, Nature, Value and Types of Institutional Finance; IDBI, IFCI, ICICI, SFCs, SIDBI, and Commercial Banks. Profit and Loss Account; Assessment of Financial Soundness and Ratio Analysis

### **Module-V: Current Problems of Selected Industries: 8 Hours**

Iron and Steel, Cotton Textiles, Jute Textiles, Sugar, Coal, Cement and Engineering Goods

### **Reading List:**

1. Ahluwalia, I. J. (1985): *Industrial Growth in India*, Oxford University Press, New Delhi.
2. Barthwal, R. R. (1985): *Industrial Economics*, Wiley Eastern Ltd., New Delhi.
3. Cherunilam, F. (1994): *Industrial Economics: Indian Perspective*, (3<sup>rd</sup> Edition), Himalaya Publishing House, Mumbai.
4. Dasai, B. (1999): *Industrial Economy in India*, (3<sup>rd</sup> Edition), Himalaya Publishing House, Mumbai.
5. Divine, P.J. and R. M. Jones et.al. (1976): *An Introduction to Industrial Economics*, George Allen and Unwin Ltd., London.

6. Government of India (2017): Economic Survey of India (Annual), Ministry of Finance, Government of India, New Delhi.
7. Hay, D. and D.J. Morris (1979): *Industrial Economics: Theory and Evidence*, Oxford University Press, New Delhi.
8. Kuchhal, S.C. (1980): *Industrial Economy of India*, (5<sup>th</sup> Edition), Chaitanya Publishing House, Allahabad.
9. Reserve Bank of India: *Report on Currency and Finance* (Annual), Reserve Bank of India.
10. Singh, A. and A.N. Sadhu (1988): *Industrial Economics*, Himalaya Publishing House, Bombay.

**COURSE CODE: PG34T 106C: ECONOMICS OF EDUCATION (Specialization /Optional)**

**Course Outcome:**

- ❖ Acquire a deeper understanding about the role of human capital especially of education in economic development.
- ❖ Possess knowledge of the latest development in education.
- ❖ Acquire skills to relate human development with economic development.
- ❖ Acquire knowledge about cost- benefit analysis, approaches to educational Planning, educational planning and subsidies.

**Module-I: Human Capital and Development**

Human Capital- Origin-Classical and Neo-Classical Approach, Concept, Components, Nexus between Human Capital, Physical Capital and Natural Capital; Theory of Investment in Human Capital; Concept and Dimensions of Human Development; Growth Accounting Equations of Denison and Schultz.

**Module -II: Economics of Education**

Economics of Education-Concept, Demand for Education, Private Demand and Social Demand; Determinants of Demand; Costs of Education–Expenditure on Education; Private Costs and Social Costs; Benefit of Education– Direct and Indirect Benefits; Private and Social Benefit; Cost–Benefit Analysis-Meaning, Tools (BCR, NPV and IRR), Limitations.

**Module-III: Educational and Manpower Planning**

Approaches to Educational Planning- Social Demand approach; The Rate of Return Approach; The Manpower Requirement Approach; The Tinbergen Model; The Bowels model; The Adelman Model

**Module-IV: Educational Financing and Subsidies**

Resource Mobilization and Financing, the Balance between the Public and Private Financing; Pricing and Subsidies-The Argument for Public Subsidy, Effects of Educational Financing on Equity and Efficiency; Education and Labour Market – Effects of Education, Ability and Family Background on Earnings, Poverty and Income Distribution, Education and Employment (The Path Model Analysis).

**Module-V: Education and Economic Development in India**

Objectives of Educational Planning; A Review of Educational Development in India – Primary, Secondary, Vocational, Higher, Technical and Adult Education; New Educational Policy in India; Expenditure on Education and Improvement in Literacy in India; Educational Development and Employment in India.

### Reading List:

1. Aggarwal and Aggarwal (1992): *Educational Planning in India*, Vol. I, Delhi.
2. Chandra, Prasanna (1995): *Project: Planning, Analysis, Selection, Implications and Review*, Tata McGraw-Hill Publishing Company Limited, New Delhi.
3. Govinda, R. (2002): *India Education Report*, Oxford University Press, New Delhi.
4. Heggade, O. D. (1992): *Economics of Education*, Himalaya Publishing House, Bombay.
5. McMohan, W. W. (1999): *Education of Development: Measuring the Social Benefit*, Oxford University Press, Oxford
6. Nanjundappa, D. M. (1976): *Working of University Finances*, Sterling Publishers Pvt. Ltd., New Delhi.
7. Nanjundappa, D. M. (1994): *Finance and Management of Higher Education*, Deep and Deep, New Delhi.
8. Psacharopoulos, George (1987): *Economics of Education: Research and Studies*, (Ed.), Pergamon Press, New York.
9. Psacharopoulos, George and Maureen Woodhall (1985): *Education for Development: An Analysis of Investment Choice*, Oxford University Press.
10. Rao, V.K.R.V (1966): *Education and Human Resources Development*, Allied Publishers Bombay.
11. Saumen and Chattopadhyay (2012): *Education and Economics: Disciplinary Evolution and Policy Discourse*, Oxford University Press, New Delhi.
12. Shah, K. R. (1997): *Essays on Economics of Human Resource*, Spellbound Publications, Rohtak.
13. Shri Prakash (1994): *Cost of Education: Theoretical Exploration and Empirical Prognostication*, Deep and Deep Publications, New Delhi.
14. Tilak, J, B.G. (1987): *The Economics of Inequality in Education*, Sage Publications, New Delhi
15. Tilak, J.B.G. (1994): *Education for Development in Asia*, Sage Publications, New Delhi
16. Vaizey, Johan (1962): *The Economics of Education*, Faber and Faber, 24 Russell Square, London.
17. Woodhall, M. (1992): *Cost-Benefit Analysis in Educational Planning*, UNESCO, Paris

## **COURSE CODE: PG34T 106D: REGIONAL ECONOMICS (Specialization /Optional)**

### **Course Outcome:**

- ❖ The aim of this paper is to enable the students to gain the in-depth knowledge of regional economics.
- ❖ The paper focus on the comprehensive understanding of the Regional imbalances in India and Karnataka.
- ❖ Students will able to understand the techniques of Regional Economics

### **Module-I: Introduction**

**12 Hours**

Definition and Scope of Regional Economics - Regional Economics as an Independent Field of Academic Enquiry; Region-Concept, Types of Region, Importance of Regionalization, Approaches to Regionalization, Globalization and Regionalization and Indicators of Regional Development.

### **Module-II: Regional Growth**

**12 Hours**

Neo-Classical Growth Models; Cumulative Causation Model; Center-Periphery Model; Growth Pole Analysis; Convergence and Divergence of Disparities in Per Capita Regional Income; Techniques of Regional Analysis.

### **Module-III: Inter-regional Differentials in India's Development**

**12 Hours**

Regional Characteristics in India and Imbalances; Agriculture; Industry; Physical Infrastructure; Social Sector; Role of Planning Commission and Finance Commission in Reducing Regional Imbalances; Liberalization and Regional Imbalances.

### **Module-IV: Regional Economic Policy and Regional Planning**

**10 Hours**

Importance and Objectives of Regional Economic Policy - Formulation of Regional Economic Policy  
- Tools and Techniques - Implementation Mechanism and Limitations; Regional Planning - Backward Area Development Programmes - Institutional and Policy Framework for Removal of Regional Disparities - New Economic Policy and Regional Disparities.

### **Module-IV: Regional Disparities in Karnataka**

**14 Hours**

Trends in the Level of Development and State Income; Inter-District Variations in the Rate of Development and Per Capita Income; Regional Disparities in Agriculture and Irrigation Development; Regional Disparities in Industrial Development and Industrial Dispersal Policies; Incentives for Development of Industries in Backward Areas; Banking and Regional Development; Economic Infrastructure and Regional Development.

### **Reading List:**

1. Beckman, M. (1969): *Location Theory*, Random House, London.
2. Bhalla, G.S. and Y. K. Alagh (1989): *Performance of Indian Agriculture: A District-wise Study*, Sterling, New Delhi.
3. Brahmananda, P.R. and V.R. Panchamukhi (Eds.)(2001): *Development Experience in the*

*Indian Economy: Inter-State Perspectives*, Bookwell, Delhi.

4. Dadibhavi, R. V. (1986): *Income, Productivity and Industrial Structure*, Chugh Publications, Allahabad.
5. Dholakia, R.H. (1985): *Regional Disparity in Economic Growth in India*, Himalaya Publishing House, Bombay.
6. Hansen, N.M. (1974): *Public Policy and Regional Economic Development: The Experience in Nine Western Countries*, Ballinger, Massachusetts.
7. Hoover, E.N. (1974): *An Introduction to Regional Economics*, Alfred.A.Knopf, New York.
8. Isard, W. (1960): *Methods of Regional Analysis*, MIT Press, Cambridge, Mass.
9. Nair, K.R.G. (1982): *Regional Experience in a Developing Economy*, Wiley; Eastern, New Delhi.
10. Pande (1969): *Report of the Working Group on Identification of Backward Areas*, GOI, Planning Commission.
11. Rao, H. (1984): *Regional Disparities and Development in India*, Ashish Publishing House, New Delhi.
12. Richardson (1973): *Elements of Regional Economics*, MacMillan London.
13. Richardson, H.N. (1969): *Regional Economics*, Weidenfield & Nicolson, London.

**COURSE CODE: PG34T 106E: HUMAN DEVELOPMENT**  
**(Specialisation/ Optional Paper)**

**Course Outcome:**

- ❖ Educate the students on various concepts and measurement of human development and highlight the importance of human capital in general. And education and Health' in particular in human capital formation.
- ❖ Study the gender dimensions of human development and the advisements of India in human development.

**Module-I: Introduction to Human Development**

Concept of Growth and Development; Growth with Equity and Social Justice; Inclusive Growth; Capabilities approach; Human Development: Concept, Measurement and Indicators –PQLI, HDI, IHDI, HPI, MPI, GDI, GII and GEM.

**Module-II: Economics of Education**

Human Capital: Concept and Components; Nexus between Human Capital, Physical Capital and Natural Capital; Theory of Investment in Human Capital; Education and Economic Development; Demand for Education–Private Demand and Social Demand; Determinants of Demand; Cost and Benefits of Education -Expenditure on Education: Magnitude, Trends and Impact; Financing of Education; Education Policy in India.

**Module-III: Economics of Health**

Concept, Determinants and Indicators of Health; Demand and Supply of Healthcare; Financing of Healthcare; Expenditure on Health-Health Status in India-Health Policy in India

**Module-IV: Gender Issues and Economic Development**

Demographic Profile –Composition and Age-structure, Reproductive Health: Concept, Measurement and Management-Concept and Contribution of Women's Work-Gender Dimensions of Employment and Unemployment –Feminization of Aging and Poverty.

**Module-V: Human Development in India**

Trends and Regional Patterns of HDI, HPI, MPI, GDI and GEM in India; Social Security Measures-Concept, Different Levels and Schemes; Analysis of 'Safety Net' Programmes in India; Review of Current HDI of India.

**Reading List:**

1. Baru R.U. (1998): *Private Health Care in India: Social Characteristics and Trends*, Sage Publications, New Delhi.
2. Dreze, Jean and Sen, Amartya (1995): *Indian Economic Development and Social Opportunity*, Oxford University Press, New Delhi.
3. Government of India: *India Human Development Report 2001*.
4. Heggade, O. D (1992): *Economics of Education*, Himalaya Publishing House, Bombay.
5. *Human Development Report of India*, Oxford University Press,-2011
6. McMohan, W. W. (1999): *Education of Development: Measuring the Social Benefit*, Oxford University Press, Oxford.
7. Psacharopoulos, George (1987): *Economics of Education: Research and Studies*, (Ed.), Pergamon Press, New York.
8. Shri Prakash (1994): *Cost of Education: Theoretical Exploration and Empirical Prognostication*, Deep and Deep Publications, New Delhi.
9. Taori, Kamal (2000): *Sustainable Human Development: Issues and Challenges*, Concept Publishing Company, New Delhi.

10. Tilak, J. B. G. (1994): *Education for Development in Asia*, Sage Publications, New Delhi
11. Marris, Stephen, Nancy Devlin and Devid Parkin (2009): *Economic Analysis in Health Care*, Wiley India
12. UNDP: *Human Development Report*, Annual publications, UNDP
13. Yashoda, Shanmugasundaram (1994): *Theory and Practice of Health Economics in India*, Allied Publisers Ltd, Madras.

**COURSE CODE: PG34T 106F: KARNATAKA ECONOMY (Specialisation/ Optional Paper)**

**Course Outcome:**

- ❖ The objective of this course is to teach the students about sectoral aspects of Karnataka economy.
- ❖ To make the students to understand historical and geographical features of Karnataka economy.
- ❖ To study in detail regional disparities and state finance.

**Module-I: Introduction**

Karnataka in the Indian Economy; Natural Resources; Trends in State Per-Capita Income; Indicators of Economic Development; Indicators of Human Development; Regional Disparity in District Human Development.

**Module-II: Agricultural Development**

Land-use Pattern in Karnataka-Trend in Area, Production, Major Crops- Regional Pattern of Agriculture Production-Horticultural/Plantation Crop, Vegetables-Fruits-Floriculture-Sericulture-Livestock Economy- Agricultural Marketing-Agricultural Finance- Agriculture Prices-Agrarian Crisis.

**Module-III: Industrial Development**

Industrial Structure (Major, Medium and MSMEMS) - policies and programmes- Industrial Finance-Co-operatives commercial Banks-RRB's-KSFC, SIDRP and KSIIDC.

**Module-IV: Infrastructure Development**

Present State of Development; Economic Infrastructure-Irrigation, Power, Transport and Communication; Social Infrastructure-Education and Health; Planning for Infrastructural Development.

**Module-V: Regional Disparities and State Finance**

Position and Extent, Causes and Consequences; the causes for backward area; criteria for Identification of Backward areas; Measures to reduce imbalance; Trends in sources of Finance; Revenue and non Revenue sources; Sharing of Central Taxes and Grants-in-Aid; Trends in Expenditure Pattern Development or non-development; Trends in indebtedness of the state.

**Reading List:**

1. Government of Karnataka (2005): *High Power*. Committee for Redressal of Regional Imbalances (HPCRRI), Government of Karnataka, Bangalore
2. Government of Karnataka (2015): *Human Development: Performance of District, Taluks and Urban Local Bodies in Karnataka, 2014: A Snapshot*, Planning, Programme Monitoring and Statistics Department of Government of Karnataka, Bengaluru (<http://planning.kar.nic.in> – Human Development Division).
3. Government of Karnataka: *Economic Survey of Karnataka*, Government of Karnataka (Various Annual Reports) (<http://planning.kar.nic.in>)
4. Gowda, Sreenivasa and T. Nanjagowda: *Economic Development of Karnataka: Leading Aspects*.

5. Heggade, Odeyar D: *Karnataka Economy*:
6. Madaiah M. (1989): *Karnataka Economy: Growth, Issues and Lines of Development*, Himalaya Publishing House, Mumbai.
7. Madaiah, M. and R. Ramapriya (1989): *Karnataka Economy: Growth, Issues and Lines of Development*, Himalaya Publishing House, Delhi.
8. Puttaswamaiah, K, (1980): *Economic development of Karnataka: A Treatise in Continuity and Change*, Oxford and IBH Publication.
9. Rao, Hemalatha (1984): *Regional Disparities and Development in India*, Ashish Publishing House, New Delhi.

## M.A. ECONOMICS

### CHOICE BASED CREDIT SYSTEM

#### Revised Syllabus

## II SEMESTER

### COURSE CODE: PG34T 201: MICRO ECONOMIC ANALYSIS-II

#### Course Outcome:

- ❖ Understand the process of the determination of factor prices;
- ❖ Analyse the conditions for maximizing social welfare and identify the barriers to attain maximum welfare;
- ❖ Design consumption and investment strategies in a state of uncertainty; and Ability to identify mechanisms for searching and comparing information

#### Module I: Theory of Distribution

**14 Hours**

Functional v/s personal distribution - Neoclassical Approach - Marginal Productivity Theory – Factor pricing in perfectly competitive markets - The demand and supply for labour and determination of factor price - Theory of distribution in imperfect product and factor markets - Elasticity of technical substitution - Technical progress and factor shares - Product exhaustion theorem - Determination of Rent, Wages, Interest and Profit - Macro-Theories of Distribution – Marx - Kalecki degree of monopoly and Kaldor theory.

#### Module II: General Equilibrium

**12 Hours**

Interdependence in the Economy - Partial and General Equilibrium Analyses - Walrasian Excess Demand and Input - Output Approaches to General Equilibrium - Existence, Uniqueness and Stability of Equilibrium - Static Properties of General Equilibrium State: Equilibrium of Production and Equilibrium of Consumption - General Equilibrium and Allocation of Resources - Prices of Commodities and Factors - Factor Ownership and Income Distribution - Relationship between Relative Commodity and Factor Prices (Stolper-Samuelson Theorem) - Relationship between Output Mix and Real Factor Prices, Effect of Changes in Factor Supply

#### Module III: Welfare Economics

**12 Hours**

Pigovian welfare economics; Pareto optimal conditions; Value judgement; Social welfare function; Compensation principle; Inability to obtain optimum welfare — Imperfections, market failure, decreasing costs, uncertainty and non-existent and incomplete markets; Theory of Second Best — Arrow's impossibility theorem; Rawls theory of justice, equity-efficiency trade off.

#### Module IV: Economics of Uncertainty

**12 Hours**

Individual behaviours towards risk - Expected utility and uncertainty - Equivalence approaches - Risk and risk aversion - Sensitivity analysis - Gambling and insurance - Economics of insurance - Cost and risk - Risk pooling and risk spreading - Mean variance analysis and Portfolio selection- Optimal consumption under uncertainty - Competitive firm under uncertainty - Factor demand under price uncertainty.

**Module V: Economics of Information****10 Hours**

Economics of search - Different Models - Efficient market hypothesis - Stochastic models of inventory demand - Markets with asymmetric information - Incomplete Information - Search and transaction costs - Economics of information.

**Reading List**

1. Borch, K.H. (1968): The Economics of Uncertainty, Princeton University Press, Princeton.
2. Broadway R.W. and N. Bruce, (1984): Welfare Economics, Basil Blackwell, London.
3. Brofen Brenner, M. (1979): Income Distribution Theory, Macmillan, London.
4. Dacosta, G.C. (1980): Production Prices and Distribution, Tata McGraw Hill, New Delhi.
5. Diamond and Rothschild (Eds) (1978): Uncertainty in Economics, Academic Press, New York.
6. Graff J. De. V. (1957): Theoretical Welfare Economics, Cambridge University Press, Cambridge.
7. Hirshelifer J and A. Glazer (1997): Price Theory and Applications, Prentice Hall of India.
8. Koutsoyiannis. A. (1979): Modern Micro Economics, Macmillan Press, London.
9. Mishan.E.J. (1969): Welfare Economics: An assessment, North Holland., Amsterdam.
10. Qurk, J. and R Saponnik (1968): Introduction to General Equilibrium and Welfare Economics, McGraw Hill, New York
11. Pindyck, R.S. and D.Rubinfeld, (1995): Micro Economics Prentice Hall of India, New Delhi.
12. Salvatore, Dominick (2003): Micro Economics Theory & Applications, Oxford University Press, Inc. 198 Madison Avenue. New York.
13. Sen, Anindya (1999): Micro Economics: Theory and Applications, Oxford University Press, New Delhi.
14. Weintrub.E.R. (1974): General Equilibrium Theory, McMillan, London.

## **COURSE CODE: PG34T 202: MACRO ECONOMIC ANALYSIS- II**

### **Course Outcome:**

- ❖ The aim of this course is to study the fundamentals of demand for and supply of money.
- ❖ To provide comprehensive understanding of modern quantity theories of money.
- ❖ To enable the students to study in detail, theories of inflation and policy implications.

### **Module-I: Theories of Money**

**8 Hours**

Walrasian and Non-Walrasian Approaches in Macroeconomics – the Classical Heritage – Says' Equality and Says' Identity – Walras' Law – Walrasian System – Patinkin and Real Balance Effect – Arrow – Debreu Model – Overlapping Generation Model of Samuelson – Cash in Advance Model of Clower.

### **Module-II: Post-Keynesian Theories of Money**

**10 Hours**

Post-Keynesian Demand for Money Theories – Inventory Theory of Baumol – Portfolio Balance Theory of Tobin – Restatement of the Quantity Theory as a Theory of Demand for Money by Friedman – Supply of Money Theories – Money Multiplier Model – Behavioural Model of Money Supply – Endogenous Money Supply Theory.

### **Module-III: Inflation: Theories and Policies**

**16 Hours**

Theories of Inflation - Demand-Pull and Cost-Push Theories of Inflation - Phillips Curve - Monetarist, Keynesian and New Classical Views on Inflation and Unemployment - Role of Aggregate Demand and Aggregate Supply Management - Monetary and Fiscal Policy Options. Inflation and Interest Rates: Real and Nominal Interest Rates - Fisher Effect - Nominal Interest Rate and the Demand for Money - Social Costs of Inflation - Hyperinflation - Classical Dichotomy.

### **Module-IV: Modern Theories of Money**

**18 Hours**

Re-interpretation of Keynes by Clower and Leijonhufvud – The Dual Decision Hypothesis – Rationing Models of Barrow, Grossman and Malinvaud – Monetarist contributions – An Overview of Major Themes in Monetarism – Lucas' Surprise Supply Function – The Inter-temporal Substitution Model – Policy Ineffectiveness Argument – The Lucas Critique – Post Keynesian Macroeconomics – Basic Themes – The Historical Time Concept- Kalecki's Pricing Theory – The New Keynesian School – Micro Foundations of Macroeconomics – Small Menu Cost Model – Implicit Wage Contract Model – Efficient Wage Theories – Insider-Outsider Model – The New Growth or Endogenous Growth Theory.

### **Module-V: Open Economy**

**8 Hours**

Basic Concepts - Mundell; Fleming Model; International Flows of Capital and Goods - Saving and Investment in a Small Open Economy - Exchange Rates - A Case of a Large Open Economy (Example United States and India) - Equilibrium in an Open Economy - Influence of Policies on an Open Economy.

### Reading List:

1. Ackeley, G. (1978): *Macro Economics: Theory and Policy*, McMillan, New York.
2. Turnovsky, S. J. (1977): *Macro Economic Analysis and Stabilization Policy*, Cambridge University Press, Cambridge.
3. Sheffrin, S. M. (1996): *Rational Expectations*, Cambridge University Press, Cambridge.
4. Frisch, H. (1983): *Theories of Inflation*, Cambridge University Press, Cambridge.
5. Mankiw, N. G. and D. Romer (1991): *New Keynesian Economics*, (2 vols), MIT Press, Cambridge.
6. Laidler, D.F.W. (1977): *Demand for Money: Theory and Evidence*, Dum-Don Valley, New York.
7. Reddy, Y. V. (2000): *A Review of Monetary and Financial Sector Reforms in India*, UBSP D, New Delhi.
8. Hall, R. E. and J. B. Taylor (1986): *Macro Economics*, W. W. Norton, New York.
9. Blackhouse, R. and A. Salansi (Eds.) (2000): *Macro Economics and the Real World*, Oxford University Press, London.
10. Branson, W. A. (1989): *Macro Economic Theory and Policy*, Harper and Row, New York.
11. Dornbusch, R. and F. Stanley (1997): *Macro Economics*, McGraw Hill, New York.
12. Edward Shapiro (1996): *Macro Economic Analysis*, Galgotia Publications, New Delhi.
13. Gupta, R. D. and Rana A. S. (1998): *Post-Keynesian Economics*, Kalyani Publishers, Ludhiyana.
14. Romer, D. L. (1996): *Advanced Macro Economics*, McGraw Hill, New York.
15. Gordon, R. and Harris S.G. (1998): *Macro Economics*, Addison Wesley
16. Taylor, K. (1983): *Structuralist Macro Economics*, Basic Books, New Longman

## **COURSE CODE: PG34T 203: ECONOMICS OF GROWTH AND DEVELOPMENT-II**

### **Course Outcome:**

- ❖ Economics of growth and development helps to understand the efficiency and productivity value in key sectors and their sectoral growth across the country including Agriculture, Industry and infrastructure.
- ❖ Trade and economic development proved with some models/theories. Trade impact WTO and GATT.
- ❖ Acquire the Knowledge of social sector including food, health and demography, poverty and environment along with policy.
- ❖ It helps to describe the mechanism of application of macroeconomics policies and their impact in development process.

### **Module-I: Development: Sectoral Aspects:**

**16 Hrs**

Agriculture and Economic Development - Efficiency and Productivity - Sustainable Agriculture - Globalization and Agriculture- Agricultural Development Policy - Rationale of Industrialization - Critical Issues in Industry Development - Terms of Trade between Agriculture and Industry - Industry Development Policy - Infrastructure and Economic Development - Critical Issues in Infrastructure Development - Infrastructure Development Policy - Information and Communication Technology.

### **Module-II: Trade and Economic Development:**

**10 Hrs**

Trade and Economic Development - Trade as an Engine of Growth- Static and Dynamic Gains, Declining Terms of Trade -Prebisch - Singer and Myrdal's Thesis - Trade Liberalization and Trade Policy Debate - WTO and Developing Countries - GATS.

### **Module-III: Social aspects of Development:**

**10 Hrs**

Food Security - Health - Education and Nutrition - Population Problem - Theory of Demographic Transition - Population as limit to Growth and Ultimate Source - Human Resource Development - Social Capital - Population, Poverty and Environment - Environment Policy.

### **Module-IV: Macro Economic Policies and Development:**

**12 Hrs**

Role of Monetary and Fiscal Policies in Developing Countries - Inflation and Economic Development - Resources Mobilization, Internal and External - Foreign Direct Investment, Multinational Corporations and Developing Countries.

### **Module-V: Resources Allocation for Development:**

**12 Hrs**

Need for Investment Criteria in Developing Countries, Present vs Future, Alternative Investment Criteria - Cost Benefit-Analysis - Social Cost-Benefit Analysis - Shadow Prices - Project Appraisal-UNIDO Guidelines

### **Reading List:**

1. Adelman, Irma (1961): *Theories of Economic Growth and Development*, Stanford University Press, Stanford.
2. Behrmans, J. and T. N. Srinivasan (1995): *Handbook of Development Economics*, Vol.3. Elsevier, Stendam.
3. Debraj Ray (1998): *Development Economics*, Princeton University Press Princeton New Jersey.

4. Gerald M. Meier and James E. Eanch (2005): *Leading Issues in Economic Development*, Oxford New York.
5. Ghatak (1986): *An Introduction to Development Economics*, Allen and Unwin, London.
6. Kindleberger, C. P. (1997): *Economic Development*, McGraw Hill, New York.
7. Robert J Barro and Xavier Sale-I-Martin (2004): *Economic Growth*, MIT Press, Cambridge.
8. Srivastava, O.S. (1996): *Economics of Growth, Development and Planning*, Vikas Publishing House Pvt. Ltd., New Delhi.
9. Stuart, R. Lynn (2003): *Economic Development: Theory and Practice for a Divided World*, Prentice Hall, New Jersey.
10. Thirlwall, A.P. (2006): *Growth and Development*, 6<sup>th</sup> Education, West press Pvt. Ltd. New Delhi.
11. Todaro, Michael P. (1989): *Economic Development in the Third World*, Orient and Longman, London.
12. Todaro, Michael P. and Stephen C. Smith. (2012): *Economic Development*, 11<sup>th</sup> Edition, Addison Wesley, Boston.

## **COURSE CODE: PG34T 204: STATISTICS FOR ECONOMICS**

### **Course Outcomes:**

- ❖ An understanding of how to think about, evaluate and draw conclusions from economic data by applying statistical techniques.
- ❖ Familiarize the statistical concepts that are widely used in Econometrics and Research in Economics
- ❖ Familiarise and understand the students on statistical concepts including Sampling methods, classification of data, measurement of central tendency and dispersion, theory of probability distribution and sampling distribution.
- ❖ To make them understand statistical inferences, correlation and regression analysis, time series and index number.

### **Module-I: Introduction to Statistics**

**12 Hours**

Types of Data - Nominal, Ordinal & Ratio Scale Data. Qualitative and Quantitative Data, Individual, Discrete and Continuous Data. Cross Section, Time Series and Pooled Data . Sources of Data; Descriptive Statistics and Inferential Statistics. Sources of Data- Primary and Secondary Data; Schedules and Questionnaires; Sampling- Meaning, Sampling Techniques-Simple Random, Stratified and Systematic Random Sampling Methods;

- ❖ Tabulation and Frequency Distribution.

### **Module-II: Measures of Average and Dispersion**

**10 Hours**

Measurement of Average - Arithmetic Mean, Geometric Mean, Harmonic Mean, Median, and Mode. Measures of Dispersion. Skewness and kurtosis.

- ❖

### **Module-III: Probability and Distribution**

**16 Hours**

Probability Theory - Concepts and Approaches to Estimate Probability - Probability Distribution Functions - Theoretical Distribution: Binomial, Poisson, Normal, t, Chi-Square & F Distribution.

- ❖ Theory of Estimation and Hypothesis Testing; Concept of Estimator - Sampling Distribution of Estimator, Point and Interval Estimation, Properties of Good Estimator for Small and Large Samples; Hypothesis Testing: Approaches to Hypothesis Testing; - Confidence Interval Approach, Test of Significance Approach, and P-Value Approach; Formulation of Hypothesis - Null and Alternative Hypothesis; Level of Significance - One Sided and Two Sided Hypothesis - Type-I and Type-II Error; Test Statistic- Critical Value - Parametric and Non-Parametric Tests.

### **Module-IV: Correlation and Regression**

**10 Hours**

Correlation- Meaning and Types of Correlation - Measurement of Correlation. Regression- Simple Regression Model; Estimation - Least Squares Method, Goodness of Fit; Introduction to Multiple Regression.

- ❖

### **Module-V: Index Numbers & Time Series Analysis**

**12 Hours**

Nature and Purpose of Index Numbers; Types of Index Numbers- Simple and Aggregate Index Numbers: Laspeyre's Index, Paasche's Index, Marshall and Edgeworth's Index - Fisher's Index - Time Reversal and Factor Reversal Tests Problems of Construction of Index Numbers and Limitation of Index Numbers. Time series analysis- Nature and

- ❖ Components; Analysis of Trend - Moving Average Method and Least-Square Method

***{Practical Component: Graphical Presentation of Data: Tabular and Graphical Methods - Relative Frequency and Percentage - Frequency Distribution - Bar Graphs, Line Graph, Pie Charts, Histogram, Cumulative Distribution and Ogives}***

**Reading List:**

1. Anderson, Sweeney & Williams (2007): *Statistics for Business & Economics*, 9<sup>th</sup> Edition, Thomson South-Western, Bangalore.
2. Bose, D. (2018): *An Introduction to Mathematical Economics*, Himalaya Publishing House, Pvt. Ltd. Mumbai.
3. Goon, A. M., M. K. Gupta and B. Dasgupta (1968): *Fundamentals of Statistics*,
4. Gupta, B.N. (1992): *Statistics Theory and Practice*, Sahitya Bhavan, Agra.
5. Gupta, S. C. (2016): *Fundamentals of Statistics*, Himalaya Publishing House, Bombay.
6. Gupta, S. P. (2014): *Statistical Methods*, S. Chand & Company, New Delhi, (43<sup>rd</sup> Edition)
7. Gupta, S.C. and Kapoor, V. K. (2016): *Fundamentals of Applied Statistics*, Sultan Chand & Sons, New
8. Mehta and Madnani (2017): *Mathematics for Economists*, Sultan Chand and Sons, New Delhi.
9. Monga, G. S. (2015): *Mathematics and Statistics for Economics*, Second Revised Edition, Vikas Publishing House, Pvt. Ltd. New Delhi.
10. Nagar, A. L. and R. K. Das (1997): *Basic Statistics*, Oxford University Press, New Delhi
11. Salvatore, D. (2015): *Mathematics and Statistics*, Schaum's Series, Tata McGraw Hill.
12. Veerachamy, R. (2005): *Quantitative Methods for Economics*, New Age International (P) Ltd., New Delhi.
13. Yamane Toro (1967): *Statistics - An Introductory Analysis*, Harper and Row Publishers, New York.

## **COURSE CODE: PG34T 205A: AGRI-BUSINESS (Specialisation/ Optional paper)**

### **Course Outcomes:**

- ❖ Knowledge on Agri-Business helps to understand the concepts, its necessities, characteristics, commercialisations, trends and pattern in India.
- ❖ It shows the importance of agricultural credit Institutions in agriculture development and both theoretical and Indian agricultural marketing problems and remedial measures.
- ❖ This helps to understand the agricultural price instability, price policy, objectives and instruments.
- ❖ It demonstrates the importance of agribusiness in international trade, WTO, AOA MNC's their importance, functions, progress, problems and prospectus.

### **Module-I: Introduction to Agri-Business:**

**10 Hrs**

Meaning of Agri-business; Need for Agri-Business; Characteristics of Agri-Business in India; Commercialization of Agriculture leading to Agri-Business; Trends and Pattern of Agri-Business in India.

### **Module-II: Agricultural Credit Institutions:**

**14 Hrs**

Introduction - Commercial Banks- Lead Bank Scheme - Multi-Agency Approach - Nationalization of Banks - Regional Rural Banks - National Bank for Agriculture and Rural Development (NABARD) - Reserve Bank of India  
-Government Policy for Agricultural Credit - Agricultural Credit under Plans and Rural Credit in India - Farmers Service Societies.

### **Module-III: Agricultural Marketing:**

**12Hrs**

Concept, Structure, Importance, Defects of Agricultural Markets in India; Functions of Agricultural Marketing- Packaging, Transportation, Grading and Standardization, and Storage and Warehousing; Role of Government in Promoting Agricultural Marketing in India; Promotion of Regulated Markets (APMCs)-Importance, Functions, Problems and Remedial Measures.

### **Module-IV: Agricultural Prices:**

**12 Hrs**

Instability in Agricultural Prices-Causes and Effects and Fluctuations; Need for Stabilization in Agricultural Prices; Agricultural Price Policy in India-Need, Objectives, Origin and Development, Instruments, Limitations and Suggestions.

### **Module V: WTO and Agri-Exports:**

**12 Hrs**

International Trade in Agri-business- WTO and Agreement on Agriculture (AOA), Trends in Import and Export of Agricultural Commodities, Role of Multinational Corporations in Agri-exports; Agri-Export Zones in India- Importance, Functions, Progress, Problems and Prospects

### **Reading List:**

1. Acharya, S. S. and Agarwal N. L. (1994): *Agricultural Marketing in India*, (Second Edition), Oxford & IBH Publishing Co. Pvt. Ltd.
2. Bhalla, G.S. (1994): *Economic Liberalisation and Indian Agriculture*, Institute for Studies in Industrial Development, New Delhi.
3. Dandekar, V. M. (1994): *The Indian Economy: 1947-92, Vol. I, Agriculture*, Sage Publications, New Delhi.

4. Dantawala, M. L. (1991): *Indian Agricultural Development since Independence*, (Second Edition), Oxford & IBH, New Delhi.
5. Government of India (1976): *Report of the National Commission on Agriculture*, New Delhi.
6. Gulati, A. and T. Kelly, (1997): *Trade Liberalisation and Indian Agriculture*, Oxford University Press, New Delhi.
7. Hansra, B. S. and Vijayaragavan, K. (2003): *Agribusiness and Extension Management*, Concept Publishing Company, New Delhi.
8. Kahlon, A. S. and Tyagi D. S. (1983): *Agricultural Price Policy in India*, Allied Publishers, New Delhi.
9. Larson, A. L. (1957): *Agricultural Marketing*, Prentice-Hall, INC, USA.
10. Lekhi, R. K. and Joginder Singh (1999): *Agricultural Economics*, Kalyani Publishers, New Delhi.
11. Mamoria, C. B. (1999): *Agricultural Problems of India*, Kitab Mahal, Allahabad.
12. Omvi Rawling: *Introduction to Agri-Business*, PHI, New Jersey.
13. Raj. K.N. et. al (1988): *Essays in Commercialization of Indian Agriculture*, Oxford University Press, New Delhi.
14. Soni, R. N. (1995): *Leading Issues in Agricultural Economics*, Arihant Press, Jalandhar.
15. Vaidhyathan, A. (1989): *Livestock Economy of India*, Oxford & IBH, New Delhi.

## **COURSE CODE: PG34T 205B: LABOUR ECONOMICS (Specialization /Optional paper)**

### **Course Outcomes:**

- ❖ To understand meaning, nature, scope and importance of labour economics. Major events, trends and development of labour markets in the real world.
- ❖ To appreciate differences in views of economists both from positive and Normative standpoints with respect to issues in labour market and wage Determination.
- ❖ To understand labour unions, labour legislations and importance of I.L.O.
- ❖ The students will learn basic economic forces behind employment and wages, Sources of labour market imperfections, driving forces for education and skill Development, discrimination among the workers and Government policies for Labour welfare.

### **Module-I: Labour Markets:**

**14Hrs**

Nature and Characteristics of Labour Market; Paradigms of Labour Market Analysis; Classical, Neo-Classical and Modern Analysis of Demand and Supply Forces; Demand For Labour in Relation to Size and Pattern of Investment; Supply of Labour in Relation to Growth of Labour Force; Labour Market Policies; Mobility and Productivity of Labour; Rationalization; Methods of Recruitment and Placement.

### **Module-II: Employment:**

**12 Hrs**

Employment and Development Relationship; Poverty and Unemployment in Developing Countries; Unemployment; Concept, Types and Measurement (with reference to India); Impact of Rationalization; Technological Change and Modernization of Employment in Organised Private Industry; Employment in Public Sector Industry; Analysis of Educated Unemployment; Employment Policies in Five-Year Plans and Evaluation.

### **Module-III: Wage Determination:**

**12Hrs**

Neo-Classical and Bargaining Theories of Wage Determination; Concepts of Minimum Wage, Living Wage and Fair Wage in Theory and Practice; Productivity and Wage Policy; Wage Boards in India; Bonus System and Profit Sharing.

### **Module-IV: Industrial Relations:**

**10 Hrs**

Growth and Structure of Labour Unions in India; Causes of Industrial Disputes; their Settlement and Prevention Mechanism; Role of tri-partitism; Current Trends in Collective Bargaining; Labour Legislation in India; Labour Management Relations.

### **Module-V: State and Labour:**

**12 Hrs**

State and Social Security of Labour; Concepts of Social Security and its Evaluation; Labour Welfare in India; Child Labour; Female Labour and Gender Bias in Payment of Wages; Exit Policy; National Commission on Labour; Globalisation and Labour Market.

### **Reading List:**

1. Datt, G. (1996): *Bargaining Power, Wages and Employment: An Analysis of*
2. Hajela, P. D. (1998): *Labour Restructuring in India: A Critique of the New Economic Policies*, Commonwealth Publishers, New Delhi.
3. Jhabvala, R. and R. K. Subrahmanya (Eds.) (2000): *The Unorganised Sector: Work Security and Social Protection*, Sage Publication, New Delhi.
4. Lester, R.A. (1964): *Economics of Labour*, (2<sup>nd</sup> Ed). Macmillan, New York.
5. McConnell, C. R. and S. L. Brue (2013): *Contemporary Labour Economics*, McGraw; Hill, New York.
6. Papola, T.S., P. P. Ghosh and A.N. Sharma (Eds.) (1993): *Labour Employment and Industrial Relations in India*, B. R. Publishing Corporation, New Delhi.

7. Rosenberg, M.R. (1998): *Labour Markets in Low Income Countries*, in Chenery, H.B. and T.N.Srinivasan, (Eds.), *The Handbook of Development Economics*, North; Holland, New York.
8. Venkata Ratnam, C.S. (2001): *Globalization and Labour: Management Relations: Dynamics of Change*, Sage Publications, New Delhi.

## **COURSE CODE: PG34T 205C: ECONOMICS OF HEALTH (Specialisation/Optional)**

### **Course Outcomes:**

- ❖ To understand the basic concepts of health economics, scope and importance of health economics.
- ❖ A better understanding of the economic theory of health through a study of Economic models.
- ❖ Learn to evaluate and interpret empirical findings in health and healthcare Services on the basis of cost-benefit analysis.
- ❖ Possess knowledge of the latest developments in pricing and policies of Health and healthcare services.

### **Module-I: Introduction**

Health Economics-Concept, Importance of Health Economics; Scope of Economics of Health; Health as Commodity; Determinants of Health– Poverty, Malnutrition and Environmental Issues; Indicators of Health; Nexus between Health and Economic Growth.

### **Module-II: Demand for Health**

Nature of Demand for Health, Determinants of Demand, Elasticity of Demand-Price and Income Elasticity; Models of Demand for Health

### **Module-III: Supply of Health**

Nature of Supply of Health; Health Production Function; Pricing of Health Care Services-Drugs, Hospitals; Cost of Health Care Services; Market Failure; Externalities and Public Goods

### **Module-IV: Financing and Evaluation of Health Care Services**

Health Delivery Systems in India- Public and Private Financing of Health Care; Health Insurance and Co-operatives-Concept, Schemes and Progress; Expenditure on Health in India-Trends in Public and Private Expenditure; Public and Private Health Infrastructures; Evaluation of Health Services-Cost-Benefit Analysis (CBA), cost-Effectiveness Analysis (CEA), Cost-minimisation and cost-Utility analysis; Economic Reforms and Health Sector

### **Module-V: Economic Development and Health Attainments in India**

Life Expectancy- Concept, Male-female and Rural-urban Life Expectancy and Regional Pattern of Life Expectancy; Infant Mortality Rate- Concept and Trends and Determinants; Maternal Mortality Rate-Concept and Trends and Determinants; Fertility Rate-Concept and Trends in Fertility Rates; Crude Birth Rate and Death Rates; Nexus between Health and Economic Development; Swachh Bharat Abhiyan/Clean India Mission; Review of National Healthy Policy 2017.

**Reading List:**

1. Baru, R. U. (1998): *Private Health Care in India; Social Characteristics and Trends*, Sage Publications, New Delhi.
2. Berman, Peter (1991): *Health Economics, Health Financing and the Health Needs of Poor, Women, and Children*, Ford Foundation, New Delhi.
3. Berman, Peter and M. E. Khan (1993): *Paying for India's Health Care*, Sage Publications, New Delhi.
4. Carrin Guy (1984): *Economic Evaluation of Health Care in Developing Countries: Theory and Applications*, Croom Helm, London
5. Charles Phelps (1991): *Health Economics*, Oxford University, Press, New York
6. Charles, C. Griffin (1992): *Health Care in Asia: A Comparative Study of Cost and Financing*, World Bank
7. Cooper, M. H. and Culyer, A. J. (1973): *Health Economics*, Penguin Book Ltd, England.
8. Das Gupta, M., Chen, L. C. and Krishna, T. N (1996): *Health, Poverty and Development in India*, Oxford University Press, Delhi.
9. Gopal, K. (1982): *Economics of Health and Nutrition*, Chaugh Publishers
10. Jack, William (1999): *Principles of Health Economics for Developing Countries*, World Bank, Washington DC.
11. Morris, Stephen, N. Devlin and D. Parkin (2009): *Economic Analysis in Health Care*, Wiley India Pvt. Ltd. New Delhi.
12. Panchamukhi, P. R. (2002): *Economics of Health: An Introductory Review*, Reading Material, Indian Economic Trust
13. Panchamukhi, P. R. (1980): *Economics of Health: A Trend Report*, in ICSSR: A Survey of Research Economics, Vol. VI, Infrastructure, Allied, Delhi.
14. Prasad, Sujata and C. Sathyamala (2006): *Securing Health for All: Dimensions and Challenges*, Institute for Human Development, New Delhi.

## **COURSE CODE: PG34T 205D: URBAN ECONOMICS (Specialization /Optional paper)**

### **Course Outcomes:**

- ❖ Describe the conceptual and theoretical framework of urban economics.
- ❖ Interpret the pattern and trends of urbanization.
- ❖ Evaluate the impact of urbanization and issues and challenges of urbanization.
- ❖ Evaluate Government policies on various aspects of urban development.

### **Module-I: Introduction to Urban Economics**

**14 Hours**

Nature and Scope - Process of Urbanization-Factors initiating Urbanization process –City Stages-The Economic Theory of Urban Spatial Structures –The Concept of City Structures: the Concentric Zone Hypothesis –Urban Land-use: Models of Household Residential Locational Decision-Land-use Framework –Von Thunen: Income-related Framework: Park-Burgess – Budget Constraint Models of Allonso; Muth and Siegel.

### **Module-II: Theories Urban Growth**

**12 Hours**

Central Place Theory-Urban Economic Base and Urban Growth –The Human Ecological Approach to Urban Growth –City Size and Urban Growth-The Costs and Benefits of City Size – Urban Size Ratchet – Rank Size Rule - The Cost and Benefits of City Size - Optimum City Size.

### **Module-III: Urbanization in India**

**10 Hours**

Trends in India's Urbanization –Major Trends and Issues in India's Urbanization-Structure of Urban Growth –Spatial Distribution of Urban Population-Extent of Urban Sprawls.

### **Module-IV: Urban Problems and Planning in India**

**14 Hours**

Urban Housing and Problems of Slum-up Gradation-Urban Water Supply and Sanitation-Urban Transport-Urban Environment-Measures to Control Pollution-Urban Poverty and Alleviation Measures-Concept, Need, Objectives and Techniques of Urban Planning-The Master Plan Approach-The Emerging Planning Issues.

### **Module V: Urban Governance**

**10 Hours**

Urban Government Activity-Urban Local Bodies, Structure and Finances-Urban Fiscal Problems-Financing Development of Urban Infrastructure-Management of Urban Infrastructure; The Public-Private Partnership Mechanism.

### **Reading List:**

1. Amitabh Kundu (1993): *In the Name of the Urban Poor: Access to Basic Amenities*, Sage Publications, New Delhi
2. Amitabh Kundu, K.C. Shivaramakrishnan and others (2005): *Handbook of Urbanization in India*, Oxford University Press, New Delhi.
3. Bose A.N. (1980): *Urban Economics: A Trend Report*, in ICSSR: A Survey of Research in Economics, vol. 6, Allied Publishers.
4. Bose, A.N. (1978): *India's Urbanization 1991-2001*, Tata McGraw Hill.
5. Brian, C. Aldrich and Ranvinder S. Sandhu (1995): *Housing the Urban Poor: Policy and Practice in Developing Countries*, Sage Publications, New Delhi.
6. Button, K.J. (1977): *Urban Economics*, Richard D Irwin, Homewood, Illionis.

7. Goodall, B. (1972): *The Economics of Urban Areas*, Pregamon Press, New York.
8. Meera Kosambi (1994): *Urbanization and Urban Development in India*, Monograph-1, Research in Sociology and Social Anthropology: Third Survey, Indian Council of Social Science Research, New Delhi.
9. Mills E (1983): *Report of the Task Force on Housing and Urban Development, I to IV*, Planning Commission, Government of India, New Delhi.
10. NCAER (2005): *India Infrastructure Report, Financing Urban Infrastructure*, Oxford University Press, New Delhi.
11. NIUA (2017): *Urban Statistical Handbook*, National Institute of Urban Affairs, New Delhi.
12. Sundarm K.V. (1977): *Urban and Regional Planning in India*, Vikas Publishing House, New Delhi.

**COURSE CODE: PG34T 205E: GENDER AND DEVELOPMENT  
(Specialisation/Optional)**

**Course Outcome:**

- ❖ The objective of this course is to enable the students to understand thoroughly the theories of Gender and Development.
- ❖ It also attempts to study the economic growth and gender equality, impact of technology women's labour market.
- ❖ Students would have knowledge about the gender planning, gender budgeting and development

**MODULE-I: INTRODUCTION**

Basic Concepts - Difference Between Gender And Sex - Patriarchy - Feminism - Schools Of Feminism - Gender Division Of Work - Invisibility Of Women's Work - Gender Mainstreaming - Concept Of Gender Economics - Gender Concerns In Economic Theory - Sen's Contribution.; Women In Decision Making.

**MODULE-II: DEMOGRAPHIC ASPECTS**

Demography of Female Population, Age Structure, Mortality Rates and Sex Ratio- Causes of Declining Sex Ratios and Fertility Rates in LDCs and Particularly India- Theories and Measurement of Fertility and its Control; Women and their Access to Nutrition, Health, Education, and Social and Community Resources, and their Impact on Female Mortality and Fertility, Economic Status, and Work Participation Rate (WPR) .

**Module-III: Economic Growth and Gender Equality**

Globalization Of The World Economy And Gender Status - Impact Of Economic Growth On Gender Equality - Gender Equality And Economic Growth And Socio-Economic Development. Impact Of Globalization On Gender Status - Concept Of The "Feminization Of Poverty" - Basic Causes - Problems Of Measuring The Feminization Of Poverty - Gender Differences In Incomes - Women's Contribution To Gdp - Estimation Of Women's Unpaid Work.

**Module-IV: Women, Technology and Environment**

Impact of Technological Development and Modernization on Women's Work Participation in General and in Various Sectors such as Agriculture, Non-Agriculture Rural Activities, Small and Cottage Industries and Organized Industry-Female Activities and Ecological and Environmental Concerns: The Two Way Relationship — Role of New Technologies for Helping Women-Provision of Information and Training for Simple Harvesting of Economic Services.

**MODULE-V: GENDER PLANNING AND DEVELOPMENT POLICIES**

Gender And Development Indices; Mainstreaming Gender Into Development Policies; Paradigm Shift From Women's Well Being To Women's Empowerment; Democratic Decentralization (Panchayats) And Women's Empowerment In India; *Gender Budgets*: Gender Budgeting - Methodology Of Gender Budget Preparation - Approaches And Principles Of Gender Budgeting - Experiences Of Different Countries In Gender Budgeting - Gender Budgeting In India And Karnataka.

## READING LIST:

1. Batliwala, S. (1993): *The Empowerment of Women in South Asia: Concepts and Practices*, Sage Publications, New Delhi.
2. Boraian, M. P. (2008): *Empowerment of Rural Women: The Deterrents and Determinants*, Concept Publishing Company, New Delhi.
3. Boserup, Ester (1970): *Women's Role in Economic Development*, St Martin's Press, New York.
4. Burra, Neera, J. D. Ranadive and R.K. Murthy (2007): *Micro-Credit, Poverty and Empowerment*, Sage Publications, New Delhi.
5. Sharma Kumud, Sujata. C. P. (2011): *Towards Equality: Report of the Committee on the Status of Women in India*, Pearson Education, New Delhi.  
GOI (1974): *Towards Equality: Report of the Committee on the Status of Women in India*, Ministry of Education and Social Welfare, New Delhi.
6. Hunt, J. (2004): Introduction to Gender Analysis Concepts and Steps, *Development Bulletin*, No. 64:100-106.
7. Irene Tinker (1990): *Persistent Inequalities: Women and World Development*, OUP, New York.

13. National Commission on Women in Self Employment (1987): *Shramshakti Report*, New Delhi
14. Palanithurai, G., T.Parthiban and J. Vanishree (2007): *Empowering Women: Grassroots Experience from Tamil Nadu*, Concept Publishing Company, New Delhi.
15. Swapna, Mukhopadhyay (Ed.) (2007): *The Enigma of the Kerala Woman: The Failed Promise of Literacy*, Social Science Press, New Delhi.
16. UNDP (2006): *Human Development Report, Fighting Climate Change: Human Solidarity in A Divided World*, Palgrave, New York.

**COURSE CODE: PG34T 205F: HUMAN DEVELOPMENT IN KARNATAKA  
(Specialisation/Optional)**

**Course Outcome:**

- ❖ The objective of this course is educating the students about various concept of human development.
- ❖ To familiar students about the importance human capital in general and human development disparities among different districts of Karnataka.
- ❖ To impart knowledge to students about different dimension of human development.

***Module - I: Introduction to Economic Development***

Economic Growth (SGDP and District Income) and Social Change - Salient Features of Karnataka Economy - Civil Society and Democratic Polity - Growth in Population - Changes in Demographic Composition - Karnataka: A State in Socio-Economic Transition.

***Module - II: Progress in Human Development***

HDI Ranking - Districts According to HDI Ranking - Variations in District HDI and their Implications - Income, Employment and Poverty in Karnataka - District Human Development Reports - Gram Panchayat Human Development Report - Brief Information; Analysis of Regional Variations - Framework for Human Development in Karnataka.

***Module -III: Education, Health, Nutrition and Family Welfare***

Growth of Education and Literacy since 1951 - Inter-District Disparities - Development of Higher Education and Associated Problems - Karnataka's Education Policy.

Development of Health and Family Welfare Sector in Karnataka - Major Disease Burden - Health Programs - Family Welfare Programs - Problems - Nutrition and Food Security in Karnataka.

***Module -IV: Development of Social Sectors***

Housing, Water Supply and Sanitation Programmes - Inter-District Disparities - Problems - Need for Long-Term Approach.

***Module - V: People's Participation and Democratic Governance***

Development and Democratic Decentralization Process - Role of Panchayat Raj Institutions and Urban Local Bodies - Powers, Functions and Finances - People's Participation and Decentralized Planning - Emergence of Third Sector in Karnataka - NGOs and Government Organizations, Co-operatives and Civil Society - People's Movements for Environment Protection, Abolition of Online Lottery, Liquor Prohibition Etc., - Institutional.

**Reading List:**

1. Government of Karnataka (2005): *High Power*. Committee for Redressal of Regional Imbalances (HPCRRRI), Government of Karnataka, Bangalore
2. Government of Karnataka (2005): *Human Development in Karnataka*, Planning Department, Bangalore.
3. Government of Karnataka (2015): *Human Development: Performance of District, Taluks and Urban Local Bodies in Karnataka, 2014: A Snapshot*, Planning, Programme Monitoring and Statistics Department of Government of Karnataka, Bengaluru (<http://planning.kar.nic.in> – Human Development Division).
4. Government of Karnataka (2015): *A Handbook on Statistics Outline of Karnataka*, Directorate of Economics and Statistics, Bangalore.
5. Government of Karnataka: *Economic Survey of Karnataka*, Government of Karnataka (Various Annual Reports) (<http://planning.kar.nic.in>)
6. Gowda, Sreenivasa and T. Nanjegowda: *Economic Development of Karnataka: Leading Aspects*.
7. Indian Economic Association (1998): *Economic Development of Karnataka*, Edited by M. V. Srinivasagowda and D.T. Nanjegowda.
8. Madaiah, M. (1989): *Karnataka Economy: Growth, Issues and Lines of Development*, Himalaya Publishing House, Mumbai.
9. Madaiah, M. and R. Ramapriya (1989): *Karnataka Economy: Growth, Issues and Lines of Development*, Himalaya Publishing House, Delhi.
10. Puttaswamaiah, K, (1980): *Economic development of Karnataka: A Treatise in Continuity and Change*, Oxfor and IBH Publication.
11. Rao, Hemalatha (1984): *Regional Disparities and Development in India*, Ashish Publishing House, New Delhi.

## **COURSE CODE: PG34T 206: INDIAN ECONOMY (Open Elective Course)**

### **Course Outcome:**

- ❖ To study the sectoral structure of Indian economy.
- ❖ To study the importance of agriculture and industrial sectors.
- ❖ To examine the impact of financial sector and economic reforms.
- ❖ To study the financial conditions of central governments.

### **Module-I: An Overview of Indian Economy**

Characteristics of Indian Economy; Demographic Features of Indian population; Trends in the growth of National Income; Green Accounting; Structural Changes in the Economy; Poverty and Inequality; Trends in Savings, Investment and Capital Output Ratio and their Implications; India's Development Experience; Planning and Development Strategies; Planning Commission to NITI Aayog; Parallel Economy and its Implications.

### **Module -II: Agricultural Sector**

Agriculture-Importance; Cropping Pattern; Land Reforms; Farm size and efficiency; Agricultural Labour Problems; Mechanization and Green Revolution; Agricultural Finance and Rural Indebtedness and Farmers' Suicide; Agricultural Marketing; Agricultural Price; Agricultural Co-operatives; Technological Factor in Agriculture Growth-Seeds Fertilizers, Irrigation; Food problem and Public Distribution System; WTO and Agriculture.

### **Module -III: Industrial Sector**

Importance of Industrialization; Growth and Structural Composition; Structural Transformation; Small-Scale Industries- Role and Performance; Privatization and Public Sector, Private Sector Industries and their Performance and Problems; Industrial Labour; Industrial Finance; Development Banks; Capital Market; Industrial Monopoly; MRTP; New Industrial Policy; Mergers and Takeover. **!**

### **Module -IV: Foreign Trade Sector**

Exchange Rate policy of India; Trends in India's Foreign Trade; Balance of Payment; Problems of Policies; New Foreign Trade Policy; Export promotion V/S Import Substitution; Foreign Direct Investment in India; Globalisation and its impact on India's Trade and Investment.

### **Module -V: Financial Sector**

RBI; Money and Money Markets; Monetary Policy; Money Supply; Commercial Banks; Banking and Non-Banking Financial Sector; Financial Sector Reforms; Demonetisation and its Impact.

**Reading List:**

1. Agarwal A.N. and Agarwal M.K. (2016): *Indian Economy: Problems of Development and Planning*, New Age International (P) Limited Publishers, New Delhi.
2. Agarwal, H. S. (2011): *Indian Economy*, Lakshmi Narain Agarwal, Agra.
3. Agarwal, R. C. (2015): *Economics of Development and Planning (2014-15)*, Lakshmi Narain Agarwal, Agra.
4. Ahluwalia, I. J. and M D Little (Eds.) (1999): *India's Economic Reforms and Development* (Essays in Honor of Manmohan Singh) OUP, New Delhi.
5. Brahmananda, P. R. and V. R. Panchamukhi (Eds.) (2001): *Development Experience in the Indian Economy: Inter-State Perspectives*, Bookwell, New Delhi.
6. Dhingra, I. C. (2017): *Indian Economy*, S. Chand and Company Limited, Ram Nagar, New Delhi.
7. Government of India (2017): *Economic Survey of India* (Annual), Ministry of Finance, Government of India, New Delhi.
8. Hanumantha Rao C. H. and H. Linnemann (Eds.)(1996): *Economic Reforms and Poverty Alleviation in India*, Sage Publication, New Delhi.
9. Jalan, B. (1996): *India's Economic Policy-Preparing for the Twenty First Century*, Viking New Delhi.
10. Misra, S. K. and V. K. Puri (2018): *Indian Economy*, Himalaya Publishing House, Mumbai
11. Mujamdar, N. A. (2004): *Economics Reforms and Sans Development*, Academic Foundation, New Delhi,
12. Rangarajan, C. (1998): *Indian Economy: Essays on Money and Finance*, UBS, New Delhi.
13. Ruddar Dutt and K.P.M. Sundharam (2002): *Indian Economy*, S. Chand and Company Limited, New Delhi.
14. Sen, R.K. and B.Chatterjee (2001): *Indian Economy: Agenda for 21<sup>st</sup> Century* (Essay in Honour of Prof. P. R. Brahmananda), Deep & Deep, New Delhi.
15. Sundaram, K.P.M. (2004): *An Introduction to Indian Economy*, S. Chand and Company Limited, Ram Nagar, New Delhi.

## M.A. ECONOMICS

### CHOICE BASED CREDIT SYSTEM

#### Revised Syllabus

### III SEMESTER

#### COURSE CODE: PG34T 301: PUBLIC ECONOMICS

##### Course Outcome:

- ❖ This course enables the students to learn about nature and scope of public economics, economic systems, market failure in provision of public goods, mechanism for revealing for public choice and types of public policy for provision of public goods and thereby attaining maximum social advantage.
- ❖ It also aims at understanding the theories of public expenditure, public revenue mobilization and public debt and its management.
- ❖ At the end of the course, the students would have learned the essential theories and frameworks needed to design the public policies for effective of provision of public goods and services and efficient management of public assets and liabilities.

##### Module-I: Introduction

**12 Hours**

Public Economics-Nature, Scope, Meaning and Evolution; Government-Powers, Fiscal Functions-Allocation, Distribution and Stabilisation and Role of Government in a Mixed Economy; Theory of Public Goods- Private Goods, Public Goods, Club Goods, Commons, Merit Goods and Demerit Goods; Public Goods and Market Failure; Public Goods as a Special case of Externalities and Market Failure; Principle of Maximum Social Advantage.

##### Module-II: Public Choice and Policy

**18 Hours**

Voting and Public Choice- Majority Voting rule, Problems in Allocating Resources and Aggregation of Preference Revelation; Alternative to Majority Voting Systems; Arrow's Impossibility Theorem; Sen's Theory of Social Choice; Economic Theory of democracy; Rent Seeking and Directly Unproductive Activities; Public Policy for Allocation of Resource-; Voluntary Exchange Model; Samuelson and Musgrave; Johansen Model; Clarke, Grooves and Ledyard Model; Tiebout Model- Theory of Club Goods.

##### Module-III: Theories of Public Expenditure

**8 Hours**

General Theories of Public Expenditure: Wagner's Hypothesis; Peacock- Wiseman Hypothesis; Colin Clark Hypothesis; Expenditure Evaluation- Criteria for Public Investment- Social cost- Benefit Analysis; Reforms in Expenditure Budgeting System- Zero Based Budgeting.

##### Module-IV: Public Revenue and Taxation

**12 Hours**

Public Revenue: Sources and Classification, Taxation, Tax Elasticity and Buoyancy, Taxable Capacity and Tax Effort, Theory of Incidence; Different Concepts of Incidence, Benefits and Ability to Pay Approaches, Taxation and Dead Weight Loss, Theory of Optimal Taxation, Equity in Taxation, Direct and Indirect Taxes, Effect of Taxation on Production and Distribution.

**Module-V: Public Debt and Its Management**

**10 Hours**

**Public Debt-Concept, Sources of Public Debt - Internal and External, Objectives,** Reasons for Growing Public Debt; Classical and Modern Views on Public Debt, Burden of Public Debt; Public Borrowings and Price Level- Crowding out of Private Investment and Activity; Principles of Debt Management and Repayment.

### Reading List:

1. Anderson, John E. (2002): *Public Finance: Principles and Policy*, Houghton Mifflin Company, Boston.
2. Bagchi A. (2005) : *Readings in Public Finance*, Cambridge University Press, New Delhi
3. Bhatia, H. L. (2015): *Public Finance*, Vikas Publishing House Pvt. Ltd., New Delhi.
4. Chand, S. N. (2013): *Public Finance*, Atlantic Publishers and Distributors (P) Ltd., New Delhi.
5. Cullis, John and Phillip Jones (2010): *Public Finance and Public Choice: Analytical Perspective*, Oxford University Press, New York
6. Hinderiks, Jean and Gareth Myles (2014): *Intermediate Public Economics*, PHI, New Delhi
7. Hugh Dalton (1997): *Principles of Public Finance*, Allied Publishers Pvt. Ltd.
8. Hyman David N. (2012): *Public Finance- A Contemporary Application of Theory to Policy*, Thomson South – Western Ohio, USA.
9. Jha, Rajesh K. (2012): *Public Finance*, Perason, Delhi.
10. Kennedy, M. Marria John (2012): *Public Finance*, PHI Learning Private Limited New Delhi.
11. Lekhi, R.K. and Joginder Singh (2015): *Public Finance*, Kalyani Publishers, NewDelhi.
12. Musgrave R.A and Musgrave P.A. (2009): *Public Finance in Theory and Practice*, McGraw- Hill Kogakusha, Tokyo.
13. Om Prakash (2016): *Public Economics: Theory and Practice*, Vishal Publishing Co. Jalandhar-Delhi.
14. Rao, Govind (2010): *Public Finance: Theory and Practice Essay in Honour of A.Bagchi*, Sage Publications, New Delhi.
15. Rosen, Harvey S. and Ted Gayer (2012): *Public Finance*, 8<sup>th</sup> Edition, MaGraw Hill Education Private Limited, New Delhi.
16. Singh, S.K. (2015): *Public Economics: Theory and Practice* S. Chand and Co., New Delhi.
17. Tyagi B.P. and H. P. Singh (2016): *Public Finance*, Jayaprakashnath and Company, Meerut, India.

## **COURSE CODE: PG34T 302: INTERNATIONAL TRADE AND FINANCE – I**

### **Course Outcomes**

- 1) Deep understanding about International trade theories and their empirical testing
- 2) To make them understand the students about benefits of International trade in terms of Gains from trade and Terms of trade
- 3) Conceptual understanding of International trade policy and Trade and Economic integration among the countries such as EU, NAFTA, SAFTA and ASEAN
- 4) By the end of the course, students should be able to apply International trade theories and policies in their research.

### **Module-I: International Trade Theories-I**

**10-Hours**

Mercantilists Views on Trade - Trade based on Absolute Advantage- Adam Smith; Trade based on Comparative Advantage- David Ricardo; Mill's Reciprocal Demand; Opportunity cost trade theory; Empirical Testing of Absolute Cost and Comparative Cost.

### **Model-II: International Trade Theories-II**

**12- Hours**

Heckscher-Ohlin-Samuelson Trade Theory; Assumptions- Factor Intensity, Factor Abundance - Factor Endowments and Heckscher-Ohlin Theorem - Empirical Test of Heckscher-Ohlin Model- Leontief Paradox –Factor Price Equalization Theorem: Stopler-Samuelson Theorem;

Economic Growth and International Trade; The Rybczynski Theorem - Technical Progress - Immiserizing Growth - Growth Changes Tastes and Trade in both Nations.

### **Module-III: International Trade Theories-III**

**12-Hours**

Economies of Scale, Imperfect Competition, and International Trade- New Trade Theories- Economies of Scale and International Trade, Imperfect Competition and International Trade- Trade Based on Product Differentiation;

- 5) Intra-Industry Trade- Trade Based on Dynamic Technological Differences- Costs of Transportation, Environmental Standards, and International Trade- Environmental Standards, Industry Location, and International Trade

### **Module-IV: International Trade Policies**

**16-Hours**

Trade Restrictions; Tariffs - Partial Equilibrium Analysis of a Tariff - The Theory of Tariff Structure - General Equilibrium Analysis of a Tariff - The Optimum Tariff;

***Non-Tariff Trade Barriers and the New Protectionism:*** Import Quotas - Voluntary Export Restraints - Technical, Administrative and other Regulations; International Cartels and Dumping; The Political Economy of Protectionism and Strategic Trade and Industrial Policy; Outstanding Trade Problems.

### **Module -V: Economic Integration**

**10-Hours**

Customs Unions and Free Trade; Introduction - Trade Creating Customs Union and Trade Diverting Customs Union, Static and Dynamic Benefits from Customs Union; History of Economic Integration - The European Economic Community, The European Free Trade Association and NAFTA; Attempts of Developing Countries towards Economic Integration – SAFTA and ASEAN.

**Reading List:**

1. Carbough, R.J. (2017): *International Economics*, (16<sup>th</sup> Edition) International Thompson Publishing, New York.
2. Dana, M.S. (2017): *International Economics: Study, Guide and Work Book*, (5<sup>th</sup> edition), Rutledge Publishers, London.
3. Gita Gopinatha, Elhanan, Helpman Kenneth and Regoff (2014): *Handbook of International Economics*, Elsevier Publications
4. Jackson, J. (1998): *The World Trading System*, Cambridge University Press  
Mass.
5. Jagadish N. Bhagwati (1983): *Dependence and Interdependence* (Ed) by Gane Grossman, Vol.2, Basil Blackwell, Oxford.
6. Kenen, P.B. (2000): *The International Economy*, (4<sup>th</sup> Edition) Cambridge University Press, London.
7. Kindleberger, C.P. (1978): *International Economics*, (6<sup>th</sup> Edition) R.D.Irwin Homewood.
8. Krugman, P.R. and M. Obstfield (2012): *International Economics: Theory and Policy*, (9<sup>th</sup> Edition) Addison-Wesley Publications.
9. Metzler: *Readings in International Economic*, American Economic Series.
10. Salvatore, D. (2014): *International Economics*, (11<sup>th</sup> Edition), MacMillan Publication.
11. Soderstein, B. (1993): *International Economics*, MacMillan, London.
12. Soderstein, B. and Reed, Geoffrey (1994): *International Economics*, (3<sup>rd</sup> Edition) MacMillan, London.
13. UNCTAD: *World Investment Reports*, Various Issues.
14. Vaish, M. C. and Sudama Singh (2010): *International Economics*, (8<sup>th</sup> Edition), Oxford and IBH Publication, New Delhi.

## **COURSE CODE: PG34T 303: RESEARCH METHODOLOGY AND DATA ANALYSIS**

### **Course Outcomes**

- ❖ Ability to frame research question/s;
- ❖ Capacity to search and manage literature in a scientific manner;
- ❖ Designing suitable instruments to collect data;
- ❖ Developing appropriate data analysis plans; and
- ❖ Imbibing written and oral presentation skills to communicate information and data to multiple audiences.

### **Module - 1: Introduction to Research Process**

**8 Hours**

Meaning of Research and Characteristics - Planning a Research - Stages of Research - Research Problem - Theoretical Foundation - Review of Literature - Objectives - Hypotheses - Types of Research: Pure and Applied Research - Qualitative, Quantitative and Mixed - Exploratory, Descriptive, Diagnostic, Evaluation, Action and Experimental Research - Historical Research - Surveys - Case Study - Field Study Need and Importance of Research in Economics - Applicability - Ethical issues in Research.

### **Module - 2: Data Sources and Methods of Data Collection**

**10 Hours**

Primary and Secondary Sources of Data; Quantitative Data - Sources - Time Series Data - Cross Section Data and Pooled Data - Census, Reports and Documents, other Published and Unpublished Sources; Observation - Interview Method, Schedules and Questionnaires - Questionnaire Designing Procedure - Case Study, Projective Methods - Simulation - Merits and Demerits.

### **Module - 3: Sampling Considerations and Data Processing**

**12 Hours**

*Sampling Considerations:* Concepts - Sample vs Census - Principles of Sampling Design & Process - Types of Sample Design: Probability Sampling Techniques: Simple Random, Stratified Random, Cluster and Multi-Stage and other Methods of Sampling. Non-Probability Sampling Techniques: Quota Sampling, Convenient Sampling, Purposive Sampling, Judgment Sampling and other Methods - Determination of Sample Size - Advantages and Disadvantages - Errors in Sampling.

*Data Processing:* Processing and Distribution - Field Work Validation - Tabulation - Editing - Coding - Classification and Tabulation of Data - Presentation - Graphical Representation.

### **Module - 4: Data Analysis and Interpretation (Theoretical Exposure) 20 Hours**

Univariate and Multivariate Data Analysis - Descriptive v/s Inferential Analysis - Descriptive Analysis of Univariate Data and Bivariate Data - Testing of Hypotheses: Concepts, Steps in Testing of Hypothesis.

*Estimation of Mean:* Test of Single Sample Mean - Two Independent Means Tests - Testing for Means of Paired Data - Testing for the Equality of K Population Means - Assumptions for ANOVA - Between Treatments Estimate of Population Variance - Within Treatments Estimate of Population Variance - Comparing the Variance of Estimates - The F Test - Multiple Comparison Procedures.

*Estimation of Variance:* Test of Single Sample Variance - Two Sample Variance Test.

*Non-Parametric Tests:* Advantages & Disadvantages - Chi-square tests - Tests for Randomness.

*Introduction to Advanced Data Analysis Techniques:* Correlation and Regression Analysis - Factor Analysis - Discriminant Analysis - Cluster Analysis - Multidimensional Scaling.

Importance of Report Writing - Types of Reports: Brief Reports, Detailed Reports, Technical Reports and Business Reports - Report Preparation - Report Structure: Preliminary Section, Main Report - Interpretations of Results - Research Findings and Suggested Recommendations - Limitations of the Study, and End Notes - Report Writing: Report Formulation - Effective Documentation: Need and Guidelines: Presenting Tabular Data, Visual Representations: Tables, Graphs, Charts - Presenting Footnotes and Bibliography - Oral Presentation of Research.

1. Bryman Alan, *Social Research Methods*, Oxford University Press, Oxford.
2. Kothari C.R., *Research Methodology*, New Age International Publication, New Delhi.
3. Krishnawamy O.R. and Ranghanathan, M., *Methodology of Research in Social Sciences*, Himalaya Publishing House, Bangalore.
4. Kurian C.T. *Research Methodology in Economics*, Institute of Development Studies, Madras.
5. Majumdar P.K., *Research Methods in Social Science*, Viva Books Private Limited, New Delhi.
6. Robert, A. Day, *How to Write and Publish a Scientific Paper*, Cambridge University Press, Great Britain.

## **COURSE CODE: PG34T 304: THEORY OF ECONOMETRICS**

### **Course outcomes**

- ❖ Familiarise the Econometrics applications that are widely used in empirical work in economics and other related disciplines.
- ❖ Conceptual understanding and ‘hands on’ applications using economic data drawn from real-world examples, along with formal theoretical proofs and empirical testing
- ❖ Familiarise and understand the students on Advanced econometrics concepts including  
Problems faced in estimation and inference in the context of single and multiple equations regression model and various diagnosis testing.
- ❖ To make them understand Simultaneous equations and problems in estimation.
- ❖ By the end of the course, students should be able to develop simple econometric models and interpret the econometric and statistical results reported in other studies.

### **Module-I: Introduction to Econometrics**

**10-Hours**

Meaning, Nature and Scope of Econometrics; Distinction between Economics and Econometrics; Mathematics and Econometrics, Statistics and Econometrics; Methodology of Econometrics ; Types of Econometrics.

### **Module-II: Simple and Multiple Regression Model**

**16-Hours**

*Simple Regression*- Meaning, Basic Ideas, Significance of Disturbance Term. Method of Estimation: Ordinary Least Squares and Maximum Likelihood. Estimation - BLUE Property – Coefficient of Determination, Assumptions, Hypothesis Testing; Confidence Interval and Test of Significance Testing Regression Coefficients, Interpretation of Results. Multiple Regression: Three Variable Regression Model- Partial Regression. Method of Estimation, R-Square and Adjusted R-Square; Hypothesis Testing; Individual regression coefficients, Overall Significance Test ANOVA; Introduction to Matrix Approach.

### **Model-III: Diagnosis Testing;**

**10-Hours**

Multicollinearity- Nature, Causes ,Consequences, Detection and Remedial Measures.

Heteroscedasticity- Nature, Causes,Consequences, Detection and Remedial Measures.

Auto-Correlation- Nature, Causes, Consequences, Detection and Remedial Measures.

### **Module-IV: Dummy Variable and Dynamic Regression Models**

**10-Hours**

*Dummy Variable Model*- Meaning, Nature, Dummy Variable Trap; Dummy Variable Model with Single Qualitative Variable, Two Qualitative Variables; Dummy Variable Model with Mixture of Qualitative and Quantitative Variables.

### **Model -VAutoregressive and Dynamic Models**

**10-Hours**

Role of Lag in Economics, Estimation Methods, Koyck's: Adaptive Adjustment and Partial Expectation Models; Almon Approach to Distributed Lag Models.

Nature, Simultaneous Equation Bias, Identification; Under - Exact - Over Identification; Rules of Identification - Order and Rank Condition of Identification; Estimation of Simultaneous Equations Models- ILS, 2SLS, 3SLS, LIMLE, FIMLE.

### **Reading list**

1. Badi, H. Baltagi (2011): *Econometrics*, Springer-Verlag Berlin Heidelberg, New York.

2. Dougherty, Christopher (2011): *Introduction to Econometrics*, Oxford University Press, UK.
3. Ghosh, Sukesh K. (1991): *Econometrics-Theory and Applications*, Prentice Hall, Englewood Cliffs, New Jersey.
4. Greene, William H. (2016): *Econometric Analysis*, Pearson, New Delhi.
5. Gujarati, Damodar N., Dawn C. Porter and Sangeetha Gunasekar (2017): *Basic Econometrics*, (5<sup>th</sup> Edition) Tata McGraw Hill Bombay.
6. Julia, Hebden (2000): *Statistics for Economics*, Heritage Publication, Oxford University.

## **COURSE CODE: PG34T 305A: RURAL DEVELOPMENT (Specialization /Optional paper)**

### **Course outcomes**

- ❖ This course provides the students with the basics of rural development, including concepts, characteristics, problems, theories and approaches and programmes implemented for rural redevelopment in India.
- ❖ It also enables the students to study the various aspects of poverty and unemployment in India, transferring the rural economy-economic diversification in rural areas and the role of infrastructures in rural development.
- ❖ At the end of the course, the students will be able to understand the problems, approaches, programmes implemented for the development of rural economy in India and understand the essentiality to design the new policies and programmes for sustainable development of rural economy in India.

### **Module-I: Nature and Scope of Rural Development**

**8 Hours**

Need for Rural Development; Concept, Objectives and Indicators of Rural Development; Characteristics of Rural Economy; and Rural-Urban Linkage

### **Module-II: Theories and Approaches to Rural Development**

**12 Hours**

Unbalanced Growth Theory; Dualistic Models Of Development- Lewis Model And Fei And Ranis Model; Approaches To Rural Development In India

### **Module-III: Poverty and Unemployment in Rural India**

**18 Hours**

Rural Poverty-Concept, Poverty Line, Measurement, Poverty Trends, Regional Pattern of Poverty and Causes of Poverty; Unemployment- Concept, Measurement, Trends, Regional Pattern and Causes of Unemployment; Review of Current Poverty Alleviation and Employment Generation Programmes in India.

### **Module-IV: Transferring Rural Economy**

**18 Hours**

Importance of Agriculture and Allied Activities in Rural Development; Rural Non-Agricultural Employment in India- Importance, Growth, Regional Pattern and Determinants; MSMEs-Concept, Classification Importance, Progress, Problems and Remedial Measures; Rural Industrialisation-Importance, Programmes, Progress and Problems of Small- Scale Industries (SSI) and Remedial Measures

### **Module-V: Infrastructures for Rural Development**

**14 Hours**

Rural Infrastructures- Meaning, Classification, Importance, Problems; Educational and Health infrastructure; Housing and Sanitation; Drinking Water Supply; Rural Energy; Rural Transport and Communication; Rural Electrification

### **Reading List:**

1. Biradar, R. R. (2012): *Incidence of Poverty among Social Groups in Rural India: Why do the Poorer Remain Poor?*, Institute for Social and Economic Change (ISEC), Bangalore.
2. Biradar, R.R.(2009): *Rural Non-Agricultural Employment in India: An Analysis of Its Determinants and Impact on Poverty and Inequality*, Concept Publishing Company, New Delhi
3. Chambers, R. (1983): *Rural Development: Putting the Last First*, Longman, Harlow.
4. Dandekar, V.M. and N. Rath (1971): *Poverty in India*, GIPE, Pune.

5. Dantwala, M. L. (1973): *Poverty in India: Then and Now, 1870-1970*, Macmillan, Bombay.
6. Dantwala, M. L. and Others (Ed) (1986): *Indian Agricultural Development since Independence: A Collection of Essays*, Oxford and IBH Publishing Co.Pvt. LTd. New Delhi.
7. Desai, Vasant (2015): *Rural Development*, Himalaya Publication, Mumbai.
8. Gupta. K .R. (Ed) (2003): *Rural Development in India*, Atlantic Publishers and Distributors, New Delhi.
9. Jain, Gopal Lal (1997): *Rural Development*, Mangal Deep Publications, Jaipur,.
10. Maheshwari, S. R. (1985): *Rural Development in India*, Sage Publications, New Delhi.
11. Satya Sundaram, I. (2015): *Rural Development*, Himalaya Publishing House, Delhi.
12. Singh, Katar (1986): *Rural Development: Principles, Policies and Management*, Sage Publications, New Delhi, (Second Edition).
13. Srinivasan, T. N. and P. K. Bardhan (Eds.) (1974): *Poverty and Income Distribution in India*, Statistical Publishing Society, Calcutta.
14. Prasad, B. K. (2003): *Rural Development: Concept, Approach and Strategy*, Sarup and Sons, New Delhi.
15. Moni, M. and Suresh Misra (2009): *Rural India: Achieving Millennium Development Goals and Grassroots Development*, Concept Publishing Company, New Delhi.
16. Mondal, Sagar and G. L. Ray (2011): *Rural Development*, Kalyani Publishers, New Delhi.
17. Saminathan, M. S. (2010): *Integrated Rural Development*, Concept Publishing Company, New Delhi.

## **COURSE CODE: PG34T 305B: FINANCIAL INSTITUTIONS AND MARKETS-I**

### **Course Outcome:**

- ❖ Students would have knowledge regarding money market, capital market, stock exchange i.e. Indian Financial System which is the backbone of the country.
- ❖ To familiar students about the relationship between financial development and economic development.
- ❖ To impart knowledge to students about controller of financial system, e.g. RBI, SEBI, etc.
- ❖ Identify the existence and development of primary and secondary market, debt market, new financial instruments which are utilize and effectively participate in the development process.

### **Module-I: Financial Markets**

**12 Hours**

Money Market: Introduction - Functions, Efficiency - The Indian Money Market-Role of RBI in the Money Market - Money Market Centres - Steps to Develop Money Market in India - Money Market Instruments - Treasury Bills, Commercial Paper, Commercial bills, Certificates of Deposit, Call/Notice Money Market, Money Market Derivatives - Collateralised Borrowing and Lending Obligation (CBLO) - Link between the Money Market and the Monetary Policy in India - Tools for Managing Liquidity in the Money Market.

### **Module-II: Capital Market**

**10 Hours**

Introduction, History, Functions, Types, Scams and Reforms - The Primary Market - Introduction, Free Pricing Regime and Book Building - New Issue Mechanism in India, Primary Issues, and Resource Mobilization form the Primary Market, Mutual Funds.

### **Module-III: Secondary Market**

**12 Hours**

Introduction, Stock Exchanges National and Regional - Measures to boost Liquidity in the Secondary Market - Market Making System - Impact of Reforms and Measures on Secondary Market Activities.

### **Module-IV: Derivatives Market and Debt Market**

**16 Hours**

Derivatives Market: Introduction - Forwards and Futures - Futures Trading Strategies - Options - Trading Strategies - Derivatives Market in India - Derivatives Trading in India.

Debt Market: Introduction - Private Corporate Debt Market - Public Sector Undertaking Bond Market - Government Securities Market.

### **Module -V: New Financial Instruments**

**10 Hours**

New Financial Instruments - Meaning - Floating Rate Bonds - Zero Interest Bonds - Deep Discount Bonds - Revolving Underwriting Finance Facility (RUFF) - Auction Rated Debentures (ARD) - Secured Premium Notes (SPNs) with Detachable Warrants - Non-Convertible Debentures (NCDs) with Detachable Equity Warrants - Tradable Warrants - Fully Convertible Debentures - Domestic Convertible Bonds - Differential Shares - Securitized Paper - Collateralized Debt Obligations (CDO) - Inverse Float and Perpetual Bonds - Municipal Bonds.

### Reading List:

1. Bhole, L. M. (2000): *Indian Financial System*, Chugh Publications. Allahabad.
2. Edminster, R. O. (1986): *Financial Institutions: Markets and Development*, Yale, London.
3. Goldsmith, R. W. (1969): *Financial Structure and Development*, Yale, London.

11. Pathak, Bharati V. (2014): *The Indian Financial System*, Pearson Education, New Delhi India.
12. Prasad, K.N.: *Development of India's Financial System*, Sarup & Sons, New Delhi.
13. Robinson, R. I. and D. Wrightman (1981): *Financial Markets*, McGraw Hill, London.
14. Smith, P.F. (1978): *Money and Financial Intermediation: The Theory and Structure of Financial System*, Prentice Hall, Englewood-Cliffs, New Jersey.
15. Vasant Desai. (2017): *The Indian Financial System and Development*, Himalaya Publishing House, Mumbai.

## **COURSE CODE: PG34T 305C: DEMOGRAPHY (Specialization /Optional)**

### **Course Outcome:**

- ❖ To understand meaning, nature, scope and importance of demography. Relationship between development and population growth.
- ❖ Understand various theories of population and their implications for India.
- ❖ To understand structure and characteristics of Indian population,
- ❖ To understand an analysis of Indian Population Policy

### **Module-I: Introduction**

**12-Hours**

Meaning, Nature and Scope of Demography; Population Theories- Pre- Malthusian, Malthusian and Post- Malthusian Theories; Theory of optimum Population; Theory of Demographic Transition.

### **Module-II: Fertility and Mortality**

**12-Hours**

Meaning and Measurement of Fertility, Factors Affecting Fertility in the Developed and Less Developed Countries; Mortality-Meaning and Measurement of Mortality- Factors Affecting Fertility in the Developed and Less Developed Countries; Infant Mortality- Meaning and Measurement of Infant Mortality and Factors Affecting Fertility in the Developed and Less Developed Countries.

### **Module-III: Migration and Urbanization**

**12-Hours**

Meaning and Importance of Migration in the Study of Population; Types and Causes of Migration – Levels, Trends and Differentials in the DCs and LDCs; Urbanization-Meaning, Process of urbanization, Reasons for Growing Urbanization and Impact of Urbanization.

### **Module-IV: Effects of In-migration and Out-migration**

**12-Hours**

Effect of In-migration and Out-migration on the Growth of Population- Factors Affecting Migration- Theories Concerning Internal Migration-Urbanization , Todaro Model: Distribution and Growth of Urban and Rural Population in DCs and LDs; Levels and Trends of Urbanization in DCs and LDCs and Particularly in India.

### **Module-V: Population Policies in India**

**12-Hours**

Population Policies and their Impact on Fertility in DCs and LDCs; Nature, Scope and Need for Population Education; Demographic Trends in India; Population of India from 1971 to 2011 Censuses; and Family Welfare Programmes in India; The New Population Policy of India.

### **Reading List:**

1. Agarwal, S. N.(2016): *India's Population Problems*, Tata McGraw Hill , Bombay.
2. Bhende, A. and Kanitkar T.: *Principles of Population Studies*, Himalaya Publication House , Mumbai.
3. Bogue , D.J. (1971): *Principles of Demography*, John Wiley , New York.
4. Bose, Ashish (1974): *Pattern of Population Change in India*, Vikas Publishing House, New Delhi.
5. Choubey, P. K. (2000): *Population Policy in India*, Kanishka Publication New Delhi.
6. Choubey, P.K. (2000): *Population Policy in India*, Kanishka Publication, New Delhi.
7. Ghosh, B.N.: *Population Economics*, Deep and Deep Publications, New Delhi.

8. Government of India: *Population Census Reports: 1951 to 2011*, Government of India.
9. Hans Raj: *Fundamentals of Demography*, Surjeet Publications , Delhi.
10. Kammeyar Kenneth (Ed.) (1975): *Population Studies*, Rand McNally, Chicago
11. Mishra, B. D.: *An Introduction to Study of Population*, South Asian Publishers, New Delhi.

## **COURSE CODE: PG34T 305D: ENVIRONMENTAL ECONOMICS**

### **Course Outcomes:**

- ❖ Understand the linkages between economic activities and environment;
- ❖ Analyse the nature of resource scarcity and develop mechanisms for optimum resource use;
- ❖ Measuring the impact of environmental degradation on India's economy, polity and people's health;
- ❖ Developing and applying tools for valuation of environmental damages; and
- ❖ Identifying the global environmental issues to understand India's role in contributing to achieving sustainable development.

### **Module-I: Elements of Economics of Environment**

Meaning, Nature and Scope of Environmental Economics; Elements of Ecology; Interaction between Ecological and Economic Systems; Environment-Development-Poverty Nexus; Sustainable Development-Concept and Operationalisation

### **Module-II: Economics of Natural Resource Use**

Resource Taxonomy; Economics of Exhaustible Resources- Scarcity Rents, Hotelling's Theory of Optimum Depletion and Recent Developments; Economics of Renewable Resources; Resource Scarcity as Limits to Growth; Pricing of Resources; Energy and Economic Development; Loss of Bio-diversity

### **Module-III: Environmental Regulation**

Market Failures - Externalities – Meaning and Types - Divergence between Social Cost and Private Cost - Market Failure – Internalization of Externalities - Pigouvian Solution - Coase's Theorem and Its Critique - Property Rights Collective Action —Public Goods and Externalities - Free Rider Problem – Tragedy of the Commons; Theory of Environmental Regulation- Command and Control Versus Market Based Instruments, Standards, Quotas, Tradable Permits;

### **Module-IV: Environmental Pollution and Management**

Extent, Causes and Consequences of Degradation of Land, Water, Forests and Air; Common Property Resources – Contributions and Management; Pollution Abatement; Climate Change-Extent, Impact, Adjustment and Mitigation; Issues in International Trade and Environment; People's participation in management of natural resources (water and trees); Environmental Regulation System in India- Design, Monitoring and Enforcement; Environmental Ethics

### **Module-V: Valuation of Environment**

Use values; Option values and non-use values; Valuation methods-Methods based on observed market behaviour; Hedonic property values and household production models (travel cost method and household health production function), Methods based on response to hypothetical markets, contingent valuation methods; Environmental Impact Assessment; Integrated Economic and Environmental Accounting.

### **Reading List:**

1. Barry C. Field, Martha K. Field. (2013): *Environmental Economics - An Introduction*, The McGraw-Hill Co., New York.
2. Baumol, W.J. and W.E. Oates (1998): *The Theory of Environmental Policy*, Cambridge University Press, Cambridge.
3. Bhattacharya, R. N. (Ed.) (2001): *Environmental Economics: An Indian Perspective*, Oxford University Press, New Delhi.
4. Chopra, Kanachan and C. H. Hanamantha Rao (2007): *Growth, Equity, Environment and Population*, Sage Publications, New Delhi.
5. Daly, H.E. (1999): *Ecological Economics and Ecology of Economics: Essay and Criticism*, Edward Elgar, Cheltenham, UK, Northampton, MA, USA.
6. Hanley, N., J. F. Shogren, White, B. (2001): *Introduction to Environmental Economics*, Oxford University Press, New Delhi.
7. Hanley, N., J. F. Shogren and B. White: *Environmental Economics*, Macmillan, New Delhi.
8. Hartwick, J. M and N. Olewiler (1986): *The Economics of Natural Resource Use*, Harper and Row Publishers, New York.
9. Karpagam, M. (2012): *Environmental Economics: An Introduction*, Sterling Publishers, New Delhi.
10. Kerr and Others (Eds.)(1997): *Natural Resource Economics: Theory and Applications for India*, Oxford University Press, New Delhi.
11. Rangarajan C. (1998): *Indian Economy: Essays on Money and Finance*, UBS, New Delhi.
12. Sen, R. K. and B. Chatterjee (2001): *Indian Economy: Agenda for 21<sup>st</sup> Century* (Essay in Honour of Prof.P.R.Brahmananda), Deep & Deep, New Delhi.
13. Sengupta, R. (2003): *Ecology and Economics*, Oxford University Press, New Delhi.
14. Shankar, U. (Ed.) (2001): *Environmental Economics*, (Readers in Economics) Oxford University Press.
15. Singh, Katar and Anil Shishodia (2007): *Environmental Economics; heory and Applications*, Sage Publications, New Delhi.
16. Sinha, Udai Prakash (2007): *Economics of Social Sector and Environment*, Concept Publishing Company, New Delhi.
17. Tietenberg, T, Lynne Lewis. (2016): *Environmental and Natural Resource Economics*, 10<sup>th</sup> Edition, Pearson Education House, London.
18. World Bank (1992): *World Development Report, 1992: Environment and Development*, Oxford University Press, New Delhi.

**COURSE CODE: PG34T 305E: THEORY OF CO-OPERATION (Specialisation/Optional paper) New Course**

**Course Outcomes:**

- ❖ Knowledge on cooperation helps to understand the theories, concepts, principles, social, economic and moral benefits and its value
- ❖ Understanding of theoretical and structural aspect of co-operative organisation. And create awareness how it differs from the capitalism, socialism and its place in planned economy is possible.
- ❖ It helps to understand the evolution of cooperative models and principles including Raiffeisen Model, Schulze-Delitzsch Model and Rochdale Model; Co-operation and other economic systems:
- ❖ The study of cooperation also helps to understand the cooperative doctrines of ancient, modern cooperation viz Utopian Co-operative doctrines -Robert Owen, Dr. William King and Charles Fourier -Socialistic Ideas and Co-operation G.D.H. Cole and Charles Guide-Fair Price Theory.
- ❖ It also helps understand the state level cooperation, state aid, advantages, its limitations, officials and non-officials in co-operative movement

**Module-I: Introduction**

**10 Hours**

Concept of Co-operation - Definition - Scope - Importance of Co-operation - Economic Benefits, Social Benefits, and Moral Benefits of Co-operation - Evolution of Co-operation - Principles of Co-operation - A Critical Evaluation of Co-operative Principles – Co-operative Values.

**Module-II: Structure of Co-operatives**

**14 Hours**

Theoretical and Structural Aspect of Co-operative Organisations - Small Size Vs Large Size, Limited vs Unlimited Liability, Federal vs Unitary Structure - Formal and Informal Co-operation; Co-operatives as an Organization- Co-operative Society as a Business Organization - Differentiation with other Forms of Organizations such as: Capitalism, and Socialism - Place of Co-operatives in a Planned Economy.

**Module-III: Evolution and Models of Co-operation**

**14 Hours**

Models of Co-operation - Evolution of Co-operative Principle - Rochdale Principles - ICA Principles-1937, 1966, 1995 - Raiffeisen Model - Schulze-Delitzsch Model and Rochdale Model; Co-operation and Other Economic Systems: Capitalism, Socialism and Mixed Economy, Co-operation versus Capitalism and Socialism.

**Module-IV: Contributions to Co-operatives**

**14 Hours**

Co-operative Doctrines - Ancient and Modern Form of Co-operation - Utopian Co-operative doctrines - Robert Owen, Dr. William King and Charles Fourier - Socialistic Ideas and Co-operation - Theory of Consumer Socialism, A Theory of Workers Control of Co-operatives - Contribution of G.D.H. Cole and Charles Guide-Fair Price Theory.

**Module-V: State and Co-operation**

**8 Hours**

Different forms of State aid - Advantages and Limitations of state aid - Officials and Non-officials in Co-operative Movement.

**Reading List:**

1. Ajit Kumar N.: *Co-operation*, Himalaya Publishing House, Mumbai,
2. Bedi, R. D. (1980): *Theory, History and Practice of Cooperation*, Loyal Book Depot, Meerut.
3. Hajela, T. N.(1994): *Co-operation: Principles, Problems and Practice*, Konark Publishers, New Delhi.
4. Krishnaswamy, O. R. and Kulandhiswamy V. (2000): *Co-operation: Concept and Theory*, Arudra Academy, Coimbatore, Tamil Nadu.
5. Mathur, B.S.(1994): *Co-operation in India*, Sahitya Bhawan, Agra.
6. Sharada, V. (1986): *Theory of Co-operation*, Himalaya Publishing House, Bombay.

**COURSE CODE: PG34T 305F: ECONOMICS OF INFRASTRUCTURE  
(Specialisation/Optional)**

**Course Outcomes**

- ❖ Students will understand basic **Economics** theories and models required for **infrastructure** sector understanding.
- ❖ Students will exhibit the ability to integrate technical, **economic**, social and regulatory frameworks for **Infrastructure** sector planning and resource management.
- ❖ Students will be able to demonstrate clear understanding of concepts Infrastructure economics and policy
- ❖ Able to apply this knowledge to the analysis of specific infrastructure economics issues in India

**Module-I: Introduction**

**12 Hours**

Meaning; Infrastructure and Economic Development; Infrastructure as a Public Good; Special Characteristics of Public Utilities – The Peak Load, Off-load Problem, Dual Principle Controversy, Economies of Scale, Pricing of Infrastructure Services; State's Role in Infrastructure Development – Rationale and Strategy.

**Module-II: Economic Infrastructure**

**14 Hours**

Concept and Significance; Role of Transport (Road, Air, and Marine), Communications, Irrigation, and Information in Development; Development of Economic Infrastructure in India; Sector Specific Problems – Problems of Individual Modes of Transport – Inter-modal Co-ordination; Financing and Pricing Problems

**Module-III: Energy Economics**

**10 Hours**

Primacy of Energy in the Process of Economic Development; Factors Determining Demand for Energy; Effects of Energy Shortages; Energy Conservation; Renewable and Non-conventional Sources of Energy; The Search for an Optimal Energy Policy in India.

**Module-IV: Social Infrastructure**

**10 Hours**

Concept and Significance; Social Infrastructure and Human Development; Development of Social Infrastructure in India; Financing and Pricing Problems; Sector-specific Problems – Housing, Education, Health, Drinking Water Supply and Sanitation.

**Module-V: Commercialization of Infrastructure**

**14 Hours**

Need for Commercialization; Strategies for Commercialization – Corporatization, Privatization; Public-Private Provision of Social services; Problems in Commercialization – Financing, Pricing, Risk Management, Users' Involvement; State's Role in Infrastructure Reforms.

**Reading List:**

1. Gowda, Sreenivasa, M.V. and S. Subramaniam (Eds.) (1997): *Infrastructure Development for Economic Growth*, Deep and Deep Publications, New Delhi.
2. Indian Council of Social Science Research (ICSSR) (1976): *Economics of Infrastructure*, Vol. VI, New Delhi

3. Joshi, B.N. (1990): *Infrastructure for Economic Development in India*, Ashish Publishing House, New Delhi.
4. Kessides Christine (1993): *The Contributions of Infrastructure to Economic Development: A Review of Experience and Policy Implications*, World Bank Discussion Paper No. 213.
5. National Council of Applied Economic Research (NCAER) (1996): *India Infrastructure Report: Policy Implications for Growth and Welfare*, New Delhi
6. World Bank (1994): *World Development Report, 1994: Infrastructure for Development*, Oxford Uni. Press, New York.
7. Parikh, K.S. (Ed) (1997): *India Development Report, 1997*, Oxford University Press, New Delhi.
8. Parikh, K.S. (Ed.) (1999): *India Development Report, 1999-2000*, Oxford University Press, New Delhi.
9. Pachauri, R.K. (Ed.) (1980): *Energy Policy for India*, Macmillan, New Delhi.
10. Guru, D.D. and A. Qamar (1988): *Energy and Economic Development*, Sage Publications, New Delhi
11. Tilak, J.B.G. (1994): *Education for Development of Asia*, Sage Publications, New Delhi.
12. World Bank (1983): *World Development Report, 1983: Investing in Health*, Oxford University Press, New York.

## **COURSE CODE: PG34T 306: KARNATAKA ECONOMY (Open Elective Course)**

### **Course Outcomes**

- ❖ The objective of this course is to teach the students about sectoral aspects of Karnataka economy.
- ❖ To make the students to understand historical and geographical features of Karnataka economy.
- ❖ To study in detail regional disparities and state finance.

### **Module-I: Introduction**

**10 Hours**

Karnataka in the Indian Economy; Natural Resources; trends in state per-capita income; Net District; Indicators of Economic Development; ; Indicators of Human Development.

### **Module-II: Agricultural Development**

**12 Hours**

Land Use Pattern in Karnataka-Trend in Area, Production, Major Crops- Regional Pattern of agriculture Production-Horticultural/Plantation Crop, Vegetables-Fruits-Floriculture-Sericulture-Live Stock Economy- Agricultural Marketing-Agricultural Finance- Agriculture Prices-Agrarian Crisis.

### **Module-III: Industrial Development**

**12 Hours**

Industrial Structure (Major, Medium and MSMEMS) - policies and programmes- Industrial Finance-Co-operatives commercial Banks-RRB's-KSFC, SIDRP and KSIIDC.

### **Module-IV: Infrastructure Development**

**12 Hours**

Present State of Development; Economic Infrastructure-Irrigation, Power, Transport and Communication; Social Infrastructure-Education and Health; Planning for Infrastructural Development.

### **Module-V: Regional Disparities and State Finance**

**14 Hours**

Position and Extent, Causes and Consequences; the causes for backward area; criteria for Identification of Backward areas; Measures to reduce imbalance; Trends in sources of Finance; Revenue and non Revenue sources; Sharing of Central Taxes and Grants-in-Aid; Trends in Expenditure Pattern Development or non-development; Trends in indebtedness of the state.

### **Reading List:**

1. Government of Karnataka (2005): *High Power*. Committee for Redressal of Regional Imbalances (HPCRR), Government of Karnataka, Bangalore
2. Government of Karnataka (2015): *Human Development: Performance of District, Taluks and Urban Local Bodies in Karnataka, 2014: A Snapshot*, Planning, Programme Monitoring and Statistics Department of Government of Karnataka, Bengaluru (<http://planning.kar.nic.in> – Human Development Division).
3. Government of Karnataka: *Economic Survey of Karnataka*, Government of Karnataka (Various Annual Reports) (<http://planning.kar.nic.in>)
4. Gowda, Sreenivasa and T. Nanjegowda: *Economic Development of Karnataka: Leading Aspects*.

5. Heggade, Odeyar D: *Karnataka Economy*:
6. Madaiah M. (1989): *Karnataka Economy: Growth, Issues and Lines of Development*, Himalaya Publishing House, Mumbai.
7. Madaiah, M. and R. Ramapriya (1989): *Karnataka Economy: Growth, Issues and Lines of Development*, Himalaya Publishing House, Delhi.
8. Puttaswamaiah, K, (1980): *Economic development of Karnataka: A Treatise in Continuity and Change*, Oxford and IBH Publication.
9. Rao, Hemalatha (1984): *Regional Disparities and Development in India*, Ashish Publishing House, New Delhi.

## **M.A. ECONOMICS**

### **IV SEMESTER**

#### **COURSE CODE: PG34T 401: INDIAN PUBLIC FINANCE**

##### **Course Outcomes**

- ❖ This course aims to enable the students to understand various aspects of Indian public finance and policy which include the trends and patterns of public revenue in India, public expenditure, budget and fiscal policy, public debt and its management.
- ❖ It also aims at understanding the federal finance, center-state financial relations and transfers, state and local finances.
- ❖ At the end of the course, the students will be able to understand various forms of budget and preparation of budget and public policies for effective provision and management of Indian public assets, goods and services.

##### **Module-I: Public Revenue**

**14 Hours**

Sources of Revenue-Tax and Non-Tax Revenue; Trends and Patterns of Tax Revenue– Direct and Indirect Taxes; Direct Tax Code; Indirect Taxes – Goods and Services Tax (GST)- Objectives, Classification of GST, Tax Rates, Trends and Patterns of GST and Impact of GST on Indian Economy; Tax Reforms in India-Review of Earlier Committees and Evaluation of Kelkar and Chellaiah Committees; Agricultural Taxation- Importance of Agricultural Taxation - Present Position of Agricultural Taxation - Burden of Agricultural Taxation in India and Proposals – K. N. Raj Committee Report 1972.

##### **Module-II: Public Expenditure and Debt**

**14 Hours**

Structure and Trends in Public Expenditure of Central and State Governments, Causes for Increase in Public Expenditure; Expenditure Control and Accountability – Fiscal Responsibility and Budget Management (FRBM) Act; Issues in Public Expenditure- Equity, Efficiency, Welfare and Social Security; Impact of Public Expenditure on Indian Economy; Recommendations of Expenditure Reforms Commission (ERC) in India.

Sources of Public Debt - Internal and External - Burden of Public Debt- Public Borrowings and Crowding out of Private Investment; Trends, Structure and Redemption of Public Debt in India.

##### **Module III: Budget and Fiscal Policy**

**14 Hours**

Classification of Budgets and Budget Preparation - Budgetary Deficits: Concepts, Significance and Estimation; Deficit Financing – Methods and Implications; Government Accounting – Techniques of Budgetary Control; Analysis of Current Budget; Fiscal Policy – Objectives, Techniques and Targets of Fiscal Policy, Interdependence between Fiscal and Monetary Policies, Fiscal Policy and Stabilisation; Automatic and Discretionary Stabilisation- Long term Fiscal Policy.

##### **Module-IV: Fiscal Federalism**

**10 Hours**

Principles of Federal Finance- Fiscal Federalism in India- Assignment of Functions and Sources of Revenue – Constitutional Provisions; Finance Commissions and Devolution of Resources- Grants –in-aid- Resource Transfer from Union to States and Local Bodies-

Criteria for Transfer of Resources; Centre – State Financial Relations in India – Problems of States Resources and Indebtedness.

**Module-V: State and Local Finances**

**8 Hours**

State Finance-Introduction, Source of State Finance- Revenue and Capital Account; Financial Trends and Fiscal Consolidation; Local Finance- Introduction, Multi-level Governance-Local Bodies and their Functions - Finances of Local Bodies - Local Taxation, Criteria for Resource allocation to the local bodies-14<sup>th</sup> Finance Commission Recommendations.

**Reading List:**

1. Annigeri, V. B., R. S. Deshpande and Ravindra Dholakia (Eds.) (2018): Issues in Indian Public Policy, Springer, Singapore.
2. Bagchi A. (2005) : *Readings in Public Finance*, Cambridge University Press, New Delhi
3. Bhatia, H. L. (2015): *Public Finance*, Vikas Publishing House Pvt. Ltd., New Delhi.
4. Chand, S. N. (2013): *Public Finance*, Atlantic Publishers and Distributors (P) Ltd., New Delhi.
5. Government of India: *Annual Budget Reports*, Ministry of Finance, New Delhi.
6. Jha, Rajesh K. (2012): *Public Finance*, Pearson Education House Ltd., Delhi.
7. Lekhi, R.K. and Joginder Singh (2015): *Public Finance*, Kalyani Publishers, New Delhi.
8. Malhotra, Rajeev (2014): *India Public Policy Report 2014*, Oxford University Press, New Delhi.
9. Om Prakash (2016): *Public Economics: Theory and Practice*, Vishal Publishing Co. Jalandhar-Delhi.
10. Rao, Govind (2010): *Public Finance: Theory and Practice Essay in Honour of A.Bagchi*, Sage Publications, New Delhi.
11. Ray, Partha (2013): *Monetary Policy*, Oxford University Press, New Delhi.
12. Singh, S.K. (2015): *Public Economics: Theory and Practice* S. Chand and Co., New Delhi.
13. Tyagi B.P. and H. P. Singh (2016): *Public Finance*, Jayaprakashnath and Company, Meerut, India.

## **COURSE CODE: PG34T 402: INTERNATIONAL TRADE AND FINANCE – II**

### **Course Outcomes**

- ❖ Deep understanding about multilateral trading systems, international financial transactions and financial institutions
- ❖ Familiarize the students about theories on International capital flow and their empirical testing
- ❖ Deep understanding about multilateral trade body's (GATT and WTO), principles, objectives, agreements, trade negotiations, trade dispute settlements, present status and prospects
- ❖ Familiarize the students about international financial transactions: Balance of payment, exchange rate theories and determination
- ❖ Working of International financial institutions such as IMF, World Bank, and Regional financial institutions

### **Module-I: Globalization, WTO and the Developing Countries**

**12-Hours**

**World Trade Organization-** General Agreements on Tariffs and Trade (GATT) to World Trade Organization (WTO); Objectives and Functions; Trade Related Intellectual Properties (TRIPs); - Trade Related Investment Measures (TRIMs); General Agreements on Trade in Services (GATS); Trade and Environment; Doha Development Rounds- Recent Developments in WTO, Future of WTO; Regionalism vs Multilateralism; Developing Countries in the Globalization era; TRIPS and GATS; India's foreign trade before and during the WTO regime; Trade Reforms in India; competitiveness of Indian industries.

### **Module-II: Balance of Payments**

**16-Hours**

Balance of Payments Accounting- Equilibrium and Disequilibrium in the Balance of Payments (BOP); Adjustment Mechanism of BOP- Traditional, The Elasticity Approach, Marshall-Lerner Condition, Absorption and Monetary approaches for adjustment in Balance of Payments; Mundell-Fleming Model; Causes for Disequilibrium; Removal of Disequilibrium; Foreign trade multiplier; Monetary and Fiscal Intervention; Devaluation and BOP Crisis- Capital Flight.

#### ***India's BOP and exchange Rate policies in the 1990s***

BOP crisis and reserves position in the early 1990s; Devaluation; LERMS/partial convertibility; managed float of Rupee-Dollar rate.

### **Module-III: Foreign Exchange Markets and Exchange Rates**

**12-Hours**

Introduction-Functions of the Foreign Exchange Markets; Foreign Exchange Rates; Equilibrium Foreign Exchange Rates; Arbitrage; The Exchange Rate and the Balance of Payments.

Spot and Forward Rates, Currency Swaps, Futures, and Options- Foreign Exchange Risks, Hedging, and Speculation; Interest Arbitrage and the Efficiency of Foreign Exchange Markets; Eurocurrency or Offshore Financial Markets. Exchange Rate Determination; Mint

Parity Theory and Purchasing Power Parity; Other Forms of Exchange Rate Arrangements Today - Fixed or Floating Exchange Rates; Objectives and Methods of Exchange control

**Module IV: The International Monetary System: Past, Present, and Future 10-Hours**

The Gold Standard and the Interwar Experience-The Bretton Woods System; The Gold-Exchange Standard; Borrowing from the International Monetary Fund; Operation of the Bretton Woods System; Evolution of the Bretton Woods System; U.S. Balance-of-Payments Deficits and Collapse of the Bretton Woods System-

***The International Monetary System: Present and Future***

Operation of the Present System; Current IMF Operation; Problems with Present Exchange Rate Arrangements; Proposals for Reforming Present Exchange Rate Arrangements; Financial Crises in Emerging Market Economies; Other Current International Economic Problems.

**Module-V:International Resource Movements & Multinational Corporations 10-Hours**

Introduction; International Capital Flows; Conceptual framework—Types, The theory of transnational corporations and foreign direct investment; The investment development path and the emergence of TNCs from developing and transition economies; Application of the theory to TNCs from developing and transition economies; Competitive advantages, drivers and motives; Sources of competitive advantages; Drivers to internationalization; Home country drivers (push factors); Host country drivers (pull factors);Empirical evidence on drivers (push and pull).

Motives and Welfare Effects of International Capital Flows; Multinational Corporations – Effects on the Investing and Host Countries; Labour Migration - Motives and Effects of International Labour Migration.

**Reading List:**

1. Carbough, R.J. (2017): *International Economics*, (16<sup>th</sup> Edition) International Thompson Publishing, New York.
2. Dana, M.S. (2017): *International Economics: Study, Guide and Workbook*, (5<sup>th</sup> edition), Rutledge Publishers, London.
3. Gita Gopinatha, Elhanan, Helpman Kenneth and Regoff (2014): *Handbook of International Economics*, Elsevier Publications
4. Jackson, J. (1998): *The World Trading System*, Cambridge University Mass Press,
5. Jagdish, N. Bhagwati (1983): *Dependence and Interdependence* (Ed.) by Gane Grossman, Vol.2, Basil Blackwell, Oxford.
6. Kenen, P.B. (2000): *The International Economy*, (4<sup>th</sup> Edition) Cambridge University Press, London.
7. Kindleberger, C.P. (1978): *International Economics*, (6<sup>th</sup> Edition) R.D.Irwin Homewood.
8. Krugman, P.R. and M. Obstfield (2012): *International Economics: Theory and Policy*, (9<sup>th</sup> Edition) Addison-Wesley Publications.
9. Metzler: *Readings in International Economic*, American Economic Series.
10. Salvatore, D. (2014): *International Economics*, (11<sup>th</sup> Edition), MacMillan Publication.
11. Soderstein, B. (1993): *International Economics*, MacMillan, London.
12. Soderstein, B. and Reed, Geoffrey (1994): *International Economics*, (3<sup>rd</sup> Edition) MacMillan, London.

13. Vaish, M. C. and Sudama Singh (2010): *International Economics*, (8<sup>th</sup> Edition), Oxford and IBH Publication, New Delhi.
14. World Investment Report (2006): *FDI from Developing and Transition Economies: Implications for Development*, UNCATD Publication ([www.unctad.org/en/docs/wir2006\\_en.pdf](http://www.unctad.org/en/docs/wir2006_en.pdf).)

## **COURSE CODE: PG34T 404: APPLIED ECONOMETRICS**

### **Course Outcomes**

- ❖ This course aims at understanding the procedures useful in modeling and forecasting time series data.
- ❖ It also aims at familiarizing the students with recent advances in time series analysis that have affected the developments of the theory of dynamic econometrics.
- ❖ This is a course for applied econometrics deal with advanced models forecasting in different complex situations.
- ❖ Demonstrate the knowledge of applications of vector auto-regressions and models for volatility, panel data models in Economics

### **Module-I: Regression with Qualitative Dependent Variable**

**10 Hours**

Nature of Qualitative Variables - Linear Probability Model– advantages and disadvantages of LPM; its Types – Logit, Probit, and Tobit Model for Grouped and Ungrouped Data - Their Application in Economics.

### **Module-II: Forecasting and Univariate Time Series Models**

**16 Hours**

Introduction - Types of Forecasting Methods-Qualitative and Quantitative Methods; Measuring the Accuracy of Forecasting Models- Statistical methods- the Naïve Forecast-Simple Moving Average Forecast- Trend Forecast; Graphical Methods of Forecasting Accuracy.

*Univariate Time Series Models:* MA Model- Definition, Properties, Identification, Estimation and Forecasting; AR Model- Definition, Properties, Estimation and Forecasting; Mixed Auto Regressive Moving Average Models (ARMA) – Definition, Properties, Parameters, Estimation and Forecasting; ARIMA models.

### **Module-III: Vector Auto-Regressions and Models for Volatility**

**12 Hours**

Introduction - Stationary and Non-Stationary Stochastic Process; Testing of Unit Root; Co-integration

- Tests for Co-integration - Engel-Granger Test - Johansen Test; ECM; VAR and Causality, Some Problems with VAR Modeling; Measuring Volatility – The ARCH (p) Model and GARCH (p, q) Model - Their Application in Economics.

### **Module-IV: Panel Data Models**

**12 Hours**

Why Panel Data? - Estimation - Fixed Effects Method - All Coefficient Constant across Time and Individuals - Slope Coefficients Constant but Intercept Varies across Individuals - Slope Coefficients Constant but Intercept Varies Over Individuals as Well as Time - All Coefficients Vary across Individuals - Random Effects Method - Fixed Effects v/s Random Effects Model - Hausman Test - Their Application in Economics.

### **Module-V: Econometric Applications in Economics**

**10 Hours**

Engle Curves - Demand curves, and Complete demand systems: With linear expenditure system as an example - Production functions - Cobb-Douglas, Leontief, CES, VES and their proprieties - Technical change - Cost functions and duality - Income distributions (lognormal and pareto) - Measures of inequality, and Poverty studies - Macro consumption and savings function - Permanent and relative income hypotheses - Investment function - Accelerator and distributed-lag models - Neoclassical models - Endogeneity and dynamic models.

**Reading List:**

1. Badi H. Baltagi (2005): *Econometric Analysis of Panel Data*, 4<sup>th</sup> Edition, John Wiley & Sons, Ltd.
2. Desai, Meghnad (1976): *Applied Econometrics*, McGraw Hill Publishing Company Ltd., New York
3. Dominick Salvatore and Derrick Reagle (2002): *Statistics and Econometrics: Theory and Problems*, Second Edition, Schaum's Outline Series, McGraw-Hill, New Delhi.
4. Gujarati, Damodar N., Dawn C. Porter and Sangeetha Gunasekar (2017): *Basic Econometrics*, (5<sup>th</sup> Edition) Tata McGraw Hill Bombay.
5. Gujarati, D.N. (2011): *Econometrics by Example*, Palgrave Macmillan Pvt. Ltd.
6. Harvey, A. C. (2000): *Econometric Analysis of Time Series*, Phillip Allen, London.
7. Intriligator, M. D. (1978): *Econometric Models, Techniques and Applications*, Englewood Cliffs, N.J., Prentice-Hall, North-Holland.
8. Kerry Patterson (2000): *An Introduction to Applied Econometrics a Time series Approach*, Palgrave Macmillam Pvt. Ltd.
9. Koutsoyiannis, A. (2000): *Theory of Econometrics*, MaC Millan Publication, London.
10. Maddala, G.S. (2000): *Econometrics Methods and Applications*, Aldershot, U.K.
11. Patricia, E Gaynor and R.C. Kirkpatric (1994): *Introduction to Time Series Modelling and Forecasting in Business and Economics*, McGraw Hill, New Delhi.
12. Robert S. Pindyck and Daniel L. Rubinfeld, (2000): *Econometric Models and Economic Forecasts*, McGraw Hill- Kogach Usha Tokyo.
13. Sufi M. Nazem (1988): *Applied Time Series Analysis for Business and Economic Forecasting*, Marcell Dekker, Inc New York
14. Enders, Walter (2010): *Applied Econometric Times Series*, John Wiley & Sons, Ltd.
15. Wooldridge, J.M. (2000): *Introductory Econometrics: A Modern Approach*, South western College Publications.

## **COURSE CODE: PG34T 405: MANAGERIAL ECONOMICS (New Course)**

### **Course Outcomes:**

- ❖ To estimate and forecast demand for a firm
- ❖ To design strategies for achieving production maximization and cost minimization
- ❖ Analyse production and pricing decision of a firm under different markets conditions

### **Module-I: Introduction to Managerial Economics**

**8 Hours**

Meaning, Nature and Scope; Relationship of Managerial Economics to Economic Theory as well as Decision Science; Organization of Business Firms - Concepts and Types of Business Organization, Proprietorship, Partnership, Joint Stock Company, Corporation, Co-operatives. Objectives of Firms; Case Study Method: Analyze a Case and Usefulness of Case Study.

### **Module-II: Demand Estimation and Forecasting**

**12 Hours**

Identification Problem - Marketing Research Approaches - Regression Analysis - Problems in Regression Analysis - Demand Estimation; Demand Forecasting: Time Series Analysis - Smoothing Techniques - Barometric Methods - Econometric Models.

### **Module-III: Optimization Technique: Linear Programming**

**12 Hours**

Problems of Optimization - Linear programming for Optimization -Meaning, Assumptions and Applications of Linear Programming - Basic Linear Programming Concepts - Procedure used in Formulating and Solving Linear Programming Problem - Linear Programming and Profit Maximization - Linear Programming and Cost Minimization - Graphical Solution and Simplex Method - Dual Problem and Shadow Prices - Linear Programming and Logistics in the Global Economy - Game Theory and Optimization Technique in Decision Making Process.

### **Module -IV: Pricing Practices and Strategies and Profit Analysis**

**16 Hours**

*Pricing Practices:* Specific Pricing Problems - Popular Pricing Practices: Cost-Oriented Pricing, Cost-Plus Pricing and Other Price Determinants, Peak - Load Pricing, Price over the Life Cycle of the Product, Penetration Price - Pricing of Multiple Products - Price Discrimination - International Price Discrimination and Dumping - Transfer Pricing.

*Profit Analysis:* Nature and Function of Profits: Business versus Economic Profit - Theories of Profit: Residual Claimant Theory, Wage Fund Theory, Dynamic Surplus Theory, Innovation Theory - Profit Policy - Break- Even Analysis and Profit Measurement, Profit Forecasting.

### **Module -V: Capital Budgeting**

**12 Hours**

Meaning and Importance - Capital Budgeting Process. Capital Budgeting Decisions - Factors Influencing in Investment Decision - Methods used for Investment Decisions: Cost-Benefit Analysis, Steps for Capital Project Evaluation, Techniques for Investment Appraisal - Sources of Fund for Long-Term Financing - Measurement of Cost.

**Reading List:**

1. Keat Paul G. and Philip K.Y. Young, *Managerial Economics- Economic Tools for Today's Decision Makers*, Prentice Hall, New Jersey.
2. Mc Guigon R. James, R. Charles Moyer, Frederick H Deb, Harris (2002), *Managerial Economics: Applications, Strategy and Tactics*, South Western, USA
3. Mehta P.L., *Managerial Economics: Analysis, Problems and Cases*, Sultan Chand and Sons, New Delhi.
4. Petersen H. Craig and W. Cris Lewis, *Managerial Economics*, Maxwell Macmillan International Editions, New York.
5. Salvatore Dominick, *Managerial Economics in a Global Economy*, McGraw Hill Inc., New York.
6. Samuelson William F, and Stephen G. Marks, *Managerial Economics*, John Wiley and Sons, Inc., New Jersey.
7. Shankaran S. *Managerial Economics*, Margham Publications, Madras.
8. Thomas Christopher R. and Charles Maurice S., *Managerial Economics*, McGraw-Hill Irwin, Boston.

**COURSE CODE: PG34T 406A: INSTITUTIONS FOR RURAL DEVELOPMENT  
(Specialization /Optional paper)**

**Course Outcomes:**

- ❖ The objectives of this course are to familiarize the students with local institutions involved in mobilization of the weaker sections of the society and motivating to take pro-active role in rural development, to understand the institutions involved in provision of credit and agricultural marketing facilities for rural development, co-operative societies, participatory rural development institutions and micro-leveling planning.
- ❖ At the end of the course, it will enable the students to understand various aspects of rural development and build their institutional capabilities to commit themselves for development of rural areas by providing necessary inputs

**Module-I: Introduction to Institutions**

**10 Hours**

Institutions- Meaning, Importance and Classification - Class and Caste, Marriage, Family; Rural Credit Institutions; Rural Markets; Co-operatives; Panchayat Raj Institutions; Non-Government Organisations, Self-Help Groups, Resource Users' Association, Rural Leadership, Land Reforms.

**Module-II: Rural Credit Institutions**

**10 Hours**

Non-institutional Credit Lending Agencies and Institutional Credit Lending Agencies- Credit Co-operative Societies (PACs and PCARDBs/PLDBs); Commercial Banks; Regional Rural Banks; Apex Institutions-RBI and NABARD; Impact of Financial Sector Reforms on Rural Credit Delivery System.

**Module-III: Agricultural Marketing**

**12 Hours**

Agricultural Marketing-Meaning, Types and Defects and Government Measures for Removal of Defects; Co-operative Marketing Societies-Meaning, Structure, Importance, Progress, Problems and Remedial Measures; Regulated Markets- Meaning, Functions/Importance, Progress, Defects and Remedial Measures; Forward Marketing-Meaning, Importance, Progress and Prospects.

**Module-IV: Co-operative Societies**

**14 Hours**

Co-operative Movement in India- Historical Perspective, Structure, Principles and Role of Co-operatives in Economic Development; Co-operative Farming- Meaning, Importance, Forms, Progress and Problems and Remedial Measures; Co-operative Processing- Meaning, Structure, Importance, Progress, Defects and Remedial Measures.

**Module-V: Participatory Institutions and Micro Level Planning**

**14 Hours**

Peoples' Participation and Panchayat Raj Institutions (PRIs)- Structure, Functions, Resources, Performance, Problems and Remedial Measures; Non-Government Organizations (NGOs)-Meaning and Topology of NGOs, Importance of NGOs; Problems of NGOs and Remedial Measures; Micro-level Planning and Peoples' Participation.

### Reading List:

1. **Bhose, Joel S. G. R. (2003): NGOs and Rural Development, Concept Publishing Company New Delhi**
2. Cheshire, Lynda, V. Higgins and G. Lwarence (2012): *Rural Governance: International Perspectives*, Routledge, New York.
3. Crowell, Daniel W. (2005): *The SEWA Movement and Rural Development*, Sage Publications, New Delhi.
4. Das, Purnendu Sekhar (Ed.) (2005): *Decentralized Planning and Participatory Rural Development*, Concept Publishing Company, New Delhi.
5. **Hajela, T. N. (1969): Principles, Problems and Practice of Co-operation, Lalwani, Bombay.**
6. **Mathur, B. S (1999): Co-operation in India, Sahitya Bhawan Publishers and Distributors (P). Ltd, Agra.**
7. Misra, R. P. and R. N. Achyutha (1998): *Micro-Level Rural Planning: Principle, Methods and Case Studies*, Concept Publishing Company, New Delhi.
8. Palanithurai, G. P. (1999): *New Panchayati Raj System at Work: An Evaluation*, Concept Publishing Company New Delhi.
9. Rajasekhar, D. (2004): *Poverty Alleviation Strategies of NGOs*, Concept Publishing Company, New Delhi.
10. Rajasekhar, D. (Ed) (1999): *Decentralized Governance and NGOs: Issues, Strategies and Ways Forward*, Concept Publishing Company New Delhi.
11. Rajasekhar, D. and R. R. Biradar (2004): *Reluctant Partners Coming together: Interface Between People, Government and the NGOs*, Concept Publishing Company, New Delhi.
12. Singh, Katar (1986): *Rural Development: Principles, Policies and Management*, Sage Publications, New Delhi.
13. Singh, Nagendra P. (Ed.) (1982): *Role of Financial Institutions in Rural Entrepreneurship and Development*, MDI Publication, New Delhi.
14. Singh, R. (1990): *Panchayat Raj and Rural Organizations*, Chuagh Publications, Allahabad.
15. Sinha, S. K. (1998): *Rural Credit and Co-operatives in India*, Suneja Publishers, New Delhi.
16. Sreenivasa, Gowda, M. V. and Susheela Subrahmanya (1997): *Infrastructure Development for Economic Growth*, Deep and Deep, New Delhi.

## **COURSE CODE: PG34T 406B: FINANCIAL INSTITUTIONS AND MARKETS-II**

### **Course Outcome:**

- ❖ It provides a path to follow research in general area of economics and business.
- ❖ Students will be understanding the Indian financial system, Non-Bank Financial Institutions, Insurance, Investment Banking, Merchant Banking, Mutual Funds Insurance, Foreign Exchange Market and Financial Sector Reforms.
- ❖ Students would gain understanding of primarily about estimation and hypothesis testing. What is different and generally much more interesting and useful is that parameter being estimated and tested.
- ❖ To familiarise the students fully with the changing role of financial institutions in the process of economic growth and development in India.

### **Module-I: Financial Systems in India**

**10 Hours**

Financial System: Significance and Definition - Purpose and Organization. Financial System and Economic Development; Financial Intermediation and Economic Development in India

### **Module-II: Non-Bank Financial Institutions (NBFIs)**

**14 Hours**

The Fundamental aspects of NBFIs - New Theory of Finance - Role and Significance of NBFIs and Monetary Theory in Developed Countries and Developing Countries - The Structure and Growth of NBFIs in India - Financial Sector Reforms - Liberalization Measures for NBFIs (1996) - Limits on Acceptance of Deposits - Size of NBFIs - Distribution of Deposits - Capital Issues of Finance Companies - assets of NBFIs - Investment Norms for NBFIs - Deployment of Funds-Leasing Companies.

### **Module-III: Insurance, Investment Banking, Merchant Banking & Mutual Funds 16 Hours**

**Insurance:** Growth and Structure of Insurance Companies - Life Insurance Corporation and its Progress - General Insurance Companies and their Functions - Reforms in the Insurance Sector

**Investment banking:** Investment Banks- Introduction, Functions, Types - Investment Banking Services and Commercial Banks - Their Activities.

**Merchant Banking:** Introduction - Banking Commission Report (1972) - Merchant Banking in India - Regulations of Merchant Banking - Prospects - General Obligations and Responsibilities.

**Mutual Funds:** Introduction - Mutual Funds in India - Types of Mutual Funds

- Return from Mutual Funds - SEBI's Directives - Private Mutual Funds - Asset Management Company - Unit Trust of India - Evaluation of the Performance of Mutual Funds - Components of investment Performance - Market Timing-Money Market Mutual Funds - RBI Guidelines.

### **Module-IV: Foreign Exchange Market**

**10 Hours**

Market Regimes and Rates-Trading in foreign Exchange Markets - Speculation - Foreign Exchange Rates - Market Makers - Liberalized Exchange Rate Management System, 1992 - Capital Account Convertibility - Relationship between Exchange and Money Markets -

Foreign Exchange Market foreign Currency Accounts - Currency Arbitrage - Hedging with Options.

**Module - V: Financial Sector Reforms**

**10 Hours**

Regulation of Non-Bank Financial Intermediaries and the RBI - Need for Comprehensive Monetary Policy - RBI and Financial Sectors Reforms.

**Reading List:**

1. Bhole, L.M. (1999): *Financial Institutions and Markets*, Tata McGraw Hill Company Ltd., New Delhi.
2. Bhole, L. M. (2000): *Indian Financial System*, Chugh Publications. Allahabad.
3. Khan, M. Y. (2009): *Indian Financial System*, Tata McGraw-Hill Education, New Delhi.
4. Machiraju, H.R. (2019): *Indian Financial System*, Fifth Edition, Vikas Publishing House Pvt. Ltd., New Delhi.
5. Madaiah, M. (1971): *Financial Intermediaries, Monetary Policy and Economic Development*, Prasara, Mysore.
6. Nirmala, Prasad and Chandradass J. (2016): *Banking and Financial System*, Himalaya Publishing House, Mumbai.
7. Parameswaran, R. and Natarajan S. (2013): *Indian Banking*, S. Chand and Co, New Delhi.
8. Pathak, Bharati V. (2011): *The Indian Financial System: Markets, Institutions and Services*, Pearson Education, New Delhi, India.
9. Reserve Bank of India: *Report on Currency and Finance* (latest edition).
10. Reserve Bank of India: *Trends and Progress of Banking in India* (latest edition), Mumbai.
11. Varshney and Sundaram (2014): *Banking Theory, Law and Practice*, Sultan Chand and Sons, New Delhi.
12. Vasant, Desai (2017): *The Indian Financial System and Development*, Himalaya Publishing House, Mumbai.

**COURSE CODE: PG34T 406C: HUMAN RESOURCE MANAGEMENT  
(Specialisation/Optional paper)**

**Course Outcome:**

- ❖ This course enables the students to understand thoroughly the theories of Human Resource Management and familiarize the students about the vital aspects of Human Resource Management-scope and its importance of HRM, economic and non-economic factors and their interactions, distinction between human resource and non-human resource, functions of HRM; planning, recruitment and selection. At the end of the course, it will enable the students to ensure efficient and effective human resource management.

**Module-I: Introduction**

**12-Hours**

Concept Of HRM- Meaning, Objectives, Scope And Its Importance; Economic And Non-Economic Factors And Their Interactions, Distinction Between Human Resource And Non-Human Resource

**Module-II: Functions Of HRM**

**12-Hours**

Functions of HRM; Planning, Recruitment And Selection, Training And Development, Compensation, Welfare And Industrial Relation Functions

**Module-III: Human Resource Planning**

**12-Hours**

Human Resource Planning (Hrp): Definition, Need And Process Of Hrp, Responsibility For Hrp, Job – Analysis And Its Components.

**Module-IV: Appraisal**

**12-Hours**

Performance Appraisal: Need And Significance- Setting Employees Performance, Objectives And Goals; Creating Organizational Conditions For Improving Employee Performance.

**Module-V: Management**

**12-Hours**

Emotional Intelligence IQ V/S EQ Creativity and Its Role In Management – Building Positive Attitude-Time Management And Stress Management

**Reading List:**

1. Aswathappa, K. (2000): *Human Resource And Personal Management*, Tata Mc Graw Hill, New Delhi.
2. Daniel, Goleman (2009): *Emotional Intelligence*, Bloomsbury Publishing, London.
3. David, Fortana (1991): *Stress Management*, Willey.
4. Holloway, J. (2000): *Performance Measurement And Evaluation*, Sage Publications, New Delhi.
5. Jim Mathewinan (2000): *Human Resource Planning*, Jaico Publish House, Bangalore. *Profits*, 8th Edition, McGraw-Hill/Irwin, Boston
6. Shankar, Digambar Bagade (2000): *Time Management*, Himalaya Publishing House, New Delhi.
7. Wayne, F. Cascio (2010): *Managing Human Resources: Productivity, Quality Of Work Life*,

**COURSE CODE: PG34T 406D: ENVIRONMENTAL HAZARDS AND DISASTER MANAGEMENT (NEW COURSE)**

**Course Outcomes:**

- ❖ To study the present conditions of ecological imbalance.
- ❖ To understand the causes and consequences of climate change
- ❖ To analyze the reasons for Environmental Hazards and Disasters.
- ❖ To evaluate policies towards mitigating climate change and other environmental hazards

**Module-I: Environmental Hazards**

Introduction - Changing Perspectives -Pre-1950, 1950-1999 and 2000 onwards - Paradigms of Hazard - The Dominant (Behavioural) Paradigm - The Radical (Structuralist) Paradigm - What are the Environmental Hazards - Natural Hazards - Technical Hazards -Tectonic Hazards: Volcanic Hazards - Biophysical Hazards: Thermal Extremes, Disease Epidemics and Wildfires - Hydrological Hazards - Floods - Droughts - Technological Hazards - The Growth of Industrial Hazards

**Module-II: Environmental Disasters**

Hazard, Risk and Disaster - Human Vulnerability to Disaster - Dimensions of Disaster - Disaster Reporting - Disaster Impact Assessment - Disaster Patterns - Reasons for Increasing - Disaster Impact

*Floods:* Types of Flood - River Floods - Coastal Floods - Causes of Floods - Beneficent Effects of Floods - Negative Effects of Flood.

*Drought and Desertification:* Concepts and Causes - Indicators - Impacts of Drought and Desertification - Importance of Remote Sensing in Desertification Control.

*Fire:* Causes and Consequences - Loss of Forest and Biodiversity.

*Acid Rain:* Causes, Effects, Prevention of Acid Rain - Individuals Efforts and Government Actions towards Control of Acid Rain.

**Module-III: Reducing the Impacts of Disasters**

Cost of Disasters - The Range of Options - Mitigation - Disaster Aid - Internal Government Aid - International Aid - Mitigation - Insurance - Government Insurance - Protection - Hazard Resistance - Macro-Protection - Micro-Protection - Adaptation - Preparedness - Adaptation - Land Use Planning

**Module-IV: International Environmental Concerns**

Pollution as a Global Problem - Greenhouse Effect - Ozone Depletion - Global Warming and Threat to Biodiversity - International Action for Environmental Protection - Helsinki Protocol (1985) and Montreal Protocol (1987) - Earth Summit (1992) - International Financing of Environmental Protection - Debt for Nature Swaps - Trade and Environment - Sustainability in Ecology - Sustainability in Ecological Economics.

**Module-V: Environmental Issues and Regulation in India**

The status of Air pollution - Water Pollution - Land Degradation - Causes and Effects of Environmental Degradation - Urban and Rural Environmental Problems - Evolution of Environmental Policy –Environmental Protection Act, 1986 - Fiscal Incentives - Enforcement and Implementation Issues - Pollution Control Board -National Disaster Management Authority (India).

### Reading List:

1. Baumol, W.J. and W. E. Oates (1998): *The Theory of Environmental Policy*, Cambridge University Press, Cambridge Canter, L.W., Environmental Impact Assessment, McGraw Hill, New York.
2. Cutter, S. L. (1999): *Environmental Risk and Hazards*, Prentice-Hall of India Pvt. Ltd., New Delhi.
3. Dixon, J. (1994): *Economic Analysis of Environmental Impacts*, Earth Scan Publications, London.
4. Freeman, III, A M. (2003): *The Economic Approach to Environmental Policy*, Edward Elgar, U K.
5. Jempa, C. and Munasinghe M. (1998): *Climate Change Policy: Facts, Issues and Analyses*, Cambridge University Press, Cambridge.
6. Kolluru Rao, Bartell Steven, Pitblado R. and Stricoff (1996): *Risk Assessment and Management Handbook*, McGraw Hill Inc., New York.
7. Lawrence, D. P. (2003): *Environmental Impact Assessment – Practical solutions to Recurrent Problems*, Wiley-Interscience, New Jersey.
8. Mehta S, Mundle S. and Sankar U. (1993): *Incentives and Regulation for Pollution Control*, Sage Publications, New Delhi
9. Michael, Common and Sigrid Stagl (2005): *Ecological Economics: An Introduction*, Cambridge University Press, Cambridge.
10. Raghavan, K. V. and A. A. Khan (1990): *Methodologies in Hazard Identification and Risk Assessment*, Manual by CLRI.
11. Sam Mannan, Lees (2012): *Loss Prevention in the Process Industries, Hazard Identification, Assessment and Control*, 4<sup>th</sup> Edition, Butterworth Heineman.
12. Shankar, U, (ed.) (2001): *Environmental Economics* (Readers in Economics) Oxford University Press
13. United Nations: *Accounting and Valuation of Environment*, Vol. I and II: A Premier for Developing Countries, ESCAP, New York.

## **COURSE CODE: PG34T 406E: CO-OPERATIVE MANAGEMENT**

### **Course Outcome:**

- ❖ The purpose of this paper is to familiarize the student with emergence of co-operative movement at the global level and in India.
- ❖ Students will understand the objectives and principles of co-operative management and marketing management.
- ❖ Students will learn about the marketing management and office management in India.

### **Module-I: Origin of Co-operative Movement:**

**11 Hours**

Cooperative Movement In: Germany -Great -Denmark - Japan - USA - Canada - Italy - Sweden - France And Israel; Origin And Growth Of Cooperative Movement In India - Pre-Independence Developments - Major Developments In The Post-Independence Period - Types Of Co-Operatives

### **Module-II: Concept of Management:**

**10 Hours**

Definition, Nature, Scope, Principles, Objectives, and Functions Cooperative Management - Importance of Management - Problems of Management.

### **Module-III: Management of Cooperatives:**

**16 Hours**

Principles of Co-operatives Management - Functions of Cooperative Management - Problems of Cooperative Management.

*Management of Credit Cooperatives:* Introduction - Structure - Objectives - Management Aspects - Managing Committee - Board of Directors -Chairman /Executives - Problems of Credit Co-operatives. *Management of Non-Credit Cooperatives:* Consumer Co-operatives - Marketing Cooperatives - Dairy Cooperatives - Housing Cooperation.

*Human Resource Management:* Human Resource Management in Co-operatives - Management Information System - Management Information System in Co-Operatives

### **Module-IV: Marketing Management:**

**13 Hours**

Cooperative Marketing Management in India - Management Aspects of Marketing Co-operatives - Objectives of Cooperative Marketing Management - Adoption of Cooperative Marketing Approach - Role of Cooperative Marketing Management - Marketing Intelligence and Integrated Marketing System.

### **Module-V: Office Management:**

**10 Hours**

Office Organization and Office Maintenance of Records - Distribution of Work Among Staff Members - Office Correspondence - Filing System - Maintenance of Records and Statistics.

### **Reading List:**

1. Kamat, G. S. (2011): *New Dimensions of Co-operative Management*, Himalaya Publishing House, New Delhi.
2. Kulandiswamy, V. (2003): *Principles and Practice of Co-operative Management*, Rainbow Publications, Coimbatore.
3. Nakkikron. S. (1984):*Co-operative Management*, Rainbow Publications, Coimbatore.
4. Ramkishan, Y. (2003): *Management of Co-operatives*, Jaico Publishing House, New Delhi.
5. Shah, A.K. (1989): *Functional Management for the Co-operative*, Rainbow Publishers, Coimbatore.

6. Varkey, V.O. and V.G. Vartak (1998): *Co-operative Management*, Varsha Prakasham Pune.

**COURSE CODE: PG34T 406F: ENERGY ECONOMICS (Specialisation/Optional Paper) (NEW COURSE)**

**Course Outcomes:**

- ❖ To understand the basic concepts of energy economics, sources of energy and importance of energy in economic development.
- ❖ To analyze the extent and factors affecting energy demand, energy supply, energy markets and Environmental consequences of energy use and policies and regulatory Mechanism for the sector.
- ❖ Evaluate performance on the basis of cost- benefit analysis.
- ❖ To learn about pricing, planning and policies adopted for ensuring energy Efficiency and conservation for sustainable development.

**Module-I: Energy Concepts**

**10 Hours**

Concepts - Definitions - Sources and Categories of Energy - Energy Balance Tables - Energy Data Sources - Energy System - Energy - Economy Linkages - Green Energy; Forms of Energy - Electricity, Coal, Oil and Renewable Sources - Availability and Features - Management of Energy Resources - Energy and Environmental Sustainability.

**Module-II: Energy Supply and Demand Analysis**

**18 Hours**

*Energy Supply Analysis:* Availability and Supply of Different Sources of Energy - Supply Constraints - Role of Renewable Sources of Energy - Institutional Framework for Energy Supply in India - Supply Scenario and Investment Requirements - Alternative Energy Sources - Energy Imports - Trends and Issues - Policies of the Government.

*Energy Demand Analysis:* Determinants of Energy Demand - Estimating Energy Demand - Methods of Estimation - Price and Income Elasticity - Demand Estimation under Administered Price Regimes - Demand - Supply Gap - Energy Shortage and Crisis - Need for Energy Demand Management - Renewable Energy Options.

**Module-III: Energy Pricing**

**10 Hours**

Need - Methods and Principles of Energy Pricing - Economic Efficiency and Equity Considerations - Pricing Under Supply Constrained Framework - Energy Markets - Regulation - Issues and Challenges.

**Module-IV: Energy Efficiency and Conservation**

**10 Hours**

Need - Principles and Methods - Energy Supply Side and Demand Side Management and Efficiency - Institutional Machinery and Community Engagement - Estimation of Benefits - Energy Audit - Policy Alternatives.

**Module-V: Energy Planning and Policy**

**12 Hours**

Approaches to Energy Planning - Principles and Components - Implementation Machinery - Decentralised Approach to Energy Planning - Planning for Energy Security - Integrated Energy Policy - Issues and Challenges; Alternative Energy Sources: Wind Energy - Solar Energy - Bio Mass Power - Waste-to-Power Small Hydro Power - Availability and Utilisation - Government Policies.

**DEPARTMENT OF POST-GRADUATE STUDIES IN  
EDUCATION M.Ed. Course  
(I to IV Semesters)**

**REGULATIONS AND SYLLABUS**

**(CHOICE BASED CREDIT SYSTEM)  
(CBCS)**

With effect from 2015-2016  
and onwards

KARNATAK UNIVERSITY, DHARWAD

DEPARTMENT OF POST-GRADUATE STUDIES IN EDUCATION

SEMESTER (CBCS) COURSE

**REGULATIONS GOVERNING THE 2 - YEAR M.Ed. PROGRAMME PREPARED AS PER THE NCFTE & NCTE NORMS AND STANDARDS OF KARNATAKA UNIVERSITY UNDER (CBCS)**

In exercise of the powers conferred under Sec. 44 (1(c)) of the Karnataka State Universities Act, 2000, the Academic Council of Karnatak University frames the following Regulations :

**1.0 TITLE :**

The Regulations shall be cited as Karnatak University's Regulations 2015-2016 governing the 2 year Semesterised Post-Graduate Programme under Choice Based Credit System.

**2.0 COMMENCEMENT :**

These Regulations shall come into force with effect from the academic year 2015-2016 and onwards

**EXTENT OF APPLICATION :**

These Regulations shall also cover the Post-Graduate Programme in education leading to M.Ed. degree being conducted in the Colleges/Institutes, and P.G. Centres and all such institutions recognized for the purpose and affiliated to Karnatak University.

**COMMENCEMENT :**

These Regulations shall come into force from the date on which they are approved by the Chancellor or on such other date as directed by the Chancellor.

**3.0 DEFINITIONS**

In these Regulations, the expressions, "University", "University Area", "Department", "College", "Teachers" and "Principal" shall bear the same meaning as assigned to them under Sec. 2 of the Karnataka State Universities Act, 2002, NCTE Guidelines and Gazette of India, Extraordinary Notification December-2014.

The connotations 'Elementary Education' and 'Secondary Education' presently mean to cover respectively Standards I-VIII and Standards IX-XII of school education in Karnataka. The coverage has stood all along invariably connotations to two successive levels of school education.

**POST - GRADUATE SEMESTER COURSE REGULATIONS  
DEPARTMENT OF STUDIES IN EDUCATION**

**1.0 Courses Offered and Duration of the Course :**

- 1.1** M. Ed. course is 2 year professional course with Four Semesters. Each semester shall extend over a period 16 - 18 weeks, i.e., minimum 100 working days per year. The intervening summer vacation (1) and winter vacation (2) summer should be used for field attachment /practicum/other activities.

**4.0 Eligibility Criteria for Admission:  
M.Ed. DEGREE COURSE**

- a) Candidates seeking admission to the M.Ed. programme should have obtained at least 50% marks or an equivalent grade in any one of the following teacher preparation/degree/diploma programmes:
- i. B.Ed. with any undergraduate degree (with 50% marks in each).
  - ii. B.A, B.Ed., B.Sc.B.Ed.
  - iii. B.El.Ed.
  - iv. D.El.Ed/D.Ed with any Undergraduate Degree i.e. B.A. B.Sc, B.Com etc., (with 50% marks in each).
- b) Candidate with B. Ed. degree of this University or degree of any other University recognized as equivalent thereto with not less than 50 % of marks in the aggregate, and 45% marks if he/she belongs to SC/ST/Cat-I categories are eligible to seek admission to the M.Ed. course.

Admission shall be as per Government of Karnataka Reservation Policy and the directions issued in this regard from time to time.

**5.0 Working Days :**

The M.Ed. shall be at least two hundred working days each year, exclusive of the period of admission and inclusive of classroom transaction, practicum, field study and conduct of examination. The institution shall work for a minimum of thirty six hours in a week during which faculty and students concerned with the conduct of the programme shall be available for interaction, dialogue, consultation and mentoring students.

**6.0 Admission Procedure :**

Admission shall be made on merit on the basis of marks obtained in the qualifying examination and in the entrance examination or any other selection process as per the policy of the State Government/Central Government/University/UT Administration.

However, who discontinue the programme after one or more semesters due to extraordinary circumstances are allowed to continue the programme with the

approval from the Registrar. Candidates shall not register for any other regular course other than Diploma and Certificate courses being offered on the campus during the duration of the P.G. Programme.

#### **7.0 Medium of Instruction :**

The medium of instruction shall be English. However, candidates may be permitted to write their answers in the examination in Kannada if explicitly approved by the University passed on the options exercised by the students within 15 days from the date of commencement of the course during the academic year. This provision shall apply to all the assignment, dissertation, formal/periodical tests and semester end examinations to be attended by the candidate during the course.

#### **8.0 Programme Structure :**

- 8.1** The students of Post-Graduate Programme shall study the courses as may be approved by the concerned Board of Studies, Faculty and the Academic Council of the University from time to time subject to minimum and maximum credits as outlined in these regulations.
- 8.2** There shall be three categories of courses namely, compulsory Courses, Specialization Courses and Open Elective Courses.
- 8.3** Each programme shall have a set of Compulsory Courses, as stipulated in the regulations governing the concerned programme, that a student must complete to get the concerned degree.
- 8.4** In those programmes that offer specialization courses, the students shall choose the prescribed number of Specialization Courses offered within the Department.
- 8.5** The Department of Education offers Two Open Elective Course for students of other Departments. The Students of the Department of Education shall choose Open Elective Course from among those prescribed by the University and selected by the Department of Education from time to time.
- 8.6** The credits for Compulsory courses shall be 4 and 8 Credits for Dissertation and for Open elective course it shall be 4.
- 8.7** A student shall register for 18 credits in first semester , 26 credits in second semester, 28 credits in third semester and 16 credits in Fourth semester. A student shall earn 88 credits in total during the two academic year.
- 8.8** The students shall undertake and commence dissertation work for the M.Ed. programme as a compulsory course from the First, Second, Third and Fourth semesters.
- 8.9** The detailed programme structure for M.Ed. shall be as prescribed and shown in Annexure-1.

**9.0 Attendance :**

- 9.1** Each semester shall be taken as a unit for purpose of calculating attendance.
- 9.2** Each student shall sign in the attendance register maintained by the Department of Education for each course for every hour/unit of teaching. The course teacher shall submit the monthly attendance report to the Chairperson of the Department of Education who shall notify the same on the notice board of the Department during the second week of the subsequent month.
- 9.3** Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.
- 9.4** A student enrolled in the M. Ed. programme shall be deemed to have satisfied the requirement of attendance if he has attended not less than 80% of the total number of the actual working hours which include lectures, seminars, dissertation guidance, practical taken together during each semester.  
The minimum attendance of students shall be 80% for Theory and Practicum, and 90% for Field Attachment.
- 9.5** Students should have 80% of attendance in each semester. There shall not be, however, any condonation where the attendance is less than 80%.
- 9.6** Students who do not satisfy the prescribed attendance requirements shall not be eligible to appear for the ensuing examination. Such candidates may seek admission afresh to the respective semester within a year so long the existing system prevails.
- 9.7** Such of the candidates who have participated in State / National level Sports, NSS, NCC, Cultural activities and other related activities as stipulated under the existing regulations shall be considered for giving attendance for actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authorities within two weeks after the event.
- 9.8** Candidate who discontinue the programme after one or more semesters due to extraordinary circumstances is allowed to continue the programme with the approval from the Registrar.

**10.0 Examination :**

- 10.1** There shall be an examination at the end of each semester. The odd semester examinations shall be conducted by the P.G. Department of Education/ P.G. Courses in affiliated colleges of education. The even semester examinations shall be conducted by the University.
- 10.1.1** There shall be semester-end examination of 3 hours duration for 75 marks for compulsory and specialization courses. For open elective, there will be 75 marks and examination duration of 3 hours.
- 10.1.2** Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application form through the

Chairman/Chairperson of Department of Education and shall also pay the fees prescribed.

- 10.1.3** The Office of the Registrar (Evaluation) shall allot the Register Number to the candidate at the 1<sup>st</sup> semester-end examination. That will be the Register number of the candidate for all subsequent appearances and semester-end examinations.
- 10.1.4** The answer scripts shall be in the safe custody of the University for a maximum period of six months from the date of announcement of results. These shall be disposed off after six months.
- 10.1.5** The M.Ed. programme under CBCS is a fully Carry-Over System. A candidate reappearing for either the odd or even semester examinations shall be permitted to take examinations as and when they are conducted (Even Semester Examination in Even Semester and Odd Semester Examination in Odd Semester).
- 10.1.6** Candidates who have failed, remained absent or opted for improvement of performance in any papers/papers shall appear for such examination in the two immediate successive chances that are permitted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher. The rules and the regulations of the University which are in force shall be considered.
- 10.1.7** Candidates who desire to challenge the marks awarded to them, in the even semester-end examination may do so by submitting the application along with the prescribed fee to the Registrar (Evaluation) within 15 days from the announcement of results.  
The Candidates who desire for Revaluation or Re-totaling subject to the provisions made by the University which are in force.  
The rules and the regulations of the University which are in force shall be considered.

**10.2 Odd Semesters Examination (I & III semesters) :**

- 10.2.1** There shall be a Board of Examiners to set, scrutinize and approve question papers.
- 10.2.2** The BOE shall scrutinize the question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation).
- 10.2.3** The office of the Registrar (Evaluation) shall despatch the question papers to the Departments/P.G. Centers/ Colleges who shall conduct the examinations according to the schedule announced by the University.
- 10.2.4** The Chairperson of the Department/ Administrator of the P.G. Centre/ Principal of the College shall appoint one of their full time course teachers as Post-Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts semesters.
- 10.2.5** Answer scripts shall be valued by the examiners appointed by the University. However, in those Centers where an examiner for a particular course is not available,

then the answer scripts of that course shall be despatched to the office of the Registrar (Evaluation) who shall arrange for valuation of the same.

**10.2.6** There shall be single valuation. The examiner (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on the answer script.

**10.2.7** The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be despatched by the PGP Coordinator to the Registrar (Evaluation)'s Office at the end of the (Evaluation) to the respective centers.

**10.2.8** The Office of the Registrar Evaluation shall process and announce the results.

**10.3.0 Even Semesters (II & IV Semesters) :**

**10.3.1** There shall be a Board of Examiners to set, scrutinize and approve question papers.

**10.3.2** As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other Universities/ Research Institutes.

**10.3.3** Each answer script of the semester-end examination (Theory and Dissertation) shall be assessed by two examiners (One Internal and another External). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averaged with nearest marks of the two evaluations.

Provided that in case the number of answer scripts to be referred to the third examiner in a course exceeds minimum of 5% or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.

**10.3.4** The dissertation work will commence from the First semester. It carries 200 marks for the Second, Third and Fourth Semester (50+50+100\*) the last 100 marks includes 75 marks for valuation by both internal and external examiners and 25 mark for viva voce examination. The Dissertation viva voce examination for the students of PG Departments and PG Centres / Affiliated Colleges/ Institutions will be conducted in the PG Department of Studies in Education, Karnatak University, Dharwad. Board of Studies for Post Graduate Education (BOS PG Education) will approve and finalize the panel of Examiners for the valuation of the Theory papers and Dissertation

**10.4 EVALUATION :**

**10.4.1** The M.Ed. programme shall have two evaluation components – Internal Assessment (IA) and the Semester End Exams.

**10.4.2** The IA component in a course shall carry 25% and the semester End Examination shall carry 75% respectively, as the case may be. Courses having 25% marks as

internal assessment shall have 3 marks allotted to attendance. However, dissertation will carry 200(50+50+75+25 viva voce examination) marks total.

**10.4.3** IA marks of all the semester of M.Ed. students of all the P.G. Departments and P.G. Centres/Colleges/Institutions should send to the Chairman/Coordinators, P.G. Department of Education, Karnatak University, Dharwad. And I.A. marks will be scrutinized by the Chairman and staff members of the P.G. Department of Studies in Education, Karnatak University, Dharwad

**10.4.4** For courses carrying 25% of marks for IA, the attendance marks for each course shall be as follows :

Attendance (in percentage)	Marks
Above 95	3
Above 90 and up to 95	2
Above 80 and up to 90	1
80	No marks

**10.4.5** In case of compulsory courses, there shall be 2 tests of 8 marks each and an assignment of 6 marks. In case of specialization courses, there shall be 2 tests of 8 marks each and seminar of 6 marks. In case of open elective course for students of other departments, there shall be 2 tests of 8 marks each and an assignment of 6 marks.

**10.4.5** The IA marks list shall be displayed on the Notice Board of the Department. As and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination, or as directed by the university.

**10.4.6** The tests shall be written in answer books supplied by the University. The answer books after the completion of the evaluation shall be open for inspection by the students concerned when- ever such a request is made as prescribed by the university.

**10.4.7** There is no provision for seeking improvement of Internal Assessment marks.

**10.4.8** The IA records, pertaining to Semester Examination, shall be preserved by the Department/Centers/ Colleges for a period of Two Years from the last day of the 4<sup>th</sup> semester examination. These records may be called by the University or a Body Constituted by the University as and when deemed necessary.

**11.0 Maximum duration for completion of the Programme:**

**11.1** The M.Ed. programme shall be of duration of two academic years. The candidates shall be permitted to complete the programme requirements of the two-year programme within a maximum period of three years from the date of admission to the programme.

**11.2** Whenever the syllabus is revised, the candidate reappearing shall be allowed for the examinations only according to the prevailing syllabus.

**12.0 Declaration of Results :**

**12.1** The minimum for a pass in each course shall be 40% of the total marks including both the IA and the semester-end examinations. Further, the candidate shall obtain at least 40% of the marks in the semester-end examination. There is no minimum for the IA marks.

**12.2** Candidates shall secure a minimum of 50% in aggregate in all courses of a programme in each semester to successfully complete the programme.

**12.3** Candidates shall earn the prescribed number of credits for the programme to qualify for the P.G. Degree.

**12.4** For the purpose of announcing the results, the aggregate of the marks secured by a candidate in all the semester examinations shall be taken into account. However, Ranks shall not be awarded in case the candidate has not successfully completed each of the semesters in first attempt or has not completed the programme in the stipulated time (vide Regulation 5) or had applied for improvement of results.

**13.0 Marks, Credit Points, Grade Points, Grades and Grade Point Average :**

**13.1** The grade points and the grade letters to candidates in each course shall be awarded as follows:

Percentage marks	Credit Points	Letter Grade
75.00 to 100.00 %	7.50 to 10.00	A
60.00 to 74.90 %	6.00 to 07.49	B
50.00 to 59.94 %	5.00 to 5.99	C
40.00 to 49.94 %	4.00 to 4.99	D
Less than 40%	Less than 4.00	E

**13.2** Credit Point (CP) : The Credit Point for each course shall be calculated by multiplying the grade point obtained by the credit of the course.

**13.3** The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned by the student in all the courses by the total number of credits of those courses of the semester.

**13.4** The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points in all the semesters by the total number of credits in all the semesters. The CGPA shall be calculated by dividing the total number of credit points in all the

- (i) CGPA for the I semester = Sum of the CP of the I semester ÷ Sum of the credits of the I semester
- (ii) CPGA for the II semester = Sum of the CP of the I Sem + Sum of the CP of II Sem. ÷ Sum of the credits of the I semester + II semester.
- (iii) CPGA for the III semester = Sum of the CP of the I Sem + II Sem + III Sem ÷ Sum of the credits of I semester + II semester + III Semester.
- (iv) CPGA for the IV semester = Sum of the CP of the I Sem + II Sem + III Sem + IV Sem ÷ Sum of the credits of I semester + II semester + III Semester + IV Semesters.

**13.5** The Grade Card at each semester examination shall indicate the courses opted by the student, the credit for the course chosen by the student, the credit points obtained in each course, the grade letter and the grade point average. No class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade Point Average.

**13.6** Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below:

Cumulative Grade Point Average (CGPA)	Class to be Awarded
7.50 to 10.00	First class with Distinction
6.00 to 7.49	First Class
5.00 to 5.99	Second Class
4.00 to 4.99	Pass
Less than 4.00	Fail

#### **14.0 Scheme of Instruction :**

##### **14.1 M. Ed. Course :**

**14.1.1** In the first semester there shall be 4 papers. In the second semester there shall be 4 papers, 1 Open Elective Course Subject and Dissertation, in the Third Semester there shall be Two papers on Areas of Specialization, One Open Elective Course Subject, and Internship, Submission of Dissertation and (ISB) Academic Writings. In the Fourth Semester there shall be Three Areas of Specialization Course and One Dissertation Component. Also there shall be Inter Semester Break (ISB) such as Communication and Expository Writing, Self-Development, Dissertation, Internship and Academic Writings.

- (i) 'Open Elective Course' means a course offered by Department for students of other Departments in the same school or in other schools. Students have freedom to choose from a number of optional courses offered by other Departments to add to their credits required for the completion of their respective programmes; (ii) Credit means the unit by means of which a course work is measured.

The Department of Education shall have 88 credits (18 credit in the First Semester, 26 credit in the Second Semester, 28 credit in the Third Semester and 16 credit in the Fourth Semester) for the course subject including Dissertation, Inter Semester

Break-I, Inter Semester Break-II, and Inter Semester Break-III. The Dissertation work shall commence ground work in the First Semester, in the Second Semester Field Work or Pilot Study and with the Dissertation being submitted at the end of Third Semester. Each paper shall carry 100 marks including Internal Assessment. Open Electives will be for 75 marks for theory and 25 for Internal Assessment.

**An Example of Curriculum Organisation Based on the Proposed Framework**  
*Curriculum Organization for Two -Year M.Ed. Program (Four Semesterised & CBCS Scheme)*

Curriculum Organization for Two Year B.A.M. Program (Four Semesters) (CBCS Scheme)						
Semester-I	ISB*I	Semester-II	ISB*II	Semester-III	ISB*III	Semester-IV
Psychology of Learning and Development (4 Unit & 4 Credit)	Communication and Expository Writing ( 1 Credit)  Self Development (1 Credit)	Philosophy of Education (4 Unit & 4 Credit)	Dissertation (2 Credit)  Internship In a Teacher Educational Institution (4 Credit)	Area of Specialization Course (8 Credit)	Dissertation (2 Credit)	3 Area Of specialisation Courses (12 Credit) (3X4)
History and Political Economy of Education (4 Unit & 4 Credit)		Sociology of Education (4 Unit & 4 Credit)		Research Methods (4 Unit & 4 Credit)	Academic Writing (2 Credit) Manuscript magazine	Dissertation (4 Unit & 4 Credit)
Educational Studies (4 Unit & 4 Credit)		Curriculum Studies (4 Unit & 4 Credit)		Teacher Education (4 Unit & 4 Credit)		
Introduction to Research Method and Statistic (4 Unit & 4 Credit)		Teacher Education-I (4 Unit & 4 Credit)		Internship (4 Unit & 4 Credit)		
		OEC- I (4 Unit & 4 Credit)		OEC- II (4 Unit & 4 Credit)		
		Field Visit/Practicum				
16 Credit	2 Credit	20 Credit	6 Credit	24 Credit	4 Credit	16 Credit

**ISB** : Inter Semester break

**Practicum:** Organisation of Workshops, Practicum activities and seminars to enhance Professional Skills and Understanding of the students shall be part of the teaching modality of the various taught courses.

**Field Visit:** Field Immersion/ Attachment/ Internship. There shall be core courses (which shall have about 60% of credits) and specialised courses in elementary education or secondary education and dissertation with about 40% of credits.

#### 15.0 Hours of Instruction (Contact Hours) Per Week:

#### 15.1 M. Ed. Course:

There shall be 36 contact hours per week (28 hours of Lectures + 16 hours of Practicum & Dissertation Guidance.) 2 hours of Practicum and Dissertation Guidance as being considered equal to one hour of lecture.

#### 16.0 Course Structure (for Each Semester)

- Compulsory Course- 4 credits per week
- Specialization Courses ( In III and IV semester) – 4 credits per week
- Open Elective Course – 4 credits per week.

- (d) The students shall register for credits in First Semester to Fourth Semester as per rules. The student has to clear the minimum credits per semester.

#### 17.0 Scheme of Examination:

- 17.1 There shall be a University Examination for all Semesters at the end of each semester.
- 17.2 The composition of theory and internal assessment for each paper shall be 75 and 25 respectively.
- 17.3 Duration of examination for theory paper of 75 marks shall be for 3 hours. Each theory question paper shall comprise of 6 main questions. Out of the first 6 main questions the student has to answer any four questions. Question No. 7 is compulsory which is a short note question. Each full question shall carry 15 marks.
- 17.4 All those enrolled in the M.Ed. programme shall write a Practicum and Dissertation under the Guidance of a course teacher during their Second semester. Dissertation shall carry 200 marks. The M. Ed. students shall submit the Dissertation one week prior to the last working day of the Fourth semester.( Annexure )

#### 18.0 Internal Assessment :

##### 18.1 M. Ed. COURSE :

- 18.1.1 In case of the theory papers the internal assessment shall be for 25 marks, assessed through 2 tests of 16 and one assignment / seminar for 6 marks.

#### Internal Assessment Component and Marks

	Test	Assignment	Seminar	Attendance	Total
<i>Compulsory Papers:</i>	2(16) *	one (6) *	-----	3	25
<i>Optional Papers:</i>	2(16) *	-----	one (6) *	3	25

\* Marks

##### 18.1.2 Time Schedule for Internal Assessment

The Chairperson of the Department shall notify the dates for tests.

#### 19.0 Miscellaneous:

- Notwithstanding anything contained in these regulations, the semester system at under-Graduate level is hereby replaced.
- The provisions of any order, Rules or Regulations in force shall be inapplicable to extent of its inconsistency with these Regulations.
- The University shall issue such orders, instructions, procedures and prescribe such format as it may deem fit to implement the provisions of this regulations.
- The procedural details may be given by the University from time to time.
- Any unforeseen problem/ Difficulties may be resolved by the Vice Chancellor, Whose decision in the matter shall be final.

**KARNATAK UNIVERSITY, DHARWAD**  
**POST GRADUATE DEPARTMENT OF STUDIES IN EDUCATION**  
**TWO YEAR MASTER OF EDUCATION (M.Ed) COURSE**  
**FOUR SEMESTER and CBCS SCHEME 2015-2016.**

**Programme Structure**

The curriculum of the two-year M.Ed. programme as suggested in the NCTE Regulation, 2014 is as follows:

Major Components	Areas Covered	Description
<b>Common Core</b> (Theory and Practicum included)	Perspective Courses, Tool Courses, and Teacher Education Courses	<ol style="list-style-type: none"> <li>1. <b>Perspective Courses</b> in the areas of: Philosophy of Education, Sociology History-Political Economy of Education, Psychology of Education, Education Studies, and Curriculum Studies.</li> <li>2. <b>Tool Courses</b> comprising of basic and advanced level education research, academic writing and communication skills; educational technology and ICT; self-development (with focus on gender and society, inclusive education and mental and physical well-being through modalities such as yoga)</li> <li>3. <b>Teacher Education Courses</b> (which are also linked with the field internship/ immersion/attachment in a teacher education institution) will also be included in the core.</li> </ol>
<b>Specialization Branches</b> (Theory and Practicum included)	Courses in <b>any one</b> of the school levels/areas (such as Elementary, or Secondary and Senior Secondary) and further thematic specializations.	<p>The Specialization branches in one of the school stages: <b>Elementary Level</b> (upto VIII), or, <b>Secondary and Senior Secondary Level</b> (VI to XII), each with:</p> <ol style="list-style-type: none"> <li>1. Core courses, within Elementary/Secondary specialization, focusing on mapping the area</li> <li>2. Specialization/elective clusters in thematic areas pertinent to that stage, such as: <ul style="list-style-type: none"> <li>- Curriculum ;</li> <li>- Pedagogy and Assessment;</li> <li>- Policy, Economics and Planning;</li> <li>- Educational Management and Administration; Education for Differently Abled;</li> <li>- Education Technology, etc.</li> </ul> </li> </ol>
<b>Field Attachments /Internships /Immersion</b>	Teacher Education Institution (TEI)	<p>Field Attachments/ Internship/Immersion in:</p> <ol style="list-style-type: none"> <li>1. A Teacher Education Institution (TEI), and</li> <li>2. The Area of Specialization (Elementary Level or Secondary /Senior Secondary Level)</li> </ol>
	Related to specialization (Elementary or Secondary/ Senior Secondary)	
<b>Research leading to Dissertation</b>	Related to specialisation/ foundations	Students (in close mentorship of a faculty member) learn to plan and conduct a research, and write a thesis.

The above structure as been adopted by the NCTE taking into consideration the prevailing regulations. The modified course structure for the two-year M.Ed. Programme is as follows :

**Course Structure for the NCTE Two-Year M.Ed. Programme**  
**Semester-wise Distribution of the Course**

**Semester – I**

Course – 1 :	Psychology of Learning and Development	25+ 75 = 100	4 Credits
Course – 2 :	Historical, Political and Economic Foundations of Education	25 + 75 = 100	4 Credits
Course – 3 :	Educational Studies	25 + 75 = 100	4 Credits
Course – 4 a :	Methodology of Research in Education – I	25 + 75= 100	4 Credits
	<b>Total</b>	<b>400</b>	<b>16 Credits</b>

**ISB I**

Activity – I (a)	Communication and Expository Writing	10 + 15 = 25	1 Credit
Activity – I (b)	Self-Development	10 + 15 = 25	1 Credit
	<b>Total</b>	<b>50</b>	<b>2 Credits</b>

**Semester – II**

Course – 5 :	Philosophy of Education	25 + 75 = 100	4 Credits
Course – 6 :	Sociology of Education	25 + 75 = 100	4 Credits
Course – 7 :	Curriculum Studies	25 + 75 = 100	4 Credits
Course – 8 a :	Teacher Education – I	25 + 75 = 100	4 Credits
Course (OEC)	Teaching Strategies for Teachers	25 + 75 = 100	4 Credits
	<b>Total</b>	<b>500</b>	<b>20 Credits</b>

**ISB II**

Activity – II (a)	Dissertation	50	2 Credit
Activity – II (b)	Internship in a TEI	100	4 Credit
	<b>Total</b>	<b>150</b>	<b>6 Credits</b>

**Semester – III**

**Specialization in any ONE level : Elementary / Secondary and Senior Secondary**

Course – 9 :	Curriculum, Pedagogy and Assessment	25 + 75 = 100	4 Credits
Course – 10 :	Policy, Economics and Planning	25 + 75 = 100	4 Credits
Course – 4 b :	Methodology of Research in Education – II	25 + 75 = 100	4 Credits
Course – 8 b :	Teacher Education – II	25 + 75 = 100	4 Credits
Course – 11 :	Internship in Specialization	100	4 Credits
Course (OEC)	Educational Testing and Evaluation	25 + 75 = 100	4 Credits
	<b>Total</b>	<b>600</b>	<b>24 Credits</b>

**ISB III**

Activity – III (a)	Dissertation	50	2 Credit
Activity – III (b)	Academic Writing	50	2 Credit
	<b>Total</b>	<b>100</b>	<b>4 Credits</b>

**Semester – IV**

**Specialization in any ONE level: Elementary / Secondary and Senior Secondary**

Course – 12 :	Administration, Management and Leadership of Elementary or Secondary/Senior Secondary	25 + 75 = 100	4 Credits
Course – 13 :	Inclusive Education (Differently abled) of Elementary or Secondary/Senior Secondary	25 + 75 = 100	4 Credits

Course – 14 :	Education Technology at Elementary or Secondary/Senior Secondary	25 + 75 = 100	4 Credits
Course – 15 :	Dissertation	75 + 25 = 100	4 Credits
	<b>Total</b>	<b>400</b>	<b>16 Credits</b>

**DEPARTMENT OF POST-GRADUATE STUDIES IN  
EDUCATION M.Ed. Course**

**(I to IV Semesters)**

**Syllabus For Master of Education**

**(CHOICE BASED CREDIT SYSTEM)  
(CBCS)**

**With effect from 2015-2016  
and onwards**

### PRPGRAMME SPECIFIC OUTCOMES (PSOS)

After completion of this programme, the student will be able to:

- To build perspective and understanding of concepts, theories, ideas and practices across various fields of Education.
- To understand the historical, political and economical aspect of education.
- To provide research related experiences with the competency to independently develop dissertation and research work.
- To interpret the schools of philosophy and their educational significance.
- To get an insight into various educational policies and practices.
- To enable proper understanding and critical perspective about specialized areas of Education.

<b>Paper Code and Name</b>	<b>COURSE – 1 : PSYCHOLOGY OF LEARNING AND DEVELOPMENT</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	To understand concepts and principles of Educational psychology as an applied science.
CO 2	To understand the historical, political and economical aspect of education.
CO 3	To provide research related experiences with the competency to independently develop dissertation and research work.
CO 4	To interpret the schools of philosophy and their educational significance.
CO 5	To enable proper understanding and critical perspective about specialized areas of Education.

PARTICULARS		Teaching Hours (Max. 40)
Unit 1: Nature of Educational Psychology		
<ul style="list-style-type: none"> <li>Educational Psychology: Concept and scope of educational psychology, contribution of psychology to education.</li> <li>Human Development: Concept, principles, sequential stages of development; factors influencing development and their relative role; general characteristics and problems of each stage.</li> <li>Theories of Piaget and Bruner- major concepts and stages and implications for education. Indian theories of Psychological Development.</li> </ul>	12 Hours	
Unit 2: Learning & Individual Difference		
<ul style="list-style-type: none"> <li>Learning: Concept, kinds, levels of learning, various view points on learning, Concept, kinds &amp; causes of individual difference</li> <li>Intelligence, Emotional Intelligence and cognitive abilities-Meaning, Concept, identification &amp; fostering.</li> <li>Interests, attitude and Aptitude.</li> <li>Motivation – Concept, Kinds &amp; Techniques of Motivation.</li> </ul>	8 Hours	
Unit 3: Creativity & Personality		
<ul style="list-style-type: none"> <li>Personality: Concept, development, structure and dynamics of personality</li> <li>Theories of Personality – Allport, Eysenck; Psychoanalytic approach of Freud, Murray’s need theory; Humanistic approach – Carl Rogers, Maslow &amp; Sri Aurobindo.</li> <li>Techniques of Assessment of Personality –               <ul style="list-style-type: none"> <li>a. Projective</li> <li>b. Non-Projective</li> </ul> </li> <li>Creativity – Nature, Process, Identification, fostering and guiding creative children.</li> </ul>	8 Hours	
Unit 4: Adjustment and Mental Health		
<p>Adjustment and Mental Concept &amp; mechanism of adjustment – defences, escape, withdrawal, compensatory.</p> <ul style="list-style-type: none"> <li>Introduction to common forms of neuroses, psychosis and somatic disorders</li> <li>Concept of mental health.</li> <li>Identification of Mental Health.</li> <li>Theoretical Basis of Mental Health.</li> <li>Factors influencing (Parents and family life, community and school practices)</li> <li>Mental Health &amp; Teacher.</li> <li>Principles of mental hygiene – preventive, constructive, curative measures &amp; Implications for education.</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>COURSE – 4 a : INTRODUCTION TO EDUCATIONAL RESEARCH AND STATISTICS</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	To understand about educational research and it's designing
CO 2	To understand the need of reviews of related literature in education
CO 3	To know about various data collection tools and sampling.
CO 4	To understand about descriptive and inferential statistics.
CO 5	To understand the different applications of computers in education.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 40)</b>
<b>Unit 1: Basics of Educational research</b>	
<ul style="list-style-type: none"> <li>Different Source of Generating Knowledge. Concept of Scientific Inquiry and Theory development, Scientific method –Concept, Definition Assumption and Steps.</li> <li>Research in Education – Meaning, Purpose, Characteristics and Scope of Educational Research. areas of Educational Research</li> <li>Types of Educational Research – Classification based on purpose Fundamental or Basic, Applied and Action Research. Classification based on Method – Historical, Descriptive, Experiment.</li> </ul>	12 Hours

<ul style="list-style-type: none"> <li>Paradigms of Research: Qualitative, Quantitative &amp; Mixed research</li> </ul>	
<b>Unit 2: Review of Related Literature &amp; Formulation of Research Problem.</b>	
<ul style="list-style-type: none"> <li>Purpose of Review at Different Stages of Research</li> <li>Identifying the Related Literature - Sources &amp; Types, On line &amp; Off line References. Organizing the related literature – recording of various references, notes taking.</li> <li>Formulation of a Research Problem – Sources, characteristics of a good research problem, Evaluation of Research Problem, Criteria for selecting the Research Problem. Defining &amp; Stating the Research Problem, objectives &amp; Research question in quantitative &amp; qualitative research.</li> </ul>	8 Hours
<b>Unit 3: Variables, Hypotheses, Sampling and Preparation of a Research Proposal</b>	
<ul style="list-style-type: none"> <li>Steps of Educational research, Research Blueprint – Concept and Component.</li> <li>Variables – Meaning and Characteristics, Types and Interrelationship among different Types of Variables.</li> <li>Hypotheses – Meaning and Importance, Characteristics, Types and forms of hypothesis.</li> <li>Sampling - Concept of Population &amp; Sample – Sampling unit, sample size, sampling frame, concept of representative &amp; based sample. Types of sampling – Probability sampling &amp; Non probability sampling. Probability sampling – Random sampling, stratified sampling, stratified random sampling, systematic sampling, cluster &amp; multistage sampling. Non probability sampling - Judgment or purposive sampling, quota sampling, Incidental sampling (Convenient).</li> <li>Format of a research proposal</li> </ul>	8 Hours
<b>Unit 4: Educational Statistics and Computer Applications</b>	
<ul style="list-style-type: none"> <li>Nature of Data</li> <li>Meaning and Nature, Measurement Scales, Classification and tabulation of data, Graphical representation of data.</li> <li>Descriptive Statistics</li> <li>Measures of Central Tendency and Variability</li> <li>Relative position- quartiles, deciles, percentiles and percentile ranks</li> <li>Normal probability curve –Its properties and applications, skewness and kurtosis- their computation and uses.</li> <li>Standard scores, T scores and Stanine- computation and uses.</li> <li>Criteria for selecting statistical softwares- in research.</li> <li>Criteria for selecting software- SPSS, EXCEL and SYSTAT for data analysis in educational research work. Packages on statistics (meaning and applications)</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>Course – 8 a : TEACHER EDUCATION COURSE- I PRE-SERVICE AND IN-SERVICE TEACHER EDUCATION</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	To gain the insight on concept, objectives, and status of pre-service and in-service teacher education.
CO 2	To acquaint student-teachers with historical background of teacher education in India
CO 3	To acquaint student-teachers with organization of pre-service and in-service teacher education programme with respect to curriculum, infrastructure and resources needed.
CO 4	To examine the current pre-service and in-service teacher education programmes in terms of various policy document.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 40)</b>
<b>Unit 1: Teacher Education-Concept, Need and Objectives</b>	
<ul style="list-style-type: none"> <li>• Concepts of Teacher Education</li> <li>• Need and Importance of Teacher Education</li> <li>• Objectives of Teacher Education at various levels</li> <li>• Teacher Education in Ancient India</li> <li>• Teacher Education in Pre- and Post-Independent India</li> <li>• Comparative Study of Teacher Education in Various Countries</li> </ul>	12 Hours
<b>Unit 2: Various Organizational Patterns of Teacher Education in India</b>	
<ul style="list-style-type: none"> <li>• B.Ed. (One Year, Two Years, Distance Mode)</li> <li>• B.Ed. Basic Education</li> <li>• B.Ed. Special Education</li> <li>• B.Ed. Integrated (Four Years)</li> <li>• B.Ed. in Elementary Education</li> <li>• Diploma in Elementary Education</li> <li>• M.Ed. (Full time , Part Time &amp; Distance Mode)</li> </ul>	8 Hours

<b>Unit 3: Broad Organization Patterns of Teacher Education</b>	
<ul style="list-style-type: none"> <li>• Admission Process</li> <li>• Planning and scheduling of course</li> <li>• Curriculum Components               <ul style="list-style-type: none"> <li>– Foundation Course</li> <li>– Pedagogy Course</li> <li>– Engagement with field</li> <li>– Enhancing professional competence</li> </ul> </li> </ul>	8 Hours
<b>Unit 4: In-service Education of Teachers</b>	
<ul style="list-style-type: none"> <li>• Meaning of in-service teacher education</li> <li>• Significance of in-service teacher education</li> <li>• Objectives of in-service teacher education</li> <li>• Various programmes of in-service teacher education like SOPT, PMOST</li> <li>• Thrusts in in-service teacher education</li> <li>• Designing of in-service teacher education some basic guidelines</li> <li>• Various agencies of in-service teacher education</li> <li>• Limitations of in-service teacher education</li> </ul>	12 Hours

<b>Paper Code and Name</b>	<b>Course – 4 b : ADVANCED EDUCATIONAL RESEARCH AND STATISTICS</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	To analyze the quantitative and qualitative data for research.
CO 2	To enhance the competencies of synthesizing research work.
CO 3	To develop the skill of preparing a complete research report.
CO 4	Elucidate the procedures of construction and validation tools/techniques of research.
CO 5	To analyze the quantitative and qualitative data for research.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 40)</b>
<b>Unit 1: Quantitative and Qualitative Methods of Research</b>	
<ul style="list-style-type: none"> <li>Experimental – Need and significance, Nature, Validity – Internal and external, controlling variables, Designs – single group, parallel groups and rotation groups. Quasi – Experimental Designs: Non-equivalent Comparison Group Design, and Time –Series Design, Ex Post Facto Research.</li> <li>Phenomenological, Ethnography, Case Study, Grounded theory, Historical – Need and significance of Historical Research, primary data and secondary data, Sources and collection of data – Internal Criticism and External criticism and Interpretation of data.</li> </ul>	12 Hours
<b>Unit 2: Tools and Techniques of Data Collection</b>	
<ul style="list-style-type: none"> <li>Characteristics of a good tool – Concept and Types of Validity and reliability, Usability, Methods of establishing and Validity and Reliability of a tool.</li> <li>Test – Concept and Uses of Norm-Reference Test and Criterion Reference Test, Construction and Validation of achievement test.</li> </ul>	8 Hours

<ul style="list-style-type: none"> <li>Tools – Rating scale. Attitude scale, Opinionnaire, Questionnaire, Aptitude test, checklist, inventory – meaning, characteristics, construction, validity and reliability.</li> </ul>	
<b>Unit 3: Parametric and Non Parametric Testing</b>	
<ul style="list-style-type: none"> <li>Measures of Relationship – Rank Difference. Product Moment (Direct and Scatter Diagram Methods) Biserial, Point Biserial, Tetrachoric and Phi – Computation and uses in measurement and research, concepts of Partial and Multiple Correlations and their uses in education research.</li> <li>Concept of Parametric Test &amp; Non Parametric test, Concept of Parameter and Statistic, Sampling distribution, Sampling Error And Standard Error of Mean (large and small sample), Levels of significance, Confidence limits and Intervals, Degrees of Freedom,</li> <li>Parametric Tests: Testing of Hypothesis – Null hypothesis, Alternative Hypothesis, one tailed test and two tailed test, Type I &amp; Type II Errors, Steps in Testing the Hypothesis, Testing significance of Means: ANOVA – Concept and uses; Regression Analysis: concept and uses.</li> <li>Non parametric tests – Chi square test: Concept, Computation and uses of chi square as a test of Independence and Contingency co-efficient.</li> </ul>	12Hours
<b>Unit 4: Report Writing and Presentation of Results</b>	
<ul style="list-style-type: none"> <li>Need for Effective Documentation: Importance of Report Writing Characteristics of good Report Writing, Types of Research Reports: Brief reports, detailed reports, Technical reports.</li> <li>Report Writing</li> <li>Report Format: Preliminary section, Main report, Interpretations of results and suggested recommendations, Limitations of the study, References (APA Style)</li> <li>Reporting of Research findings and implications</li> </ul>	8 Hours

<b>Paper Code and Name</b>	<b>COURSE – 13 : INCLUSIVE EDUCATION (DIFFERENTLY ABLED) OF SECONDARY/SENIOR SECONDARY LEVEL</b>
<b>COURSE OUTCOMES (COs)</b>	
After completing this paper, the students will be able to:	
CO 1	To understand about inclusive society and the educational reforms.
CO 2	To reflect upon various assessment and teaching learning strategies for the disabled.
CO 3	To acquaint with various perspectives of gender issues and curriculum.
CO 4	To preparation of teachers for inclusive schools.

<b>PARTICULARS</b>	<b>Teaching Hours (Max. 40)</b>
<b>Unit 1: Introduction, Issues &amp; Perspectives of Inclusive Education</b>	
<ul style="list-style-type: none"> <li>• , Definition, concept and importance of inclusive education.</li> <li>• Historical perspectives of inclusive education for children with diverse needs.</li> <li>• Difference between special education, integrated education and inclusive education.</li> <li>• Advantages of inclusive education for education for all children in the context of Right to Education.</li> <li>• N.C.F and adaptation of teaching learning material</li> </ul>	8 Hours
<b>Unit 2: Policy Perspective</b>	

<ul style="list-style-type: none"> <li>• Recommendations of Indian Education Commission (1964-66).</li> <li>• Scheme of Integrated Education for Disabled Children</li> <li>• National Policy on Education (NPE, 1986-92).</li> <li>• National Curriculum Framework, 2005 NCERT</li> <li>• The Convention on the Rights of the Child (Article 23, 28, 29 a2, 3, 6 and 10 &amp; 12).</li> <li>• The World Declaration on the Survival, Protection and Development of Children and the Plans of action (Outcome of the UNICEF World Summit for Children, (1990).</li> <li>• Promoting Inclusion Preventing Exclusion</li> <li>• The National Trust for the Welfare of Persons with autism, cerebral palsy, mental retardation and Multiple Disabilities Act 1999.</li> </ul>	12 Hours
<b>Unit 3: Diversity in the Classroom</b>	
<ul style="list-style-type: none"> <li>• Diversity- Meaning and definition.</li> <li>• Disability – Legal definition, discrimination.</li> <li>• Giftedness.</li> <li>• Concept, Nature, and Characteristics of Multiple Disabilities.</li> <li>• Guidelines for adaptation for teaching/ practicing science, mathematics, social studies , languages, physical education yoga, heritage arts theatre, drama etc in inclusive settings.</li> <li>• Utilization of records/ case profiles for identification, assessment, and intervention for inclusive classrooms.</li> <li>• Techniques and methods used for adaptation of content , laboratory skills and play material</li> </ul>	8 Hours
<b>Unit 4: Teacher Preparation and Inclusive Education</b>	
<ul style="list-style-type: none"> <li>• Review existing educational programmes offered in Secondary school (general, special education).</li> <li>• Skills and competencies of teachers and teacher educators for Secondary Education in inclusive settings.</li> <li>• N.C.F 2005 and curriculum for teacher preparation and transaction modes.</li> <li>• Roles, responsibilities and professional ethics of an inclusive education teacher and teacher educators.</li> <li>• Evaluation and follow up programmes for improvisation of teacher preparation programmes in inclusive education programmes.</li> <li>• Role of different national and international agencies {institutions, universities} in promoting inclusive education.</li> </ul>	12 Hours

Regulations concerning Master Degree Programme

**Faculty of Sciences, from 2018-19**

**Master Degree Programme in Electronic Media (CBCS)**

Regulations Governing the Post-Graduation Master Degree Programmes under Choice Based Credit System (KU-CBCS), framed under Section 44(1)(C) of K.S.U. Act, 2000.

**MASTER OF SCIENCE IN ELECTRONIC MEDIA**

**CHOICE BASED CREDIT SYSTEM (CBCS)**

## **General objective of the programme**

New communication technologies have emerged as a major source of information and entertainment. The reach of radio, television and internet has been expanding at a remarkable rate. Educational institutions have excellent opportunities to train students who can handle them. Keeping this in view, a two years course in M.Sc in Electronic Media has been designed.

## **Objectives of the programme:**

- a. To equip students with knowledge and skills to work in new media and electronic media communication environment.
- b. To train the students with production skills for various electronic media fields like radio, television and web based new media technologies.
- c. To introduce students to various dimensions of electronic media production such as production planning, financing, management and distribution.

## **Programme Specific Outcomes (PO's):**

After successful completion of the program, M.Sc Electronic Media graduates are able to:

1. Create content for electronic media: Written, oral, and visual communication to analyze and review electronic media.
2. Articulate how electronic media perform as an agent of social change.
3. Explain the history of electronic media technologies.
4. Situate media art in its historical, political, and social context.
5. Evaluate the ethical and legal considerations surrounding the production and distribution of electronic media.
6. Work creatively and collaboratively in a variety of electronic media environments.
7. Develop self-directed projects that synthesize creative, technical, and critical approaches.
8. Propose and consider alternative uses of media technologies.

**Title:**

These Regulations shall be called “Karnatak University Regulations Governing Post-Graduation under the Choice Based Credit System” for Master Degree programmes.

**Commencement:**

These Regulations shall come into effect from the academic year 2019-20.

**Definitions:**

In these Regulations, unless otherwise mentioned:

- a) “University” means Karnatak University:
- b) “Post-Graduation Programmes” means Master’s Degree Courses.
- c) “Compulsory Course” means a fundamental paper which a student admitted to a particular Post - Graduation programme should successfully complete to receive the Post – Graduation Degree in the concerned subject.
- d) “Open elective” means a course offered by the Department for students of other Departments. Students have freedom to choose from a number of optional courses offered by other Department/s to add to their credits required for the completion of their respective programmes.
- e) “Credit” means the unit by which the course work is measured. For this Regulation, one Credit means one hour of teaching work or two hours of practical work per week. Normally a Semester is of 16 weeks duration in any given academic year. As regards the marks for the courses, 1 credit is equal to 25 marks, 2 credits is equal to 50 marks, 3 credits is equal to 75 marks and 4 credits is equal to 100 marks as used in the conventional system.
- f) “Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each subject by the candidate after completing his/her Internal Assessment and Semester end Examinations. Each course carries a prescribed number of marks of credits. These grades are awarded for each subject after conversion of the marks and after completion of the examinations in each semester.
- g) “Grade Point Average” of GPA refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester. The GPA depends on the number of courses a student takes and the grades awarded to him/her for each of the subjects so chosen.
- h) “Cumulative Grade Point Average” or CGPA refers to the Cumulative Grade Point Averages weighted across all the semesters and is carried forward. The calculations of the GPA, CGPA is shown at the end of this regulation.

## **1. Minimum Eligibility for Admission:**

The students who have successfully completed a graduation in any discipline with 45 percentage of marks in aggregate (40 percentage of marks for SC/ST and Cat-I students) from this University or from any other University recognized as equivalent thereto by this University shall be eligible for admission to the Post Graduation Programmes under the KU-CBCS Programme provided they also satisfy the eligibility conditions like percentage of marks etc., as may be prescribed by the University and as per Ordinance of the course.

## **2. Entrance Test**

2.1 Candidate seeking admission to the course shall be required to appear for entrance test conducted by the University.

2.2 The Entrance Test for 100 marks shall consist of multiple choice questions.

## **3. Selection for Admission**

3.1 The selection of students shall be made on merit basis in each category of reservations as per the government order on reservation and University rules.

3.2 Preparation of merit list shall make on the basis of marks obtained in the Entrance Test and marks obtained in the Degree Examination (Marks scored in the language and cognate subjects).

3.3 Fifty percentage of the marks obtained in the degree examination and 50 percentage of the marks scored in the Entrance Test shall be taken for finalizing the merit list.

## **4. Intake**

The total number of candidates to be admitted to the course shall be 20 including all provisions/categories. Out of these five seats will be allotted under enhanced fees structure. Total Seats is 25.

## **5. Course of Study:**

The courses of study for M.Sc in Electronic Media degree shall comprise of Theory and Practical as noted in the syllabus.

## **6. Duration of the Programme:**

The programme of study for the Post-Graduation Master Degree shall normally extend over a period of two academic years, each academic year comprising of two semesters, and each semester comprising of sixteen weeks of class work.

## **7. Medium of Instruction**

The medium of instruction shall be in English. However, a candidate is permitted to write the examination in Kannada also.

## **8. Minimum Credits and Maximum Credits:**

- 8.1 There shall be two categories of courses viz., Compulsory course and Open Elective Course. Compulsory Course refers to the concerned department only. The Open Elective is the course offered by other Departments.
- 8.2 Each course shall have a definite course objective, Eligibility criterion for taking the course, scheme of Evaluation including the components of Internal Assessment (IA) marks, Projects (if any), the number of contact hours, type of practical and the prescribed credits.
- 8.3 The credits for each of compulsory course are of 4 credits. Even in the case of Open Elective Course, it shall be 4 credits for each paper.
- 8.4 A student shall register for minimum of 18 credits and a maximum of 30 credits per semester. However to qualify for the degree in any Department under any school and faculty, he/she should have registered and cleared a minimum number of credits, which vary from course to course.

## **9. Course Structure:**

- 9.1 The students of Post-Graduation Programme shall study the courses as may be approved and prescribed by the Academic Council of the University from time to time.
- 9.2 A typical Master's Degree programme consists of a number of courses. This number varies from discipline to discipline. The term course is used to indicate a logical part of a subject matter of the programme (also referred to as paper). In essence the courses are of two types:
  - i. Compulsory Course
  - ii. Open Elective Course.
- 9.3 Each programme shall have a set of compulsory course that a student must complete to get the degree in the concerned Department. These are distributed in each semester. There could be a minimum of such papers for each semester depending on the department.
- 9.4 Each department shall offer at least two Open Elective courses for the II and III Semester for students from other departments. Students from the same department are generally not allowed to opt the courses offered as Open Elective course in the same department.
- 9.5 Each course (paper) in this system is designed carefully to include lectures / tutorial/ Laboratory work/ seminars/ Project work/ practical training/ report writing/ Viva-voce etc., to meet effective teaching and learning needs and the credits are assigned suitably.
- 9.6 Master Degree Programmes are essentially semester system programmes. There shall be 4 semesters in each programme. There shall be two semester for each year of the Programme. Each of the Semester will be of 16 weeks duration including evaluation and grade finalization period. The academic session in each semester will provide 90 teaching days with 48 hours of teaching / learning periods in six days session per week.

9.7 The normal calendar for the semester would be as follows:

- i. I and III semester - August - November
- ii. II and IV Semester - January - April

**10. Attendance:**

**10.1** Each paper shall be taken as a unit for the purpose of calculating the attendance.

**10.2** Each student will have to sign and mark his attendance for every hour of teaching of each paper. At the end of every month all teachers shall notify the attendance of every student on the Notice Board of the department during 2<sup>nd</sup> week of every month. Chairman shall certify the fulfillment of required attendance of every candidate in the Examination form.

**10.3** Certain proportion of the marks in Internal Assessment shall be awarded based on attendance as an incentive to the student for regularity in attendance.

**10.4** A student shall be considered to have satisfied the requirement of attendance for each paper, if he/she has to attend not less-than 75% of the number of classes held up to the end of the semester including tests, seminars, group discussions, practical, tutorials, etc.

**10.5** However, if a student represents his/her institution, University, State or Nation in sports, NCC, NSS or Cultural activities or any other officially sponsored activities, he/she shall be eligible to claim the attendance for the actual number of days participated, subject to a maximum of 20 days in a semester based on the specific recommendation of the head of the Department.

## Course outline

First semester							
Code	Title of the Paper	Teaching Hrs.	Exam. Duration	Internal Assessment	Max. Marks	Total Marks	Credit
PG78T101	Introduction to Electronic Media	04	3 Hours	25 Marks	75 Marks	100	04

## 11. Media Visit

There shall be a media visit, which is compulsory and a student has to submit a media visit observation report. Media visit will be conducted during mid semester vacation falling between III and IV Semester.

## 12. Submission of Project work

- 12.1 M.Sc in Electronic Media III semester students shall have to choose a topic for project and preliminary preparation be carried out under the guidance of a teacher.
- 12.2 M.Sc in Electronic Media IV semester students shall have to submit the project report on the chosen topic, before the commencement of the practical examination.
- 12.3 Candidates keeping terms but not appearing for the theory and practical papers and not submitted the project report within the prescribed time, may appear for respective examination and submit the project report within the prescribed time.
- 12.4 Candidates appearing for the examination under the provision of (12.3) will not be eligible for the award of any rank, prize, medal etc.

## 13. Internship

- 13.1 The internship is compulsory for all the students. They shall work in any recognized electronic media institution as an internee for a period of one month (i.e. 4 weeks) after the completion of the fourth semester examination.
- 13.2 The internee shall produce a certificate issued by the head of the media institute.

## 14. Evaluation:

- 14.1 Each Course has two components; the first is Internal Assessment Marks and the second is the Semester End Exams. The Internal Assessment (IA) marks are based on continuous Internal Assessment. The total marks for the Internal Assessment would be based on the total credit awarded to the Course. For instance if a Compulsory Course has a Credit award of 4, then the total maximum marks would be 100 for the subject. The marks shall be displayed on the Notice Board of the Department also. The tests shall be written in a separately designated book and after evaluation; the same should be shown to the students.
- 14.2 In case of candidates who wish to appear in improvement examinations, if any, the marks obtained in the Internal Assessment shall not be revised. There is no improvement for internal assessment.
- 14.3 To encourage the students for the regular participation in academic curricula following break-up for attendance has been recommended.

Attendance	Marks Allotted
91 to 100%	3
81 to 90%	2
75 to 80%	1

- 14.4 Students seeking the condoning of attendance after representing the University have to produce attendance certificates from the concerned authority and that

attendance period to condone shall be considered for the allotment of marks as under.

- 14.5** There shall be one semester end examination of three hours duration (for 75 marks/ paper). Each answer script of the semester end examination (theory and project report) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks such a script shall be assessed by third external examiner. The marks allotted by the third examiner shall be average with nearer mark of the two evaluations.

## **15. Completion of Course:**

- 15.1** A candidate is expected to successfully complete P.G. Master's Degree course in two years from the date of admission.
- 15.2** Whenever the syllabus is revised, the candidate reappearing shall be allowed for PG Degree examinations only according to the new syllabus.
- 15.3** The CBCS scheme is fully carry-over system. However, the four -semester two years course should be completed by a student within double duration of the normal course period (i.e, 4 years). For these periods, candidate may be permitted to take examination in cross-semester (even semester examination in even and odd semester examination in odd semester examination) after paying the examination fees as prescribed by the university.

## **16. Declaration of Results:**

- 16.1** Minimum for a pass in each paper shall be 40% of the total 100 marks including both the IA and the semester end examinations. However, candidate should obtain at least 40% of the marks in the Semester end Examination. There is no minimum score in the IA marks. However after adding the IA and the semester end examination, the candidates should score a minimum of 40 % of the maximum marks for the subject.
- 16.2** The candidates, seeking improvement of their results shall submit a representation along with a permissible fee to the Registrar (Evaluation) and surrender the degree certificate/ provisional pass certificate /original marks card of that semester within 15 days of the announcement of results.

## **17. Marks and Grading**

The grading of successful candidate at the examination shall be as follows:

Percentage	GPA/CGPA	Letter	Class
75.00 to 100.00 %	7.50 to 10.00	A	First Class with Distinction
60.00 to 74.90%	6.00 to 7.49	B	First Class
50.00 to 59.94%	5.00 to 5.99	C	Second Class
40.00 to 49.94%	4.00 to 4.99	D	Pass
Less than 40.00%	Less than 4.00	F	Fail

<b>Paper Code and Title</b>	<b>PG78T101: Introduction to Electronic Media</b>
-----------------------------	---

***COURSE OUTCOMES (CO's) after completing this paper, the students will be able to:***

- CO-1** Understand the process and nature of communication and various forms of communication understand the barriers to effective communication and learn to remove them.
- CO-2** Study and understand various models of communication and national international theories of communication.
- CO-3** Understand various forms of electronic media.
- CO-4** Learn effective speaking, listening and writing skills for communication in personal life, public life, and in media fields.
- CO-5** Get benefited with communication skills in his/her personal, public and professional life.

- Unit - I** Communication, Definitions, Nature and Scope of Communication, Types of Communication, Inter and Intrapersonal Communication, Verbal and Non-Verbal communication, Group and Mass Communication, Process of Communication, Barriers of Communication.
- Unit - II** Theories of Communication, Normative theories of media, Cultural theories of media, Diffusion of innovation theory, Democratic Participatory theory, Models of Communication: SMR, SMCR, Shannon and Weaver, Lasswel, Osgood, Schramm, Gerbener.
- Unit - III** Introduction to radio, Technology and Innovations of Radio, Types of radio, Amplitude Modulation and Frequency Modulation, Analogue and Digital Radio.
- Unit - IV** Introduction to Television, Technology and innovations, Historical perspective of television, Terrestrial, cable and Satellite television.
- Unit - V** Internet, Definitions, Technology and Innovations, Historical perspectives of Internet, Local Area Network (LAN), Metropolitan Area Network (MAN) Wide Area Network (WAN), Wireless Local Area Network (WLAN).

<b>Paper Code and Title</b>	<b>PG78T102: Basics of Computer Applications</b>
-----------------------------	--

---

**COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:**

- CO-1** Learn basics of computer and functions of different computers.
- CO-2** Understand Operating systems, System software's and different application software's.
- CO-3** Develop an intuitive sense of working with computers for academic and professional efficiently.
- CO-4** Learn and understand various multimedia applications and their importance in information, education and entertainment fields.
- CO-5** Understand the role and importance of computers in media industry.
- 

- Unit - I** Computer: Definition, Generations of Computers and Types of Computers: Mainframe Computer, Mini Computer, Micro Computers and Super Computers.
- Unit - II** Input Devices, Output Devices, CPU, Modem, Control Panel, Memory: Primary and Secondary Memory, Storage Devices.
- Unit - III** Operating System, Application Software's, System Software's, Open Source Software's, proprietary software's.
- Unit - IV** Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Nudi.
- Unit - V** Multimedia, Elements of Multimedia, Multimedia Applications in Education and Entertainment, Uses and Limitations of Computers, Role of Computers in Media Industry.
- 

**Record Book: All students should prepare and maintain a practical record book and submit the same on the day of practical examination.**

**COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:**

**CO-1** Define news and understand the elements, principles, values and structure of news.

**CO-2** Gain knowledge about various news sources along with their management.

**CO-3** Learn reporting for electronic media and different positions and their duties and responsibilities in electronic media.

**CO-4** Have the knowledge about create & present the content for different electronic media.

**CO-5** Understand different stages of production and think critically about different ideas and concepts of news based programmes.

**Unit - I** News: Definitions of news, Elements of news, Principles of news and news values, Structure of news, Formats of news, Hard news and Soft news.

**Unit - II** Sources of news: News Agencies, Government Sources, Press Releases, Press Conferences, Field Reporting, Staff Correspondents, Special Correspondents and Foreign Correspondents, Stringers, Online Sources, Sting Operation, Interview.

**Unit - III** News writing for Radio, News writing for Television, News writing for Online Media, Writing Intros and leads, News Translation Techniques.

**Unit - IV** News Bits: Crime, Sports, Speech, Seminar, Cultural, Political, Social, Judiciary and Legislature.

**Unit - V** Different stages of scripting: Idea, Research, Synopsis, Outline, Treatment, Story board, Screen play script, Script writing formats, Master scene script format, Split page format, Fiction script writing, Non-fiction script writing.

<b>Paper Code &amp; Title</b>	<b>PG78T104 : Introduction to Digital Media</b>
-------------------------------	---

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

**CO-1** Learn and understand the basics of digital media.

**CO-2** Identify various storage devices of digital media.

**CO-3** Have knowledge about various digital media platforms.

**CO-4** Capable to create a digital presentation using multimedia elements.

**CO-5** Identify digital content and sources.

<b>Unit - I</b>	Digital Media: Definitions, Nature and Scope of Digital Media, Characteristics of Digital Media, Types of Digital Media and Limitations of Digital Media.
<b>Unit - II</b>	Digital Storage Media: USB Flash Drive, Hard Disc Drive, Cloud Drive, Memory Cards.
<b>Unit - III</b>	Digital Media Platform: Website, Blog, Facebook, WhatsApp, News Portals, e-papers, YouTube, Instagram, Twitter.
<b>Unit - IV</b>	Digital Content: Understanding Different File Types, Digital File Formats Resolutions, Compression Schemes, and Compatibility.
<b>Unit - V</b>	Digital Images, Digital video, Video game, Web pages and Websites, Social media, Data and Databases, Digital Audio, Electronic Books, Animation Creation with Flash.

**Record Book: All students should prepare and maintain a practical record book and submit the same on the day of practical examination.**

<b>Paper Code &amp; Title</b>	<b>PG78P106 : Computer Application (Practical-I)</b>
-------------------------------	--

**COURSE OUTCOMES:** (CO's) after completing this paper, the students will be able to:

- CO-1 Learn the file management concept and their importance in electronic media.
- CO-2 Learn the different applications of Microsoft office.
- CO-3 Gain practical knowledge working with Nudi software.
- CO-4 Understand how to prepare bio-data and options of document format.
- CO-5 Understand how to prepare bio-data along with presentation skills.

### Particulars of Practical

1. File management (Practice)
2. Working with word processing (Practice)
3. Working with spreadsheets (Practice)
4. Working with PowerPoint (Practice)
5. Working with Nudi and other application software's (Practice)
6. All the students should prepare his/her Bio Data using Microsoft word and should experiment with all text formatting options available in the software (Assignment)
7. All the students should prepare minimum five Slides in PowerPoint on a given topic and present the same on the scheduled day (Assignment)

<b>Paper Code and Title</b>	<b>PG78P107 : Digital Media (Practical-II)</b>
-----------------------------	--

**COURSE OUTCOMES:** (CO's) after completing this paper, the students will be able to:

- CO-1 Learn the image and text scanning and image resolutions for different production.
- CO-2 Learn the different applications of Photoshop and photo editing.
- CO-3 Gain practical knowledge working with animation software.
- CO-4 Understand how to record and save files in different digital formats.
- CO-5 gain the knowledge about various formats of multimedia elements

### Particulars of Practical

1. Scan text, photo and other materials and convert it into digital file
2. Work with Photoshop and edit photos.
3. Record your voice and save the file in different audio formats.
4. Create simple animation using flash software.
5. Record a video clip and save it in different formats.

<b>Paper Code &amp; Title</b>	<b>PG78T201 : Introduction to Cinema</b>
-------------------------------	--

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

- CO-1** Understand the footsteps of cinema and changing faces of India cinema.
- CO-2** Criticism of cinema study cinema as a medium of mass communication.
- CO-3** Gain the knowledge about technical aspects of cinema production.
- CO-4** Identify various forms of cinema along with film awards and festivals.
- CO-5** Understand national and international film makers and their contributions to the cinema.

- Unit - I** Introduction to Cinema, Early efforts – Historical development of Indian films, Silent era, Talkies, Indian cinema after Independence, Parallel cinema, Commercial cinema, Issues and problems of Indian cinema.
- Unit - II** Film as a mass medium, Cinema as an institution, Film and Society, Film Reviews, Film Appreciation, Criticism of Cinema.
- Unit - III** Elements of film: Camera, Lighting, Sound, Visual Effects, Editing, Three Act Structure, Developing Character, Dialogue writing, Story Board.
- Unit - IV** Documentaries, Art movies, New wave cinema, Film Awards and festivals , Film Societies, Piracy, Role and responsibilities of the Cinematographer and the Director.
- Unit - V** Major filmmakers : Alfred Hitchcock, Orson Wells, Akira Kurosawa, Martin Scorsese, Majid Majidi, Satyajit Ray, Sham Benegal, Girish Kasaravalli. Meera Nair, Steven Spielberg, Charlie Champlain and Puttanna Kanagal.

<b>Paper Code &amp; Title</b>	<b>PG78P206 : Radio (Practical-I)</b>
-------------------------------	---------------------------------------

**COURSE OUTCOMES:** (CO's) *after completing this paper, the students will be able to:*

- CO-1 Learn to record and convert the audio files in different formats.
- CO-2 Learn the different techniques of sound editing.
- CO-3 Gain practical knowledge working with audio equipments and software.
- CO-4 Understand sound effects and their importance.
- CO-5 Acquire knowledge podcasting (Internet radio).

### **Particulars of Practical**

1. Record your voice in different formats
2. Correct errors and add new parts.
3. Blend sound to create moods.
4. Record live talk show using multiple mikes.
5. Record a video clip and save it in different formats.
6. Experiment and discover your own unique sounds and special effects.
7. Create a signature tune, a PSA, a radio spot, a radio ad, a jingle.
8. Produce programmes in different formats (Talk , comparing, announcement, anchoring, interviews etc.)
9. Create an audio story with BGM, ambience and effects (duration 5 to 10 minutes).

<b>Paper Code &amp; Title</b>	<b>PG78P207 : Visual Communication (Practical-II)</b>
-------------------------------	---

**COURSE OUTCOMES:** (CO's) *after completing this paper, the students will be able to:*

- CO-1 Learn create and blend text in different shapes and colors.
- CO-2 Learn work with Photoshop, Coral Draw and illustration software's.
- CO-3 Gain practical knowledge about color manipulation techniques.
- CO-4 Learn and understand VFX techniques.
- CO-5 Understand and create hand drawing skills.

### **Particulars of Practical**

1. Create text in different shapes and colors. (Photoshop/Coral Draw/Illustrator)
2. Perspectives (Hand Drawing).
3. Composition (Hand Drawing).
4. Light and shade (Hand Drawing).
5. Birds, Animals and Human forms (Hand Drawing).
6. Design your own logo (Hand Drawing / Photoshop).
7. Image Manipulation- Colour to Monochrome (Photoshop).
8. Monochrome to Colour. (Photoshop)
9. Design a front page of magazine of your own imagines.(In design / Photoshop).
10. Practice and produce a 5 minutes documentary/short film by using VFX techniques. (Premier Pro / After Effects)

<b>Paper Code &amp; Title</b>	<b>PG78P208 : Swatch Bharat Internship (Practical-III)</b>
-------------------------------	--

---

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

**CO-1** Expose to the community activities and learn working with community.

**CO-2** Learn the duties and responsibilities of an individual in social life and understand the importance of cleanliness.

**CO-3** Understand the functions of NSS other social service agencies.

**CO-4** Maintain healthy and hygienic life in the society.

**CO-5** Contribute social services in the university campus.

---

***Practical components:***

1. All students shall depute to NSS or Other units of the university or government agencies to carry out Swachh Bharat Internship.
2. All students should submit a detailed report about their internship experiences after successful completion of internship programme.

Paper Code & Title	PG78T301 : Video Editing
<b>COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:</b> <b>CO-1</b> Understand the importance and principles of video editing. <b>CO-2</b> Gain knowledge about overview about visual editing tasks. <b>CO-3</b> Learn the advantages of visual effects and sound effects along with their controls. <b>CO-4</b> Know the techniques of titling and title animation. <b>CO-5</b> Generate Edit Decision List and its advantages during video editing.	
<b>Unit - I</b>	Introduction to editing, Evolution of editing, Principles of editing, Forms of editing: Linear editing, Non -linear editing, Live editing.
<b>Unit - II</b>	Understanding editing tools, Match on action, Shot-reverse shot, Eye-line match etc. Match cut, Jump cut - Cut in, Cut away, Master shots, Montage-types and uses.
<b>Unit - III</b>	Editing Scripts, Workflow and workspace, Project Setup, Importing Footage, Monitoring Assets, Editing Sequences and clips, Effects and Transition.
<b>Unit - IV</b>	Effects, Effects Control, Transitions, Transition Editing, Editing Audio, Titling and the title, Animation and Key frames, Compositing, Exporting.
<b>Unit - V</b>	Video Formats, Audio formats, Building Sound Tracks, Sound carriers, Sound Bridge, Sound effects, Rendering, Settings for final output, Generating an EDL.
<b>Record Book:</b> All students should prepare and maintain a practical record book and submit the same on the day of practical examination.

<b>Paper Code &amp; Title</b>	<b>PG78T302 : Television Production Techniques</b>
-------------------------------	--

**COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:**

**CO-1** Understand the evolution television and its growth in India.

**CO-2** Handle the television programme production task independently.

**CO-3** Gain the knowledge about different types of video cameras and this operations

**CO-4** Equip with different production techniques of television programmes.

**CO-5** Develop graphic presentation and lighting techniques in television production.

<b>Unit - I</b>	Evolution of television, Nature and characteristics of television, Growth of television in India, Organizational structure of Doordarshan, Satellite TV Channels.
<b>Unit - II</b>	Camera: Types of Camera, Parts of camera, Camera movements, Camera angles, Camera shots, Visual compositions, Single and Multi Camera operations, Types of television systems (NTSC, PAL).
<b>Unit - III</b>	Types of TV Programmes: Anchoring Visual Bite, Voiceover, News Presentation, Peice to Camera (PTC), News chit-chat, walk through News reading, Chit-Chat, Walkthrough, Panel discussion, Reality Shows, Interviews.
<b>Unit - IV</b>	Audio and visual elements, Informational and Educational Programme Production, General and Special Audience Programme Production, Language and style of presentation, Video jockeying, Entertainment programmes, Audience participation.
<b>Unit - V</b>	Graphic elements, Creating TV background, Animated Visual Background, Commercials production for television, Lighting techniques, Types of lighting, Natural lighting, Artificial lighting, Three point lighting system.

**Record Book:** All students should prepare and maintain a practical record book and Submit the same on the day of practical examination.

6. Gerald Millerson – Techniques of TV Production

<b>Paper Code &amp; Title</b>	<b>PG78T303 : Radio Production Skills</b>
-------------------------------	---

**COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:**

**CO-1** Understand types of radio and their characteristics.

**CO-2** Learn about the organizational structure of All India Radio and the functions of different departments of radio AIR.

**CO-3** Gain the knowledge about skills of radio programme production.

**CO-4** Produce different radio programmes for different group of people in the society.

**CO-5** Understand the basics of single track and multi track sound editing.

**Unit - I** Introduction to radio, Evolution of radio in India, Characteristics of radio, Types of radio stations (AM/FM), Community radio, Organizational structure of All India Radio.

**Unit - II** Structure of operational radio studio, Types of microphones, Sound Pic-up Patterns, Types of sound recording equipments, Voice Modulation, Pronunciation.

**Unit - III** Types of radio programmes, Formats of radio programmes, News production, Radio feature, Documentary, Music-based Programmes, Radio Jacky, Radio Talk, Interview, radio announcements.

**Unit - IV** Interactive radio programmes, Phone-in-programme, Special audience programmes, Drama and plays, Educational programmes. Outdoor and live programme production, Field production techniques.

**Unit - V** Sound editing, Single track and multi track editing, Sound mixing, Sound effects, Perception of final output, Hearing sensitivity, frequency range, Wavelength, Audience research wing.

6. P.C.Chatterjee – Broadcasting in India
7. Stanly Alan – Audio in Media
8. R. Maclicesh – Radio Production Teqhniques
9. Hausman, Benoit and Lewis – Modern Radio Production

<b>Paper Code &amp; Title</b>	<b>PG78T304 : Media Research Methods</b>
-------------------------------	--

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

- CO-1** Understand the areas and concepts of research in media fields.
- CO-2** Identify the various problems in electronic media field to conduct research.
- CO-3** Define research and differentiate pure and applied research.
- CO-4** Cope up with various methodologies involving in media research.
- CO-5** Understand the tools and techniques of conduct research in the area of electronic media.
- CO-6** Study the data collection techniques and data analysis methods with different statistical software's and tools.
- CO-7** Understand the ethics involve in research activities and research report writing techniques.

- Unit - I** Significance of media research, Definition, Elements of research, Scientific approach, Research and communication theories, Role, Function, Scope and Importance of media research, Basic and Applied research.
- Unit - II** Research design components, Experimental, Quasi-experimental, Longitudinal studies, Simulation, Panel studies, Field studies, Review of literature, Methods of media research: Census method, Survey method, Observation method, Clinical studies, Case studies, Content analysis.
- Unit - III** Tools of data collection: Sources, Media source books, Questionnaire and Schedules, People's meter, Diary method, Field studies, Logistic groups, Focus groups, Telephone survey, Field surveys, Online survey, Exit polls and pre-election survey, Public opinion surveys, Survey of media habits, Methods of sampling, Hypothesis.
- Unit - IV** Data analysis techniques: Coding and tabulation, Levels of measurements, Random sampling methods and representativeness of the samples, sampling errors and distributions in the findings, SPSS and other statistical packages.
- Unit - V** Report writing, Media research as a tool of reporting, readership and audience surveys, preparation of research reports, project reports, Dissertations, Theses, Reference styles, Ethical perspectives of mass media research.

Paper Code & Title	PG78T305 : Broadcast Journalism (OEC)
--------------------	---------------------------------------

**COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:**

**CO-1** Understand the footsteps of broadcasting and characteristics of radio.

**CO-2** Learn about various formats of radio and television programmes.

**CO-3** Gain the knowledge about skills required to produce radio programme.

**CO-4** Develop writing skills for radio and television.

**CO-5** Understand the process of audience survey and TRP techniques.

<b>Unit - I</b>	Evolution of radio broadcasting in India, Historical perspectives of television in India Characteristics of radio, Television as a medium of mass communication.
<b>Unit - II</b>	Radio programme formats: Radio talk, Interview, Discussion, Documentary, Drama and Plays, Radio Jockey, Music Programmes, Special audience programmes: Children, Youth, Women and Educational programmes.
<b>Unit - III</b>	Writing for radio, Writing for television, Story Board for different programmes, Recording equipments, Microphones and audio equipments, Satellite communication, SITE, INSAT.
<b>Unit - IV</b>	Television Programme formats: News, TV anchoring, Panel Discussion, Celebrity interviews, Live coverage, Documentary.
<b>Unit - V</b>	Audience research wing, Television rating point (TRP), Stages of programme production, Programme promotion strategies, Social service ads, Public service ads, Broadcasting code.

6. D.K.Choler – Broadcast Journalism
7. Mehara Masani – Broadcasting and People
8. B.N.Ahuja – Audio Visual Journalism

<b>Paper Code &amp; Title</b>	<b>PG78P306 : Video Editing (Practical-I)</b>
-------------------------------	---

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

- CO-1 Understand different video editing software's.
- CO-2 Learn the techniques of sound and video editing.
- CO-3 Gain practical knowledge working with project and sequences.
- CO-4 Understand process of video rendering.
- CO-5 Be aware about post production activities.

### **Particulars of Practical**

1. Understanding video editing software's
2. Working with editing tools.
3. Modify workspace.
4. Add and delete sequence, tracks (Audio and Video)
5. Edit and modify video effects, transitions and sound effects.
6. Setting final output.
7. Rendering video
8. Generating EDL

<b>Paper Code &amp; Title</b>	<b>PG78P307 : Television Production (Practical-II)</b>
-------------------------------	--

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

- CO-1 Learn different stages of production
- CO-2 Learn advertising production techniques.
- CO-3 Gain practical knowledge produce different television programmes.
- CO-4 Learn and understand VFX techniques.

### **Particulars of Practical**

1. Produce a short film of duration ranging from 2 minutes to 20 minutes
2. Produce an advertising film
3. Produce a television show
4. Produce a comedy programme
5. Produce a game show/cookery show/interview

***Note : All practical details (Concept, Script, Story board, screen play. etc) should Be recorded in the practical record book and the same should be submitted At the semester end.***

Paper Code & Title	PG78T401 : Electronic Media Management and Event Management
--------------------	---

**COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:**

**CO-1** Understand the nature, scope and principles of media management.

**CO-2** Identify the economics of electronic media.

**CO-3** Enable to plan, execute and manage and conduct different events.

**CO-4** Gain the knowledge about ownership patterns of electronic media.

**CO-5** Impart practical knowledge about programme scheduling, record keeping and employee relations services.

- |                   |   |
|-------------------|---|
| <b>Unit - I</b>   | Management, Principles of media managements, Nature, Scope and Significance of media management, India's major electronic media houses, Capital in media, Major income heads in media industry,                               |
| <b>Unit - II</b>  | Event management, Principles of event management, Preparing event proposal, Size and type of event, Costing and budgeting, Event team, Event planning, SWOT analysis, Live Media Management.                                  |
| <b>Unit - III</b> | Ownership patterns of electronic media, Managing media Organization: Planning, Coordination, Motivation, Control, Decision Making.  |
| <b>Unit - IV</b>  | Structure of radio and television organization, Recruitment and hiring of staff, service conditions, channel management, training for staff, apex bodies: DAVP, INS and ABC.  |
| <b>Unit - V</b>   | Programme management in electronic media; Scheduling, Transmitting, Record keeping, Quality control and cost effective techniques, Ethics in electronic media management, Employee, Employer and customer relations services. |

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

CO-1 Define corporate communication, nature and scope of corporate communication

CO-2 Identify the functions of corporate communication.

CO-3 Enable the student to work with the corporate world of electronic media.

CO-4 Acquire knowledge about media relations and public relations

CO-5 Understand social responsibilities of corporate sector.

- Unit - I** Corporate Communication – Definition, Nature, Scope and Importance of Corporate Communication, Historical relevance and contemporary relevance, Communication in organizations: Internal and external, Downward, Upward, Horizontal and Diagonal communication.
- Unit - II** Faces of corporate communication, Organizational communication, Marketing communication, Management communication Principles of effective communication.
- Unit - III** Functions of corporate communication- Media relations, Government relations, Employee Relations, Costumer Relations, Public Relations.
- Unit - IV** Corporate Reputation and Image Identity, Concept of corporate personality and identity, Brand valuation and Equity, Role of communication in building corporate reputation, Crisis management.
- Unit - V** Corporate Social Responsibility, Importance of CSR, CSR focus areas and practices, Environmental conservation, Energy conservation Disaster relief, Consumer rights advocacy, Community development.

10. Argenti – Strategic Corporate Communication.
11. Alan T. Belasen - The Theory and Practice of Corporate Communication: A Competing Values Perspective.

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

**CO-1** Understand the basics of research and its application.

**CO-2** Gain the knowledge about identify various problems of electronic media

**CO-3** Understand the important objectives of the research in electronic media.

**CO-4** Understand the different data collection tools and techniques.

**CO-5** Know the different research methods of conducting research.

**CO-6** Understand different sampling techniques

**CO-7** Understand and analyze the different aspects of Report writing.

**Unit - I** Identifying various electronic media problems, Topic about the media itself, Radio, TV, Online, Digital, Social Media. Uses and Users of media different media, Media effects on users. (Selection and finalization of the topic for project work) (**Time limit:** first 2 weeks of the semester)

**Unit - II** Review existing studies. (Record the findings of early studies) (**Time limit:** 3 weeks after defining project title)

**Unit - III** Adopting appropriate methodology (Survey, Content analysis, Case study. etc) for the study, preparing data collection tools. (**Time limit:** 2 weeks after reviewing existing data and early studies)

**Unit - IV** Data Collection, Data tabulation, Creating tables and charts (**Time limit:** 4 weeks after designing tools of data collection)

**Unit - V** Finding out the results, Discussion on major findings, Making suggestions, Concluding the (Study) project, Preparing final report of the project submission. (**Time limit:** 3 weeks after data collection).

***Note : Project work should be carried out and completed within the time limit as mentioned at the end of respective units. (Total time limit: 14 Weeks)***

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

**CO-1** Understand the basics of online media production.

**CO-2** Design concepts of web pages and other online media content.

**CO-3** Understand the duties and responsibilities of web design and management team.

**CO-4** Gain the knowledge about cyber journalism and cyber culture.

**CO-5** Understand working with online media content.

**Unit - I** Introduction to online media, Origin and growth of online media, fundamentals of online media, Types of online media, Media convergence.

**Unit - II** Internet and Intranet, Browsers, Search engines, Web structure, Web blogs, Websites, Mobile Apps, e-publication,

**Unit - III** Writing for web media, Web Development Tools, Web Advertising, Web casting, Pod casting, HTML, Dreamweaver, Flash. Web reporting and updating.

**Unit - IV** Making of web page, Web team member: Graphic Designer, Project Manager, Web site manager, Animator, Audio-video expert, video conferencing, ecommerce: Buying, Selling, Banking, Advertising on Internet.

**Unit - V** Cyber journalism and cyber culture, Internet TV, Internet radio, Cell phones and SMS, Social network sites.

***Record Book: All students should prepare and maintain a practical record book and submit the same on the day of practical examination.***

<b>Paper Code &amp; Title</b>	<b>PG78P406 : Online Media (Practical-I)</b>
-------------------------------	--

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

- CO-1 Understand the process of creating blog.
- CO-2 Learn the techniques of uploading content to digital platforms.
- CO-3 Gain practical knowledge to create dynamic with HTML tags and static web pages.
- CO-4 Understand process of creating YouTube channel and upload video to the YouTube channel.
- CO-5 learn real-world skills from leading designers, artists, and entrepreneurs.

### **Particulars of Practical**

1. All students of the course shall create a Blog.
2. Customize your Blog Settings.
3. Upload your own digital content to your Blog.
4. Create a YouTube Channel and upload 2 video clips of your own production
5. Create a web page using Dreamweaver.
6. Prepare your bio-data using HTML Codes.

<b>Paper Code &amp; Title</b>	<b>PG78P407 : Production of Video Magazine (Practical-II)</b>
-------------------------------	---

***COURSE OUTCOMES: (CO's) after completing this paper, the students will be able to:***

- CO-1 Learn reporting techniques for electronic media
- CO-2 Learn script writing and production techniques for video magazine.
- CO-3 Gain practical knowledge produce special segment video magazine.
- CO-4 Learn the techniques of news chitchat and give PTC.
- CO-5 Understand the interview skills and identify news worthy components.

### **Particulars of Practical**

1. All students of each batch (If batches are made) should collect the information (Academic, Sports, Cultural, literature, achievements of the students, faculty and staff members of the University) during the course of all four Semesters.
2. Prepare news scripts for video news magazine based on the collected information.
3. Produce a news bulletin for video magazine.
4. Produce a special segment for video magazine.
5. Produce a news chit-chat in campus for video magazine.

***Note : All practical details (Concept, Script, Story board, screen play. etc) should be recorded in the practical record book and the same should be submitted at the semester end.***

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPARTMENT OF ELECTRONICS**

**M.Sc. Electronics**  
**Syllabus**

for

***Choice Based Credit System (CBCS)***

***With Effect From***

**2018-2019**

***onwards***

The M.Sc. course in Electronics was started during 1995–96 in the Department of Physics under the UGC thrust area programme. Keeping in view of the up gradation in the field of electronics at both academia and industry the curriculum is accordingly prepared. Department is committed to the academic excellence, creativity and all-round development of the students. Over the years the students of the department have occupied good positions in industry/academia at both national and international level.

### **Programme of Study:**

The M.Sc. Course is a two-year programme spread over four semesters each of sixteen weeks duration. There will be two categories of courses offered by the Department Viz., Compulsory and Elective Courses (as per regulation 7.2). A compulsory course means a course in Electronics, which a student admitted to M.Sc. Programme in Electronics, should successfully complete to receive M.Sc. degree in Electronics. An Elective course means a course offered in Electronics by the department, for the students of other departments. A student admitted to M.Sc. programme in Electronics should necessarily opt the compulsory courses in Electronics and elective courses offered by the other departments. Students have the freedom to choose from among the prescribed elective courses as per university guide line.

Compulsory courses consist of 14 theory courses and 07 practical and 01 project courses. The Project is in the Fourth semester.

The two Elective courses offered by the Electronics Department for the students of other departments, comprise one theory course each in the second and third semesters only.

### **Credits:**

A student shall complete 96 credits to complete postgraduate course in Electronics with 24 credits per semester. The credits for each of the theory (compulsory and elective) courses and for each of the practical/project (compulsory) courses shall be 4. For the I and IV semesters, there shall be 24 credits for the compulsory courses and for the II and III semesters, there shall be 20 credits for the compulsory courses. There shall be 4 credits each for the open elective courses offered by the other students during II and III semesters. In each of the first three semesters, there are two practical courses each of 04 credits and fourth semester comprises of 01 practical and 01 project courses of each 04 credits. A student shall register for 24 credits per semester.

## 1. M.Sc. Electronics Degree Programme:

**Duration of the Degree Course:** M. Sc. Degree Course is of Two years duration spread over Four semesters each of sixteen weeks duration.

**Eligibility for Admission:** B.Sc. degree of this University or of any other University recognized as equivalent there to with the optional combinations of i) Electronics, Physics, Mathematics and ii) Electronics, Computer science, Mathematics. The minimum percentage of marks in optional subjects as well as in aggregate will be as per the prevailing rules of the University.

**Admission Intake:** 25 students for the First semester (it may vary from time to time with the permission from the University). This includes admission under enhanced fee structure. Other rules for admission are as per University notification from time to time.

**2. Attendance:** Every student must have at least 75% attendance in each of the course (Theory and Practical) in each semester. Shortage of attendance will be dealt with as per the University rules from time to time.

**3. Medium of Instruction:** The medium of Instruction shall be English.

### 4. Scheme of Instruction:

In each Semester there will be Compulsory FOUR theory Courses and TWO Practical Courses.

Each theory Course is of FOUR hours of Lectures per week. Each practical course is of FOUR contact hours per week. These include Seminars, Tutorials and Discussion classes. Internal assessment shall be based on written tests/practical tests conducted during the semester.

Each theory and practical Courses shall carry 100 marks out of which 25 marks are for Internal Assessment (IA) test. Various components of IA of 25 marks are as: Attendance-3 marks, written test/Seminar/Assignment – 22 marks.

The total maximum marks for compulsory courses (Theory & Practical) for I semester shall be 600 and for IV semester shall be 650 and for each of II and III semesters shall be 500.

**Project:** Every student has to perform a Project course in the FOURTH Semester. This may be either theoretical or experimental project relating to electronics subject. More than one student may be allowed to work on a particular project. Project course carries 150 marks, of which 25 is for IA, 50 marks for viva-voce examination with a presentation and 75 marks for the evaluation of project report.

5. **Scheme of Evaluation:** Evaluation of each of the courses will have two components, the first being internal assessment (IA) and the second being the semester-end examinations. For a theory and practical courses having a credit award of 4, the total maximum marks shall be 100. Out of the total of 100, 25 marks shall be earmarked for the IA and remaining 75 marks for the semester -end examination. For the project, having a credit award of 06, the total maximum marks shall be 150, out of the total of 150, 25 marks shall be earmarked for IA and the remaining 125 marks for the semester end examination.

**Examination:** Examination will be conducted at the end of the each semester as per the regulations governing PG Programmes in the faculty of Science & Technology. At semester end examination each theory course will have ONE question paper of 3 hours duration and will carry maximum marks of 75. The internal assessment tests will be conducted during the semester. The mode of conducting Internal Assessment tests may involve a common test for all the courses of that semester. Each practical course will have examination generally, of four hours duration and will carry a maximum of 75 marks at the end of semester. Internal assessment for 25 maximum marks is made through test/seminars.

**Project:** Each student should submit Project report at the end of IV semester to become eligible for examination. The evaluation of project report carries a maximum of 75 marks. The viva-voce examination carries a maximum of 50 marks and will be in the form of presentation. Internal Assessment for 25 maximum marks is made through test/seminar.

**Question Paper Pattern:** There will be FIVE questions in a question paper of each theory course for the semester end examination. Each question carries 15 marks. Of the five questions, one question each will be drawn from each of the FOUR units for each compulsory course in the syllabus. Each question will have an internal choice drawn from same unit. Each question will consist of two parts, the one part of 10 marks and the other part of 5 marks. The fifth question, also carrying 15 marks shall contain four sub questions (one from each unit) with an option to answer any three. The four sub questions may be in the form of a problem/short answer question/question for explanation of a concept.

**Distribution of Marks:**

Theory Course:	Max Marks
Examination	75
Internal assessment	25
Total	<b>100</b>
Practical Course:	
Examination (Inclusive of 5 Marks for Journal and 10 Marks for viva-voce)	75
Internal assessment	25
Total	<b>100</b>
Project:	
Examination (Project Dissertation- 75, Viva-Voce-50)	125
Internal assessment	25
Total	<b>150</b>

**6. Maximum period for the completion of the M.Sc. Degree Programme:**

There shall be carry-over benefit from first to fourth semester. The maximum number of years required by a student to complete the degree is as specified the University from time to time.

**7. Rules and Award of Degree:**

The minimum for a pass in each course shall be 40% (Semester end exam and internal assessment put together) and 50% in aggregate when all courses of four semesters are put together. There shall be no separate minimum either for semester end examination or for internal assessment.

**Award of Degree:** Students after successfully completing all the courses prescribed for all the four semesters by scoring minimum of 50% in aggregate will qualify for the award of M.Sc. degree in Electronics.

**Results (Marks and Grading):** Results of the candidates are declared based on the marks obtained and grades earned and the class awarded as per the University rules.

**8. Facilities and activities:** Students are provided, with computer facilities for Internet browsing, library facility, counseling facility and Epsilon club facility. Epsilon club is an association of members consisting of Department Teachers, Research scholars and students. Through which students and Research scholars are encouraged to give lectures and to participate in extracurricular activities. Through this club special lectures by eminent scientists and staffs are arranged often.

	ELCP 4.6	Project:	6	6	4	125 (75 for dissert ati on and 50 for Viva)	25	150

***M.Sc. Electronics***  
***FIRST SEMESTER***

ELCT 1.1	Semiconductor Device Theory and Practice
ELCT 1.2	Signals and Systems
ELCT 1.3	Programming in C++ and Basics of Python
ELCT 1.4	Power Electronics Devices and Systems
ELCP 1.5	Practical-I: Analog & Digital Electronics and MATLAB
ELCP 1.6	Practical-II: Programming in C++ and Power Electronics

# M.Sc. ELECTRONICS

## FIRST SEMESTER

### COURSE ELCT 1.1: SEMICONDUCTOR DEVICE THEORY AND PRACTICE

*Teaching hours per week: 4*

#### UNIT-I

*No of credits: 4*

Crystal lattices: periodic structures, cubic lattices, planes and directions, diamond lattice, bonding forces in solids. Energy bands, direct and indirect semiconductors. Charge carrier concentration, Fermi level, electron and hole concentration at equilibrium, Temperature dependence of carrier concentration. Drift of carriers in electrical and magnetic field. Optoelectronic devices: Photodiodes, current and voltage in illuminated junction, solar cells, photo-detectors and Light emitting diodes.

**12 hours**

#### UNIT-II

Op-Amp introduction, Instrumentation amplifier, Waveform generators, Active filters- low pass, High pass, bandpass, band stop and all pass filters, Schmitt trigger, Precision Rectifier, Sample-and-Hold circuits. Timer 555 applications: Monostable & Astable Multivibrators, Monolithic waveform generators, V-F and F-V converters. Analog multipliers, PLL, Universal active filter and switched capacitor filter.

**12 hours**

#### UNIT-III

Performance Specifications of A-D and D-A Converters, D-A conversion Techniques-Weighted Resistor DACs, Voltage mode R-2R ladder DAC. A-D converter: Successive-Approximation ADC, Flash Converters, Integrating Type Converters. Digital Arithmetic circuits: ALU, Parallel binary adder, Design of Full adder, carry look ahead adder. Flip-Flop circuits: NAND and NOR latches, clocked flip-flop (S-R, J-K, D and T).

**12 hours**

#### UNIT-IV

Counters: Synchronous and asynchronous counters, UP/DOWN counter and counter applications. Shift Registers: Concept of Shift Registers and its applications MSI Logic families: Decoders, BCD-to-7 segment decoder/driver, encoders, Multiplexers and their applications, Demultiplexers, Magnitude Comparator, and Data bus operation. Memory devices: Read-Only memories, ROM architecture, Types of ROMs, flash memory. Programmable Logic Devices: Basic idea, PLD architecture (PROM), PAL, PALs, Applications of a programmable Logic Devices-GAL 16V A and Programming PLDs

**12 hours**

#### Text books:

1. Solid state electronics devices. Ben G Stretman and Sanjakuma Banarji. Pearson (2016)
2. "Op-Amps and Linear Integrated Circuits", Ramakant A Gayawad, PHI India Ltd
3. "Digital Systems- Principles and Applications" R. J. Tocci, 6/e, PHI India Ltd.,
4. "Digital Fundamentals" Floyd-Merrill's, International Series

#### Reference books:

1. Semiconductor Physics & Devices Basic Principles (2004) Donald A Neamen, McGraw Hill (3<sup>rd</sup> Edition)
2. "Linear Integrated Circuits", D. Roy Choudhary and Shail Jain, New Age International (P) Ltd.
3. "Digital Principles and Applications" A. P. Malvino and Leach, TMH, 1991
4. "Digital Logic and Computer Design". Morris Mano, PHI India Ltd.,

\*\*\*\*\*

## COURSE ELCT 1.2: SIGNALS AND SYSTEMS

*Teaching hours per week: 4*

*No of credits: 4*

### UNIT-I

**Introduction:** Overview of specific signals and systems, Classification of signals, Basic operations on signals. Elementary signals. Systems viewed as interconnections of operations, Properties of systems. **Time Domain representations of Linear Time-Invariant systems:** Introduction. Impulse response representations of discrete and continuous time LTI systems. Differential and difference equation representations of LTI Systems. Block Diagram representation (discrete-time). **12 hours**

### UNIT-II

**Fourier Representation of Signals:** Introduction, Discrete-Time periodic signals, The discrete-Time Fourier series, and Continuous-Time periodic signals. The Fourier series discrete time non-periodic signals, Fourier transform and properties of Fourier representation. **Application of Fourier Representation:** Introduction, frequency response of LTI systems, Fourier transforms representation for periodic signals, Convolution and Multiplication with mixtures periodic and non-periodic signals. Fourier transforms representation for discrete time signals. Sampling and reconstruction of continuous time signals. **14 hours**

### UNIT-III

**Representation of Signals Using continuous-Time Complex Exponentials:** Introduction, Eigen function property, LT representation, convergence, Pole-Zero. Unilateral L-T, Properties of Unilateral LT. Inversion of Unilateral L-T, Solving Differential Equations with Initial Conditions, LT Methods in circuit analysis. Properties of Bilateral LT. **12 hours**

### UNIT-IV

**Representation of signals Using Discrete-Time Complex Exponentials: The Z-Transform:** Introduction, Z-transform, properties of the ROC, properties of the Z-transform. Inversion of Z-transform, analysis of LTI systems. The unilateral Z-Transform. **12 hours**

#### Text books:

- 1) "Signals and Systems", Simon Haykin and Barry Van Veen-John, Wiley and sons, Inc.

#### Reference books:

- 1) "Signals and Systems", Oppenheimer, A. S. Willsky, 2/e Pearson education, In.,
- 2) "Signals and Systems", Bagli and Shah, Mahalaxmi Publications, Kolhapur.

\*\*\*\*\*

## COURSE ELCT 1.3: PROGRAMMING IN C++ AND BASICS OF PYTHON.

*Teaching hours per week: 4*

*No of credits: 4*

### UNIT – I

Introduction - Object oriented programming characteristics of an object oriented language. Basic concepts of object oriented programming language. Applications of oops. **C++ programming language** - Basic structure of c++ program, compiling and linking. Tokens, datatypes, Arithmetic operators, relational, operators, special operators, expressions and evaluation of expressions, scope Resolution operator, Derefencing operator. Decision making and control loop structures: If, if... else statement, switch statement, do... While, while and for loop statement. **16 hours**

### UNIT – II

**Functions in C++:** The main function, function prototyping, call by reference. **Classes and objects:** Defining member functions, nesting of member functions, function overloading, memory allocation for objects, static and dynamic allocation. **Pointer and polymorphism:** polymorphism pointer to objects, pointers to derived classes, pointer to functions. **Managing console I/o operations: C++ streams, unformatted i/o operations. Structures:** declaration, initialization, nested of structure, pointer to structures. **Inheritance:** extending classes, derived classes. **12 hours**

### UNIT – III

**Data Structures:** Classification, basic Operations. **Stacks:** Representation of stack in C using Array, Operations of stack, Application of stack, Infix, Postfix, & Prefix Expressions, postfix expression evaluation. **Queue:** Representation of Queue using Array, Operations on queue, Double ended and Circular queue. **Linked List:** Advantages of linked list, basic component of list, representation of list, basic operation of singly list, types of list, Circular linked list, doubly linked list. **Trees:** Tree terminology, classification, representation of tree, binary tree, tree traversal. **12 hours**

### UNIT – IV

**Sorting:** Bubblesort, selection sort **Searching:** Basic searching techniques, binary search, interpolation search. **Python Introduction-** Overview of Python programming language, introducing the python interpreter, program execution, execution model variations, Interactive prompt. **Introducing python object types-** The python conceptual hierarchy, python's core data types, numbers, strings, Dictionaries, Tuples, Files, Numeric type. **12 hours**

#### Text books:

- 1) Learning python by B. Nagesh Rao, Cyber plus
- 2) C++ Programming language -3rd edition- by Bjarne Stroustrup, Addison Wesley Publication
- 3) Object oriented programming language by E Balagurusamy, Tata Mc-Graw Hill (6<sup>th</sup> edition)
- 4) Object oriented programming language using C++ by A.M.Padma Reddy, Nandi Publication.

#### Reference books:

- 1) Learning python powerful object oriented programming by Mark Lutz (5<sup>th</sup> edition), 'O'Reilly Media Publication.
- 2) Python programming for Beginners by Joseph Joyner, Mihails Konoplovs publication.

\*\*\*\*\*

## COURSE ELCT 1.4: POWER ELECTRONICS DEVICES AND SYSTEMS

*Teaching hours per week: 4*

*No of credits: 4*

### UNIT I

**Introduction:** Applications of power Electronics, Power semiconductor devices, Types of Power Electronic Circuits. Reverse recovery characteristics of diode, Power diode types, Effect of Forward and Reverse Recovery Time. **Semiconductor Power Electronic Devices:** Gate and Switching Characteristics of SCR, IV characteristics of DIAC, TRIAC, GTO, PUJT–Power Transistors–Power FETs–LASCR–Two transistor model of SCR – Protection of Thyristors against over voltage – over current,  $dv/dt$  and  $di/dt$ . **12 hours**

### UNIT II

**SCR Triggering Techniques:** Turn on circuits for SCR – triggering with single pulse and train of pulses–synchronizing with supply. Different commutation techniques, Series and Parallel operations of SCRs. **Controlled Rectifiers:** Single phase–three phase–half controlled and fully controlled rectifiers–Waveforms of load voltage and line current under constant load current **12 hours**

### UNIT III

**Choppers:** Chopper classifications, Principle of Step down and Step up operations, Control Strategy of Chopper, Buck, Boost and Buck–Boost regulator. **DC motor drives:** Basics of DC motors, Semi converter, full converter and Dual converter motor drives, BLDC Motor Drives. **12 hours**

### UNIT IV

**Voltage Source Inverter:** Single-phase half bridge inverter, full bridge inverter, voltage and current waveforms, Mc-Murray commutation circuit, three-phase bridge inverter, voltage and current waveforms, Concept of PWM inverters. **Applications:** Battery charger–SMPS–UPS, PWM Solar Charge controller. **12 hours**

#### Text Books:

1. Dubey G. K., Doradla S. R., Joshi A. and Sinha R. M. K., “Thyristorised Power Controllers”, New Age International Private Limited.
2. Rashid M. H., “Power Electronics Circuits Devices and Applications”, 3rd Ed., Pearson

#### References:

1. Sen: Power Electronics, TMH, 1987.
2. Dubey: Thyristorised power controllers, Wiley Eastern 1986.
3. Vithayathil: Power Electronics – Principles and applications McGraw-Hill, 1995.
4. Lander: Power Electronics, 3<sup>rd</sup> Edition, McGraw-Hill, 1994.

\*\*\*\*\*

## COURSES IN PRACTICALS

**ELCP 1.5: Practical-I: Analog & Digital Electronics and MATLAB and**

**ELCP 1.6: Practical-II: Programming in C++ and Power Electronics**

(EACH PRACTICAL IS OF 4 HOURS PER WEEK AND WITH FOUR CREDITS)

\*\*\*\*\*

***M.Sc. Electronics***  
***SECOND SEMESTER***

ELCT 2.1	Digital Signal Processing
ELCT 2.2	Controls and Instrumentation
ELCT 2.3	Microprocessor and Microcontroller
ELET 2.4	Basic Electronics & Linear Integrated Circuits (OEC)
ELCP 2.5	Practical-III: DSP and Instrumentation
ELCP 2.6	Practical-IV: Microprocessor & Microcontroller

## M.Sc. ELECTRONICS

## SECOND SEMESTER

### Course ELCT 2.1: DIGITAL SIGNAL PROCESSING

*Teaching hours per week: 4*

#### UNIT I

*No of credits: 4*

**Discrete Fourier Transform (DFT):** Introduction, Properties of DFT, Circular shift of a sequence, Circular convolution, Linear convolution using DFT. Overlap-save and overlap-add methods of linear filtering. **Efficient Computation DFT:** Introduction, Decimation-in-time FFT algorithm and in-place computations, and Decimation-in-frequency FET algorithm and in-place computations, Applications FFT algorithm in linear filtering. **12 hours**

#### UNIT II

**IIR Filter Design:** Introduction, Design of IIR digital filter from analog filters, Impulse invariance, Design based on numerical solution of differential equations, bilinear transformation, Matched Z Transform. Characteristics of Buterworth and Chebyshev Filters. And problems on these filters. **12 hours**

#### UNIT III

**FIR Filter Design:** Introduction, Impulse response of linear Phase FIR filters, Design of Linear Phase FIR filters using Windows- Rectangular. Characteristic features of Barlett, Hanning, Hamming, and Blackmann windows. Frequency sampling and Equiripple FIR filter design criteria, comparison of IIR and FIR digital Filters. **12 hours**

#### UNIT IV

**Digital Filter Structures:** Basic IIR filter Structures: Direct forms (I&II), Cascade and parallel realizations. Signal Flow graph and Transposed structure. Basic FIR filter structures: Direct from, linear phase and lattice FIR structures. DSP processor architecture. **12 hours**

#### Text books:

1) "Digital Signal Processing", Proakis, Prentice Hall of India Ltd.

Digital Signal processing: A practical approach. 2<sup>nd</sup> Edition By Emmanuel C Ifeachor, BarrieW Jervis. Pearson Publishers

**Discrete Fourier Transform (DFT):** Introduction, Properties of DFT, Circular shift of a sequence, Circular convolution, Linear convolution using DFT. Overlap-save and overlap-add methods of linear filtering. **Efficient Computation DFT:** Introduction, Decimation-in-time FFT algorithm and in-place computations, and Decimation-in-frequency FET algorithm and in-place computations, Applications FFT algorithm in linear filtering. **12 hours**

#### UNIT II

**IIR Filter Design:** Introduction, Design of IIR digital filter from analog filters, Impulse invariance, Design based on numerical solution of differential equations, bilinear transformation, Matched Z Transform. Characteristics of Buterworth and Chebyshev Filters. And problems on these filters. **12 hours**

#### UNIT III

**FIR Filter Design:** Introduction, Impulse response of linear Phase FIR filters, Design of Linear Phase FIR filters using Windows- Rectangular. Characteristic features of Barlett, Hanning, Hamming, and Blackmann windows. Frequency sampling and Equiripple FIR filter design criteria, comparison of IIR and FIR digital Filters. **12 hours**

#### **UNIT IV**

**Digital Filter Structures:** Basic IIR filter Structures: Direct forms (I&II), Cascade and parallel realizations. Signal Flow graph and Transposed structure. Basic FIR filter structures: Direct form, linear phase and lattice FIR structures. DSP processor architecture. **12 hours**

#### **Text books:**

- 2) "Digital Signal Processing", Proakis, Prentice Hall of India Ltd.
- 3) Digital Signal processing: A practical approach. 2<sup>nd</sup> Edition By Emmanuel
- 4)

#### **Reference books:**

- 1) "Digital Signal Processing", Rabiner and Gold, Prentice Hall of India Ltd
- 2) "Digital Signal Processing", Sanjit. K. Mitra, Tata-McGraw Hill.

\*\*\*\*\*

## COURSE ELCT 2.2: CONTROLS AND INSTRUMENTATION

*Teaching hours per week: 4*

*No of credits: 4*

### UNIT-I

**Control Systems:** Introduction, examples of Control Systems and Closed-loop versus Open-loop controls. **Mathematical Modeling of dynamic systems:** Transfer function and impulse-response function, automatic control systems, modeling in state space, State-space representation of dynamic systems, Electrical and Electronic systems, Signal flow graphs.

**12 hours**

### UNIT-II

**Transient and steady state response analysis:** First-order and Second-order systems, Routh's stability criterion, Effects of Integral and derivative control actions on systems performance, Steady-state errors in unity-feedback control systems. **Root-Locus analysis:** Root-Locus plots, General rules for constructing Root Loci, Positive-feedback Systems.

**12 hours**

### UNIT-III

**Control Systems Design by the Root-Locus Method:** Preliminary design considerations Lead and Lag compensations, Lag-Lead compensation. **Frequency-Response Analysis:** Bode diagrams, Polar plots, Log-Magnitude-versus-Phase plots, Nyquist stability criterion, Stability analysis, Relative stability.

**12 hours**

### UNIT-IV

**Digital Instruments:** Dual slope integrating type DVM, Integrating type DVM, Continuous Balance DVM, 3-1/2 digit, Resolution and sensitivity of digital meters, General specification of DVM, MP based Ramp type DVM, Digital Multimeters, Digital Frequency meter, Digital PH meter, Digital Phase meter, Digital Capacitance meter Digital readout oscilloscope, Digital storage oscilloscope and IEEE 488 Bus.

**12 hours**

#### **Text books:**

- 1) "Modern Control Engineering", K. Ogata, 4/e, PHI, 2003.
- 2) "Electronic Instrumentation" H.S. Kalsi, TMH 1995

#### **Reference books:**

- 1) "Modern Control Engineering", D. Roy Choudhary, PHI, 2005.
- 2) "Automatic Control Engineering", B.C. Kuo, 7/e, PHI, 1995.
- 3) "Modern Electronic Instrumentation and Measurement Techniques", A.D. Helfric and W.D. Cooper, PHI of India Ltd.,

\*\*\*\*\*

## COURSE: ELCT 2.3: MICROPROCESSOR AND MICROCONTROLLER

*Teaching hours per week: 4*

### UNIT-I

*No of credits: 4*

**8086 Microprocessor and its Architecture:** Internal Microprocessor architecture, Real mode memory addressing, **Addressing modes:** Data addressing modes, program memory-addressing modes. Stack memory addressing modes. **Instruction Set:** data movement instruction, Arithmetic and logic instructions, Program control instructions with an example programs. Assembler details. **12 hours**

### UNIT-II

**Hardware Specifications:** Pin-outs and the pin functions, Clock-generator (8284A), Bus buffering and latching, Bus timing Ready and wait state, **Memory Interface and Basic I/O Interface:** Memory devices, Address decoding, 8088 (8-bit) memory interface 8086 (16-bit) memory interface. Introduction to I/O interface, I/O port address decoding, 8255 PPI. interfacing. Basics of Interfacing devices **12 hours**

### UNIT-III

**Introduction to Microcontrollers:** Microcontrollers & Microprocessors, MCS-51 Architecture, Registers in MCS-51, 8051 pin description, pin connectors, Parallel I/O ports and memory organization. 8051 addressing modes, Instruction Set. Assembly Language Programming Tools, Development Systems and Tools **12 hours**

### UNIT-IV

**8051 Programming:** MCS-51 Interrupts, Timer/Counters and Serial Communications. **Interfacing:** Interfacing of keyboard, 7-segment LED, LCD, ADC, and DAC, Stepper motor, Waveform -Sine wave , Square wave generation. **12 hours**

#### Text books:

- 1) "The Intel Microprocessors 8086/8088, 80186/80188, 80286, 80386, 80486, Pentium and Pentium Pro Processor Architecture, Programming and Interfacing", B.B.Brey, 4/e, PHI.
- 2) "The 8051 Microcontrollers and Embedded Systems", M.A. Mazidi and J.G. Mazidi, Pearson Education, Inc.,

#### Reference Books:

- 1) "Microprocessor and Interfacing, Programming and Hardware", 2/e, Douglass V. Hall, McGraw Hill International Edition, 1992.
- 2) "Software, Hardware and Applications", Walter A. Tribel and Avatar Singh, PHI, 1995.
- 3) "Microcomputer Systems: The 8086/8088 Family Architecture, Programming and Design", Yu Cheng Lin and Glen A. Gibson, PHI, 1992.
- 4) "The 8086 Microprocessor: Programming & Interfacing the PC", K.J. Ayala, Penram International Publishing (India) Pvt, Ltd., 1995.

\*\*\*\*\*

## COURSES IN PRACTICALS

### ELCP 2.5: Practical-III: DSP and Instrumentation

### ELCP 2.6: Practical-IV: Microcontrollers

(EACH PRACTICAL IS OF 4 HOURS PER WEEK AND WITH FOUR CREDITS)

\*\*\*\*\*

***M.Sc. Electronics***  
***THIRD SEMESTER***

ELCT 3.1 Digital Communication

ELCT 3.2 Introduction to VLSI Circuits

ELCT 3.3 Embedded Systems Design using ARM Cortex M4

ELET 3.4 Communication and Digital Circuits (OEC)

ELCP 3.5 Practical - V: Digital Communication & VLSI

ELCP 3.6 Practical- VI: Interfacing with Embedded ARM Cortex Controller

# M.Sc. ELECTRONICS

## THIRD SEMESTER

### COURSE ELCT 3.1: DIGITAL COMMUNICATION

*Teaching hours per week: 4*

#### UNIT-I

*No of credits: 4*

**Communication:** Introduction, Differences between digital and analog communication systems, Block diagram of a digital communication system. Digital Transmission of Analog signals: Introduction, Sampling Theory and Practice, Ideal Sampling and Reconstruction low pass signals, Practical sampling, Quantization of analog signals: Uniform Quantization, non-uniform Quantization, Differential quantization. Coded transmission of analog Signals: PCM system, Differential Pulse Code Modulation (DPCM), Delta Modulation and Time-Division Multiplexing (T1 system). **12 hours**

#### UNIT-II

**Random Signal Theory:** Probability mass functions & Statistical averages, Probability density functions & Statistical averages. **Baseband Transmission of Binary Data:** The inter symbol interface problem, Ideal solution, Raised Cosine Spectrum, Correlative-level coding, Base band transmission of M-ray Data, Eye Pattern, Adaptive Equalization. **Digital Modulation Techniques:** Binary Modulation Techniques; ASK, PSK, and FSK Generation and Detection of Binary Modulated Waves, Quadrature phase-shift Keying, Optimum (or Correlation) receivers: Matched Filter receiver, Properties of Matched Filter. **12 hours**

#### UNIT-III

**Spread Spectrum Modulation:** Introduction, Pseudo-Noise Sequences, Properties of Maximum-length sequences, notion of Spread Spectrum, Direct-sequence Spread Coherent Binary PSK, Frequency-Hop Spread Spectrum: Slow-Frequency and Fast-Frequency Hopping. CDMA and Multipath suppression. **Information theory:** Measure of Information, Properties of Entropy, Extension of a DMS, source coding theorem, Prefix Coding, Huffman Coding, Channel coding, Mutual Information and properties of Mutual Information. **12 hours**

#### UNIT-IV

**Error Control Coding:** Introduction, Methods of Controlling Errors, Types of Errors, Types of codes, Linear Block Codes, Matrix Description of Linear Block Codes, Error detection and error correction capability of linear block codes, Single error-correcting Hamming Codes, Binary cyclic codes, Encoding using an (n-k) bit shift register, Golay Codes, BCH Codes, Burst-error Correcting codes and Convolution Codes. **12 hours**

#### **Text books:**

- 1) "Digital Communications", Simon Haykin, John Wiley & Sons Publications.
- 2) "Digital and Analog Communication Systems" K. Sam Shanmugam, John Wiley & sons (Asia) pte ltd., 2000.

#### **Reference books:**

- 1) "Principles of Communication Systems", 2/e, Taub Schilling, TMH, 1991.
- 2) "Digital Communications, Fundamentals and Applications", Bernard Sklar, 2/e, Pearson Education.
- 3) "Coding Theory", by Abrahanson, Prentice Hall of India.

\*\*\*\*\*

## COURSE ELCT 3.2: INTRODUCTION TO VLSI CIRCUITS

*Teaching hours per week: 4*

*No of credits: 4*

### UNIT-I

Introduction to CMOS circuits and MOS transistor theory: MOS transistor, MOS transistor switches, CMOS logic, alternate circuit representation, CMOS-NMOS comparison. MOS transistor Theory: Introduction, MOS device design equations, the complimentary CMOS inverter-DC characteristics, alternate CMOS inverter, transmission gate- DC characteristics, latch up.

**12 hours**

### UNIT-II

**CMOS processing technology:** Wafer processing, oxidation, selective diffusion, the silicon gate process, Silicon On Insulator, CMOS process environment, lay-out design rules, layer representation, lambda based p-well rules, lambda based SOI rules, double metal design rules, Process parameterization: abstract layers, spacing rules, construction rules. 12 hours

### UNIT-III

**Circuit characterization and performance estimation:** Resistance estimation, capacitance estimation, switching characteristics: Fall time, Rise time, Delay, Determination of conductor size. Power consumption: static dissipation, dynamic dissipation, charge sharing, scaling, yield.

**14 hours**

### UNIT-IV

**CMOS circuit and logic Design:** CMOS complimentary logic, Pseudo-nMOS logic, dynamic CMOS logic, clocked CMOS logic, Domino logic, Cascade Voltage Switch logic, modified domino logic, pass transistor logic, clocking strategies, I/O pads.

**12 hours**

#### **Text books:**

1. Principle of CMOS VLSI Design, a system perspective-Neil H.E. Weste and Kamran Eshraghian, Addison-wesley.
2. "Introduction to VLSI Circuits and Systems", John P. Uyemura, John Wiley & Sons (Asia) Pte. Ltd., 2003.

#### **Reference books:**

1. VLSI Fabrication Principles", S.K. Ghandhi, 2/e, John Wiley & Sons (Asia) Pte. Ltd., 2003.
2. VLSI Technology", 2/e, S.M. Sze, McGraw-Hill, 1988.

\*\*\*\*\*

## COURSE ELCT 3.3: EMBEDDED SYSTEMS DESIGN USING ARM CORTEX M4

*Teaching hours per week: 4*

### UNIT-I

*No of credits: 4*

**Embedded systems:** Embedded systems Overview, Design Challenges, Processor technology, IC Technology, Design Technology, and Tradeoffs. Application Specific IC (ASIC), Field Programmable Logic Array (FPGA) and Microcontrollers, Digital signal Processor (DSP). Development boards, Programming, Compiler and linker, program flow, operating systems support, benchmarks. **12 hours**

### UNIT-II

**ARM Cortex Architecture:** Evolution of ARM Architecture, ARM Cortex M3 processor, Exceptions and interrupts, Sleep modes, Introduction to instruction set (16 bit & 32 bit), Assembly syntax, Bit field and Bit band operations, Introduction to Cortex M4 processor, Floating point unit, Floating point and DSP instructions **12 hours**

### UNIT-III

**STM32F4 microcontrollers :** Architecture of STM32F4 series microcontroller, power controller, Reset and Clock Unit, General Purpose I/O(GPIO), Nested Vectored Interrupt controller (NVIC) , Analog to digital converter, Digital to Analog Converter (DAC), DMA controller. **12 hours**

### UNIT-IV

**Timers:** Counter modes, PWM wave generation, Capture/Compare channels, Watchdog Timer, Real Time Clock (RTC). **Serial Communication protocols:** Inter IC communication (I2C), **Universal** Synchronous and Asynchronous Receive Transmitter (USART), Serial Peripheral Interface (SPI), Introduction to CAN bus. **12 hours**

#### Text books:

1. Embedded System Design , A Unified Hardware/ Software Introduction Technology 3<sup>rd</sup> edn 2011 By Frank Vahid/ Tony Givargis, Walley
2. Microcontrollers. Hardware and Firmware for 8-bit and 32-bit devices, By Franco Zappa. 1<sup>st</sup> edition (2017) Societa editrice esculapio.

#### Reference books:

1. Discovering the STM32 Microcontroller by Geoffrey Brown (2016)  
<http://creativecommons.org/licenses/by-nc-sa/3.0/>
2. STM32F4 Datasheets and reference manuals from [www.st.com](http://www.st.com)

\*\*\*\*\*

## COURSES IN PRACTICALS

**ELCP-3.5: Practical-V: Digital Communication & VLSI**

**ELCP-3.6: Practical-VI: Interfacing with Embedded ARM Cortex Controller**

(EACH PRACTICAL IS OF 4 HOURS PER WEEK AND WITH FOUR CREDITS)

\*\*\*\*\*

***M.Sc. Electronics***  
***FOURTH SEMESTER***

ELCT 4.1	Microwave and Optical Fiber Communication Systems
ELCT 4.2	Computer Communication
ELCT 4.3	Digital System Design-VHDL
ELCT 4.4	Micro Electro Mechanical Systems
ELCP 4.5	Practical- VII : Optical Fiber Communication & VHDL
ELCP 4.6	Project

## M.Sc. ELECTRONICS

### FOURTH SEMESTER

#### COURSE ELCT 4.1: MICROWAVE AND OPTICAL FIBER COMMUNICATION SYSTEMS

*Teaching hours per week: 4*

*No of credits: 4*

##### UNIT-I

**Electromagnetic Theory:** Maxwell's equations, Fields in media and boundary conditions, the wave equation and the basic plane wave solutions, General Plane wave solutions, energy and power. **Waveguide Theory:** General solutions for TEM, TE and TM waves parallel plate waveguide, Rectangular waveguide. **Transmission Line theory:** Field analysis of transmission lines, Smith chart, Single stub tuning, Double stub tuning and the quarter wave transformer.

**12 hours**

##### UNIT-II

**Antennas:** Types of antennas, Hertz and Marconi antennas, Yagi-Uda antenna, Reflector antenna, lens antenna, Helical antenna, Log periodic antenna, Phased array antenna, Microstrip antenna **Microwave Tubes-**Two cavity Klystron, Reflex Klystron and TWT **Microwave Solid-state devices and components :** Varactor diodes, PIN diodes, Tunnel diodes, GUNN diode. Basic properties of dividers and couplers, Wave-guide directional couplers, Coupled line directional couplers and Microwave Systems (qualitative).

**12 hours**

##### UNIT-III:

**Optical Fibers:** Basic optical laws, optical fiber modes and configurations, mode theory for circular waveguide- Maxwell's equation and waveguide equations, Signal attenuation, **optical sources-** Topics from semiconductor Physics, LEDs and Laser diodes.

**12 hours**

##### UNIT-IV:

**Photodetectors :** Physical principle, PIN and Avalanche type photodetectors. Optical receiver Operation – Digital signal Transmission, Error sources, Receiver configuration. **Advanced Systems and Techniques:-** WDM, optical Amplifiers, Mechanical and Integrated-optical switches.

**12 hours**

##### **Text books:**

- 1) "Microwave Devices Circuits", 3/e, Samuel. Y. Liao, Prentice Hall of India, 1998
- 2) "Microwave and Radar: Principles and Applications", 2/e, A.K. Maini, Khanna Publishers. 2001.
- 3) Optical Fiber Communications by Gerd Keiser McGRAW – HILL International Ed (2<sup>nd</sup> Edn)

##### **Reference books:**

- 1) "Microwave and Radar Engineering", M. Kulkarni, Umesh Publications, 3/e, 003.
- 2) "Electronics Communication Systems", 4/e, Wayne Tomasi, Pearson Education.
- 3) Modern Electronic Communication", 7/e, G.H. Miller and J.S. Beasley, Prentice Hall of India.
- 4) "Microwave Engineering", 2/e, David M. Pozar, John Wiley & Sons (Asia) Pte, Ltd, 1999.

\*\*\*\*\*

## COURSE ELCT 4.2: COMPUTER COMMUNICATION

*Teaching hours per week: 4*

*No of credits: 4*

### UNIT-I

**Introduction:** The use of computer network, Network Hardware, Network software, The OSI reference models, The TCP/IP reference model, Comparison of OSI & TCP/IP reference models.

**Physical layer & Transmission:** Guided Transmission media – co-axial cable, Fiber optics, Comparison of Fiber optics and copper wire. Wireless Transmission: IR transmission.

**12 hours**

### UNIT-II

**Physical layer & Transmission (Cont):** FDM, TDM and CDM. Public Switched telephone networks: Structure of Telephone systems, Local loop Modems, ADSL and fiber. Circuit switching, Packet Switching Hybrid Switching. Mobile Telephone systems: From 1G, 2G and 3G.

**12 hours**

### UNIT-III

**The Data Link Layer:** Data Link Layer design issues, Error detection and correction, Elementary data link protocols, sliding window protocols performance. **The Medium Access Sub-layer:** The local and metropolitan area networks, the ALOHA protocols, IEEE standard 802 for LAN. Ethernet, Bluetooth and RFID.

**14 hours**

### UNIT-IV

**The Network Layer:** Design issues, Routing algorithms – optimality principle, shortest path algorithm, flooding, distance vector routing. Congestion control algorithms, Network layer in the Internet. **The Transport Layer:** Transport service, transport protocols, Internet transport protocol (TCP & UDP).

**12 hours**

#### **Text books:**

- 1) "Computer Networks", Andrew S. Tanenbaum and David J. Wetherall (5<sup>th</sup> Edition) Prentice Hall of India Publishers.

#### **Reference books:**

- 1) "Computer Networks, Protocols, Standard and Interfaces", Ulyses Black, Prentice Hall of India Pub.
- 2) "Data Communication and Networking", Behrouz. A. Forouzan, McGraw Hill, 5<sup>th</sup> Edition

\*\*\*\*\*

## COURSE ELCT 4.3: DIGITAL SYSTEM DESIGN-VHDL

*Teaching hours per week: 4*

*No of credits: 4*

### UNIT-I

**INTRODUCTION TO VHDL:** VHDL terms, Describing hardware in VHDL, entity, architecture, signal assignment statements, event scheduling, statement concurrency, structural design, architecture selection, configuration statements and power of configurations. **Basic language elements:** identifiers, data objects, data types. **Behavioral modelling:** introduction, concept of delays (inertial, transport and delta delay) **Sequential processing:** process statements, signal assignments, sequential statements, IF, CASE, LOOP, NEXT, EXIT, ASSERT and WAIT statements.

**12 hours**

### UNIT-II

**DATA FLOW AND STRUCTURAL MODELLING:** **Data flow modeling:** concurrent signal assignment statement, concurrent v/s sequential assignment statements, multiple drivers, conditional signal assignment statements, selected signal assignments, block and guarded block statements **Structural modeling:** component declaration, component instantiation, configuration, configuration specification.

**12 hours**

### UNIT-III

**SUBPROGRAM AND PACKAGES:** **Subprograms:** functions and procedures, subprogram overloading, operator overloading, **Packages:** package declaration, package body, implicit visibility and explicit visibility. Examples.

**12 hours**

### UNIT-IV

**ADVANCED TOPICS:** Generate statements, aliases, qualified expressions, conversion functions, attributes, text I/O, **Model simulation:** writing a test bench, dumping results into file, reading vectors from file, test bench examples. **Hardware modeling examples:** A clock divider, a generic binary multiplier ,pulse counter, Barrel shifter , state machine modeling. **12 hours**

#### **Text books:**

- 1) VHDL: Programming by Example by Douglass L Perry, 4<sup>th</sup> edition, McGraw-Hill.
- 2) VHDL Primer 3/e Bhaskar, Addison Westley Longman(Singapore) Pvt Ltd,2000.

#### **Reference books:**

- 1) Circuit design with VHDL, Volnei A Pedroni, MIT press
- 2) VHDL- Analysis and Modeling of Digital systems, Zainalabedin Navabi, McGraw-Hill International Editions.

\*\*\*\*\*

**COURSE ELCT 4.4: MICRO ELECTRO MECHANICAL SYSTEMS**

***Teaching hours per week: 4***

**UNIT - I**

***No of credits: 4***

**INTRODUCTION TO MEMS TECHNOLOGY:** Basic definitions, history and evolution of MEMS. Scaling laws in Miniaturization: Scaling in Geometry, in Rigid-body dynamics, in electrostatic forces, in electromagnetic forces and in electricity. MEMS sensors and actuators. Types of MEMS, Applications of MEMS in various disciplines. **Materials for MEMS & Microsystems:** Silicon, Silicon compounds, Silicon piezo-resistors, Gallium Arsenide, Quartz, conducting polymers, Langmuir-Blodgett (LB) film, Fullerenes and CNT. **12 hours**

#### **UNIT - II**

**MICRO MACHINING/ FABRICATION:** Introduction, photolithography and other lithography methods, structural and sacrificial materials, thin film deposition techniques, Impurity doping processes, Etching, types etching, wafer bonding methods, LIGA. Bulk versus Surface Micromachining. **12 hours**

#### **UNIT - III**

**MICRO-OPTO-ELECTROMECHANICAL (MOEM) SYSTEMS:** Introduction, light modulators, Beam-splitter, Microlens and Micro-mirrors **Radio Frequency (RF) MEMS:** Introduction, Review of RF-based communication systems, RF –MEMS MEMS inductors, varactors, tuners, filters, resonators, phase shifters, switches. **12 hours**

#### **UNIT - IV**

**MEMS MODELING:** Introduction, Basic modeling elements in electrical, mechanical, thermal and fluid systems, Translational pure Mechanical system with spring, damper and mass, analogy between 2<sup>nd</sup> order mechanical and electrical systems. **Microsystem Design:** Introduction, design considerations, properties of materials. Design of a silicon die for Micro-pressure sensor and packaging of MEMS **12 hours**

\*\*\*\*\*

### **COURSES IN PRACTICAL**

**ELCP 4.5: Practical-VII: Optical Fiber Communication & VHDL and ELCP 4.6**

**(PROJECT)**

**(PRACTICAL/PROJECT IS OF 4 HOURS PER WEEK WITH FOUR CREDITS)**

\*\*\*\*\*

## ***M.Sc. Electronics***

### ***SECOND SEMESTER OPEN ELECTIVE***

**ELET-2.4: BASIC ELECTRONICS & LINEAR INTEGRATED CIRCUITS**

**M.Sc. ELECTRONICS**  
**SECOND SEMESTER (ELECTIVE)**

**ELET-2.4: BASIC ELECTRONICS & LINEAR INTEGRATED CIRCUITS**

(ELECTIVE PAPER TO OTHER DEPARTMENTS STUDENTS)

*Teaching hours per week: 4*

**UNIT-I**

*No of credits: 4*

**Circuit Variables:** Circuit concepts Units, Standards and Dimensions. Electric current, Electric charge, potential difference, Electric power and Energy. Circuit elements: Passive elements and active elements. **Network Law's:** Ohm's Law's, Junction Law's (KCL), Mesh Law's (KVL) Application of Network Law's to simple dc networks theorems- Thevenin's theorem, Norton's theorem Max power transfer theorem. **12 hours**

**UNIT-II**

**Semiconductors:** Energy bands theory, intrinsic semiconductors, extrinsic semiconductor, effect of temperature on Impurity semiconductors and mechanism of current conduction in semiconductor. **Junction Diodes:** p-n junction, an unbiased p-n junction, Energy band of unbiased p-n junction, a biased p-n junction and V-I characteristics of P-n junction. Some special P-N junction:- Photodiodes, LED and Solar Cell. Junction transistor, Transistor static characteristic Self-bias or emitter bias, Two-port representation of Transistor (hybrid Parameter) JFET: Static Characteristic of FET comparison of FET with Bipolar transistor. Applications of BJT and JFET. **12 hours**

**UNIT - III**

**Operational Amplifier characteristics & Applications:** Introduction, Ideal Op-Amp, DC and AC Characteristics.: Instrumentation Amplifier, V to I and I-V converter Precision rectifier, Differentiator and Integrator. Comparator Schmitt trigger wave generators (Square wave and Triangular wave) and first order Low pass and High pass filters. **12 hours**

**UNIT-IV**

**Special IC:** series Op-Amp regulator, IC voltage regulators, 555 Timer as Monostable and Astable operation. D-A and A-D converters, PLL: Basic principles PLL as Frequency multiplication /Division. **12 hours**

**Text books:**

- 1) "Foundations of Electronics", D Chattopadhyaya, P.C. Rakshit, B Saha and N N Purkait New Age International Edition.
- 2) "Linear Integrated Circuit", by D. Roy Choudhary and Shail Jain, New Age International (P) ltd.,
- 3) "Op-Amp and Linear Integrated Circuits", R.A. Gaikwad, PHI of India ltd.,

**Reference books:**

- 1) A Textbook of Electronics (Second Edition) S.L Kakani and K.C.Bhandari
- 2) "Electronic Principles" A.P. Malvino , TMH Edition.

\*\*\*\*\*

***M.Sc. Electronics***  
***THIRD SEMESTER OPEN ELECTIVE***

ELET-3.4: COMMUNICATION AND DIGITAL CIRCUITS

**M.Sc. ELECTRONICS THIRD  
SEMESTER (ELECTIVE)**

**ELET-3.4: COMMUNICATION AND DIGITAL CIRCUITS**

(ELECTIVE PAPER TO OTHER DEPARTMENT STUDENTS)

*Teaching hours per week: 4*

**UNIT-I**

*No of credits: 4*

**Radio wave Propagation:** Ground or surface wave, Space or tropospheric wave and Sky wave. Ionosphere, Effect of Ionosphere on Radio waves, Skip distance, maximum Usable frequency and Ionospheric fading. **Antenna:** Introduction, loop and ferrite rod antenna, Yagi-Uda, Dish antenna and Microstrip antenna (Qualitative). **12 hours**

**UNIT-II**

**Modulation and detection:** Modulation, AM, Power in AM, FM, Comparison of AM & FM. Generation and detection of AM wave. Super-heterodyne radio receiver (Block Explanation) **12 hours**

**UNIT-III**

**Optical fiber communication:** Principles of light transmission, Fiber index profiles, Modes of propagation, losses in fibers. Types of Light Sources and Photo detectors (Qualitative). **12 hours**

**UNIT-IV**

**Digital circuits:** Introduction, Decimal, Binary and Hexa decimal number systems, Conversions, Binary addition and subtraction, OR, AND and NOT Circuits. Boolean algebra, De Morgan's Theorem, additional laws and theorems. NOR and NAND gates. Flip-Flop and RS Flip-Flop using NAND gate. **12 hours**

**Text books:**

- 1) "Foundations of Electronics", D. Chattopadhyaya, P.C. Rakshit, B Saha and N N Purkait, New Age International Edition.
- 2) "Electronic Communications", D. Roddy and J. Coolen, PHI of India ltd.,

**Reference books:**

- 1) Electronic Communication Systems. G. Kennady, TMH Edition.
- 2) Electronic Principles A.P. Malvino, TMH Edition.
- 3) A Textbook of Electronics (Second Edition) S.L Kakani and K.C.Bhandari

**Programme Outcomes (POs)**

<b>PO's (1):</b>	To create post-graduates with sound knowledge of fundamentals of Electronics, who can contribute towards advancing science and technology.
<b>PO's (2):</b>	To create post-graduates with sufficient capabilities in Electronics who can become researchers and developers to satisfy the needs of the core Electronics industry
<b>PO's (3):</b>	To develop ability among students to formulate, analyze and solve real life problems faced in Electronics industry.
<b>PO's (4):</b>	To provide opportunity to students to learn the latest trends in Electronics and make them ready for life-long learning process.
<b>PO's (5):</b>	To make the students aware of professional ethics of the Industry, and prepare them with basic soft skills essential for working in community and professional teams.
<b>PO's (6):</b>	To prepare the students for post graduate studies through competitive examinations, enabling them to reach higher echelons of excellence
<b>PO's (7):</b>	To produce electronic professionals who can be directly employed or start his/her own work as Electronic circuit Designer, Electronics consultant, testing professional, Service engineer and even an entrepreneur in electronic industry
<b>PO's (8):</b>	Develop designing and analyzing attitude about networks and wireless communication

## Course outcomes (COs)

<b>ELCT-1.1 Semiconductor device theory and practice</b>	
<b>CO's (1):</b>	Describe the properties of materials and application of semiconductor electronics
<b>CO's (2):</b>	Apply the knowledge of semiconductors to illustrate the functioning of basic electronic devices.
<b>CO's (3):</b>	Demonstrate the switching and amplification application of the semiconductor devices
<b>CO's (4):</b>	Demonstrate the control applications using semiconductor devices.
<b>CO's (5):</b>	Identify the fabrication methods of integrated circuits.
<b>CO's (6):</b>	Classify and describe the semiconductor devices for special applications
<b>CO's (7):</b>	Basic concept of shift registers and its MSI Logic families

<b>ELCT-1.2 Signals And Systems</b>	
<b>CO's (1):</b>	To understand mathematical description and representation of continuous and discrete time signals and systems.
<b>CO's (2):</b>	To Develop input output relationship for linear shift invariant system and understand the
<b>CO's (3):</b>	To understand Convolution operator for continuous and discrete time system.
<b>CO's (4):</b>	To Understand and resolve the signals in frequency domain using Fourier series and Fourier transforms.
<b>CO's (5):</b>	To Understand the limitations of Fourier transform and need for Laplace transform and develop
<b>CO's (6):</b>	The ability to analyze the system in s- domain.
<b>CO's (7):</b>	To Understand the basic concept of probability, random variables & random signals and develop

### **ELCT-1.3 Programming in C++ and Basics of Python**

<b>CO's (1):</b>	Describe the principles of object oriented programming.
<b>CO's (2):</b>	Apply the concepts of data encapsulation, inheritance in C++.
<b>CO's (3):</b>	Understand basic program and constructs in Python
<b>CO's (4):</b>	Apply the concepts of classes, methods and inheritance to write programs in C++.
<b>CO's (5):</b>	Discuss the computational efficiency of the principal algorithms such as sorting & searching.
<b>CO's (6):</b>	The ability to analyze the Infix, postfix and prefix expressions and Evaluation procedure.
<b>CO's (7):</b>	Understand the basic concepts of Tree Terminology and tree traversal technique.

### **ELCT-1.4 Power Electronics Devices And Systems**

<b>CO's (1):</b>	Understand the structure of power electronic devices such as diode, BJT, SCR, IGBT, MOSFET and advanced devices such as MCT, IGCT.
<b>CO's (2):</b>	Analyze the operation of these devices Based on the static and dynamic characteristics, their limitation choose these devices for various applications.
<b>CO's (3):</b>	Understand and analyze various gate drive circuits and protection circuits of devices
<b>CO's (4):</b>	Model various devices using modern tools.
<b>CO's (5):</b>	Able to design solar devices as well as some power devices like SMPS etc

### ELCP-1.5 Practical-I : Analog and Digital Electronics and

After the end of the course, a student will be able to:

<b>CO's (1):</b>	Derive basic logic gates, adder, and subtractor using universal gates.
<b>CO's (2):</b>	know how to generate and visualize different types of signals
<b>CO's (3):</b>	understand the basics of MATLAB commands.
<b>CO's (4):</b>	Illustrate realization of Boolean in SOP and POS form and design it using logic gates
<b>CO's (5):</b>	Design and test combinational circuits. Design and develop sequential circuits

### ELCP-1.6 Practical-III : Programming in C++ and Power Electronics

After the end of the course, a student will be able to :

<b>CO's (1):</b>	Understand C++, the programming process, and the compilation process.
<b>CO's (2):</b>	Describe and compare machine language and a high level language.
<b>CO's (3):</b>	Discuss the advantages of a high-level language.
<b>CO's (4):</b>	Use an IDE to compile, load, save, and debug a C++ program
<b>CO's (5):</b>	Design Triggering circuits of SCR using LT spice
<b>CO's (6):</b>	Perform the experiment on various convertors and invertors simulation through LT spice

### **ELCT-2.1 Digital Signal Processing**

<b>CO's (1):</b>	Analyze the discrete time signals and system using different transform domain techniques.
<b>CO's (2):</b>	Design and implement LTI filters for filtering different real world signals.
<b>CO's (3):</b>	Develop different signal processing applications using DSP processor.
<b>CO's (4):</b>	Design and implement IIR filters and FIR DIGITAL filter for different real world signals.
<b>CO's (5):</b>	Basic concept of DSP processor architecture.
<b>CO's (6):</b>	Analyze the Frequency sampling for FIR filter.

### **ELCT-2.2 Controls And Instrumentation**

<b>CO's (1):</b>	Determine and use models of physical systems in forms suitable for use in the analysis and design of control systems.
<b>CO's (2):</b>	Determine the (absolute) stability of a closed-loop control system.
<b>CO's (3):</b>	Perform time domain and frequency domain analysis of control systems required for stability analysis.
<b>CO's (4):</b>	Perform time domain and frequency domain correlation analysis.
<b>CO's (5):</b>	Apply root-locus, Frequency Plots technique to analyze control systems.
<b>CO's (6):</b>	Understand fundamental of various electrical measurements
<b>CO's (7):</b>	Understand and describe specifications, features and capabilities of electronic instruments.

### **ELCT-2.3 Microprocessor and Microcontroller**

<b>CO's (1):</b>	Learn importance of microcontroller in designing embedded application.
<b>CO's (2):</b>	Learn use of hardware and software tools.
<b>CO's (3):</b>	Develop interfacing to real world devices.
<b>CO's (4):</b>	Understand the Basic concept of 8086 Architecture .
<b>CO's (5):</b>	Understand and describe specifications of memory devices and address decoding.
<b>CO's (6):</b>	Understand and analyze the concept of MCS-51 Architecture .

### **ELCT-2.4 Basic Electronics and Linear Integrated Circuits**

<b>CO's (1):</b>	Explain behavior of FET at low frequency.
<b>CO's (2):</b>	Understand the basic concepts of KVL and KCL
<b>CO's (3):</b>	Understand the characteristics of IC and Op-Amp and identify the internal structure
<b>CO's (4):</b>	Analyze and identify linear and nonlinear applications of Op-Amp.
<b>CO's (5):</b>	Familiar with DAC, ADC and timers.
<b>CO's (6):</b>	The Basic concept of Operational Amplifier characteristics.

### **ELCP-2.5 Practical-III : DSP and Instruments**

After the end of the course, a student will be able to :

<b>CO's (1):</b>	Enumerate the basic concepts of signals and systems and their interconnections in a simple and easy-to-understand manner by employing different mathematical operations like folding, shifting, scaling, convolutions, Z-transform etc. 3. 4.
<b>CO's (2):</b>	Determine transfer function, impulse response and comment on various properties like linearity, causality, stability of a system;
<b>CO's (3):</b>	Predict time and frequency response of discrete-time systems using various techniques like Z-transform, Hilbert transform, DFT, FFT.
<b>CO's (4):</b>	Design digital IIR and FIR filters using filter approximation theory, frequency transformation techniques, window techniques and finally construct different realization structures;
<b>CO's (5):</b>	Select proper measuring instrument and know requirement of calibration, errors in measurement

### **ELCP-2.6 Practical-IV : Microprocessor and Microcontroller**

After the end of the course, a student should be able to :

<b>CO's (1):</b>	To study programming based on 8086 microprocessor and 8051 microcontroller in TASM
<b>CO's (2):</b>	To study 8086 microprocessor based ALP using arithmetic, logical and shift operations.
<b>CO's (3):</b>	To study modular and Dos/Bios programming using 8086 micro processor
<b>CO's (4):</b>	Demonstrate ability to handle string instructions using assembly language programming in TASM
<b>CO's (5):</b>	Demonstrate ability to handle sorting operations and using assembly language programming in TASM

### **ELET-3.1 Digital Communication**

<b>CO's (1):</b>	Understand working of waveform coding techniques and analyse their performance.
<b>CO's (2):</b>	Analyze the performance of a baseband and passband digital communication system in terms of error rate and spectral efficiency.
<b>CO's (3):</b>	Perform the time and frequency domain analysis of the signals in a digital communication system.
<b>CO's (4):</b>	Design of digital communication system.
<b>CO's (5):</b>	Understand working of spread spectrum communication system and analyze its performance.
<b>CO's (6):</b>	Understand various types of Errors detecting and correcting codes

### **ELET-3.2 Introduction to VLSI Circuits**

<b>CO's (1):</b>	Model digital circuit with HDL, simulate, synthesis and prototype in PLDs.
<b>CO's (2):</b>	Understand chip level issues and need of testability.
<b>CO's (3):</b>	Design analog & digital CMOS circuits for specified applications.
<b>CO's (4):</b>	Understand working and Basic concept of CMOS processing technology.
<b>CO's (5):</b>	Analyze the Circuit characterization and estimation.
<b>CO's (6):</b>	Understand the concept of logic design for CMOS circuit.

### **ELET-3.3 Embedded Systems Design Using ARM Cortex M4**

<b>CO's (1):</b>	Describe the ARM microprocessor architectures and its feature.
<b>CO's (2):</b>	Interface the advanced peripherals to ARM based microcontroller
<b>CO's (3):</b>	Design embedded system with available resources.
<b>CO's (4):</b>	Understanding the architecture of STM 32f4 series.
<b>CO's (5):</b>	Overview of Field Programmable Logic Array(FPGA).
<b>CO's (6):</b>	Understand the concept of Serial Communication protocols.

<b>ELCT-3.4 Communication and Digital Circuits</b>	
<b>CO's (1):</b>	Understand the concept of Radio wave propagation.
<b>CO's (2):</b>	Familiar with some important antennas.
<b>CO's (3):</b>	Understanding the concept of modulation and generation.
<b>CO's (4):</b>	Analyze the concept of Optical Fiber.
<b>CO's (5):</b>	Use the basic logic gates and various reduction techniques of digital logic circuit in detail.
<b>CO's (6):</b>	Analyze the concept of Types of Photo detectors.

<b>ELCP-3.5 Practical-V : Digital communication and VLSI</b>	
After the end of the course, a student will be able to :	
<b>CO's (1):</b>	design all basic CMOS circuits using lambda based design rules.
<b>CO's (2):</b>	Simulate circuits within a CAD tool and compare to design specifications.
<b>CO's (3):</b>	Analyse the set up and hold time of output waveforms.

<b>CO's (4):</b>	gain practical experience related to digital communication circuits by circuit simulation.
<b>CO's (5):</b>	understand the basic theories of digital communication in practical.

### **ELCP-3.6 Practical-VI : Interfacing with Embedded ARM Cortex Controller**

After the end of the course, a student should be able to :

<b>CO's (1):</b>	programme and interface the various peripherals
<b>CO's (2):</b>	Configure and programme the controller for interfacing with different moduls
<b>CO's (3):</b>	programme and interface the various communication peripherals
<b>CO's (4):</b>	programme and interface the various communication peripherals USART, UART,TTL,I2C

### **ELCT-4.1 Microwave And Optical Fiber Communication Systems**

<b>CO's (1):</b>	Formulate the wave equation in waveguide for analysis.
<b>CO's (2):</b>	Understand the concepts related to Faraday's law, induced emf and Maxwell's equations
<b>CO's (3):</b>	Apply Maxwell's equations to solutions of problems relating to transmission lines and uniform plane wave propagation.
<b>CO's (4):</b>	Understand the principle of optical laws.
<b>CO's (5):</b>	Analyzing the basic concepts of photo-detector.
<b>CO's (6):</b>	Overview of various Advanced systems and Techniques.

### **ELCT-4.2 Computer Communication**

<b>CO's (1):</b>	Understand the concept of OSI and TCP/IP reference models.
<b>CO's (2):</b>	Explain and apply concepts of GSM and CDMA system.
<b>CO's (3):</b>	Specify and identify deficiencies in existing protocols, and then go onto select new and better protocols.
<b>CO's (4):</b>	Understand the Concept and principle of Transmission layer.
<b>CO's (5):</b>	Overview of various Routing algorithms.
<b>CO's (6):</b>	Understand the Concept TCP and UDP.

### **ELCT-4.3 Digital System Design –VHDL**

<b>CO's (1):</b>	Model, simulate, verify, and synthesize with hardware description languages.
<b>CO's (2):</b>	Understand and use major syntactic elements of VHDL - entities, architectures, processes, functions, common concurrent statements, and common sequential statements
<b>CO's (3):</b>	Design digital logic circuits in different types of modeling
<b>CO's (4):</b>	Demonstrate timing and resource usage associated with modeling approach.
<b>CO's (5):</b>	Model, simulate, verify, and synthesize with Behavioral modelling.
<b>CO's (6):</b>	Understand and use of Data flow modeling.

### **ELCT-4.4 Micro Electro Mechanical Systems**

<b>CO's (1):</b>	To introduce the basic concepts of micro systems and advantages of miniaturization.
------------------	---

<b>CO's (2):</b>	To study the various materials and their properties used for micromachining techniques.
<b>CO's (3):</b>	To teach the fundamentals of micromachining and micro fabrication techniques.
<b>CO's (4):</b>	To impart knowledge of the basic concept of electromechanical effects, thermal effects Micro fluidics and integrated fluidic systems.
<b>CO's (5):</b>	To give exposure to different MEMS devices.
<b>CO's (6):</b>	Understand and use of MOEM systems.

### **ELCP-4.5 Practical-VII : Optical Fiber communication and VHDL**

After the end of the course, a student will be able to :

<b>CO's (1):</b>	Demonstrate a clear Understanding in hardware design language VHDL.
<b>CO's (2):</b>	Model a Combinational circuit and sequential circuit using hardware description language VHDL and validate its functionality.
<b>CO's (3):</b>	Design and implement a circuit on a FPGA board.
<b>CO's (4):</b>	Recall analog and digital link, propagation loss, numerical aperture for optical fiber communication.
<b>CO's (5):</b>	Sketch the gain characteristics. And study of intensity modulation

**2020-2021 & Onwards**

# **KARNATAK UNIVERSITY, DHARWAD**

## **Regulations concerning Master Degree Programme**

### **Faculty of Arts, from 2020-2021**

**Master Degree Programme in Master of Arts in English (M.A. English -CBCS)**  
Regulations Governing the Post-Graduate Master Degree Programmes under Choice Based Credit System (KU-CBCS), framed under Section 44(1)(C) of K.S.U. Act, 2000.

### **MASTER OF ARTS IN ENGLISH**

### **CHOICE BASED CREDIT SYSTEM (CBCS)**

#### **Title:**

These Regulations shall be called “Karnatak University Regulations Governing Post-Graduate under the Choice Based Credit System” for Master Degree programmes.

#### **Commencement:**

These Regulations shall come into force from the academic year 2020-2021.

#### **Definitions:**

In these Regulations, unless otherwise mentioned:

- a) “University” means Karnatak University:
- b) “Post-Graduate Programmes” means Master’s Degree Courses.
- c) “Compulsory Course” means a fundamental paper which a student admitted to a particular Post-Graduate programme should successfully complete to receive the Post-Graduate Degree in the concerned subject.
- d) “Optional Paper” means an advanced paper due to departmental choice for students based on their interest.
- e) “Open elective” means a course offered by Department for students of other Departments in the same Faculty. Students have freedom to choose from a number of optional courses offered by other Department/s to add to their credits required for the completion of their respective programmes: however, if in a P.G. Centre there is only one Department for the time being, the students of that Department should study that open elective course.
- f) “Credit” means the unit by which the course work is measured. For this Regulation, one Credit means one hour of teaching work. Normally a Semester is of 16 weeks duration in any given academic year. As regards the marks for the courses, 1 credit is equal to 25 marks, 2 credits is equal to 50 marks, 3 credits is equal to 75 marks and 4 credits is equal to 100 marks as used in conventional system.
- g) “Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each subject by the candidate after completing his/her Internal Assessment and Semester end Examinations. Each course carries a prescribed number of the marks of credits. These grades are awarded

for each subject after conversion of the marks and after completion of the examinations in each semester.

- h) “Grade Point Average” of GPA refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester. The GPA depends on the number of courses student takes and the grades awarded to him/her for each of the subjects so chosen.
- i) “Cumulative Grade Point Average” or CGPA refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward. The calculations of the GPA, CGPA is shown at the end of this regulation.

### **Minimum Eligibility for Admission:**

The students who have successfully completed the three year/four-year Degree course or any other Degree course of this University or of any other University recognized as equivalent there to by this University shall be eligible for admission to the Post Graduate Programmes under the KU-CBCS Programme provided they also satisfy the eligibility conditions like percentage of marks etc., as may be prescribed by the University and as per Ordinance of the course.

### **Entrance Test**

Candidate seeking admission to the course shall be required to appear for entrance test conducted by the University, for the 1<sup>st</sup> Semester.

### **Selection for Admission**

The selection of students shall be made on merit in each category of reservations as per the University rules for 1<sup>st</sup> Semester.

### **Intake**

The total number of candidates to be admitted to the course would be 69 only for the 1<sup>st</sup> semester. 40 seats are under normal fee and 20 seats are under enhanced fee. Two seats are allocated to other University candidates of which one for other University within the state and one for Outside state and 09 seats are under Other University students. Total Seats is 69.

### **Course of Study:**

The courses of study for M.A. English degree shall comprise of Theory courses as noted in the syllabus.

**Note: Specification of Degrees as per UGC notification dated March 2014 published in the Gazette of India, 5<sup>th</sup> July 2014 (Part III Section 4).**

### **Duration of the Programme:**

The programme of study for the Post-Graduate Master Degree shall normally extend over a period of two academic years, each academic year comprising of two semesters, and each semester comprising of sixteen weeks of class work.

## **Medium of Instruction**

The medium of instruction and examination is English.

## **Minimum Credits and Maximum Credits:**

- a) There shall be three categories of courses viz., Compulsory course, Optional Course and Open Elective Course. Compulsory and Optional Course should be from the concerned department only. The Open Elective are the courses offered by other Departments in the same Faculty.
- b) Each course shall have a definite course objective, Eligibility criterion for taking the course, scheme of Evaluation including the components of Internal Assessment (IA) marks, Dissertation (if any), the number of contact hours and the prescribed credits.

## **Course Structure:**

- a) The students of Post-Graduate Programme shall study the courses as may be approved and prescribed by the Academic Council of the University from time to time.
- b) A typical Master Degree program consists of a number of courses. This number varies from discipline to discipline. The term course is used to indicate a logical part of a subject matter of the programme (also referred to as paper). In essence the courses are of three types:
  - i. Compulsory Course
  - ii. Optional Course and
  - iii. Open Elective Course.
- c) Each programme shall have a set of compulsory course that a student must complete to get the degree in the concerned Department. These are distributed in each semester. There could be a minimum of such papers for each semester depending on the department.
- d) The students shall also choose a minimum number of Optional Courses offered within the department. Each department will offer at least one Optional paper in the third and fourth semester. The Department, BOS and the Faculty may also have spell out the number of such Optional courses a student will have to take for the specialization. The Department offering of Optional course shall provide the flexibility in the system so that the student can opt for a variety of programmes depending upon their interest.
- e) Each department shall offer at least two Open Elective courses for the II and III Semester for students from other department. Student from the same department are generally not allowed to opt the courses offered as Open Elective course in the same department. Each course (paper) in this system is designed carefully to include lectures / tutorial/ seminars/ Research work in Dissertation / practical training/ Viva-voce etc., to meet effective teaching and learning needs and the credits are assigned suitably.
- f) Master Degree Programmes are essentially semester system Programmes. There shall be 4 semesters in each Programme. There shall be two semesters for each year of the Programme. Each of the Semester will be of 16 weeks duration including evaluation and grade finalization period. The

academic session in each semester will provide 90 teaching days with 48 hrs of teaching / learning periods in six days session per week.

- g) The normal calendar for the semester would be as follows:
- i. I and III semester - August to November
  - ii. II and IV Semester - January to April

### Attendance

- a. Each paper shall be taken as a unit for the purpose of calculating the attendance.
- b. Each student will have to sign and mark his attendance for every hour of teaching of each paper. At the end of every month all teachers shall notify the attendance of every student on the Notice Board of the department during 2<sup>nd</sup> week of every month. Chairman shall certify the fulfilment of required attendance of every candidate in the Examination form.
- c. Certain proportion of the marks in Internal Assessment shall be awarded based on attendance as an incentive to the student for regularity in attendance.
- d. A student shall be considered to have satisfied the requirement of attendance for each paper, if he/she has to attend not less-than 75% of the number of classes held up to the end of the semester including tests, seminars, group discussions, practical, tutorials, etc.
- e. However, if a student represents his/her institution, University, State or Nation in sports, NCC, NSS of Cultural of any other officially sponsored activities, he/she shall be eligible to claim the attendance for the actual number of days participated subject to a maximum of 20 days in a semester based on the specific recommendation of the head of the Department.

	PG35T40 5	4.5(B) Cultural Studies	75	25	100	4	4
	PG35T40 5	4.5(C) Dalit Literature	75	25	100	4	4

### **Submission of Dissertation**

- a) M.A. English IV semester students who have chosen Dissertation as an optional course shall have to choose a topic for dissertation and preliminary preparation be carried out under the guidance of a teacher.
- b) The students shall have to submit the dissertation on the chosen topic, before the commencement of the theory examination.

### **Evaluation:**

- a. Each Course has two components, the first being Internal Assessment Marks and the second being the Semester End Exams. The Internal Assessment (IA) marks are based on continuous Internal Assessment. The total marks for the Internal Assessment would be based on the total credit awarded to the Course. For instance, if a Compulsory Course has a Credit award of 4, then the total max marks would be 100 for the subject.
- b. The marks shall be displayed on the Notice Board of the Department also. The tests shall be written in a separately designated book and after evaluation; the same should be shown to students.
- c. In case of candidates who wish to appear in improvement examinations, if any, the marks obtained in the Internal Assessment shall not be revised. There is no improvement for internal assessment.
- d. To encourage the students for the regular participation in academic curricula following break- up for attendance has been recommended.

<b>Attendance</b>	<b>Marks Allotted</b>
91 to 100%	3
81 to 90%	2
75 to 80%	1

- e. Students seeking the condoning of attendance after representing the University have to produce attendance certificates from the concerned authority and that attendance period to condone shall be considered for the allotment of marks as under.
- f. There shall be one end semester examination of 3 hours duration (for 75 marks/ paper). Each answer scripts of the semester end examination (theory and Dissertation) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks such a script shall be assessed by third external examiner. The marks allotted by the third examiner shall be average with nearer mark of the two evaluation

#### **Completion of Course:**

- a. A candidate is expected to successfully complete P.G. Master Degree course in two years from the date of admission.
- b. The CBCS scheme is fully carry-over system. However, the four –semester two years course should be completed by a student within double duration of the normal course period (i.e. 4 years). For these periods, candidate may be permitted to take examination in cross-semester (even semester examination in even and odd semester examination in odd semester examination) after paying the examination fee of Rs. 1,000/- per paper.

#### **Declaration of Results:**

- a. Minimum for a pass in each paper shall be 40% of the total 100 marks including both the IA and the semester end examinations. However, candidate should obtain at least 40% of the marks in the Semester End Examination. There is no minimum in the IA marks. However, after adding the IA and the semester end examination, the candidates should score a minimum of 40 % of the maximum marks for the subject.
- b. The candidates, seeking improvement of their results shall submit a representation along with a permissible fee to the Registrar (Evaluation) and surrender the degree certificate/ provisional pass certificate /original marks card of that semester within 15 days of announcement of result.

#### **Marks and Grading**

The grading of successful candidate at the examination shall be as follows:

<b>Percentage</b>	<b>GPA/CGPA</b>	<b>Letter</b>	<b>Class</b>
75.00 to 100.00 %	7.50 to 10.00	A	First Class with Distinction
60.00 to 74.90%	6.00 to 7.49	B	First Class
50.00 to 59.94%	5.00 to 5.99	C	Second Class
40.00 to 49.94%	4.00 to 4.99	D	Pass
Less than 40.00%	Less than 4.00	F	Fail

**KARNATAK UNIVERSITY, DHARWAD**

**DEPT OF STUDIES IN ENGLISH**

**MA ENGLISH SYLLABUS (PG 35)**

**UNDER CBCS PROGRAMME**

**(2020-21, 2021-22 and 2022-23 for three years)**

## **Program Outcomes**

1. Students will know that English being the official language of India is the global language and it has become the lingua franca of Indian administration, national communication, higher education, library, technical education, and international relationship.
2. Students will know that English education, more so, learning of English language and literature is essential for defining pan-Indians' lives today.
3. Enables students to know that MA English, more so, as a language and literature department, has been transforming English education in India.
4. Students will know that English language can be taught using not only English literature but also regional literatures in English translation, besides knowing the fact that there is no single English but many Englishes.

## **Program Specific Outcomes**

PH3501	Course I-Research methodology	50	50	100	03	03
PH3502	Course-II- Cognate/ Core Subject	50	50	100	03	03
PH3503	Course-III- Area of Research	50	50	100	03	03

At the end of the course work besides the above papers a viva voce examination is conducted for 50 marks. PhD course is for totally 350 marks.

**Karnatak University, Dharwad**  
**Dept of Studies in English**  
**PhD (PH 35)**

**Program Outcomes:**

1. PhD research Scholars will be able to think innovatively and scientifically.
2. PhD research scholars will acquire more competence in language, literature and specialized domain of knowledge.
3. PhD research scholars will imbibe the spirit of enquiry and systematic study needed to be the competent researchers.

**Program Specific Outcomes**

1. PhD research scholars will acquire in-depth knowledge in their specialized area.
2. PhD research scholars will be able to shape themselves as the active members of knowledge production.
3. PhD research scholars will master the skills and mechanics of writing the theses and research articles.
4. PhD research scholars will be able to obtain good positions in various colleges, universities and research institutions.

**The Syllabus for PhD Course Work 2020-21**  
**PH3501- Research Methodology**

**Course Outcomes**

1. PhD research scholars will acquire language skills and mastery over the research methodology.
2. PhD research scholars will acquire the skill of sorting out the sources and knowledge of documentation.

**The PhD students shall study the following aspects of research methodology**

1. Research and writing
2. Plagiarism and academic integrity
3. The mechanics of writing

4. The format of research paper
5. Documentation: preparing list of works
6. Documentation: citing sources in the text
7. Abbreviations
8. Use of electronic sources

**Note:** These topics have been selected from *MLA Handbook for Writers of Research Papers*, 7<sup>th</sup> edition. New Delhi: Affiliated East-West Press Pvt. Ltd., 2009. ISBN. 978-81-7671-061-9  
Students are requested to follow this book.
