| <b>COURSE OUTCOMES (COs)</b>                                                                                |                                                |
| After completing this paper, the students will be able to:                                                  |                                                |
| CO-1 Describe various research approaches and strategies that are applied to answer the research questions; |                                                |
| CO-2 State the various philosophical perspectives that guide research in social sciences;                   |                                                |

CO-3 Understand the various steps involved in the research process;

| Title of the Paper          | Internal Assessment Marks | Marks for Semester end Examination | Total Marks | Hours per week | Credits |
|-----------------------------|---------------------------|------------------------------------|-------------|----------------|---------|
| <b>Research Methodology</b> | 25                        | 75                                 | 100         | 4              | 4       |

#### Unit I:

- 1) Meaning, nature, scope, significance and relevance of Research in Public Administration.
- 2) Research and Teaching in Public Administration, its importance
- 3) Forms of Social Science Research – Normative and Empirical, Pure and Applied, survey research.

#### Unit II:

- 1) Research Process in Public Administration–Types of Research and Formulation of Research Problem and Operational sing Research.
- 2) Research Design and its outline, Hypothesis, Survey of literature, Sources of data.
- 3) Techniques of Research –Data Collection, Interview, Questionnaire, Sampling.

#### Unit III:

- 1) Tabulation and Research Report writing, steps, problems of Report writing.
- 2) Statistical analysis, SPSS Package and use of Computers in Social Science Research.
- 3) Processing of Data and interpretations, cross references and explanations, Use of theory.

#### Unit IV:

- 1) Hypothesis testing, ANOVA and ANOCOVA, Uni and Multi Variety Analysis.
- 2) Research Layout and types of Report writing.
- 3) Prospects of Social science Research and need for change.

| <p>After completing this paper, the students will be able to:</p> <p>CO-1 To understand the concept of democratic decentralization.</p> |                                                       |

CO-2 To trace the evolution of local government in India.

CO-3 To comprehend the institutional arrangements and processes of rural and urban governance.

| Title of the Paper                | Internal Assessment Marks | Marks for Semester end Examination | Total Marks | Hours per week | Credits |
|-----------------------------------|---------------------------|------------------------------------|-------------|----------------|---------|
| <b>Rural Governments in India</b> | 25                        | 75                                 | 100         | 4              | 4       |

#### Unit I:

- 1) Nature and Importance of Rural Governments in India – Constituent Assembly Debate and thoughts on Local Government: Kautilya, MK Gandhi, BR Ambedkar, RM Lohia, Jaya Prakash Narain
- 2) Evolution of Rural Government in India -Royal Commission (1909) –Montagu-Chelmsford Report on Local Self Government (1918)-Govt. of India Resolution (1918) Government of India Act (1919).
- 3) Indian Statutory Commission on Local Self Government(1928) Diarchy and its Consequences-Government of India Act (1935) -Provincial Autonomy and its consequences

#### Unit II:

- 1) Rural Government in India after independence: Community Development Programme (1952) - Major Committee Reports: Balwant Rai Mehta (1957), RR Diwakar (1964), Asoka Mehta (1978)
- 2) PK Thungan (1984) –CH Hanumantha Rao (1984), GVK Rao Committee (1985), LM Singhvi (1986) -64thConstitutional Amendment Bill (1989) –ML Dantwala Committee Report (1998) -73rdConstitutional Amendment (1992) -11thSchedule of the Constitution –Significance of Grama Sabha.
- 3) Types of Decentralisation- Deregulation, De-concentration, Delegation and Devolution – Major Principles: Subsidiary and Autonomy– Democratic Decentralisation

#### Unit III:

- 1) Decentralized Planning: History, Concept, importance and Approaches.
- 2) Need for Decentralized Planning -Difference between Centralized Planning and Decentralized Planning -Recent Initiatives of Decentralized planning in India.
- 3) Local Level Planning: Objectives, Significance, Advantages and Disadvantages, Procedure for Preparation of Draft Plan -Role of Gram Sabha, Challenges.

#### Unit IV:

- 1) Models of Decentralized Planning – Kerala, Karnataka and West Bengal.
- 2) Fiscal Federalism in India –Principles, Centre –State –Local Financial Relations.
- 3) Local Finance: Village Panchayats, Panchayat Samitis, Zilla Parishads, Resources and Resource Mobilisation Methods, Local Finance in 11th to 15thFinance Commission (include the latest).

**From**

**2015-16 Onwards**

# **KARNATAK UNIVERSITY, DHARWAD**

## **Regulations concerning Master Degree Programme**

### **Faculty of Social Sciences**

#### **Master Degree Programme in Psychology**

Regulations Governing the Post-Graduate Master Degree Programmes under Choice Based Credit System (KU-CBCS), framed under Section 44(1)(C) of K.S.U. Act, 2000

### **MASTER OF ARTS IN PSYCHOLOGY CHOICE BASED CREDIT SYSTEM (CBCS)**

#### **Title:**

These Regulations shall be called “Karnatak University Regulations Governing Post-Graduate under the Choice Based Credit System” for Master Degree programmes.

#### **Commencement:**

These Regulations shall come into force from the academic year 2015-2016.

#### **Definitions:**

In these Regulations, unless otherwise mentioned:

- a) “University” means Karnatak University:
- b) “Post-Graduate Programmes” means Master’s Degree Courses.
- c) “Compulsory Course” means a fundamental paper which a student admitted to a particular Post-Graduate programme should successfully complete to receive the Post-Graduate Degree in the concerned subject.
- d) “Specialization Paper” means an advanced paper due to departmental choice for students wanting to receive Degree in the specialization area:
- e) “Open elective” means a course offered by Department for students of other Departments in the same Faculty. Students have freedom to choose from a number of optional courses offered by other Department/s to add to their credits required for the completion of their respective programmes: however, if in a P.G. Centre there is only one Department for the time being, the students of that Department should study that open elective course.
- f) “Credit” means the unit by which the course work is measured. For this Regulation, one Credit means on hour of teaching work or two hours of practical work per week. Normally a Semester is of 16 weeks duration in any given academic year. As regards the marks for the courses, 1 credit is equal to 25 marks, 2 credits is equal to 50 marks, 3 credits is equal to 75 marks and 4 credits is equal to 100 marks as used in conventional system.
- g) “Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each subject by the candidate after

completing his/her Internal Assessment and Semester end Examinations. Each course carries a prescribed number of the marks of credits. These grades are awarded for each subject after conversion of the marks and after completion of the examinations in each semester.

h) “Grade Point Average” of GPA refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester. The GPA depends on the number of courses student takes and the grades awarded to him/her for each of the subjects so chosen.

i) “Cumulative Grade Point Average” or CGPA refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward. The calculations of the GPA, CGPA is shown at the end of this regulation.

**Minimum Eligibility for Admission:**

The students who have successfully completed the three year/four-year Psychology Degree course of this University or of any other University recognized as equivalent there to by this University shall be eligible for admission to the Post Graduate Programmes under the KU-CBCS Programme provided they also satisfy the eligibility conditions like percentage of marks etc., as may be prescribed by the University and as per Ordinance of the course.

**Entrance Test**

Candidate seeking admission to the course shall be required to appear for entrance test conducted by the University, for the 1st Semester.

**Selection for Admission**

The selection of students shall be made on merit in each category of reservations as per the University rules for 1st Semester.

**Intake**

The total number of candidates to be admitted to the course would be 35 only for the 1st semester. Two seats are allocated to other University candidates of which one for other University within the state and one for Outside state. Eight seats are under enhanced fee. Total Seats is 35

**Course of Study:**

The courses of study M.A in PSYCHOLOGY degree shall comprise of Theory and Practicals as noted in the syllabus.

**Duration of the Programme:**

The programme of study for the Post-Graduate Master Degree shall normally extend over a period of two academic years, each academic year comprising of two semesters, and each semester comprising of sixteen weeks of class work.

**Medium of Instruction**

The medium of instruction and examination is English.

**Minimum Credits and Maximum Credits:**

a) There shall be three categories of courses viz., Compulsory course, Specialization Course and Open Elective Course. Compulsory and Specialization Course should be from the concerned

department only. The Open Elective are the courses offered by other Departments in the same Faculty.

b) Each course shall have a definite course objective, Eligibility criterion for taking the course, scheme of Evaluation including the components of Internal Assessment (IA) marks, Projects (if any), the number of contact hours, type of practical and the prescribed credits.

c) The credits for each of compulsory course may vary from 3 to 4 credits; for specialization course it may vary from 1 to 4. In case of Open Elective Course, it shall be 1 to 3 credits for each paper.

d) A student shall register for minimum of 18 credits and a maximum of 30 credits per semester. However, to qualify for the degree in any Department under any school and faculty, he/she should have registered and cleared a minimum number of credits, which vary from course to course.

### **Course Structure:**

a) The students of Post-Graduate Programme shall study the courses as may be approved and prescribed by the Academic Council of the University from time to time.

b) A typical Master Degree program consists of a number of courses. This number varies from discipline to discipline. The term course is used to indicate a logical part of a subject matter of the programme (also referred to as paper). In essence the courses are of three types:

i. Compulsory Course

ii. Specialization Course or Optional Course and

iii. Open Elective Course.

c) Each programme shall have a set of compulsory course that a student must complete to get the degree in the concerned Department. These are distributed in each semester. There could be a minimum of such papers for each semester depending on the department.

d) The students shall also choose a minimum number of specializations Course offered within the department. Each department will offer at least one specialization paper in the third and fourth semester. The Department, BOS and the Faculty may also have spell out the number of such specialization courses a student will have to take for the specialization. The Department offering of specialization course shall provide the flexibility in the system so that the student can opt for a variety of programmes depending upon their interest.

e) Each department shall offer at least two Open Elective courses for the II and III Semester for students from other department. Student from the same department are generally not allowed to opt the courses offered as Open Elective course in the same department.

f) Each course (paper) in this system is designed carefully to include lectures / tutorial/ Laboratory work/ seminars/ Project work/ practical training/ report writing/ Viva-voce etc., to meet effective teaching and learning needs and the credits are assigned suitably.

g) Master Degree Programmes are essentially semester system Programmes. There shall be 4 semesters in each Programme. There shall be two semesters for each year of the Programme. Each of the Semester will be of 16 weeks duration including evaluation and grade finalization period. The academic session in each semester will provide 90 teaching days with 48 hrs of teaching / learning periods in six days session per week.

h) The normal calendar for the semester would be as follows:

i. I and III semester - August to November

ii. II and IV Semester - January to April

**Attendance**

- a. Each paper shall be taken as a unit for the purpose of calculating the attendance.
- b. Each student will have to sign and mark his attendance for every hour of teaching of each paper. At the end of every month all teachers shall notify the attendance of every student on the Notice Board of the department during 2nd week of every month. Chairman shall certify the fulfilment of required attendance of every candidate in the Examination form.
- c. Certain proportion of the marks in Internal Assessment shall be awarded based on attendance as an incentive to the student for regularity in attendance.
- d. A student shall be considered to have satisfied the requirement of attendance for each paper, if he/she has to attend not less-than 75% of the number of classes held up to the end of the semester including tests, seminars, group discussions, practical, tutorials, etc.
- e. However, if a student represents his/her institution, University, State or Nation in sports, NCC, NSS of Cultural or any other officially sponsored activities, he/she shall be eligible to claim the attendance for the actual number of days participated subject to a maximum of 20 days in a semester based on the specific recommendation of the head of the Department.

### Internship

The students need to undergo Internship (which is compulsory) for one month after the completion of third semester M A IN PSYCHOLOGY.

## Evaluation

a) Evaluation of the papers will have two components-

i) Internal Assessment, and

ii) Semester End examination

Total marks for the Internal Assessment are 25. In addition to 3 marks for attendance as shown in the table above (VIII C), the internal assessment shall consist of Two components-

i. Two written Tests of 8 marks each : 16 marks

ii. Seminar (Presentation) : 6 marks

Two written tests of 11 marks each : 22 Marks

b) **For C.B.C.S students**

The tests shall be written in separate designated answer booklet. The Departmental Council has decided that the course teacher has to conduct written test and seminars. The marks of all the components shall be notified on the notice board of the Department and submitted to the Registrar (Evaluation) at the end of every semester. The Internal Assessment marks shall be taken into account for compilation of grades. In case of candidates appearing for improvement examination the marks obtained in the Internal Assessment shall not be revised since there is no provision for improvement of Internal Assessment.

c) There shall be one Semester-End examination of 3 hours duration for every paper for 75 marks. The examination shall be conducted as per the rules, regulations, notifications, orders, instructions, procedures, formats and circulars issued by the University from time to time.

## Completion of the Course

a) A candidate is expected to successfully complete the Degree programme within two years from the date of admission.

b) Whenever the syllabus is revised, the candidate reappearing will have to write the examination as per the syllabi prevailing at that time.

c) The CBCS scheme is a fully carry-over system. However, the four-semesters (two years course) should be completed by the student within a maximum period of 4 years.

## Declaration of Results:

A. Minimum for a pass in each paper shall be 40% of the total 100 marks including both the IA and the semester end examinations. However, candidate should obtain at least 40% of the marks in the Semester End Examination. There is no minimum in the IA marks. However, after adding the IA and the semester end examination, the candidates should score a minimum of 40 % of the maximum marks for the subject.

- B. The candidates, seeking improvement of their results shall submit a representation along with a permissible fee to the Registrar (Evaluation) and surrender the degree certificate/ provisional pass certificate /original marks card of that semester within 15 days of announcement of result.

### **Marks and Grade Points**

**The grading of successful candidate/s at the examination shall be as follows:**

| <b>Percentage of Marks</b>    | <b>GPA/CGPA</b> | <b>Grade Letter</b> | <b>Class Awarded</b>         |
|-------------------------------|-----------------|---------------------|------------------------------|
| 75 and above                  | 7.50 to 10.00   | A                   | First class with Distinction |
| 60 and above but less than 75 | 6.00 to 07.49   | B                   | First Class                  |
| 50 and above but less than 60 | 5.00 to 05.99   | C                   | Second Class                 |
| 40 and above but less than 50 | 4.00 to 4.99    | D                   | Third Class                  |
| Less than 40                  | Less than 4.00  | F                   | Pass                         |

**KARNATAK UNIVERSITY, DHARWAD**

**REGULATIONS**  
**For**  
**P G DIPLOMA IN COUNSELLING &**  
**PSYCHOTHERAPY**

**CHOICE BASED CREDIT SYSTEM (CBCS)**

**From**

**2015-16 Onwards**

# **KARNATAK UNIVERSITY, DHARWAD**

Regulations concerning P.G Diploma in Counselling & Psychotherapy

**Faculty of Social Sciences**

**Post Graduation Diploma Program in Counselling & Psychotherapy**

Regulations Governing the Post-Graduate Diploma Programs under Choice Based Credit System (KU-CBCS), framed under Section 44(1)(C) of K.S.U. Act, 2000

## **P.G DIPLOMA IN COUNSELLING & PSYCHOTHERAPY CHOICE BASED CREDIT SYSTEM (CBCS)**

### **Title:**

These Regulations shall be called “Karnatak University Regulations Governing Post-Graduate under the Choice Based Credit System” for P.G Diploma programs.

### **Commencement:**

These Regulations shall come into force from the academic year 2015-2016.

### **Definitions:**

In these Regulations, unless otherwise mentioned:

- a) “University” means Karnatak University:
- b) “Post-Graduate Diploma Programmes” means Counselling and Psychotherapy Courses.
- c) “Compulsory Course” means a fundamental paper which a student admitted to a particular Post-Graduate programme should successfully complete to receive the Post-Graduate Diploma in the concerned subject.
- d) “Specialization Paper” means an advanced paper due to departmental choice for students wanting to receive Diploma in the specialization area:
- e) “Credit” means the unit by which the course work is measured. For this Regulation, one Credit means on hour of teaching work or two hours of practical work per week. Normally a Semester is of 16 weeks duration in any given academic year. As regards the marks for the courses, 1 credit is equal to 25 marks, 2 credits is equal to 50 marks, 3 credits is equal to 75 marks and 4 credits is equal to 100 marks as used in conventional system.
- f) “Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each subject by the candidate after completing his/her Internal Assessment and Semester end Examinations. Each course carries a prescribed number of the marks of credits. These grades are awarded for each subject after conversion of the marks and after completion of the examinations in each semester.
- g) “Grade Point Average” of GPA refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester. The GPA depends on the number of courses student takes and the grades awarded to him/her for each of the subjects so chosen.

i) “Cumulative Grade Point Average” or CGPA refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward. The calculations of the GPA, CGPA is shown at the end of this regulation.

**Eligibility for Admission :**

- a) The Eligibility for admission for the course mentioned above requires a post-graduate with M.A. /M.Sc in Psychology with any specialization securing 50% of marks (45% for SC/ST, Cat-I and Physically challenged) are eligible.
- b) Medium of Examination : English is the medium of instruction. However, the students who are willing to write exam in Kannada would also be permitted other than English.
- c) Intake of the course : Total intake of students for the course would be 30. The admission for the course would be made by the Karnatak University, Dharwad following the reservation system and the guidelines issued by the University from time to time.

**Selection for Admission**

The selection of students shall be made on merit in each category of reservations as per the University rules for 1st Semester.

**Intake**

The total number of candidates to be admitted to the course would be 20 only for the 1st semester. Two seats are allocated to other University candidates of which one for other University within the state and one for Outside state. Five seats are under enhanced fee. Total Seats is 20.

**Course of study:**

Each students shall study subjects mentioned below compulsorily and also submit a dissertation of minimum of five case reports after visiting the concerned clinics/hospitals/NGO’s/Organizations etc., in the second semester.

| Paper III : Counseling in Different Settings |   |             |
| Paper IV : Counseling and Psychotherapy      | } | II Semester |
| Paper V : Internship                         |   |             |

**Duration of the Programme:**

The programme of study for the Post-Graduate Diploma shall normally extend over a period of one academic years, comprising of two semesters, and each semester comprising of sixteen weeks of class work.

**Medium of Instruction**

The medium of instruction and examination is English.

**Minimum Credits and Maximum Credits:**

- a) There shall be one categories of courses viz., Compulsory course. Compulsory Course should be from the concerned department only.
- b) Each course shall have a definite course objective, Eligibility criterion for taking the course, scheme of Evaluation including the components of Internal Assessment (IA) marks, Projects (if any), the number of contact hours, type of practical and the prescribed credits.
- c) The credits for each of compulsory course may vary from 3 to 4 credits.
- d) A student shall register for minimum of 18 credits and a maximum of 30 credits per semester. However, to qualify for the degree in any Department under any school and faculty, he/she should have registered and cleared a minimum number of credits, which vary from course to course.

**Course Structure:**

- a) The students of Post-Graduate Diploma Programme shall study the courses as may be approved and prescribed by the Academic Council of the University from time to time.
- b) Each course (paper) in this system is designed carefully to include lectures / tutorial/ Laboratory work/ seminars/ Project work/ practical training/ report writing/ Viva-voce etc., to meet effective teaching and learning needs and the credits are assigned suitably.
- c) PG Diploma Programmes are essentially semester system Programmes. There shall be 2 semesters in each Programme. There shall be two semesters for each year of the Programme. Each of the Semester will be of 16 weeks duration including evaluation and grade finalization period. The academic session in each semester will provide 90 teaching days with 48 hrs of teaching / learning periods in six days session per week.
- d) The normal calendar for the semester would be as follows:
  - i. I semester - December to April
  - ii. II Semester – May to August

**Attendance**

- a. Each paper shall be taken as a unit for the purpose of calculating the attendance.
- b. Each student will have to sign and mark his attendance for every hour of teaching of each paper. At the end of every month all teachers shall notify the attendance of every student on the Notice Board of the department during 2nd week of every month. Chairman shall certify the fulfilment of required attendance of every candidate in the Examination form.
- c. Certain proportion of the marks in Internal Assessment shall be awarded based on attendance as an incentive to the student for regularity in attendance.
- d. A student shall be considered to have satisfied the requirement of attendance for each paper, if he/she has to attend not less-than 75% of the number of classes held up to the end of the semester including tests, seminars, group discussions, practical, tutorials, etc.
- e. However, if a student represents his/her institution, University, State or Nation in sports, NCC, NSS of Cultural of any other officially sponsored activities, he/she shall be eligible to claim the attendance for the actual number of days participated subject to a maximum of 20 days in a semester based on the specific recommendation of the head of the Department.

### II Semester

| <b>Paper No.</b>         | <b>Title of the Paper</b>    | <b>Marks for Semester end Examination</b> | <b>Internal Assessment Marks</b> | <b>Total Marks</b> | <b>Hours per week</b> | <b>Credits</b> |
|--------------------------|------------------------------|-------------------------------------------|----------------------------------|--------------------|-----------------------|----------------|
| <b>COMPULSORY PAPERS</b> |                              |                                           |                                  |                    |                       |                |
| <b>PGD201</b>            | Counseling and Psychotherapy | 75                                        | 25                               | 100                | 4                     | 4              |
| <b>PGD202</b>            | Internship                   | 75                                        | 25                               | 100                | 4                     | 4              |

#### **Internship**

The students need to undergo Internship (which is compulsory) for one month after the completion of second semester P. G DIPLOMA IN COUNSELLING AND PSYCHOTHERAPY.

**Scheme of Evaluation :**

Question paper on each theory paper will have two parts, Part-A will have 4 questions with a and b options for 15 marks each. Part-B will consist of 6 questions on short notes, out of which the students shall write 4 for 5 marks for each question.

- 1) There shall be a University examination at the end of each semester.
- 2) First semester will have three theory papers and second semester will have one theory paper and dissertation and viva-voce.
- 3) Examination for each theory papers will be for 80 marks with three hours time duration.
- 4) In case of Internal Assessment of the theory papers there shall be two tests for 10 marks each as decided by the members of the Department Council.
- 5) Internal Assessment marks secured by the candidates shall be displayed on the notice board from time to time.
- 6) The statement of Internal Assessment shall be sent to the Registrar (Eva) at least 15 days before the final examination.
- 7) There shall be Viva-voce test conducted by examiners from the department and called from other universities.

**Board of examiners/valuation**

1. There shall be a Board of examiners for scrutinizing and approving the question papers and scheme of valuation.
2. About 50% of the examiners appointed for setting of question papers and valuation work in each semester shall be external.
3. There shall be double valuation for all theory papers and dissertation work; the average of the marks awarded by the internal and external examiners shall be taken as the final award for that particular paper/dissertation.
4. In case of 20% or more deviations in the marks awarded by the internal and the external valuer, the script shall be referred to the third valuer (who shall be an external examiner who has not valued earlier) and the average of the nearest two shall be considered for the award of marks.

**Completion of the Course**

- d) A candidate is expected to successfully complete the Diploma programme within one years from the date of admission.
- e) Whenever the syllabus is revised, the candidate reappearing will have to write the examination as per the syllabi prevailing at that time.
- f) The CBCS scheme is a fully carry-over system. However, the two-semesters (one years course) should be completed by the student within a maximum period of 1 years.

**Declaration of Results:**

- C. Minimum for a pass in each paper shall be 40% of the total 100 marks including both the IA and the semester end examinations. However, candidate should obtain at least 40% of the marks in the Semester End Examination. There is no minimum in the IA marks. However, after adding the IA and the semester end examination, the candidates should score a minimum of 40 % of the maximum marks for the subject.

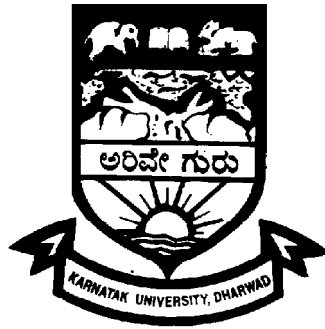

- D. The candidates, seeking improvement of their results shall submit a representation along with a permissible fee to the Registrar (Evaluation) and surrender the degree certificate/ provisional pass certificate /original marks card of that semester within 15 days of announcement of result.

### **Marks and Grade Points**

**The grading of successful candidate/s at the examination shall be as follows:**

| <b>Percentage of Marks</b>    | <b>GPA/CGPA</b> | <b>Grade Letter</b> | <b>Class Awarded</b>         |
|-------------------------------|-----------------|---------------------|------------------------------|
| 75 and above                  | 7.50 to 10.00   | A                   | First class with Distinction |
| 60 and above but less than 75 | 6.00 to 07.49   | B                   | First Class                  |
| 50 and above but less than 60 | 5.00 to 05.99   | C                   | Second Class                 |
| 40 and above but less than 50 | 4.00 to 4.99    | D                   | Third Class                  |
| Less than 40                  | Less than 4.00  | F                   | Pass                         |

# **KARNATAK UNIVERSITY, DHARWAD**

## **REGULATIONS** **For** **Doctor of Philosophy**

**CHOICE BASED CREDIT SYSTEM (CBCS)**

**From**

**2015-16 Onwards**

| <b>PhD Program Outcomes</b> |                                                                                                                                |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>PO-1</b>                 | The students will develop evidence based knowledge of wellbeing science.                                                       |
| <b>PO-2</b>                 | Students will engage in scientific research activities and gain the skills necessary to conduct and publish original research. |
| <b>PO-3</b>                 | Students will demonstrate knowledge and competence in analyzing the data quantitatively and qualitatively.                     |
| <b>PO-4</b>                 | Students will demonstrate the knowledge and competence in ethical conduct of research.                                         |
| <b>PO-5</b>                 | Students will learn to integrate the theory and practice of psychological research.                                            |

| <b>Paper Code and Name</b> | <b>PHD101: Cognitive Psychology</b>                                                                                                                     |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>COURSE OUTCOMES</b>     |                                                                                                                                                         |
| CO-1                       | 1.The scholar will attain knowledge about Meaning, nature and historical roots of cognitive psychology                                                  |
| CO-2                       | 2. The pupil will gain deeper understanding of Anatomy of brain and related cognitive functions                                                         |
| CO-3                       | 3. The pupil will be able to understand specific research techniques used in cognitive Psychology research and use them in designing their research.    |
| CO-4                       | 4. The scholar will be able to understand the process of cognitive development across life span and formulate age appropriate techniques of research.   |
| CO-5                       | 5. The pupil will be able to gain deeper understanding of various cognitive processes and compare western and indigenous perspectives of consciousness. |

**KARNATAK UNIVERSITY, DHARWAD**  
**P. G. DEPARTMENT OF STUDIES IN SANSKRIT**

**M.A. IN SANSKRIT**

**Regulations and Syllabus  
for  
P.G. Department of Studies in  
SANSKRIT  
(I to IV Semesters)  
Under Choice Based Credit System  
(2020-21, 2021-22 and 2022-23 for three years)**

# KARNATAK UNIVERSITY, DHARWAD

## Arts Faculty of CBCS Regulations

With effect from the academic year 2020-21

### 1.0 Title

These Regulations shall be called “Regulations Governing the Post-Graduate Programmes in the Faculty of Arts under the Choice Based Credit System” in Karnatak University, Dharwad.

### 2.0 Commencement

These Regulations shall come into force with effect from the academic year 2008-09.

### 3.0 Definitions

a In these Regulations, unless otherwise provided:

“Academic Council” means Academic Council of the University constituted according to the *Karnataka State Universities Act, 2000*.

b “Board of Studies” means P.G. Board of Studies of the University, Adhoc/ Combined and Steering Committees of International Diploma Programmes in the discipline/subjects concerned.

c “Compulsory Course” means fundamental course, which the student admitted to a particular Post-Graduate Programme, should successfully complete to receive the Post Graduate Degree in the concerned subject.

d “Course Weightage” means number of credits assigned to a particular course.

e “Credit” means the unit by which the course work is measured. One Credit means one hour of teaching work or two hours of practical work per week. As regards the marks for the courses, 1 Credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks.

f “Cumulative Grade Point Average (CGPA)” refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward from first semester to subsequent semesters.

g “Degree” means Post-Graduate Degree.

h “Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each course by the candidate in both Internal Assessment and Semester-end Examinations.

i “Grade Point Average (GPA)” refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester.

j “Open Elective Course” means a course offered by a Department to the students of other Departments.

k “Post Graduate Programme” means semesterised Master’s Degree Programmes in the Faculty of Arts under CBCS excluding P.G. Diploma, Post Graduate International Diploma.

l “Specialization course” means advanced course offered by a Department that a student of that Department can opt as a special course.

m “Student” means the student admitted to programmes under (k).

n “University” means Karnatak University, Dharwad.

### 4.0 Minimum Eligibility for Admission

A candidate, who has successfully completed Bachelor’s Degree programme or any other Degree programme of this University or of any other University recognized as equivalent thereto by this University, shall be eligible for admission to the Post Graduate Programmes provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the University from time to time.

Admissions shall be as per Government of Karnataka reservation policy and the directions issued in this regard from time to time.

### 5.0 Duration of the Programme

The duration of study for all the Post-Graduate Degree programmes shall extend over a period of two consecutive academic years, each academic year comprising two semesters, and each semester comprising sixteen weeks with 90 working days.

However, the students, who discontinue the programme after one or more semesters due to extraordinary circumstances, are allowed to continue and complete the programme with due approval from the Registrar. Candidates shall not register for any other regular course other than Diploma and Certificate courses being offered on the campus during the duration of P.G. Programme.

6.0. Medium of Instruction and Evaluation.

The medium of instruction for all programmes except languages shall be English. However, the students may write the examinations in Kannada if so provided by the concerned Board of Studies.

7.0 **Programme Structure**

7.1 The students of Post-Graduate Programme shall study the courses as may be approved by the concerned Board of Studies, Faculty and the Academic Council of the University from time to time subject to minimum and maximum credits as outlined in these regulations.

7.2 There shall be three categories of courses namely, Compulsory Courses, Specialization Courses and Open Elective Courses.

7.3 Each programme shall have a set of Compulsory Courses, as stipulated in the regulations governing the concerned programme that a student must complete to get the concerned degree.

7.4 In those programmes that offer specialization courses, the students shall choose the prescribed number of Specialization Courses offered within the Department.

7.5 Each Department shall offer Open Elective courses for students of other Departments. The students of a Department shall choose Open Elective courses from among those prescribed by the University from time to time. P.G. Centers and affiliated colleges can offer those Open Elective Courses which are approved or prescribed by their Parent Department of the University. Such Open Elective courses shall be taught by qualified teachers approved by the University.

7.6 The credits for each of the Compulsory Courses may vary from 2 to 4; for Specialization Course 4; and for Open Elective Course, from 1 to 4. Wherever practical component/ project work/ field work/ dissertation/ orals is involved in the course, the total credits may extend to 6 or as otherwise provided.

7.7 A student shall register for a minimum of 72 credits during the whole duration of PG Programme.

7.8 The students shall undertake project/extension/field work/dissertation/ during the programme as a compulsory course or in lieu of Specialization Course or Open Elective Course if so specified by the concerned Board of Studies.

7.9 The ratio between Compulsory, Specialization and Open Elective may differ from department to department.

7.10 The detailed programme structure for Faculty of Arts shall be as prescribed and shown below:

| Semester | No.of Compulsor | Total no. of credits | Specialisation Courses | Total no. of credits | Open Elective | Total no. of credits of Open | Total no. of credits |
|----------|-----------------|----------------------|------------------------|----------------------|---------------|------------------------------|----------------------|
|----------|-----------------|----------------------|------------------------|----------------------|---------------|------------------------------|----------------------|

|                                | y courses<br>(credit per<br>course) | of<br>compulsor<br>y courses | (credit per<br>course) | for<br>Specialis<br>ation<br>courses | Course<br>(credit<br>per<br>course) | Elective Course<br>(OEC) | for the<br>semester |
|--------------------------------|-------------------------------------|------------------------------|------------------------|--------------------------------------|-------------------------------------|--------------------------|---------------------|
| Sem. I                         | 03 (04)                             | 12                           | 1-3 (4)                | 4                                    | 1-3 (2-4)                           | 2-4                      | 16+ OEC             |
| Sem.II                         | 03 (04)                             | 12                           | 1-3 (4)                | 4                                    | 1-3 (2-4)                           | 2-4                      | 16+OEC              |
| Sem.III                        | 03 (04)                             | 12                           | 1-3 (4)                | 4                                    | 1-3 (2-4)                           | 2-4                      | 16+OEC              |
| Sem.IV                         | 03 (04)                             | 12                           | 1-3 (4)                | 4                                    | 1-3 (2-4)                           | 2-4                      | 16+OEC              |
| For the<br>entire<br>Programme | 12                                  | 48                           | 4-12(4)                | 16                                   | 4-12<br>(2-4)                       | 8-16                     | 64 + 8<br>( = 72    |

7.11 The Open Elective Courses shall have oral component if so prescribed by the concerned Board of Studies. The number of students admitted to the course shall be commensurate with the availability of infrastructure.

8.0 Attendance

8.1 Each course shall be taken as a unit for the purpose of calculating the attendance.

8.2 Each student shall sign the attendance register maintained by the Department for each course for every hour/unit of teaching/practical. The course teachers shall submit the monthly attendance report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the second week of the subsequent month.

8.3 Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.

8.4 A student shall be considered to have satisfied the required attendance for each course if he/she has attended not less than 75 % of the total number of instructional hours in that course.

8.5 There is no provision for condoning shortage of attendance.

8.6 The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission afresh to the given semester.

8.7 Such of the candidates who have participated in State/National level Sports, NSS, NCC, Cultural activities and other related activities as stipulated under the existing regulations shall be considered for giving attendance for actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authorities within two weeks after the event.

9.0 Examination

9.1. There shall be an examination at the end of each semester. The odd semester examinations shall be conducted by the respective Departments/ P.G.Centres/ Colleges. The even semester examinations shall be conducted by the University.

9.1.1 There shall be semester-end examination of 3 hours duration for 75 marks; 2 hours for 50 marks, 1.5 hours for 35 marks and 1 hour for 25 marks course.

9.1.2 Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application form through the proper channel and

shall also pay the fees prescribed.

- 9.1.3 The Office of the Registrar (Evaluation) shall allot the Register Number to the candidate at the 1st semester-end examination. That will be the Register Number of the candidate for all subsequent appearances and semester-end examinations.
- 9.1.4 The Answer scripts shall be in the safe custody of the University for a period of six months from the date of announcement of results. These shall be disposed off after six months.
- 9.1.5 The programme under CBCS is a fully carry-over system. A candidate reappearing for either the odd or even semester examinations shall be permitted to take examinations as and when they are conducted (even semester examination in even semester and odd semester examination in odd semester).
- 9.1.6 Candidates who have failed, remained absent or opted for improvement in any course/ courses shall appear for such course/ courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.
- 9.1.7 Candidates who desire to challenge the marks awarded to them, in the even semester-end examinations, may do so by submitting an application along with the prescribed fee to the Registrar (Evaluation) within 15 days from the announcement of results.

## **9.2 Odd Semester Examination**

- 9.2.1 There shall be a Board of Examiners to set, scrutinise and approve question papers.
- 9.2.2 The BOE shall scrutinise the question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation).
- 9.2.3 The office of the Registrar Evaluation shall dispatch the question papers to the Departments/ P.G.Centres/ Colleges who shall conduct the Examinations according to the Schedule announced by the University.
- 9.2.4 The Chairperson of the Department/ Administrator of the P.G.Centre/ Principal of the College shall appoint one of their full time course teachers as Post Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts.
- 9.2.5 Answer scripts shall be valued by the examiners appointed by the University. However, in those centers where an examiner for a particular course is not available, then the answer scripts of that course shall be dispatched to the office of the Registrar (Evaluation) who shall arrange for valuation of the same.
- 9.2.6 There shall be single valuation. The examiner (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on the answer script.
- 9.2.7 The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be dispatched by the PGP Coordinator to the Registrar's (Evaluation) Office at the conclusion of the valuation at the respective centres.
- 9.2.8 The Office of the Registrar Evaluation shall process and announce the results.

## **9.3 Even Semester**

- 9.3.1 There shall be a Board of Examiners to set, scrutinise and approve question papers.

9.3.2 As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other Universities/ Research Institutes.

9.3.3 Each answer script of the semester-end examination (theory and project report/dissertation/practical) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averaged with nearer award of the two evaluations.

Provided that in case the number of answer scripts to be referred to the third examiner in a course exceeds minimum of 5 or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.

9.3.4 Wherever dissertation/ project work is prescribed in the even semesters of a programme, the same shall be evaluated by both internal and external examiners. The evaluation shall be as prescribed by the concerned Board of Studies.

9.3.5 In case of programmes with oral examination, details of maximum marks, credits or duration may vary from Department to Department as specified by the concerned Board of Studies.

9.4. Evaluation

9.4.1 Each Course shall have two evaluation components - Internal Assessment (IA) and the Semester End Exams.

9.4.2 The IA component in a course shall carry 25/25/15 marks and the Semester End Examination shall carry 75/50/35 marks respectively, as the case may be. Courses having 25 marks and 15 marks as IA component shall have a maximum of 3 marks allotted for attendance. However, in case of project work, the distribution marks for internal assessment and examination shall be left to discretion of the concerned BOS.

9.4.3 Marks for attendance shall be awarded to the students according to the following table. For courses carrying 25 /15 of marks for IA, the attendance marks shall be:

| Attendance (in percentage) | Marks    |
|----------------------------|----------|
| Above 90                   | 3        |
| Above 80 and up to 90      | 2        |
| Above 75 and up to 80      | 1        |
| 75                         | No marks |

9.4.4 Internal Assessment (IA) shall be based on written tests/ assignments/ seminars/orals and /or any other instructional activity as specified in the Faculty Regulations from time to time. However, the number of IA components per course per semester shall not be less than two.

9.4.5 The IA marks list shall be notified on the Department Notice Board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination, or as directed by the University.

9.4.6 The tests shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.

9.4.7 There is no provision for seeking the improvement of Internal Assessment marks.

- 9.4.8 The IA records, pertaining to a Semester Examination, shall be preserved by the Departments/ Centres/ Colleges for a period of one year from the date of the semester Examination. These records may be called by the University or a body constituted by the University as and when deemed necessary.
- 9.4.9 The Viva-voce shall be conducted by an internal and external examiner.
- 9.4.10 The marks distribution per course shall be as follows:

| Max. marks per course | IA marks               |                              |       | Semester-end examination | No. of teaching hours | No. of credits |
|-----------------------|------------------------|------------------------------|-------|--------------------------|-----------------------|----------------|
|                       | Test/Orals/Assignments | Maximum marks for Attendance | Total |                          |                       |                |
| 100                   | 22                     | 3                            | 25    | 75                       | 4                     | 4              |
| 75                    | 22                     | 3                            | 25    | 50                       | 3                     | 3              |
| 50                    | 12                     | 3                            | 15    | 35                       | 2                     | 2              |

- 10.0. Maximum duration for completion of the Programme
- 10.1 A candidate admitted to a post graduate programme shall complete it within a period, which is double the duration of the programme from the date of admission.
- 10.2 Whenever the syllabus is revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabus.
- 11.0. Declaration of Results
- 11.1 The minimum for a pass in each course shall be 40% of the total marks including both the IA and the semester-end examinations. Further, the candidate shall obtain at least 40% of the marks in the semester-end examination. There is no minimum for the IA marks.
- 11.2 Candidates shall secure a minimum of 50% in aggregate in all courses of a programme in each semester to successfully complete the programme.
- 11.3 Candidates shall earn the prescribed number of credits for the programme to qualify for the PG Degree.
- 11.4 For the purpose of announcing the results, the aggregate of the marks secured by a candidate in all the semester examinations shall be taken into account. However, Ranks shall not be awarded in case the candidate has not successfully completed each of the semesters in first attempt or has not completed the programme in the stipulated time (vide Regulation 5) or had applied for improvement of results.
- 12.0** Marks, Credit Points, Grade Points, Grades and Grade Point Average
- 12.1 The grade points and the grade letters to candidates in each course shall be awarded as follows:

| Percentage of marks             | Grade Points                      | Grade Letter |
|---------------------------------|-----------------------------------|--------------|
| 75 and above, up to 100.00 %    | 7.50 to 10.00                     | A            |
| 60 and above but less than 75 % | 6.00 and above but less than 7.5  | B            |
| 50 and above but less than 60 % | 5.00 and above but less than 6.0  | C            |
| 40 and above but less than 50 % | 4.00 and above but less than 5.00 | D            |
| less than 40.00 %               | Less than 4.00                    | F            |

- 12.2 Credit Point (CP): The Credit Point for each course shall be calculated by multiplying the grade point obtained by the credit of the course.

12.3 The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned by the student in all the courses by the total number of credits of those courses of the semester.

12.4 The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points in all the semesters by the total number of credits in all the semesters. The CGPA to date shall be calculated by dividing the total number of credit points in all the semesters to date by the total number of credits in all the semesters to date.

CGPA for the I Semester = Sum of the CP of the I Semester ÷ Sum of the credits of the I Semester

CGPA for the II Semester = Sum of the CP of the I Sem + Sum of the CP of II Sem. ÷ Sum of the credits of the I Semester + II Semester

CGPA for the III and IV Semesters shall be computed accordingly

12.5 The Grade Card at each semester examination shall indicate the courses opted by the student, the credit for the course chosen by the student, the credit points obtained in each course, the grade letter and the grade point average. No class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade Point Average.

12.6 Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below:

| Cumulative Grade Point Average (CGPA) | Class to be awarded          |
|---------------------------------------|------------------------------|
| 7.5 to 10.0                           | First class with Distinction |
| 6.0 and above but below 7.5           | First Class                  |
| 5.0 and above but below 6.0           | Second Class                 |

13.0 Miscellaneous:

- a Notwithstanding anything contained in these regulations, the semester system at Post-Graduate level is hereby repealed.
- b The provisions of any order, Rules or Regulations in force shall be inapplicable to the extent of its inconsistency with these Regulations.
- C The University shall issue such orders, instructions, procedures and prescribe such format as it may deem fit to implement the provisions of this Regulations.
- D The procedural details may be given by the University from time to time.
- E Any unforeseen problems/ difficulties may be resolved by the Vice Chancellor, whose decision in the matter shall be final.

Programme:

Name of the candidate:

Semester: I

Seat No:

Month & Year:

| Course                | Course code no | Credits | Max Marks | Mark Obtained | Semester Grade Point | Credit Points |
|-----------------------|----------------|---------|-----------|---------------|----------------------|---------------|
| Compulsory Courses    |                |         |           |               |                      |               |
| • Course-I            |                | 04      | 100       | 60            | 6.00                 | 24.00         |
| • Course-II           |                | 04      | 100       | 74            | 7.40                 | 29.60         |
| • Course-III          |                | 04      | 100       | 43            | 4.30                 | 17.20         |
| ○ ----                |                |         |           |               |                      |               |
| ○ -----               |                |         |           |               |                      |               |
| Specialisation Course |                |         |           |               |                      |               |
| Course-I              |                | 04      | 100       | 52            | 5.20                 | 20.80         |
| Course –II            |                | 04      | 100       | 65            | 6.50                 | 26.00         |
| *                     |                |         |           |               |                      |               |
| *                     |                |         |           |               |                      |               |
| Open Elective Course  |                |         |           |               |                      |               |
| Course-I              |                | 02      | 50        | 40            | 8.00                 | 16.00         |
| Course-II             |                | 02      | 50        | 35            | 7.00                 | 14.00         |
| Total                 |                | 24.00   | 600       | 369           |                      | 147.60        |

GPA for I Semester = Total no. of CP ÷ Total no. of Credits = 147.60 / 24.00 = 6.15

CGPA for I Semester = GPA = 6.15

Calculation of CGPA for II, III and the Final Semester

---

$$\text{CGPA for II Sem} = \frac{\text{CP(I Sem)} + \text{CP(II Sem)}}{\text{Credits(I Sem)} + \text{Credits(II Sem)}}$$

$$\text{CGPA for III Sem} = \frac{\text{CP(I Sem)} + \text{CP(II Sem)} + \text{CP(III Sem)}}{\text{Credits(I Sem)} + \text{Credits(II Sem)} + \text{Credits(III Sem)}}$$

$$\text{CGPA for the programme} = \frac{\text{CP (I Sem)} + \text{CP(II Sem)} + \text{CP(III Sem)} + \text{CP (IV Sem)}}{\text{Credits(I Sem)} + \text{Credits(II Sem)} + \text{Credits(III Sem)} + \text{Credits(IV Sem)}}$$

(\*CP: Credit Points)

---

## **Program Outcomes**

1. As Sanskrit is the classical language and Mother of all Indian languages except Dravidian languages. All Indian languages are included in eighth schedule of the Indian Constitution. There is a Sanskrit language which is in number of 17<sup>th</sup>. Sanskrit belongs to the Indo-European family of languages. It is one of the three earliest ancient documented languages arose from common root language now referred to as Proto-Indo-European language. Most of the Indian Historical documents are available in Sanskrit language. Indian literature, culture, contribution of spiritual thoughts are documented in Sanskrit language also. The student will learn these things by the end of the programme.
2. The student will be aware of the fact that Sanskrit is the classical language of India.
3. He will realize that translation work is essential in education, more so, imparting of Sanskrit language skills and literature is essential for defining Indians in ancient days.
4. He will learn that Vedic literature, classical literature, and its Relevancy in modern days.
5. He will learn that Sanskrit language encourages conducting the Research and translation work. All that will be oriented towards empowering the students for employees.

## **Program Specific Outcomes**

1. Sanskrit language and literature is taught to run Sanskrit paathashaala, colleges, and universities also which institutions are having a Sanskrit subject as a MIL and optional. The students will be able to acquire proficiency in Sanskrit for employability.
2. Understand the Indian (Rishis) spiritual knowledge and worship of Nature.
3. MA Sanskrit graduates are getting opportunity to conduct Research regarding linguistic works and its Research in modern days. They are able to conduct research, teaching regarding languages and its importance for other Disciplinary.

**P.G. Department of Studies in Sanskrit  
Syllabus 2020-21 onwards**

Department : P.G. Department of Studies in Sanskrit  
Course : M.A. in Sanskrit

| I Semester | II Semester | III Semester | IV Semester |
|------------|-------------|--------------|-------------|
| PG52T101   | PG52T201    | PG52T301     | PG52T401    |
| PG52T102   | PG52T202    | PG52T302     | PG52T402    |

**KARNATAK UNIVERSITY, DHARWAD**  
**A UNIVERSITY WITH POTENTIAL FOR EXCELLENCE**

**POST GRADUATE DEPARTMENT OF STUDIES AND  
RESEARCH IN SOCIAL WORK**

**Regulation & Syllabus**

**of**

**DOCTRINE OF PHILOSOPHY (PhD)**

**Revised For**

**PHD COURSE WORK**

**Under Choice Based Credit System (CBCS)**

**FROM THE ACEDMIC YEAR 2020 ONWARDS**

**KARNATAK UNIVERSITY, DHARWAD**

**POST GRADUATE DEPARTMENT OF STUDIES AND RESEARCH IN  
SOCIAL WORK**

The Department of Studies and Research in Social Work was started in the year 1962. Up to 1968, the department was part of the then Department of Anthropology. Further, from the year 1968 to 1973 was also under the Department of Sociology. Later, the Department gained its full-fledged status in the year 1973. The Department imparts training in the core subjects of Social Work along with specialized subjects like Human Resource Management and Industrial Relations, Women and Child Welfare, Criminology and Correctional Social Work, Medical and Psychiatric Social Work and Community Development etc.

Students aspiring to pursue the research leading to Ph.D. are provided with necessary facilities. Qualified Research Guides have been recognized by the University to guide such students. Apart from this, many other in-service training and academic research projects are undertaken from time to time.

**VISION:**

The Department envisions to provide to the society sustainable inclusive environmentally, non-offensive, non-discriminatory, competent and committed social work practitioners, who would devote themselves for the causes of promoting Social Justice and Empowerment of all and thus contribute to the fullest potential goal of the human race of making this place as worth living.

**MISSION:**

To impart value based scientific and quality education building strategic alliance with various stake holders to those desirous of making a career in the field of professional social work as effective social work practitioners, and educators, who envision challenging injustice and promoting an egalitarian / humane society.

To synchronize theoretical training with field exposure and enable the students in acquiring critically assessed knowledge and practice skills focused on working collaboratively and therapeutically with people. Besides, facilitate students to develop appropriate attitudes and attributes requisite for a professional social worker to work with their clientele.

To organize conference, symposia, seminars, etc. To disseminate the practice wisdom by involving students in the field of social work in this endeavor, so that the students could develop insights into complex social situations, endeavoring to set standards for quality social work education.

### A. Field Work Practicum

Supervised fieldwork practicum is an integral part of Social Work training. With its six learning opportunities, it is designed to assist trainees to develop and enhance professional practice skills. Learning is aided through observation, analysis of Social realities, and experience of participation in designing and providing Social Work intervention. The tasks are organized to help the learner acquire beginning skills and practice them to gain an expertise. Thus, the learner is encouraged during all the four semesters, to graduate from simple to complex skills and ultimately become an independent worker.

#### Social work practicum during first semester:

For the first semester the Social Work Practicum shall consist of concurrent Field Work and Social Work Camp. The marks allotted for the concurrent Field Work are 150 (6 credits) and Social Work Camp are 50 (2 credits). Both these components together form one unit.

Concurrent field work: This shall comprise of Orientation Lectures and Observation Visits as follows:

| PARTICULARS                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Orientation Lectures:</b>           | The new entrants are addressed and introduced to the nature, scope, importance and place of field work practicum in Social Work educational programme, through class room lectures. They are also to be acquainted with the purposes, functions and ethics of professional practice. The first 2 to 4 weeks, depending on the availability of total field work days during the first semester, the orientation lectures may be delivered.             |
| <b>Orientation/Observation Visits:</b> | The visits shall be arranged:<br>(i) to expose students to variety of professional situations of working with individual, group and community;<br>(ii) to provide an exposure to and understanding of the services provided in response to people's needs. The visits shall generally include all the fields of Social Work viz., health, education, community, correctional, industrial, social service, welfare and rehabilitation, etc., settings. |

| After completion of this practical's, the students will be able to: |                                                                                                                                                                                      |
| <b>CO 1</b>                                                         | Help the students in understanding the emerging trends community development.<br>Enrich technical competencies to assess and analyze community problems, needs and service delivery. |
| <b>CO 2</b>                                                         | Enhance the capacity to recognize the linkage between community                                                                                                                      |

|             |                                                                                                                                                                 |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
|             | development and the practices in the field in terms of policy and programmes.                                                                                   |
| <b>CO 3</b> | Understand the functioning of local government, Intervention for health issues and rural development.                                                           |
| <b>CO 4</b> | Examination through exposure to the rural/urban/tribal social systems, the existing resource systems                                                            |
| <b>CO 5</b> | To help the students to gain insight into the components of the rural/urban/tribal community and understand the dynamics, need and importance of the community. |

### **B. Social Work Camp:**

A camp shall be organized after the 1st semester end examination to expose the Social Work trainees to the rural/urban/tribal social systems, the existing resource systems in these, and interventions used by them, besides, enabling the student trainees to acquire skills in planning, organizing, coordinating, decision making directing, budgeting, conscious use of time, communication, team spirit, handling relationships, conflicts and difference of opinions, evaluation, etc.

The camp shall be directed by a member of the teaching staff (Permanent or Teaching Assistants) for a period of 7 days in any one of the above-mentioned social systems. The student trainees are required to submit individual reports of the camp work and their experiences on return from the camp, to the Department. These shall be assessed by a committee consisting of the Camp Director and the Chairperson of the Department for 25 marks and the student trainees have to appear for a Viva-Voce examination along with the Field Work Viva-Voce Examination of Semester – I for the rest of 25 marks. Thus, the total marks allotted to the Social Work Camp shall be 50 and credits shall be 2.

## SEMESTER – II - THEORY

|                                                               |                                                                                                                                                                                                                                               |
|---------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| After completion of this practical's, the students will be able to: |                                                                                                                                                                      |
| <b>CO 1</b>                                                         | Networking Social Welfare agencies, need/right based services with the individuals, groups and communities through concurrent field work                             |
| <b>CO 2</b>                                                         | Expose the students to apply the social work methods in working with the individuals and communities.                                                                |
| <b>CO 3</b>                                                         | Concurrent fieldwork will develop the techniques among students to working with therapeutic groups.                                                                  |
| <b>CO 4</b>                                                         | The basic and simple skills are to be developed among students                                                                                                       |
| <b>CO 5</b>                                                         | Students will get the knowledge about Administration, meetings, observe, discuss and interview members and assist them to achieve their desired objectives or goals. |

### A. Field Work Practicum

During Second semester, the student trainees shall be placed in various Social Welfare and Other agencies for the individual concurrent field work. This ongoing learning practice is an opportunity provided to the student trainees to develop intervention skills in reality situations. The learner may be encouraged to initiate and participate in direct service delivery through the programmes of the agency where he/she is placed for the field work/practicum. The basic and simple skills are to be developed by the student trainee through this closely supervised and guided field work placement.

|                                                                     |                                                                                                                                                                                                     |

| <b>CO 5</b>                                                         | Students will have a first-hand experience of filed about the social welfare institution and its many facets.                                                                                       |

## **B. Summer Placement / Internship:**

This component is meant to enable the student trainees to utilize their summer vacation fruitfully to integrate practice skills and techniques learnt. The main objectives of this component are to enable student trainees to experience direct practice and management operations, and to experience self in the role of the professional Social Worker.

The learner must volunteer to locate a setting (of own choice) about one to two months in advance and explore further possibilities of a three week practice learning placement. The learner is to record the learning and submit weekly reports to the Department. A summary report of the entire programme shall be submitted at the end of this programme.

The performance of the student in summer placement shall be assessed by a committee consisting of either the Chairperson of the Department or one Internal examiner and one External examiner on the basis of the reports submitted by them (25 marks) and on their performance in the Viva-Voce examination (25 marks) to be held along with the Field Work Viva-Voce examination of II Semester. The total marks allotted to the summer placement shall be 50 (2 credits)

| <b>COURSE OUTCOMES (COs)</b>                                        |                                                                                                                                          |
| After completion of this practical's, the students will be able to: |                                                                                                                                          |
| <b>CO 1</b>                                                         | Networking Social Welfare agencies, need/right based services with the individuals, groups and communities through concurrent field work |

|             |                                                                                                                                                                      |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CO 2</b> | Exposes students to methods of working with individuals and communities.                                                                                             |
| <b>CO 3</b> | Students will get the knowledge about Administration, meetings, observe, discuss and interview members and assist them to achieve their desired objectives or goals. |
| <b>CO 4</b> | To expose students to working with therapeutic groups and their treatment.                                                                                           |
| <b>CO 5</b> | Students will have good foundational experience before working with clients and communities.                                                                         |

#### **A. Concurrent Field Work – Individual Placement**

During this semester the field work programme shall commence with orientation lectures about various practice fields for about 2 to 4 weeks depending on the availability of total field work days for the academic term. Further, the student trainees, after counseling and assessing their aptitude, shall be placed in various practice fields of their choice under the supervision of faculty supervisors.

The student trainees are required to have first hand understanding of the problems / needs of the client system in their respective field of practice and develop skills of Social Work intervention in reality situations. This is an ongoing learning practice, which is meant to enable student trainees to develop their professional self by clarifying and imbibing values which sustain positive attitudes and professional ethics. This programme is also meant to develop capacity for self direction growth and change through self awareness.

| After completion of this practical's, the students will be able to: |                                                                                                                                                                                 |
| <b>CO 1</b>                                                         | Acquire skills in planning, organizing, implementing the tour with effective time management and team work and students will learn to take responsibilities on behalf of others |
| <b>CO 2</b>                                                         | Enables the students for decision making, resources management, sharing of tasks, cooperation and coordination.                                                                 |
| <b>CO 3</b>                                                         | Expose the students to different lifestyles, places and eras to deepen present social phenomenon.                                                                               |
| <b>CO 4</b>                                                         | Students will acquire new or modifying existing knowledge, behaviours, skills, values and preferences.                                                                          |
| <b>CO 5</b>                                                         | Students by travelling to different geographies are exposed to ideas, customs and broaden their horizon and awareness through interaction with professional experts.            |

#### **B. Study Tour**

A study tour for a period of 7 days shall be conducted under the guidance of a faculty member (Permanent/ Teaching Assistants) after the semester end examination of III

Semester, to provide an experience to study and appreciate innovative efforts by individuals and groups towards meeting peoples' core needs and initiate development. Each student trainee is required to submit a report of his/her experience of tour including the preparations made for the same, on return from the tour to the Department. These shall be assessed by a committee consisting of the Tour Director and the Chairperson of the Department for 25 marks and the student trainees have to appear for a Viva-Voce Examination along with the Field Work Viva-Voce Examination of III Semester for the rest of 25 marks. Thus, the total marks allotted to the Study Tour shall be 50 and credits shall be 2.

| After completion of this practical's, the students will be able to: |                                                                                                                                                                                                          |
| <b>CO 1</b>                                                         | It offers the opportunity to students in fascinate and passionate of research. It develops skills in planning the research, time management, writing and reporting, critical thinking and communication. |
| <b>CO 2</b>                                                         | Students have an opportunity and freedom to explore in-depth research into a topic of their interest.                                                                                                    |
| <b>CO 3</b>                                                         | Students bear responsibility for the quality of learning that place in the Research project and for the eventual written outcome.                                                                        |
| <b>CO 4</b>                                                         | Research can help students decide on a career path in connections to their own interests that may not ordinarily be made in passive learning environments.                                               |
| <b>CO 5</b>                                                         | Research offers students a concrete future career goals and further academic studies.                                                                                                                    |

Each candidate is required to carry out an empirical study during IV semester. He/she shall select a topic for project work at the beginning of IV semester and carry out the empirical study in consultation with the faculty supervisor to whom he/she has been assigned. On completion of the same, the report of his/her findings shall be bound and submitted along with the report of his/her supervisor about the work to the department, before the end of IV semester in which the candidate is permitted to take the final examination. The Faculty Supervisor/ Project guide is required to submit his/her assessment of the performance of each of the student assigned to him/her for 50 marks to the Chairperson of the Department. The same shall be subject to moderation by the Department Council.

The report shall be evaluated by either the Chairperson of the Department or an internal examiner and an External Examiner for 100 marks and a Viva-Voce examination shall be held by them for 50 marks. The candidate is required to defend oneself in the Viva-Voce examination.

Regulations Governing M.A. Degree Programme in Sociology Under the Choice Based Credit System

**I. Commencement**

These Regulations shall come into force from the academic year 2017-18.

**II. Definitions**

In these Regulations unless otherwise mentioned, provided.

- a) 'University' means Karnatak University, Dharwad.
- b) 'Board of Studies' means Board of Studies in Sociology (P.G) of the Karnatak University.
- c) 'Compulsory Paper' means the paper that is prescribed by the Department from time to time as compulsory.
- d) 'Specialization paper' means an optional paper prescribed by the Department from time to time.
- e) 'Open Elective' means, a paper offered by the Department of Sociology, for the students of other Departments in Karnatak University from time to time. However, the students of the Department of Sociology have freedom to choose from a number of open electives offered by other Departments to add to their credits required for the completion of their degree.
- f) 'Credit' means the unit by which the course work is measured. One credit means one hour of teaching work per week. As regards the marks for the papers, 1 Credit is equal to 25 marks, 2 Credits are equal to 50 marks, 3 credits are equal to 75 marks, 4 credits are equal to 100.
- g) 'Grade' is an index to indicate the performance of a student. These Grades are arrived at by converting marks scored in each paper by the candidate after completing his/her Internal Assessment and Semester End Examinations. These grades are awarded for each paper at the end of each semester.
- h) 'Grade Point Average' or GPA refers to an indicator of the performance of the student in a given semester. GPA is the weighted average of all Grades student gets in a given semester. The GPA depends on the number of papers a student takes and the grades awarded to him/her for each of the paper so chosen.
- i) 'Cumulative Grade Point Average' or CGPA refers to the Cumulative Grade Point Averages weighted across all the semesters and is carried forward. The calculations of the GPA, CGPA is shown in these regulations.

**III. Admission**

- a. The details of the admission rules are governed by the notifications issued by the University from time to time. However the applicant should have studied Sociology as one of the optionals for admission to the Department of Sociology.

**Total Intake Capacity:**

| <b>KUD campus (60)</b> |                     | <b>P.G Center Haveri campus (55)</b> |                     | <b>GFGC, Kumta campus (15)</b> | <b>GFGC, Honnavar campus (15)</b> | <b>KSS college Gadag campus (15)</b> |
|------------------------|---------------------|--------------------------------------|---------------------|--------------------------------|-----------------------------------|--------------------------------------|
| Under Normal fees      | Under Enhanced fees | Under Normal fees                    | Under Enhanced fees | Under Normal fees              | Under Normal fees                 | Under Normal fees                    |
| 35                     | 25                  | 35                                   | 20                  | 15                             | 15                                | 15                                   |

(Note: The University can allot more seats under enhanced fees category looking into situation).

**IV. Duration of the Programme**

The programme of study for M.A. Degree in Sociology shall normally extend over a period of two consecutive academic years, each academic 2-year comprising two semesters and each semester comprising 16 weeks of class work. However, the maximum period for completion of the Degree is four years from the date of his/her first admission. The normal calendar for the semester shall be as follows:

- a) I and III Semesters  
b) II and IV Semesters

: August to November  
: January to April

## V. Teaching Course

Each paper shall be taught for 4 hours per week during the period of 16 weeks in a given semester. However, the actual number of classes may not be 64 hours as per the above calculation. It may vary from paper to paper depending on the activities of the Department, general holidays and the calendar of events prescribed by the University from time to time.

## VI. Medium of Instruction

The medium of instruction shall normally be English. However, the students may write the examinations in Kannada also.

## VII. Scheme of Papers and Credits/Classes and Marks

- a) There shall be three categories of papers viz., Compulsory papers, Specialization papers and Open Electives. Compulsory and Specialization papers are meant for the students of Department of Sociology. The Open Electives are the papers offered by the Department for the students of other Departments. However, the students of the Department of Sociology can also offer the Open Electives offered by other Departments to add to their Credits depending on their interest.
- b) The Credits for each of the Compulsory paper and Specialization paper are 4. The Open Electives offered by the Department to the students of other Departments also carry 4 credits. However, the number of credits for the Open Electives chosen by the students of our Department from amongst the Open Electives offered by the other Departments may vary from one Department to the other Department depending on the offer they make. The project work in IV Semester also carry 4 credits.

### PROGRAMME: M.A SOCIOLOGY

## Summary of Credits for the Degree of M.A. in Sociology

### I Semester:

Six Compulsory Papers : 24 Credits

### II Semester:

Four Compulsory Papers : 16 Credits

One Specialization Paper : 04 Credits

One Open Elective Paper : Credits vary from Department to Department depending on the choice of open elective by the student

### III Semester:

Four Compulsory Papers : 16 Credits

One Specialization Paper : 04 Credits

One Open Elective Paper : Credits vary

### IV Semester:

Four Compulsory Papers : 16 Credits

One Specialization Paper : 04 Credits

PROJECT WORK (Compulsory for M.A.Sociology students only) : 04 Credits

**Grand Total: 96 Credits**

### VIII. Attendance

- a) The student shall be considered to have satisfied the requirement of attendance if e/she has attended not less-than 75% of total number of classes held till the end of the semester inclusive of tutorials. Each paper shall be taken as a unit for calculating the attendance.
- b) Each student will have to sign his/her attendance for every hour of teaching in each paper. The Course Teacher shall submit monthly attendance report to the Chairman of the Department at the end of every month. The Chairman of the Department shall notify the attendance of every student on the Notice Board of the Department during the second week of the subsequent month. The Chairman of the Department shall send to the Registrar (Evaluation) and other Officers, as directed by the Registrar from time to time, at the end of every month and at the end of every semester, the detailed statement of attendance.
- c) In order to encourage regularity in attendance a maximum of three marks shall be awarded to the students as shown below:

### Marks for Attendance in Each Paper

| Percentage of Attendance | Internal Assessment Marks |
|--------------------------|---------------------------|
| Above 90                 | 3 Marks                   |
| Above 80 and up to 90    | 2 Marks                   |
| Above 75 and up to 80    | 1 Mark                    |
| 75                       | No Marks                  |

- d) However, if a student represents the Department/ University/ State/ Nation in sports, NCC, NSS or Cultural or any other officially sponsored activities he/she shall be eligible to claim the Attendance for the actual number of days utilized in such activities (including travel days) subject to the production of certificate from the relevant authority within two weeks after the event.
- f) A student who does not satisfy the requirement of attendance of 75% in each paper shall not be permitted to appear the semester end examination. Such candidates may seek admission afresh to the given semester.

### IX. Evaluation

- a) Evaluation of the papers will have two components-
  - i) Internal Assessment, and
  - ii) Semester End examination

Total marks for the Internal Assessment are 25. Maximum 3 marks for attendance as shown in the table above (VIII C), the internal assessment shall consist of three components-

- i. Two written Tests of 11 marks each : 22 marks
- ii. For courses 1.4, 2.3, 3.3, 4.2, 4.3, 4.4 one written test of Ten marks and one Book Review Essay for 12 marks.

The tests shall be written in separate designated answer booklet. The marks of all the two tests shall be notified on the notice board of the Department and submitted to the Registrar (Evaluation) at the end of every semester. The Internal Assessment marks shall be taken into account for compilation of grades. In case of candidates appearing for improvement examination the marks obtained in the Internal Assessment shall not be revised since there is no provision for improvement of Internal Assessment.

b) There shall be one Semester-End examination of 3 hours duration for every paper for 75 marks. The examination shall be conducted as per the rules, regulations, notifications, orders, instructions, procedures, formats and circulars issued by the University from time to time.

#### **X. Challenge Evaluation**

There shall be a provision for challenge valuation as per the rules and regulation of the University issued from time to time.

#### **XI. Completion of the Course**

- a) A candidate is expected to successfully complete the Degree programme within two years from the date of admission.
- b) Whenever the syllabus is revised, the candidate reappearing will have to write the examination as per the syllabi prevailing at that time.
- c) The CBCS scheme is a fully carry-over system. However, the four-semesters (two years course) should be completed by the student within a maximum period of 4 years.

#### **XII. Declaration of Results**

a) Minimum for a pass in each paper shall be 40% of the total 100 marks including both the IA and the Semester-End examination. However a candidate should obtain at-least 40% marks in the Semester-End examination. There is no minimum for the Internal Assessment marks. However after adding the IA marks and the semester end examination marks, the candidates should score a minimum of 40% of the maximum marks per paper. Candidate shall secure a minimum of 50 % in aggregate in all papers of a programme in each semester to successfully complete the programme.

b) The improvement of the performance is permitted as per the rules and regulations of the University.

#### **XIII. Marks and Grade Points**

The grading of successful candidate/s at the examination shall be as follows:

##### **Percentage of Marks**

| <b>Percentage of Marks</b>    | <b>GPA/CGPA</b> | <b>Grade Letter</b> | <b>Class Awarded</b>         |
|-------------------------------|-----------------|---------------------|------------------------------|
| 75 and above                  | 7.50 to 10.00   | A                   | First class with Distinction |
| 60 and above but less than    | 6.00 to 07.49   | B                   | First Class                  |
| 50 and above but less than 60 | 5.00 to 05.99   | C                   | Second Class                 |
| 40 and above but less than 50 | 4.00 to 4.99    | D                   |                              |
| Less than 40                  | Less than 4.00  | F                   |                              |

#### **XIV. Grading**

The Grade Point Average (GPA) shall be given to each candidate based on his/her performance during the semester which includes both the IA and the Semester-End examination. The GPA of each semester should be carried to next semester as Cumulative Grade Point Average CGPA. An illustration of the same is shown below.

#### **XV. Grade Points (Format)**

***CHAIRPERSON***

**M.A. (CBCS) IN SOCIOLOGY  
COURSES OF STUDY**

**SEMESTER-I**

**Paper - 1.1 CLASSICAL SOCIOLOGY**

**Course Code: PG53T101**

**Objectives:**

**This course will help the students to:**

- Learn about contributions of founding fathers of Sociology.
- To understand emergence of Sociology.
- Know the Classical Sociological theories.
- It helps the student's strong foundation for further understanding of Sociological theories.

**Learning outcomes**

1. It acquaint students various thought pattern of the founders of Sociology.
2. It helps the learners in studying different views and methods of founding fathers.
3. It helps to analyze methodological approach of various sociologists and its bearing on the respective theories.
4. It facilitates students to understand historical descriptive empirical investigation constructed by the classical rhetoricians.
5. It assists the students to know why they are called classical thinkers.

**UNIT-I: Introduction to Classical Sociology:**

- a. Transition from Social Philosophy to Sociology
- b. Enlightenment, Modernity and the Emergence of Sociology.
- c. Continental Sociological Traditions: French, German.

**UNIT-II: Emile Durkheim:**

- a. Division of labour
- b. Rules of Sociological Method
- c. Theory of Suicide
- d. Elementary forms of Religious life.

**UNIT – III: Vilfredo Pareto:**

- a. The Social System
- b. Logico Experimental Method
- c. Logical and Non Logical Actions
- d. Residues and Derivations
- e. Theory of Circulation of Elites

**UNIT-IV: Max Weber:**

- a. Theory of Social Action
- b. Methodological contributions: *Verstehen* Method
- c. Protestant Ethic and Spirit of Capitalism.
- d. Ideal Types

**UNIT-V: Georg Simmel:**

- a. Formal Sociology
- b. Philosophy of Money
- c. Social conflict.

**Essential Readings:**

- Abraham J.H. Origin and Growth of Sociology, Pelican books, London, 1974.
- Aron, Raymond, Main Currents in Sociological Thought (Two Volumes), Doubleday, Garden City, 1970.
- Barnes.H.E. An Introduction to the History of Sociology, University of Chicago Press, Chicago 1980.
- Bogardus, E. The Development of Social Thought, Vakils, Feffer and Simon's, Bombay, 1969.
- Coser, Lewis Masters of Sociological Thought, Harcourt & Brace, Chicago 1977

Emile Durkheim, Edited and Translated by Neil Gross, Robert Alun Jones, Foreword by Hans Joas (2004) Durkheim's Philosophy Lectures: Notes from the Lycee de Sens Course, 1883-1884.  
Emile Durkheim, Anthony Giddens (1972) Emile Durkheim: Selected Writings

**Paper- 1.2 SOCIAL STRUCTURE AND SOCIAL CHANGE**  
**Course Code: PG53T102**

**Objectives**

1. This course provides a broad overview of the different components of social structure, which act as bricks of social structure.
2. This course also familiarizes the various facets and factors responsible for the process of social change.
3. It provides conceptual and theoretical understanding of Social Structure and Social Change.
4. It gives detailed information about divisions in the society and culture of the society.

**Learning Outcomes**

1. At the end of the course the student will be able to understand the components of social structure and tries to understand his/her status and role in society and will start to behave accordingly.
2. The students will understand the patterns of social change and learn to adjust themselves with changing social atmosphere.
3. The students will be able to know the social layers existing in the society in the form of caste and class, their role in the society.
4. The course makes the students to understand the cultural facets of a given society and differentiate his culture and other cultures.

**UNIT-I: Social Structure and Function:**

- a. Conceptualizing Social structure
- b. Basis and Types of Social Structure
- c. Approaches to the study of Social Structure
- d. Concept of Function: Positivism and Functionalism

**UNIT-II: Components of Social Structure:**

- a. Status and Role
- b. Values
- c. Authority and Power
- d. Informal and Formal Groups
- e. Reference Groups

**UNIT-III: Social Change :**

- a. Concept and Patterns of Social Change
- b. Theories of Social Change: Cyclical Theories- Oswald Spangler, Arnold Toynbee; Immanent Theory: P.A. Sorokin.
- c. Factors of Social Change
- d. Social change and Globalization.

**UNIT -IV: Social Stratification and Social Mobility:**

- a. Meaning and systems of Social Stratification
- b. Functional Approach to the Study of Social Stratification – Kingsley Davis, Wilbert Moore, Talcott Parsons; Marxian Approach and Weberian approach.
- c. Social Mobility: Types and Determinants
- d. Theories of Social Mobility: P. Sorokin, Arsene Dumont.

**UNIT-V: Culture:**

- a. Meaning and Types of Culture.
- b. Perspectives of Culture: Functionalist, Marxian and Neo Marxist
- c. Mass culture
- d. Global culture

**Essential Readings:**

**PAPER 1.3 METHODOLOGY AND METHODS OF SOCIAL RESEARCH**  
**Course Code: PG53T103**

**Objectives:**

**This course will help the students to:**

- Comprehend the fundamental difference between methodology and methods of social research.
- Analyse the various methodological traditions of Sociology.
- Find out the contemporary trends in methodology

**Learning outcomes:**

1. It enables the learners to grasp the basic difference between methods/techniques and methodology of social research.
2. It helps the learners to study the major schools of thought in social research and also various methodological approaches/theories of sociology.
3. It also familiarizes the students the basic methodological concepts and makes difference between common sense and sociology.
4. It assists in enhancing the research interests and inculcates the spirit of inquiry among students who may be motivated to continue higher studies in research

**UNIT- I: Perspectives on Social Scientific Research:**

- a. Schools of Thought in social research: Rationalism, Empiricism, Realism, Idealism; Feminisms and Research: Challenging the Androcentric Methodology
- b. Methodology and Methods
- c. Theory; facts and social research
- d. Basic methodological concepts: Ontology, Epistemology,

**UNIT- II Methodological Traditions in Sociology:**

- a. Philosophy of social science: Enlightenment, reason and science
- b. Positivism – Auguste Comte and Emile Durkheim
- c. Hermeneutics – Wilhelm Dilthey and Max Weber
- d. Social Criticism: Karl Marx and C. Wright Mills

**UNIT- III Contemporary Trends in Sociology:**

- a. Constructivism
- b. Post-structuralism and Post-modernism
- c. Reflectivity in Sociology
- d. Feminist Methodology

**UNIT- IV Methods of Social Research and Tools of Data Collection:**

- a. Methods of research: Historical; Comparative; Research Design: Typology
- b. Elements of social research: concepts, constructs and variables; Propositions and hypotheses, theories and models
- c. Sampling; Survey and Case Study Method
- d. Observation, Interview and questionnaire methods

**UNIT-V: Recent Trends in Social Research and Report Writing:**

- a. Participatory research
- b. Online research
- c. Analysis of Data
- d. Report writing

**Essential Readings:**

## **Paper - 1.4 THE STUDY OF INDIAN SOCIETY**

### **Course Code: PG53T104**

#### **Objectives:**

This course will help the students to

- To understand and to know the past, civilization, traditional society etc.
- Various scholars speak on transformation of Indian Society to modern society.
- Identified the trends in Indian Society.

#### **Learning outcomes:**

1. To help the students to know the past and present caste system, various problems among caste, sub-caste people.
2. This paper helps the students to evaluate the merits and demerits in society.
3. It also helps the students to study the various approaches, theories of Indian Society.

#### **UNIT I: Introduction:**

- a. Nature and Importance of the study of Indian Society
- b. Geographical and Historical Features
- c. Unity in Diversity: Bases and Challenges

#### **UNIT-II: Theoretical Perspectives for study of Indian Society:**

- a. Indological perspective (Radhakamal Mukherjee, G.S. Ghurye, Louis Dumont)
- b. Structural – functionalism (M.N. Srinivas, S.C. Dube, McKim Marriot)
- c. Marxism– (D.P. Mukherjee, A.R. Desai, R.K. Mukherjee)
- d. Subaltern Perspective (B.R. Ambedkar, Ranjit Guha, David Hardiman)

#### **UNIT-III : Marriage, Family and Kinship:**

- a. Marriage and Family Among Hindus, Muslims, & Christians.
- b. Recent trends in Family, and Kinship and its Organization.
- c. Multiple Traditions, little tradition & Great tradition.
- d. Threats to Indian Society, Approaches to National Integration, Communalism, Linguism, Regionalism.

#### **UNIT - IV: Weaker Sections:**

- a. Meaning and typology of Weaker Sections: SCs, STs, OBCs & Women
- b. Socio-Economic Situation of Weaker Section in India.
- c. Constitutional Provisions for Weaker Sections

#### **UNIT -V: Methodological Debate on Indigenizing Sociology in India:**

- a. Indigenization
- b. Sociology for India
- c. Sociology of India

**Note. Of the maximum 100 marks this paper carries 75 for theory main exam and 25 for internal assessment. Of the 25 marks 3 for attendance(as per the Univ. guidelines), 10 for one internal test and 12 marks for review essay on a standard book in the subject area as prescribed by course teacher for each of student separately.**

#### **Essential Readings:**

## **Paper - 1.5 SOCIOLOGY OF ENVIRONMENT**

### **Course Code: PG53T105**

#### **Objectives:**

**This Course will help the Students to;**

- Understand the relationship between Environment and Society.
- Analyse environmental issues and its problems.
- Find out the role of environmental movements, laws, state and other agencies for environmental conservation.

#### **Learning Outcomes:**

1. It enables the learners to understand how environmental issues related to society or social life.
2. It helps to the learners in studying the relationship between development projects, population growth and environmental problems.
3. It also assists the students to participate in environmental conservation.
4. It helps in enhancing the research interests in the field

#### **UNIT – I : Introduction:**

- a. Scope and Significance of Sociology of Environment
- b. Emergence of Environmental Sociology
- c. Approaches to the study of environment : Marxian, Gandhian, Eco- feminism
- d. Different types of Environmentalism: Deep Ecology, Social Ecology & Radical Ecology.
- e. The Concept of Eco-system

#### **UNIT -II: Environment and Environmental Problems:**

- a. Inter relation between Environment and Society
- b. Nature of Environmental Problems
- c. Types of Environmental Problems
- d. Causes of Environmental Problems

#### **UNIT – III: Contemporary Environmental issues in India:**

- a. Pollution and their effects
- b. Deforestation
- c. Developmental Projects- Displacement & Rehabilitation
- d. Population growth and Environmental Problems

#### **UNIT– IV: Toward Environmental Conservation in India:**

- a. Environment and Development
- b. Environmental Movements & The Politics of Development
- c. Chipko Movement and Narmada Bachavo Andholan (NBA)
- d. Save Western Ghats Movements

#### **UNIT-V: State Society and Environment:**

- a. Constitutional provision in India
- b. Environmental Laws
- c. The State and International Agencies
- d. Role of NGO's

#### **Essential Readings :**

## **Paper- 1.6 SOCIAL DEMOGRAPHY**

**Course Code: PG53T106**

### **Objectives:**

**This course will help the students to:**

- Understand the basic concepts and theories in Social Demography.
- Focuses on demographic processes such as Fertility, Mortality, Migration and their determinants.
- Analyses the demographic trends and its implications with social reference to India.

### **Learning Outcome:**

- It enables the learners to understand the origin and development of Social Demography as well as to comprehend the basic theories of population.
- It helps the learners in comprehending the significance of demographic processes in population change.
- It assists students in acquitting with the population Scenario of different countries to evolve suitable population policy setting.
- It helps the learners to appreciate the significance of demographic situation and its interrelated processes.

### **UNIT – I : Introduction:**

- a. Scope and Importance of Social Demography
- b. Historical Development of Social Demography
- c. Sources of Population Data
- d. World Population: Growth and Distribution.

### **UNIT – II : Theories of Population Growth:**

- a. Pre-Malthusian Theories
- b. Malthusian Theory
- c. Post-Malthusian Theories ,
- d. Optimum and Theories of Demographic Transition.

### **UNIT – III : Components of Population Change:**

- a. Fertility : Role of Fertility, Differential Fertility
- b. Mortality: Role of Mortality, Infant Mortality.
- c. Migration: Types and Models of Migration
- d. Recent trends in Population Changes

### **UNIT – IV: Population of India:**

- a. Size and Growth of population in India.
- b. Composition and Characteristics of Population of India
- c. Distribution of Population in India
- d. Recent trends in India's Population dynamics

### **UNIT – V: Population Policies and Programmes:**

- a. Importance of Population Policies and Programmes
- b. Implementation and Evaluation of Population Policy in India.
- c. Population Policy 2000.
- d. Recent Trends in Population Policy;

### **Essential Readings:**

## SEMESTER-II

### 2.1 MODERN SOCIOLOGICAL THEORIES

Course Code: PG53T201

#### Objectives:

This course will help the students to:

- To understand the development of Modern Sociological Theories.
- Learn about the contributions of various perspectives to understand social realities.
- To make students familiar with modern sociological theories in the light of previous course on classical sociology.
- It gives theoretical explanations of structural functional conflict, symbolic interactionism, phenomenology, ethno methodology.
- It helps the students to theorize society from sociological angle.

#### Learning outcomes

1. After studying this course students will understand various perspectives and apply the same in order to understand social realities of present society.
2. It helps the learners examine the theoretical relevance and analytical utility of the various perspectives.
3. This facilitates the students to understand diverse theoretical perspectives while studying social structure and change.
4. To understand the relationship between individual and society, action and system, also how to apply sociology in day to day life.

#### UNIT-I: Nature of Sociological Theorizing:

- a. Elements of Theory
- b. Levels of Theorization
- c. Relationship between Theory and Research.
- d. Structural approach of A.R. Brown, S.F. Nadel and Levi-Strauss.

#### UNIT-II: Structural Functional School:

- a. History of Development of Functionalism
- b. **Talcott Parsons:** Structure of Social Action, Theory of Social System, Pattern Variables, Functional Pre-requisites.
- c. **Robert K. Merton:** Theories of Middle Range, Postulates and Prepositions, Paradigm for Functional analysis, Social Structure and Anomie, Reference Group Theory.

#### UNIT-III: Conflict School:

- a. Development of conflict school
- b. Contributions of Karl Marx
- c. Contributions of Ralf Dahrendorf and L.A. Coser
- d. Contributions of C.W. Mills and Randall Collins

#### UNIT-IV: Symbolic Interactionism:

- a. Emergence of Symbolic Interactionism
- b. Contributions of G. H. Mead and C.H. Cooley
- c. Contributions of Herbert Blumer and Peter J. Burke

#### UNIT-V: Emergence of Phenomenology:

- a. Philosophical Phenomenology of Edmund Husserl
- b. Sociological Phenomenology of Alfred Schutz
- c. Social Construction of Reality: Berger and Luckmann

**Essential Readings:**

- Abraham, Francis & J.H. Morgan: Sociological Thought, Macmillan India Ltd, Delhi 1985.
- Anthony Giddens (1971) Capitalism and Modern Social Theory: An Analysis of the Writings of Marx, Durkheim and Max Weber.
- Aron, Raymond, Main Currents in Sociological Thought (Two Volumes), Doubleday, Garden City, 1970.
- Coser, Lewis: Masters of Sociological Thought, Harcourt & Brace, Chicago 1971.
- Gerth H. & C. Wright Mills: From Max Weber: Essays in Sociology, Oxford Univ. Press, New York. 1968.
- Merton. R.K. – Social Theory and Social Structure, Am rind Publishing, 1968.
- Ritzer George, Classical Sociological Theory, Migro Hill New York. 2000.
- Talcott Parsons the Social System, Am rind Publishing, New Delhi, 1972.
- Timasheff. N. & G.Theodorson: Sociological Theory, Random House, New York, 1976.
- Turner, Jonathan H, 2007. The Structure of Sociological Theory (IV Edition) Rawat Publication, Jaipur.

## **Paper - 2.2 SOCIOLOGY OF URBAN LIFE**

**Course Code: PG53T202**

### **Objectives:**

**This course will help the students to**

- Understand the fundamental concepts of Urban Sociology and ecological theories of urban growth.
- Examines the importance of urban institutions and their impact on society.
- Discusses problems of urban society in order to enhance policy implications with special reference to India.

### **Learning Out comes:**

- It enables the learners to understand the origin and development of Urban Sociology as well as to comprehend the ecological theories of urban growth.
- It helps the learners in acquainting with the urban processes and the importance of urban institutions.
- It assists the students in comprehending the urban problems and their consequences on society.
- It helps the learners to appreciate the significance of urban welfare and planning for development.

### **UNIT – I: Introduction:**

- a. Scope and importance of study of Urban Life
- b. Concepts: Urban, Urbanization, Urbanism as a way of life.
- c. Classification of Urban Categories
- d. Urban Growth in Ancient, Medieval and Modern times
- e. Pre-Industrial City.

### **UNIT – II: Functional Theories of Urban Growth:**

- a. Urban ecology & Ecological Processes.
- b. Concentric Zone Theory, Sector Theory, Multinuclei Theory.
- c. Land Use Pattern.

### **UNIT – III: Urban Social Institutions:**

- a. Urban Family
- b. Urban Religion
- c. Urban Government.
- d. Urban Education

### **UNIT – IV: Urbanization in India:**

- a. Emerging Trends in Urbanization
- b. Factors of Urbanization
- c. Problems of Urbanization
- d. Industrialization and Urbanization
- e. Over Urbanization

### **UNIT – V: Problems of Urban Life:**

- a. Ghettos and Slums
- b. Urban Crime
- c. Urban Poverty
- d. Urban Planning, Development and Management – Role of Govt. and NGOs

### **Essential Readings:**

Bergel.E.E. Urban Sociology, McGraw Hill, New York 1965.  
Geddes, P – Cities in Civilization, William Noregate, London, 1959.  
Hatt & Reiss (ed) Cities and Society, Glencoe Ill, 1961.  
Mumford, Lewis. The City in History, Secker & Warburg. 1961.  
J. John Palen – Urban World. McGraw Hill, New York, 1975.  
The American Journal of Sociology 1955. Vol. LX, March 1955, No.5, Pp. 427-520.  
Guttman and Popenoe (ed) The City, Metropolis and Neighbourhood.

## **Paper- 2.3 SOCIOLOGY OF RURAL LIFE**

### **Course Code: PG53T203**

#### **Objectives:**

This course will help the students to

- To know about origin and development of Rural Sociology in USA and India.
- To analyze the village social structure and changes in society
- To pinpoint the various rural problems and development in rural India.

#### **Learning outcomes**

1. The subject is vast; it is difficult to solve the various problems among rural people.
2. Students they can take current, past issues, problems and adopt a micro level action oriented study.
3. It helps the students to start NGO in their respective field.

#### **UNIT – I : Introduction:**

- a. Scope and Importance of Study of Rural Life
- b. Origin and development of Rural Sociology : USA and India
- c. Rural – Urban Relations and Contrasts
- d. Approaches to the Study of Rural Communities

#### **UNIT – II : Rural Social Institutions:**

- a. Settlement Patterns typology of villages
- b. Rural Stratification – Agricultural Ladder
- c. Rural Family
- d. Rural Religion

#### **UNIT – III : Rural Society in India:**

- a. Origin and Development of Village Communities in India.
- b. Village Studies in India.
- c. Village Social Structure
- d. Caste Dynamics in Rural Society
- e. Changing Rural Society

#### **UNIT – IV : Rural Problems:**

- a. Poverty and Indebtedness
- b. Illiteracy and Backwardness
- c. Health and Sanitation

#### **UNIT – V : Rural Development:**

- a. Land tenure and Land Reforms
- b. Green Revolution and White Revolution
- c. Panchayat Raj
- d. Rural Co-operatives and Self Help Groups
- e. Globalization and India's Village Society.
- f. Rural development Programmes: CDP.IRDP.NREG.PURA etc.

**Note. Of the 100 marks this paper carries 75 for theory main exam and 25 for internal assessment. Of the 25 marks 3 for attendance(as per the Univ. guidelines), 10 for one internal test and 12 marks for review essay on a standard book in the subject area as prescribed by course teacher for each student separately.**

## **PAPER – 2.4 SOCIOLOGY OF HEALTH AND WELLNESS**

**Course Code: PG53T204**

### **Objectives:**

**This Course will help the Students to;**

- Understand the relationship between Health and other Social institutions.
- Analyse the relationship between Physician-Patients-Nurse in Health and wellness of the people.
- Find out issues relating to community health, Medicare and health care services.

### **Learning Outcomes:**

1. It enables the learners to understand the concepts of Health, Wellness and Epidemiology.
2. It helps to the learners to know the issues relating to Physicians and Nurse in changing society.
3. It helps to know recent trends and patterns of diseases.
4. It also helps the students to gain the knowledge, skills, strategies for examine the complexities in relation with health and social institutions.

### **UNIT – I: Relation between Sociology and Health:**

- a. Sociology of Health: Scope and importance.
- b. Health and its Relationship with other Social Institutions.
- c. Concepts of Well-being and Quality of Life: Their Indicators
- d. Sociology of Medicine and Sociology in Medicine

### **UNIT – II: Social Epidemiology:**

- a. Vital and Public Health Concepts
- b. Epidemiology and Resources: Social Components in Therapy and Rehabilitation
- c. Recent Trends in Diseases with special reference to HIV/AIDS and Communicable Diseases.

### **UNIT –III: The Physician and the Patient:**

- a. The professionalization and socialization of the physician
- b. Doctor-Patient Relationship.
- c. Nursing as an Emerging Para Medical Profession
- d. Health seeking behaviour.
- e. The sick role and the patient role
- f. Labeling theory.

### **UNIT – IV: Hospital, Community and Wellness:**

- a. Types of Hospitals, Functions of Hospitals. Coordination and Supervision of Hospitals.
- b. Inter-personal Relationships in Hospitals and Medical Social Service in Hospitals
- c. Community Health, Concept of Integrated Health Services.
- d. Functioning of Primary Health Centers in India
- e. Health Care Delivery and Social Policy
- f. NGO and Health Care Implementation and Utilization of Care service.
- g. National Health Policy: A Critical Analysis
- h. Preventive Health Care - Yoga, Sports, food, living style, sanitation.

### **UNIT – V: Special Issues in Health in India:**

- a. Inequities in health and health care
- b. Special issues of Women, Children, Aged and Disabled
- c. Health among the marginalized: Scheduled Castes (SCs) Scheduled Tribes (STs)
- d. Health care disparities in Karnataka: North-South divide

**Essential Readings:**

- Albert, Gary. L., and R. Fitzpatrick, Quality of Life in Health Care: Advance in Medical Sociology, Mumbai, Jai Press, 1994.
- Bloom, Samuel W. The Doctor and His Patient, New York : Free Press, 1963.

- Somashekharappa, C.A. Sociology of Health and Wellness ( in Kannada), Prasara, Karnatak University, 2013.

**OPTIONALS**  
**Paper - 2.5 (a) SOCIOLOGY OF SOCIAL DEVIANCE**  
**Course Code: PG53T205A**

**Objectives:**

**This Course will help the Students to;**

- Understand the relationship between Culture, Social Norms and Deviance.
- Analyse various approaches and perspectives to the study of different forms of deviant behaviour like crime and suicide.
- Find out the role of criminal law, police, prisons and social institutions for controlling crime or deviant behaviour.

**Learning Outcomes:**

1. It enables the learners to understand how deviant behaviour affects social life
2. It helps the learners in the relationship between social, economic and cultural values involved in deviant behaviour.
3. It assists to the students for solving remedies for deviant behavior.

**UNIT I: Introduction:**

- a. Meaning, Nature, Scope and Importance of Sociology of Deviance
- b. Deviance and Social norms
- c. Differentiation and sub- cultural norms
- d. Perspectives in the study of Deviance

**UNIT II: Approaches to the study of Deviance:**

- a. The functionalist Approach: Durkheim and G.H. Mead
- b. The Interactionist Approach: C.H. Cooley, Edwin M. Lemert, Howard S. Backer, Erving Goffman
- c. Anomie and Deviance: Durkheim, Merton, Parsons, Cohen
- d. Social and Cultural Approach : Edwin H. Sutherland, Richard, A. Cloward and Lloyd E. Ohlin, Gresham M. Sykes and David Matza

**UNIT III: Criminal Behaviour and its Types:**

- a. Nature of Crime
- b. Sources of Criminal attitudes
- c. Classification and Typology of Criminal Offenders
- d. Types of Criminal Behaviour
- e. Victimless Crime

**UNIT IV: Suicide:**

- a. Suicide as Deviant Behaviour
- b. Types of Suicide (Durkheim)
- c. Social Differentials in suicide
- d. Suicide and mental disorder

**UNIT V: Deviance and Social Control:**

- a. The Criminal Law
- b. The Police
- c. Prisons
- d. The Role of Family, the Peer group, Community and Civil Society

**Essential Readings:**

4. The course envisages that studying Dalit, Peasant and Tribal movements would ultimately foster an understanding of the dynamics of power, justice and human agency in transforming societies and cultures.

### **Learning Outcomes**

1. At the end of the course, students should be able to distinguish the central principles of different perspectives in the sociology of social movements and relate them to specific historical and empirical contexts.
2. The students will learn the necessity of Social reform movements introduced by great humanitarian leaders in India.
3. Students should be able to distinguish a phenomenon as social movement from other cognate political phenomena.
4. Understand the dynamics and motivations of individuals and groups participating in social movements and identify reasons for success or failure of social movements.

### **UNIT – I : Introduction:**

- a. Scope and Significance of Sociology of Social Movements
- b. Genesis of Social Movements
- c. Ideology and Social Movements
- d. Types of Social Movements
- e. Social Movement and Social Change

### **UNIT – II: Reform Movements:**

- a. Arya Samaj, Brahma Samaj, Prarthana Samaj
- b. Basaveshwara: Lingayath Movement
- c. Sri Narayan Guru Dharma Paripalanasabha(SNDP)
- d. Ramakrishna Mission

### **UNIT – III: Dalit and Backward Classes Movements:**

- a. Emergence of Dalit Movement in India
- b. Role of Phule and Ambedkar
- c. Dalit Movement in Karnataka (DSS)
- d. Backward Classes Movement in Karnataka

### **UNIT – IV: Peasant Movements:**

- a. Characteristics and Trends
- b. Peasant Movement in India
- c. Peasant Movement in Karnataka

### **UNIT – V: Tribal Movements:**

- a. Santal Movement
- b. Jharkhand Movement
- c. Political Awakening among the Tribals

**Essential Readings:**

## **PAPER 2.5 (c) SOCIOLOGY OF TRIBES**

### **Course Code: PG53T205C**

#### **Objectives:**

This course will help the students to

- To study the Tribal problems in Indian Society.
- To help to know the ethnographic profiles of selected Indian Tribes.
- To study the problems and prospects of Tribals in India.

#### **Learning outcomes**

1. It enables the students to understand the origin and development of various tribes in India.
2. To help to students about Tribal family, Economy, education, Religion and Welfare.
3. It helps to students to acquire the knowledge how to solve etc various, problems of Tribes in Indian Society.
4. It also helps the students how Tribal people are separated from non Tribals.

#### **UNIT I: Introduction:**

- a. The rationale of studying tribal society
- b. Meaning, Nature, scope and significance of Sociology of Tribes
- c. Origin and development of tribal Sociology
- d. Sociology of Tribes in India: a perspective

#### **UNIT II: Tribes in India: their classification:**

- a. Geographical distribution
- b. Linguistic composition
- c. Racial diversities
- d. Economic differences
- e. Cultural Organization of tribes in India

#### **UNIT III: Ethnographic Profiles of Selected Indian Tribes:**

- a. The Todas (Pastoralists)
- b. The Bedas (Hunter-ruling)
- c. The Khasi (Matrilineal & Matriarchal)
- d. The Siddis of Karnataka (Forest)
- e. The Koragas of Karnataka (Primitive)

#### **UNIT IV: Tribal family, Economy, Education, Religion and Welfare measures:**

- a. Tribal family and marriage
- b. Tribal economy
- c. Tribal education
- d. Tribal religion
- e. Tribal Unrest.
- f. Constitutional provisions.
- g. Tribal Development: policies and programs

#### **UNIT V: Problems and Prospects of Tribals in India:**

- a. Social, economic, educational, and health problems
- b. Social Change among tribal's of India
- c. Hinduization of tribes
- d. Modernization of Tribal's: Industrialization, Urbanization,
- e. Political Participation of tribal's in India.

**Essential Readings:**

## Paper - 2.5 (d) SOCIOLOGY OF SOCIAL MARKETING

Course Code: PG53T205D

### Objectives:

This course will help the students to:

- Comprehend the relationship between market and society.
- Analyse the relevance of social marketing.
- Find out the social structure of market in India.

### Learning outcomes

1. It enables the learners to understand social relevance of market.
2. It helps the learners in studying the social values and social responsibilities of marketing
3. It also helps the students know the issues and problems of modern marketing strategies and their impact on the social and cultural life of people of India.
4. It helps the students to examine the impact of rising consumerism and ethical issues of marketing in modern society

### UNIT – I: Introduction:

- a. Meaning and Definition of Market
- b. Functions and Role of Market
- c. Market as a Social Institution
- d. Social Marketing – Meaning, Elements
- e. Approaches to Social marketing

### UNIT – II: Processes of Social Marketing:

- a. Segmentation (Social differentiation) Target Audiences.  
Positioning (STP)
- b. 4 Cs in Social Marketing-. Cause, Cost, Channel and Communication

### UNIT – III: Agencies of Social Marketing:

- a. State, Corporate agencies
- b. International donor agencies,
- c. NGOs.

### UNIT – IV: Social Responsibilities of Marketing:

- a. Social Values of Marketing
- b. Social Criticisms of Marketing
- c. Impact of Marketing on Society

### UNIT – V: Marketing in India:

- a. Health Care Marketing
- b. Marketing of Family Planning Services in India
- c. Consumerism in India
- d. Role of Media in Social Marketing
- e. Role of Government in regulating social Marketing

### Essential Readings:

**Paper 2.6 OPEN ELECTIVE  
INVITATION TO SOCIOLOGY  
(for students from other departments)  
Course Code: PG53T206**

**Objectives:**

**This Course will help the Students to;**

- To understand fundamental concepts of sociology.
- It aims at helping students to understand social institutions.
- It aims to know the regulative mechanisms of society.
- It provides an out plan exposure to other non sociology students regarding social mechanisms, social change and development.

**Learning Outcomes:**

- It enables the learners to understand emergence of sociology and basic concepts in sociology.
- To orient students to study society from sociological angle.
- It helps the learners in understanding the relationship between individual and society and the role of individual in social institutions.

**UNIT – I Introduction:**

- a. Emergence of Sociology
- b. The Sociological Perspectives
- c. The Development of Sociological thinking
- d. Asking and answering the sociological questions – Methods of sociology
- e. Sociology in every day life

**UNIT – II Basic Concepts of Sociology:**

- a. Society and Community
- b. Culture and Socialization
- c. Social values and norms
- d. Association and Institutions
- e. Structure and Function

**UNIT - III Social Processes:**

- a. Social Processes – Meaning, Characteristics
- b. Major Social Processes – Cooperation, Competition, Conflict, Accommodation and Assimilation

**UNIT – IV Social Groups:**

- a. Meaning and importance of groups
- b. Typology of social groups
- c. Sociology of small groups

**UNIT – V Social Control and Change:**

- a. Meaning and Means of Social Control
- b. Meaning and Factors of Social Change
- c. The Environment and health as Sociological issue

**Essential Readings:**

**SEMESTER-III**  
**3.1 CONTEMPORARY SOCIOLOGICAL THEORIES**  
**Course Code: PG53T301**

**Objectives:**

**This course will help the students to:**

- Learn about various new perspectives in Sociology.
- To understand Sociology from a critical stand point on the basis of the learning of theories from previous semester.
- Know the Contemporary Sociological theories.

**Learning outcomes**

1. It acquaint the students various contemporary Sociological theories.
2. It helps the students to understand sociology from exchange theoretical perspective and apply the same to modern contemporary issues of society.
3. It provides sociological insights.
4. It facilitates students to understand empirical investigations constructed by the contemporary sociological thetorticians.

**UNIT-I: Neo-Functionalism And Neo-Marxism:**

- a. Jeffrey Alexander
- b. Althusser-Structuralism
- c. Gramsci- Ideological Hegemony
- d. Analytic Marxism of Erik Olin Wright

**UNIT-II: Frankfurt School:**

- a. Emergence of Frankfurt school
- b. Max Horkheimer
- c. Theodor Adorno
- d. Jurgen Habermass

**UNIT-III: Ethnomethodology:**

- a. Emergence of ethno methodology
- b. Harold Garfinkel Reflective Action and Interaction.
- c. Harvey Sacks contributions.

**UNIT-IV: Exchange Theories:**

- a. Emergence of Exchange Theories- Frazer, Malinowski, Levi-Strauss, Marcel Mauss.
- b. George C. Homan's Behaviourlist approach.
- c. Peter Blau's dialectical Theory of Exchange.
- d. Georg Simmel's Exchange Principles.

**UNIT-V: Dramaturgical Theories:**

- a. Erving Goffman on "The Interaction Order"
- b. The Presentation of Self
- c. Focused and unfocused interaction.
- d. Frames and Fabrications.
- e. Emotional labour of Arlie Hochschild.

## **Paper – 3.2 PRINCIPLES OF SOCIAL STATISTICS**

### **Course Code: PG53T302**

#### **Objectives:**

This course will help the students to

- To know the meaning, definition about statistics, central and tendency, Q.D M.D, Range etc.
- To explain and understand the various Tools and Test like T, F, Z “ANOVA”.
- To study the scope and importance of the social statistics.

#### **Learning outcomes**

1. It helps the students how to make the graphs and diagrammatic in study.
2. Measures of central tendency, dispersion helps the students, to draw the good conclusion in dissertation, thesis work etc.
3. Various tests in social statistics helps the students, researcher to understand the real problems, scales, and draw backs in the field work.

#### **UNIT - I: Introduction:**

- a. Social Statistics: Scope and Importance
- b. Collection of Data- Types and Sources of Statistical Data,
- c. Classification and Tabulation of data
- d. Diagrammatic and Graphical Representation of Data

#### **UNIT – II: Measures of Central Tendency and Dispersion:**

- a. Mean, Median and Mode
- b. Range, Quartile Deviation, Mean Deviation, Standard Deviation
- c. Coefficient of Variation.

#### **UNIT – III: Correlation and Regression:**

- a. Theory of Correlation and Regression; Types of Correlation and methods.
- b. Types of Regression lines, Properties of Correlation Co-efficient.
- c. Regression Co-efficient.

#### **UNIT – IV: Large Sample Test:**

- a. Sampling of Attributes
- b. Chi-square test
- c. Tests of significance bases on t, F and Z distributions.
- d. Analysis of variance (ANOVA)

#### **UNIT – V: Computer Languages (Practical):**

- a. Basics
- b. Computer Languages
- c. SPSS package

#### **Essential Readings:**

- S.P. Gupta (1985) Statistical Methods, S. Chand & Sons, New Delhi.  
S.C. Gupta (1990) Fundamentals of Statistics, Himalaya Publishing, Mumbai.

## **Paper - 3.3 SOCIOLOGY OF DEVELOPMENT**

**Course Code: PG53T303**

### **Objectives:**

**This Course will help the Students to;**

- Understand the Sociological dimensions of Development.
- Analyse changing conceptions of Development and its indices.
- Find out the recent trends and patterns of development in theoretical framework.

### **Learning Outcomes:**

1. It enables the learners to understand the concepts related to social structure and development process.
2. It helps the learners in studying the relationship between social and economic aspects.
3. It also familiarizes the students to know various approaches and methods for study on the process of development.
4. It assists the students enhancing their interests in research on developmental studies.

### **UNIT – I : Introduction:**

- a. Rationale for Studying Development Sociologically
- b. Scope and Importance of Sociology of Development
- c. Historical Development of Economic Sociology
- d. Components of Development
- e. Sociological Dimensions of Development
- f. Development approaches and methods (PRA, PPM Etc.)

### **UNIT – II : Conceptual Perspectives on Development:**

- a. Changing Conceptions of Development- Economic Growth, Human Development, Social Development, Sustainable Development, Post Developmentalism.
- b. Liberal and Marxist Perspectives
- c. Strategies and indices
- d. Transforming communities: Maps and Models
- e. Hindrances of Development

### **UNIT - III: Theories of Development:**

- a. Structural Functional Theory
- b. Socio-Psychological Theory (D. MacIlelland)
- c. Stages of Growth Model (W.W. Rostow)
- d. Vicious Circle Model
- e. Theory of Social Change(Spengler)

### **UNIT – IV: Theories of Under Development:**

- a. Dependency Theory
- b. Unequal Development (Samir Amin)
- c. The World System and Multinational Corporations (WallerStein)
- d. Development of under Development (A.G.Frank)
- e. Trends in Development Theory (J.N. Pieterse)

### **UNIT – V: Social Structure and Development (with special reference to India):**

- a. Education, Culture and Development
- b. Gender ,Youth and Development
- c. Agriculture, Ecology and Development
- d. Technology, Liberalization, Globalization and Development
- e. Development Disparities and its Policies

**Note. Of the 100 marks this paper carries 75 for theory main exam and 25 for internal assessment. Of the 25 marks 3 for attendance(as per the Univ. guidelines), 10 for one internal test and 12 marks for review essay on a standard book in the subject area as prescribed by course teacher for each student separately**

**Essential Readings:**

## **PAPER 3.4: SOCIOLOGY OF SCIENCE AND TECHNOLOGY**

### **Course Code: PG53T304**

#### **Objectives:**

**This course will help the students to:**

- Know the relationship between science and society and vice versa
- Identify the relationship between social organization of Science
- Find out the contemporary trends in science and technology and their sociological consequences

#### **Learning outcomes**

1. It enables the learners to understand how science and technology related to social life of people.
2. It helps the learners in studying science and technology as a social activity deals with the social conditions and effects of science and technology.
3. It also familiarizes the students how modern science based technologies have been posing risk to people and environment.
4. The assist students to examine how social, political and cultural values affect scientific and technological processes of research and innovation and how these affect, in turn, society, economy, politics, culture and environment.

#### **UNIT I: Introduction:**

- a. Science and Goals of Science.
- b. The Emergence, Scope and Importance of Sociology of Science and Technology.
- c. Science as a Social System, Norms of Science.
- d. Values and Science.

#### **UNIT II: Emergence of Science and Technology:**

- a. Origin and Development.
- b. Pure and applied Science.
- c. Society, Science and Technology.
- d. Role of Science and Technology.

#### **UNIT III: Social Organization of Science:**

- a. The Science Policy in India
- b. Social organization of Science in India
- c. R and D Culture in India
- d. Social Background of Indian Scientists

#### **UNIT IV: Science Education and Research in India Today:**

- a. Science education in India
- b. Role of Universities in Development of Science and Technology
- c. Relationship between Science and Industry
- d. The problems of Science education in India

#### **UNIT V: Indian Science and Technology in Global Situation:**

- a. Impact of LPG on Indian Science and Technology
- b. WTO and IPR and Indian Science and Technology
- c. MNCs and Indian Industry
- d. Political Economy of Science and Technology in India

**Optional**  
**3.5 (a) INDUSTRIAL SOCIOLOGY**  
**Course Code: PG53T305A**

**Objectives:**

**This course will help the students to:**

- Understand the Industrial Society and importance of industry in the development of nation.
- Examines the importance of Social and human relations in Industrial organization.
- Discusses different industrial processes, problems with special reference to Indian Industry.

**Learning Out comes:**

- It enables the learners to understand the origin and development of Industrial Sociology and as well as to comprehend the impact of industrial institutions on society.
- It helps the learners in acquainting with the social organization of Industry and the significance of human approach to industry.
- It assists the students in comprehending the significance of industrial processes and labour relations in industry.
- It helps the learners to appreciate the significance of labour welfare in the present industrial society.

**UNIT – I: Introduction:**

- a. Scope and significance of Industrial Sociology.
- b. The Rise of Industrial Sociology: Hawthorne Experiment
- c. Development of Industrial Sociology in India
- d. Impact of Industrial Institutions on Society.

**UNIT – II: Rise and Development of Industry:**

- a. Early Industrialism in Western Society: The Manorial System, Guild System, The Putting out System
- b. The Factory System: Its Characteristics

**UNIT – III: Organizational Structure of Industry:**

- a. Formal Organization: Line and Staff.
- b. Informal Organization.
- c. Industrial Bureaucracy

**UNIT – IV: Industrialism and Indian Society:**

- a. Industrial Development in India.
- b. Characteristics of Indian labour and labour problems: Changing Profile
- c. Absenteeism in Indian industries.
- d. Social Consequences of Industrialism in India.

**UNIT -V: Industrial Relations:**

- a. Trade Union Movement in India.
- b. Industrial Disputes, Collective bargaining
- c. Industrial democracy- workers' participation in management
- d. Labour Welfare

**Essential Readings:**

## PAPER 3.5 (d) SOCIOLOGY OF EDUCATION

Course Code: PG53T305D

### Objectives:

This course will help the students to:

- Understand the relationship between education and society.
- Analyse the social and cultural values of education.
- Find out the social role of teachers and the social system of education in India.

### Learning outcomes

1. It enables the learners to understand social relevance of education.
2. It helps the learners in studying the social structure of education
3. It also helps the students know the issues and problems of the equality of educational opportunity.
4. It helps the students to examine socio-economic and political issues involved in the development of education

### UNIT I : Introduction to Sociology of Education:

- a. Nature, scope and importance of Sociology of Education-
- b. Interrelation between Education and Society
- c. Theoretical Perspectives in Sociology of Education- Structural, Functional, Conflict and Radical Perspectives

### UNIT II: Education and Socialization:

- a. Agencies of Socialization; Family, School .Peer Group and Media
- b. Changing Dimensions

### UNIT III: Education and Social Stratification:

- a. Education and Social Mobility
- b. Equality of Educational Opportunity, Universalization of Education,
- c. Right to Education
- d. Problems of Primary Education – Dropout and Wastage

### UNIT IV: Higher Education in India:

- a. Growth of Higher Education in India
- b. Problems and Prospectus of Higher Education in India
- c. Professionalization of Teaching in India –
- d. Higher Education in Karnataka

### UNIT V: Education and Society in India:

- a. A Brief Socio- Historical View: Colonial and Independent India
- b. School and Higher Education: Diversities, Disparities
- c. Challenges of Women's education in India.

### Essential Readings:

- Banks, Olive, (1976), Sociology and Education, London: Batsford.

## **Paper – 4.3 SOCIOLOGY OF AGEING**

### **Course Code: PG53T403**

#### **Objectives:**

##### **This course helps the students to**

- Understand the outcome of demographic transition in the form of Ageing of society.
- It enables students to understand the basic concepts pertaining to sociology of Ageing.
- It focuses on the Sociological issues and concerns of ageing individuals and ageing society.
- It helps to understand global ageing as well as ageing scenario in India.
- It is helpful to make career in care sectors of society.

#### **Learning Out Comes:**

- It enables the learners to understand trends and patterns of ageing in India as well as global level.
- It helps the learners to understand changing role of family, social aspects of leaving conditions and care giving scenario.
- It assists students to address policies and programmes pertaining to aged as well as sensitize about aged individuals.

#### **UNIT – I: Introduction:**

- a. Scope & Significance of Sociology of Ageing
- b. Emergence of Sociology of Ageing as a Sub-discipline
- c. Trends and Patterns of Ageing –Global.
- d. Indian Scenario of ageing.

#### **UNIT – II: Some Aspects of Ageing:**

- a. Factors of Ageing
- b. Problems of Ageing
- c. Changing Family and Ageing
- d. Gerentophobia and Ageism
- e. Elder Abuse

#### **UNIT – III: Theories pertaining to Ageing:**

- a. Disengagement theory
- b. Continuity theory
- c. Role theory
- d. Activity theory

#### **UNIT –IV: Adjustments in Later Life:**

- a. The Informal Support system and Its Relevance in Later Life.
- b. Elderly and the Caregivers
- c. Living Arrangements of Elderly
- d. Disease pattern of Elderly - Dementia and Alzheimer's diseases.
- e. Ageing and Disability
- f. ADL and IADL, HALE. (Healthy Active Life Expectancy)

#### **UNIT – V: The State and the Elderly:**

- a. Ageing & Retirement
- b. Active Ageing and U3A.
- c. Role of State – Policies and Programmes for the Aged in India.
- d. National Policy on Aged.

**Note. Of the 100 marks this paper carries 75 for theory main exam and 25 for internal assessment. Of the 25 marks 3 for attendance(as per the Univ. guidelines), 10 for one internal test and 12 marks for review essay on a standard book in the subject area as prescribed by course teacher for each student separately.**

**M.PHIL SYLLABUS IN SOCIOLOGY**  
**PAPER-I**  
**RESEARCH METHODS AND TECHNIQUES**

**Chapter I**

Scientific Research: Sociology as a science, Nature of Social Research, Relation between theory and Research.

**Chapter II**

Research Design: Purpose and Significance of Research Design, Problems of Research Design, typology of Research Design.

**Chapter III**

Survey and Sampling

**Chapter IV**

Problems of Values in Research: Value free and Value oriented research, Problems of objectivity, Prejudices and Bias

**Chapter V**

Techniques of Social Research:  
Concept Formation, Formulation of Hypothesis

**Chapter VI**

Research Method: Historical, Case study, Comparative Method

**Chapter VII**

Techniques of Data Collection and Field Work, Questionnaire, Schedule, Interview

**Chapter VIII**

Techniques of Data Collection and Field Work: Observation and Problems of Field

**Chapter IX:**

Report Writing: Techniques and guidelines, Format, Quotation, foot-notes, Tables and Bibliographical References.

**Ph.D COURSE WORK SYLLABUS-2014**  

---

**ADVANCED SOCIAL RESEARCH METHODS AND  
STATISTICS IN SOCIOLOGY  
COURSE-I**

**CHAPTER- I: Issues in Social Research**

**1. Perspectives on Social Research**

Schools of Thought in Social Research, Objectivity, Positivism, Empiricism, Realism, Subjectivity, Idealism, Postmodernism

**CHAPTER- II: Methods of Social Research:**

1. Types and Methods of Social Research: Pure & Applied Research.
2. Social Surveys and Case Study Method .
3. Comparative and Historical Method.

**CHAPTER- III: Social Research Procedure:**

1. Selection of Research problem
2. Hypotheses :Meaning, Characteristics Types and Importance;
3. Research Design :Meaning and Types
4. Sampling: Role and Types

**CHAPTER-IV: Methods of Data Collection:**

1. Primary Data: a. Observation b. Questionnaire c. Interview
2. Secondary Data

**CHAPTER –V: Analysis of Data & Report Writing:**

1. Processing of Data
2. Analysis and Interpretation of Data
3. Research Report : Types and Qualities of a Good Research Report
4. Participatory Research

## **PART 2:**

### **CHAPTER – VI: Diagrammatic and Graphical Representation of Data:**

1. Bar Diagram, Multiple Bar Diagram, Component Bar Diagram, Subdivided Bar Diagram, Pie-Chart, Line Chart, Histogram, Frequency Polygon and Curve, O-give curves

### **CHAPTER – VII: Measures of Central Tendency:**

1. Mean, Median and Mode

### **CHAPTER – VIII: Measures of Dispersion:**

1. Range, Quartile Deviation, Mean Deviation, Standard Deviation and Coefficient of Variation.
2. Chi square test, t-test
3. Correlation and Regression

## **COURSE II**

### **Modern Sociological Theories and Post Modern Social Theories**

**Unit-I: Introduction**

1. The Origin of Sociological Theories
2. Meaning & Nature of Sociological Theories
3. Theorization and Levels of Theorization

**Unit-II: Major Sociological Perspectives**

- 1) Functionalism and its limitations
- 2) Conflict perspectives
- 3) Symbolic Interactionism
- 4) Phenomenology
- 5) Ethno methodology
- 6) Exchange theory.

**Unit-III: Systems, Structuralism , & Modernity Neo Sociological Theories**

- 1) Luhmann
- 2) Anthony Giddens-Structuralism to post structuralism.
- 3) Neo-marxist theories
- 4) Habermas and Althuser
- 5) Future of Sociological Theory

**Unit-IV: Sociological Theories and Emergence of Social Theory**

- 1) From industrialism to post industrialism & Beyond Modernity
- 2) Post modernity and social pluralism
- 3) Post modern social theories
- 4) Post modern social theories-The Indian Experience

**Unit-V: Indian Sociological Perspectives-I**

Marxists and Subaltern Perspectives.

- 1) D.P Mukharjee
- 2) A.R. Desai
- 3) B.R Ambedkar
- 4) David Hardiman

**Unit-VI Indian Sociological Perspectives-II**

- 1) Cultural Perspective of Yogindra Singh
- 2) Use of Native Categories in the Analysis of Indian Society.
- 3) Sociology for India: An Issue for Indian Sociology.

**Unit-VII Theoretical Applicability**

- 1) Theories/theory pertaining to your research proposal.
- 2) Justification of its application.
- 3) Constraints of its theoretical applicability.

**Ph.D. SYALLABUS**

**PAPER-III Area specialization: Sociology of Development  
(Displacement, Rehabilitation, Neighborhood Formation and Development)**

**Research Guide: Dr. Hanamagouda C.**

**Researcher: Mallayya S.**

**I: Introduction:**

- a. Meaning, scope and Importance of Sociology of Development
- b. Dimensions of Development
- c. Conceptual Perspectives—Human Development, Social Development and Sustainable development
- d. Theories of development –Structural- functional, Socio-Psychological , Stages of Growth Model (Rostow), Unequal Development ( Samir Amin),The World System (Waller Stein), Development of under Development (A.G.Frank) and Trends in Development Theory (J.N.Pieterse)

**II: Displacement:**

- a. Displacement --Meaning, nature and its extent
- b. Displacement in history
- c. Scenario of Displacement-International and Indian context
- d. Causes and effects of Displacement

**III : Rehabilitation and Resettlement:**

- a. Rehabilitation and Resettlement—Meaning and its
- b. process
- c. International and national scenario of Rehabilitation and Resettlement
- d. Strategies for Rehabilitation
- e. Rehabilitation and Resettlement

**IV: Neighborhood Formation:**

- a. Meaning, nature, elements and importance of neighborhood formation
- b. Neighborhood in rural and urban settings
- c. Socio-Economic and Cultural aspects of neighborhood formation
- d. Changing trends and patterns in neighborhood formation

**V: Policy and Programmes:**

- a. The role of NGO's, CBO's, W.A. for Rehabilitation and Resettlement
- b. Developmental policies in India
- c. Political economy of Development
- d. Survey of Displacement, Rehabilitation ,Resettlement and Neighborhood studies

**PAPER-III Area specialization: Sociology of Religion**

**Research Guide: Dr. S.C. Natikar**

**Researcher: Bhavani Revanakar**

**I : Introduction:**

1. Concept of religion
2. Characteristics of religion
3. Relationship with religion and philosophy, morality
4. Representations of world religion
5. Evolution and development of religion

**II : Approaches to the study of religion**

1. Classical Approach Durkheim, Max-Weber Mauss
2. Contemporary approach phenomenological, Neomarxist, Freudian, New functional, Anthropological.

**III : Major Indian religions**

1. Hindu
2. Muslim
3. Neo-Buddhist
4. Christianity
5. Jainalism

**IV : Religious movement in India**

1. Mann
2. Gouthama Buddha
3. Mahatma Gandhiji
4. Basavanna
5. Dr. B.R. Ambedkar

**MARGINALIZATION**

**Prof. C.A. Somashekharappa**  
**Research Guide,**

**Prabhulinga Doddamani**  
**Research Student.**

**UNIT – I : Introduction:**

1. Meaning and Process of Marginalization
2. Scope and Importance of Studying Marginalization
3. Marginalization and its Social exclusion, Disenfranchisement, Poverty, Relative deprivation, Exploitation, Discrimination, Backwardness, and Inequality.
4. Marginalization –its causes, types, effects and prevention.

**UNIT – II : Perspectives on Marginalization:**

1. Role of Ideology in Marginalization
2. Views of Phule, Periyar, Ambedkar, Lohiya
3. Subaltern perspective

**UNIT – III : Marginalized Groups in India:**

6. Schedule Castes
7. Scheduled Tribes
8. Neo Buddhists
9. Women and Children
10. Muslims and Christians.

**UNIT – IV : Marginalization and Affirmative Actions:**

6. Constitutional Provisions
7. Governmental Policies and Programmes
8. Role of N.G.Os.

**UNIT – IV : Pijaras in India and Karnataka**

1. Demographic aspects
2. Socio-economic aspects of India's Pinjars
3. Pinjars as a marginalized group.
4. Problems and prospects of Pinjars in India and Karnataka.

**Prof. Shuakath Azim**  
**Research Guide,**

**Shrishail Hallur**  
**Research Scholar**

---

**Chapter I Introduction:**

- a. Meaning and Characteristics of social stratification
- b. Processes of Social Stratification.
- c. Forms of social stratification – caste, class, estate and race

**Chapter II : Approaches to Social Stratification:**

- a. Functionalist approach
- b. Conflict approach
- c. Weber's approach to stratification

**Chapter III: Caste System in India**

- a. Features and Functions
- b. Changes in Caste system
- c. Gender and Stratification

**Chapter IV Dominant Caste and groups in Karnataka**

- a. Lingayats, Vokkaligas, Kurubas
- b. Non-dominant castes
- c. Scheduled castes and tribes in Karnataka

**Chapter V: Mali castes in India**

- a. History of Mali caste
- b. Forms of Mali Groups
- c. Changes in Mali Caste

**Suggested Readings**

**Suparna B.T.**  
**Research Stud**

**Chapter I: Introduction**

- a) Meaning, nature and importance
- b) Social Determinants of Health
- c) Development of Medical Sociology
- d) Sociology in Medicine and Sociology of Medicine

**Chapter II: Sociological Perspective on Health and Medicine**

- a) Functionalist Approach
- b) Conflict Approach
- c) Interactionist
- d) Feminist Perspectives

**Chapter III: Sociology and Organ Donation**

- a) Organ Donation: Meaning, and Significance
- b) History of Organ Donations
- c) Types of Organ Donation
- d) Advantages and Disadvantages of Organ Donation

**Chapter IV: Socio-cultural Dimensions of Organ Donation**

- a) Religion
- b) Class
- c) Region
- d) Women and Organ Donation

**Chapter V: Trends and Patterns of Organ Donation**

- a) Organ Donation in Different Countries
- b) Organ Donation in India
- c) Legal and ethical issues
- d) Role of NGO's

**Prof. Dhruva B. Jyothi**  
**Research Guide,**

**Babu Pirangi**  
**Research Student.**

**Chapter I: Introduction**

- 1.1 Meaning and Characteristics and process of Social stratification
- 1.2 Importance of Social Stratification
- 1.3 Development of Class
- 1.4 The criteria of Class Distinction

**Chapter II: Approaches to Study of Social Stratification**

- 2.1 Functionalist Approach – Kingsley Davis, Wilbert Moore, Talcott Parsons and Melvin tummine
- 2.2 Marxian Approach
- 2.3 Webrian Approach

**Chapter III: Stratification in Indian Society**

- 3.1 The meaning of Caste, Class, Tribe.
- 3.2 The origin of the Caste System; Features and Changing patterns.
- 3.3 Theories of origin of Caste (Three Perspective)
  - i) Indo-religious perspective
  - ii) The cultural perspective
  - iii) Sociological perspective
- 1.4 Relation between Caste and Class
- 1.5 Definition and distribution of Schedule Tribes
- 1.6 Tribal problems, Policy, and welfare

**Chapter IV: Social Mobility**

- 4.1 Concept of Social Mobility
- 4.2 Types of Social Mobility
- 4.3 Amount of Mobility
- 4.4 Determinates and Factors A Social Mobility

**Chapter V: Theories of Social Mobility**

- 5.1 Functional Theories: P Sorkin
- 5.2 Demographic -Theories - H. Dumont

**Prof. C.A. Somashekharappa**  
**Research Guide,**

**Vinay K.U**  
**Research Student.**

**UNIT – I: Relation between Sociology and Health**

1. Sociology of Health: Its Aims and Scope and Significance.
2. Health and its Relationship with other Social Institutions.
3. Concepts of Well-being and Quality of Life: Indicators
4. Sociology of Medicine and Sociology in Medicine: An Appraisal.

**UNIT – II: Social Epidemiology**

- a. Vital and Public Health Concepts
- b. Epidemiology and Resources: Social Components in Therapy and Rehabilitation
- c. Recent Trends in Diseases with special reference to Communicable and Diseases.
- d. Recent Health and Disease trends in Karnataka
- e. Non communicable Health surveillance.

**UNIT –III: The Physician and the Patient**

1. The professionalization and socialization of the physician
2. Doctor-Patient Relationship.
3. Nursing as an Emerging Para Medical Profession
4. Health seeking behaviour.
5. The sick role and the patient role
6. Labeling theory.

**UNIT – IV: Hospital, Community and Well-being**

1. Types of Hospitals, Functions of Hospitals. Coordination and Supervision of Hospitals.
2. Inter-personal Relationships in Hospitals, Medical Social Service in Hospitals.
3. Community Health, Concept of Integrated Health Services.
5. Functioning of Primary Health Centers in India.
6. Health Care Delivery and Social Policy.
7. NGO and Health Care Implementation and Utilization of Care service.
8. National Health Policy: A Critical Analysis.
9. Private Health care,
10. Alternative medicine: Indigenous.

**UNIT – V: Special Issues in Health in India**

1. Inequities in health and health care
2. Special issues of women, children, Aged and disabled
3. Health among the marginalized scheduled castes (SCs) Scheduled Tribes (STs)
4. Health care disparities in Karnataka: North South divide

**OPTIONAL PAPER: SOCIOLOGY OF LAW  
PH.D COURSE WORK 2015  
SYLLABUS**

**Research Scholar: Mr. Mada Naik**

**Guide: Dr. C.A. Somashekharappa**

**Chapter I - Introduction**

- 1.1 Meaning and Nature of Sociology of Law
- 1.2 Scope and importance of Sociology of Law
- 1.3 Origin and development of Sociology of Law
- 1.4 Sociology of Law in India

**Chapter II - Law and Society**

- 2.1 Source of Law (Origin of Law), Types of Law
- 2.2 Nature and Development of Law
- 2.3 Law and social conflict
- 2.4 Law and Social transformation
- 2.5 Judicial Activism

**Chapter III - Sociological Approaches to the study of Law.**

- 3.1 Contribution of Max Weber and Emile Durkheim.
- 3.2 R.K. Merton and Talcott parsons views on law and society.
- 3.3 Marxian perspective of Law.
- 3.4 Feminist perspective.
- 3.5 Legal Pluralism, Legal Culture, Social Law, Living Law, Legal realism.

**Chapter IV - Law and Society in India**

- 4.1 Social Jurisprudence in India.
- 4.2 Protection of Human Rights.
- 4.3 Evolution, Legal, judicial and administrative provisions of Human Rights.
- 4.4 Measure for women and child rights protection in India.
- 4.5 Constitutional, Legal and administrative provisions of women and child rights protection.

**Note: Candidate should read the relevant literature, make notes and discuss the same with the research supervisor consistently.**

## **PREAMBLE**

The Post Graduate Department of Statistics is one of the earliest Department established in Karnatak University, Dharwad. It was established in the year 1951. To begin with, this Department was started with a modest faculty and over the last seven decades, the Department has grown into a major center of Teaching and Research in Statistics. The Department had special assistance Programs for Theoretical Research in Statistics viz., COSIST Phase I & II, DRS Phase I, II & III sanctioned by UGC and FIST Programme by DST.

The Computer Laboratory and well established Statistical Library bear ample testimony to the growing strength of the Department. The department supports various academic activities of the University. At present the Department offers the following Courses:

1. **M.A/ M. Sc. in Statistics (Two years: Four Semesters)**
2. **M.Phil. in Statistics (Minimum One Year)**
3. **Ph. D in Statistics (Minimum Three Years)**

**The Department offers two Open Elective Courses for Post Graduate Students across faculty.**

- i) **Statistical Methods (for II<sup>nd</sup> Semester)**
- ii) **Applied Statistics (for III<sup>rd</sup> Semester)**

### **c) Specialization Papers:**

#### **Semester-II**

STCT: 2.3: Demography

STCT: 2.4: Actuarial Statistics

#### **Semester-III**

STCT: 3.4: Operations Research

STCT: 3.5: Econometrics

## **PG86: M.A/M. Sc. in Statistics**

### **PROGRAMME OUTCOMES**

Post graduates of Statistics programme will:

1. Have broad knowledge of theoretical statistics and its applications in various study disciplines.
2. Have in depth knowledge about different branches of statistics offered by the department.
3. Acquire computational skills.
4. Develop the abilities to analyse the data of econometric, biological, social science, actuarial, demographic, epidemic, financial etc.
5. Be able to conduct field surveys.
6. Have professional outlook and attitude as academicians, data analysts, researchers.

**SYLLABUS**  
**M.A / M.Sc PROGRAMME IN STATISTICS UNDER SEMESTER WISE**  
**CHOICE BASED CREDIT SYSTEM (CBCS) FROM THE ACADEMIC YEAR**  
**2013-2014**

**SEMESTER- I**  
**PG86T101: LINEAR ALGEBRA**

**PG86T101: Linear Algebra-Course Outcomes**

After completion of the course, the candidate will:

1. have a thorough knowledge in various aspects of linear algebra
2. have in depth knowledge in basics of vector algebra
3. have ability to use important tools such as determinants, rank, inverse and generalized inverse in statistics.
4. Acquire the knowledge of linear transformations, orthogonal bases and projections
5. Study the importance and methodologies of calculating eigen values and eigen vectors
6. have ability to understand and solve emerging research problems using the tools studied in linear algebra

**UNIT – 1:**

Vector spaces, subspaces, linear dependence and independence, basis and dimension of a vector space, finite dimensional vector spaces, completion theorem, examples of vector spaces over real and complex fields, linear equations.

10T + 12P

**UNIT – 2:**

Vector spaces with an inner product, Gram- Schmidt orthogonalisation process, orthonormal basis and orthogonal projection of a vector, linear transformations.

10T + 8P

**UNIT – 3:**

Algebra of matrices, row and column spaces of a matrix, elementary matrices, determinants, rank and inverse of a matrix, null space and nullity, partitioned matrices, Kronecker product.

Hermite canonical form, generalized inverse, Moore - Penrose inverse, idempotent matrices, solution of matrix equations.

10T + 12P

**UNIT – 4:**

Characteristics roots and Vectors, Cayley - Hamilton theorem, minimal polynomial, similar matrices algebraic and geometric multiplicity of characteristics roots, spectral

decomposition of a real symmetric matrix, simultaneous reduction of a pair of real symmetric matrices, Hermitian matrices, singular values and singular decomposition, Jordan decomposition.

10T + 8P

#### **UNIT – 5:**

Real quadratic forms, reduction and classification of quadratic forms, index and signature, triangular reduction of a positive definite matrix. extrema of quadratic forms, vector and matrix differentiation.

8T + 8P

**(50 Lectures)**

#### **REFERENCES:**

1. Biswas, S (1984) Topics in Algebra of matrices
2. Graybill, F. A (1983) Matrices with applications in statistics, 2<sup>nd</sup> edition, Wadsworth.
3. Hadley, G (1987) Linear Algebra, Narosa

6. Rao, C.R and Mitra, S.K (1971) Generalised inverse of matrices and its applications, Wiley
7. Searle, S. R. (1982) Matrix Algebra Useful in Statistics, Wiley.
8. Raghava Rao (1972) Matrix Theory, Oxford and IBH Publishing Company.

#### **Practical : PG86P101: Linear Algebra-Course Outcomes**

Gains understanding of the tools of linear equations, generalized inverse, eigen values and eigen vectors, various quadratic forms, diagonalization of a real symmetric and also simultaneous diagonalization of real matrices using statistical softwares.

#### **PG86T102: PROBABILITY THEORY**

#### **PG86T102 : Probability Theory-Course Outcomes**

On completion of this course students will:

- Understand the concepts of random variables, sigma-fields generated by random variables, probability distributions and independence of random variables related to measurable functions.
- have knowledge about measurable functions, Lebesgue measure, Lebesgue – Stieltjes measure.
- Analyze modes of convergence, knowledge about convergence in probability, convergence in distribution function and almost sure convergence.

- Understand weak and strong laws of large numbers, prove Borel-Cantelli lemmas and central limit theorem.

#### **UNIT – 1:**

Classes of sets, fields, sigma field, minimal sigma field, Borel sigma field in  $\mathbb{R}^k$ , sequence of sets, limit infimum and limit supremum of a sequence of sets.

8T + 8P

#### **UNIT – 2:**

Measure, probability measure, properties of measure, Cartheodary extension theorem (Statement only), monotone class theorem (statement only), Lebesgue and Lebegue Stieltje's measures on  $\mathbb{R}^k$ .

8T + 12P

#### **UNIT – 3:**

Measurable functions, random variables, sequence of random variables;, convergence in probability (and in measure) almost sure convergence, convergence in moments, convergence in distribution. Monotone convergence theorem, Fatou's Lemma, dominated convergence theorem.

12T + 12P

#### **UNIT – 4:**

Characteristic functions, uniqueness theorem, Levy continuity theorem (statement only). Independence, weak law of large numbers, Borel – Cantelli lemma, strong law of large numbers for a sequence of random variables,

14T + 8P

#### **UNIT – 5:**

Central limit theorem for a sequence of independent random variables under Lindberg's condition and for a sequence of i i d random variables.

8T + 8P

(50 Lectures)

### **Practical : PG86P102 Probability Theory-Course Outcomes**

Based on theory knowledge students are able to solve practical problems independently.

### **PG86T103: THEORY OF SAMPLING**

#### **PG86T103 : Theory of Sampling-Course Outcomes**

After studying this course, the candidate will be:

- Able to take up a project to collect primary data.
- Able to prepare questionnaires, plan the scheme of the survey, train investigators, tabulate and disseminate data.
- Able to identify the nature of population sampling methodology to be adopted and recognize right tool for analysis.
- Able to handle various kinds of non sampling errors to collect non erroneous data.
- Able to carry out sampling surveys on sensitive issues.

#### **UNIT – 1:**

Concept of Random Sampling, Sampling Design, Sampling Scheme and Sampling Strategy. Review of SRSWR, SRSWOR, Stratified and Systematic Sampling Procedures.

12T & 12P

#### **UNIT – 2:**

Sampling with varying probabilities: Procedures of selecting sample, PPSWR, PPSWOR, Desraj's Ordered Estimates, Murty's unordered Estimates. I P P S: Horvitz – Thompson Estimator and its properties, Midzuno – Sen scheme of sampling, Rao – Hartly – Cochran procedure.

13T + 12P

#### **UNIT – 3:**

Ratio and Regression Estimators with their properties. Cluster sampling, Sub sampling with units of equal and unequal sizes. Double sampling procedures used in Ratio, Regression estimators and in stratification and PPS sampling.

13T + 16P

#### **UNIT – 4:**

Non Sampling Errors: Errors in Surveys, Model for measurement of observational error. Nonresponse error: Hansen – Hurwitz, Deming's, Politz - Simons Techniques. RRT: Warner's Model.

12T & 8P

**(50 Lectures)**

**REFERENCE:**

1. Cochran W.G. (1984) Sampling Techniques. Wiley Eastern, New Delhi.
2. Desraj (1976) Sampling Theory. Tata Mc. Graw Hill.
3. Mukhyopadhyay. P (1998) Theory and Methods of Survey Sampling. Prentice Hall of India Pvt. Ltd.

6. Sukhatme P.V. Sukhatme B.V. Sukhatme S. and Ashok C (1984) Sampling Theory of Surveys with Applications. Indian Society of Agricultural Statistics, New Delhi.

**Practical : PG86P103 : Theory of Sampling-Course Outcomes**

The candidate will acquire knowledge on selecting random samples under sampling scheme like SRS and PPS. Calculating various estimators and their precisions.

**PG86T104: PROGRAMMING IN C AND SIMULATION****PG86T104 : Programming in C and Simulation-Course Outcomes**

After studying this course, the candidate will:

- be able to develop logic of problem solving.
- Develop C-Programs for problems of different branches of statistics.
- Acquire knowledge of higher/advanced features C-Programming.
- Artificially simulate various environments.

**UNIT – 1:**

Programming in C: Structure of C Programme, Variables, Data types, Operations and Expressions. Input – Output functions and Format specification.

10T &12P

**UNIT – 2:**

Control statements: do, do-while and for loops. if, if-else and switch statements. Arrays, Functions, Pointers, Structures, Unions, File handling, C – Processors, C – Standard, Library and Header files.

25T & 20P

**UNIT – 3:**

Simulation: Generation of Binomial, Beta, Geometric Exponential, Poisson, Normal Random Variables. Statistical Applications- using C-Programming Language.

15T & 16P

(50 Lectures)

**REFERENCE:**

1. Kerighan and Ritchie (1997). The C-Programming Language. PHI
2. E-Balaguruswamy (1990) Programming in C McGraw- Hill.
3. J. Jayasri (1992) The C-Language Trainer with C-Graphic and C++ Sage India Ltd.

**Practical : PG86P104 : C-Programming Practical-Course Outcomes**

Demonstrates understanding of logic, syntax and working of C-programs on various aspects of statistical Analysis and simulation of statistical Models.

**Semester – II**

**PG86T201: PROBABILITY DISTRIBUTIONS**

**PG86T201 : Probability Distributions- Course Outcomes**

On completion of this course students will be able to:

- Understand the most common discrete and continuous probability distributions and their real life applications.
- Compute marginal and conditional distributions from joint distributions.
- Get familiar with transformation of univariate and multivariate densities. Understanding of distribution helps to understand the nature of data and to perform appropriate analysis.
- Acquire the application knowledge of compound, Truncated, mixture and non-central probability.

**UNIT – 1:**

Standard discrete distributions: Bernoulli, Binomial, Poisson, Geometric, Hypergeometric, Negative binomial, Logarithmic series, Rectangular and Multinomial distributions.

12T & 12P

**UNIT – 2:**

Standard continuous distributions: Normal, Lognormal, Cauchy, Uniform, Exponential, Logistic, Weibull, Double exponential, Gamma, Bivariate normal, Bivariate exponential distributions.

12T & 12P

### **UNIT – 3:**

Conditional, Compound, Truncated and Mixture of distributions. Functions of random variables and their distributions.

6T & 8P

### **UNIT – 4:**

Sampling Distributions: Central and Non-central chi-square, t and F distributions and their properties. Distribution of quadratic forms under normality.

12T & 8P

### **UNIT – 5:**

Order Statistics: Distributions of order statistics and their properties with applications. Joint and Marginal distributions of order statistics. Distributions of range and median.

8T & 8P

**(50 Lectures)**

### **REFERENCE:**

1. Dudewicz E.J and Mishra S.N. (1988) Modern Mathematical Statistics. Wiley
2. Johnson and Kotz (1972) Distributions in Statistics, Vol I, II and III, Houghton and Mifflin
3. Rohatgi, V.K. (1984) An Introduction to Probability Theory and Mathematical Statistics, Wiley Eastern
4. Rao, C.R. (1973) Linear Statistical Inference and its applications, 2<sup>nd</sup> Edn. Wiley Eastern.

### **Practical: PG86P201 Probability Distributions-Course Outcomes**

Course Outcomes : Based on theory knowledge students are able to do practical problems independently.

### **PG86T202: THEORY OF POINT ESTIMATION**

### **PG86T202 : Theory of Point Estimation-Course Outcomes**

On completion of this course, the candidate will:

- Learn various aspects of estimation including characteristics of an estimator.
- Have knowledge on various families of distributions and their advantages in obtaining estimators.
- Learn different methods of estimation and their advantages.
- Develop a logic to analyse the situation and apply appropriate statistics tools.

### **UNIT – 1:**

Likelihood Function, Group Families, Exponential class of densities and its properties, Fisher Information, Sufficiency, Neyman – Fisher factorization Theorem, Minimal sufficient statistics and their construction, Completeness, bounded completeness and relation with minimal sufficiency, ancillary statistics, Basu's Theorem and its Applications.

20T & 20P

### **UNIT – 2:**

Unbiased Estimators, Characterization of UMVUE, Rao – Blackwell and Lehmann – Scheffe Theorem and their uses.

8T & 8P

### **UNIT – 3:**

Cramer- Rao inequality for single parameter case, Chapman - Robbins bounds and Bhattacharya bounds.

7T & 8P

### **UNIT – 4:**

Methods of Estimation: Method of moments, method of minimum chi-square, method of maximum likelihood and its properties, Method of scoring and its applications. Asymptotic efficiency of MLE, CAN and BAN estimators.

15T & 12P

**(50 Lectures)**

### **REFERENCES:**

1. Kale B.K (1999) A first course on parametric inference. Narosa.
2. Lehmann E. L (1988) Theory of point estimation. John Wiley & Sons
3. Rohatgi V.K (1984) An introduction to probability theory mathematical Statistics. Wiley eastern, New Delhi.
4. Zacks, S (1971) Theory of Statistical Inference. Wiley, Newyork.

### **Practical : PG86P202 : Theory of Point Estimation –Course Outcomes**

On completion of this course, the candidate learns the technique of:

- 1) Computing various estimators under different situations.
- 2) Will learn different approaches to obtain estimators using various methods.

### **Any one of the Optional PG86T203: DEMOGRAPHY – Special Paper**

### **PG86T203A: Demography-Course Outcomes**

On completion of this course, the candidate will:

- have information regarding sources and methods of demographic data.
- acquire in depth knowledge of various measures of mortality and fertility.

- have ability to conduct socio-economic survey using tools such as sample survey and vital statistics registration system.
- Acquire the knowledge of construction of life tables for various categories of demography.
- Study the importance and methodologies of population growth and projections.
- Develop the ability to understand and solve emerging research problems.

#### **UNIT – 1:**

Demography and its interdisciplinary nature, sources of demographic data, Coverage and Content errors. The use of balancing equation, Chandrasekaran and Deming formula to check completeness of registration data. Use of Whipple's, Myers's and UN Indices.

12T & 12P

#### **UNIT – 2:**

Measures of Mortality: Various measures of mortality, infant mortality rate, cause specific death rates and standardized death rates. Measures of Fertility: Period and cohort fertility measures, use of birth order statistics, child – women ratio, Brass P/F ratio to estimate current levels of fertility, Measures of reproduction and replacement. Sheps and Perrin stochastic human reproductive process.

15T & 16P

#### **UNIT – 3:**

Life Tables: Types of life tables, inter – relationships between life table functions, construction of life tables using Reed – merrel and Greville's Method. Probability distribution of life table functions and their optimum properties. Population estimation and Projections: Mathematical, Statistical and Demographic Methods, Component method.

15T & 12P

#### **UNIT – 4:**

Stable and Quasi – stable population: Derivation of Lotka's stable population model and its properties, Intrinsic growth rate and its derivation, age structure and birth rate of a stable population, mean length of generation, momentum of population growth, Quasi – stable population under changing fertility and mortality situations.

10T & 4P

**(50 Lectures)**

#### **REFERENCES:**

1. Shryock, Henry S, Jacob S, Siegel and Associates (1964) Methods and materials of demography (condensed edition) Academic press, London.
2. Barclay, George W. (1968) Techniques of population analysis, John Wiley and sons, New York.

3. Keyfitz N. (1968), Introduction to the Mathematics of Population. Addison-Wesley Publishing Co, Reading, Massachusetts.
4. Chiang C.L. (1968), Introduction to stochastic processes in Biostatistics, John Wiley and sons, New York.
5. R. Ramkumar (1986), Technical Demography, Wiley Eastern, New Delhi.
6. Sudhendu Biswas (1988), Stochastic Processes in Demography and Applications, Wiley Eastern, New Delhi.

### **Practical : PG86P203A: Demography-Course Outcomes**

Provides framework of different sources and methods of demographic data and facilitates, the knowledge of various measures for data on births and deaths, also the applications of these measures in finding life expectancy, population projections, calculation growth rates etc.

### **PG86T205: ACTUARIAL STATISTICS – Special Paper**

#### **PG86T203B : Actuarial Statistics-Course Outcomes**

On completion of this course, the candidate will:

- Learn various aspects of insurance and utility functions.
- Have knowledge on various insurance policies and calculation of their premiums.
- Have in-depth knowledge in computing life annuities, benefits premiums and benefit reserves.
- Help insurance companies to develop new advantageous policies.

#### **UNIT – 1:**

The Economics of insurance: Utility theory, insurance and utility, elements of insurance, optimal insurance. Individual risk models for a short term; Models for individual claim random variables, sums of independent random variables, approximations for the distribution of the sum, application to insurance.

10T & 12P

#### **UNIT – 2:**

Survival distributions and Life tables: Probability for the age at death, the survival function, time until death for a person age  $x$ , Curtate-Future-Life times, force of mortality, relation of life table functions to the survival function. The deterministic survivorship group, other life table characteristics recursion formulae, assumptions for fractional ages, some analytical laws of mortality, select and ultimate tables.

10T & 12P

#### **UNIT – 3:**

Life Insurance: Insurance payable at the moment of death, level benefit insurance, Endowment insurance, Deferred insurance, Varying benefit insurance, insurance payable at the end of the year of death, Relationship between insurance payable at the moment of death and at the end of the year of death, Differential equations for insurance payable at the moment of death.

10T & 12P

**UNIT – 4:**

Life Annuities: Continuous Life annuities, discrete life annuities, life annuities with monthly payment.

Benefit Premiums: Fully continuous premium, fully discrete premiums, true monthly payment premiums.

Benefit Reserves: Fully continuous benefit reserves, other formulas for fully continuous benefit reserves.

10T & 8P

**UNIT – 5:**

Multiple Life Functions: Joint distribution of future Life times, the joint life status, the last- survivor status, copulas, special mortality assumptions, Gompertz and Makeham Laws.

Multiple Decrement Models: Two random variables, random survivorship groups, deterministic survivorship group. Basic relationships inform distribution assumption for multiple decrements.

Collective Risk Models for a Single Period: The distribution of aggregate plans, selection of basic distributions the distribution of N, the individual claim amount distribution.

10T & 4P

**(50 Lectures)**

**REFERENCES:**

1. Newton L Bowers, Jr; Gerber Hans, U; Hickman James, C; Jones Donald A; Nesbitt Cecil, J. (2000) – Actuarial Mathematics – The Society of Actuaries, Schaumburg, Illinois, U.S.A.

**Practical : PG86P205 : Actuarial Statistic**

The candidate will acquire skills :

1. of calculating increment, decrement, enmities, premiums and benefit reserves for various policies.
2. Of recognizing various actuarial models.

**STET: 2.1: STATISTICAL METHODS**  
**(OPEN ELECTIVE)**

**PG86T203C : Statistical Methods-Course Outcomes**

On completion of this course, the candidate will learn:

- Various methods of collecting and organizing data
- Various statistical measures such as population mean and variance.

- Measures of association between two variables.
- Different tests which are applicable to other disciplines.

#### **UNIT – 1:**

Data: Introduction, collection of data, kinds of data, tabulation of data, diagrammatic and graphical representation of data with examples. Measures of central tendency: Introduction, arithmetic mean geometric mean, harmonic mean, median, mode, for grouped and ungrouped data with examples.

10 Hrs

#### **UNIT – 2:**

Measure of dispersion: Introduction, range, quartiles, interquartile range, mean deviation, variance, coefficient of variation for grouped and ungrouped data with examples. Skewness and Kurtosis: Introduction, measures of Skewness and Kurtosis with examples.

10 Hrs

#### **UNIT – 3:**

Concept of Probability: Introduction, different approaches to definition of probability, probability of composite event, addition rule, multiplication rule, Bayes formula. Theoretical probability distributions: Binomial, Geometric, Poisson, Normal, Exponential.

10 Hrs

#### **UNIT – 4:**

Correlation and regression: Scatter diagram, coefficient of correlation, fitting of linear regression, method of least squares, coefficient squares, coefficient of variation, relation between regression and correlation.

10 Hrs

#### **UNIT – 5:**

Testing of Hypothesis: Introduction, parametric tests, one sample and two sample z, t tests, paired t test, F test,  $X^2$  test, test for correlation. Nonparametric tests: Run test, Sign test, Signed rank test, Wilcoxon's rank sum test, and Spearman's test for rank correlation.

10 Hrs

**(50 Lectures)**

**Semester – III****PG86T301: ELEMENTARY STOCHASTIC PROCESSES****PG86T301: Elementary Stochastic Processes-Course Outcomes**

After studying this course,

- The candidate will acquire knowledge of stochastic processes, modeling real life situations through stochastic processes.
- Study stochastic processes like Poisson, pure birth, Yule-Fuly, Birth and Death, Weiner, Branching processes.
- Know how better modeling can be made using stochastic processes.
- Develop critical Analysis capacity through stochastic processes.

**UNIT – 1:**

Introduction to stochastic processes (SP), classification of SP according to state space and time domain. Finite and countable state Markov chains (MC), Chapman – Kolmogorov's equations, calculation of n-step transition probabilities and their limits, stationary distribution, classification of states, transient MC, random walk and gambler's ruin problems.

16T & 16P

**UNIT – 2:**

Continuous time Markov processes: Kolomgorov-Feller differential equation, Poisson process, pure birth process, Yule – Furry process, birth and death processes, Weiner process as a limit of random walks, first passage time and other problems, diffusion process.

14T & 16P

**UNIT – 3:**

Renewal Theory: Elementary renewal theorem and applications, key renewal theorem and its uses, study of residual life time process, discrete time renewal theory.

Stationary process: weakly stationary and strongly stationary processes, spectral decomposition, moving average and auto regressive processes.

14T & 12P

**UNIT – 4:**

Branching process: Galton-Watson branching process, probability of ultimate extinction, distribution of population size, and statistical inference in MC and Markov process.

6T & 4P

**(50 Lectures)**

**REFERENCES:**

1. Medhi J (1994), Stochastic Processes, 2<sup>nd</sup> edn., Wiley Eastern Ltd., New Delhi.
2. Bhat U.N. (1984), Elements of Applied Stochastic processes, 2<sup>nd</sup> edn., Wiley, New York.

4. Karlin S and Taylor H.M. (1975), A first course in stochastic processes, 2<sup>nd</sup> edn., Academic press, New York.

**Practical : PG86P301 : Elementary Stochastic Processes-Course Outcomes**

Acquaint with use of stochastic Models in different areas of applications of statistics.

**PG86T302: TESTING OF HYPOTHESES****PG86T302: Testing of Hypotheses-Course Outcomes**

After studying this course, the candidate:

- Increases confidence in their ability to formulate different research problems
- Develops ideas and research skills
- Gets in-depth knowledge of various research tools in the form of parametric and non-parametric methods.
- Learns to construct UMA and UMAU confidence intervals, likelihood ratio tests, etc.
- Study the importance of sequential analysis using Wald's SPRT and its functions, OC and ASN.

**UNIT – 1:**

Introduction to testing of hypotheses: size and power of a test. Neyman-Pearson lemma, MP test, MLR Property and UMP test.

10T & 12P

**UNIT – 2:**

Generalization of NP-lemma, UMPU tests, Bounded completeness, Similar regions. Tests with Neyman structure, UMPU test for multi-parameter exponential families. Comparison of two binomial and Poisson populations.

10T & 8P

**UNIT – 3:**

Confidence intervals and their connection with the tests of hypotheses. UMA, UMAU confidence intervals, shortest length confidence intervals.

Likelihood ratio tests, large sample properties. Chi-square goodness-of-fit tests for simple and composite hypothesis.

10T & 12P

#### **UNIT – 4:**

Nonparametric methods-run test, sign test, signed-rank test, median test, Wilcoxon-Mann-Whitney test, Kolmogorov – Smirnov tests, Tests involving rank correlation, Linear rank statistics, Large sample properties and applications.

10T & 8P

#### **UNIT – 5:**

Sequential analysis, need for sequential tests, SPRT and its properties, termination property, fundamental identity and Wald's equation, OC and ASN functions. SPRT for testing hypothesis in binomial, Poisson, normal and exponential distribution-computation of OC and ASN functions.

10T & 8P

**(50 Lectures)**

#### **Practical : PG86P302 : Testing of Hypotheses-Course Outcomes**

It improves their ability to handle and address the research problems in Statistics, Biology, Economics, Sociology, Anthropology etc. Learn applications of parametric and non-parametric methods.

## **PG86T303 : STATISTICAL ORIENTED R – PROGRAMMING**

### **PG86T303 : Statistical Oriented R-Programing-Course Outcomes**

After completion of this course, the candidate will be able to:

- Know various aspect of R-Programming language.
- Write R-Programs for various statistical concepts.
- Carry out simulation to complex statistical problems.
- Use and interpret inbuilt tests in R-programming.

#### **UNIT – 1:**

Introduction to R: R as a Statistical software and language, R preliminaries, methods of data input, data accessing or indexing, built – in functions. Graphics with R, getting help, saving storing and retrieving data.

12T & 16P

#### **UNIT – 2:**

Analysis using R: problems based on descriptive statistics, probability distributions, statistical inference, correlation and regression, linear models and time series analysis.

13T & 32

**(25 Lectures)**

#### **REFERENCES:**

1. Goran Brostrom, Statistical Programming in R, Umea Universitet, Statistiska institutionen, Mandatory Reading instructions: Tillhandahalls elektroniskt.

### **Practical : PG86P303 : Statistical Oriented R-Programing-Course Outcomes**

The candidate will be able to

1. Feed the data and carry out the analysis.
2. Import data from other sources.

**Optional (any one)**

**PG86T304: OPERATIONS RESEARCH– Special Paper**

**PG86T304A : Operations Research-Course Outcomes**

After completion of this course, the candidate will be able to:

- about linear programming and various methods to solve linear programming problem.
- About transportation problem and assignment problem and calculating minimum cost.
- About analyzing various kinds of queues and their waiting times.
- About various inventory models and obtaining economic order quantity under these models.
- To be helpful in various sectors like marketing research, industries, etc to detect the problems and give optimum solutions.

**UNIT – 1:**

Linear programming, Graphical methods, basic theorems, simplex method and simplex algorithm & two phase method, Charne's M –technique, revised simplex method, duality in LPP, duality theorems, dual simplex method, economic interpretation, sensitivity analysis.

15T & 16P

**UNIT – 2:**

Transportation and assignment algorithms, balanced and unbalanced transportation problems, degeneracy, Hungarian method of assignment.

10T & 8P

**UNIT – 3:**

Queuing Models chief characteristics. Analysis of M/M/1, M/M/C queues with steady state probabilities.

10T & 12P

**UNIT – 4:**

Inventory Models: Deterministic EOQ Models (without shortage costs), probabilistic single period model with instantaneous demand (No Set up cost Model), models with price breaks (one & two price breaks), (s, S) policy.

10T & 12P

**(50 Lectures)**

**REFERENCES:**

8. Taha H .A (1998) Operations Research. Prentice-Hall of India.

### **Practical : PG86P304A : Operation Research-Course Outcomes**

The candidate will learn the skills of

1. Practically solve various problems of linear programming, transportation problem and assignment problem.
2. To solve problem on queuing to analyze average queue, waiting time and inventory problems to calculate economic order quantity.

### **PG86T304B : ECONOMETRICS – Special Paper**

#### **PG86T304B : Econometrics-Course Outcomes**

On completion of this course, the candidate will:

- develop professional competence in analysis of economic and time series data.
- be able to understand the evolutionary practices of Linear/Multiple linear regression models, assumptions and consequences of violations of the requirements of the model.
- be able to achieve professional competency in the field of analysis of econometric models through simultaneous equation models.
- Acquint with contemporary trends in estimation of econometrics models.

#### **UNIT – 1:**

**Introduction:** Origin, definition, methodology, scope and limitations of econometrics.

**The two – variable linear regression model:** Relationships between economic variables, two variable linear regression model, least squares estimators.

**Multiple linear regression models:** Model descriptions and assumptions, least squares estimators, selection of variables in multiple regression model.

10T & 12P

#### **UNIT – 2:**

**Analysis of residuals:** Presence of outliers, omitted variables, nonlinear relationship, correlated disturbances heteroscedasticity.

**Multicollinearity:** The plausibility of the assumption of non-multicollinear regressors, consequences of multicollinearity, tests for detecting multicollinearity, solutions for multicollinearity.

10T & 8P

### UNIT – 3:

**Autocorrelation:** Introduction and plausibility of serial dependence, sources of autocorrelation, tests for autocorrelation, solutions for autocorrelation, methods for estimating the parameters of autocorrelation, serial correlation.

**Autoregressive and Distributed Lag Models:** Autoregressive model, distributed lag model, methods of estimation of lagged models.

10T & 12P

### UNIT – 4:

**Errors in variables:** Introduction, solution for single equation models, reverse regression, instrumental variable method, proxy variables. Stochastic regressions: Introduction, bivariate normal distribution.

10T & 4P

### UNIT – 5:

**Simultaneous equation models:** The problem of identification.

**Single equation methods of estimation:** reduced form method or indirect least squares (ILS), the method of instrumental variables (IV), two-stage least squares (2SLS), limited information maximum likelihood (LIML), k-class estimators.

**System methods of estimation:** Three-stage least squares (3SLS), full information maximum likelihood (FIML).

10T & 12P

**50 Lectures**

### Reference:

1. Baltagi B.H. (2000) Econometrics, Springer.
2. Gujarati D.N. (2003) Basic Conometrics, McGraw-Hill.
3. Maddala G.S. (2002) Introduction to Econometrics, John Wiley.

### **Practical : PG86P304B : Econometrics-Course Outcomes**

Able to understand practices in applications of Econometric Models in various economic problems.

### **PG86T304C: APPLIED STATISTICS**

#### **(OPEN ELECTIVE)**

### **PG86T304C : Applied Statistics (OEC)- Course Outcomes**

: On completion of this course students will be able to :

- Explain the concepts of Statistical Quality Control and associated techniques.

- Construct appropriate Quality Control Charts and Forecasting models useful in monitoring a process.
- Apply various samplings inspection plants to real world problems for both theoretical and applied research.
- Assess the ability of a particular process to meet customer expectations.
- Develop an appropriate quality assurance plan to assess the ability of the service to meet requisite national and international quality standards.
- Understand to identify whether a process is in statistical control or not.
- Understand to estimate Trend, Seasonal and Cyclic components of time series.
- Understand past and future behavior of phenomena under study.
- Understand how a product quality can be improved and elimination of assignable causes of variations.

#### **UNIT – 1:**

Time Series: Introduction, components of time series, measurement of trend, measurement of seasonal variations. Index Numbers: Introduction, price index numbers, quantity index numbers, chain index numbers, cost of living index number, time reversal test, factor reversal test.

8 Hrs

#### **UNIT – 2:**

Vital Statistics: Introduction, methods of obtaining vital statistics, mortality rates, fertility rates, measurement of population growth.

6 Hrs

#### **UNIT – 3:**

Analysis of Experiments: Introduction, principles of experimental design, ANOVA, completely randomized design, randomized block design, factorial experiments.

10 Hrs

#### **UNIT – 4:**

Sampling Theory: Introduction, simple random sampling, stratified random sampling, systematic sampling, sampling and non-sampling errors.

10 Hrs

#### **UNIT – 5:**

Control Charts (Process Control): Introduction, control charts for variables ( $\bar{x}$  and R charts), control charts for attributes (P-chart), Control charts for number of defects per unit (C-chart), demerit control charts. Acceptance Sampling Plans (Product control): Basic terminologies: AQL, LTPD, AOQ, AOQL, ASN, OC curve, producer's risk, and consumer's risk. Single sampling plan, double sampling plan.

16 Hrs

**Semester – IV**

**ST PG86T401: MULTIVARIATE ANALYSIS**

**PG86T401 : Multivariate Analysis-Course Outcomes**

Course Outcomes: On completion of this course students will be able to:

- Understand the concept of Multivariate analysis and its usefulness.
- Understand data requirements for Multivariate analysis.
- Perform exploratory analysis of multivariate data, such as plot multivariate data, calculating descriptive statistics, testing for multivariate normality.
- Conduct statistical inference about multivariate means including hypothesis testing and different types of confidence intervals estimation.
- Undertake statistical analyses using appropriate multivariate techniques, which include principal component, factor analysis and discriminant analysis.

**UNIT – 1:**

Random sampling from multivariate normal distribution, maximum likelihood estimators of parameters, distribution of sample mean vector. Wishart distribution and its properties, distribution of sample generalised variance. Null distribution of sample correlation coefficients, distribution of regression coefficients. Application in testing and interval estimation.

14T & 16P

**UNIT – 2:**

Hotelling's  $T^2$ , Null distribution of Hotelling's  $T^2$  - statistic. Applications in tests on mean vector for single and several multivariate normal populations.

6T & 4P

### **UNIT – 3:**

Multivariate linear regression model, estimation of parameters, testing linear hypothesis about regression co-efficients. Likelihood ratio criterion. Multivariate analysis of variance of one - way and two-way classified data.

8T & 8P

### **UNIT – 4:**

Classification and discrimination procedures for discrimination into one of two multivariate normal populations. Sample discriminant function, tests associated with discriminant function, probabilities of misclassification and their estimation, classification into more than two multivariate normal populations. Penrose size and shape factors.

12T & 18P

### **UNIT – 5:**

Introduction to Principle component analysis, Factor analysis, Cluster analysis, Canonical Correlations and Multi dimensional scaling.

10T & 12P

**(50 Lectures)**

### **REFERENCES:**

1. Anderson, T.W. (1983) An Introduction to Multivariate statistical Analysis. Wiley.
2. Johnson and Wichern (1986) Applied multivariate Analysis. Wiley

6. Srivastava, M.S. and Khatri C.G. (1979) An introduction to Multivariate Statistics. Worth Holland
7. Mardia, K.V., Kent J.T. and Bibby J.M. (1979) Multivariate Analysis. Academic Press.

## **PG86T402: LINEAR MODELS**

### **PG86T402: Linear Models-Course Outcomes**

The course provides a thorough knowledge in various aspects of Linear Models

- Gain knowledge in basics of linear estimation
- Ability to understand important tools of linear estimation in Gauss-Markov set-up.
- Acquire the knowledge of application of multiple linear regression in various fields.
- Study the importance of analysis of variance (ANOVA) technique and its different methodologies.

- Ability to understand and solve different experimental designs such as RCBD, BIBD, PBIBD and Symmetric BIBD in emerging research problems.

### **UNIT – 1:**

Gauss-Markov setup, estimability of linear parametric functions, normal equations and least squares estimation. Error and estimation spaces, variance and covariance of least square estimates. Estimation of Error variance, Linear Estimation in the correlated setup. Least squares Estimates with restriction on the parameters, simultaneous estimates of linear parametric functions.

10T & 12P

### **UNIT – 2:**

Distribution of Quadratic Forms for normal variables, related theorem (without proof), Tests of hypotheses in general linear models, Tests of hypotheses for one and more than one linear parametric functions. ANOVA table, power of F – Test. confidence intervals and regions. multiple comparison procedures of, simultaneous confidence intervals.

8T & 8P

### **UNIT – 3:**

Application of Gauss – Markov theory to the analysis of one-way, two – way classification without and with interaction with equal number of observations per cell. Estimation and related tests of hypotheses. Posthoc tests: Tukey, Scheffe and Bonferroni

12T & 8P

### **UNIT – 4:**

General block designs: Two-way classification with unequal number of observations per cell without interaction. Concept of connectedness, balancedness and orthogonality and related tests of hypotheses.

Balanced Incomplete block designs (BIBD): Definition, parametric relationship, inter and intra-block analysis and Symmetric BIBD.

10T & 8P

### **UNIT – 5:**

Missing Plot techniques and its application to RBD and LSD

Analysis of Covariance for one-way and two-way classification models, estimation of parameters and related tests of hypotheses and applications. Introduction to random effects models.

10T & 12P

**(50 Lectures)**

7. Rao C.R. (1985) Linear Statistical Inference and its applications. Wiley Eastern.
8. Searle S.R. (1971) Linear Models. John Wiley & Sons.

### **Practical : PG86P402: Linear Models-Course Outcomes**

Provides an idea of formulation of linear models and estimation of parameters. It facilitates the practical knowledge of ANOVA models and designs of experiments. Also gives the applications these tools in laboratory and agricultural experiments.

### **PG86T403: SQC AND RELIABILITY THEORY**

#### **PG86T403 : SQC & Reliability Theory-Course Outcomes**

After completion of this course, the candidate

- will develop professional competence in applications of statistical tools in Industry.
- Will be able to develop control charts in various situations of quality improvement programs in industry.
- Will be able model and assess reliabilities of components/systems under different setups and configuration of components.
- Will be able to use these tools in finance, insurance, health science, etc.

#### **UNIT – 1:**

Process Control: Control charts for  $\bar{x}$  and s, demerits, extreme values. Moving average control charts, geometric moving average control charts, group control charts, multivariate quality control charts, sloping control lines.

Use of sequential runs in constructing control limits, CUSUM charts and its relation with SPRT. Control charts versus ANOVA and Chi-square tests.

12T & 12P

## **UNIT – 2:**

Product Control: single, double and multiple sampling plans for attributes, curtailed sampling plans. OC, AOQ, ASN and ATI functions for these plans. Designing single and double sampling plans. Chain sampling plans. Sampling plans by variables, Continuous sampling plans CSP1, CSP2, CSP3 and multilevel sampling plans.

10T & 12P

## **UNIT – 3:**

Reliability Theory: Life distributions, survival functions, failure rate, Integrated hazard function, residual life time, mean residual life time. Common Life Distributions: binomial, negative binomial, Poisson, exponential, Weibull, gamma, Pareto and log-distributions. Notion of aging: IFR, IFRA, DMRL, NBU, NBUE classes of life distributions and their dual.

10T & 8P

## **UNIT – 4:**

System reliabilities: Series, parallel, k-out-of-n, standby redundant systems and their reliabilities.

Maintenance policies: Age replacement policy and Block replacement policies and their characteristics. Reliability modeling: Introduction to shock models, stress-strength models and proportional hazard models.

8T & 8P

## **UNIT – 5:**

Inference in Reliability: Type I and Type II Censoring schemes, likelihood functions based on these sampling schemes for exponential distribution. Reliability estimation (complete and censored samples) for exponential distribution, testing reliability hypotheses (exponential distribution).

12T & 8P

**(50 Lectures)**

## **REFERENCES:**

8. J.V. Deshpande and Sudha G. Purohit (2005) Life time data: Statistical Models and Methods. World Scientific.

**Practical : PG86P403 : SQC & Reliability Theory-Course Outcomes**

Demonstrates the practices and working of control charts in different situations. Use of Professional knowledge of Acceptance sampling Plans and Reliability Theory in Industry and Health Science.

**PG86P404 Project Work: Course outcomes**

After completing the project work, the candidate will learn;

- Work in team, develop leadership quality, skill of information collection.
- Present the collected information with graphs, analyze and interpret the data, draw conclusions thereby helping administrators in framing policies.

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPARTMENT OF STUDIES IN STATISTICS**  
**SYLLABUS FOR**  
**M.PHIL. IN STATISTICS**

**M.Phil Syllabus**

**M.Phil (Statistics)**

The Course is of one term and 3 hours per week with one compulsory and one optional paper. Question paper shall have 6 questions of which 5 are to be attempted. Course emphasizes solving of-problem and critical thinking rather than routine derivation.

| <b>Codes</b> | <b>Title</b>                      |
|--------------|-----------------------------------|
| MPHIL8601    | Research and Teaching Methodology |
| MPHIL8602A   | Nonparametric Inference           |
| MPHIL8602B   | Stochastic Models in Epidemiology |
| MPHIL8602C   | Reliability Theory                |

Programme Outcomes:

The candidate will be prepared to

1. Know the foundations of research and research methodology.
2. Have rigorous review of literature in the area of specialization.
3. Understand writing of dissertation.
4. Prepare for further research.

**Paper I: MPHIL8601**

**(Compulsory)**

**Paper – I : Research and Teaching Methodology :**

**Course Outcomes:**

After studying this course, the candidate acquires knowledge of:

- Collecting data, literature review and dissertation writing.
- Some statistical softwares.
- Probability and its applications.
- Various sampling techniques and test procedures.

Collection of data from primary and secondary sources. Familiarity with RBI bulletin. Annual reports, statistical abstracts etc. Errors in the data types (sampling & non-sampling errors), detection and corrections. Fitting of curves goodness of fit, interpretation of empirical data. Uses and abuses of statistics. Writing of reports, research papers and theses.

Probability models of convergence, laws of large numbers central limit theorem. Markov chains and Martingales. Modelling analysis. Problem of validations. Estimates MLE and its properties, limitations, method of least squares.

Important principles of test procedure UMP, UMPU, LMP & UMP invariant tests. Some non-parametric tests, ARE, Bayes and minimax procedures, Sequential tests.

### **References:**

- 5) N.L. Johnson, S. Kotz And N. Balakrishnan Continuous Univariate Distributions, Vol. 1 And 2, John Wiley And Sons, 1994.

### **Paper – II: MPHIL02A (Optional) Nonparametric Inference :**

After studying this course, the candidate will understand:

- Preliminaries of non-parametric inference.
- U-statistics and its applications
- Various non-parametric for different types of problems.
- Measure of performance of tests.

Introduction to nonparametric Inference. Empirical Distribution Function, Glivenko Cantell theorems. Kolmogorov Goodness of fit test, Cramer Von-Mises test and Anderson – Darling test.

One sample U – Statistics, Kernel and Symmetric Kernel, two – sample U – Statistics, Asymptotic Distribution of U-Statistics, UMVUE property of U-Statistics, Asymptotic Distribution of linear function of order statistics.

Exchangeable almost surely distinct random variables and their rank vector. Joint and marginal distribution of ranks. Rank tests, locally most powerful rank test, linear rank statistics and their distributional properties under the null hypothesis.

One sample location problem, sign test, Wilcoxon signed rank test, two sample Kolmogorov – Smirnov tests. Two sample location and scale problems, Wilcoxon - Mann – Whitney test, normal score test, median test.

Pitman's Asymptotic Relative Efficiency (ARE). ARE of various tests based on linear rank statistics.

Kruskal – Wallis K – sample test. Jonkheere – Terpestra test, Friedman's test and Pages test.

5. Hettmansperger T. P. (1984) Statistical Inference Based on Ranks, John Wiley and Sons.

### **Paper – II: MPHIL8602B (Optional) Stochastic Models in Epidemiology:**

After studying this course, the candidate will be able to:

- Formulate of the model of epidemics.
- Learn stochastic control measures.
- Learn various simulation techniques.
- Estimate basic reproduction rates.

### **Unit – 1 : Introduction to Stochastic Dynamics and Stochastic Process :**

Stochastic Dynamics, Stochastic Control : Covariance Control, PDF Control, Time Delayed Systems, FPK based Design, Optional Control.

Stochastic process : Definitions, Expectations, Vector process, Gaussian process; Stationary process; Scalar process, Vector process, Correlation Length ; Poisson process ; Compound Poisson process ; Markov process.

12 hrs

**Unit – 2 : Stochastic Calculus :**

Modes of convergence ; Stochastic Differentiation ; Statistical Properties of derivative process ; Stochastic Integration ; Statistical properties of Stochastic Integrals.

08 hrs

**Unit – 3 Monte Carlo Simulation :**

Introduction to Monte Carlo Simulation

Random to Monte Carlo Simulation; Linear Congruential methods, Transformation of uniform random numbers, Gaussian random numbers, Vector of random numbers.

Random Process; Gaussian white noise. Stochastic Differential Equation; Second order equations, State equation, Range-Kutta algorithm

10 hrs

**Unit – 4: Introduction to Mathematical Epidemiology**

History of Mathematical Epidemiology, Types of Epidemic models, Statistical significance of the infectious disease modelling.

05 hrs

**Unit – 5 : Formulation of Epidemic Models and Parameterization**

Introduction of Epidemic Model, Formulation of deterministic SIR model. The SIR model without demography, The Threshold phenomenon, Epidemic burnout, The SIR model with Demography, The equilibrium state, Stability properties, Oscillatory Dynamics, Mean age at infection, Infection induced mortality and SI models, Mortality throughout infection, density dependent transmission, Frequency dependent transmission, Mortality late in infection Fatal infection, Without immunity the SIS model, waning Immunity The SIRS Model, Addition of latent period. The SEIR model, Discrete time models.

Parameterization, Estimation of Basic Reproduction number, Instantaneous reproduction number from reported case and surveillance data.

15 hrs

Total = 50 hrs

### **Paper – III : MPHIL8602C (Optional) Reliability Theory:**

#### **Course Outcomes:**

The candidate after completion of this course will be able to:

- Learn various failure models.
- Learn different life time distributions.
- Analyze and assess reliabilities of various systems.
- Know estimation procedures.

Reliability, Availability, Models of failure, IFR, IFRA, NBU, NBUE, DMRL, classes of life distributions. Their properties. Dual classes of these classes and their properties. Properties of Exponential, Gamma, Weibull, Lognormal, Pareto, Truncated normal, Linear Failure rate, Makeham, Binomial families of life distributions.

Partial Ordering : Convex and Star-shaped orderings.

System Reliability: Coherent system, Series parallel, k-out-of-n, Standby systems. Application to uniform and exponential life distributions.

Replacement Policies; Ordinary, age and block replacement policies, their comparisons.

Reliability Models; Repair models, stress strength models, shock models, proportional hazard models, competing risks models.

Reliability Estimation; MLE, UMVUE, Bayes estimators of reliability. Non parametric estimation of reliability. Type I, II censoring, accelerated life testing.

Testing Reliability Hypotheses: Parametric and Non parametric tests for mean life and Reliability Hypotheses.

50 hrs

**KARNATAK UNIVERSITY, DHARWAD**  
**DEPARTMENT OF STUDIES IN STATISTICS**  
**SYLLABUS FOR**  
**PH. D. COURSE WORK**

**Program Outcomes:**

The candidate will be prepared to

1. Find a specific problem to take up research.
2. Study previous research problems related to his/her area.
3. Write research papers and communicate the same for publication.
4. Organize and write thesis.

**Program Specific outcomes:**

Candidate will be

1. Eligible to take up teaching and research.
2. Confident to work in private sectors.
3. Prepared to be a lifelong learner.
4. An asset to the society.

**COURSE - I / PAPER - I**  
**PH8601: RESEARCH METHODOLOGY**

**Course Objectives:**

To equip the students with necessary statistical theory to undertake research in any area of statistics

**Course Outcomes:**

After studying this course, the candidate acquires knowledge of:

- How to select the problem, carryout review of literature, abstract and thesis writing.
- Finite sampling to collect data and some statistical software.
- Various distributions, estimation methods and test procedures, and their applications.

**Unit – I**

Concepts of Research: Review of literature, Problem selection, Reference work, writing abstract, Identifying key words, Thesis writing.

Sources of data, collection of data and data analysis with statistical softwares. Concepts of sampling: Stratified sampling, cluster sampling, multi – stage sampling. Randomized response techniques. 12hrs

**Unit – II**

Univariate distributions- Uniform, exponential, gamma, Weibull, logistic, extreme value, lognormal distributions. Distributions of order statistics from these distributions. Bivariate distributions- Exponential and normal, Multivariate normal distribution

Sampling Distributions: Central and Non – Central Chi – Square, t and F Distributions. 12 hrs

**Unit – III**

Consistency, unbiasedness, sufficiency and efficiency of estimators, completeness property, moment estimators, maximum likelihood estimators and their properties.

Shortest expected length, large sample and unbiased confidence intervals. Bayesian and fiducial intervals. 12 hrs

**Unit – IV**

NP lemma, MP test, MLR property, UMP, UMPU,  $\alpha$  similar tests and tests with Neyman structure, LMP and UMP Invariant tests.

Wilcoxon signed rank test, Wilcoxon rank-sum test, Noether's Theorem and Pitman ARE.

12 hrs

**COURSE - II / PAPER - II**

**PH8602: COGNATE /CORE SUBJECT: STATISTICS**

**Course Objectives:**

To equip the students with probability concepts, stochastic process with their properties, aspects of multivariate analysis and linear models which are useful in modeling and analysis.

**Course Outcomes:**

In this Course the candidate will learn

- Various probability concepts.
- Various aspects of stochastic processes.
- Multivariate techniques and concepts of linear models.

**Unit – I**

Concepts of probability: Modes of convergence; characteristic functions, laws of large numbers, central limit theorem. Martingales.

12hrs

**Unit – II**

Finite and countable state Markov chains (MC), Chapman – Kolmogorov's equations, calculation of n-step transition probabilities and their limits, stationary distribution, classification of states.

Continuous time Markov processes: Kolmogorov-Feller differential equations, Poisson process, birth and death processes, Weiner process.

12 hrs

### **Unit – III**

Principal component analysis (PCA), Factor analysis (FA), Canonical correlation analysis (CCA), Discriminant analysis and Cluster analysis. 12 hrs

### **Unit – IV**

Gauss-Markov theorem, estimability of linear parametric functions, error and estimation spaces, application of Gauss-Markov setup to one- way, two-way (with one observation per cell and with interaction). Testing of general linear hypothesis.

12 hrs

**COURSE - III / PAPER - III**  
**AREA OF RESEARCH**  
**PH8603A: RELIABILITY THEORY**

**Course Objectives:**

To know various reliability models, to assess reliabilities of these models and explore the applications of reliability models.

**Course Outcomes:**

The candidate after completion of this course will be able to:

Analyze and assess reliabilities of various systems. Can explore new applications of existing tools.

**Unit-I**

Reliability, availability, modes of failure, IFR, IFRA, NBU, NBUE, DMRL, classes of life distributions. Dual classes of these classes. Properties of Exponential, Gamma, Weibull, Lognormal, Pareto, Truncated normal, Linear failure rate, Makeham, Binomial families of life distributions. Bivariate life distributions. 12 hrs

**Unit-II**

Structure functions, minimal path and minimal cut sets, reliability of systems of independent components, bounds on reliability functions – methods of inclusion and exclusion. System life as a function of component lives, expected system lifetime, upper bound on expected life of parallel System. Series models, repair models, stress strength models, shock models, proportional hazards models, competing risks models. 12 hrs

**Unit-III**

Truncation, convolution and mixture of life distributions. Poisson process, inter-arrival and waiting time distributions, conditional distribution of arrival times, estimating software reliability, non-homogeneous Poisson process, compound Poisson process, conditional and mixed Poisson process.

Simulation techniques for continuous random variables, discrete random variables, stochastic processes, non-homogeneous Poisson process, two dimensional Poisson processes. 12 hrs

#### **Unit-IV**

Reliability estimation: life testing experiments, Type I, II censoring, progressive censoring, accelerated life testing. MLE, UMVUE, Bayes estimators of reliability, non parametric estimation of reliability.

Testing Reliability Hypotheses: Parametric & Non parametric tests for mean life and Reliability Hypotheses. 12 hrs

### **PH8603B: SURVIVAL MODELS**

#### **Course Objectives:**

To equip students with materials and techniques developed in several applied disciplines: vital statistics, epidemiology, demography, actuarial science, reliability theory, survival analysis, statistical methods, among others.

#### **Course Outcomes:**

After studying the course, students will have the knowledge of modeling survival data, its analysis and know its applications in different fields.

#### **Unit-I**

Survival Data: Sources of data, types of variables, exposure to risk, collection of survival data.

Ratios and Proportions: Rates of continuous processes - absolute rate, relative rate, average (central) rate, rates for repetitive events.

Mortality Measures: Concept of population exposed to risk, crude death rate, age specific death rates, cause specific mortality, standardized mortality ratio (SMR) - indirect standardization, direct standardization. Evaluation of person-years of exposed to risk in long-term studies.

Disease Risk and Ratio: Prevalence and incidence of a disease, association between disease and risk factor, relative risk and odds ratio. 12 hrs

## Unit-II

Life Table: Basic definition and notations, force of mortality, mathematical relationships among life table functions, central death rates, interpolation for life table functions, approximate relationships between  ${}_nq_x$  and  ${}_nm_x$ , expected fraction of the last  $n$  years of life, exponential approximation, approximations to  $\mu_x$ .

Concepts of Stationary and Stable Populations: Stationary population, stable population.

Construction of Life Tables: Construction of an abridged life table from mortality experience of a current population, estimation of  ${}_nm_x$ ,  ${}_nf_x$ ,  ${}_nq_x$ , evaluation of the life table functions, construction of a complete life table from an abridged life table, selection, select life tables, construction of select tables. 12 hrs

## Unit-III

Survival Distribution Functions: Hazard function (force of mortality), conditional probabilities of death (failure), central rate, truncated distributions, expectation and variance of future lifetime, median of future lifetime, transformations of random variables, location-scale families of distributions, some survival distributions, some models of failure, series and parallel systems.

Empirical Survival Function: Estimation of survival function from grouped mortality data, joint distribution of the numbers of deaths, Greenwood's formula for the (conditional) variance of survival function, estimation of curve of deaths, estimation of central death rate and force of mortality. 12 hrs

## Unit-IV

Theory of Competing Causes: Causes of death, basic assumptions, "Times Due to Die", overall and crude survival functions, crude and net hazard rates, crude probability distribution for cause, equivalence and non-identifiability theorems in competing risks, equivalent models of survival distribution, proportional hazard rates, heterogeneous populations: mixture of survival functions.

Multiple Decrement Life Tables (MDLT): Definitions of MDLT functions, relationships among functions of MDLT, crude forces of mortality, construction of MDLT from population (cross-sectional) mortality data, evaluation of  ${}_naq_x$  and  ${}_naq_{ax}$ .

Simulation techniques for continuous random variables, discrete random variables, stochastic processes, non-homogeneous Poisson process, two dimensional Poisson processes.

12 hrs

**PH8603C: INFERENCE PROCEDURES AND APPLICATIONS**

**Course objectives:**

To enable students with different tools in Bayesian inference, nonparametric inference, regression analysis and statistical quality control.

**Course Outcomes:**

In this course the candidate learns:

- Use of prior information to solve problems using Bayesian approach.
- Various concepts and procedures of nonparametric inference.
- Order statistics and their applications.
- Concepts and applications of regression analysis.
- Basics of statistical quality control.
- Various control charts for monitoring process characteristics.

**Unit – I**

Preliminaries of Bayes' principle, Types of loss functions, various priors, Bayes estimators under different loss functions, Bayesian interval estimation, Evaluation of estimate in terms of Bayes'

risk, Prior odds, posterior odds, Bayes factor, Bayesian calculations, MCMC methods and other computer simulation methods. 12 hrs

### **Unit – II**

Order statistics – distribution theory, Moments of order statistics, Recurrence relations between moments of order statistics, Probability integral transformation, Equal in distribution technique, Distribution – free statistics over a class, Counting statistics, Ranking statistics, Statistics utilizing counting and ranking. U – Statistics and its limiting distribution, Linear rank statistics, distributional properties, asymptotic normality under the null hypothesis. Tests for one and two – sample location and scale problems, Pitman ARE. 12 hrs

### **Unit – III**

Simple linear regression model, Least square estimation, hypothesis testing on slope and intercept, multiple regression model, Estimation of model parameters, Polynomial regression in one variable, nonparametric regression, kernel density estimator, robust regression, M-estimators, properties of robust estimators. 12 hrs

### **Unit – IV**

Basics of statistical process control. Parametric, nonparametric and Bayesian control charts for process average and process variance, Synthetic control charts, use of sequential runs in constructing control charts, CUSUM charts, ARL, ATS, and measures of process capability ratio. 12 hrs

### **References:**

## **PH8603D : APPLIED STOCHASTIC MODELS**

### **Objectives of the Course:**

Objectives of the course is study the stochastic models and their developments.

### **Course Outcomes:**

The course gives

- comprehensive knowledge about various stochastic population growth models.
- ability to understand research problems in stochastic demography.
- knowledge on some basic epidemic and competitive risks models.
- idea of stochastic optimal control, stochastic mortality models.
- ability of formation of research problems in their area of research.

### **Unit – I: Stochastic Population Models**

Poisson process, birth and death process and Chiang's illness death process Deterministic and stochastic population growth model, deterministic and stochastic logistic growth models , deterministic and stochastic generalized logistic growth models, deterministic and stochastic gompertz growth models, deterministic and stochastic negative exponential growth models, deterministic and stochastic linear growth models.

Waiting Times and Their Statistical Estimation: General Waiting Time, Childbearing as a Repeatable Event, Poisson Process Model of Childbearing, Effect of Parity on Pure Period Measures, Multiple Births and Effect of Pregnancy on Exposure Time, Poisson Character of Demographic Events and Simulation of Waiting Times and Counts. Singh's waiting time distribution on the first birth and modification to the Singh's model. 12 hrs

### **Unit – II: Competing Risks and Life Tables**

Measurement of competing risks and their inter-relationships. Independent and dependent risks, analysis of censored data: type – I and type – II censoring, progressive censoring.

Mortality in a cohort with competing risks of death, models of competing risks based on latent life spans, simple parametric models of competing risks, equivalent models of competing risks, eliminating causes of death and nonidentifiability.

Estimating a multiple decrement life table from period data, estimating single decrement life tables from multiple decrement life tables. 12 hrs

### **Unit – III: Stochastic Models with Optimal Control Theory**

Stochastic Integration: The Itô Integral and One-Dimensional Itô Formula. Brownian Motion, Standard Brownian Motion, BM as a Markov Process, Constructing BM, BM Constructed from  $N(0, 1)$  Random Variables, BM as the Limit of Symmetric Random Walks and White Noise Process.

Continuous time maximum principle: model, constraints, objective function and optimal control problem. Dynamic programming: HJB equation, adjoint equation and economic interpretation.

Discrete time maximum principle. Models of optimal economic growth and stochastic optimal control of consumption-investment problem. Deterministic and stochastic epidemic models (SI and SIR), model of optimal epidemic control and solution by Green's theorem.

12 hrs

### **Unit – IV: Stochastic mortality models and estimation**

Mortality models: Lee-Carter model, Lee-Carter model under a Poisson setting, Lee-Carter with cohort effects, age-period-cohort (APC) model, general APC model, model fitting and goodness of fit. Forecasting and simulation with stochastic mortality models

Estimation: Bayesian and Markov Chain Monte Carlo methods, Bayesian computations, Monte – Carlo simulation. Gibbs sampler, Metropolis – Hastings algorithm and hybrid approach.

12 hrs

## **PH8603E: EPIDEMIC MODELS AND STOCHASTIC MODELLING OF EPIDEMICS**

### **Objectives of the Course:**

The purpose of the course is to get detailed knowledge of various epidemic models and their deterministic and stochastic formulations, solutions and estimation.

### **Outcome of the course are:**

- learn different forms of epidemic models.
- acquire the knowledge of age-structured epidemics
- able to develop the epidemic models for vector-borne diseases
- learn discrete and continuous markov chain epidemic models
- develop the knowledge of deriving solutions for models of epidemic and endemic diseases.

### **Unit I: Epidemic Modelling**

the early Kermack–Mckendrick model: basic model, threshold theorem and the final size equation. Applications- transmission by environmental contamination, virus dynamics, asymptomatic transmission model

Infection-age-dependent model: linear invasion phase and  $r_0$ , asymptotic behavior, the intensity of epidemic and its lower bound, pandemic threshold theorem, the initial value problem, the final size equation of the limiting epidemic, traveling wave solutions, endemic threshold phenomena.

The SIS model without demography, the SIR model with demography, vaccination and reinfection model. vector-transmitted diseases, basic model and invasion threshold, backward bifurcation of endemic steady states.

Some aspects of epidemiology in temporal and spatiotemporal domains.

12 hrs

### **Unit II: Age-Structured Epidemic Models**

The SIR epidemic model with age structure, epidemic in a demographic steady state, horizontal transmission and its  $R_0$ , local stability of endemic steady state, epidemic in a stable population, threshold condition for invasion and endemicity, local stability of steady states, threshold principle and  $R_0$ , horizontal transmission, vertical transmission, threshold number in the normalized system, endemic threshold condition, infection-age dependency, the basic reproduction number and integral equation approach. Numerical methods for age-structured models: numerical method for the Mckendrick–Von Foerster model, numerical method for the age-structured sir model.

12 hrs

### **Unit III: Models in Vector-Borne Diseases**

The vectors, the pathogen, epidemiology of vector-borne diseases, simple models of vector-borne diseases, deriving a model of vector-borne disease, reproduction numbers, equilibria, and their stability. Delay-differential equation models of vector-borne diseases: reducing the delay model to a single equation, oscillations in delay-differential equations, the reproduction number of the model with two delays and a vector-borne disease model with temporary immunity.

12 hrs

### **Unit IV: Stochastic Epidemic Models**

Formulation of stochastic SIS and SIR epidemic models, numerical examples and properties of stochastic SIS and SIR epidemic models. probability of an outbreak, quasistationary probability distribution, final size of an epidemic, expected duration of an epidemic. Epidemic models with variable population size and numerical example. Other types of DTMC epidemic models, chain binomial epidemic models and epidemic branching processes.

Time series models: time domain: ACF and ARMA, frequency domain and wavelets. time series SIR model (TSIR): Stochastic variability, estimating parameters in dynamic models, estimation using the TSIR.

12 hrs

## **PH8603F: STOCHASTIC METHODS IN ACTUARIAL SCIENCE AND SPATIAL ECONOMETRICS**

### **Objectives of the Course:**

Objective of the course is to acquire the detail knowledge of various stochastic methods in actuarial science and spatial econometrics.

### **Course Outcomes:**

Outcomes the course includes

- detailed information about risks models and ruin theory.
- ability to understand competing risks models and formulation in research problems.
- basic knowledge on spatial econometrics.
- learning of spatial econometric models and their estimation.
- acquire knowledge of proposing research problems in their area of research.

### **Unit -I : Risk Models and Ruin Theory**

On the distribution of surplus immediately after ruin under interest force, the risk model, on the distribution of surplus immediately before ruin under interest force, exponential claim size. Lundberg bound, asymptotic estimates of the low and upper bounds for the distribution of the surplus immediately after ruin under sub-exponential claims.

On the ruin probability under a class of risk processes - the risk model, the laplace transform of the ruin probability with finite time. 12 hrs

### **Unit -II: Compound Risk Models and Copula Decomposition**

Individual risk model and compound risk model: the link between the compound risk model and the individual risk model, one theorem on excess-of-loss reinsurance, recursive calculation of compound distributions, one-dimensional recursive equations and bivariate recursive equations.

The compound Poisson random variable's approximation to the individual risk model: the existence of the optimal Poisson random variable, the joint distribution and evaluating the approximation error, the approximation to functions of the total loss, the uniqueness of the Poisson parameter.

Bi-variate copula decomposition: copula decomposition and application of the copula decomposition. 12 hrs

### **Unit -III: Spatial Econometrics**

Characteristics of spatial data: spatial autocorrelation and spatial heterogeneity, the classical linear regression model and violation of typical assumptions, endogeneity, spatial autocorrelation of error term and heteroskedastic variance. The generalized linear model, the additive model, the basics of Bayesian statistics, Bayes' theorem, the markov chain monte carlo method, bayesian estimation of the classical linear regression model

Spatial weight matrix : specification of the spatial weight matrix, standardization of the spatial weight matrix.

Testing for global spatial autocorrelation, local spatial autocorrelation and spatial heterogeneity.

12 hrs

### **Unit -IV: Spatial econometric models**

Spatial lag model and spatial error model, spatial durbin model and generalized spatial model, impact measures, models for spatial heterogeneity: varying coefficient models in space, parameter estimation of the spatial econometric models: ordinary least squares method, maximum likelihood method, bayesian method, conditional autoregressive model, spatial discrete choice models, spatial panel models. spatiotemporal autoregressive model.

Geographically weighted regression models. extended geographically weighted regression models, fast geographically weighted regression modelling and fast eigenvector spatial filtering modelling.

12 hrs

## **PH8603G: EXTREME VALUE THEORY**

### **Objectives of the Course:**

The candidates will have

- an introduction to the basics of modern extreme value theory and extreme value statistics.

- different methods of estimation including graphical methods of tail index.
- ability to model extremes in the various fields such as insurance, finances, meteorology, hydrology etc.

### **Course Outcomes:**

Candidate will have

- Knowledge of order statistics
- Knowledge of extreme value theory for applying various fields such as insurance, finance, hydrology, meteorology etc.

Knowledge of estimation techniques for estimating parameters of extreme value models.

### **Unit-I: Order Statistics**

Introduction, Joint distribution of order statistics, Marginal distribution of a single order statistics, Joint distribution of two order statistics, Distribution of range and other measures, Conditional distributions of order statistics. 12 hrs

### **Unit- II: Univariate Extreme Value Theory**

Fluctuations of univariate maxima, Fluctuations of univariate upper order statistics, Some statistical models for univariate maxima, Limit distributions and domain of attraction. Limit distributions for the maximum ( Frechet, Weibull, and Gumbel), Generalized Extreme Value (GEV ) distributions. 14 hrs

### **Unit- III : Statistical Methods for Extremal Events;**

Introduction, exploratory data analysis for extremes, Probability and quantile plots, The mean excess function, The Gumbel's method of exceedences, The return period, The parameter estimation of GEV Distribution; maximum likelihood estimation, Tail and quantile estimation. 14 hrs

### **Unit -IV : Applications of Extreme Value Theory:**

Applications of extreme value theory in Insurance, Finance, Meteorology and Hydrology.

8 hrs

### **PH8603H: TECHNICAL DEMOGRAPHY**

#### **Course Objectives:**

The purpose of this course is to provide advance knowledge in the area of Fertility and Mortality, Urbanization, Migration and estimation & projection of these concepts. Students will get acquitted with new and advanced method of Demographic characteristics. An emphasis is also given on existing theories and their critical review.

#### **Course Outcomes:**

On completion of this course the student is able handle research problems on Fertility, Mortality, Migration and Urbanization and also students are trained to different method of Estimation and Forecasting.

#### **Unit I : Population Dynamics**

Definitions and concepts used in demography-rates ratios population growth population structure and composition. Population pyramid, Sources of Demographic data in India. Census, Sample registration System (SRS), Sample surveys, Vital registration, Fertility Surveys, National Family Health Surveys, Trends in Fertility, Mortality, Migration and Urbanization in India, Demographic Transition Policy Implications. 6 hrs

#### **Unit II: Indirect Estimation of Fertility, Mortality and Life Table**

Coale's fertility indices; Coale's-Trussel model of natural fertility; Singulate Mean Age at Marriage (SMAM), Parturition / Fertility (P/F) Method to estimate fertility; Decomposition of fertility; Age-pattern of Fertility, Estimating fertility through Parity Progression Ratio (PPRs), Calculation of Bongaarts' Indices, Rele's method of estimating fertility, Reverse survival method of estimating fertility. **Estimation of Mortality** – Estimation of infant and Child mortality from information on children ever born and children surviving (Brass, Sullivan, Trussel and Pathak). Estimation of Adult Survivorship probabilities from information on Orphanhood and

widowhood, estimation of adult mortality using successive census age distribution. **Life Table - Concepts, Assumptions, Construction of Life tables- Complete and Abridged -Various types – Force of Mortality, Uses of Life Tables. Single Decrement Associated Life tables, Multiple Decrement Life table – Multi State Life table, Applications Nuptiality Tables, Contraceptive Effectiveness. Working Life Tables.** 18 hrs

### **Unit III : Migration and Urbanization**

Introduction and Concepts, Measures of urbanization Level trend of Urbanization, problems associated with policies and programme affecting urbanization, Migration, Measures of Urbanization : Degree, Tempo and Concentration, Population and Distribution. Centrality and Hierarchy. Basic concepts, definitions, types of migration – Internal and International migration, Theories of Migration, Indirect method of estimating the Migration : Growth Rate method, Vital Statistics method, Life table and Census survival methods. 12 hrs

### **Unit IV : Population Estimation and Projections :**

Methods of Population estimation and Projection – Mathematical and Cohort Component methods, Assumptions, on fertility, Mortality and Migration, Sub-National Population Projections – Various Methods, Urban Rural Growth Difference (URGD), Auto Regressive Integrated Moving Average (ARIMA) model, probabilistic projection model – Bayesian hierarchical model, Projection based on Artificial Neural Network and Fuzzy logic. Test for accuracy – Akaike's Information Criteria (AIC), Bayesian Information Criterion (BIC), Mean Absolute percentage error and Mean Algebraic Percentage Error. 12 hrs

### **PH8603I: STOCHASTIC MODELING AND OPTIMAL CONTROL**

#### **Course Objectives:**

The main objective of the course is to

- Critically read and analyze research articles featuring mathematical modeling-based epidemiological studies.
- Understand the concepts of Brownian motion and white noise.
- Manipulate and solve simple SDEs and understand the relationship between SDEs and PDEs.
- Demonstrates knowledge about the more complex simulation skills used for mathematical modelling in epidemiology.

#### **Course Outcomes:**

At the end of the course, the scholars should be able to:

- Describe the philosophy of model-building and the relationships between modeling and other forms of scientific investigation.

- Describe the defining features of infectious diseases, including incubation and latent periods, virulence, communicability, the “basic reproductive number”, serial intervals, and concepts relevant to immunity.
- Provide the general ideas for constructing and analyzing stochastic models of epidemic spread and control.
- Interpret models outputs as information that help guide public health decision making.

### **Unit – I: Introduction to Stochastic Models and Stochastic Differential Equations**

The basic theory and applications of stochastic models. Specification of Stochastic Processes. Markov chains: Classification of states and chains. Markov processes with discrete state space: Poisson process, Compound Poisson process, Renewal process. Branching processes. Markov processes with continuous state space: Wiener process, Ornstein-Uhlenbeck process. Ito Integrals, Stochastic Integrals and the Ito Formula, Stochastic Differential Equations, Existence and uniqueness theorem for stochastic differential equations, Weak and strong solutions.

18 hrs

### **Unit – II: Optimal Control Theory**

Controllability, bang-bang principle, Linear time-optimal control, The Pontryagin Maximum Principle, Dynamic programming. Introduction to stochastic control theory, Optimal Control of Stochastic Partial Differential Equations: The Hamilton-Jacobi-Bellman (HJB) equation.

10 hrs

### **Unit -III: Stochastic Analysis of Epidemic models**

History of Mathematical Epidemiology, Types of Epidemic models, Statistical significance of the infectious disease modeling. Formulation and analysis of deterministic epidemic models. Formulation and analysis of stochastic epidemic models.

10 hrs

### **Unit – IV: Simulation**

Introduction to Monte Carlo Simulation, Markov Chain Monte Carlo Simulation, Gibbs sampler, Metropolis – Hastings algorithm. Bayesian computations through Markov Chain Monte Carlo Simulation.

10 hrs

| <b>Unit 1:</b> Swami Vivekananda as a spiritual leader: nature of spirituality, concept of Moksha, Dharma, God, Soul, World, means to: Karma, Jnana, Bhakti and Raja Yoga.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 12 Hours                        |
| <b>Unit 2:</b> Swami Vivekananda's Message to youth: "What you think that you will be", self-confidence, self-respect, "strength is life", "weakness is death", aims and means, "man is maker of his destiny", "work for work sake".                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 12 Hours                        |
| <b>Unit 3:</b> Swami Vivekananda's views on National integration, serve man as God, love your nation, renunciation, unity in diversity, faith and strength. Organised struggle for liberation. Universal Religion, Character building.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 12 Hours                        |
| <b>Unit 4:</b> Swami Vivekananda and Modern Problems: crime and public morality, family breakdown, healthcare, environmental pollution and denigration, male dominance and woman's status, lack of religious identity,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 12 Hours                        |
| <b>Unit 5:</b> Swami Vivekananda's thoughts about Education: Concept of education, aim of education, Methods of teaching learning, the qualities of a student, the qualities of a teacher, curriculum, mass education, Women education.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 12 Hours                        |
| <b>REFERENCES</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                 |

# **KARNATAK UNIVERSITY, DHARWAD**

**A** Grade  
NAAC Accredited 2014

## **Regulations and Syllabus for PG Department of Studies in URDU AND PERSIAN**

**( I to IV Semester )**

**Under Choice Based Credit System**

**From 2018-19 & onwards**

# KARNATAK UNIVERSITY, DHARWAD

## Arts Faculty of CBCS Regulations

With effect from the academic year 2018-19

### 1.0 Title

These Regulations shall be called "Regulations Governing the Post-Graduate Programmes in the Faculty of Arts under the Choice Based Credit System" in Karnatak University, Dharwad.

### 2.0. Commencement

These Regulations shall come into force with effect from the academic year 2014-15.

### 3.0. Definitions

- a** In these Regulations, unless otherwise provided:  
"Academic Council" means Academic Council of the University constituted according to the *Karnataka State Universities Act, 2000*.
- b** "Board of Studies" means P.G. Board of Studies of the University, Adhoc/ Combined and Steering Committees of International Diploma Programmes in the discipline/subjects concerned.
- c** "Compulsory Course" means fundamental course, which the student admitted to a particular Post-Graduate Programme, should successfully complete to receive the Post Graduate Degree in the concerned subject.
- d** "Course Weightage" means number of credits assigned to a particular course.
- e** "Credit" means the unit by which the course work is measured. One Credit means one hour of teaching work or two hours of practical work per week. As regards the marks for the courses, 1 Credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks.
- f** "Cumulative Grade Point Average (CGPA)" refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward from first semester to subsequent semesters.
- g** "Degree" means Post-Graduate Degree.
- h** "Grade" is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each course by the candidate in both Internal Assessment and Semester-end Examinations.
- i** "Grade Point Average (GPA)" refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester.
- j** "Open Elective Course" means a course offered by a Department to the students of other Departments.

- k** "Post Graduate Programme" means semesterised Master's Degree Programmes in the Faculty of Arts under CBCS excluding P.G. Diploma, Post Graduate International Diploma.
- l** "Specialization course" means advanced course offered by a Department that a student of that Department can opt as a special course.
- m** "Student" means the student admitted to programmes under (k).
- n** "University" means Karnatak University, Dharwad.

#### **4.0. Minimum Eligibility for Admission**

A candidate, who has successfully completed Bachelor's Degree programme or any other Degree programme of this University or of any other University recognized as equivalent thereto by this University, shall be eligible for admission to the Post Graduate Programmes provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the University from time to time.

Admissions shall be as per Government of Karnataka reservation policy and the directions issued in this regard from time to time.

#### **5.0. Duration of the Programme**

The duration of study for all the Post-Graduate Degree programmes shall extend over a period of two consecutive academic years, each academic year comprising two semesters, and each semester comprising sixteen weeks with 90 working days.

However, the students, who discontinue the programme after one or more semesters due to extraordinary circumstances, are allowed to continue and complete the programme with due approval from the Registrar. Candidates shall not register for any other regular course other than Diploma and Certificate courses being offered on the campus during the duration of P.G. Programme.

#### **6.0. Medium of Instruction and Evaluation.**

The medium of instruction for all programmes except languages shall be English. However, the students may write the examinations in Kannada if so provided by the concerned Board of Studies.

#### **7.0 Programme Structure**

- 7.1** The students of Post-Graduate Programme shall study the courses as may be approved by the concerned Board of Studies, Faculty and the Academic Council of the University from time to time subject to minimum and maximum credits as outlined in these regulations.
- 7.2** There shall be three categories of courses namely, Compulsory Courses, Specialization Courses and Open Elective Courses.
- 7.3** Each programme shall have a set of Compulsory Courses, as stipulated in the regulations governing the concerned programme, that a student must complete to get the concerned degree.
- 7.4** In those programmes that offer specialization courses, the students shall choose the prescribed number of Specialization Courses offered within the

Department.

- 7.5** Each Department shall offer Open Elective courses for students of other Departments. The students of a Department shall choose Open Elective courses from among those prescribed by the University from time to time. P.G. Centers and affiliated colleges can offer those Open Elective Courses which are approved or prescribed by their Parent Department of the University. Such Open Elective courses shall be taught by qualified teachers approved by the University.
- 7.6** The credits for each of the Compulsory Courses may vary from 2 to 4; for Specialization Course 4; and for Open Elective Course, from 1 to 4. Wherever practical component/ project work/ field work/ dissertation/ orals is involved in the course, the total credits may extend to 6 or as otherwise provided.
- 7.7** A student shall register for a minimum of 72 credits during the whole duration of PG Programme.
- 7.8** The students shall undertake project/extension/field work/dissertation/ during the programme as a compulsory course or in lieu of Specialization Course or Open Elective Course if so specified by the concerned Board of Studies.
- 7.9** The ratio between Compulsory, Specialization and Open Elective may differ from department to department.
- 7.10** The detailed programme structure for Faculty of Arts shall be as prescribed and shown below:

| Semester                 | No. of Compulsory courses (credit per course) | Total no. of credits of compulsory courses | Specialisation Courses (credit per course) | Total no. of credits for Specialisation courses | Open Elective Course (credit per course) | Total no. of credits of Open Elective Course (OEC) | Total no. of credits for the semester |
|--------------------------|-----------------------------------------------|--------------------------------------------|--------------------------------------------|-------------------------------------------------|------------------------------------------|----------------------------------------------------|---------------------------------------|
| Sem. I                   | 03 (04)                                       | 12                                         | 1-3 (4)                                    | 4                                               | 1-3 (2-4)                                | 2-4                                                | 20                                    |
| Sem. II                  | 03 (04)                                       | 12                                         | 1-3 (4)                                    | 4                                               | 1-3 (2-4)                                | 2-4                                                | 16+OEC                                |
| Sem. III                 | 03 (04)                                       | 12                                         | 1-3 (4)                                    | 4                                               | 1-3 (2-4)                                | 2-4                                                | 16+OEC                                |
| Sem. IV                  | 03 (04)                                       | 12                                         | 1-3 (4)                                    | 4                                               | 1-3 (2-4)                                | 2-4                                                | 20                                    |
| For the entire Programme | 12                                            | 48                                         | 4-12 (4)                                   | 16                                              | 4-12 (2-4)                               | 8-16                                               | 64 + 8 (= 72)                         |

- 7.11** The Open Elective Courses shall have oral component if so prescribed by the concerned Board of Studies. The number of students admitted to the course shall be commensurate with the availability of infrastructure.
- 8.0 Attendance**
- 8.1** Each course shall be taken as a unit for the purpose of calculating the attendance.
- 8.2** Each student shall sign the attendance register maintained by the

Department for each course for every hour/unit of teaching/practical. The course teachers shall submit the monthly attendance report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the second week of the subsequent month.

- 8.3** Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.
- 8.4** A student shall be considered to have satisfied the required attendance for each course if he/she has attended not less than 75 % of the total number of instructional hours in that course.
- 8.5** There is no provision for condoning shortage of attendance.
- 8.6** The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission afresh to the given semester.
- 8.7** Such of the candidates who have participated in State/National level Sports, NSS, NCC, Cultural activities and other related activities as stipulated under the existing regulations shall be considered for giving attendance for actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authorities within two weeks after the event.
- 9.0 Examination**
- 9.1.** There shall be an examination at the end of each semester. The odd semester examinations shall be conducted by the respective Departments/ P.G.Centres/ Colleges. The even semester examinations shall be conducted by the University.
- 9.1.1.** There shall be semester-end examination of 3 hours duration for 75 marks; 2 hours for 50 marks, 1.5 hours for 35 marks and 1 hour for 25 marks course.
- 9.1.2** Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application form through the proper channel and shall also pay the fees prescribed.
- 9.1.3** The Office of the Registrar (Evaluation) shall allot the Register Number to the candidate at the 1st semester-end examination. That will be the Register Number of the candidate for all subsequent appearances and semester-end examinations.
- 9.1.4** The Answer scripts shall be in the safe custody of the University for a period of six months from the date of announcement of results. These shall be disposed off after six months.
- 9.1.5** The programme under CBCS is a fully carry-over system. A candidate reappearing for either the odd or even semester examinations shall be permitted to take examinations as and when they are conducted (even semester examination in even semester and odd semester examination in odd semester).
- 9.1.6** Candidates who have failed, remained absent or opted for improvement in any course/ courses shall appear for such course/ courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.

**9.1.7** Candidates who desire to challenge the marks awarded to them, in the even semester-end examinations, may do so by submitting an application along with the prescribed fee to the Registrar (Evaluation) within 15 days from the announcement of results.

## **9.2 Odd Semester Examination**

**9.2.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.

**9.2.2** The BOE shall scrutinise the question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation).

**9.2.3** The office of the Registrar Evaluation shall dispatch the question papers to the Departments/ P.G.Centres/ Colleges who shall conduct the Examinations according to the Schedule announced by the University.

**9.2.4** The Chairperson of the Department/ Administrator of the P.G.Centre/ Principal of the College shall appoint one of their full time course teachers as Post Graduate Programme (PGP) Coordinator who shall conduct the examinations and arrange for evaluation of answer scripts.

**9.2.5** Answer scripts shall be valued by the examiners appointed by the University. However, in those centers where an examiner for a particular course is not available, then the answer scripts of that course shall be dispatched to the office of the Registrar (Evaluation) who shall arrange for valuation of the same.

**9.2.6** There shall be single valuation. The examiner (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on the answer script.

**9.2.7** The Marks List, a copy of the Examination Attendance Sheet and the sealed bundles of the answer scripts shall be dispatched by the PGP Coordinator to the Registrar's (Evaluation) Office at the conclusion of the valuation at the respective centres.

**9.2.8** The Office of the Registrar Evaluation shall process and announce the results.

## **9.3 Even Semester**

**9.3.1** There shall be a Board of Examiners to set, scrutinise and approve question papers.

**9.3.2** As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other Universities/ Research Institutes.

**9.3.3** Each answer script of the semester-end examination (theory and project report/dissertation/practical) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averaged with nearer award of the two evaluations.

Provided that in case the number of answer scripts to be referred to the

third examiner in a course exceeds minimum of 5 or 20% of the total number of scripts, at the even semester-end examinations, such answer scripts shall be valued by the Board of Examiners on the date to be notified by the Chairperson of the Board of Examiners and the marks awarded by the Board shall be final.

**9.3.4** Wherever dissertation/ project work is prescribed in the even semesters of a programme, the same shall be evaluated by both internal and external examiners. The evaluation shall be as prescribed by the concerned Board of Studies.

**9.3.5** In case of programmes with oral examination, details of maximum marks, credits or duration may vary from Department to Department as specified by the concerned Board of Studies.

#### **9.4. Evaluation**

**9.4.1** Each Course shall have two evaluation components - Internal Assessment (IA) and the Semester End Exams.

**9.4.2** The IA component in a course shall carry 25/25/15 marks and the Semester End Examination shall carry 75/50/35 marks respectively, as the case may be. Courses having 25 marks and 15 marks as IA component shall have a maximum of 3 marks allotted for attendance. However, in case of project work, the distribution marks for internal assessment and examination shall be left to discretion of the concerned BOS.

**9.4.3** Marks for attendance shall be awarded to the students according to the following table. For courses carrying 25 / 15 of marks for IA, the attendance marks shall be:

| Attendance (in percentage) | Marks    |
|----------------------------|----------|
| Above 90                   | 3        |
| Above 80 and up to 90      | 2        |
| Above 75 and up to 80      | 1        |
| 75                         | No marks |

**9.4.4** Internal Assessment (IA) shall be based on written tests/ assignments/ seminars/orals and /or any other instructional activity as specified in the Faculty Regulations from time to time. However, the number of IA components per course per semester shall not be less than two.

**9.4.5** The IA marks list shall be notified on the Department Notice Board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination, or as directed by the University.

**9.4.6** The tests shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.

**9.4.7** There is no provision for seeking the improvement of Internal Assessment marks.

**9.4.8** The IA records, pertaining to a Semester Examination, shall be preserved by the Departments/ Centres/ Colleges for a period of one year from

the date of the semester Examination. These records may be called by the University or a body constituted by the University as and when deemed necessary.

**9.4.9** The Viva-voce shall be conducted by an internal and external examiner.

**9.4.1** The marks distribution per course shall be as follows:

0

| Max. marks per course | IA marks               |                              |       | Semester-end examination | No. of teaching hours | No. of credits |
|-----------------------|------------------------|------------------------------|-------|--------------------------|-----------------------|----------------|
|                       | Test/Orals/Assignments | Maximum marks for Attendance | Total |                          |                       |                |
| 100                   | 22                     | 3                            | 25    | 75                       | 4                     | 4              |
| 75                    | 22                     | 3                            | 25    | 50                       | 3                     | 3              |
| 50                    | 12                     | 3                            | 15    | 35                       | 2                     | 2              |

#### **10.0. Maximum duration for completion of the Programme**

**10.1** A candidate admitted to a post graduate programme shall complete it within a period, which is double the duration of the programme from the date of admission.

**10.2** Whenever the syllabus is revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabus.

#### **11.0. Declaration of Results**

**11.1** The minimum for a pass in each course shall be 40% of the total marks including both the IA and the semester-end examinations. Further, the candidate shall obtain at least 40% of the marks in the semester-end examination. There is no minimum for the IA marks.

**11.2** Candidates shall secure a minimum of 50% in aggregate in all courses of a programme in each semester to successfully complete the programme.

**11.3** Candidates shall earn the prescribed number of credits for the programme to qualify for the PG Degree.

**11.4** For the purpose of announcing the results, the aggregate of the marks secured by a candidate in all the semester examinations shall be taken into account. However, Ranks shall not be awarded in case the candidate has not successfully completed each of the semesters in first attempt or has not completed the programme in the stipulated time (vide Regulation 5) or had applied for improvement of results.

#### **12.0 Marks, Credit Points, Grade Points, Grades and Grade Point Average**

**12.1** The grade points and the grade letters to candidates in each course shall be awarded as follows:

| Percentage of marks             | Grade Points                     | Grade Letter |
|---------------------------------|----------------------------------|--------------|
| 75 and above, up to 100.00 %    | 7.50 to 10.00                    | A            |
| 60 and above but less than 75 % | 6.00 and above but less than 7.5 | B            |
| 50 and above but less than      | 5.00 and above but less than     | C            |

|                                 |                                    |   |
|---------------------------------|------------------------------------|---|
| 60 %                            | 6.0                                |   |
| 40 and above but less than 50 % | 4.00 and above but less than 05.00 | D |
| less than 40.00 %               | Less than 4.00                     | F |

**12.2** Credit Point (CP): The Credit Point for each course shall be calculated by multiplying the grade point obtained by the credit of the course.

**12.3** The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned by the student in all the courses by the total number of credits of those courses of the semester.

**12.4** The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points in all the semesters by the total number of credits in all the semesters. The CGPA to date shall be calculated by dividing the total number of credit points in all the semesters to date by the total number of credits in all the semesters to date.

CGPA for the I Semester = Sum of the CP of the I Semester  $\div$  Sum of the credits of the I Semester

CGPA for the II Semester = Sum of the CP of the I Sem + Sum of the CP of II Sem.  $\div$  Sum of the credits of the I Semester + II Semester

CGPA for the III and IV Semesters shall be computed accordingly

**12.5** The Grade Card at each semester examination shall indicate the courses opted by the student, the credit for the course chosen by the student, the credit points obtained in each course, the grade letter and the grade point average. No class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade Point Average.

**12.6** Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below:

| Cumulative Grade Point Average (CGPA) | Class to be awarded          |
|---------------------------------------|------------------------------|
| 7.5 to 10.0                           | First class with Distinction |
| 6.0 and above but below 7.5           | First Class                  |
| 5.0 and above but below 6.0           | Second Class                 |

### 13.0 Miscellaneous:

- a Notwithstanding anything contained in these regulations, the semester system at Post-Graduate level is hereby repealed.
- b The provisions of any order, Rules or Regulations in force shall be inapplicable to the extent of its inconsistency with these Regulations.
- c The University shall issue such orders, instructions, procedures and prescribe such format as it may deem fit to implement the provisions of this Regulations.
- d The procedural details may be given by the University from time to time.
- e Any unforeseen problems/ difficulties may be resolved by the Vice Chancellor, whose decision in the matter shall be final.

| Course-I                     |                | 04      | 100       | 52            | 5.20                 | 20.80         |
| Course -II                   |                | 04      | 100       | 65            | 6.50                 | 26.00         |
| *                            |                |         |           |               |                      |               |
| *                            |                |         |           |               |                      |               |
| <b>Open Elective Course</b>  |                |         |           |               |                      |               |
| Course-I                     |                | 02      | 50        | 40            | 8.00                 | 16.00         |
| Course-II                    |                | 02      | 50        | 35            | 7.00                 | 14.00         |
| Total                        |                | 24.00   | 600       | 369           |                      | 147.60        |

GPA for I Semester = Total no. of CP ÷ Total no. of Credits = 147.60 / 24.00 = 6.15

CGPA for I Semester = GPA = 6.15

Calculation of CGPA for II, III and the Final Semester

$$\begin{aligned}
 \text{CGPA for II Sem} &= \frac{\text{CP (ISem)} + \text{CP (II Sem)}}{\text{Credits (ISem)} + \text{Credits (IISem)}} \\
 &= \frac{\text{CP (ISem)} + \text{CP (II Sem)} + \text{CP (III Sem)}}{\text{Credits (ISem)} + \text{Credits (IISem)} + \text{Credits (IIISem)}}
 \end{aligned}$$

CGPA for III Sem = -----

-----

Credits(I Sem) + Credits(II Sem) + Credits(III Sem)

CP (I Sem) + CP(II Sem) + CP(III Sem) + CP (IV Sem)

CGPA for the programme = -----

-----

Credits(I Sem) + Credits(II Sem) + Credits(III Sem) + Credits(IV Sem)

(\*CP: Credit Points)

-----

# **KARNATAK UNIVERSITY, DHARWAD**

**KARNATAK UNIVERSITY, DHARWAD**

**DEPT. OF MASTER OF VISUAL ARTS**

**SYLLABUS FOR**

**MASTER OF VISUAL ARTS IN PAINTING (PG 36/1)**

**I TO IV SEMESTERS**

**UNDER CBCS PROGRAMME**

**WITH EFFECT FROM 2021-22 ONWARDS for 3 Years**

## **Program Outcomes**

1. As Visual Art is the global language, national communication, higher education, technical education, and international relationship. The student will learn these things by the end of the programme.
2. The student will be aware of the fact that Visual Art is the culture of India.
3. He will realize that Visual Art Indian and western common education, more so, imparting of Visual Art skills is essential for defining Indian culture and Art.
4. He will learn that MVA Visual Art has been transforming the education in India. He will have an understanding of such thrust areas like British Art, Indian Art, Criticism, Postcolonial Art and culture studies.
5. He will learn that Visual Art is to be taught using Visual Art. All that will be oriented towards empowering the students for employability.

## **Program Specific Outcomes**

1. Visual Art is taught to run all schools, colleges, and universities. The students will be able to acquire proficiency in Visual Art for employability.
2. Since it is a skill oriented program MVA Visual Art is creating an excellent job market. The students will get the required skills for professionalism.
3. MVA Visual Art graduates are getting jobs in public and private sectors. They are getting into Art Lecturers, Artists, Film Industry, Animation Industry, Art Teachers in Schools, journalism, mass media, information technology and other global markets. The students will be facilitated for doing research, getting teaching jobs and even entering into private sectors.

## **I SEMESTER – M.V.A. in PAINTING**

### **PG36/1 P101 CREATIVE PAINTING ( 300 MARKS )**

#### **Course Outcomes**

**Creative Painting :** The subjects help the students to shape his/her future in the field of Painting Artist, Art Lecturer, Art Director and Story Board Writer in Film Industry, Creative Head, Animation Industry, Media like News Paper, Magazines, Artist, Cartoonist Jobs and so on.

#### **Major**

The Post Graduate program in painting must focus on the building up of Paintings as a personal language. To arrive at this the learning must include the process of arriving at concepts, images, uses of materials etc. This can be done by understanding various other artists from different periods (their times and their art) in art history that is the relevance of the imagery in accordance to the times. The studies can be in drawings, scribbles etc. all motivating the students to understand the process of analyzing Visual Arts in the context of the world that they belong.

This process can begin by referring to Art History from around the Impressionists to Pop of the West, and Indian/Mughal miniatures and Pre-independent India of the contemporary art. Studies on the folk and traditional arts of the district would be proving very beneficial.

The personal works executed can /must reflect the studies that are initiated.

**Journal:** It is to be used as a Visual Diary. Recording and documenting the process of learning to build paintings. It needs to be documented in both words and graphic format. It needs to be presented at each display, discussion of practical works. Plenty scribbles drawings, pictures etc can be included.

## **PG36/1 P102 OPTED BY STUDENTS OF COMPUTER**

### **GRAPHICS/SCULPTURE ( 100 MARKS )**

#### **Course Outcomes**

**Computer Graphics :** The subject helps the students to shape up his/her future in the field of Advertising Designer, Creative Designer, Visualizer, Graphic Designer, Photo Editor, Logo Designer, App Designer, Digital Artist, various jobs in Advertising agency, Web industries and Animation Industry and so on.

#### **Minor**

MVA Painting students need to select one minor subject from other discipline such as Computer Graphic/sculpture, and the same subject will continue from through II Semester. This must have 10 – 15 days allotted in each semester. This will help in building a better understanding of other languages.

#### **Theory**

### **PG36/1 T103 WESTERN ART-I: 1800 – 1945 ( 100 MARKS )**

#### **Course Outcomes**

**Western Art 1800 – 1945 :** This subject helps the students to know the past history of Western Artists life, their works and their contribution to Art World. It helps to he/her to develop their work in own style.

#### **Western Art 1800 – 1945**

Importance should be laid on the formal, post-formal, aesthetics, post-aesthetic understanding of the visual images from the beginning of European Modern Art (1860s) onwards till the present day. History of art should be more about the changing, altering and evolving history of forms of art and the newer experiences and meanings they acquire over a period of time. Chronology and facts should be employed more as a necessity to aid such artistic understanding of historiography of art.

The reasons behind the end of the age of reason and the birth of a democratic outlook in governance and how it paved way to modernity is to be taught. The essence of Modernism between 1860s and 1970s should be introduced and elaborated. The aesthetic and socio-political reasons behind the birth and sustenance of Modernism, the notion of Avant Garde, the interdisciplinary interactions between visual arts, literature and moving images to be explored and elaborated. The essence of each ISMS and their uniqueness is to be elaborated. Important texts like “Modernist Painting” (Clement Greenberg) and “Work of Art in the age of Mechanical Reproduction” (Walter Benjamin) and the discourse around them is to be studied, as part of studying Modernism and Modernity in Arts.

The evolution of the history of art writing and how it complemented the artistic practices, during the same period, is to be introduced. Various theories related to visual culture is to be explained and the writing by artists themselves is to be considered valid, that should be available to students both as references as well as a way of artistic modernity. Towards this, the writings on visual arts and visual culture by artists, curators, art critics and art historians are to be used as resources, in order to interpret and experience the essence of the visual arts and visual culture, in the European context. Also, the way in which European art was itself affected by its own influence on other countries and continents is to be take note of (Homi Bhabha: the Mimic Man concept).

Modern art to be considered through three main aspects of criticism: psychoanalysis, gender study and socialistic theories.

**NOTE:** students are required to prepare presentations/assignments time to time on various art forms and art schools/theories, as assigned by the concerned teacher. It is mandatory to submit a minimum of TWO assignments

for general students and FOUR assignments for Art History students in each paper.

## **Theory**

### **PG36/1 T104 INDIAN ART 1800 – 1945 ( 100 MARKS )**

#### **Course Outcomes**

**Indian Art 1800 – 1945 :** This subject helps the students to know the past history of Indian Artists life, their works and their contribution to Art World. It helps to he/her to develop their work in own style.

Having arrived at their individual process concepts, language there must be plenty of practice of their works. This means plenty of complete painting/work of art. Written support to the works done is mandatory.

References to art history must be a continuous process.

##### **Minor (Opted by the Students)**

#### **PG36/1 P302 OPTED BY STUDENTS OF COMPUTER GRAPHICS/SCULPTURE ( 100 MARKS )**

##### **Course Outcomes**

**Computer Graphics** : The subject helps the students to shape up his/her future in the field of Advertising Designer, Creative Designer, Visualizer, Graphic Designer, Photo Editor, Logo Designer, App Designer, Digital Artist, various jobs in Advertising agency, Web industries and Animation Industry and so on.

MVA Painting students need to select one minor subject from other discipline such as graphics/applied art/sculpture, and the same subject will continue through IV Semester.

#### **PG36/1 T303 RESEARCH METHODOLOGY ( 100 MARKS )**

##### **Course Outcomes**

**Research Methodology :** This subject will help the students to understand the research methodology in further higher studies and how to choose subject, field work about practical or theory.

**Objective:** To motivate the students to conduct research on specified area or selected topic and to prepare a research proposal.

**Introduction To Research:** Meaning – Objectives – Types of Research – Scope of Research – Research Approaches – Research Process — Research Methods Vs Research Methodology - Steps in Research – Problem Formulation – Statement of Research Objective – Exploratory – Descriptive – Experimental Research

**Data Collection And Measurement:** Types data: Primary & Secondary, Data collection techniques, Scales of Measurement, Classification of Scales - Single Item v/s Multi Item Scales, Comparative v/s Non-Comparative scales, Continuous Rating Scales; Criteria for Good Criteria for Questionnaire Designing; Types of Questionnaire; Questionnaire Design Procedure, Pilot test, validity and reliability of Questionnaire, Cranach's alpha, interview schedule  
Assignment:

Students should submit a synopsis on current issues of advertising or marketing in the prescribed below format.

- a. Introduction (Theoretical Background)
- b. Review of literature (as cited in synopsis)
- c. Statement of the problem/Need for the study
- d. Objectives of the study
- e. Scope of the study
- f. Hypothesis(if any)
- g. Operational definition of the concepts
- h. Methodology
- i. Sampling
- j. Data collection
- k. Plan of analysis
- l. Limitations of the study
- m. Chapter Scheme:

Assignment: Student should prepare a research proposal/synopsis issue of proposed topic

**OEC**

**PG36/1 P304 DRAWING OBJECT ( 100 MARKS )**

**Course Outcomes**

**Drawing (Still Life)** : The subject helps the students to shape up his/her future in the field of Drawing to know shape study, perspective of various objects, Art materials, colours, light and shade.

**Drawing (Still Life):**

Man made Objects geometrical – solid objects, utensils, plaster casts, natural materials (Fruits, Vegetables, Flowers etc...) use variety of Colours Like Indian Ink, Poster Colour, Water Colours, Acrylic Colours etc.. to understand light and shade of the objects.

## **IV SEMESTER – M.V.A. in PAINTING**

### **Major**

#### **PG36/1 P401 CREATIVE PAINTING ( 300 MARKS )**

##### **Course Outcomes**

**Creative Painting** : The subjects helps the students to shape up his/her future in the field of Painting Artist, Art Lecturer, Art Director and Story Board Writer in Film Industry, Creative Head, Animation Industry, Media like News Paper, Magazines, Artist, Cartoonist Jobs and so on.

Painting/work of art is at an advanced stage exhibiting individuality. Continuing the previous semesters focus on completing the works like presentation display writing on their works must be practiced. Regular discussions by internal and external experts must be part of the class.

#### **PG36/1 P402 OPTED BY STUDENTS OF COMPUTER GRAPHICS/SCULPTURE ( 100 MARKS )**

##### **Course Outcomes**

**Computer Graphics** : The subject helps the students to shape up his/her future in the field of Advertising Designer, Creative Designer, Visualizer, Graphic Designer, Photo Editor, Logo Designer, App Designer, Digital Artist, various jobs in Advertising agency, Web industries and Animation Industry and so on.

The same subject opted in the III Semester will continue through IV Semester.

#### **PG36/1 T403 DISSERTATION ( 100 MARKS )**

##### **Course Outcomes**

**Dissertation** : This subject will help the students to develops research, writing skill in develop documentation in Literature.

The Post-Graduate candidates continue the research based on the synopsis submitted in the previous semester. The guide too continues.

**Submission:** The dissertations should be prepared in the prescribed manner and handed over to the Principal, through the Head of the Department positively before the commencement of the theory examinations.

The Dissertations should be neat type written/computer/DTP/ in double line space, 12 font in New Roman, Bookman, Arial, Helvetica. The Dissertation should contain a minimum of 30 pages of type written text along with appropriate visuals. It should have the requisite bibliography and references. No web Materials allowed in downloaded form (or else this would be rejected as it would mount up to plagiarism)

Viva-Voce examination will be conducted by a panel nominated by the Chairman comprising the Head of the Department, Guide and external experts.

### **PG36/1 P 404 DISPLAY**

**Notice :-**At the end of 3<sup>rd</sup> and 4<sup>th</sup> Semester each student should display their works compulsory.

**Note :-**

- Passing Marks – 35 in each paper. Total aggregate of Passing is 40%, Pass Class : 40-49% , II Class 50-59%, I Class 60% and above Distinction: Above 75%
- Any ONE of the TWO subsidiary subjects should be opted at the beginning of even semester. It is compulsory to have one subsidiary subject for at least two semesters. Subsidiary can be changed ONLY during EVEN semester.

### **Minor Subjects available in PG Painting Dept.**

*For*  
*M. A. Programme*  
*in*  
***WOMEN'S STUDIES***  
**(I to IV Semesters)**

*Under*  
*Choice Based Credit System*

***2019-2020***

# **Regulations Governing MA Degree Programme in Women's Studies under the Choice Based Credit System**

*(Framed under Section 44(1) (c) of the K. S.U. Act, 2000)*

## **I. Commencement**

These Regulations shall come into force on the date on which they are approved by the Chancellor or on such other dates as directed by the Chancellor.

## **II. Definitions**

In these Regulations, unless otherwise provided:

- a. 'University' means Karnatak University, Dharwad
- b. 'Board of Studies' means P.G. Board of Studies in Women's Studies (P.G) of the Karnatak University
- c. 'Compulsory Paper' means the paper, which is prescribed by the department from time to time as compulsory.
- d. 'Specialization paper' means an optional paper prescribed by the Department from time to time
- e. 'Open Elective' means a paper offered by the Dept. of Women's Studies for the Students of other Dept in Karnatak University by time to time. However, the students of Department have freedom to choose from a number of open electives offered by the other departments to add to their credits required for the completion of their degree.
- f. 'Credit' means the unit by which the course-work is measured. One Credit means one hour of teaching work or two hours of practical/field-work per week. As regards the marks for the papers, 1 Credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks
- g. 'Grade' is an index to indicate the performance of a student. These Grades are arrived at by converting marks scored in each paper by the candidate after completing his/her in both Internal Assessment and Semester-end Examinations. These grades are awarded for each paper at the end of each semester.
- h. 'Grade Point Average' or GPA refers to an indicator of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester. GPA depends on the number of papers students takes and the grades awarded him/her.
- i. 'Cumulative Grade Point Average' (CGPA) refers to the cumulative Grade Point Average weighted across all the semesters and is carried forward from first semester to subsequent semesters.

### **III. Admission**

A candidate, who has successfully completed Bachelor's Degree programme or any other Degree programme of this University or of any other University recognized as equivalent thereto by this University, shall be eligible for admission to the Post Graduate Programmes provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the University from time to time.

Admissions shall be as per Government of Karnataka reservation policy and the directions issued in this regard from time to time.

### **IV. Duration of the Programme**

The duration of study for the Post-Graduate Degree Programme in Women's Studies shall normally extend over a period of two consecutive academic years, each academic year comprising two semesters, and each semester comprising sixteen weeks with a minimum of ninety working days.

However, the maximum period for completion of the degree is four years from the date of his/her first admission. The normal calendar for the semester shall be as follows:

- a) I and III Semesters : August to November
- b) II and IV Semesters : January to April

### **V: Teaching Course**

Each paper shall be taught for 4 hours per week during the period of 16 weeks in a given semester. However, the actual number of classes may not be 64 hours as per the above calculation. It may vary from paper to paper depending on the activities of the Department, general holidays and the calendar of events prescribed by the University from time to time.

### **VI. Medium of Instruction and Evaluation**

The medium of instruction should be in English.

However, the students may write the examinations in Kannada.

### **VII. Programme Structure:**

- a) There shall be three categories of courses namely, Compulsory Papers, Specialization Papers and Open Elective Papers.
- b) Compulsory and Specialization papers are meant for the students of Women's Studies. The Department of Women's Studies shall offer Open Elective Courses for students of other Departments at M.A II<sup>nd</sup> semester. However, the students of Women's Studies Department shall choose Open Elective courses from among those prescribed by the University and selected by the Department from time to time.
- c) The credits for each of the Compulsory and Specialization papers are 4; However the credits for the open elective chosen by the student of our department from amongst the open elective offered by other departments, may vary from one department to the another department depending offer they make. The project work/ fieldwork/ dissertation/ viva-voce at fourth semester the total credits extended to 8.

**d) The Detailed Programme Structure for M. A. in Women's Studies Shall be as Prescribed and shown in**

**Annexure-I  
I -Semester**

- e) The student of the department shall offer four compulsory papers and shall choose one Specialization paper as Optional in I, II and III Semesters.
- f) The Student shall work in an organization for 15 days and prepare the Report in paper 3.4 as part of their Internship.
- g) The Student have to review standard empirical book in the subject area and prepare the report in paper 3.4 as part of their Book Review.
- h) Summary of Credits for the Degree of M. A. in Women's Studies.

#### **I Semester:**

**Five Compulsory papers : 20 Credits**

**One Specialization Papers : 04 Credits**

#### **II Semester:**

**Four Compulsory Papers : 16 Credits**

**One Specialization Papers : 04 Credits**

**One Open Elective Paper : 04 Credits**

**III Semester:****Four Compulsory Papers : 16 Credits****One Specialization Papers : 04 Credits****One Open Elective Paper : 04 Credits****IV Semester:****Five Theory Papers : 20 Credits****Dissertation : 04 Credits****VIII. Attendance**

- a) A student shall be considered to have satisfied the required attendance if he/she has attended not less than 75 % of the total number of classes held till the end of the semester inclusive of tutorials. Each paper shall be taken as a unit for calculating the attendance.
- b) Each student will have to sign his/her attendance for every hour of teaching in each paper. The Course Teacher shall submit monthly attendance for report to the Chairperson of the Department at the end of every month. The Chairperson of the Department shall notify the attendance of every student on the Notice Board of the Department during the second week of the subsequent month. The chairman of the Department shall send to the Registrar (Evaluation) and other Officers, as directed by the Registrar from time to time, at the end of every month and at the end of every semester, the detailed statement of attendance.
- c) In order to encourage regularity in attendance a maximum of three marks shall be awarded to the students as shown below:

**Marks for Attendance in Each Paper**

| <b>Percentage of Attendance</b> | <b>Internal Assessment Marks</b> |
|---------------------------------|----------------------------------|
| Above 90                        | 3 Marks                          |
| Above 80 and up to 90           | 2 Marks                          |
| 75 and up to 80                 | 1 Mark                           |

**Note:** if the fraction is more than 50, the percentage of attendance shall be rounded off to the next high number

- d) However, if a student represent the Department/ University/ State/National level Sports, NSS, NCC, or Cultural activities or any other officially sponsored activities she/he shall be eligible to claim the Attendance for the actual number of days utilized in such activities (including travel days) subject to the production of certificates from the relevant authority within two weeks after the event.
- e) A students who do not satisfy the requirement of attendance of 75% in each paper shall not be permitted to appear the semester end examination. Such candidates may seek admission afresh to the given semester.

**IX. Evaluation**

- a) Evaluation of the papers will have two components-
  - i) Internal Assessment, and
  - ii) Semester End examination

Total marks for the Internal Assessment are 25 in addition to 3 marks for attendance as shown in the table above (VIII C). The internal assessment shall consist of:

- i) Two Written Tests : 11 Marks each

The tests shall be written in separate designated answer booklet. Award of marks should be brought to the notice of the students. The marks of written tests shall be notified on the notice board of the Department and submitted to the Registrar (Evaluation) at end of every semester. The Internal Assessment marks shall be taken into account for compilation of grades. In case of candidates appearing for improvement examination, the marks obtained in the Internal Assessment shall not be revised since there is no provision for improvement of Internal Assessment.

- b) There shall be one Semester - End examination of 3 hours duration for every paper for 75 marks. The examination shall be conducted as per the rules, regulations, notifications, orders, instructions, procedures, formats and circulars issued by the University from time to time.

#### **X. Challenge Evaluation**

There shall be a provision for challenge valuation as per the rules and regulation of the University issued from time to time.

#### **XI. Completion of the Course**

- a) A candidate is expected to successfully complete the Degree Programme within two years from the date of admission.
- b) Whenever the syllabus is revised, the candidate reappearing will have to write the examination as per the syllabi prevailing at that time.
- c) The CBCS scheme is a fully carry over system. However, the four semesters (two years course) should be completed by the student within a maximum period of 4 years.

#### **XII. Declaration of Results**

- a) Minimum for a pass in each paper shall be 40% of the total 100 marks including both the Internal Assessment and the Semester-End examinations. However a candidate should obtain at least 40% marks in the Semester-End examination. There is no minimum for the Internal Assessment marks. However after adding the IA marks and the semester end examination marks, the candidates should score a minimum of 40% of the maximum marks per paper. Candidate shall secure a minimum of 50% in aggregate in all papers of a programme in each semester to successfully complete the programme.
- b) The improvement of the performance is permitted as per the rules and regulations of the University.

#### **XIII. Marks and Grade Points**

**The grading of successful candidate/s at the examination shall be as follows:**

| <b>Percentage of Marks</b>    | <b>GPA/CGPA</b> | <b>Grade Letter</b> | <b>Class Awarded</b>         |
|-------------------------------|-----------------|---------------------|------------------------------|
| 75 and above                  | 7.50 to 10.00   | A                   | First class with Distinction |
| 60 and above but less than 75 | 6.00 to 07.49   | B                   | First Class                  |
| 50 and above but less than 60 | 5.00 to 05.99   | C                   | Second Class                 |
| 40 and above but less than 50 | 4.00 to 4.99    | D                   |                              |
| Less than 40                  | Less than 4.00  | F                   |                              |

#### **XIV. Grading**

The Grade Point Average (GPA) shall be given to each candidate based on her/his performance during the semester, which includes both the Internal Assessment and the Semester-End examination. The GPA of each semester should be carried to next semester as Cumulative Grade Point Average CGPA. An illustration of the same is shown below.

**XV. Grade Points (Format)****M.A. Degree in Women's Studies**

Semester :  
Name of the Candidate :  
Registration  
No :

| Number and Title of the Paper   | Credit Hours | Max Marks Each Papers | Marks obtained | Semester Grade Point | Credit Points |
|---------------------------------|--------------|-----------------------|----------------|----------------------|---------------|
| Fundamentals of Women's Studies | 4            | 100                   | 70             | 07.00                | 28.00         |

**Semester GPA = Total Credit Points in all papers**

**Credit Hours**

**XVI. The GPAs for various semesters is calculated as follows:**

| Semester | Credits Hours | Credit Points | GPA   |
|----------|---------------|---------------|-------|
| First    | 24            | 168           | 7.00  |
| Second   | 24            | 168           | 7.00  |
| Third    | 24            | 168           | 7.00  |
| Fourth   | 24            | 168           | 7.00  |
| Total    | 96            | 672           | 28.00 |

## **PG56T103– RESEARCH METHODOLOGY**

### **Paper 1.3** Research Methodology

#### **Course Outcome:**

- The paper introduces the students to basic research methodology in Social Science.
- The course gives a new knowledge and introduces students about the Feminist and gender view perspectives. Feminist critique, analysis and interpretation.
- Gaining knowledge of research and perspective of Women's Studies.

#### **Unit I: Research**

- 1) Meaning, Nature and Types of Research. Applied, Basic
- 2) Relationship between Theory & Research
- 3) Social Science Research: Scope, Objectives, uses, Ethics
- 4) Problems of Objectivity and Subjectivity.

#### **Unit II: Research Design:**

- 1) Meaning & typology (descriptive, exploratory, experimental,diagnostic)
- 2) Process of Research Design
- 3) Review of Literature and searching the research problem,
- 4) Research Question, Objectives, Hypotheses: Null and Alternative and Statistical Error, Theoretical Framework
- 5) Sampling - Significance and limitations of Sampling, Types of Sampling (Probability and Non-Probability).

#### **Unit III: Sources of Data Collection and Limitations:**

- 1) Primary Data and Techniques ofData Collection: Observation, Questionnaire, Interview-Schedule, Focus group Discussion, Case-study, ethnography Key Informant Technique,
- 2) Secondary Data use and limitations.

**Unit-IV: Analysis and writing:** Use of statistics, Interpretations and report writing.

**Unit-V: Feminist Methodology and Recent Trends in Feminist Research:**

- 1) Problems of Research in Women's Studies: significance, gender as an analytical variable and problem.
- 2) Feminist critique of conventional concept of research (Andocentric, Over generalization/Over specificity, gender insensitivity).
- 3) Types: Interactive methodology, Ethno methodology, Experimental and Content analysis.
- 4) Inter disciplinary research in women's Studies: Qualitative and Quantitative research, Action Research, Cross cultural.
- 5) Recent Trends in Feminist Research: Participatory Research.

## **PG56T105 – WOMEN AND EDUCATION**

### **Course Outcome**

- The paper deals with the importance of women's education, history, development, empowerment in India.
- It focuses on the Governmental Initiatives, Plans, Commissions, National Policies and barriers for women's education.
- Students seek to know the status and value of girls/women's education in the past and present scenario.

### **Unit I: Introduction:**

- 1) Introduction, Definition, Aims and Objectives of Education
- 2) History and Development of Education in India
- 3) Education System in India
- 4) Problem and perspectives of Education.

### **Unit II: Women Education in India:**

- 1) Women Education: Historical perspectives, Present Scenario, Problem of Equality of Education
- 2) Female Literacy Vs Male Literacy
- 3) Enrolment ratio, Drop-out rates, Primary Education, Higher Education
- 4) Self Employment, Non-formal Education, Adult Education Programmes and Women in various professional courses.

### **Unit III: Women Education and Five Year Plans:**

- 1) I to XI five year plans
- 2) National Education Policy
- 3) Mudaliar Commission(1952-53), Kothari Commission(1964-66)
- 4) National Perspective plan for Women's Education
- 5) National Policy for Women Empowerment(1986).

### **Unit IV: Problems of Women's Education:**

- 1) Social and cultural problems: Child abuse and Violence on girl-child, social taboos, Image of Women, Sex stereotyping at home and outside
- 2) Problem of Dropout: causes consequences and remedies.
- 3) Economic problem: Poverty, lack of infrastructure: policies and programmes

### **Unit V: Education and Women Empowerment:**

- 1) Women in Higher Education
- 2) Education as a tool of Women Empowerment
- 3) Changing values and attitudes
- 4) Concept of Gender equality
- 5) Awareness of Women's position: Role, Rights and Responsibilities
- 6) Role of Government in women empowerment.

### **PG56T106B – FEMINIST LITERARY STUDIES (Specialization)**

#### **Course Outcome:**

- The paper aims to explore new women's writings with a feminist perspective.
- It introduces the students for the feminist literary thinkers, feminist writings, criticism, analysis and experiences. It gives exposure to the Western, Indian and Regional feminist writings.
- The students learn the in-depth writing and exposure to feminist issues of concerns.

#### **Unit I: Feminist Literary Theory:**

- 1) Introduction, Sexual/textual politics
- 2) Language and revolution
- 3) Feminist linguistics theories
- 4) Feminist challenges to the literary canon

#### **Unit II: Feminist Criticism:**

- 1) Feminist poetics
- 2) Black feminist and Lesbian feminist criticism
- 3) Are women novels feminist novels?
- 4) Feminism and literary critic
- 5) feminism and the definition of cultural politics

**Unit III: Women's Writings:**

- 1) Writing the body-towards an understanding of Ecriturefeminine
- 2) Literary women: Literature of their own
- 3) Issue of female creativity
- 4) Women read romance: the interaction of text and content
- 5) Female sexuality and class, Women's sexuality today
- 6) Women and the Novel

**Unit IV: Feminist Literary Thinkers:**

- 1) Simon-De-Beaouvoir,
- 2) Helene Cixous,
- 3) Betty Freidan
- 4) Elenne Showaiter,
- 5) Barbara Smith,
- 6) Vijaya Dabe,
- 7) B.S Sumithra Bai

**Unit V: Text: Feminist Analysis:**

- 1) M K Indira (Panniyama)
- 2) Shashi Despande (The Dark Holds No Terrors)
- 3) Masti Venkatesh Iyengar (Mosarinna Mangamma; English version: Raja Gopalchari)

## **PG56T202– FEMINIST JURISPRUDENCE**

### **Objectives:**

### **Course Outcome:**

- This paper aims to explore and understand the students about constitutional, legal rights and amendments in India.
- It highlights the special women's rights, personal laws and laws relating to crimes against women.
- Gaining knowledge of laws, special concern to women, creating awareness and bringing into practice in their own life situation.

### **Unit I: Feminist Jurisprudence:**

- 1) Meaning, Concept and scope of Feminist Jurisprudence
- 2) Universal Declaration of Human Rights
- 3) Enforcement of Human Rights for Women and Children
- 4) Understanding Human Rights in Indian context
- 5) UN Conventions; Universal debate on Human Rights for Women
- 6) Women equality and the Constitution-Contemporary Consensus
- 7) Law as an agent for social Transformation
- 8) The Constitution of India and the Gender Question (Fundamental Rights, Directive Principles of State Policy)

### **Unit II; Women's Rights in India:**

- 1) Indian Constitution relating to women
- 2) Constitutional rights -Article 14, Article 15, Article 16, and Article 21, 23, 24, 29 & 30, 32
- 3) Judicial approaches to sex discrimination: The relevance of gender, employment, education

- 4) Directive Principles of State Policy – 39(a), A 39(d), A 39(e), a 42
- 5) Human Rights and Women, Obstacles
- 6) Need for Uniform Civil Code
- 7) Persisting Violation
- 8) Measures of Enforcement of Human Rights
- 9) Women's Rights in Contemporary India

**Unit III: Political and Personal Laws: (Marriage, Maintenance, Property):**

- 1) Special Marriage Act - Hindu law
- 2) Age at marriage (Legal and Customary)
- 3) Void marriages, Voidable marriage; Bigamy
- 4) Muslim laws
- 5) Christians Laws
- 6) Panchayat Raj and 73 and 74 Constitutional Amendment.

**Unit IV: Crimes Against Women and Laws in India:**

- 1) Rape Laws (Reference to Sec 375 IPC)
- 2) Dowry Prohibition Act, 1961 (As amended in 1984 and 1986)
- 3) Domestic Violence Act, 2005
- 4) Medical Termination of Pregnancy Act, 1971
- 5) Pre-Natal Diagnostic Techniques (Regulation and Prevention) Act, 1994 as amended in 2004
- 6) Recent Trends.

**Unit V: Special Rights of Women:**

- 1) Kinds of offences, Awareness regarding access to legal and judicial machinery
- 2) Rights at the time of filing FIR, Rights in police stations; Rights in custody; Rights at the time of arrest
- 3) Public Interest Litigation and Legal Aid for Women in India
- 4) Family Courts, Role of Cells and Counselling Centres, Legal AID cells, Help line, State and National level Commission

## **PG56T203– STATISTICAL APPLICATIONS IN WOMEN'S STUDIES**

### **Course Outcome:**

- This paper aims to explain statistical techniques, soft skills, computer languages.
- It makes students to understand and learn effective use of statistics and computer for research objectives.
- Gaining knowledge of effective usage of computer and its applications.

### **Unit I. Introduction:**

- 1) Social Statistic: Scope and Importance
- 2) Collection of Data
- 3) Types and Sources of Statistical Data
- 4) Classification and Tabulation of Data.

### **Unit 2: Diagrammatic and Graphical Representation of Data:**

- 1) Bar Diagram, Multiple Bar Diagram, Subdivided Bar Diagram
- 2) Pie-Chart, Line Chart, Histogram, Frequency Polygon
- 3) Curve, O-give curves.

### **Unit III: Measures of Central Tendency and Dispersion:**

- 1) Mean, Median and Mode
- 2) Range, Quartile Deviation
- 3) Mean Deviation and Standard Deviation
- 4) Coefficient of Variation.

### **Unit IV: Correlation and Regression:**

- 1) Theory of Correlation and Regression;
- 2) Types of Correlation and Methods,
- 3) Types of Regression lines
- 4) Properties of Correlation Co-efficient
- 5) Regression Co-efficient.

### **Unit V: Use of Computer: Soft Skills, Basics, Introduction to SPSS Software**

## **PG56T204– WOMEN AND HEALTH**

### **Course Outcome:**

- The paper attempts to create awareness among the students about the importance of women's health and condition in India.
- It studies various determinants of population dynamics and the changing scenario and initiatives taken at national and international forums.
- It gives overall Knowledge of women's health, gender differences, dilemmas and access to it.

### **Unit I: Introduction:**

- 1) Conceptualizing Health,
- 2) Definition, Public Health, and Women's Health.
- 3) Health as a human right of women.
- 4) Status of women's health in India: Definition of Nutrition and Health
- 5) Interrelationship between health and nutrition (Understanding health and nutrition from women's perspective and changing demographic profile of women's health status in India).

### **Unit II: Concepts, Indicators and determinants of Population Dynamics:**

- 1) Ratio, Sex-ratio, Mortality,
- 2) Morbidity, Maternal Mortality Rate (MMR)
- 3) Infant Mortality Rate (IMR)
- 4) Neonatal-Mortality Rate (NMR)
- 5) Prenatal Mortality Rate, Birth Rate (Crude)
- 6) Death Rate (Crude)
- 7) Fertility, Nupitality, Still Birth, Life expectancy, Abortion.
- 8) Migration: Social-Economic and Cultural factors influencing health
- 9) Health from Gender Perspective
- 10) Gerontology of Women.

### **Unit III: Reproductive Health:**

- 1) Definition and concepts of reproductive health.
- 2) Reproductive Rights and Choice
- 3) Socio-Cultural and Biological determinants of Reproductive Health (Rights of Passage)
- 4) Unwanted Pregnancy, Abortion, and Acts (PNDT, MTP)
- 5) Issues and Gender Dimensions of Infertility
- 6) Problems of women beyond reproductive age.

### **Unit IV: Health Status of Women in India:**

- 1) Cultural impediments to access and utilization of health care services
- 2) (A) Cultural impact on adolescent girl's health: hygiene, food intake, practices, menstruation, sexual abuse and mental health, privacy; (B) Cultural impact on women: menstruation, pregnancy, lactation, menopause, old age, health and nutrition and hygiene
- 3) Small Family Norm, Family Planning targeting of women (Permanent, Temporary Methods of family planning)
- 4) Gender Differences in Contraceptive Practices and Marginalized Women and Risk of HIV/AIDS.

### **Unit V: Initiatives and Perspectives on Health (National and International):**

- 1) Health as a Critical Area of concern in the Beijing Platform for Action - Alma-Ata Declaration,
- 2) International Conference on Population and Development (ICPD, Cairo)

- 3) Millennium Development Goals (MDGs)
- 4) National Population Policy (NPP), Children Centred and Organized Initiatives for Women's Health
- 5) National Health Policies and Programs (RCH 1, NRHM, NUHM),
- 6) PNDT Act, MTP Act
- 7) Issues of Adolescent Girls
- 8) MCH to Reproductive and Child Health approaches
- 9) Role of International Organizations – WHO, UNICEF, UNESCO, CARE and Others
- 10) Health for all Programme.

#### **PG56T205A: WOMEN AND HUMAN RESOURCE DEVELOPMENT (Specialization)**

##### **Course Outcome:**

- The paper intends to address the significance and the need of Human resource at various levels.
- It exposes the students for practical exercises, molding them to learn management skills, effective communication, and enhancing their leadership quality for the career development.
- It focuses on overall developmental and managerial skills of students.

##### **Unit 1: Introduction:**

- 1) Scope and Significance of Study of HRD
- 2) Origin and Development of HRD System
- 3) HRD Practices in Informal Society and Formal Organizations: Goals, Levels of Management.

##### **Unit 2: HRD System:**

- 1) The need for HRD

- 2) HRD Mechanism
- 3) Designing HRD System
- 4) HRD as a tool System.

### **Unit 3: Managing Human Resource:**

- 1) Personnel Management (HRM) External Environment for Personnel
- 2) Manpower Planning
- 3) Employee Selection
- 4) Recruitment Process
- 5) Training and orientation.

### **Unit 4: Training for Women Development:**

- 1) Determining Training Needs in Society
- 2) Management Development in Workplace
- 3) Career Planning – What, Why and How
- 4) Motivation and Job Enrichment (Practical): Skill development programmes in India.

### **Unit 5: Exercises (Practical):**

- 1) Brain Storming
- 2) Communication Skills
- 3) Developing Leadership Qualities
- 4) Public Speaking and Group Discussion.

## **PG56T301– WOMEN'S MOVEMENTS AND SOCIAL CHANGE**

### **Course Outcome:**

- The paper sensitizes students on various social movements to bring social change at international, national and at the state levels.
- It studies the social issues based on the gender differences or gender inequalities from the time of pre-independence era to the contemporary era are given importance.
- It gives the knowledge of historical movements contributed to bring the drastic social change within the society.

### **Unit I: Introduction:**

- 1) Concept, Characteristics, types of Social Movements
- 2) Social Movements and Social Change
- 3) Women Movement: Perspectives and Goals
- 4) Need for Women Movement and Social Change.

### **Unit II: Women's Movements in India:**

- 1) Women's Movement as a Social Movement
- 2) Women's Issues taken up by Social Reformers
- 3) Women's Movement in Pre-Independence period: With a special focus on Women in the Suffrage Movement
- 4) Women's Participation in the National Movement (Civil Disobedience Movement,
- 5) Quit India Movement and Women's revolutionary activities).

- 6) Women's Questions in the Nationalist, Anti-Caste, Working Class and Peasant Movements.

**Unit III: Women's Movement in 20<sup>th</sup> Century:**

- 1) Environmental Movements: Chipko movement, Narmada Bachao Andolan
- 2) Dalit Women's Issues, Controversy around Uniform Civil Code and Its Impact on Women's Movement
- 3) Movements against, dowry, rape, sati, Anti-Arrack Movement
- 4) Women in other movements: Labour, Tribal, Peasant and Human Rights
- 5) Autonomous Women's Movement (with special focus on the conferences of the Autonomous Women's Movement, IAWS).

**Unit IV: Women's Movements in Karnataka:**

- 1) History and Growth of Women's Movements in Karnataka
- 2) Vachana Movements
- 3) Autonomous Women's Organizations; Vimochana, Manasa, Samatha, Manani, MahilaSangahtane
- 4) Women's movement and Social change.

**Unit V: Contemporary Issues taken up by Women's Movement in India:**

- 1) Trafficking in Women
- 2) Honour Killings and Khap Panchayats
- 3) Fundamentalism, Casteism
- 4) Violence against women.

**PG56T302 WOMEN AND ENVIRONMENT**

**Course Outcome:**

- The paper aims to explore about the inter-linkage between the women and environment.
- It throws light on the indigenous knowledge of women, highlighting the changing ecosystem past, present and future, policy frameworks at state, national and International.

- It gives the Knowledge of relation between the environment and women through Eco-Feminist perspective.

#### **Unit I: Concept and Issues of Environment:**

- 1) The Natural Environment (Atmosphere, Hydrosphere, Biosphere, Ecosystem, Global cycle, Renewable and non-renewable sources)
- 2) Ecological Imbalance & Environmental Issues: environmental degradation, climate change, ozone depletion and Green
- 3) House effect, deforestation, pollution, air, water, energy crisis, Mining and quarrying.

#### **Unit II: Eco-feminism:**

- 1) Concept and growth of Eco-feminism and interrelationship between Women-nature, Theory and Practice of Eco-feminism in India
- 2) Nature as the feminine principle (humanity and exclusion), Nature and women as producers of life (new ecology of reproduction Unit): Gender ideology vs. the recovery of the feminine principle.

#### **Unit III: Women and Environmental Management:**

- 1) Joint Forest Management, Resistance from Coastal Waves, Water Management, Industrial Aqua Culture and Soil Erosion.
- 2) Ecological Movements initiated by women: Chipko, Green Belt, Navdaya, Kenya land takeover, and NoDAPL movement.
- 3) Women and in environmental movements: Amruta Devi, Saralaben, Bimalaben, Gouridevi, Gangadevi, Bichidevi, Itawaridevi, Kusuma Sourab, Arundati Roy and others.
- 4) Women environmentalists: Vandana Shiva, Wangari Muta Maathai, Maria Cherkasova, Rachel Carson and other.

#### **Unit IV: Women, Indigenous knowledge and Environmental Economy:**

- 1) Basic Needs in Rural and Urban Environments
- 2) Medicinal Plants, Water Resources, Livestock, Food Security, Non-timber Forest Produce, Impact of Indoor and outdoor Pollution, Awareness on Drainage, Sanitation, Protected Urban Environment, Solid and Liquid Waste, Methods of Recycling of Waste
- 3) Vanishing waters: dams as violence to the river, women as water experts; Diversity as women's expertise; Women; custodians of biodiversity; Biotechnology and the destruction of biodiversity
- 4) Women's Dependency on Eco system, Fodder, Fuel wood, Minor Forest Produce
- 5) The wood-fuel crisis in the Third World

#### **Unit V: State, National and International Perspectives and mandates on Women, Environment and empowerment:**

- 1) Environmental Policy of India and its impact on women
- 2) Women's Environment and Development Organization (WEDO)
- 3) Role of NGOs in protecting the Environment and Rights of Women (CEDAW)
- 4) National Policy on Protecting Environment
- 5) Role of Pollution Control Boards
- 6) International Conferences on Environment: Focus on Agenda 21 of Rio Conference.

### **P.G. Department of Yoga Studies**

#### **Rules governing M.A in Yoga Studies for semester course as per GBCS pattern and Ph.D. programmes in Karnatak University.**

In exercise of the powers conferred under Sec.44 of the Karnataka State Universities Act, 2000, the Academic Council of Karnatak University frames the following Rules in consonance with Regulations of Faculty of Social Science.

#### **Title:**

These Rules shall be called - Karnatak University Rules governing Post-Graduate Programmes under Choice-Based Credit System for M.A. and Ph.D. Programmes in Yoga Studies under Faculty of Social Science.

#### **Commencement:**

These Rules shall come into force from the academic year 2017-18.

#### **Definitions:**

In these Rules, unless otherwise mentioned:

- a) "University" means Karnatak University; Dharwad.
- b) "Post-Graduate Programmes" means Semesterized Master Degree Programmes under CBCS.
- c) This "Compulsory professional Course" means a fundamental course which a student admitted to a particular Post-Graduate programme should successfully complete to receive the Post-Graduate Degree in the concerned subject.
- d) "Open elective" means a course offered by the Department for students of other Departments. Such Open Elective Courses shall be taught by qualified teachers approved by the University.
- e) "Credit" means the unit by which the course work is measured. For this Rule, one Credit means one hour of Theory or practical Teaching work week. Normally a Semester, is of 16 weeks duration in any given academic year. As regards the marks for the courses, 1 credit is equal to 25 marks, 2 credits are equal to 50 marks, 3 credits are equal to 75 marks and 4 credits are equal to 100 marks.
- f) "Course Weightage" means number of credits assigned to a particular course.
- g) "Grade" is an index to indicate the performance of a student in the selected course. These Grades are worked out by converting marks scored in each subject by the candidates in both Internal Assessment and Semester end Examinations.

- h) "Grade Point Average" or GPA refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grade points obtained by a student in a given semester.'
- i) "Cumulative Grade Point Average" or CGPA refers to the Cumulative Grade Point Average weighted across all the semesters and carried forward from 1st semester to subsequent semesters.

## **I. Rules Pertaining to M.A. in Yoga Studies Semesterised CBCS Programme 2017-18**

### **Preamble:**

Yoga is an integral part of Indian Cultural, Spiritio-Philosophical heritage. The Science of Yoga promotes Physical Mental and Spiritual Health of an individual in particular and entire human society at large. Yoga has been and is Promoting and fastering global Peace and harmony in the humankind. Now a days, Yoga is being utilized for Personality development, Stress management, Eradication of worries, Moralization of desires, and Neutralization of anger. For the Systematic and Scientific Study and Research of Yoga, UGC is encouraging the Universities.

Karnatak University is the first University in Karnataka State and second to entire India (after Sagar University) which has started the Dept. of Yoga Studies and running P.G. Diploma in Yoga Studies, Certificate Course in Yoga Studies and introduced Yoga as Optional Subjects of three equal importance at UG Level (i.e. at B.A/B.Sc). Karnatak University is also the first University to receive Rs.10 Lacks in the entire Country to start Master and Research degrees in the Department to train the Students to undertake higher training and research in various aspects of Yogic Science. Hence, as per the wishes of the UGC and as per the directions of the Vice-Chancellor and Registrar of our University Special Board of studies in Yoga Studies met on 05-06-2017 under the Dean and Chair person of P.G: Dept. of Yoga Studies, KUD and has resolved to introduce Master of Arts in Yoga Studies and Ph.D. Courses in the Dept. of Yoga Studies, Karnatak University, Dharwad.

### **R-1. Title:**

- 10.11 Candidates who have failed, remained absent or opted for improvement in any course/courses shall appear for such course/courses in two immediate successive examinations that are conducted. However, in case of candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained if the same is higher.

**R-II. Internal Assessment:**

- 11.1 For all theory & practical papers comprising of 100 marks there shall be 20 Internal Assessment and it will be divided into Mid-Semester Test (05 marks), Lecture cum demonstration (05 marks) & Seminar presentation (10 marks)
- 11.2 The Dept. shall notify the scheme of Internal Assessment in the first week of each semester.
- 11.3 Marks for attendance shall be awarded to the students according to the following table

| Attendance (in percentage) | Marks |
|----------------------------|-------|
| Above 95                   | 5     |

|                       |          |
|-----------------------|----------|
| Above 90 and up to 95 | 4        |
| Above 85 and up to 90 | 3        |
| Above 80 and up to 85 | 2        |
| Above 75 and up to 80 | 1        |
| 75                    | No Marks |

11.4 The IA Tests shall be written in a designated book supplied by the University.

11.5 Students are not permitted to improve Internal Assessment marks.

#### **R-12. Dissertation:**

12.1 All those enrolled in the M.A. Programme shall write a Dissertation under the guidance of a course teacher during their Fourth Semester.

12.2 The Department council shall meet after the commencement of the Fourth Semester and determine who shall guide the student in dissertation writing. The Dissertation shall be completed and submitted to the Department before the commencement of IV Semester theory Examination.

12.3 Dissertation shall carry 80 marks

12.3 Viva-voce: There shall be Dissertation Viva-Voce examination for 20 Marks at the end of theory and practical examination of IV Semester.

#### **R-13. Board of Examiners and Valuation:**

13.1 There shall be a Board of Examiners to set, scrutinize and approve the Question Papers

13.2 There shall be double valuation for all Theory Papers and Dissertation. The average jbf marks awarded by the Internal and External Examiners shall be taken as the final award. Provided that in case the difference between the marks awarded by the Internal and the External Examiners in respect of any Theory paper or Dissertation be more than 20%, then, such Theory answer scripts or Dissertation shall be referred to a third valuer and the nearest scores shall be averaged and declared as the final award.

#### **R-14. Marks, Credit Points, Grade Points and Grade Point Average:**

14.1. The grade points and the grade letters to candidates in each course shall be awarded as follows:

| Percentage of marks            | Grade Points                           | Grade Letter |
|--------------------------------|----------------------------------------|--------------|
| 75 and above, up to 100%       | 7.50 to 10.00                          | A            |
| 60 and above but less than 75% | 6.00 and above but less than 7.5       | B            |
| 50 and above but less than 60% | 1.0 and above<br>1.1 but less than 6.0 | C            |
| 40 and above but less than 50% | 1.0 and above<br>1.1 but less than 5.0 | D            |
| Less than 40.00%               | Less than 4.00                         | F            |

14.2 Credit Point (CP): The Credit Point for each course shall be calculated by multiplying the grade point obtained by the credit of the course.

14.3 The award of Grade Point Average (GPA) for any student is based on the performance in the whole semester. The student is awarded Grade Point Average for each semester based on the Total Credit Points obtained and the total number of credits opted for. The GPA is calculated by dividing the total credit points earned the student in all the courses by the total number of credits of those courses of the semester.

- 14.4 The Cumulative Grade Point Average (CGPA) shall be calculated by dividing the total number of credit points in all the semesters by the total number of credits in all the semesters. The CGPA up to date shall be calculated by dividing the total number of credit points in all the semesters up to date by the total number of credits in all the semesters up to date.

$$\text{CGPA for the I Semester} = \frac{\text{Sum of the CP of the I Semester}}{\text{Sum of the credits of the I Semester}}$$

$$\text{CGPA for the II Semester} = \frac{\text{Sum of the CP of the I Sem} + \text{Sum of the CP of II Sem}}{\text{Sum of the credits of the I Semester} + \text{II Semester}}$$

CGPA for the III and IV Semesters shall be computed accordingly.

- 14.5 The Grade Card at each semester examination shall indicate the courses opted by the student, the credit for the course chosen by the student, the credit point obtained in each course, the grade letter and the grade point average. No class shall be awarded for each semester and the same would only be awarded at the end of all the semesters based on Cumulative Grade Point Average.
- 14.6 Class shall be awarded to the successful candidates based on the Cumulative Grade Point Average (CGPA) as specified below:

| Cumulative Grade Point Average (CGPA) | Class to be awarded          |
|---------------------------------------|------------------------------|
| 7.5 to 10.0                           | First class with Distinction |
| 6.0 and above but below 7.5           | First Class                  |
| 5.0 and above but below 6.0           | Second Class                 |

#### **R-15. Declaration of Results:**

- 15.1 Minimum marks required for passing in each course shall be 40% of the total marks including both IA and semester-end examinations. Further, candidate shall obtain at least 40% of marks in semester-end examination. There is no minimum marks for I A.
- 15.2 Candidate shall secure a minimum marks of 50% in aggregate in all courses of a programme in each semester including IA marks.
- 15.3 For the purpose of declaring Ranks/Classes, the aggregate of the marks in all semesters shall be taken into account. However, Ranks shall not be declared in case the candidate has not successfully completed each of the semesters in first attempt.
- 15.4 For the purpose of announcing results, the aggregate of marks secured by a candidate in all semester examinations shall be taken into account.

#### **R-16. Miscellaneous:**

- 16.1 The General Regulations, the Regulations of Faculty of Social Science, Directions, | Orders, Notifications issued by the University Authorities in the respect of matter not covered by these Rules shall be final provided they are in conformity with the provisions of the Karnataka State Universities Act, 2000 and the Ordinances, Statutes, Regulation and the Rules made thereunder.
- 16.2 However, the Vice-Chancellor is empowered to take such kind of decisions, matter related to the academic interest, in consultation with the Chairman and Dean & Place it for ratification at appropriate bodies within the scope & limits of the Act & Regulations.

## **A02 : Anatomy and physiology**

### **Unit-I. Basics of Anatomy and Physiology**

1. Structure of human cell
2. Functions of Human cell & transport mechanism of cells.
3. Types of cells
4. Tissue-anatomy, its classification & functions.
5. Meaning of Homeostasis.

### **Unit-II. Concept of Health, Diseases:**

1. Health, Meaning & Definitions
2. Concept of disease, definitions and types of diseases

### **Unit-III. Ten Systems of the Body:**

#### **First 5 systems**

- 1. The Digestive System:**  
The Digestive system: Structure and Functions.
- 2. Cardiovascular system:**  
The Cardiovascular: Structure and Functions.
- 3. Respiratory system:**  
The Respiratory system: Structure and Functions.
- 4. Skeletal system:**  
The Skeletal system: Structure and Functions.
- 5. Muscular system:**

The Muscular system: Structure and Functions.

#### **Unit-IV. Other 5 systems of the body:**

##### **1. Urinary System:**

The Urinary System: Structure and Functions.

##### **2. Endocrine system:**

Endocrine system: Structure and Functions.

##### **3. Immune system:**

The Immune system: Structure and Functions.

##### **4. Nervous system:**

The Nervous system: Structure and Functions.

##### **5. Reproductive system:**

The Reproductive system: Structure and Functions.

#### **Unit-V. Senses of the Body:**

Vision, Hearing, Smell, Taste, Touch : Structure and Functions.

**PREAMBLE:**

Yoga is an integral part of Indian cultural and Spiritual heritage. The science of Yoga promotes physical, mental and spiritual health and also helps an individual to lead a happy and healthy life, thus bring harmony and peace in the society. In the modern days, the techniques of Yogic science are extremely useful in the management of stress and stress related disorders and promote positive health of an individual.

Karnatak Univeristy Dharwad has established the Department of studies in Yoga way back in the year 1976 and is the first University in Karnatak state and second in entire India which has started the Department of studies in Yoga, to impart comprehensive Yoga education with Provisions to grant higher degrees in Yogic studies. At present the Department of Yoga studies functions with following objectives.

**OBJECTIVES:**

## **Y08 : HUMAN BIOLOGY AND PSYCHOLOGY**

### **SECTION - A : HUMAN BIOLOGY**

Duration: 2hrs. per week

Marks: 50

#### **UNIT - I:**

1. Cell: Structure and function of cell and tissues. Organs of human body.
2. Skeletal System: Types and functions of skeletal systems. Joints and classification of bones.
3. The Muscular System: Characteristics, structure and functions of body and skeletal muscles. Types of body muscles.
4. The Circulatory System: Structure and function of the heart. The mechanism of systemic and pulmonary circulation. The cardiac cycle. Composition and functions of blood. Blood groups and their importance. Blood Pressure.

#### **UNIT – II:**

1. The Respiratory System: Anatomy and physiology of respiratory system, its organs and functions. The process of respiration, lung volume and capacities
2. The Digestive System: Anatomy and physiology of digestive system. Alimentary canal and their functions. Physiology of digestion.
3. The Urinary System: Anatomy and physiology of urinary system, structure and functions of kidney. The Nephron and production of urine.
4. The Reproductive System : Anatomy of the male and female reproductive system, Functions of testis and ovary. The menstrual cycle.

#### **UNIT – III:**

1. The Endocrine System : The structure and function of the major endocrine glands. Hormones and their functions. Pituitary, thyroid, parathyroid, adrenal, pancreas and gonads.

2. The Nervous System : Gross anatomy of nervous system. Central nervous system. Peripheral nervous system, autonomic nervous system. The sympathetic and parasympathetic divisions. The Neuron.
3. Sense organs: (Vision, smell, hearing, taste and touch) their structure and pathways.

### **SECTION B : HUMAN PSYCHOLOGY**

Duration: 2 hr per week

Marks: 50

#### **Unit - IV: Human Psychology**

1. Human Psychology: The nature and scope of psychology, mental processes, the human behavior and psychological basis of behavior.
2. Mental Processes: attention, sensation, perception, learning, memory, feeling and emotion. States of consciousness, intelligence and its measurements, emotional intelligence. Motivation and multiple intelligence.

#### **Unit - V : Personality Development**

1. Personality : The nature and characteristics of personality, determinants of personality, types of personality, personality disorders, the yogic concept of personality and its development, psychosomatic problems and psychiatric ailments.
2. Mental Health: Means of mental health; positive mental health; mental disorders; yogic management of mental conflicts, stress, disorders; yoga for mental health, psychology of spiritual growth, spiritual values, pure consciousness and mode of living.

### **BOOKS FOR REFERENCE**

# **KARNATAK UNIVERSITY, DHARWAD**

## **Regulations concerning Master Degree Programme**

### **Faculty of Science, from 2019-2020**

#### **Master Degree Programme in Zoology (M.Sc. Zoology-CBCS)**

Regulations Governing the Post-Graduate Master Degree Programmes under Choice Based Credit System (KU-CBCS), framed under Section 44(1) (C) of K.S.U. Act, 2000.

#### **MASTER OF SCIENCE CHOICE BASED CREDIT SYSTEM (CBCS)**

##### **Title:**

These Regulations shall be called “Karnatak University Regulations Governing Post-Graduate under the Choice Based Credit System” for Master Degree programmes.

##### **Commencement:**

These Regulations shall come into force from the academic year 2019-2020.

##### **Definitions:**

In these Regulations, unless otherwise mentioned:

- a) “University” means Karnatak University:
- b) “Post-Graduate Programmes” means Master’s Degree Courses.
- c) “Compulsory Course” means a fundamental paper which a student admitted to a particular Post-Graduate programme should successfully complete to receive the Post-Graduate Degree in the concerned subject.
- d) “Specialization Paper” means an advanced paper due to departmental choice for students wanting to receive Degree in the specialization area:
- e) “Open elective” means a course offered by Department for students of other Departments in the same Faculty. Students have freedom to choose from a number of optional courses offered by other Department/s to add to their credits required for the completion of their respective programmes: however, if in a P.G. Centre there is only one Department for the time being, the students of that Department should study that open elective course.
- f) “Credit” means the unit by which the course work is measured. For this Regulation, one Credit means one hour of teaching work or two hours of practical work per week. Normally a Semester is of 16 weeks duration in any given academic year. As regards the marks for the courses, 1 credit is equal to 25 marks, 2 credits is equal to 50 marks, 3 credits is equal to 75 marks and 4 credits is equal to 100 marks as used in conventional system.
- g) “Grade” is an index to indicate the performance of a student in the selected course. These Grades are arrived at by converting marks scored in each subject by the candidate after completing his/her Internal Assessment and Semester end Examinations. Each course carries a prescribed number of the marks of credits. These

grades are awarded for each subject after conversion of the marks and after completion of the examinations in each semester.

- h) “Grade Point Average” of GPA refers to an indication of the performance of the student in a given semester. GPA is the weighted average of all Grades a student gets in a given semester. The GPA depends on the number of courses student takes and the grades awarded to him/her for each of the subjects so chosen.
- i) “Cumulative Grade Point Average” or CGPA refers to the cumulative Grade Point Averages weighted across all the semesters and is carried forward. The calculations of the GPA, CGPA is shown at the end of this regulation.

### **Minimum Eligibility for Admission:**

The students who have successfully completed the three year/four-year Degree course or any other Degree course of this University or of any other University recognized as equivalent there to by this University shall be eligible for admission to the Post Graduate Programmes under the KU-CBCS Programme provided they also satisfy the eligibility conditions like percentage of marks etc., as may be prescribed by the University and as per Ordinance of the course.

### **Entrance Test**

Candidate seeking admission to the course shall be required to appear for entrance test conducted by the University, for the 1<sup>st</sup> Semester.

### **Selection for Admission**

The selection of students shall be made on merit in each category of reservations as per the University rules for 1<sup>st</sup> Semester.

### **Intake**

The total number of candidates to be admitted to the course would be 52 only for the 1<sup>st</sup> semester. Seven seats are allocated to other University candidates of which one for other University within the state 6 and one for Outside state. Fifteen seats are under enhanced fee. Total Seats is 52.

### **Course of Study:**

The courses of study for M.Sc. Zoology degree shall comprise of Theory and Practicals as noted in the syllabus.

**Note: Specification of Degrees as per UGC notification dated March 2014 published in the Gazette of India, 5<sup>th</sup> July 2014 (Part III Section 4).**

### **Duration of the Programme:**

The programme of study for the Post-Graduate Master Degree shall normally extend over a period of two academic years each academic year comprising of two semesters, and each semester comprising of sixteen weeks of class work.

## **Medium of Instruction**

The medium of instruction and examination is English.

## **Minimum Credits and Maximum Credits:**

- a) There shall be two categories of courses viz., Compulsory course and Open Elective Course. Compulsory course should be from the concerned department only. The Open Elective are the courses offered by other Departments in the same Faculty.
- b) Each course shall have a definite course objective, Eligibility criterion for taking the course, scheme of Evaluation including the components of Internal Assessment (IA) marks, Projects (if any), the number of contact hours, type of practical and the prescribed credits.
- c) The credits for each of compulsory course may vary from 4 and 2 credits- theory and practical respectively. In case of Open Elective Course, it shall be 4 credits for each paper.
- d) A student shall register for minimum of 18 credits and a maximum of 30 credits per semester. However, to qualify for the degree in any Department under any school and faculty, he/she should have registered and cleared a minimum number of credits, which vary from course to course.

## **Course Structure:**

- a) The students of Post-Graduate Programme shall study the courses as may be approved and prescribed by the Academic Council of the University from time to time.
- b) A typical Master Degree program consists of a number of courses. This number varies from discipline to discipline. The term course is used to indicate a logical part of a subject matter of the programme (also referred to as paper). In essence the courses are of three types:
  - i. Compulsory Course
  - ii. Open Elective Course.
- c) Each programme shall have a set of compulsory course that a student must complete to get the degree in the concerned Department. These are distributed in each semester. There could be a minimum of such papers for each semester depending on the department.
- d) The students shall also choose a minimum number of specializations Course offered within the department. Each department will offer at least one specialization paper in the third and fourth semester. The Department, BOS and the Faculty may also have spell out the number of such specialization courses a student will have to take for the specialization. The Department offering of specialization course shall provide the flexibility in the system so that the student can opt for a variety of programmes depending upon their interest.
- e) Each department shall offer at least two Open Elective courses for the II and III Semester for students from other department. Student from the same department are generally not allowed to opt the courses offered as Open Elective course in the same department.
- f) Each course (paper) in this system is designed carefully to include lectures / tutorial/ Laboratory work/ seminars/ Project work/ practical training/ report writing/ Viva-voce

etc., to meet effective teaching and learning needs and the credits are assigned suitably.

- g) Master Degree Programmes are essentially semester system Programmes. There shall be 4 semesters in each Programme. There shall be two semesters for each year of the Programme. Each of the Semester will be of 16 weeks duration including evaluation and grade finalization period. The academic session in each semester will provide 90 teaching days with 48 hrs of teaching / learning periods in six days session per week.
- h) The normal calendar for the semester would be as follows:
  - i. I and III semester - August to November
  - ii. II and IV Semester - January to April

### Attendance

- a. Each paper shall be taken as a unit for the purpose of calculating the attendance.
- b. Each student will have to sign and mark his attendance for every hour of teaching of each paper. At the end of every month all teachers shall notify the attendance of every student on the Notice Board of the department during 2<sup>nd</sup> week of every month. Chairman shall certify the fulfilment of required attendance of every candidate in the Examination form.
- c. Certain proportion of the marks in Internal Assessment shall be awarded based on attendance as an incentive to the student for regularity in attendance.
- d. A student shall be considered to have satisfied the requirement of attendance for each paper, if he/she has to attend not less-than 75% of the number of classes held up to the end of the semester including tests, seminars, group discussions, practical, tutorials, etc.
- e. However, if a student represents his/her institution, University, State or Nation in sports, NCC, NSS of Cultural of any other officially sponsored activities, he/she shall be eligible to claim the attendance for the actual number of days participated subject to a maximum of 20 days in a semester based on the specific recommendation of the head of the Department.

### Course Outline for the M. Sc. Zoology

#### SEMESTER – I Theory

| Paper Code | Title of the Paper       | Max. Marks | Internal Assessment | Total Marks | Credits | Teaching Hrs. |
|------------|--------------------------|------------|---------------------|-------------|---------|---------------|
|            | <b>Compulsory Papers</b> |            |                     |             |         |               |
| PG87T101   | Biosystematics           | 75         | 25                  | 100         | 4       | 4 Hrs / week  |
| PG87T102   | Biology of non-chordates | 75         | 25                  | 100         | 4       | 4 Hrs / week  |
| PG87T103   | Biology of chordates     | 75         | 25                  | 100         | 4       | 8 Hrs / week  |
| PG87T104   | Environmental Biology    | 75         | 25                  | 100         | 4       | 4 Hrs / week  |

## **Internship**

Nil

## **Submission of Dissertation**

- a) M.Sc. III semester students shall have to choose a topic for dissertation and preliminary preparation be carried out under the guidance of a teacher.
- b) M.Sc. –IV semester students shall have to submit the dissertation on the chosen topic, before the commencement of the theory examination.
- c) Candidates keeping terms but not appearing for the theory and practical papers and not submitted the dissertation within the prescribed time may appear for respective examination and submit the dissertation within the prescribed time.
- d) Candidates appearing for the examination under the provision of (c) will be not eligible for the award of any rank, prize, medal etc.

## **Evaluation:**

- a. Each Course has two components, the first being Internal Assessment Marks and the second being the Semester End Exams. The Internal Assessment (IA) marks are based on continuous Internal Assessment. The total marks for the Internal Assessment would be based on the total credit awarded to the Course. For instance, if a Compulsory Course has a Credit award of 4, then the total max marks would be 100 for the subject.
- b. The marks shall be displayed on the Notice Board of the Department also. The tests shall be written in a separately designated book and after evaluation; the same should be shown to students.
- c. In case of candidates who wish to appear in improvement examinations, if any, the marks obtained in the Internal Assessment shall not be revised. There is no improvement for internal assessment.
- d. To encourage the students for the regular participation in academic curricula following break-up for attendance has been recommended.

| <b>Attendance</b> | <b>Marks Allotted</b> |
|-------------------|-----------------------|
| 91 to 100%        | 3                     |
| 81 to 90%         | 2                     |
| 75 to 80%         | 1                     |

- e. Students seeking the condoning of attendance after representing the University have to produce attendance certificates from the concerned authority and that attendance period to condone of shall be considered for the allotment of marks as under.
- f. There shall be one end semester examination of 3 duration (for 75 marks/ paper). Each answer scripts of the semester end examination (theory and project report) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks such a script shall be assessed by third

external examiner. The marks allotted by the third examiner shall be average with nearer mark of the two evaluation

### **Completion of Course:**

- a. A candidate is expected to successfully complete P.G. Master Degree course in two years from the date of admission.
- b. Whenever the syllabus is revised, the candidate reappearing shall be allowed for PG Degree examinations only according to the new syllabus.

### **Declaration of Results:**

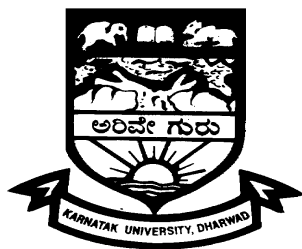

- a. Minimum for a pass in each paper shall be 40% of the total 100 marks including both the IA and the semester end examinations. However, candidate should obtain at least 40% of the marks in the Semester End Examination. There is no minimum in the IA marks. However, after adding the IA and the semester end examination, the candidates should score a minimum of 40 % of the maximum marks for the subject.
- b. The candidates, seeking improvement of their results shall submit a representation along with a permissible fee to the Registrar (Evaluation) and surrender the degree certificate/ provisional pass certificate /original marks card of that semester within 15 days of announcement of result.

### **Marks and Grading**

The grading of successful candidate at the examination shall be as follows:

| <b>Percentage</b> | <b>GPA/CGPA</b> | <b>Letter</b> | <b>Class</b>                 |
|-------------------|-----------------|---------------|------------------------------|
| 75.00 to 100.00 % | 7.50 to 10.00   | A             | First Class with Distinction |
| 60.00 to 74.90%   | 6.00 to 7.49    | B             | First Class                  |
| 50.00 to 59.94%   | 5.00 to 5.99    | C             | Second Class                 |
| 40.00 to 49.94%   | 4.00 to 4.99    | D             | Pass                         |
| Less than 40.00%  | Less than 4.00  | F             | Fail                         |

**KARNATAK UNIVERSITY, DHARWAD**

**MASTER OF SCIENCE**

**CHOICE BASED CREDIT SYSTEM**

**(M.Sc. – CBCS)**

## **PROGRAMME SPECIFIC OUTCOMES (PSOS)**

After successfully completing of M. Sc. Zoology Program, the students will be able to:

- Develop in-depth knowledge about the concepts of Zoology from the organism level to the molecular level. Understand the significance of animal taxonomy and systematics.
- Comprehend and interpret the evolutionary relationships among different animal groups.
- Learn the skills of handling various scientific equipment and perform the experiments.
- Explore various applied fields with the knowledge of sericulture, apiculture, fisheries, poultry, vermiculture and dairy farms etc.
- Communicate the importance of ecosystem, biodiversity its conservation and awareness about pollution control to the society.
- To acquire knowledge on the various aspects of Zoology including Molecular Cell Biology, Molecular Genetics, Physiology, Developmental Biology, Evolutionary Biology, Comparative Endocrinology, Biology of Reproduction, and Animal Biotechnology.
- Develop theoretical and practical knowledge in handling the animals and using them as model organisms.
- Develop skill in effective data presentation and dissertation writing.

**Semester-I**

| <b>Paper Code and Name</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <b>PG87T101Biosystematics</b> |

| Historical perspective of species concept (typological, nominalist, biological), kinds of species- sibling, sympatric, allopatric, syntopic, ring species, polytypic and monotypic species. Intraspecific groups (variety, morphs, subspecies, temporal subspecies, race and clines).                                                                                                                                                                                                                                                                                                                                              |                                 |
| Unit III: Taxonomic Collection, Preservation and Identification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 10                              |
| Collection - Purpose, value, scope of collection, content of collection, significance of museum collections, legal aspects of collecting animals, post collection processes. Preparation and packaging of specimen for posting. Preservation - Methods, taxidermy, plastination, factors responsible for the deterioration of museum specimens. Curating of collections - museum collection policy, preparation of material for study, housing and cataloging, exchangeable and expendable materials and loans. Identification - Systematic process of sorting and labelling, procedure of identification; identification services |                                 |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |      |

| Unit II: Molecular organization of biomembranes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                 |
| Organization and composition of plasma membrane, Fluid mosaic model. Membrane fluidity- role of cholesterol. Membrane asymmetry. Transport across membranes (solutes, gases, ions and water); Passive and active transport, Cell junctions: types, structure and functions                                                                                                                                                                                                                                                                | (08) Hours                      |
| Unit III: Molecular organization and functions of cell organelles                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                 |
| Endoplasmic reticulum; Ribosomes – Structure, translation and translocation, nascent polypeptide chain, protein folding and processing. Golgi apparatus- signal hypothesis, protein glycosylation, protein sorting and transport, endocytosis and lysosome formation. Mitochondria – bioenergetics, oxidative phosphorylation, protein import and transport metabolites; Peroxisomes. Cytoskeleton- Molecular organization of microfilaments, Intermediate filaments and microtubules and their role in cell architecture and functioning | 8 Hours                         |
| Unit IV: Biomolecules                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                 |
| Amino acids- structure and classification, Peptide bond formation. Proteins - primary, secondary and tertiary structures. Polypeptide folding: Random coiling, Alpha helix and Beta sheet. Protein modifications - Glycoproteins, Proteoglycans and Lipoproteins. Carbohydrates - Complex polysaccharides. Lipids – Triglycerides and compound lipids                                                                                                                                                                                     | 8Hours                          |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |         |

| <b>COURSE OUTCOMES (COs)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                        |
| After completion of Developmental Biology paper students will be able to: <ul style="list-style-type: none"> <li>Understand the process of development of animals, process of organogenesis of selected organs, development of extra, embryonic membrane and the nature and physiology of placenta.</li> <li>Learn the inducer and inductor role in embryogenesis and gaining knowledge about the metamorphosis and the process of regeneration. Familiar with various stages involved in the developing embryo. Understand the initial developmental procedures involved in Amphioxus, frog and chick. Ability to explain various Prenatal Diagnosis.</li> <li>Familiarise with the principle of developmental biology, various Techniques and tools of Embryology.</li> </ul> |                                        |

|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| <b>Unit I: Introduction</b>                                                                                                                                                                                                                                                                                                                                                                                      |                                 |
| Overview of development, Anatomical and experimental approach to developmental Biology: embryological origin of gene theory, Evidence for genomic equivalence. Nuclear transplantation experiments in frog and mammal- the concept of totipotency. Nucleo-cytoplasmic interactions during early development in Ameoba and Frog.                                                                                  | (6)                             |
| <b>Unit II: Fertilization and early development</b>                                                                                                                                                                                                                                                                                                                                                              |                                 |
| Fertilization- Cellular and biochemical processes during early fertilization; Strategies for monospermy and prevention of polyspermy in conservation of species; Signal transduction and egg activation.                                                                                                                                                                                                         | 5Hours                          |
| <b>Unit III: Development in Drosophila</b>                                                                                                                                                                                                                                                                                                                                                                       |                                 |
| Genetic and molecular analysis of axis formation in <i>Drosophila</i> : Development of larva; Establishment of anterior, posterior, dorsal and ventral polarity; Role of maternal effect genes, segmentation genes and homeotic selector genes.                                                                                                                                                                  | 8 Hours                         |
| <b>Unit IV: Development in Amphibians</b>                                                                                                                                                                                                                                                                                                                                                                        |                                 |
| Genetic and molecular analysis of axes formation in amphibia: Mechanism of progressive determination of amphibian axes – the origin and molecular biology of Nieuwkoop centre, primary embryonic and regional specificity of induction: Organizer functions and its diffusible proteins.                                                                                                                         | 9 Hours                         |
| <b>Unit V: Cell differentiation and organogenesis</b>                                                                                                                                                                                                                                                                                                                                                            |                                 |
| Development of somites and differential cell proliferation in shaping organ primordia – Myogenesis – Determination of myotome, specification and differentiation by myogenic bHLH proteins, muscle cell fusion. Differentiation of neural tube - Primary and secondary neurulation, Differentiation of neural tube- Anterior-posterior axis, dorsoventral axis; Differentiation of erythrocytes - Hematopoiesis. | 10 Hours                        |
| <b>Unit VI: Post-embryonic development and Teratology</b>                                                                                                                                                                                                                                                                                                                                                        |                                 |
| Metamorphosis in Amphibia- Morphological, biochemical changes and molecular mechanism of hormonal regulation; Regeneration in Hydra, Planaria and Salamander. Growth- concept, isometric and allometric. Teratology: Causation of abnormal development, experimental studies; Teratogens.                                                                                                                        | 10 Hours                        |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                       |

| <b>Paper Code and Name</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <b>PG87T302: Evolutionary Biology</b> |
| <b>COURSE OUTCOMES (COs)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                       |
| After completion of Evolutionary Biology paper students will be able to:<br>1. Understand the contributions of evolutionary biologists and interpret various theories on evolution.<br>2. Identify the significance of evolution in understanding biology.<br>3. Explain the Hardy-Weinberg principle of genetic equilibrium and various forms of evolutionary forces.<br>4. Grasp the concepts of Neo-Darwinism and Non-Darwinism.<br>5. Get an insight into different mechanisms of speciation and origin of higher categories.<br>6. Understand the evolution of life histories, trade-offs and the evolutionary basis of aging.<br>7. Understand the theories of evolution and highlighted the role of evidences in support of evolution.<br>8. Learn the evolutionary knowledge through the concepts of coloration and mimicry.<br>9. Obtain the knowledge about direct observation of fossils and their evolutionary relationship of animal groups.<br>10. Understand the inheritance of mendelian traits by direct observation among students.<br>11. Acquire knowledge skill development and observation of blood group identification and pedigree chart preparations. |                                       |

| <b>PG87T302: Evolutionary Biology</b>                                                                                                                                                                                                                                                                                                                                                                                   | <b>Teaching Hours (Max. 48)</b> |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| <b>Unit I: Introduction to evolution and Theories of evolution</b>                                                                                                                                                                                                                                                                                                                                                      |                                 |
| Evolution of evolutionary thoughts. Lamarckism; Natural Selection (Darwinism), Contributions of Charles Darwin, Alfred Russel Wallace, Thomas Malthus and Hugo de Vries; Postulates of Natural Selection and evidences; Natural Selection in action- Industrial melanism; Darwin's finches, Experimental evidences of Natural selection- Endler's guppies ; Concepts of inclusive fitness – altruism and kin selection. | 14 Hours                        |
| <b>Unit II: Neo-Darwinism</b>                                                                                                                                                                                                                                                                                                                                                                                           |                                 |
| Hardy-Weinberg Law of genetic equilibrium; Genes and genotype frequencies, Concept of Mendelian Population and gene pool; Factors operating against Hardy-Weinberg Law; Selection - types of selection- balancing selection, frequency dependent selection, directional selection, disruptive selection, artificial selection; Random Genetic drift (Bottle neck effect, Founder's effect); Migration.                  | 10Hours                         |
| <b>Unit III: Non-Darwinism</b>                                                                                                                                                                                                                                                                                                                                                                                          |                                 |
| Molecular polymorphism: Nucleic acids and proteins; Molecular clock; Neutral theory of evolution and evolution random walk; Forces in evolution- stochastic vs deterministic.                                                                                                                                                                                                                                           | 4 Hours                         |
| <b>Unit IV: Speciation and origin of higher categories</b>                                                                                                                                                                                                                                                                                                                                                              |                                 |
| Reproductive isolation mechanisms – pre- and post-zygotic. An overview of speciation - allopatric, sympatric, peripatric and parapatric modes of speciation; Phyletic gradualism and punctuated equilibrium; micro and macroevolution                                                                                                                                                                                   | 6 Hours                         |
| <b>Unit V: The Evolution of Life histories</b>                                                                                                                                                                                                                                                                                                                                                                          |                                 |
| Basic questions in life history evolution; Life history trade-offs: Optimality arguments, age and size at maturation; clutch size and reproductive investment, empirical evidences of life-history trade-offs; Life span and aging; evolutionary theories for aging.                                                                                                                                                    | 10 Hours                        |
| <b>Unit VI: Impact of Darwin's thoughts in understanding human health and diseases</b>                                                                                                                                                                                                                                                                                                                                  |                                 |
| Darwinian medicine; Proximate versus ultimate causes of diseases; Design defects; Defense Mechanisms; Allergy; Evolution of antibiotic / Pesticide resistance; Evolution of behaviors such as anxiety, fear and depression.                                                                                                                                                                                             | 4 Hours                         |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                       |

| <p>After completion of Animal Biotechnology paper students will be able to:</p> <ol style="list-style-type: none"> <li>1. Get knowledge about animal cell culture, growth of cell lines and its applications</li> <li>2. Understand gene and animal cloning through r DNA technology.</li> <li>3. Describe recombinant DNA technology, genetic manipulations and their use in a variety of industrial processes.</li> <li>4. Highlight the importance of transgenic animals and application of gene therapy.</li> <li>5. Understand the applications of animal biotechnology in production of various products, nanotechnology and its applications.</li> <li>6. Attain knowledge about the history, branches, scope of biotechnology and gene transfer technique.</li> <li>7. Understand the recombinant technology, gene integration into the vector and with host genome and creation of transgenic animals.</li> <li>8. Attain knowledge about in-vitro fertilization and embryo transfer.</li> <li>9. Understand the DNA finger printing, blotting technique and micro array.</li> <li>10. Describe the applications of stem cells and gene therapy and biotechnology devices, sterilization technique, and DNA isolation from cells and its use in animal identification.</li> </ol> |                                       |

|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| Unit I: Introduction<br>Concept, scope, development, current status and future of animal biotechnology                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 02 Hours                        |
| Unit II: Animal cell culture and Stem cell technology:<br>Animal cell culture: Cell culture techniques; Cell lines and storage. Equipments, Culture media, Applications of animal cell culture.<br>Stem cell technology: Types and properties of stem cells, Differentiation of stem cells, Advantages and disadvantages of stem cell technology.                                                                                                                                                                                                             | 10 Hours                        |
| Unit III: Gene and Animal cloning<br>Gene cloning: Method of gene cloning; Molecular tools; Restriction enzymes, ligases and other enzymes, cloning vectors; Selection and screening of transformed cells. Cloning strategies: Construction of genomic and cDNA library. Application of gene cloning.<br>Gene transfer techniques- Transformation; Microinjection; Electroporation; Polycations; Lipofection and Retroviral infection.<br>Animal cloning: Cloning in different animals with special reference to Dolly; Somatic cell nuclear transfer (SCNT). | 12 Hours                        |
| Unit IV: Transgenic Animals and Gene therapy<br>Transgenic animals: Importance of rDNA technology; Genetically Modified Organisms (GMOs), gene targeting, gene knock-out and knock-in technology, gene-silencing; Advantages and disadvantages of transgenic animals – ethical concerns.<br>Gene therapy: Methods; somatic and germ line therapy, gene therapy in animals and embryos.                                                                                                                                                                        | 8 Hours                         |
| Unit V: Application of Animal Biotechnology<br>Production of regulatory proteins (insulin, somatostatin); Whole blood; RBC; Platelet concentration, Albumin; Clotting factors, Hemoglobin. Anticoagulants (heparin, vitamins, plasminogen activator). Hybridoma technology - Production and applications of monoclonal antibody.<br>Recombinant vaccines; DNA vaccines, DNA probes, Biochips.                                                                                                                                                                 | 8 Hours                         |

| Unit I: Aim and scope of Endocrinology                                                                                                                                                                                                                                                                                                                                                                                                                                |                                 |
| Pioneers in Endocrinology - Discovery of hormones; Techniques in endocrinology; Hormones as chemical messengers - Classification of hormones.                                                                                                                                                                                                                                                                                                                         | 5 Hours                         |
| Unit II: Comparative anatomy of Endocrine glands                                                                                                                                                                                                                                                                                                                                                                                                                      |                                 |
| Endocrine hypothalamus, pituitary, pineal, thyroid, parathyroid, adrenal and pancreas; Neurovascular hypothesis.                                                                                                                                                                                                                                                                                                                                                      | 5 Hours                         |
| Unit III: Hormones – Homeostasis and Biological actions                                                                                                                                                                                                                                                                                                                                                                                                               |                                 |
| Positive and negative feedback of hormone action. Calcium and glucose homeostasis; ormonal regulation of intermediary metabolism: carbohydrate, protein and lipid. Hormones and behaviour. Biological actions of hormones of hypothalamus, pituitary, pineal, thyroid, parathyroid, adrenal and pancreas.                                                                                                                                                             | 14 Hours                        |
| Unit IV: Mechanism of hormone action, Biosynthesis and secretion of hormone                                                                                                                                                                                                                                                                                                                                                                                           |                                 |
| Hormone receptors- types and structure, regulation; Mechanism of hormone action- peptide hormone, receptor signal transduction, G proteins, Cyclic AMP, other membrane messengers - Protein kinase C; Phospholipase C. Mechanism of action of steroid hormones; Termination of hormone action. Biosynthesis and secretion of steroid hormones - corticosteroids and sex-steroids, Catecholamines, thyroid hormones, Peptide hormones- insulin; Hormonal inactivation. | 13 Hours                        |
| Unit V: Growth factors                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                 |
| Insulin, Prolactin, placental lactogen and IGFs; Neurotrophic growth factors; Hematopoietic growth factors; Epidermal growth factors; Transforming growth factors; Fibroblast growth factors; Cytokines, chalone.                                                                                                                                                                                                                                                     | 5 Hours                         |
| Unit VI: Immunoendocrinology                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                 |

|                                                                                                                                                                                                                                                                                                                                 |         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| An overview of organization and function of immune system, effect of endocrine ablation and replacement on immune response; Sexual dimorphic immune response and its mechanism; Effect of pregnancy on immune response; Hormonal regulation of immune responses; Immuno-endocrine interactions involved in the immune response. | 6 Hours |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                        |

| <b>COURSE OUTCOMES (COs)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                        |
| After completion of Biology of Reproduction paper students will be able to:<br>1. Understand the overview of reproduction, differentiation of sex and gonads and their hormonal regulation, implantation gestation, parturition and lactation.<br>2. Describe the structure of the organs of the male and female reproductive system and their function like, spermatogenesis, oogenesis and folliculogenesis.<br>3. Describe the biological principles underlying contraceptive technology, compare and contrast the various options for control of fertility.<br>4. Explain how sexually transmitted disease will spread, its control and may contribute to altered neonatal or reproductive function. |                                        |

|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| Unit I: An overview of Reproduction                                                                                                                                                                                                                                                                        |                                 |
| Sex determination and differentiation of gonads, gonadal ducts and their hormonal regulation                                                                                                                                                                                                               | 4 Hours                         |
| Unit II: Male Reproductive system                                                                                                                                                                                                                                                                          |                                 |
| Anatomy of male reproductive system, Histo-architecture of testis, Spermatogenesis, Functions of Sertoli and Leydig cells; Seminiferous epithelial cycle and wave, Stem cell renewal. Hormonal control of spermatogenesis. Patterns of spermatogenesis and testicular cycles in non-mammalian vertebrates. | 10 Hours                        |
| Unit III: Male accessory reproductive organs                                                                                                                                                                                                                                                               |                                 |
| Functional morphology and hormonal regulation of epididymis, Vas deferens, Prostate gland, Seminal vesicle, Coagulating and Cowper's glands; Biology of spermatozoa, and Biochemistry of semen; Biological actions of androgens.                                                                           | 10 Hours                        |
| Unit IV: Female Reproductive system                                                                                                                                                                                                                                                                        |                                 |
| Anatomy of female reproductive system; Histo-architecture of ovary, Folliculogenesis, Follicular atresia, ovulation, Corpus luteum; Hormonal regulation of estrous and menstrual cycle; Biological actions of estrogens. Structure of ovary and ovarian cycles in non-mammalian vertebrates.               | 10Hours                         |
| Unit V: Implantation, Gestation, Parturition and Lactation                                                                                                                                                                                                                                                 |                                 |
| Types of implantation, sequential events and hormonal regulation, delayed implantation; Placenta – histophysiology and endocrine function, Endocrine regulation of pregnancy and parturition; Lactation– Development of mammary glands, Hormonal control of lactation.                                     | 8Hours                          |
| Unit VI: Fertility and Infertility                                                                                                                                                                                                                                                                         |                                 |
| Fertility control in male and females – Natural methods, barrier methods, intrauterine devices, hormonal contraceptives, surgical and immunological approaches; Amniocentesis; ARTs – Induction of ovulation, Artificial insemination, IVF, GIFT, ZIFT, Surrogate pregnancy, Gestational carrier.          | (06)                            |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                 |

| <b>COURSE OUTCOMES (COs)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                 |
| After completion of Applied Zoology paper students will be able to:<br>1. Get a holistic idea about the aquaculture, fisheries, apiculture, lac, poultry, dairy, vermiculture, sericulture, and their industries.<br>2. Understand the various types and methods of aquaculture practices and the physiology and reproductive mechanisms of important fishes.<br>3. Learn the modern techniques and methods of fishery industries.<br>4. Attain knowledge about important cultivable fin fishes, shell fishes and importance of value added fishery products.<br>5. Understand the culture of mulberry plants, methods of rearing <i>B. mori</i> .<br>6. Gain knowledge about quality determination of mulberry silk and marketing strategies.<br>7. Describe the diseases and pests of <i>B. mori</i> . |                                 |
