## Activities 6

**Organizer:** SPIE.Karnatak University Student Chapter Dharwad.

**Topic:** “NANOMATERIALS”

**Speaker:** Dr. M. N. Kalasad, Associate Professor & Chairman, Department of Physics Davangere University, Davangere, Karnataka, India

**Date & Time:** 28.11.2020; 4:00-5:30 PM India.

**Meeting ID:** <https://meet.google.com/oqc-nths-wif>

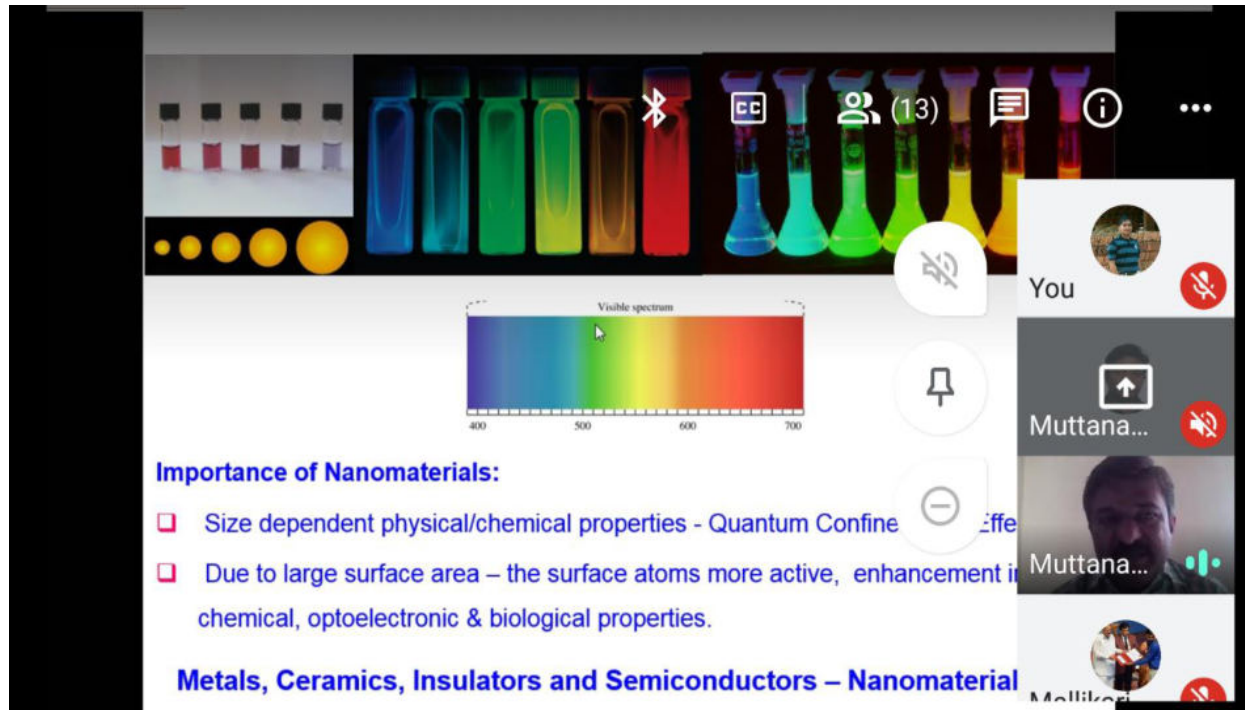

**Participants:** 20

**Cost:** \$ 10.00

**Description:** Nanomaterials have been on the red carpet of research world in the recent times. The optical and photonic applications of nanomaterials are innumerable and the hunt is still on. In this regard, Dr M N Kalasad presented his lecture on the basics of nanomaterials and also the optically active semiconductor Quantum Dots (QD). He shared his work experience and huge understandings on various types of fluorescent QDs along with their method of synthesis and characterization. He described the underlying physics behind such semiconductor QDs, various methods to obtain them and illustrated their wide applications. His talk was followed with a long interaction session which gave more clear understanding towards the capabilities and possibilities of nanomaterials in Photonics applications.

**Importance of Nanomaterials:**

- Size dependent physical/chemical properties - Quantum Confinement Effect
- Due to large surface area – the surface atoms more active, enhancement in chemical, optoelectronic & biological properties.

**Report of the activity:**

**2016-2017**

Dr. H. Nagangouda colossally correlated the expedited energy harvesting with economy role in it. As renewable energy and energy conservation are the basic needs, for the needing to be demanded in the, upcoming days has been explained. Nation must be in competence with global growing rate that demands of stable economy, which can be well backed up by using renewable energy was explained. He has interacted with M.Sc. and Ph.D. students and guided their feature work towards the energy harvesting.

**2017-2018**

Science which is fascinatingly feasible to every question, arousing around us, when one tries to find it with keen observations, was the topic of the day. Speaker concreted the ideology of scientific awareness among the audience. Also having the willingness of vast reading on the

each and every corner of science can improve the ability to look over the problems was the basic point of celebration. Apart from this student find it motivating event for them to pursue carrier in science.

#### 2018-2019

The research is incomplete when it is done with only one idea and combining the ideas from all the subjects of science can be fruitful. Starting with this idea today's Science Day celebration begins and the way of materializing the ideas studied in science was the topic of day. Applied science can bring the society to believe in scientific innovations and motivates them to orient towards it.

#### 2019-2020

liquid crystalline materials are one of the widely used discoveries in the history of science even after so many different inventions for electronic displays, LCDs, still are the most used materials in the screening and all other display applications. The discussion session was followed and many student members participated and found answers to their questions.

#### 2020-2021

Nanomaterials have been on the red carpet of the research world in the recent times. The optical and photonics applications of the nanomaterial are innumerable and the hunt is still on. The underlined Physics behind semiconductor QDs various methods to obtain them and illustrated their wide applications. All the students participated with more interest and enthusiasm for the event and enhanced their knowledge and boost up to contribute for the better nation.
