A working lunch to all participants will be provided for all three days.

NOTE:

Sharing -accommodation is provided on payment basis or Participants can arrange their convenience.

Level 1 - Technician restricted profile anthropometrist

Level 1 is designed for the majority of ISAK-accredited anthropometrists who have little on-going requirement for more than the measurement of base measurements and skinfolds. A small number of girths and three bone breadths have also been included at this level to enable the monitoring of health and growth variables, and calculation of the somatotype and body composition - all of which ISAK sees as valuable tools for the comparison of body size, shape and composition. Thus, a person who successfully completes Level 1 can demonstrate adequate precision in 4 base measures, 8 skinfolds, 6 girths and 3 breadths and has a basic understanding of the theory of anthropometric applications.

Level 2 - Technician full profile anthropometrist

Level 2 is designed for those anthropometrists who wish to offer their subjects a more-comprehensive range of measurements. A Level 2 anthropometrist can demonstrate adequate precision in 4 base measurements, 8 skinfolds, 13 girths, 9 lengths and heights, 9 breadths and depths and has a broad understanding of the theory of anthropometry and its interpretation.
