KARNATAK UNIVERSITY, DHARWAD

POST – GRADUATE DEPARTMENT OF STUDIES IN CRIMINOLOGY AND FORENSIC SCIENCE

Regulations and Syllabus

of the P.G. Diploma in Forensic Science Programme

(PGDFS)

(I to II Semesters)

OBJECTIVE OF THE COURSE

There is a great need to infuse amongst young generation the urge to involve science in all their role and goal endeavors and to make them realize that application of scientific style is not only the correct and valid procedure besides being simpler and humane. With this noble objective in mind we thought it would be proper as well as appropriate that scientific way of investigation where science was full availed and further the variety and sweep of science must be brought to the knowledge of the young minds.

Regulations Governing Post-Graduate Diploma in Forensic Science

Programme (PGDFS)

Under the

Faculty of Social Science

(Framed under Section 44(1)(c) of the K.S.U. Act, 2000)

1.0 Title

These Regulations shall be called “Regulations Governing the Post Graduate Diploma in Forensic science Programme (PGDFS),” Karnatak University, Dharwad.

2.0 Commencement

These Regulations shall come into effect from the date of assent by His Excellency, the Chancellor of the University.

3.0 Definitions

In these Regulations, unless otherwise provided:

- A “**Academic Council**” means Academic Council of the University constituted according to the *Karnataka State Universities Act, 2000*.
- B “**Board of Studies**” means P.G. Board of Studies in Criminology and Forensic Science, Karnatak University, Dharwad.
- C **Course** means paper, which the student admitted to P.G. Diploma in Forensic science Programme (PGDFS), should successfully complete to receive the Post Graduate Diploma of Forensic science Programme.
- D “**Student**” means the candidate admitted to P.G. Diploma in Forensic Science Programme (PGDFS).
- E “**University**” means Karnatak University, Dharwad.

4.0 Minimum Eligibility for Admission

A candidate, who has successfully completed Bachelor’s Degree in science, Criminology, Forensic Science, medical science or equivalent from this University or of any other University recognized as equivalent thereto by this University, shall be eligible for admission to the P.G. Diploma in Forensic science Programme (PGDFS) provided the candidate also satisfies the conditions like the minimum percentage of marks and other eligibility conditions as prescribed by the University from time to time. Admission shall be as per the Govt. of Karnataka Reservation Policy and directions issued in this direction from time to time.

4.1 Intake capacity :25

4.2 **Teachers qualification** : as per UGC/ University norms and experts from Forensic Science and related background subjects

5.0 **Duration of the Programme**

The duration of P.G. Diploma in Forensic Science Programme(PGDFS)shall be one year duration comprising of two semesters.

6.0 **Medium of Instruction and Evaluation**

The medium of instruction for P.G. Diploma in Forensic Science Programme (PGDFS)shall be in English.

7.0 **Programme Structure**

7.1 The students of P.G. Diploma in Forensic Science Programme(PGDFS)shall study the courses as may be approved by the Board of Studies in Criminology and Forensic Science (PG), Faculty and the Academic Council of the University from time to time subject to minimum and maximum marks as outlined in these regulations.

7.2 The detailed programme structure for P.G. Diploma in Forensic Science Programme(PGDFS)shall be as stated in Annexure –I.

8.0 **Attendance**

8.1 Each course shall be taken as a unit for the purpose of calculating the attendance.

8.2 Each student shall sign the attendance register maintained by the Department for each course for every hour/unit of teaching. The course teachers shall submit the monthly attendant report to the Chairperson of the Department who shall notify the same on the notice board of the Department during the first week of the subsequent month.

8.3 Marks shall be awarded to the student for attendance as specified in the regulations concerning evaluation.

8.4 A student shall be considered to have satisfied the required attendance for each course if he/she has attended not less than 75 % of the total number of instructional hours during the semester.

8.5 There is no provision for condoning shortage of attendance.

8.6 The students who do not satisfy the prescribed requirement of attendance shall not be eligible for the ensuing examination. Such candidates may seek admission afresh to the given semester.

9.0 **Examination**

9.1 There shall be examination at the end of each semester conducted by the University.

9.1.1 There shall be semester-end examination of 3 hours duration for the courses carrying 75

marks.

- 9.1.2 Every student shall register for each semester-end examination as per the University Notification by submitting duly completed application form through the proper channel and shall also pay the fees prescribed.
- 9.1.3 The Office of the Registrar (Evaluation) shall allot the Register Number to the candidate at the 1st semester-end examination. That will be the Register Number of the candidate for subsequent appearances and semester-end examinations.
- 9.1.4 The programme is a fully carry-over system. A candidate reappearing for either the first or second semester examinations shall be permitted to take examinations as and when they are conducted.

9.1.5 Candidates who have failed, remained absent or opted for improvement in any course/ courses shall appear for such course/ courses in the two immediate successive examinations that are conducted. However, in the case of the candidates appearing for improvement of their marks, the marks secured in the previous examination shall be retained, if the same is higher.

9.1.6 Candidates who desire to challenge the marks awarded to them in the semester end examinations may do so by submitting an application along with the prescribed fee to the Registrar (Evaluation) within 15 days from the announcement of results.

9.2 **First semester**

- 9.2.1 There shall be a Board of Examiners to set, scrutinize and approve question papers.
- 9.2.2 The BOE shall scrutinize the question papers submitted in two sets by the paper setters and submit the same to the office of the Registrar (Evaluation).
- 9.2.3 There shall be single valuation for first semester. The examiners (Internal or External) shall value the answer scripts and shall indicate the marks awarded to each question on marks list.
- 9.2.4 The Office of the Registrar Evaluation shall process and announce the results.

9.3 **Second Semester:**

- 9.3.1 There shall be a Board of Examiners to set, scrutinize and approve question papers.
- 9.3.2 As far as practicable, it will be ensured that 50% of the paper setters and examiners are from other Universities/ Research Institutes.
- 9.3.3 Each answer script of the semester-end examination (theory and Practical /project report) shall be assessed by two examiners (one internal and another external). The marks awarded to that answer script shall be the average of these two evaluations. If the difference in marks between two evaluations exceeds 20% of the maximum marks, such a script shall be assessed by a third examiner. The marks allotted by the third examiner shall be averaged with nearer award of the two evaluations.

9.4 Evaluation

- 9.4.1 Each Course shall have two evaluation components - Internal Assessment (IA) and the Semester End Exams.
- 9.4.2 The IA component in a course shall carry 25% and the Semester End Examination shall carry 75%. Courses having 25% marks as internal assessment shall have 3 marks allotted to attendance.
- 9.4.3 Marks for attendance shall be awarded to the students as stipulated below:

Attendance (in percentage)	Marks
Above 90	3
Above 80 and up to 90	2
Above 75 and up to 80	1
75	No marks

- 9.4.4 Internal Assessment (IA) shall be based on written tests/ assignments/ seminars and /or any other instructional activity. However, the number of IA components per course per semester shall not be less than two.
- 9.4.5 The IA marks list shall be notified on the Department notice board as and when the individual IA components are completed and the consolidated list shall be submitted to the Office of the Registrar Evaluation before the commencement of semester-end examination.
- 9.4.6 The tests shall be written in a separately designated book supplied by the University which shall be open for inspection by the students after evaluation.
- 9.4.7 There is no provision for seeking improvement of Internal Assessment marks.

10.0 Maximum duration for completion of the Programme

- 10.1 A candidate admitted to P.G. Diploma in Forensic Science Programme (PGDFS) shall complete it within a period, which is double the duration of the programme from the date of admission.
- 10.2 Whenever the syllabi are revised, the candidate reappearing shall be allowed for the examinations only according to the new syllabi.

11.0 Declaration of Results

- 11.1 The minimum marks for a pass in each course shall be 40% of the total marks including both the IA and the semester-end examinations. Further, the candidate shall obtain at least 50% of the marks in the semester-end examination. There is no minimum for the IA marks.
- 11.2 Candidates shall secure a minimum of 50% in aggregate in all courses of the programme in each semester to successfully complete the programme.
- 11.4 For the purpose of announcing the results, the aggregate of the marks secured by a candidate in two semester examinations shall be taken into account. However, Ranks shall not be awarded in case the candidate has not successfully completed each of the semesters in first attempt or has not completed the programme in the stipulated time or had applied for improvement of results.

11.5 The grading of candidates at the examination shall be as follows:

Percentage of Marks	Class
70.00 % and above	First class with Distinction
60.00 to 69.99%	First Class
50.00 to 59.99%	Second Class

Annexure – I

Detailed Course Structure of the Post Graduate Diploma in Forensic Science Programme (PGDFS)

Course code	Semester	Subjects	Max.Marks		Total Marks	Hrs/week	Credits
			IA	Sem. end Exam			
	I	Compulsory Courses					
DP33T101	1.1	Basics of Forensic Science	25	75	100	04	04
DP33T102	1.2	Essentials of Forensic Science	25	75	100	04	04
DP33T103	1.3	Crime Scene Management	25	75	100	04	04

DP33T204	2.4	Forensic Instrumentations	25	75	100	04	04
DP33P205	2.5	Practical's –II	25	75	100	04	04
		Total Marks for the Second Semester	125	375	500	20	20
		GRAND TOTAL (SEMESTER I& II)	250	750	1000	40	40

*All Courses are compulsory

P. G.DIPLOMA IN FORENSIC SCIENCE

SEMESTER I SYLLABUS

PGDFS	1.1 Basics of Forensic Science (DP33T101)
Course outcomes	<p>After successfully completing this course students</p> <ul style="list-style-type: none"> • Are able to understand the origin of forensic science. • Will understand different branches been helping hand for forensic science in probing crime. • Will obtain knowledge regarding forensic science laboratories, its functions and administration. • Will gain knowledge regarding conclusive evidences like fingerprint and DNA • Will be able to gain knowledge regarding different laws

CourseCode	DP33T101
PGDFS	1.1 Basics of Forensic Science
UnitNo.	Contents of Unit
Unit I	<p>History, Development and Fundamentals of Forensic Science</p> <ol style="list-style-type: none"> 1. Definition and origin of term “Forensic” 2. Nature and scope, Principles of Forensic Science 3. Global development of Forensic Science 4. Pioneers of forensic science and their contribution to various branches of forensic science 5. Organizational structure of Forensic science Laboratories in India
Unit II	<p>Branches in Forensic Science</p> <ol style="list-style-type: none"> 1. Physics divisions-Ballistics, voice, audio-video, automobile engineering 2. Chemistry division- chemicals, drugs, poisons extraction and examination 3. Questioned documents division-(stylistics, linguistics, counterfeit) 4. Cyber division, superimposition, forensic artistry 5. Fingerprint division(Prints and other impressions) 6. Forensic Psychology(Criminal profiling, polygraph, narcoanalysis, brain mapping)

Unit III	Physical Evidences 1. Physical evidences- Definition, Types 2. Biological evidences- Blood, semen, saliva, Hairs and fibers 3. Physical evidences- Fingerprints, footprints, Tool mark, explosives, ballistics etc 4. Chemical evidences- Drugs, Poisons, Alcohol 5. Trace evidences-Glass, fibres, Paint, petroleum products, cement etc
Unit IV	Laws relating to expert and scientific evidence 1. Expert- Definition, expert evidence. 2. Special provisions in CrPC 1973 on experts' attendance in court. 3. Important sections in Indian Evidence act about expert and evidences(e.g.-Section 45) 4. Special laws- The drugs Act-1940, Narcotic Drugs and Psychotropic Substances Act-1985, The Arms Act-1959, Explosives Act-1984.

Suggested Readings

PGDFS	1.2 Essentials of Forensic Science (DP33T102)
Course outcomes	<p>After successfully completing this course students</p> <ul style="list-style-type: none"> • Will be able to understand the historical development of fingerprint science, its types, development and classification. • Will have a general understating regarding types of documents, and its characteristics • Will gain knowledge regarding various aspects of forensic biology and serology • Will understand the importance of ballistic evidences in investigation.

Course Code	DP33T102
PGDFS	1.2 Essentials of Forensic Science
Unit No.	Contents of Unit
Unit I	<p>Fingerprints and other impressions</p> <ol style="list-style-type: none"> 1. History and development 2. Formation of friction ridges, Classification of fingerprints(Patterns), Types of fingerprints (latent, patent and plastic) 3. Henry’s classification system, extension of Henry’s system, Single digit classification, Three levels of examination 4. Comparison of fingerprints-Class and Individual characteristics 5. Developmental techniques latent fingerprints
Unit II	<p>Questioned document</p> <ol style="list-style-type: none"> 1. Introduction, definition, scope and significance. 2. Principles of handwriting, factors affecting hand writing, Class and individual characteristics of handwriting and type writings. 3. Various types of forgeries, alterations and their examination 4. Handling, care and preservation of documents. 5. Detection and decipherment of alterations, erasures including additions, overwriting, obliterations. 6. Advancements in forensic document examination.
Unit III	<p>Forensic biology and serology</p> <ol style="list-style-type: none"> 1. Basics and Examination of various body fluids-blood, semen, saliva, sweat, urine 2. Examination of various biological evidences-diatoms, human and animal hair. 3. DNA-Structure, coding and non coding DNA 4. PCR amplification, technology and methodology 5. Paternity and maternity testing

Unit IV	Forensic Physics and Ballistics <ol style="list-style-type: none"> 1. Introduction to Forensic ballistic, History of Firearms 2. Classification of firearms 3. Types of Ammunition, Projectiles, Mechanism of Firing 4. GSR-Detection methods and analysis 5. Gunshot wounds, Nature of Injuries–Entry and Exitwounds

PGDFS	1.3 Crime Scene Management (DP33T103)
Course outcomes	<p>After successfully completing this course students</p> <ul style="list-style-type: none"> • Will be able to understand basics of crime scene, significance, physical evidences and certain procedures relating to crime scene investigation • Will have a deeper understanding regarding crime scene photography, Collection and preservation of various evidences. • Will be able to reconstruct the crime scene.

Course Code	DP33T103
PGDFS	1.3 Crime Scene Management
Unit No.	Contents of Unit
Unit I	<p>Crime Scene investigation</p> <ol style="list-style-type: none"> 1. Crime scene:- Definition, Importance, problems, location, nature of scene 2. Classification of crime scene 3. Significance and ethics of crime scene investigation 4. Physical Evidences: Definition, Importance, Utility and sources, Types of physical evidences(physical, chemical, biological and digital) 5. Crime scene procedure- Role of first responding officer, initial crime scene response, crime scene communication, legal implications for crime scene search
Unit II	<p>Crime scene documentation, collection and preservation of physical evidences</p> <ol style="list-style-type: none"> 1. Crime Scene photography- Types of Cameras, types media, number of photographs, admissibility of photographs, videography of the crime scene 2. Collection and preservation of trace and physical evidences- Fingerprints, Impression Evidence, Tool Marks, Hair and Fiber Evidence, other Trace Evidence (Glass, Paint and Soil), 3. Collection and preservation of explosives-Firearms, explosives Accelerants and Flammable Fluids. 4. Collection and preservation of Biological Evidence-Blood, Body Fluids and Tissue), Questioned Document, Drug Evidence and Bite Mark Evidence.

Unit III	Crime scene reconstruction <ol style="list-style-type: none"> 1. Definition, nature and stages of crime scene reconstruction. 2. Reconstruction based on blood spatter patterns, shooting range of firearm projectile and gunshot residue 3. Linking cases by Modus oprendi and signatures 4. Crime scene analysis, interpretation of exhibits and data interpretation. 5. Principle of analysis and ethics in crime scene analysis
Unit IV	Crime scene investigation <ol style="list-style-type: none"> 1. Crime investigation in case of homicide 2. Crime investigation in case of suicide 3. Crime investigation in case of accidental and negligence death 4. Crime investigation in case of road and vehicular accidents 5. Crime investigation in case of rape and sexual assault

PGDFS	1.5 PRACTICALS – I (DP33P105)
Course outcomes	After successfully completing this course students <ul style="list-style-type: none"> • Will be able to scientifically analyse the scene of crime • Will be able to sketch different types of crime scenes • Will be able to identify types of wounds and injuries • Will be able to differentiate between genders through human dentition • Will be able to apply different types of blood tests

1.5	PRACTICALS – I
Course code	(DP33P105)
1.	Locating and fixing of physical clues in different types of simulated crime scenes (Murder, suicide, theft, burglary, rape, etc)
2.	Analysis of different types of Simulated crime scenes (Murder, suicide, theft, burglary, rape, etc)
3.	Sketching of different types of simulated crime scenes (Murder, suicide, theft, burglary, rape, etc)
4.	Examination and analysis of various types of wounds and injuries
5.	Determination of sex through bones and age through human dentition
6.	Examination and comparison of human and animal hair
7.	Examination of different types of fibres
8.	Blood Tests: Benzedine, Phenolphthalein, Haemin crystal test and Blood grouping

*Evaluation of Practical Journal

P. G.DIPLOMA IN FORENSIC SCIENCE

SEMESTER II SYLLABUS

PGDFS	2.1 Cybercrime and Cyber Security (DP33T201)
Course outcomes	<p>After successfully completing this course students</p> <ul style="list-style-type: none"> • Will be able to use and understand the subject matter of cybercrime and cyber security • Will have a general understating regarding evolution of the cybercrime and its laws • Will be able critically evaluate trends in cyber crime • Will begin to think critically about types of cybercrime, investigative methods and recent trends in cybercrime.

Course Code	DP33T201
PGDFS	2.1 Cybercrime and Cyber Security
UnitNo.	Contents of Unit
Unit I	<p>Introduction to computer forensics</p> <ol style="list-style-type: none"> 1. Cyberspace and Criminal Behaviour 2. Cyber forensic investigative steps 3. Types of cyber crimes 4. Digital evidence search, seizure and preservation, IT Act
Unit II	<p>Identity Theft and Identity Frauds</p> <ol style="list-style-type: none"> 1. Physical Methods of Identity Theft 2. Mail Theft, Dumpster Diving, Theft of Computers, Bag Operations, 3. Child Identity Theft, Insiders, Fraudulent or Fictitious Companies, 4. Card Skimming, ATM Manipulation, and Fraudulent Machines 5. Virtual or Internet-Facilitated Methods, Phishing, Spyware and Crimeware
Unit III	<p>Cyber forensic investigative tools and Mobile forensics</p> <ol style="list-style-type: none"> 1. Disk imaging, Data recovery tools, and Network forensic tools 2. Mobile forensics: IMEI and CDR 3. The Emergence of e-Cash 4. Prepaid Cards, Stored Value Cards, Mobile Payments and Internet Payment Services
Unit IV	<p>Cyber security and cyber terrorism</p> <ol style="list-style-type: none"> 1. SCADA systems, Firewalls and wireless access points, 2. Network protocols, Password management, OTP, antivirus software and QR code. 3. Roots of Contemporary Terrorism, Propaganda, Information Dissemination, Recruiting, and Fundraising, Attack Mechanism.

Suggested readings:

1. Bhusan, M. (2018). *Fundamental of cyber security: Principles, Theory and Practices*, BPB Publications, ISBN-9789387284807
2. Bothra, H. (2017). *Hacking*, Khanna Publishing, ISBN-9789386173058
3. Britz, M. T. (2004). *Computer Forensic Science and Cybercrime: An Introduction*, Pearson Education India; third edition, ISBN-13: 978-0132677714.
4. Godbole, N., & Belapure, S. (2011). *Cyber Security*, Wiley Publication, ISBN- 978-8126521791
5. Jain, N., & Kalbande, D. R. (2016). *Digital Forensic: The Fascinating World of Digital Evidences*, Wiley Publication, ISN- 978-8126565740
6. Jain, N., & Menon, R. (2020). *Cyber Security and Cyber Laws*, Noida, India: Wiley India Pvt Ltd. 1402, ISBN- 978-9390395750
7. Mali, P. (2017). *Cyber law & Cyber Crimes simplified*, Cyber Infomedia.
8. Pieprzyk J., & Hardjono, T. (2010). *Fundamentals of Computer Security*, Springer, ISBN-13: 978-3642077135
9. Sandhu, J. S. (2021). *Cyber Infomedia*, Notion press, ISBN- 979-8885036221
10. Singer, P. W., & Friedman, A. (2013). *Cybersecurity and Cyberwar: What Everyone Needs to Know*, USA: Oxford University Press India; Illustrated edition, ASIN: 0199918112, ISBN-13: 978-0199918119.

PGDFS	2.2 Fingerprint Science (DP33T202)
Course outcomes	<p>After successfully completing this course students</p> <ul style="list-style-type: none"> • Will be able to understand the origin of fingerprint science. • Will obtain knowledge regarding different patterns of fingerprint and its applicability in crime investigation. • Will have a general understating regarding formation of ridges in fingers, ridge characteristics and its applicability in court of law. • Will be able critically evaluate new methods of identification and analysis.

Course Code	DP33T202
PGDFS	2.2 Fingerprint Science
Unit No.	Contents of Unit
Unit I	<p>Introduction to Dactyloscopy</p> <ol style="list-style-type: none"> 1. Origins and development of fingerprints, 2. Patterns of fingerprints, visible, latent and plastic fingerprints. 3. Methods for visualizing, lifting, and comparing latent fingerprints
Unit II	<p>Biological formation of friction ridges</p> <ol style="list-style-type: none"> 1. Formation, factors effecting finger prints 2. Loss of finger prints and consideration 3. Finger prints on documents and analysis 4. Aged prints collection and examination
Unit III	<p>Ridge Characteristics</p> <ol style="list-style-type: none"> 1. Types of Ridge Characteristics 2. Principles of Friction Ridge Analysis 3. Relevance of Friction Ridge Prints 4. Elimination Prints
Unit IV	<p>Fingerprint as Evidence</p> <ol style="list-style-type: none"> 1. Principle of fingerprints, Admissibility, collection and preserving 2. IAFIS, Fingerprint images from FTIR-based optical scanner, 3. capacitive scanner; piezoelectric scanner; thermal scanner;

Suggested readings:

1. Daluz, H. M. (2019). *Fundamentals of Fingerprint Analysis*, CRC Press, ISBN 9780367778743.
2. Federal Bureau of Investigation & Department of Justice, (2010). *The Science of Fingerprints: Classification and Uses*, Books Express Publishing, ISBN: 978-1780390345
3. Galton, F. (1892). *Finger Prints*, London: Macmillan And Co nts
4. Giuliao, A. (2016). *Fingerprint Identification Handbook*, Edizioni Minerva Medica, ISBN- 978-8877118776
5. Henry, E. R. (1900). *Classification and Uses of Finger Prints*, London: His Majesty's Stationary Office.
6. Houck, M. M., &Siegel, J. A. (2015). *Fundamentals of Forensic Science*, Elsevier Ltd., 978—12-800037-3. doi: <https://doi.org/10.1016/C2013-0-12985-6>
7. Lee, H. C. (2011). *Physical Evidence in Forensic Science*, Lawyers & Judges Pub Co; 3rd edition, ISBN-10: 1936360012, ISBN-13: 978-1936360017.
8. Nabar, B. S. (2013). *Forensic science in crime investigation*, Hyderabad, India: Asia Law House Hyderabad.
9. Sharma, B.R. (2014). *Forensic science in criminal investigation and trials*, New Delhi, India: Universal Law Publishing Co. Pvt. Ltd.
10. Tubid, P. T. (n.d.). *Dactyloscopy: Science of Fingerprint Classification and Identification*, Rex Bookstore, Inc., ISBN- 9789712320644

PGDFS	2.3 Forensic Documents (DP33T203)
Course outcomes	<p>After successfully completing this course students</p> <ul style="list-style-type: none"> • Will be able to understand evolution and functions of question document examiner • Will have a general understating regarding questioned documents, its characteristics in crime investigation • Will be able to analyze the effects of writing instruments on handwriting • Will have better understanding regarding things effecting documents, Neurological disease and its identification in suspects.

Course Code	DP33T203
PGDFS	2.3 Forensic Documents
Unit No.	Contents of Unit
Unit I	<p>Introduction to handwriting</p> <ol style="list-style-type: none"> 1. The mechanics of handwriting 2. Factors influencing handwriting 3. Natural ability, physical condition, writing situation 4. Influence of medications writing surface, writing instrument
Unit II	<p>Handwriting examination</p> <ol style="list-style-type: none"> 1. Comparison, distortion, disguise, imitation 2. signatures, guided hand, juvenile writing 3. computer-assisted recognition, forgery, memory, 4. simulation, tracing, free style, auto forgery, 5. writing lift, photographic lift, and hypnosis and handwriting
Unit III	<p>Effects of the writing instrument</p> <ol style="list-style-type: none"> 1. Intersecting lines, graphology 2. Documents and the rules of evidence 3. The purpose of document examination 4. Origin, production source, production process, inscription 5. Chastity, integrity, legitimacy
Unit IV	<p>Neurological disease and motor control</p> <ol style="list-style-type: none"> 1. Parkinson's disease, progressive supranuclear palsy and corticobasal degeneration 2. Essential tremor. Multiple system atrophy 3. Multiple sclerosis, huntington's disease 4. Lower motoneuron disease, alzheimer's disease and dementia with lewy bodies

Suggested readings:

1. Angel, M., & Kelly, J. S. (2021). *Forensic Document Examination in the 21st century*, CRC Press, ISBN: 9780367251550
2. Bisesi, M. (2006). *Scientific Examination of Questioned Documents*, CRC Press, ISBN: 978-0849320446
3. Djioua M., and Plamondon, R. (2009). Studying the variability of handwriting patterns using the kinematic theory. *Human Movement Science*.
4. Girad, J. E. (2017). *Criminalistics: Forensic science in crime*, Jones and Bartlett Publishers, Inc; 4th edition, ISBN-10: 1284142612, ISBN-13: 978-1284142617.
5. Hilton, O. (1956). *Scientific Examination of Questioned Documents*, Callaghan.
6. Koppennavar, K. M. (2007). *Forensic Document Examination: Principles and Practice*, Springer Science & Business Media
7. Nabar, B. S. (2013). *Forensic science in crime investigation*, Hyderabad, India: Asia Law House Hyderabad.
8. Osborn, A. S. (1910). *Questioned Documents*, Brooklyn, New York: The Genesee Press.
9. Sharma, B.R. (2014). *Forensic science in criminal investigation and trials*, New Delhi, India: Universal Law Publishing Co. Pvt. Ltd.
10. Vastrick, T. W. (2004). *Forensic Document Examination Techniques*, Inst of Internal Auditors, ISBN- 978-0894135415.

PGDFS	2.4 Forensic Instrumentation (DP33T204)
Course outcomes	<p>After successfully completing this course students</p> <ul style="list-style-type: none"> • Will be able to understand types of instruments used in forensic investigation • Have a general understanding on different types of microscopes and its function in crime detection • Are able to comprehend the signification role of light source in crime scene • Will begin to think critically how different types of chromatography aid in crime investigation.

Course Code	DP33T204
PGDFS	2.4 Forensic Instrumentation
Unit No.	Contents of Unit
Unit I	<p>Introduction to Forensic instrumentations</p> <ol style="list-style-type: none"> 1. Classification of Analytical Methods, 2. Types of Instrumental Methods 3. Calibration of Instrumental Methods 4. Selecting an Analytical Method
Unit II	<p>Magnification Systems</p> <ol style="list-style-type: none"> 1. The Lens used in microscope 2. Compound Magnifying Systems 3. The Comparative Microscope 4. Refractive Index
Unit III	<p>Light source in forensic investigation</p> <ol style="list-style-type: none"> 1. General Principles of light source 2. Regions of the electromagnetic spectrum 3. Theory of IR Absorption Spectrometry 4. IR and UV sources
Unit IV	<p>Chromatography</p> <ol style="list-style-type: none"> 1. General Description and application in forensic investigation 2. Gas Chromatography 3. Liquid Chromatography 4. Thin Layer Chromatography

Suggested readings:

1. Anderson, N. A. (2016). *Instrumentation for Process Measurement and Control*, CRC Press, ISBN: 978-1138031951
2. Bell, S. (2019). *Forensic Science: An Introduction to Scientific and Investigative Techniques*, CRC Press, ISBN: 978-1138048126
3. Gaensslen, R. E., Kubic, T. A., Desion, P. J., & Lee, H. C. (1985). *Instrumentation and analytical methodology in forensic science*, American Chemical Society and Division of Chemical Education, Inc.
4. Garzon, R. D., & Petraco, N. (2009), *Forensic Science Laboratory Manual and Workbook*, CRC Press, ISBN: 978-1420087192,
5. Houck, M. M., & Siegel, J. A. (2015). *Fundamentals of Forensic Science*, Elsevier Ltd., 978—12-800037-3. doi: <https://doi.org/10.1016/C2013-0-12985-6>
6. Hussain, C. M., Rawtani, D., Pandey, G., & Tharmavaram, M. (2021). *Handbook of Analytical Techniques for Forensic Samples*, Elsevier Inc.
7. Jackson, G. & Verbeck, G. (2021), *Forensic Chemistry: Instrumentation and Applications*, Wiley Publication, ISBN: 9781118703533
8. Kumar, S. S. (2021). *A Textbook on Measurement and Instrumentation*, Notion Press, ISBN: 979-8885309370
9. Saferstein, R. (2017). *Criminalistics: An Introduction to Forensic Science*, Pearson, ISBN: 978-0134477596
10. Stuart, B. H. (2012). *Forensic Analytical Techniques*, Wiley Publication.

PGDFS	2.5 PRACTICALS – I (DP33P205)
Course outcomes	After successfully completing this course students <ul style="list-style-type: none"> • Will be able to develop latent fingerprints through physical and chemical methods • Will be able to conduct fingerprint examination • Will be able to identify the authenticity of a document • Will be able to conduct TLC on inks

2.5	PRACTICALS – II
Course Code	DP33P205
1.	Recording of fingerprints
2.	Development of latent fingerprints through physical and chemical methods
3.	Identification and comparison of ridge characteristics
4.	Fingerprint classification: Henry's 10 digit classification, Single digit classification
5.	Examination of Questioned Documents through class and individual characteristics of Handwritten documents
6.	Examination of Questioned Documents through class and individual characteristics of Typewritten documents
7.	Examination of security features of currency notes and coins
8.	Distribution of inks through TLC
9.	Visit to University Instrumentation centre for observation of different scientific instruments

*Evaluation of Practical Journal
